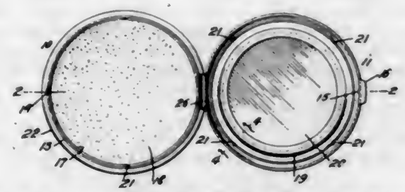
In combination, an operating mechanism for motor vehicle signals, comprising a cylindrical casing being adapted to be fixed to the steering column of the vehicle and disposed horizontally to extend longitudinally relatively to the vehicle, said casing being closed at its rear end and open at its forward end, said cylinder formed with a plurality of parallel disposed slots of different lengths extending longitudinally and opening at their forward ends into a common aperture, said aperture converging toward its forward end, a slide member mounted in said casing and longitudinally and rotatably shiftable in the latter, a laterally disposed operating handle provided with a shank, said shank extending through said aperture and fixedly secured to said slide member, said slide member normally disposed in the forward end of

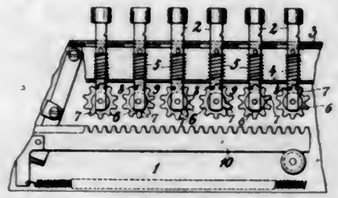
said casing, a spiral spring mounted in said casing and engaging the rear end of the said slide member and the rear end of the casing for normally maintaining said slide member in the forward end of the said casing, each of said slots having its rear end formed with a right angularly disposed slot portion, said shank adapted for travel in each of said slots for retracting said slide member in said casing and for engagement in associated slot portions for maintaining said slide member in the retracted position in said casing, and a flexible member secured to the forward end of said slide member and being adapted to be attached to the vehicle signal, substantially as described and for the purpose set forth.

1,633,253. PROJECTION TRACING TABLE. LODEWYK J. R. HOLST, Brookline, Pa., assignor to Brock & Weymouth, Incorporated, Philadelphia, Pa., a Corporation of Delaware. Filed June 23, 1925, Serial No. 39,002. Renewed Dec. 9, 1926. 2 Claims. (Cl. 88—24.)



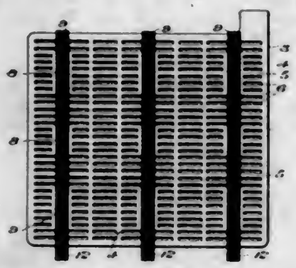
1. A scale adjusting projector and tracing table for photographic views comprising a substantially horizontal transparent support for a tracing, coincident with the anterior focal plane of said projector, a lens having its axis substantially horizontal and below said transparent support, a substantially vertical horizontally movable plate holder adapted to hold the photographic views in the posterior focal plane of the projector, and a reflector adapted to reflect the view upward, in combination with automatic focusing means whereby the anterior focal plane is maintained in the top surface of said horizontal transparent support for all scale adjustments of said projector.

1,633,254. FIRE EXTINGUISHER. CHARLES O. JOHNSTON, New York, N. Y., assignor, by mesne assignments, to International Fire Equipment Corporation, New York, N. Y., a Corporation of Delaware. Filed July 9, 1926. Serial No. 121,334. 11 Claims. (Cl. 169—26.)



1. A support for grenade fire extinguishers comprising a supporting member having a loop for suspending the supporting member and a ring carried by said member and adapted to encircle and form the sole support for the grenade and a fusible connection between said ring and said member.

1,633,255. ARTICLE-CONTAINING CASE. NATHAN KASDAN, New York, and DANIEL POLLACK, Brooklyn, N. Y. Filed Feb. 18, 1926. Serial No. 89,021. 11 Claims. (Cl. 132—83.)

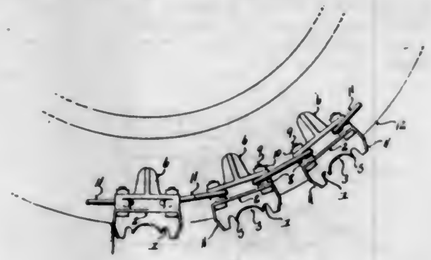


1. In a device of the character described, two sections, one of which is provided with a substantially solid bead having a slot extending along the same, a pintle at the outer side of the slot and formed by the margin of the bead thereat, and the other of which sections is provided with a knuckle which receives said pintle, whereby a hinge-joint is provided between said sections.

1,633,256. KEY MECHANISM FOR CALCULATING AND ADDING MACHINES. AUGUST KOTTMANN, Sommerda, Germany, assignor to the Firm: Rheinische Metallwaaren- und Maschinenfabrik, Dusseldorf-Derendorf, Germany. Filed May 12, 1925, Serial No. 29,673, and in Switzerland Mar. 20, 1925. 2 Claims. (Cl. 235—60.)

1. An actuating mechanism for calculating machines, comprising, in combination, a key, an operating member, a gear carried by said key for engagement at will with said operating member to be rotated thereby, and a projection on said gear located thereon in accordance with the value of said key and co-operating with said key to limit the rotation of said gear.

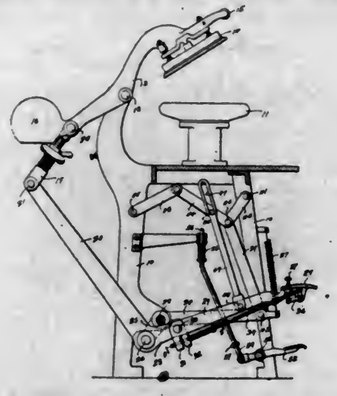
1,633,257. STORAGE BATTERY. FRANK T. LAHEY, Akron, Ohio. Filed May 5, 1922. Serial No. 558,641. 7 Claims. Cl. 136—151.)



1. In a storage battery, an electrode, and means for supporting said electrode within a jar comprising a plurality of insulating strips said strips being vulcanized in place on the electrode and extending below the lower edge of the electrode.

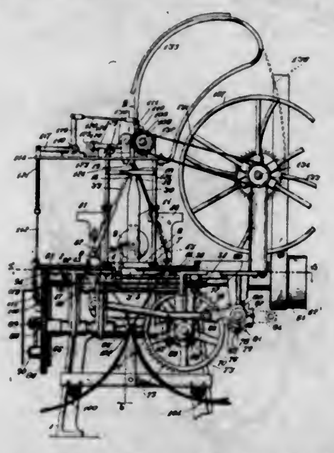
1,633,258. REFRACTORY METAL ALLOY OF HIGH DENSITY AND HIGH MELTING POINT AND METHOD OF MAKING THE SAME. CLEMENS A. LAISE, Haworth, N. J. Filed Oct. 8, 1925. Serial No. 61,164. 10 Claims. (Cl. 75—1.)

1. A metallic body comprising a porous compressed mass of tungsten and a decomposed nitride of refractory metals, and a base metal filling the pores of said mass.



1,633,259. PROPULSION LINK FOR ENDLESS TRACTION BELTS. ADOLPH L. LANGENFELD, New Holstein, Wis. Filed Mar. 5, 1927. Serial No. 173,104. 2 Claims. (Cl. 305—20.)

1. In a traction belt structure, the combination of a plurality of tread pieces each having a downwardly arched body portion provided with a central opening and having a wheel-engaging guide lug located at opposite sides of the tread piece, each guide lug having anchor posts contacting with the body of the tread piece, and links joining successive tread pieces and looped around the posts of the guide lugs.

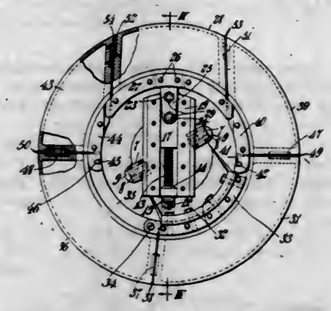


1,633,260. PRESS. JAMES C. LEDBETTER, Brooklyn, N. Y., assignor, by mesne assignments, to The Prosperity Company, Inc., Syracuse, N. Y., a Corporation of New York. Filed Mar. 29, 1924. Serial No. 702,742. 19 Claims. (Cl. 68—9.)

1. A pressing machine comprising in combination, co-operating pressing members, means embodying a toggle which when straightened sets up an initial press closing motion to bring the members into contact, a treadle lever, means actuated by said treadle lever during the initial depression thereof for straightening the toggle, means comprising a horizontal lever disposed parallel to the treadle lever for exerting an endwise thrust upon

the toggle during further depression of the treadle lever, and means actuated by the treadle lever to operate the horizontal lever.

1,633,261. REED-BRAID-MAKING MACHINE. MARSHALL B. LLOYD, Menominee, Mich., assignor to Heywood-Wakefield Company, Boston, Mass., a Corporation of Massachusetts. Filed May 14, 1924. Serial No. 713,201. 28 Claims. (Cl. 139—11.)



1. A reed braid making machine embodying therein means for shifting a plurality of aligned but spaced stakes to opposite sides of a neutral plane, and means for winding a strand in enveloping relation so that it passes back and forth and over and under the stakes, said stake shifting means operating to pack the strand in place.

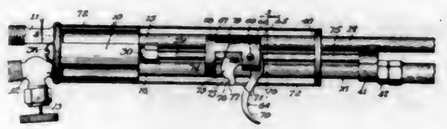
1,633,262. VEGETABLE SEA-GROWTH DERIVATIVE AND A METHOD FOR THE PREPARATION THEREOF. GEORGE F. MEEHAN, Far Rockaway, and ARTHUR L. KENNEDY, New York, N. Y., assignors, by mesne assignments, to Kel-Plastic Corporation, New York, N. Y., a Corporation of Delaware. Filed Feb. 18, 1924. Serial No. 693,518. 3 Claims. (Cl. 252—1.)

1. A process for the preparation of a derivative from vegetable sea growth, which comprises treating vegetable sea growth with a solution containing a mineral acidic agent capable of converting the natural complex carbohydrates into less complex carbohydrates, and then adding a precipitant to the solution thus obtained.

1,633,263. COLLAPSIBLE CORE AND CHUCK. LESTER A. MORELAND, Trenton, N. J., assignor to The de Laski & Thropp Circular Woven Tire Company, Trenton, N. J., a Corporation of New Jersey. Filed Jan. 13, 1923. Serial No. 612,415. 3 Claims. (Cl. 154—9.)

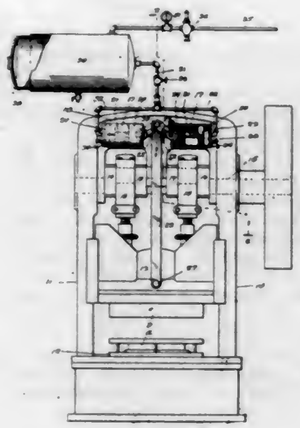
1. A collapsible core and chuck adapted for use in the manufacture of tires of relatively large cross section and with inextensible beads including, hinged segments, a plurality of segments hinged to said first-named segments while in engagement with the tire but freely removable upon being swung in the plane of the core out of such engagement, a segment adapted to slide between said last named segments in the plane of the core for disengaging it from the tire and then to be removed from engagement with the other segments by a movement in a substantially axial direction to permit the swinging and removal of said freely removable segments, and means located without the plane of the core for effecting the radial movement of said sliding segment.

1,633,264. PET-COCK AND PRIMING-CUP CLEANER. GEORGE T. MORRIS, Missoula, Mont. Filed Dec. 2, 1925. Serial No. 72,627. 1 Claim. (Cl. 137—70.)



In combination with a pet cock having a duct therethrough, a cleaning device of the kind described, comprising an ear mounted upon the end of the pet cock so as not to obstruct the mouth of the orifice thereof; a U-shaped cleaning element having one stem slidingly engaging the duct of the cock while an exterior stem is slidably supported by the said ear at the end of the cock, the extremity of the said exterior stem being formed into a stop adapted to engage the said ear; a set collar mounted upon the bight of the U-shaped element; and a coil spring encircling the exterior stem of the said U-shaped element between the said collar and the said ear and adapted normally to partially withdraw the U-shaped element from the pet cock.

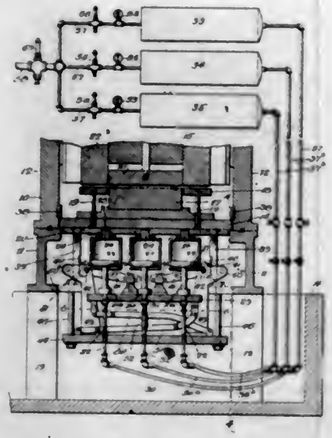
1,633,265. TORCH. GEORGE A. MORRISON, Park Ridge, Ill., assignor to Torchweld Equipment Co., Chicago, Ill., a Corporation of Delaware. Filed July 3, 1926. Serial No. 120,418. 12 Claims. (Cl. 251—132.)



6. In a gas-burning device comprising a fluid-passage-equipped member, a shell surrounding said member and containing a slot, and a valve controlling said passage

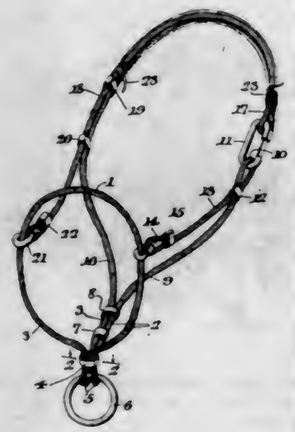
and yieldingly forced in one direction, means for controlling said valve comprising a pivoted lever extending through said slot and having a cam surface for engage-

ing said valve, said lever having a stop-forming portion adapted to engage said valve and operating to prevent said lever from striking the end wall of said slot.



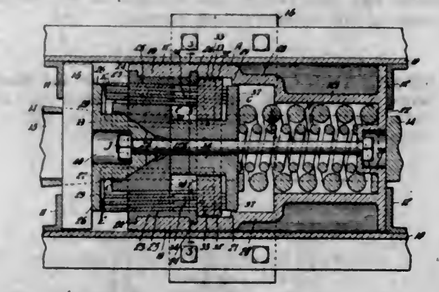
1,633,266. POWER EQUALIZER FOR POWER PRESSES. JOHN NELSON, Chicago, Ill. Filed June 14, 1926. Serial No. 115,784. 12 Claims. (Cl. 113—38.)

1. The combination with a stationary press member and a movable press member which is movable between two extreme positions, of fluid pressure means mounted on one of said members, and power transmitting means for transmitting pressure from said fluid pressure means to the movable press member, and including a multi-directional force transmitting member connected to the other member of the press and operating it to increase the pressure of said pressure means during the first portion of the movement of the movable press member from extreme position to another, and operating during remainder of said movement of the movable press member, to transmit pressure from said pressure means to said movable press member.



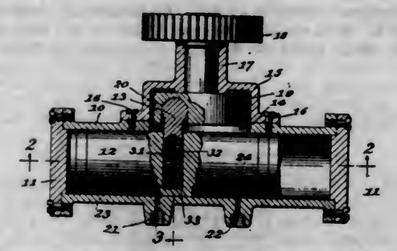
1,633,267. CUSHIONING MEANS FOR POWER PRESSES. JOHN NELSON, Chicago, Ill. Filed June 14, 1926. Serial No. 115,785. 19 Claims. (Cl. 113—46.)

1. In a power press, the combination with the bolster and ram members of a press, of means to resist breaking down of the press under abnormal pressure between the bolster and ram members and comprising fluid pressure operated cushioning means having one element thereof connected to one of said members and acting to unyieldingly hold said member in fixed position against a maximum predetermined pressure between said members,



but capable of yielding when said member is subjected to an abnormal pressure by the other member in excess of said maximum predetermined pressure.

1,633,268. HALTER. PAUL D. NELSON and BERT C. LAMMERS, Venango, Nebr. Filed Sept. 10, 1926. Serial No. 134,635. 4 Claims. (Cl. 54—24.)



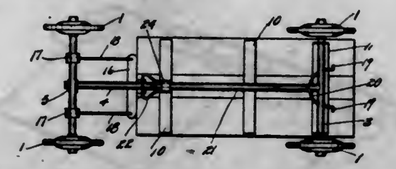
1. A halter formed of a single piece of rope, said rope having a looped portion forming a nose piece, the ends of rope after the formation of the nose piece being bent to form bights, a fastening encircling both bights, a snap fastener, one end of the rope being extended from said bights through the snap fastener and back to one side of said nose piece, the other end of said rope being of greater length and extended from said bights through said snap fastener to form a neck piece and returned on itself to the other side of the nose piece, and fastening means for connecting said ends of the rope to the nose piece.

1,633,269. FRICTION SHOCK-ABSORBING MECHANISM. JOHN F. O'CONNOR, Chicago, Ill., assignor to W. H. Miner, Inc., Chicago, Ill., a Corporation of Delaware. Filed June 8, 1925, Serial No. 35,701. Renewed Apr. 18, 1927. 7 Claims. (Cl. 213—33.)

1. In a friction shock absorbing mechanism, the combination with a friction shell having interior curved friction surfaces; of a follower, said shell and follower being relatively movable toward and from each other; two groups of curved friction plates disposed at opposite sides of the mechanism and co-operating with the friction surfaces of the shell, said two groups of plates being movable as a unit during relative movement of said shell and follower; means for arresting movement of certain of said plates of each group after a predetermined portion of the compression stroke to compel the remaining plates to move relatively thereto; a main spring resistance; and lateral pressure-creating means interposed between said two groups of plates for placing the same under lateral pressure upon relative movement of said shell and follower.

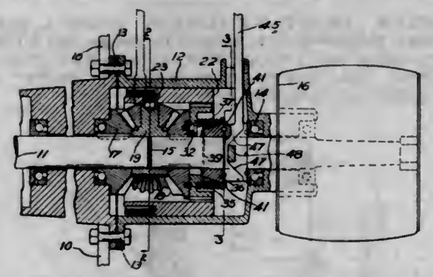
1,633,270. COMPRESSION PUMP. OSWALD A. OLSEN, Bridgeport, Conn. Filed Aug. 28, 1925. Serial No. 53,080. 5 Claims. (Cl. 230—34.)

1. A compression pump comprising a cylinder having an induction port and an eduction port, a piston in said cylinder, and means for reciprocating and oscillating the piston in said cylinder, the piston having an induction port communicating with one end of the cylinder and adapted to communicate with the induction port of the cylinder, and also having an eduction port communicating with the opposite end of the cylinder and adapted to communicate with the eduction port of the cylinder during the whole period while the induction ports of the cylinder and piston before mentioned are in communication.



1,633,271. VAT. CHARLES PAULY, Port Washington, Wis. Filed May 14, 1925. Serial No. 30,388. 1 Claim. (Cl. 257—208.)

A vat comprising an outer shell having inlet and outlet apertures at opposite ends, and an inner pan removably positioned within and spaced from said outer shell, said removable pan having a plurality of longitudinally extending angle irons having vertical flanges resting upon the bottom of the outer shell and having horizontal flanges secured to the under side of the removable pan and having a plurality of longitudinally extending angle irons secured by means of their flanges to the sides of said pan and having the other flanges of such last mentioned angle irons contacting with the sides of the shell,

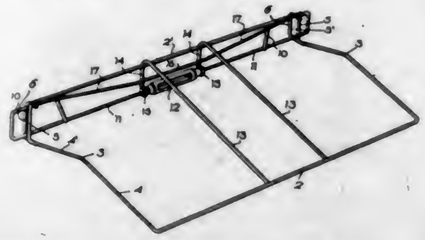


said angle irons being alternately spaced from the ends of the outer shell, whereby a tortuous channel is provided from the inlet opening in the vat to the outlet opening, said pan having a reenforcing outwardly projecting marginal portion extending completely around its upper edge, whereby said pan may be freely grasped and manipulated by means of the reenforced marginal portion.

1,633,272. COASTER WAGON. ALEXIS R. PRIBIL, Saginaw, Mich. Filed Sept. 27, 1924. Serial No. 740,245. 2 Claims. (Cl. 280—87.5.)

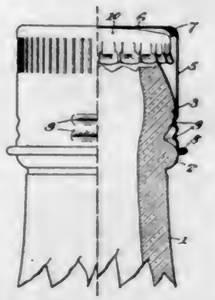
1. A non-tipable coaster wagon comprising front and rear axle members, a tubular longitudinally extending brace integral with the rear axle, a body mounted on said rear axle and secured to said tubular brace to the rear of the front axle, a yoke pivotally mounted on the front axle and to which said brace is pivotally connected, resilient clips frictionally secured to the front axle and loops formed in said clips to which a draft handle is adapted to be detachably secured.

1,633,273. POWER TAKE-OFF DEVICE FOR TRACTORS. PHILIP RAIMER, JOSEPH B. RAIMER, and EDWARD A. ROLFS, Maple Heights, Ohio. Filed Mar. 31, 1924. Serial No. 703,040. 3 Claims. (Cl. 74—34.)



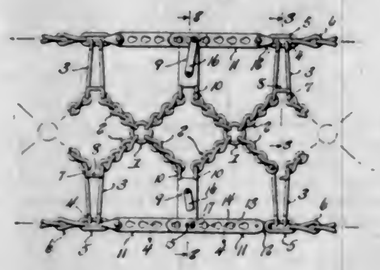
1. The combination with a tractor frame having an opening therein, of a housing having a cylindrical interior removably secured to the frame adjacent the opening, a driving shaft, an aligned driven shaft mounted in the housing, a reversing mechanism connecting the driving and driven shafts and comprising gears on each of them, an axially rotatable member between the gears carrying pinions meshing with them, a sleeve carrying said rotatable member journalled in the cylindrical interior of the housing, and a brake band operating in a recess in the sleeve.

1,633,274. WIRE BRUSH. GEORGE RASMUSEN, Jr., Winnetka, Ill. Filed Mar. 6, 1925. Serial No. 13,540. 3 Claims. (Cl. 15—198.)



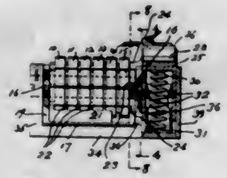
3. A wire tuft formed into two legs, the individual bristles of each leg crossing and intermeshing with the bristles of the opposite leg at a definite point between the ends of the tuft and beyond said point again being bent to extend in the same general direction.

1,633,275. AWNING FOR WINDOWS. RALPH W. RICHARDS, Atchison, Kans. Filed Sept. 15, 1926. Serial No. 135,595. 3 Claims. (Cl. 156—15.)



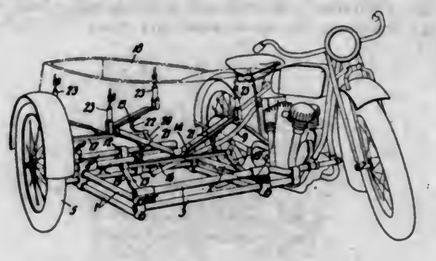
1. In a window awning, a rod-metal shade supporting framework comprising a main frame having forward and rear horizontal rods and side rods the latter having each spaced vertical arms forming a guideway, an endwise extensible sectional rod having at each end a vertical reversely bent portion working in said guideway the sections of said rod having an adjustable connection, collars slidable upon the rod sections, and intermediate brace rods for the main frame having vertical arms connected to said collars and bracing said threaded sections.

1,633,276. RECEPTACLE CLOSURE. ROBERT A. RUSSELL, Ridgewood, N. J., assignor to Paragon Can & Cap Company, Inc., Paterson, N. J., a Corporation of New York. Filed May 19, 1926. Serial No. 110,178. 2 Claims. (Cl. 215—38.)



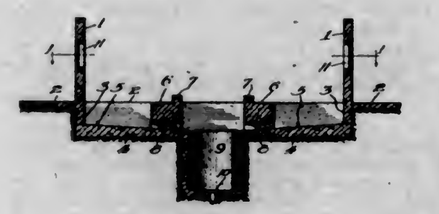
1. A sheet metal receptacle closure including a cylindrical body portion provided with a plurality of sets of horizontally disposed elongated indentations spaced from the top of said body portion, the indentations of each set forming on the inside of the body portion ridge-like projections adapted to engage the wall of a receptacle to hold the closure removably in place thereon, the distance between adjacent indentations of each set being not greater than substantially one twentieth of the circumference of said cylindrical body portion.

1,633,277. TIRE CHAIN. EDWARD A. RYAN and FREDERICK L. MARKSMAN, Milwaukee, Wis. Filed Feb. 23, 1924, Serial No. 694,727. Renewed Mar. 18, 1927. 2 Claims. (Cl. 152—14.)



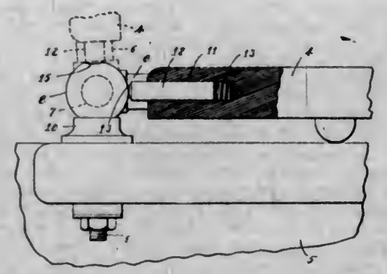
1. A tire chain comprising a pair of side chains, a pair of apertured straps joined to the ends of each of said side chains and adapted to be arranged in overlapping position, a member having a pin adapted to be passed through aligning apertures of said straps, means for retaining said pin in position, and a plurality of anti-skid units interposed between said side chains, one set of units being connected to said member and holding said member in position relatively to said side chains.

1,633,278. TYPOGRAPHIC NUMBERING APPARATUS. WILLIAM E. C. SANDER, Hollis, N. Y. Filed Nov 23, 1923. Serial No. 676,475. 7 Claims. (Cl. 101—88.)



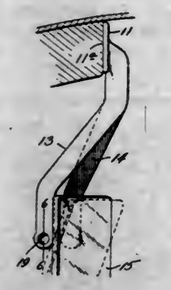
1. A numbering apparatus having a series of type wheels each wheel being provided with a series of ten embossed numerals, serially arranged from zero to nine inclusive; means for rotating said wheels step by step successively, and the movement of each wheel through one space corresponding with one complete revolution of the preceding adjacent wheel; and means for rotating said wheels, said means embodying a rocking member having a pawl for engaging said wheels at intervals equal to the spaces on said wheels, said rocking member swinging external and adjacent to said wheels and centrically thereto, and a resilient plunger for engaging said rocking member to rock same when said plunger is depressed, and a spring closed member for holding said plunger in operating position.

1,633,279. VEHICLE. ANGELO SCALA, Brooklyn, N. Y. Filed Mar. 2, 1926. Serial No. 91,702. 14 Claims. (Cl. 208—45.)



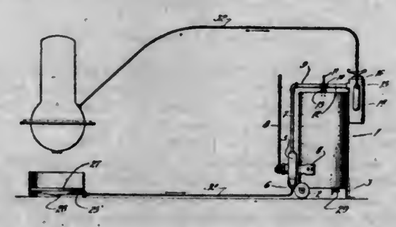
1. A side car for attachment to motorcycles or the like comprising a frame having means to attach it to the motorcycle, and a hub-carrying cross member for the frame adjustable longitudinally thereon independently of said attachment means.

1,633,280. VEHICLE WASHING PIT. JACOB P. NICHOLSON, Chicago, Ill. Filed July 24, 1926. Serial No. 124,598. 3 Claims. (Cl. 72—0.5.)



1. A vehicle washing pit comprising spaced opposite walls projecting above the normal floor level, spaced vehicle runways parallel with and interposed between said walls, the upper surfaces of the runways lying in substantially the same plane as the normal level of the floor immediately adjacent thereto, a curb on the upper edge of each runway, the inside surface of each wall projecting below the normal floor level and terminating in the pit floor, and a drain communicating with the pit floor.

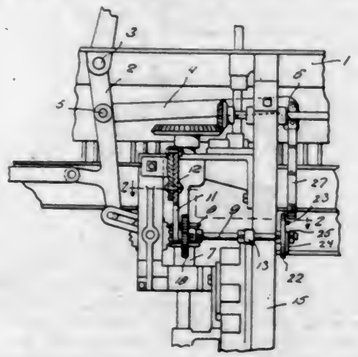
1,633,281. TOILET-SEAT-HINGE MOUNTING. EMIL J. NIELSEN, Rockford, Ill., assignor to Phenolic Products Corporation, Rockford, Ill., a Corporation of Illinois. Filed Sept. 22, 1926. Serial No. 136,903. 5 Claims. (Cl. 4—248.)



1. The combination with a toilet seat having hinge arms projecting from the back thereof, and posts for hingedly mounting the same on a toilet bowl, of a plunger bore provided in said seat opening on the rearward side thereof in line with one of the aforesaid posts, and a spring-pressed plunger received in said bore and extended therefrom into frictional engagement with said post for yieldingly restraining the seat in its swinging movement to and from lowered position and for retaining the same in raised position.

1,633,282. REAR-VIEW MIRROR. JOHN R. OISHEI, Buffalo, N. Y. Filed May 15, 1924. Serial No. 713,519. 4 Claims. (Cl. 45—97.)

4. In a rear view mirror, a reflecting surface, a bracket having an attaching portion with a forward face adapted to be secured against a transverse part of a vehicle and an outer face, and a pair of rigid drop arms extending from the outer face of said attaching portion downwardly and beneath the latter and terminating in advance of said forward face, said arms being substantially in parallel planes extending perpendicular to the faces of said attaching portion, the lower portion of one arm extending beneath the attaching portion at a greater angle of inclination than the companion arm whereby the former terminates in a vertical plane spaced further from the vertical plane of said attaching portion than the latter arm so that a common pivotal axis through the free ends of said arms will be inclined relative to the plane of said attaching portion, and means for adjustably mounting said reflecting surface on the common pivotal axis whereby the reflecting surface will be supported at an inclination to said attaching portion.

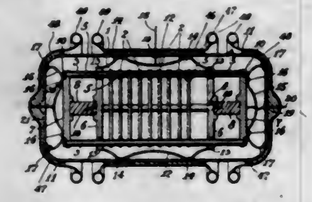


1,633,283. APPARATUS FOR CLEANING CRANK CASES. WILLIAM L. OSBORNE, Los Angeles, Calif., assignor of one-half to A. R. Chandler, Los Angeles, Calif. Filed July 3, 1924. Serial No. 724,089. 6 Claims. (Cl. 184—1.5.)

1. In a portable filling station accessory for cleaning lubricant cases of motor vehicles, the combination with a storage receptacle, a filtering device, a connection for conducting filtered flushing liquid from the device to the lubricant case, means for forwarding used oil withdrawn

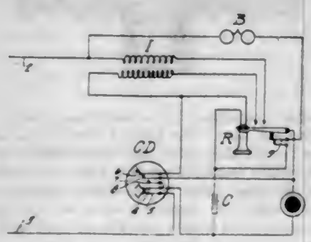
from the lubricant case to said storage receptacle, and means for cutting off said forwarding means from said receptacle and connecting said means to said filtering device, said forwarding means being operable to maintain a cyclic circulation of a flushing liquid through the lubricant case, and through the filtering device and said connection back to the lubricant case, the cyclic cleansing circulation of the flushing liquid being maintained isolated from the used oil within the storage receptacle.

1,633,284. STOP MOTION FOR ROVING MACHINES. JOHN H. OWEN, Newberry, S. C., assignor of one-third to Thomas N. Crocker and one-third to Byron V. Chapman, Newberry, S. C. Filed June 28, 1926. Serial No. 119,091. 1 Claim. (Cl. 192—139.)



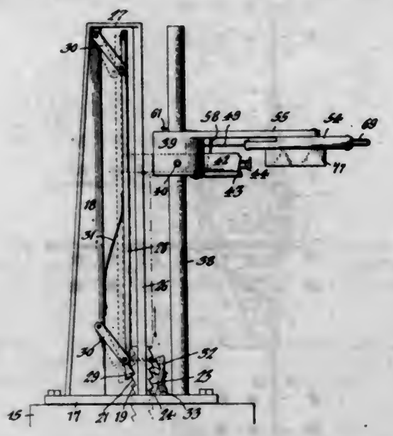
In a stop motion for a roving machine, the combination with the frame, vertical change shaft, and the knock-off lever, of means interposed between the shaft and the lever and operatively connected therewith whereby the lever will be actuated at a predetermined time, said means comprising a horizontally arranged shaft supported on the frame, intermeshing gearing connecting one end of the shaft with said change shaft, a leg depending from the free end of the knock off lever, and rigidly secured thereto, the lower end of the leg being bent laterally to provide a foot, a heel secured at the rear end portion of said foot, means carried by the other end of the horizontally arranged shaft adapted to engage the foot and the heel thereon to move said leg upwardly and operate the knock-off lever, said last mentioned means comprising a disc secured on the horizontal shaft, a pin projecting laterally from the outer face thereof, said foot being disposed adjacent the outer face of the disc at a point above the pin, and a cam loosely mounted on the shaft, said laterally projecting pin adapted to engage the cam for moving the same into engagement with said foot and the heel carried thereby.

1,633,285. HIGH-POTENTIAL ELECTRICAL CONDENSER. JOHN A. PROCTOR, Lexington, Mass., assignor to Wireless Specialty Apparatus Company, Boston, Mass., a Corporation of New York. Filed Feb. 1, 1921. Serial No. 441,628. 9 Claims. (Cl. 175—41.)



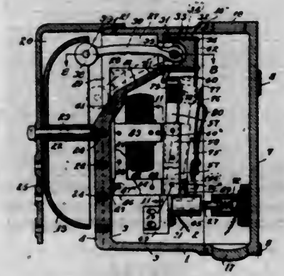
1. An electrical condenser of the vacuum dielectric type which comprises a glass casing for the condenser plates and dielectric, leads from the plates sealed through the glass of the casing; and metallic means mounted outside the casing and connected to the condenser leads and arranged to provide a path for the electric field outside of the casing in order to eliminate dielectric strain.

3. A high duty condenser comprising a supporting frame; a plurality of armatures of substantial superficial area arranged face to face in a stack in spaced relation to one another in said supporting frame; said frame including means for insulating armatures of opposite potential from one another; an hermetically sealed casing including a member consisting of structural insulating material supporting and enclosing said frame and the armatures, the space inside said casing and between



the faces of the armatures being filled with a non-conducting gas at a pressure of the order of a millionth of a millimeter; and terminal leads connected to portions of said condenser stack of high potential difference, said terminal leads being hermetically sealed thru said insulating casing-member.

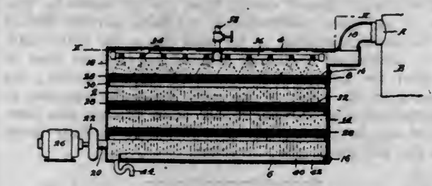
1,633,286. SUBSTATION TELEPHONE CIRCUITS. ARTHUR J. RAY, Chicago, Ill., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill., a Corporation of Delaware. Filed June 22, 1922. Serial No. 570,229. 10 Claims. (Cl. 179—81.)



1. In a substation telephone circuit, a transmitter, a receiver, three switch hook contacts adapted to close together when said receiver is lifted, two line conductors terminating, respectively, in two of said switch hook contacts, an induction coil having two windings, a calling device having a pair of control contacts and three shunt contacts, said calling device having a normal position, said shunt springs adapted to make contact with each other when said calling device is turned from is normal position, one winding of said induction coil connected in series with one line conductor, said control contacts and said transmitter connected in series in the other line conductor, a bell and a condenser connected in series, the free terminal of said condenser connected to one of said line conductors, the free terminal of said bell so connected as to afford a direct current path to the exchange from the last named free terminal, a third conductor connected at one end to the junction of said bell and condenser and at the other end to the third of said switch hook contacts, the other winding of said induction coil and said receiver connected in series in said third conductor in the order named counting from the switch hook contact end of said third conductor, and circuit connections such that said other winding and said transmitter are shunted by said shunt contacts when said calling device is turned from its normal position.

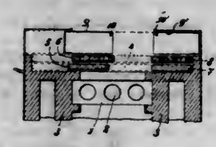
1,633,287. DISPENSING APPARATUS. JOHN REUTHER and HOWARD JOHN REUTHER, East Aurora, N. Y. Filed May 11, 1926. Serial No. 108,257. 15 Claims. (Cl. 221—103.)

12. The combination with a gasoline pump including a pump-rod, of a locking element normally engaged with the pump-rod to render the pump inoperative, a combined releasing and stop member for said locking element and pump-rod, respectively, and means for actuating said member.



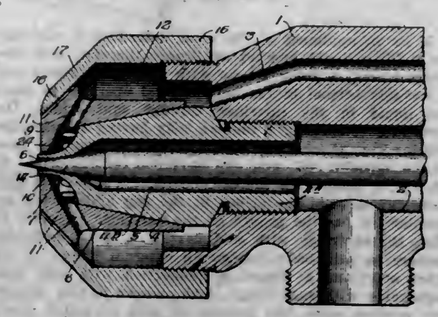
1,633,288. ELECTRIC BELL. LOUIS E. RICHMOND, Cleveland, Ohio, assignor, by mesne assignments, to The Autocall Company, Shelby, Ohio, a Corporation of Ohio. Original application filed May 8, 1919, Serial No. 295,688. Divided and this application filed July 24, 1920. Serial No. 398,644. 4 Claims. (Cl. 177—7.)

3. An electric bell, comprising a hollow casing having a vertical front wall, a striker in front of said wall, electro-magnetic means within said casing for operating said striker, a gong protecting apron shield on the casing, and cooperating means spaced on said shield and wall for securing gongs of various sizes to said wall beneath said shield each with a portion thereof properly related to the striker.



1,633,289. CONDENSER. WILLIAM W. ROBINSON, Kansas City, Mo. Filed Aug. 8, 1924. Serial No. 730,904. 1 Claim. (Cl. 261—98.)

In an apparatus of the character described a chamber having an inlet at its upper portion for connection with the flue of a furnace, an outlet to said chamber near the lower portion thereof, means adjacent to the outlet for creating a draft through said chamber to draw the products of combustion from said furnace, a plurality of spray means extending across the upper portion of the chamber for precipitating therein the volatilised solids in the products of combustion, superimposed trays mounted in said chamber having openings in their bottom portions

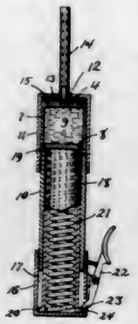


and provided with an agent having an affinity for certain of said solids, an imperforate removable tray resting upon the bottom of the chamber, and drainage means leading from said chamber.

1,633,290. COOKING STOVE WITH THERMOELECTRIC STORAGE. SECONDO SACERDOTE, Milan, Italy. Filed Apr. 15, 1926, Serial No. 102,189, and in Germany Apr. 18, 1925. 3 Claims. (Cl. 219—35.)

1. An electric cook stove, comprising a casing; a cooking chamber therein; heat-storing means disposed in said chamber and provided with internal electric heating elements; and a plurality of protecting plugs disposed immediately above said storage means and movable laterally independently of and relatively to each other, while remaining entirely within the confines of the casing walls, to cover or uncover the upper surface of the storage means.

1,633,291. SPRAY GUN. BERT R. SAUSEN and EINAR E. OLSEN, Chicago, Ill., assignors to Peerless Pneumatic Systems Inc., Chicago, Ill., a Corporation of Illinois. Filed Sept. 7, 1926. Serial No. 134,114. 6 Claims. (Cl. 91—45.)

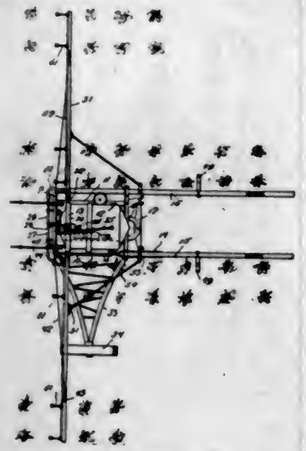


1. In a liquid spraying appliance, a body member having a forwardly tapering portion and a liquid passage extending through and coaxial with the said tapering portion, a cap-like air nozzle having a forwardly tapering bore extending into it from its rear end and tapered to fit the tapering portion of the body member, the air nozzle having an outlet bore coaxial with and leading forwardly from its tapering bore and freely housing the forward end of the tapering portion of the body member, the air nozzle having a forwardly tapering frustro-conical outer wall coaxial with its tapering bore and having

passages leading to its bore from the peripheral portion of the air nozzle behind its said frustro-conical wall; and a retaining collar secured to the body member and having a part thereof spaced from the air nozzle to provide an air space therebetween, the body member having an air passage leading to the said space, the collar having a contracted front end tapered on its rear face to fit upon the frustro-conical wall of the air nozzle; the securing of the collar to the body member being such as to permit relative movement thereof to allow a firm seating of the interfitting tapering parts of the body member, the air nozzle and the collar.

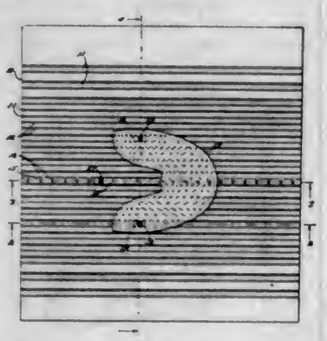
1,633,292. PROCESS FOR REDUCING THE VISCOSITY OF NITROCELLULOSE AND OTHER CELLULOSE ESTERS. STANLEY DE VRIES SHIPLEY, Stamford, Conn., assignor to Atlas Powder Company, Wilmington, Del., a Corporation of Delaware. Filed Mar. 14, 1925. Serial No. 15,682. 5 Claims. (Cl. 260—148.)

1. The process of reducing the viscosity of nitrocellulose which consists of heating the nitro-cellulose suspended in an aqueous medium containing a buffer composition capable of maintaining a pH value not exceeding 8.5.



1,633,293. MEDICINE CARTRIDGE AND APPLICATOR THEREFOR. ORVALL SMILEY, Indianapolis, Ind. Filed Sept. 5, 1925. Serial No. 54,642. 3 Claims. (Cl. 128—234.)

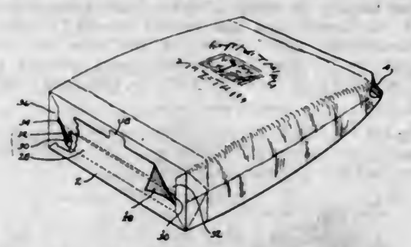
1. In an appliance of the class described, a cartridge for holding liquid and an applicator therefor, said cartridge having a grooved head with an orifice therein and a movable bottom in the opposite end operable to expel the liquid in the cartridge through said orifice, the applicator comprising a tubular body having a removable tubular cap at one end and a removable tubular base at the opposite end, said cap having a central orifice in its top; a member in the cap, having a nozzle that projects out through the orifice in the cap and having an annular lip for the groove of the cartridge operable to aline the cartridge with said nozzle; a spring actuated plunger in said body, having an external flange on its lower end; and a trigger in connection with said base engageable with said flange, said plunger having actuating relation with the bottom of said cartridge when released by said trigger.



1,633,294. SPRAYING MACHINE. ARTHUR FRANK STUBENBERG, Maunawai, Territory of Hawaii. Filed Feb. 16, 1926. Serial No. 88,602. 8 Claims. (Cl. 299—40.)

1. A device of the class described including, in combination, a main frame, a supporting wheel journaled in said main frame, a cradle structure in said main frame, a tank supported in said cradle structure, an air compressor supported in said main frame and operatively associated with said supporting wheel, a line connecting the air compressor and the tank, a band disposed about the tank, a pair of beams pivotally engaged with the band

on diametrically opposite sides of the tank, pipes extending along the beams and having nozzles projecting therefrom, means connecting the pipes with the tank.

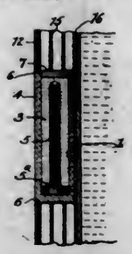


1,633,295. TEMPLATE HOLDER FOR PATTERN-GRADING MACHINES. JOHN H. SUTHERLAND, HOLTON J. SUTHERLAND, and HOLTON M. SUTHERLAND, Swampscott, Mass. Filed July 20, 1926. Serial No. 123,645. 7 Claims. (Cl. 33—23.)

1. A device of the character described having a plate on which a template support may be adjustably mounted, said plate being formed with a plurality of parallel grooves and horizontal flanges projecting into said grooves intermediate the top and bottom thereof in combination with a template support having a part which is slidable in the portion of the groove below said flanges and a part of which is slidable in the portion of the groove above the flanges, and means for clamping a template to said support in its adjusted position.

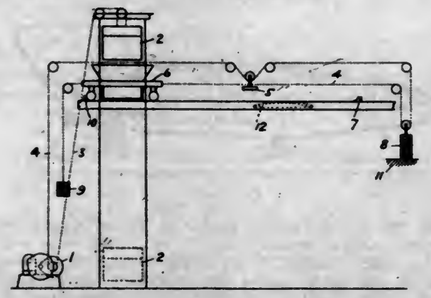
1,633,296. MULTI-PLY BAG. JOHN N. TOOKER and JOHN F. HARLEY, Canajoharie, N. Y., assignors to Arkell & Smiths, Canajoharie, N. Y., a Corporation of New York. Filed July 28, 1925. Serial No. 46,540. 8 Claims. (Cl. 229—55.)

1. In a multi-ply bag, the combination of two tubes, one fitting within the other and in shingled relation at adjacent ends thereof, said shingled ends having inwardly extending multi-ply end flaps and inwardly extending shingled multi-ply side flaps overlapping said end flaps, one of said multi-ply side flaps overlying the other multi-



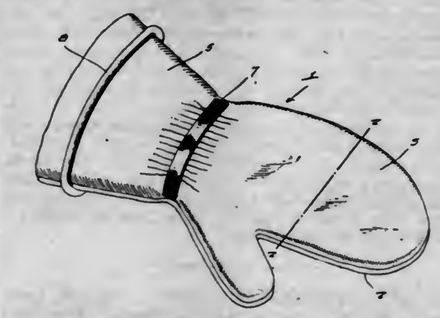
ply side flap, and adhesive independently securing the shingled portions of the several layers of the multi-ply side flap directly to the external layer of the other multi-ply side flap.

1,633,297. CONDUIT-BUSHING WRENCH. WHEELER H. VIBBER, New London, Conn. Filed Aug. 25, 1926. Serial No. 131,332. 4 Claims. (Cl. 81—71.)



1. A conduit-bushing wrench, comprising a guide-pin provided at its base with an internally-tapered gripping-finger extending forwardly alongside it but offset from it by substantially the thickness of the bushing.

1,633,298. INSULATING AND INDICATING COVERING FOR CONTAINERS. SETH WANAMAKER, Ramsey, N. J. Filed July 23, 1926. Serial No. 124,479. 9 Claims. (Cl. 116—114.)

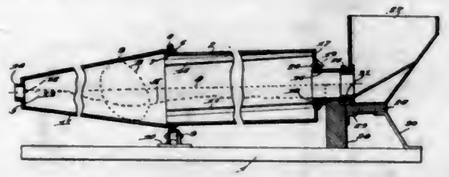


1. In a device for insulating and indicating the thermal condition of a domestic boiler, the combination of an insulating covering substantially encasing the boiler, and a thermal indicator co-operable with said covering and exposed to view through the same, said thermal indicator embodying a liquefiable enveloping medium and being in contact exteriorly with said boiler and influenced by the transference of heat from said boiler.

1,633,299. SKIP-HOIST AND TRAM-CAR EQUIPMENT. ARTHUR WARNER, Haverford, Pa., assignor to R. H. Beaumont Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Aug. 10, 1926. Serial No. 128,360. 1 Claim. (Cl. 214—40.)

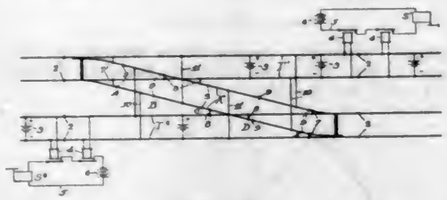
In a skip hoist equipment and tram car structure means for providing a difference between car and bucket movements, including load and limit stops for the car, means for returning the car to its load stop, a bucket cable and a car cable played out and hauled in sufficiently to cause the bucket to complete its up and down movements and sufficiently to provide slack in the car cable at each limit stop of the car, and two counterweights arranged in the reach of the car cable and of which one is free and of which the other is provided with a seat to apportion the cable slack between them.

1,633,300. MITTEN. GEORGE ADAMS WETZSTEIN, Mandan, N. Dak. Filed June 23, 1926. Serial No. 118,033. 1 Claim. (Cl. 2—158.)



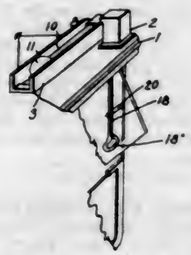
In a mitten formed of water proof material and comprising front and back sections, the edges of which are stitched together, a lining within the mitten, an elastic strip extending transversely across the back of the mitten at the wrist encircling portion thereof, said elastic strip being stitched to the back section and extending for substantially the full width thereof, for holding the portion of the mitten against the wrist to provide a waterproof joint, and piping extending around the cuff portion of the mitten adjacent the outer edge thereof to prevent water from dripping downwardly into the cuff of the sleeve of the wearer.

1,633,301. METHOD AND APPARATUS FOR TREATING SEED GRAIN. SYLVESTER J. WILLIAMS, Ritzville, Wash., assignor to Cornelius Allert, Ritzville, Wash. Filed Feb. 13, 1923. Serial No. 618,806. 12 Claims. (Cl. 83—28.)



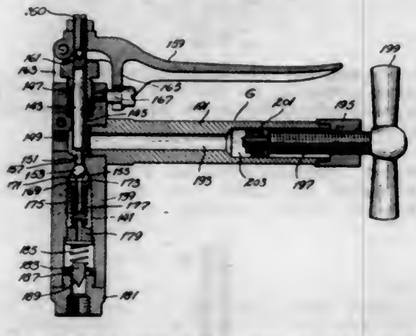
1. A friction dry seed treater comprising in combination, a tubular body for containing the seed grain and a fungicide powder rotatably mounted with its axis at a

downward inclination to the horizontal and having an intake end higher than its discharge end, that portion of said body nearest said discharge end being tapered sufficiently to incline its lowermost portion upwardly from the horizontal.



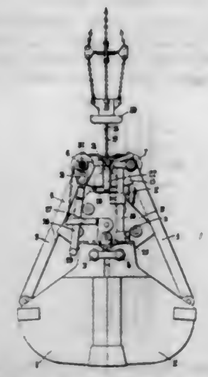
10. The herein-described method of "fixing" a fungicide powder coating partially applied or dusted onto seed grain, which consists, in uniformly setting the powder and all the grain berries into sustained intermingling rubbing and tumbling contact while simultaneously restraining discharging movement of the grain, whereby the combined restraining and rubbing action will attritionally "fix" and retain the coating of powder on all the grain berries.

1,633,302. RAILWAY SIGNALING. LEROY WYANT, Chicago, Ill., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Sept. 25, 1925. Serial No. 58,593. 5 Claims. (Cl. 246—41.)



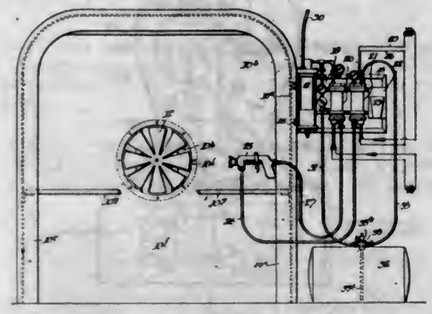
1. In combination in a railway signaling system, adjacent tracks having track circuits and signals controlled thereby, and a crossover divided by insulated rail joints into a series of relatively short sections, said sections being alternately connected to the circuits of the adjacent tracks with a section adjacent each track connected to the circuit of the other track.

1,633,303. DIRECTION INDICATOR. WILLIAM COLE PLATT BALDWIN, London, Ontario, Canada. Filed Oct. 11, 1926. Serial No. 140,957. 2 Claims. (Cl. 116—51.)



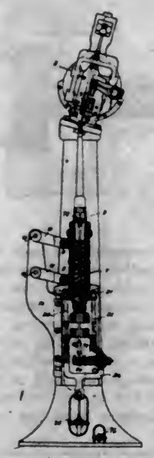
1. A direction indicator comprising a housing having an intermediate cross wall, a tubular shaft journalled in the cross wall and in the rear wall of the housing and provided with an annular groove in its front end, a spring secured within the housing and entering the groove to force the shaft longitudinally, a gear mounted upon the shaft between the transverse wall and the wall of the housing, an elbow carried by the rear end of the shaft an incandescent bulb carried thereby, a tubular semitranslucent finger carried by the elbow and containing the incandescent bulb and means engaging the gear operated from the driver's seat for turning the shaft.

1,633,304. LUBRICATING APPARATUS. FRANK S. BARKS, St. Louis, Mo. Filed Mar. 12, 1926. Serial No. 94,131. 4 Claims. (Cl. 221—47.3.)



1. A grease gun comprising a body, an inlet therefor and an outlet, a check valve at the inlet and an inverted check valve in series therewith and therebehind with respect to the direction of grease flow, a plunger for opening the second valve operable from a handle linkage cooperating with the body, and means communicating with the passage between said second valve and the outlet for increasing and decreasing pressure at said outlet independently of the inlet pressure and independently of movement by said handle linkage comprising an independent pressure controlling mechanism adapted not to reverse under reaction of forces engendered thereby when manual pressure is not maintained to hold it in position.

1,633,305. GRAB. DUDLEY JAMES BARNARD, Barking, England. Filed Mar. 7, 1924, Serial No. 697,657, and in Great Britain Mar. 14, 1923. 8 Claims. (Cl. 37—186.)

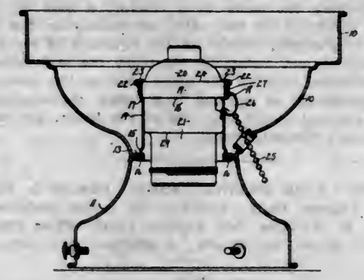


1. In a grab of the single chain type having a cross-beam, movable sheave block, means for connecting the cross-beam and sheave block and a tipping ring, the combination of devices located at the head of the grab adapted to co-act with said tipping ring, means carried by the said movable sheave block adapted to move said devices out of engagement with and out of the path of said tipping ring and means pivoted to the head of the grab adapted to co-act with the means connecting the cross-beam and sheave block to effect the complete opening of the grab.

1,633,306. SPRAYING CABINET AND APPARATUS. HOWARD G. BARTLING, Chicago, Ill., assignor to Peerless Pneumatic Systems, Inc., Chicago, Ill., a Corporation of Illinois. Filed Nov. 24, 1922. Serial No. 603,055. 3 Claims. (Cl. 91—60.)

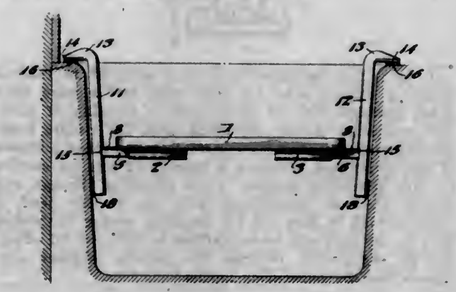
1. A spraying cabinet having a frontal opening formed by an inverted U-shaped flange extending downwardly from the top of the cabinet and laterally inward from each side wall of the cabinet, the said top and the side walls being imperforate and adjoined to the said frontal portion; and a suction fan mounted substantially centrally in the rear of the cabinet and arranged for drawing air rearwardly through the cabinet.

1,633,307. PEGGING MACHINE. BRUNO PAUL BOHACEK, Frankfort-on-the-Main, Germany, assignor to Maschinenfabrik Moenus Aktien-Gesellschaft, Frankfort-on-the-Main, Germany. Filed Apr. 12, 1926, Serial No. 101,471, and in Germany Aug. 22, 1924. 9 Claims. (Cl. 1—23.)



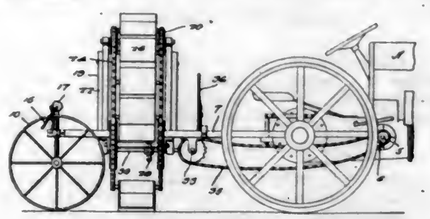
3. In a pegging machine, a horn rotatable about an axis vertical to the bottom of a shoe held thereon, an awl and driver arranged to move obliquely to the said bottom, and two parallel connection links between the horn and the machine frame arranged approximately vertical to the oblique direction of movement of the awl and driver.

1,633,308. SPIRAL BAR. ARCHER LE ROY BOLTON, North Andover, Mass. Filed Mar. 15, 1923. Serial No. 625,268. 9 Claims. (Cl. 92—27.)



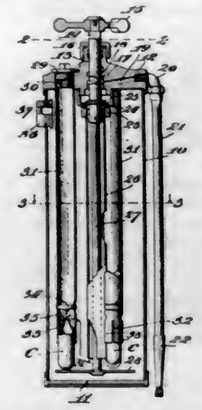
1. The combination in a frusto-conical plug for Jordan engines of a permanent body, with a jacket detachable therefrom built up of a skeleton jacket body, spiral bars fastened thereto and spiral woods between said bars.

1,633,309. ELECTRIC-LIGHTING FIXTURE. GEORGE A. BOOMER, Waterbury, Conn., assignor to The Plume & Atwood Mfg. Co., Waterbury, Conn., a Corporation. Filed July 19, 1926. Serial No. 123,357. 1 Claim. (Cl. 240—78.)



An electric lighting fixture having a housing-shell, a shade-holder secured thereto so as to form an inwardly-extending annular ledge, a mounting-sleeve having its lower end rigidly secured to the said ledge and provided, near its upper end, with a seating-shoulder for engagement with the edge of the skirt of the cap of a standard socket-casing, and also having its upper edge threaded, and a threaded locking-collar adapted to be applied to the threaded portion of the said sleeve and to engage with the upper edge of the skirt of the said cap, whereby the casing is firmly held in place.

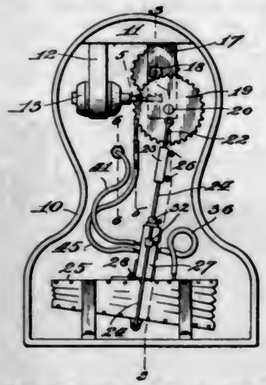
1,633,310. BATHTUB SEAT. WILLIAM H. BOZARTH, Vineland, N. J. Filed June 17, 1925. Serial No. 37,834. 3 Claims. (Cl. 4—185.)



1. A bath tub seat comprising an elongated seat portion, guide clips carried by said seat portion adjacent the ends thereof, extension brackets adjustably mounted in the guide clips and provided with upwardly disposed hooks at their outer ends, and a pair of supporting brackets each provided with a supporting hook at one end having openings formed laterally through the bodies thereof adjacent the remaining ends to receive the hook ends of the extension brackets.

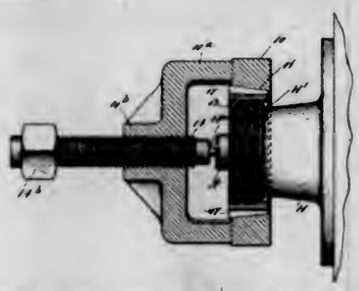
1,633,311. TRENCH-CLEANING DEVICE. FRED E. BRASWELL and SAMIEL T. RAY, Gadsden, Ariz. Filed Aug. 24, 1925. Serial No. 52,044. 1 Claim. (Cl. 37—109.)

A trench cleaning device of the class described including a frame, means on the front end of the frame for attaching the same to a tractor, a pair of axles, wheels journaled on the axles, extensions on the axles disposed upwardly, sleeves on the rear end of the frame for slidably and rotatably receiving the extensions, a rod journalled between the upper ends of the extensions and terminating at one end in a crank, chains attached to the rod and to the rear end of the frame, and means for rotating the extensions.



1,633,312. FIRE EXTINGUISHER. EDWARD L. BURNS, Los Angeles, Calif., assignor, by mesne assignments, to S. D. Williams, Los Angeles, Calif. Filed Feb. 25, 1926. Serial No. 90,499. 5 Claims. (Cl. 169—31.)

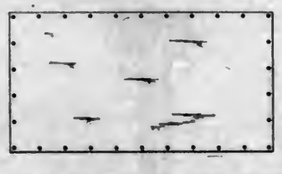
1. In a fire extinguisher, a tank adapted to contain liquid, a closure head for said tank, said closure head being provided with an outlet duct, a plurality of members connected to and depending from the closure head, gaseous pressure containers carried by the lower portions of said depending members, a puncturing member carried by each depending member, a rod extending through and having threaded engagement with the closure head, a valve carried by said rod for normally closing the outlet duct in the head and means carried by said rod for effecting an engagement between the gaseous pressure containers and the puncturing means.



1,633,313. AUTOMATON ADVERTISING DEVICE. SANFORD W. CARTER and ORIN E. CARTER, Los Angeles, Calif., assignors of one-third to E. P. Peers and one-third to George B. Winfrey, Los Angeles, Calif. Filed May 3, 1926. Serial No. 106,390. 3 Claims. (Cl. 46—40.)

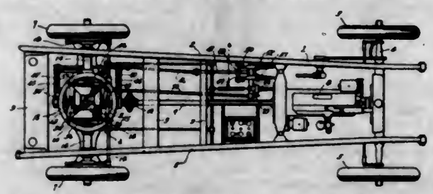
3. In an automaton advertising device, a housing shaped to represent a person's head, there being smoke outlet openings formed in the nose and mouth representing portions of said head, a holder for a cigar or cigarette seated in the mouth representing portion of said head, a bellows mounted for operation within the housing, a valve positioned on said bellows, a duct leading from said valve to the interior of the bellows, ducts leading from said valve to said holder and to said discharge openings, a ported member arranged for sliding movement within the valve for establishing communication between

the duct leading from the bellows to the valve and the ducts leading from said valve to the holder and discharge openings, a motor driven train of gearing arranged for operation in the upper portion of the housing, a reciprocating connection between one of the members of the train of gearing and said bellows and means carried by said reciprocating member for shifting the position of the ported member of said valve.



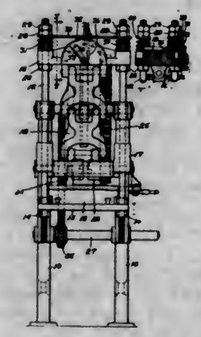
1,633,314. WHEEL PULLER. ARTHUR L. CORNWELL and LAWRENCE R. GRAMES, Wellsville, N. Y. Filed Aug. 28, 1923. Serial No. 659,744. 3 Claims. (Cl. 29—85.)

1. A wheel puller comprising a body having a ring portion and a stirrup portion with a conical opening extending entirely through said ring portion and enlarging outwardly thereof, a contractible adapter ring having a conical exterior fitting said opening with a capability of free adjustment throughout the endwise extent thereof, said ring having a slot therethrough and said body bearing a pin extending into said slot for the purpose stated, and means borne by the stirrup portion of said body for exerting pressure upon the end of the axle to draw off the wheel.



1,633,315. TRANSLUCENT SCREEN FOR PROJECTED PICTURES. OSWALD DALE, New Haven, Conn., assignor to The Acme Wire Co., New Haven, Conn., a Corporation. Filed Apr. 29, 1925. Serial No. 26,579. 1 Claim. (Cl. 88—24.)

As a new article of manufacture, a translucent screen for projected pictures, the said screen comprising warp and weft silk threads proportioned in width and spaced in weaving so that the area of silk, in a given area of fabric, is in excess of the aggregate area of the interstices between the threads, the natural color of the silk

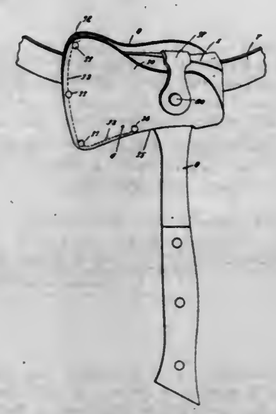


being tinted with one color and then impregnated with a vegetable compound of a complementary tint, so that the resulting screen is of a tint which will preserve color values.

1,633,316. DRIVING MECHANISM FOR MOTOR VEHICLES. LEWIS W. DAVIS, Seattle, Wash. Filed May 12, 1924. Serial No. 712,609. 5 Claims. (Cl. 74—26.)

1. In a variable speed transmission mechanism, a movably mounted driving shaft, a pair of wheel driving shafts mounted in alinement at opposite sides and substantially at right angles to the driving shaft, a pair of friction cones slidably keyed to the driving shaft, a driving cone slidably keyed on each of the wheel driving shafts; each of said cones having a hub, a shifting block for each cone rotatably fixed to its hub and having transverse grooves therein, bars slidably fitted in the grooves, a series of pivotally mounted bell crank levers with ends pivotally fixed to the bars in the blocks of adjacent cones whereby all cones may be simultaneously shifted along their shafts and means for moving the driving shaft whereby either cone therein can be made to drive either of the other cones.

1,633,317. TOGGLE PRESS. JASPER DERRY, Medford, Mass., assignor to Andrew Terkelsen, Boston, Mass. Filed July 10, 1924. Serial No. 725,310. 6 Claims. (Cl. 25—89.)

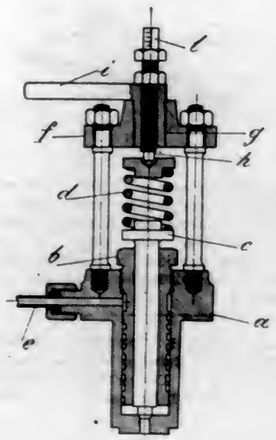


1. In a press, in combination, a ram, a toggle for operating said ram, means for straightening said toggle, mechanical means for exerting a follow up pressure upon said ram after said toggle is straightened, and means for measuring and indicating the amount of said pressure.

1,633,318. GARDEN IMPLEMENT. FRANK W. DRISH, Hollywood, Calif. Filed Sept. 8, 1926. Serial No. 134,210. 2 Claims. (Cl. 97—67.)

1. In a garden implement of the class described, a blade comprising a substantially ovate plate bent upon itself to provide a substantially V-shaped body including diverging plates of semi-ovate design, the curved edges of said plates being provided with cutting edges, and a handle adapted to be adjustably connected with one of said side plates.

1,633,319. AX SHEATH. ERNEST O. ESTWING, Rockford, Ill., assignor to Estwing Manufacturing Company, Inc., Rockford, Ill., a Corporation of Illinois. Filed Aug. 12, 1925. Serial No. 49,745. 5 Claims. (Cl. 224—2.)



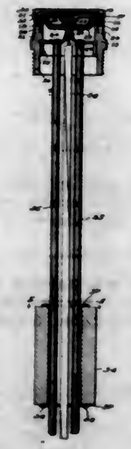
1. In an ax sheath, a case to receive the ax head, said case being open across the top but closed across the bottom with the exception of a single opening to pass the ax handle through whereby the head of the ax is received in the case as in a pocket with the handle depending from the case, and means for suspending the case as on a belt or the like and for retaining the ax head in the case, said means comprising a strap fixed on the outside of said case on one side thereof so as to provide a loop between it and the wall of the case to receive the suspensory belt or the like, and said strap being extended across the open top of the case to the other side thereof to close the case on the ax.

1,633,320. INJECTOR FOR MINERAL-OIL MOTORS. ALESSANDRO FRANCHETTI, Florence, Italy. Filed Mar. 27, 1925, Serial No. 18,703, and in Italy Apr. 10, 1924. 6 Claims. (Cl. 123—32.)

1. A spray nozzle for internal combustion engines, comprising a body adapted to be fastened to the cylinder head, an automatic needle valve, a valve seat formed in the body and open toward the cylinder, a spring forcing

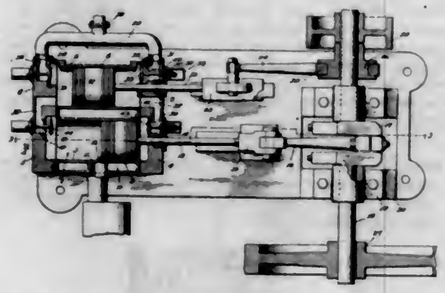
said valve against the seat, means for regulating the tension of said spring, means for supporting said regulating device, means for temporarily releasing the said regulated

pressure and restoring it without disturbing said regulation and without any other alteration of the spray valve.



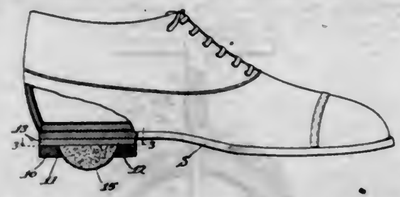
1,633,321. CONCEALED STAIRWAY. BERT FRAZIER, Pittsburgh, Pa. Filed Mar. 4, 1927. Serial No. 172,617. 2 Claims. (Cl. 228—50.)

1. The combination, with a hinged trap door, of a stairway slidably supported thereon in such manner that it may be pushed up into the space above the trap door or slid down to a floor below, characterized by having the upwardly extending overhanging end of the stairway, above the hinged end of the trap door, materially longer than the trap door in the raised position of the stairway, and locking means for retaining said stairway in fixed relation to the trap door in said raised position, the weight of said overhanging end being itself capable, in the absence of any other counterbalancing means, of at least completing the closing operation of said trap door by virtue of the weight of the stairway in excess of that of the trap door and retaining the same in closed position.



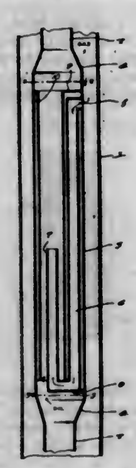
1,633,322. FLOAT GAUGE. GEORGE P. GREGORY, Pittsfield, Mass., assignor to The Boston Auto Gage Company, Pittsfield, Mass., a Corporation of Massachusetts. Filed Nov. 23, 1925. Serial No. 70,913. 3 Claims. (Cl. 73—82.)

1. A gauge for indicating the height of liquid in a tank and constructed to be read from either side of the gauge, comprising in combination, a gauge head adapted to be secured to a tank and having similar sets of graduations at the opposite sides of said head, a magnet rotatably mounted in the head, float operated means for rotating the magnet through an angle of not over 180° during the entire range of float movement, a needle pivotally mounted outside of the head and having its opposite ends bent downwardly to form pointers that lie



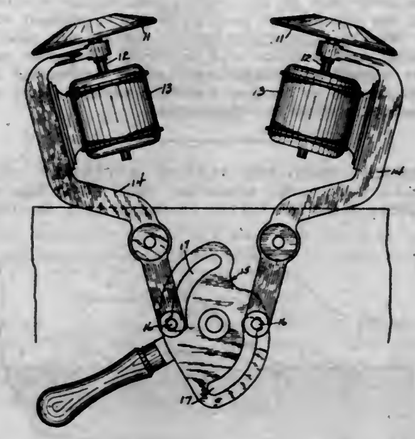
along the opposite sides of the head to swing over said graduations that the reading of the gauge may be observed at either side of the gauge head.

1,633,323. INTERNAL-COMBUSTION ENGINE. THEODORE W. HAINLINE, Portland, Oreg., assignor to Hainline Motors Corporation, Portland, Oreg., a Corporation of Oregon. Filed Jan. 27, 1926. Serial No. 84,254. 5 Claims. (Cl. 123—61.)



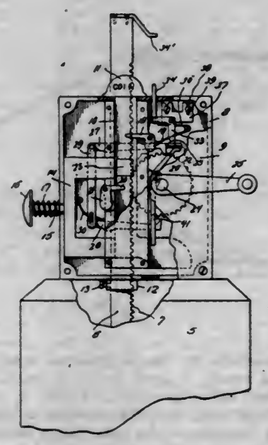
5. In an internal combustion engine, a power cylinder having an inlet port at each end and an exhaust port intermediate its length, a piston slidable in said cylinder and of a depth to close the exhaust port until in a position adjacent the limit of its movement in either direction, a pump cylinder having outlets at its ends communicating with opposite ends of said power cylinder through said inlet ports, pressure actuated valves controlling passage of fuel into said power cylinder, means for supplying fuel to opposite end portions of said pump cylinder, a piston slidable in said pump cylinder, a power shaft having rotary motion imparted thereto from the power piston, and means for imparting reciprocating motion to the pump piston from said power shaft at varying rates of speed and in timed relation to the power piston whereby to deliver fuel into the power cylinder without appreciable pressure substantially at the time of uncovering the exhaust port and effect displacement of a spent charge through expansion thereof and entrance of a new charge.

1,633,324. DETACHABLE CUSHION HEEL. LEONARD F. HARTUNG, Los Angeles, Calif. Filed Mar. 18, 1925. Serial No. 16,323. 1 Claim. (Cl. 36—36.)



A heel for footwear comprising a rubber heel having an aperture therethrough provided with spherically curved sides, a removable hemispherical cushion disposed within said aperture with its sides engaging the sides of the aperture, said cushion being formed of a more resilient material than the body of the rubber heel and having its top surface flush with the top surface of the body of the heel and its bottom normally projecting below the bottom or tread surface of the heel, and a fabric covering the bottom surface of the cushion.

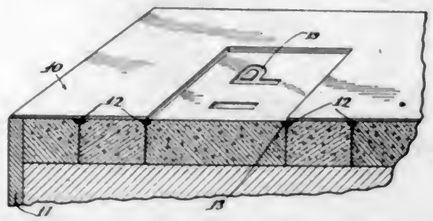
1,633,325. OIL-FLOWING DEVICE FOR WELLS. WILBUR R. HAUSWIRTH, Long Beach, Calif. Filed July 9, 1925. Serial No. 42,474. Renewed Apr. 27, 1927. 1 Claim. (Cl. 103—232.)



A flowing device for oil wells, comprising a pipe section having a portion of enlarged diameter, reducing necks connecting the portions of enlarged diameter with the pipe section, a transverse plate mounted in said enlarged portion in spaced relation below the upper neck, a tubular member mounted eccentrically in said transverse plate and extending through the enlarged portion and providing an oil passage through said enlarged portion, and a discharge nozzle having one end extending upwardly within the tubular member in concentric relation and discharging upwardly therein, and the opposite end mounted in the enlarged portion of said pipe member, and communicating with the exterior thereof, said pipe section and enlarged portion being adapted for mounting in a well casing wherein the well casing is adapted to conduct gas under pressure outwardly of said pipe section for discharge through the nozzle, the transverse plate member forming an enlarged chamber above said tubular member and nozzle for cooperation therewith to aerate the oil in producing an upflow in said pipe section.

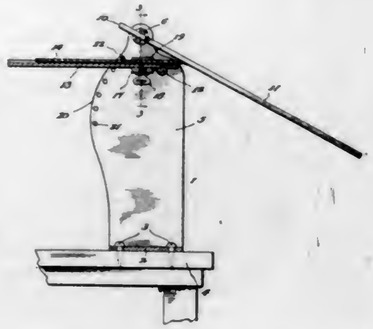
1,633,326. STITCHING. DANIEL EDWARD HENNESSY, Milwaukee, Wis., assignor to The Fisk Rubber Company, Chicopee Falls, Mass., a Corporation of Massachusetts. Filed July 31, 1922. Serial No. 578,749. 1 Claim. (Cl. 154—14.)

The method of building cord tire carcasses which comprises placing the cord fabric on a core, rotating the core, stitching down the fabric on one side of the core with a stitcher operating at a speed greater than that of the core and simultaneously stitching down the fabric on the other side of the core with a stitcher operating at a speed less than that of the core.



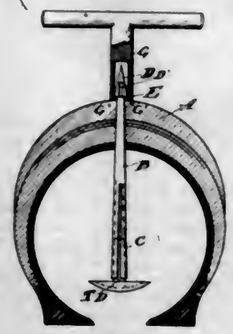
1,633,327. AUTOMATIC GASOLINE-VENDING MACHINE. EDWARD T. HESS, Irondequoit, N. Y. Filed Oct. 16, 1926. Serial No. 142,014. 6 Claims. (Cl 194—60.)

1. A device of the class described, including in combination, a rack bar, means for mounting the rack bar for rectilinear motion, a gear meshing with the rack bar, means for operation of the rack bar, a pawl, yieldable means for normally urging the pawl into engagement with



the gear, a second pawl, yieldable means for normally urging the second pawl into engagement with the gear, a link between the pawls, a pivotal connection between one pawl and the link, a pin and slot connection between the other pawl and the link, the first yieldable means being more effective than the second yieldable means, a coin chute, a lever pivotally mounted and having one end engageable with the first pawl, a push adapted to extend into the coin chute to push a coin into engagement with the lever for rocking said lever to rock the first pawl to disengage it from the gear and bring the second pawl into engagement therewith and means for holding the first pawl in its disengaged position while the rack bar completes a stroke in one direction.

1,633,328. MOLD FOR PLASTIC MATERIALS. WILLIAM HINTON, San Bernardino, Calif. Filed Aug. 17, 1926. Serial No. 129,719. 5 Claims. (Cl. 25—121.)



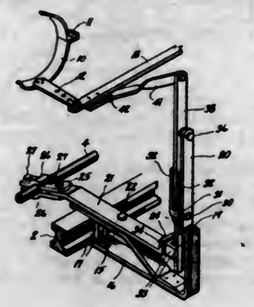
1. A mold comprising a pallet, means providing side walls upon the pallet, there being beads or ridges upon the pallet and integral therewith, and partitions adapted to be positioned upon said beads to divide the space above the pallet into compartments into which various plastic materials may be placed.

1,633,329. SCRAPER-EDGE TURNER. JOHN R. HOUTS, McLean, Va. Filed Mar. 26, 1926. Serial No. 97,689. 3 Claims. (Cl. 29—83.)

1. An apparatus for the purpose set forth comprising a supporting frame, a blade holder mounted within the frame for free swinging movement from a vertical inoperative position to an operative position, a support for an edge-turning tool carried by said frame above the blade holder, and an edge-turning tool engaged in said support to bear upon a blade in the holder for rocking movement across the edge of the blade, and abutment means carried by said frame for adjustment vertically thereof and adapted to extend across the blade holder and limit movement thereof from a vertical position towards a horizontal position.

1,633,330. PLUG-INSERTING TOOL. HUGH T. HUGHES, Cleveland, Ohio, assignor, by mesne assignments, to Edward Hainke, Grand Rapids, Minn. Filed May 10, 1926. Serial No. 107,977. 7 Claims. (Cl. 152—27.)

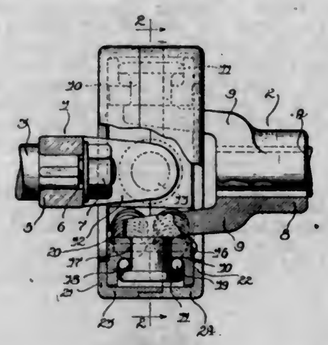
4. An instrument for inserting a tire plug consisting in, a tapered, hollow body pointed at the outer end and having an annular shoulder adjacent to said outer end, and a gripping device for engaging with said shoulder to draw said instrument through said tire.



1,633,331. ROLLER TAPPET FOR POPPET VALVES AND METHOD OF MAKING THE SAME. ROBERT JARDINE, Chicago, Ill., assignor to Rich Tool Company, Chicago, Ill., a Corporation of Maine. Filed Sept. 9, 1922. Serial No. 587,246. 6 Claims. (Cl. 29—156.4.)

1. The method of making a cylindrical valve tappet shell without exterior projections but having a thickened wall portion at one side which consists in longitudinally drilling a cylindrical blank having a lateral boss, pressing the said boss inwardly to form a shell of uniform diameter without increasing its length, flattening the sides of said shell, and thereafter perforating the flattened sides.

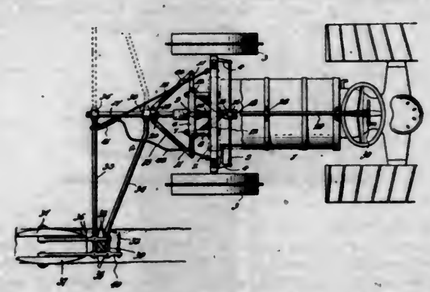
4. A roller valve tappet shell having an open end, an exterior cylindrical bearing surface and a pair of parallel flat side wall sections adjacent the open end of the shell not projecting outwardly beyond the said cylindrical bearing surface, the walls of said shell being thickened adjacent the flat side wall sections, and provided with transverse openings therethrough, a pivot pin secured in said openings, and a roller journaled on said pin.



1,633,332. DIRIGIBLE HEADLIGHT FOR AUTOMOBILES. ALLINGTON H. JOHNSON, Tacoma, Wash. Filed May 19, 1926. Serial No. 110,115. 2 Claims. (Cl. 240—62.)

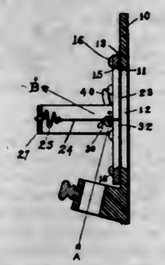
1. The combination with a vehicle of the character described having an axle, a steering knuckle connecting rod and pivotally supported headlights with arms attached thereto for rotating the same, of a bracket fixed rigidly to the axle having a horizontal portion extending forwardly therefrom and provided, at its outer end, with a vertical standard, a horizontal lever pivotally attached to the horizontal portion of the bracket and operatively connected at its rearward end with the said connecting

rod, a guide fixed at the forward end of the said lever, a second lever pivotally mounted on the standard having its lower end disposed within the said guide and a third lever pivotally mounted on the bracket connected, at its lower end, with the upper end portion of the second lever, and a link connecting the upper end of the third lever with the headlight rotating arms.



1,633,333. UNIVERSAL JOINT. ALEXANDER F. KAPTULLER, Chicago, Ill. Filed Oct. 11, 1920. Serial No. 416,283. 13 Claims. (Cl. 64—96.)

1. A universal joint comprising two heads rotatably mounted on substantially alined axes, bearing blocks rotatably mounted on radially extending axes on said heads respectively, and yielding means secured and held between said bearing blocks for transmitting rotation from one head to the other.



1,633,334. TRACTOR GUIDE. GLENN R. KNOTWELL, Wauneta, Nebr., assignor of one-half to Earl W. Skelton, Wauneta, Nebr. Filed Dec. 8, 1926. Serial No. 153,387. 2 Claims. (Cl. 97—49.)

1. Apparatus for the purpose set forth comprising a supporting rod, means for supporting said rod upon the front axle of a tractor and operatively connecting the same with the steering gear of the tractor, laterally extending arms mounted upon said rod for rocking movement, carriers on the outer ends of said arms, guiding disks mounted upon the free ends of said carriers, means for rocking the arms about the supporting rod, a

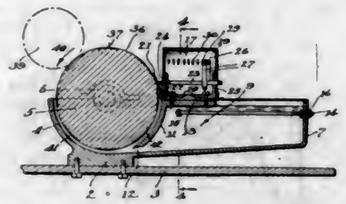
spring attached to one of said arms near the inner end thereof, and flexible connections between the said spring and the ends of the tractor axle.

1,633,335. MEANS AND APPARATUS FOR RECORDING SOUND-WAVES. CLAUDE JEROME LAPP, Iowa City, Iowa, assignor to Herbert Grove Dorsey, Washington, D. C. Filed Aug. 27, 1924. Serial No. 734,494. 4 Claims. (Cl. 274—5.)

1. An apparatus for the reception of vibratory motion comprising a stretched paper diaphragm, a thread firmly mounted parallel to the diaphragm and above the middle thereof, a second thread attached to the center of the diaphragm and mounted perpendicular thereto, a support, a conical spring held at one end by said support, and the other end tensioning said perpendicularly mounted thread, a mirror pivoted on said first thread and secured at an edge to the second thread whereby motion of the diaphragm will rotate the mirror.

1,633,336. DENTIFRICE. WINFORD P. LARSON, Minneapolis, Minn. Filed Sept. 28, 1925. Serial No. 59,234. 6 Claims. (Cl. 167—9.)

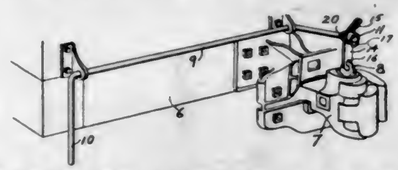
1. A dentifrice containing castor oil soap.



3. A dentifrice containing the soap of an unsaturated fatty acid.

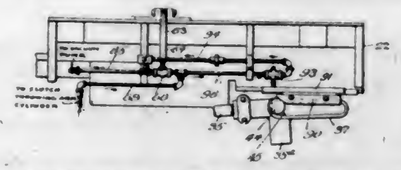
5. A dentifrice composed of a solution of the soap of an unsaturated fatty acid in a dental cream article forming a paste and capable when used of detoxifying bacterial toxins existing in the mouth of the user.

1,633,337. RESINOUS REACTION PRODUCT OF UREA AND FORMALDEHYDE. FELIX LAUTER, Philadelphia, Pa., assignor to Rohm & Haas Company, a Corporation of Delaware. Filed July 28, 1925. Serial No. 46,659. 10 Claims. (Cl. 260—3.)



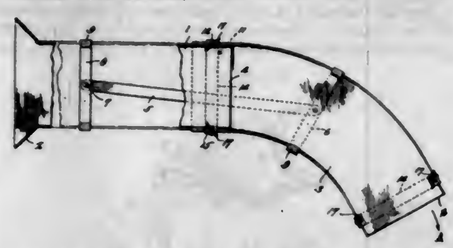
1. The process of producing resinous reaction products, which comprises the step of causing a condensation to take place between urea and formaldehyde in the presence of a polyhydric alcohol.

1,633,338. AUTOMATIC INKING FOUNTAIN FOR PRINTING PRESSES. ALBERT L. LENGEL, Bakersfield, Calif. Filed Oct. 5, 1926. Serial No. 139,624. 23 Claims. (Cl. 101—365.)



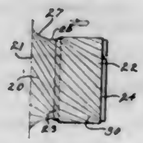
1. An inking fountain comprising in combination a fountain, a fountain roller mounted therein, and a structure forming a pressure chamber on one side of the roller, there being ink passages at the base of said chamber and there being an unobstructed passage underneath the roller from the pressure chamber and on the side opposite such pressure chamber.

1,633,339. UNCOUPLING LINK FOR RAILROAD CARS. ALONZO C. MATHER, Chicago, Ill. Filed Sept. 19, 1923. Serial No. 663,633. 1 Claim. (Cl. 213—170.)



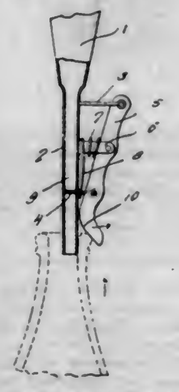
In a device of the class described, the uncoupling rod a link having its lower end attached to the locking pin of a coupler and its upper end slidably connected to the free flattened end of the round uncoupling rod, said link stamped from a flat piece of metal bent at an angle forwardly at its upper end and having an elongated slot at the upper end sliding along the flattened end of the uncoupling rod and an eye at the lower end having a cut or slit in order to connect to the locking pin.

1,633,340. AUTOMATIC DIE PRESS. CHARLES D. McDONALD, Chicago, Ill., assignor to McDonald Machine Co., Chicago, Ill., a Corporation of Illinois. Filed Jan. 20, 1926. Serial No. 82,395. 9 Claims. (Cl. 192—128.)



1. In an automatic die press, the combination with a feed way for the work, finger bar mechanism, associated therewith, finger bar actuating mechanism, and clutch throwing mechanism for starting and stopping the press, of a normally inactive clutch throwing arm, a block having a vacuum cylinder therein and carried by said arm, and having a vacuum plunger therein, a reciprocating arm actuating rod guided in said block, and having a shoulder thereon, a detent mounted on said block for engagement with said shoulder on the rod, and operatively connected to said vacuum plunger, a vacuum pipe leading to said vacuum cylinder, a normally closed air valve in said vacuum pipe, and sheet actuated emergency mechanism arranged to open said valve.

1,633,341. COAL CHUTE. HUGH MCDONALD, Clinton, Iowa. Filed Aug. 2, 1926. Serial No. 126,527. 3 Claims. (Cl. 193—4.)

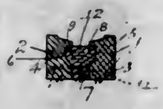


1. In a device of the class described, an auxiliary chute and a main chute having overlapped ends, the auxiliary chute being laterally inclined; holders on the chutes, and a link, one chute being slidable in its holder, and the holders being pivoted to the link, whereby the overlapped ends of the chutes may be disengaged to provide for an end for end reversal of the laterally inclined auxiliary chute.

1,633,342. PULLEY-BAND-TIRE CONSTRUCTION. THOMAS MIDGLEY, Hampden, Mass., assignor to The Fisk Rubber Company, Chicopee Falls, Mass., a Corporation of Massachusetts. Filed Dec. 13, 1921, Serial No. 522,090. Renewed Dec. 10, 1926. 19 Claims. (Cl. 154—14.)

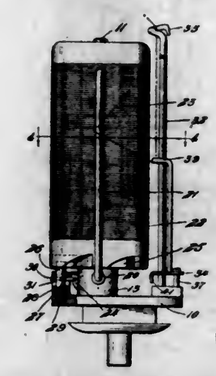
1. The method of building a tire casing, comprising; holding a circumferential series of cord members adjacent an annular bead support, carrying said series to another bead support axially spaced from the first-named support, securing the series adjacent the second support, repeating the carrying and securing steps until a pulley-band carcass of the desired number of piles is formed, and expanding the pulley-band carcass into tire form.

1,633,343. SUGAR GAUGE. CHARLES E. MILLER, Detroit, Mich. Filed May 11, 1925. Serial No. 29,479. 1 Claim. (Cl. 221—113.)



A gauge of the kind described comprising a delivery tube, said tube being provided at one side with vertically spaced openings, valve plates disposed and movable in said openings and adapted to alternately project into the interior of the tube, and a spring influenced lever pivotally connected with and arranged alongside of the tube and connected with said valve plates and terminating adjacent to the delivery end of the tube in a portion disposed normally at an acute angle to the outer side of the tube, whereby when the end of a battle wall is interposed between the tube and said terminal portion of the lever, the lever will be rocked to open the lower valve plate and close the upper valve plate.

1,633,344. ADJUSTABLE DROPLIGHT-CORD HOLDER. LAWRENCE MORAN, Chicago, Ill. Filed Dec. 16, 1926. Serial No. 155,225. 3 Claims. (Cl. 248—7.)

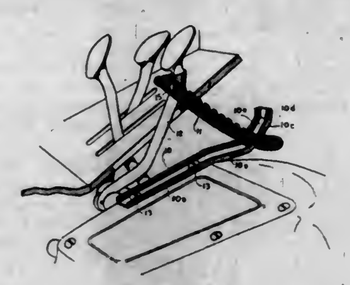


1. A device of the class described including, in combination, a bracket including a vertical body plate having a lateral extension at its upper end and a lateral extension in the opposite direction at its lower end, the lower extension being provided with a notch, the body plate being provided with an opening, a sheath, means for journalling the sheath on the plate body so as to register with the openings, a chain trained over the sheath and engageable with the notch.

1,633,345. FURNITURE CONSTRUCTION. EDMUND MORAIS, Grand Rapids, Mich., assignor to Grand Rapids Store Equipment Corporation, Grand Rapids, Mich., a Corporation of Michigan. Filed Jan. 19, 1925. Serial No. 3,320. 2 Claims. (Cl. 211—7.)

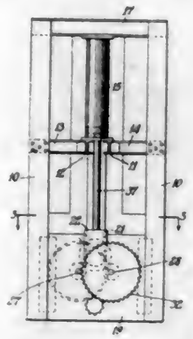
1. In combination with a spacing and connecting member for the furniture members hereinafter mentioned, furniture members on the opposite sides of said spacing and connecting member each of said furniture members being provided with a longitudinally-extending groove parallel with and adjacent its front edge, the spacing and connecting member being provided adjacent and parallel with its front edge with longitudinally-extending tongues on its opposite sides engaging in said grooves respectively to hold all of said members against forward and rearward interrelative movement, the spacing and connecting member at its front edge being spaced inwardly from the front edges of the furniture members and spacing them apart at their front edges; means for securing all said members together.

1,633,346. CARRIER FOR BRAIDING MACHINES. FRANK MOSSBERG, Providence, R. I., assignor to Mossberg Pressed Steel Corporation, Attleboro, Mass., a Corporation of Massachusetts. Filed Apr. 29, 1921. Serial No. 465,528. 9 Claims. (Cl. 96—15.)



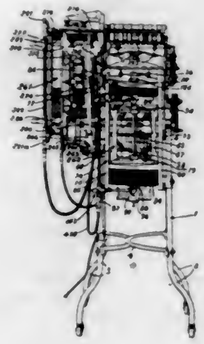
1. A carrier for braiding machines having a vertical spindle on which a yarn package is rotatably mounted, means for controlling the rotation of the package, and a vertically-disposed yarn take up member having a yarn engaging portion mounted to rotate about the axis of the package.

1,633,347. PROCESS OF REFINING BARYTES. WILLIAM J. O'BRIEN, Baltimore, Md. Filed Sept. 17, 1925. Serial No. 57,023. 10 Claims. (Cl. 23—122.)



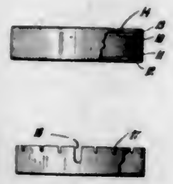
1. In a process of refining barytes, treating barytes ore with fuming sulphuric acid and then reprecipitating the dissolved $BaSO_4$ by volatilizing the excess SO_3 from the solution.

1,633,348. STAY-PUT PARKING BRAKE. EVERETT C. PETSCH, Pleasant Dale, Nebr. Filed Jan. 3, 1927. Serial No. 158,676. 3 Claims. (Cl. 74—81.)



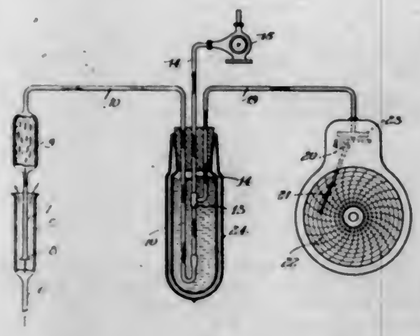
1. A parking brake for latching a brake pedal of an automobile in a predetermined position, said parking brake including a member which is adapted to be secured at a forward and upward inclination in a position forward of the pedal, a clip which is adapted to embrace the pedal and to be secured rigidly thereto, and a lever pivotally secured adjacent its rear extremity to said clip said lever being provided with notches in its upper edge and said member being provided with an elongated aperture for slidably receiving said lever whereby downward pressure on said lever at its rear extremity will force its notched portion into latching engagement with said member.

1,633,349. ROLLING MILL. LEON PIERCE, New York, N. Y. Filed Mar. 18, 1926. Serial No. 95,570. 2 Claims. (Cl. 80—5.)



2. In a rolling mill, a pair of end frames, an idler roll having a groove, driven rolls having ridges thereon cooperating with the grooves on the idler roll, compressed air cylinders mounted on said frames above said rolls, bearing blocks supporting said idler roll, one of said bearing blocks being guided vertically the entire height of one of said frames, the opposite bearing block of said idler roll being guided vertically to a position intermediate the height of the opposite frame, the guide means for said bearing blocks comprising a pair of plates spaced apart and rigid with each other on one frame member, said plates extending the height of said frame member guiding one of said bearing blocks vertically the entire height of the frame, a similar pair of plates on the opposite frame member ending intermediate the height of said frame permitting the opposite bearing block to be removed from said guide means when removing said idler roll.

1,633,350. ENVELOPE-FILLING MACHINE. GEORGE F. RUSS, Jersey City, N. J., assignor to Russ Inserting Machine Co., Inc., Dover, Del., a Corporation of Delaware. Filed May 7, 1924. Serial No. 711,636. 13 Claims. (Cl. 93—6.)

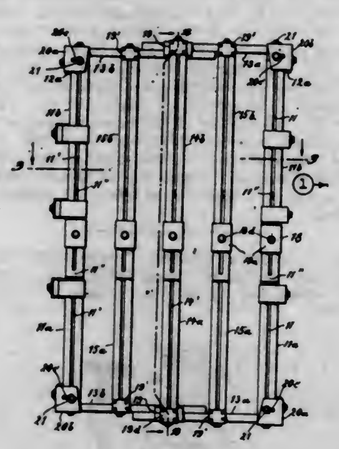


1. In a machine of the class described, the combination with an envelope supply magazine and an insert supply magazine, of a rotatable drum having plane faces at angles to one another, the angles being parallel to the axis of the drum, means for feeding the envelopes to the drum, means for holding envelopes on the drum disposed across the angles of the drum to open the envelopes, with the flaps of each envelope disposed against one of the plane faces and the body portion of each envelope adapted to lie against the other of said plane faces, pneumatic means for directing air into the body portion of the envelope thereby to open it and raise it from its plane face, and means for feeding inserts from the insert supply magazine into the envelopes so opened.

1,633,351. DUST GUARD FOR WATCHES. IRVING SONNENTHAL, New York, N. Y. Filed May 25, 1926. Serial No. 111,487. 3 Claims. (Cl. 58—90.)

1. The combination with the body of a watch case and a watch movement having a winding stem, of a full sided guard member extending around the periphery of the watch, a crystal for the watch adapted to fit within the outer edge of the guard member whereby the guard member serves to protect the periphery of the crystal, and a cover for the watch adapted to fit over the guard member, and having an inwardly turned flange overlapping the periphery of the crystal.

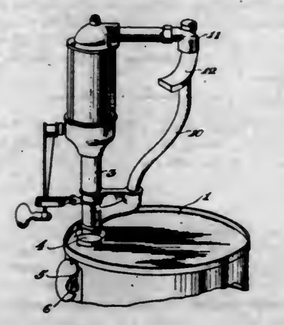
1,633,352. GAS-ANALYSIS APPARATUS. KENNETH L. TATE, Rochester, N. Y., assignor to Taylor Instrument Companies, Rochester, N. Y., a Corporation of New York. Filed Feb. 23, 1926. Serial No. 90,021. 15 Claims. (Cl. 265—44.)



1. A gas analysis apparatus comprising a chamber having a capillary inlet passage adapted to be supplied with a mixture of gases including one or more component gases the quantity of which is to be measured, a restricted outlet passage for said chamber, means for maintaining a predetermined difference in the pressures to which said passages are externally subjected, one of said passages being constructed relative to the other and to said pressures to maintain a pressure between opposite sides thereof adapted to maintain a rate of flow therethrough substantially independent of fluctuations in the external pressure thereon, and a pressure sensitive device communicating with said chamber and having a part movable in response to the pressure therein as a function of the quantity of said gas or gases to be measured in said gaseous mixture.

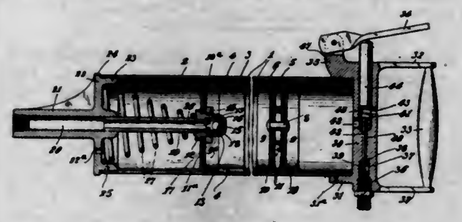
1,633,353. WICK FOR OIL STOVES. RAYMOND M. THORLEY, Cleveland, Ohio. Filed Sept. 9, 1926. Serial No. 134,378. 5 Claims. (Cl. 67—70.)

1. A method of making a wick for an oil stove comprising superimposing a plurality of layers of fibrous material, bending the layers in a curved form, binding them together and thereafter straightening them whereby the wick may be shipped flat, and may be subsequently curved for use without buckling.



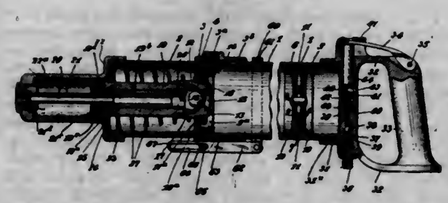
1,633,354. COLLAPSIBLE AND ADJUSTABLE CRATE FOR FURNITURE. EDWARD F. RAU, Brooklyn, N. Y. Filed Jan. 28, 1926. Serial No. 84,353. 6 Claims. (Cl. 217—43.)

1. A collapsible box-crate, formed exclusively of detachable bar units, each unit comprising two partly overlapping skid bars, slotted throughout their available lengths, slidably connected at their overlapping ends and provided with means adapted to guide and to adjustably lock them in rigid alignment, detachable means to adjustably fasten them at their free ends at right angles to other bar units and detachable means to rigidly connect the converging ends of the units to form the corners of the crate.



1,633,355. ANTISUBSTITUTE LIQUID-DISPENSING PUMP. ROBERT L. WHITE, Lisbon, Tex. Filed Feb. 11, 1927. Serial No. 167,406. 5 Claims. (Cl. 221—72.)

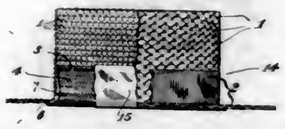
1. In a liquid dispensing tank provided with a pump and rotating drain pipe communicating with its nozzle, the combination with a concealed locking means for said pump and filler openings, a covering for the receiving end of said drain pipe, comprising a curved channel member



affixed to said nozzle and arranged to restrict the opening in said drain pipe when moved away from said nozzle.

1,633,356. FORCE-FEED LUBRICATING APPARATUS. HERMAN ALBERTINE, East Rutherford, N. J., assignor to Charles P. Rogers and Company (Inc.), a Corporation of New York. Filed Jan. 9, 1926. Serial No. 80,139. 12 Claims. (Cl. 221—47.3.)

1. In fluid feeding means, a casing including a reservoir for the fluid, means comprising compressed air for applying pressure thereon, outlet means including cylinder and piston elements, the piston head being yieldably spring held in pressure receiving relation to the fluid and having a hollow stem for outflow of said fluid, the outlet end of said stem being formed as a piston fitting an outlet passage with which it telescopes upon rearward movement of said spring held piston, a valve whereby reverse flow of the fluid through the stem may be prevented and means for preventing disengagement of said telescoping members.

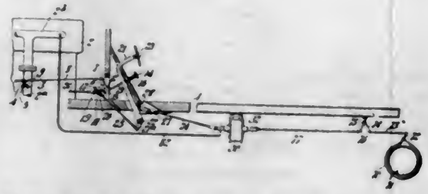


1,633,357. FORCE-FEED LUBRICATING APPARATUS. HERMAN ALBERTINE, East Rutherford, N. J., assignor to Charles P. Rogers and Company (Inc.), a Corporation of New York. Filed Mar. 18, 1926. Serial No. 95,647. 14 Claims. (Cl. 221—47.3.)

1. A grease gun, including a force pump having piston and cylinder elements, means for reciprocating the cylinder element with respect to the piston element and

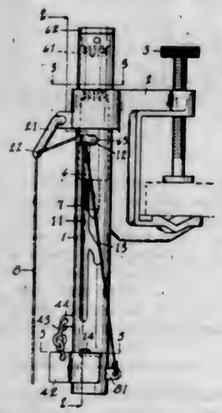
means for feeding grease into said pump, said piston and cylinder elements including an element of substantial cross-sectional area with one surface fitting and slidable along a corresponding surface of the piston element and another surface fitting and slidable along a corresponding surface of the cylinder element whereby it may be utilized to vary the cross-section of the piston element or cylinder element.

1,633,358. STRAW HAT. FRANKLIN S. BATES, Mount Vernon, N. Y. Filed Oct. 8, 1926. Serial No. 140,228. 4 Claims. (Cl. 2—193.)



1. In a self-conforming straw hat comprising a plurality of straw braids sewed together with the major portion of the crown and brim glued together and with an unglued portion adjacent the juncture of the crown and brim, the combination of a band of supporting material with the upper edge sewed to the inside of the crown and the lower edge sewed to the lower portion of the brim, an elastic member carried by said band and tending to draw the same inwardly intermediate its edges.

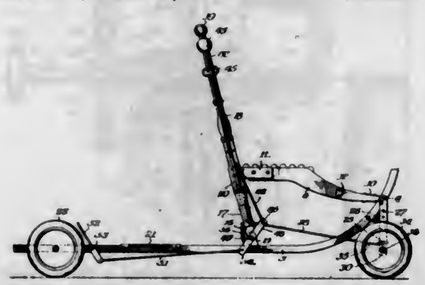
1,633,359. WELDING AND CUTTING APPARATUS. FREDERICK W. BECKER, East Rutherford, N. J. Filed Mar. 2, 1927. Serial No. 171,970. 12 Claims. (Cl. 158—27.4.)



1. A welding apparatus of the character described, comprising a burner head, a burner nozzle detachably secured to one end of said head, a valve casing, means for detachably connecting the same to the burner head, a valve within said casing, an oxygen supply tube, means for securing said valve to one end of said tube, a hollow handle, a block within one end of the handle provided with an opening through which said tube slidably extends and recessed at one end, another tube of larger diameter surrounding said oxygen tube between said valve casing and the recessed end of said block, another block within the other end of the handle, a tubular elbow within an opening in said block, a valve chamber exterior of said handle with which said elbow communicates, a valve in said chamber, tubes extending from said valve chamber for connection with a source of oxygen supply, the other end of said oxygen tube slidably entering said elbow, means for moving the said oxygen supply tube to seat or unseat the valve at its forward end, a liquid fuel tube extending through said blocks in the handle with one open end communicating with the recess in the end of said first block and the interior of the tube surrounding the oxygen tube, and means attached to the other end of said fuel tube for connection with a source of fuel supply.

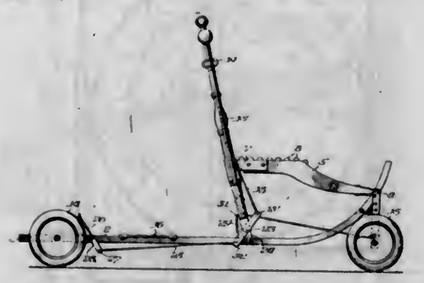
1,633,360. THROTTLE-CONTROL APPARATUS FOR BRAKE-APPLYING MECHANISM. CALEB S. BRAGG, Palm Beach, Fla., and VICTOR W. KLIESRATH, Port Washington, N. Y., assignors to Bragg-Kliesrath Corporation, Long Island, N. Y., a Corporation of New York. Filed June 19, 1926. Serial No. 117,026. 8 Claims. (Cl. 192—3.)

2. In an automotive vehicle, the combination with an internal combustion engine for propelling the same, having a suction passage for delivering explosive charges to the engine cylinders, and a throttle valve for said engine located in said passage, operator operated means for controlling said valve, brake mechanism for the vehicle, a vacuum operated device for operating the brake mechanism, and provided with controlling valve mechanism, a suction pipe from the valve mechanism to said suction passage between the throttle valve and engine cylinders, and a pedal lever operatively connected with the controlling valve mechanism of the vacuum operated device, of connections from said pedal lever to said throttle valve for taking it out of control of its operator operated controlling means, and closing the valve when the pedal lever is moved in a direction to effect the application of the brakes.



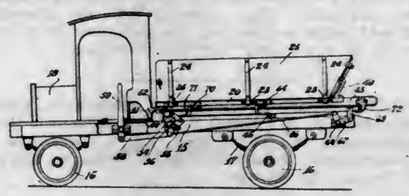
1,633,361. CORD-ACTUATED BURGLAR ALARM. NILES BRYANT, Battle Creek, Mich. Filed Dec. 21, 1925. Serial No. 76,785. 3 Claims. (Cl. 116—81.)

2. In a burglar alarm, the combination of a tubular barrel, a longitudinal slot with cross cocking notch, a firing bolt and firing pin with a spring for actuating the



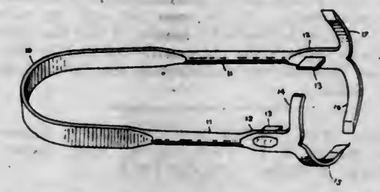
same within said barrel and a cross trip pin with eye at its outer end on the bolt adapted to reciprocate in the longitudinal slot and engage the said notch, a removable cartridge chamber block at the lower end of said barrel, a cross pin or guide with an eye in its end carried by said barrel and disposed in angular relation to the trip pin when cocked, and a trip cord disposed through the said guide eye through the said trip pin and secured to the bottom of the barrel, all coacting substantially as described for the purpose specified.

1,633,362. PUSH SLED. MARTIN O. CARLSON, Chicago, Ill. Filed Dec. 10, 1924. Serial No. 754,931. 3 Claims. (Cl. 280—8.)



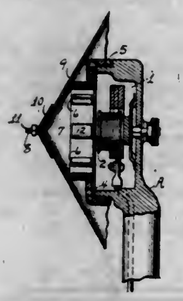
1. In a push sled having a pair of runners, a brace connecting said runners at their front ends, steering handles rising from the runners rearward of said brace, a cross bar connecting said handles, a detachable yoke connected to said runners ahead of said handles, and wheels pivotally mounted upon said yoke for steering, a connection between said wheels whereby they may be cooperatively disposed for steering, and a steering lever operatively connected to one wheel and attached to and disposed adjacent one of said handles whereby said sled may be steered as a wheeled vehicle with the operator standing upright to the rear of the handles, said handles and cross-bar providing means whereby said sled may be steered when said wheels are removed.

1,633,363. PUSH-SLED BRAKE. MARTIN O. CARLSON, Chicago, Ill. Original application filed Dec. 10, 1924, Serial No. 754,931. Divided and this application filed Nov. 20, 1926. Serial No. 149,562. 3 Claims. (Cl. 188—8.)



1. In a push sled of the character described having runners and a pair of sled steering handles rising from the runners, and means connecting said handles together, fore and aft wheels on said runners, a hand brake lever extending upwardly adjacent said handles, a detachable brake for use on one of said wheels, and means adapted to serve as a brake when the vehicle is used as a sled and affording connection between said lever and wheel brake.

1,633,364. DUMPING VEHICLE. LOUIS DA COSTA CARVALHO, New Orleans, La. Filed Aug. 20, 1924. Serial No. 733,040. 13 Claims. (Cl. 298—12.)

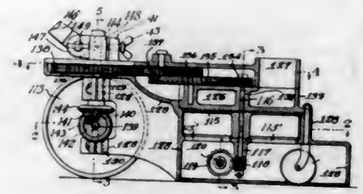


1. In a dumping vehicle, and in combination, a chassis, a body having a pivotal connection with the chassis whereby the body may tilt to dump the load, a gate for normally confining the load, and means for holding the gate closed prior to tilting of the body, said means being rendered inoperative by the weight of the load against the gate after a given tilting of the body, whereby the gate may then open automatically.

1,633,365. SEED-CORN SHELLER. HARRY E. EBMEIER, Bertrand, Nebr. Filed Feb. 21, 1927. Serial No. 170,067. 3 Claims. (Cl. 130—10.)

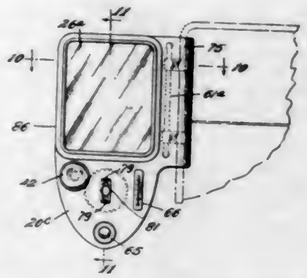
1. A device for stripping grains from ears of corn, said device including a U-shaped resilient handle portion, a single stripping tooth on each arm of said U-shaped portion, and arcuate portions projecting from the free extremities of said U-shaped portion, said arcuate portions being adapted to embrace the ear of corn.

1,633,366. SOUND AMPLIFIER. HERMANN FISCHER, Boston, Mass., assignor to Tower Manufacturing Corporation, Boston, Mass., a Corporation of Massachusetts. Filed Feb. 4, 1926. Serial No. 85,828. 6 Claims. (Cl. 179—116.)



1. In combination with a coniform resonator having a free edge, of means for supporting and vibrating the resonator, comprising a diaphragm, means for vibrating the diaphragm and spaced webs rigidly connected to and extending transversely of the diaphragm, said webs being connected to the resonator.

6. In sound amplifying apparatus, a diaphragm, a magnet for vibrating the diaphragm, a resonator having

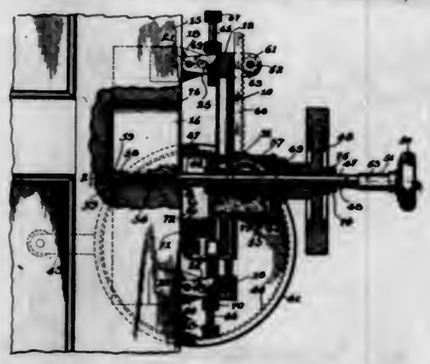


a free edge and means for both supporting and transmitting vibration to the resonator, comprising a rigid metallic carrier for the resonator having a marginal edge and means for supporting the carrier about its marginal edge, said means being connected with the diaphragm and said means transmitting the vibrations of the diaphragm to the carrier and the resonator.

1,633,367. SUCTION CLEANER. THOMAS W. GREEN, Westmont, N. J., assignor to Thomas Wilbraham Green Engineering Co., Philadelphia, Pa., a Corporation of Pennsylvania. Filed Oct. 9, 1922. Serial No. 593,197. 6 Claims. (Cl. 15—18.)

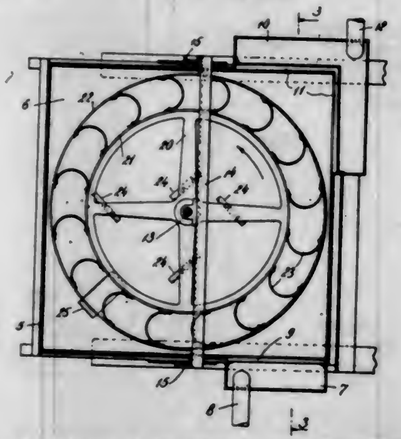
2. In a suction sweeper a horizontal shaft, driving wheels thereon, a vertical shaft with which the horizontal shaft swings bodily, gearing rotatably mounted on the vertical shaft, a handle connected with the vertical shaft to swing horizontally, a shoe, a fan and driving connections between the fan and the gearing on the one side and between the gearing and the driving wheels on the other.

1,633,368. WIND DEFLECTOR. WILLIAM P. HAMMOND, East Orange, N. J. Filed Jan. 19, 1923. Serial No. 613,574. 3 Claims. (Cl. 296—84.)



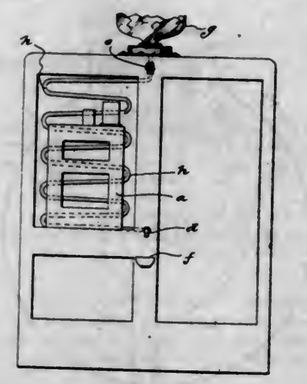
3. A wind deflector for automobiles comprising an integral sheet metal plate having a sight opening therein, means to support said plate adjacent the automobile windshield, a glass in said opening, and an integral flat portion of said sheet metal plate of substantial area below said opening adapted to support driving accessories.

1,633,369. ENVELOPE. WILLIAM H. HOLLAR, Jr., Drexel Hill, Pa. Filed June 12, 1926. Serial No. 115,526. 7 Claims. (Cl. 229—79.)



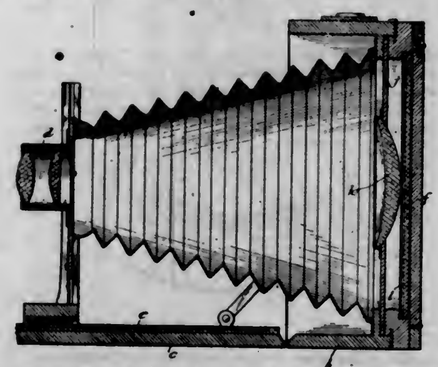
7. The combination with an envelope; of holding means for securing an imperforate article in the envelope inclosure, including an element arranged to encircle the exterior of said article and having a protruding element extending exterior to said envelope; and frangible sealing means, upon the exterior of said envelope, arranged to engage said protruding element; whereby it is necessary to break said seal to release such article from said envelope.

1,633,370. DOOR-LOCK-MORTISING MACHINE. SAMUEL HUNTER, Bellevue, Pa., assignor to Wappat Gear Works, a Corporation of Pennsylvania. Filed July 5, 1923. Serial No. 649,522. 1 Claim. (Cl. 144—70.)



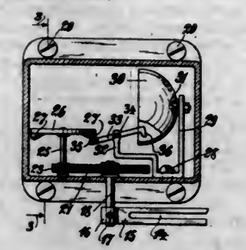
A door mortising machine, comprising a frame, means for clamping the frame in position, a driving mechanism slidable along the frame, a boring shaft carried by the driving mechanism, said shaft comprising a section having a shallow spiral groove, and a spline groove extending along the shaft, including said section, a feather carried by the driving mechanism engaging said spline groove, and a boring tool carried by the end of the shaft, said tool comprising a pair of opposing curved blades adapted to cut upon their front edge and also upon their side edges, and said shaft being of a diameter approximating that of the tool.

1,633,371. CLASSIFIER. HARRISON STREETER COE, Lawrence, Kans. Filed Nov. 12, 1923. Serial No. 674,105. 11 Claims. (Cl. 209—465.)



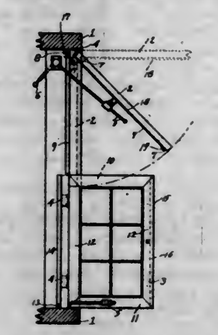
1. An apparatus of the character described comprising a vessel having an inclined bottom surface of which a substantial area thereof is above the normal operating liquid level in the vessel and constitutes a draining area, said draining area of said inclined bottom surface having a solids discharge associated therewith, and a conveying element operatively mounted in proximity to said bottom surface and provided with a plurality of scoop-like members having an inner wall formed to oppose downward flow of the solids during upward travel, forming pockets adapted to move through the pulp in said vessel and gather up and remove therefrom a quantity of solid material and to carry such solid material along an annular path across said draining area to said solids discharge while permitting the drainage of liquid from such solid material as the same is carried along said path, and said vessel having an overflow outlet for liquid by which the liquid portion of the pulp is discharged from the apparatus.

1,633,372. FLASH WATER COOLER. LLOYD G. COPEMAN, Flint, Mich., assignor to Copeman Laboratories Company, Flint, Mich., a Corporation of Michigan. Filed Feb. 15, 1926. Serial No. 88,342. 4 Claims. (Cl. 62—141.)



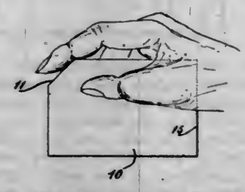
3. In a refrigerator, the combination of a cabinet, means for establishing a freezing zone in a portion of the cabinet, a pipe for running water for drinking purposes running through said frigid zone and terminating in an open spigot, and means in the rear of a point where the pipe enters the frigid zone for controlling the running of water through said pipe.

1,633,373. PHOTOGRAPHIC CAMERA. NATHANIEL B. CREGIER, Chicago, Ill. Filed Apr. 30, 1921. Serial No. 465,889. 1 Claim. (Cl. 95—11.)



In a camera, the combination with a box, of an object lens, a holder for a sensitized element, and a meniscus lens with its concave face towards the object lens placed in front of and adjacent the sensitized element, for the purpose described.

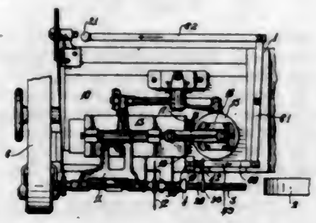
1,633,374. AUDIBLE ALARM. CHARLES DENSER, New Brighton, Pa. Filed Jan. 6, 1926. Serial No. 79,525. 2 Claims. (Cl. 116—86.)



2. An audible alarm comprising a casing adjacent a door, a driving and a driven spindle vertically journaled therein, said driving spindle being in alignment with the hinges of the door, a train of gears operated by said driving spindle, a cam fixed on said driven spindle, a lever fixed to said driving spindle, said lever being connected to the door, a bracket in said casing, a lever fulcrumed on one arm of said bracket operable by the action of said cam, said lever having a hammer at one of its ends, and a bell on the other arm of said bracket, sounded by the hammer end of said lever.

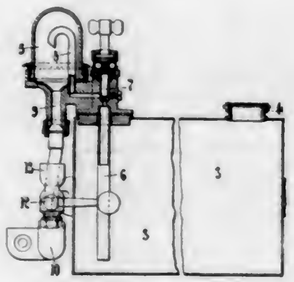
1,633,375. AWNING CASEMENT WINDOW. JAMES G. DUDLEY, New York, N. Y. Filed Oct. 19, 1921. Serial No. 508,714. 2 Claims. (Cl. 20—53.)

1. In combination, a window frame and upper and lower windows therein, the said lower window hung to swing upon a vertical axis and the said upper window hung to swing upon a horizontal axis, and stops for the said upper and lower windows, the stops for the said lower window being inset beyond the stops for the said upper window.



1,633,376. LANTERN SLIDE. JOHN R. FREEMAN, Providence, R. I. Filed Nov. 10, 1923. Serial No. 674,085. 8 Claims. (Cl. 88—26.)

1. A lantern slide adapted to co-function with a plurality of lantern slides, said slide comprising a picture containing plate having a clipped corner, a glass cover

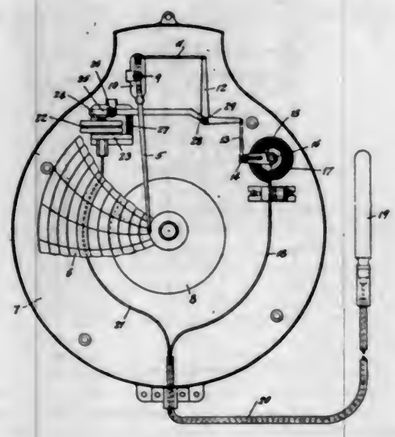


having a clipped corner, and means for securing the glass cover to said plate with the clipped corners registering with one another whereby the slides would cofunction with one another to facilitate arranging them in proper position preparatory to insertion in a projecting machine and whereby each slide would individually function to facilitate proper insertion in a projecting machine.

1,633,377. DELIVERY-CONTROL DEVICE FOR CIGARETTE-MAKING MACHINES. WILLIAM F. GRUPE, Hudson Heights, N. J., assignor to Endless Belt Corporation, Inc., a Corporation of New York. Filed Sept. 25, 1919. Serial No. 326,289. 8 Claims. (Cl. 131—39.)

1. A cigarette making machine comprising a cigarette-rod-forming mechanism including a forming shoe, a pulley for locating a tube belt in operative relation through said forming shoe, means for imparting movement of the tube belt over said pulley and through said forming shoe, a shaft for driving said cigarette making machine including said tube belt movement imparting means and a clutch for said shaft, means for actuating said clutch, said clutch actuating means being disposed relative to the normal path of a cigarette-rod formed by said cigarette-rod-forming mechanism to be ineffective under the condition of the normal formation of a cigarette-rod and to be effective for actuating said clutch under the condition of abnormal formation of a cigarette-rod.

1,633,378. LUBRICATING MEANS FOR INTERNAL-COMBUSTION ENGINES. JAMES HENRY HEYWOOD, Radcliffe, England, assignor to Cylinder Top Oilers, Limited, Leeds, England. Filed Oct. 15, 1926, Serial No. 141,797, and in Great Britain Oct. 19, 1925. 3 Claims. (Cl. 123—196.)

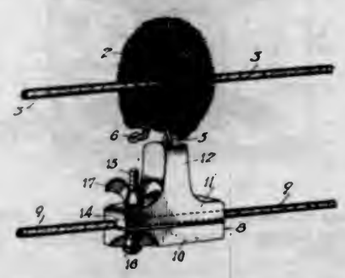


1. Combined means for lubricating the cylinders of internal combustion engines and the admission of extra air during running, comprising a lubricant-containing reservoir provided with an adjustable drip feed or delivery connected with the induction pipe or manifold, said connection having a valve controlled communication with the atmosphere, whereby the suction of the engine is adapted to draw a regulated supply of lubricant and, if desired, also extra air into the cylinder or cylinders, substantially as herein set forth.

1,633,379. MUSHROOM PASTE. ADOLPH G. HUPFEL, Jr., and THOMAS M. RECTOR, New York, N. Y., assignors, by direct and mesne assignments, to Hellman-Hupfel, Inc., New York, N. Y., a Corporation of New York. Filed May 2, 1922. Serial No. 557,970. 4 Claims. (Cl. 99—11.)

1. A prepared food product comprising a paste of raw mushrooms in which the natural juices are retained and which is characterized by the flavor and aroma of fresh mushrooms, a preservative, and a thickening agent.

1,633,380. COMPENSATING MEANS FOR RECORDING AND INDICATING INSTRUMENTS. LAWRENCE C. IRWIN, Brooklyn, N. Y., assignor to Charles J. Tagliabue Mfg. Co., Brooklyn, N. Y., a Corporation of New York. Filed June 20, 1925. Serial No. 38,484. 2 Claims. (Cl. 73—118.)

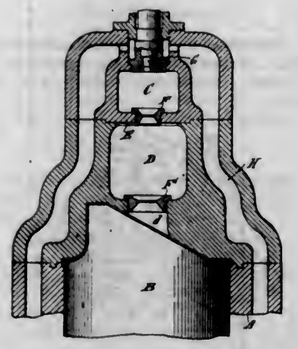


1. In a distance-type thermometer, a bulb, a pressure-sensitive device, an indicator adapted to be actuated by said device, a capillary tube connecting said bulb with said device, a protecting tube enclosing at least a part of the capillary tube and spaced therefrom to provide an annular gas-containing chamber, a second pressure-sensitive device connected to said chamber, and compensating means operated by the second pressure-sensitive device for varying the movements of said indicator.

1,633,381. FASTENING DEVICE FOR WRIST-WATCH STRAPS AND BRACELETS. CHARLES H. KESTENMAN, Providence, R. I., assignor to Kestenman Bros. Mfg. Co., Providence, R. I., a Corporation of Rhode Island. Filed Feb. 12, 1927. Serial No. 167,839. 5 Claims. (Cl. 24—71.)

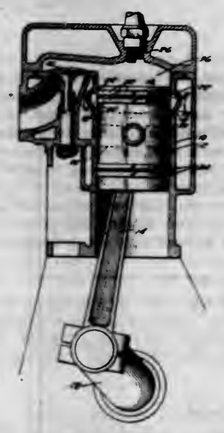
1. In a fastening device for straps, bracelets or the like, the combination of hinged members adapted to be folded together in overlying relation, means for attaching the end of a strap-section to one member, a projection on the other member adapted to engage through any one of a plurality of holes in the other strap-section to adjustably attach the latter thereto, and means on the first member for yieldingly engaging the projection on the second member to clasp the parts in closed or folded relation.

1,633,382. CLOTHESLINE CLEANER. HENRY KOERTER, Irvington, N. J. Filed May 8, 1926. Serial No. 107,621. 2 Claims. (Cl. 15—246.)



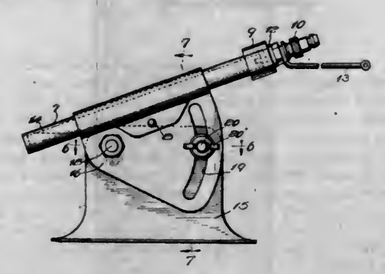
1. A cleaner for endless pulley clotheslines, comprising a length of flexible twisted wire brush bent into curved form with the bristles at the inside of the curve projecting toward each other and the ends of the wire separable to permit the entrance of one run of the clothes-line, and a clamp for the other run of the clothes-line, said brush being removably mounted upon said clamp.

1,633,383. FIRE-EXTINGUISHING LIQUID. KONRAD KUNIERACHKY, Eisenach, and WILLI SCHULTZE, Halle-on-the-Saale, Germany. Filed Mar. 16, 1926, Serial No. 95,148, and in Germany Mar. 3, 1925. 4 Claims. (Cl. 23—12.)



1. Fire-extinguisher comprising a mixture of liquefied sulphur dioxide with carbon tetrachloride.

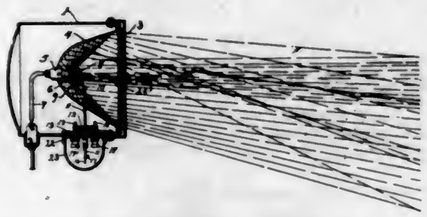
1,633,384. INTERNAL-COMBUSTION ENGINE. CHARLES E. LUCKE, New York, N. Y., assignor to Worthington Pump and Machinery Corporation, New York, N. Y., a Corporation of Virginia. Filed July 25, 1921. Serial No. 487,258. 1 Claim. (Cl. 123—33.)



An internal combustion engine of the Diesel type in which the volume swept by the piston is so related to the clearance that an ignition temperature is produced by compression in all parts of the clearance, said engine having a cylinder, a piston, and a liquid fuel supplying means, and also having a pre-combustion space constituting substantially all the clearance behind the piston, said space being divided into two pre-combustion chambers having only a restricted communication wth each other, one chamber constituting a primary pre-combusion chamber arranged to receive fuel directly from the fuel supplying means and by partial combustion to drive fuel to the other chamber, the latter chamber constituting a secondary pre-combustion chamber and being in continuous restricted communication directly with the cylinder, said secondary pre-combustion chamber being arranged to receive fuel from the primary pre-combustion chamber and to project it mixed with air into the cylinder, both pre-combustion chambers being water-jacketed whereby their walls are prevented from reaching an igniting temperature.

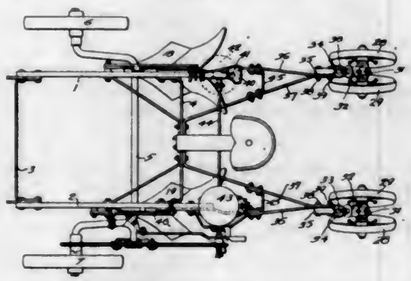
1,633,385. PROGRESSIVE-IMPULSE INTERNAL-COMBUSTION ENGINE. ARLINGTON MOORE, New York, N. Y., assignor, by mesne assignments, to Maxmoor Corporation, a Corporation of Delaware. Filed July 3, 1925. Serial No. 41,442. 4 Claims. (Cl. 123—37.)

1. Cylinder for internal combustion engine having gas pockets in its wall abruptly recessed at the top and relatively taperingly recessed at the bottom.



1,633,386. ENGINE-STOPPING DEVICE. JOHN J. RUTLEDGE, Joliet, Ill., assignor of one-half to John H. Harrison, Joliet, Ill. Filed Dec. 1, 1921. Serial No. 519,239. 1 Claim. (Cl. 200—52.)

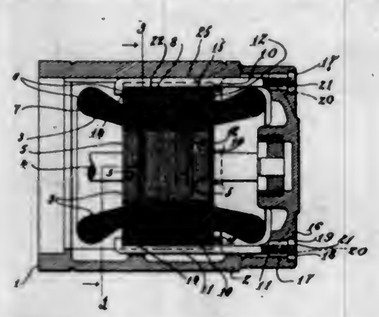
Circuit interrupting apparatus comprising a metallic tube adapted to hold a quantity of mercury, a substantially L-shaped bracket having one of its legs vertically disposed and having bolt holes in the other of its legs, a second bracket pivoted to said vertical leg and provided with an arcuate slot, a bolt carried by the first-mentioned bracket and projecting through the arcuate slot, a wing nut for said bolt whereby said second bracket may be secured in a plurality of adjusted positions relative



to said first bracket, said second bracket having one of its marginal portions folded tightly around said metallic tube and riveted to another portion of the second bracket, and an electrode projecting into one end of the metallic tube and insulated therefrom.

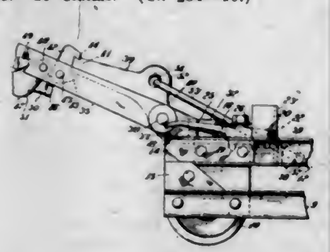
1,633,387. HEADLIGHT. ROLAND H. SHIPPEY and HARRY D. VAN LEUNEN, Wichita, Kans. Filed Oct. 30, 1925. Serial No. 65,785. 1 Claim. (Cl. 240—41.)

In a head light, the combination of a housing, a reflector, electric lighting means, of a lens, said lens adapted to intensify and direct light rays of said lighting means, a vertically disposed tube supporting said lens, a ball plate, a sleeve concentrically mounted in said ball plate, said tube slideably engaging in said sleeve, means for binding said tube in said sleeve at a fixed position, a socket bearing for said ball plate and a plurality of screws as rocking and binding means for said plate by which said lens is positioned as desired in front of said lighting means.



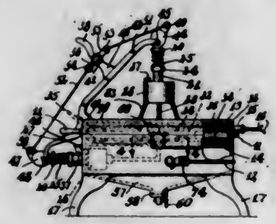
1,633,388. LISTER AND PLANTER. WALTER H. SILVER, Moline, Ill., assignor to Deere & Company, Moline, Ill., a Corporation of Illinois. Filed Aug. 23, 1922. Serial No. 583,789. 3 Claims. (Cl. 111—52.)

1. In an agricultural implement, the combination with a wheel supported frame comprising plow beams fixedly secured at opposite sides thereof, and having fixed downwardly extending standards provided with faces at the sides thereof, of furrow openers adapted to be secured to said standards, each of said furrow openers having a frog secured thereto, said frog having a central vertical web extending rearwardly therefrom and adapted to overlie, alternatively, either side face of one of said standards, and means extending transversely of said web and standard for securing the web to its standard at either side thereof.



1,633,389. ELECTRIC TOOL. WALTER STUMPF, Baltimore, Md., assignor to The Black & Decker Manufacturing Company, Towson, Md., a Corporation of Maryland. Filed Mar. 15, 1926. Serial No. 94,808. 3 Claims. (Cl. 172—36.)

3. In an electric tool, a tool casing, a motor fitting inside the tool casing, the motor having a stator, the casing having a shoulder engaging the stator from one side, a tension member having an abutment engaging the stator from the other side, and means for taking up on the tension member to grip the stator between the abut-

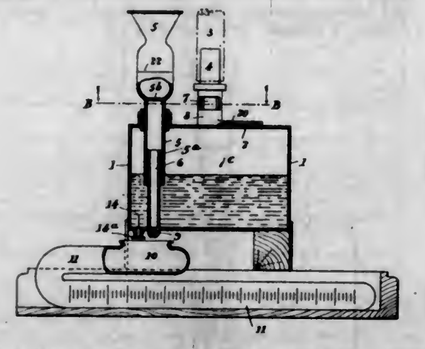


ment and the shoulder, the stator having a groove and the casing having an opposed groove and a key engaging both grooves.

1,633,390. LIFTING TRUCK. ARTHUR M. BARRETT, Winnetka, Ill. Filed Dec. 24, 1921. Serial No. 524,628. 15 Claims. (Cl. 254—10.)

1. A lifting truck comprising a main frame, a steering head, a lifting platform, a steering handle pivotally connected with the steering head to swing vertically, a lifting lever also pivotally connected with said steering head to swing vertically, a rigid draft member connecting said lever and the platform, and means operable to connect or disconnect said lever and the steering handle.

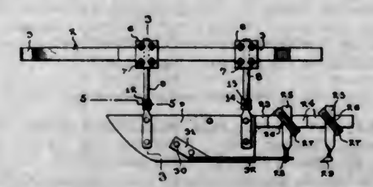
1,633,391. AUTOMATIC TOASTING AND BUTTERING MACHINE. IRVING BESKIN, Jersey City, N. J. Filed Feb. 23, 1926. Serial No. 89,839. 4 Claims. (Cl. 91—43.)



1. In a device of the class described a means of spraying butter in liquid form on the bread to be toasted comprising a pump element consisting of a plunger having a packing washer attached at its lower extremity, and a knob attached at its upper extremity, said plunger a slidable fit in a cylinder having a plurality of apertures located directly below the upper position of the said plunger, a coil spring, superimposed, to hold the said

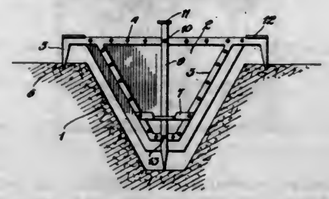
plunger, in a normally extended position, the said cylinder mounted in a container provided with an outlet at its lower extremity, said outlet intercommunicative with a cylinder and having a ball check valve normally held in a closed position by a spring, a pipe connected to the said pipe having its extremities closed, a plurality of second pipes connected to and intercommunicative with the said pipe, said pipe and said second pipes having a plurality of apertures.

1,633,392. SEDATIVE AND HYPNOTIC UREIDES. FRIEDRICH BOEDECKER, Berlin-Dahlem, Germany. Filed Sept. 9, 1926, Serial No. 134,567, and in Germany Mar. 3, 1923. 8 Claims. (Cl. 260—125.)



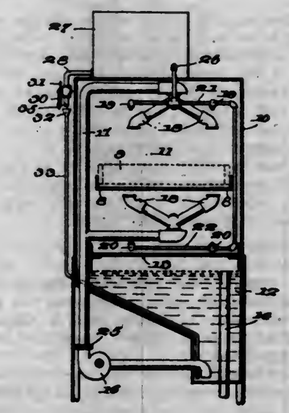
1. As an article of manufacture and trade, a sedative and hypnotic compound consisting of the ureide of a di-alkyl substituted acetic acid, one of the alkyl radicals at least being non-saturated.

1,633,393. MEANS FOR MEASURING RESPIRED AIR IN TESTING THE LUNGS. HAYDN BROWN, London, England. Filed Jan. 31, 1924, Serial No. 689,762, and in Great Britain Feb. 2, 1923. 3 Claims. (Cl. 73—112.)



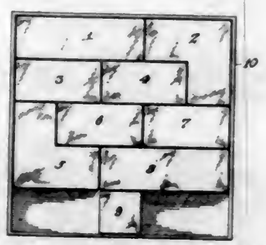
1. A device for testing the lungs, comprising a vessel adapted to contain liquid, and tubular means associated with said vessel whereby expired air is passed into the vessel above the liquid, in combination with a volumetric measuring element and tube means within said vessel having a relatively small aperture and leading from the liquid in the vessel to said measuring element, said tube means being arranged with a visible portion above the closed vessel so that the variations in pressure on the liquid can be observed by watching the level of the liquid in the visible portion of the tube means.

1,633,394. ATTACHMENT FOR CULTIVATORS. PAUL A. CALDWELL, Tell, Tex. Filed Oct. 24, 1925. Serial No. 64,621. 3 Claims. (Cl. 97—179.)



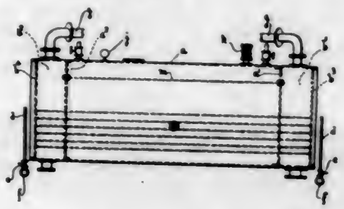
1. In a cultivator attachment, the combination with a cultivator frame provided with suspended beams, of opposed runners provided with shanks, means for adjustably securing the shanks to the sides of the beams to permit of vertical adjustment of the runners, and means interconnecting the shanks of the runners to rigidly connect the same and adjustable to maintain the parallel relation of the runners irrespective of the horizontal relation of the two.

1,633,395. IRRIGATION DOOR. SVANTE A. CARLSSON, Lethbridge, Alberta, Canada. Filed Apr. 28, 1926. Serial No. 105,270. 1 Claim. (Cl. 61—29.)



The herein described irrigation door consisting essentially of a body plate, a continuous, one-piece reinforcing frame arranged at one side of and fixed to said body plate and having upper and lower and side bars, the upper bar terminating in lateral extensions extending beyond the side edges of the body plate and provided at their outer ends with pendent prongs constituting side anchors, superposed plates fixed on the upper bar of the frame and constituting horizontally disposed foot pieces, an apertured bar interposed between and fixed to the side bars at intermediate points in the length of the latter, and a vertical central anchor connected with the body plate and with the upper and lower bars of the reinforcing frame and extending through said apertured bar and also extending above and below the body plate and provided at its upper end with a head disposed in a horizontal plane above that of said foot pieces.

1,633,396. DISHWASHING MACHINE. DAVID X. CLARIN, New York, N. Y., assignor to Oakite Products, Inc., New York, N. Y., a Corporation of New York. Filed Dec. 24, 1926. Serial No. 156,826. 5 Claims. (Cl. 141—9.)



3. In a dishwashing machine, a dish chamber, a conduit for supplying water thereto, a receptacle adapted to receive water from said chamber, a container for a cleansing agent, a connection leading from said container to said receptacle, and interconnected valves for controlling the flow through said conduit and said connection.

1,633,397. AMUSEMENT DEVICE. CHARLES L. A. DIAMOND, Newburgh, N. Y. Filed Jan. 12, 1927. Serial No. 160,684. 3 Claims. (Cl. 273—132.)

1. A puzzle consisting of a plurality of juxtaposed pieces of relatively different sizes and shapes confined for slidable movement longitudinally and transversely of a limited area, certain of said pieces being of substantially rectangular formation and corresponding size, others of the pieces being complementally sized and of substantially rectangular formation but of less size than the first pieces, a smaller and substantially square piece, and a plurality of relatively opposed L-shaped pieces.

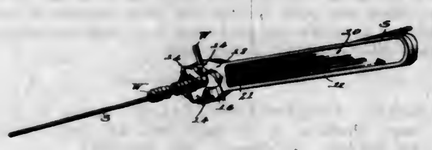
1,633,398. STEAM BOILER AND EVAPORATOR. WILLIAM DONALD, Glasgow, Scotland. Filed Dec. 9, 1925, Serial No. 74,403, and in Great Britain Dec. 17, 1924. 8 Claims. (Cl. 22—51.)

1. An apparatus for steam raising, boiling and evaporating liquids comprising a horizontal boiler, fire tubes extending longitudinally therethrough, smoke boxes at each end of the boiler, firing chambers located intermediate between the boiler ends and smoke boxes, substantially half of said tubes extending from the firing chamber at one end of the boiler to the smoke box at the other end thereof, and the remainder of the fire tubes extending from the other firing chamber to the smoke box at the other end of the boiler, and burners located in both firing chambers to simultaneously supply heat to the fire tubes which terminate therein.

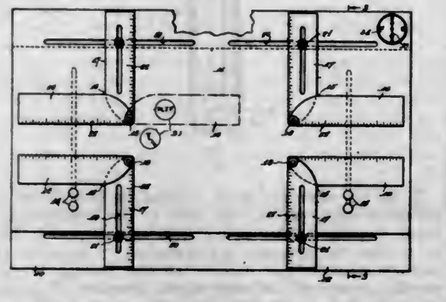
1,633,399. INSULATOR FITTING. GRANDON H. ECKERT, East Liverpool, Ohio, assignor to The R. Thomas & Sons Co., East Liverpool, Ohio, a Corporation of Ohio. Filed Dec. 28, 1920. Serial No. 433,565. 1 Claim. (Cl. 287—10.)

A terminal fitting for link-type insulators, said fitting comprising a hollow casting affording an interior chamber bounded by spaced side walls and spaced top and bottom walls, the bottom wall being concaved and the top wall being arched, and the side walls converging toward opposite ends of the casting, the bottom wall of the chamber adjacent its opposite ends being shaped to afford interior seats for the anchor heads of an associated U-link, and the top wall being shaped at an intermediate point to afford an interior seat for the anchor head of a suspension device, one of the side walls of the fitting being apertured to afford three T-slot gates, two of which extend through the bottom wall of the chamber to accommodate the shanks of the U-link when its anchor heads rest in the seats in said bottom wall, and one of which extends through the top wall of the fitting to accommodate the shank of the suspension device when its anchor head rests in the intermediate seat, the opposite

side wall of the fitting being apertured adjacent the top wall of the fitting at opposite ends thereof and substantially in register with said T-slot gates, and also being apertured adjacent the bottom wall of the fitting at a point substantially in register with the intermediate T-slot gate, said apertures serving to accommodate filler pins which prevent the inserted anchor heads from escaping through the T-slot gates of the fitting.



1,633,400. BREAST DRILL. THOMAS J. FEGLEY and GEORGE O. LEOPOLD, Philadelphia, Pa., assignors to North Bro's M'f'g. Co., Philadelphia, Pa., a Corporation of Pennsylvania. Filed Nov. 25, 1925. Serial No. 71,446. 2 Claims. (Cl. 145—67.)



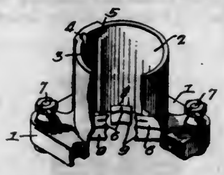
1. The combination in a breast drill, of a frame having bearings for the drilling mechanism; a spindle mounted in said bearings, said spindle having an annular groove at the inner end; a segmental recess in the frame; a handle having a ferrule cut away to fit the segmental recess; a segmental key located in the frame and extending into the annular groove in the spindle; a threaded sleeve adapted to an external thread on the frame; and a split-ring located in the groove in the ferrule of the handle, the sleeve fitting over the ring and acting to retain the handle to the frame and lock the key, through the medium of the ferrule, to the spindle.

1,633,401. TOOL FOR WRAPPING WIRE. JACOB FISHER, Wabash, Ind. Filed Nov. 28, 1923. Serial No. 677,508. 2 Claims. (Cl. 140—117.)

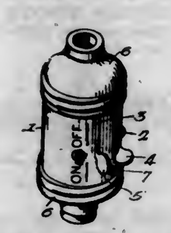
1. A tool for use in wrapping wire comprising a handle having a working head provided with spaced lateral fingers for engaging the wrapping wire, the adjacent faces of the fingers being oppositely curved, said head having a radial slot projecting inwardly beyond the center of said head, a second handle pivoted on the first-mentioned handle and provided with a head in contact with the first-mentioned head and having a slot at substantially right angles to the slot in the first-mentioned head, the provision of the slot in the second-mentioned head forming a latch adapted to be disposed transversely across the outer free end of the first-mentioned slot, said latch being adapted to engage the wire for releasably forcing the same when the handles are in alignment in frictional contact with the inner end of the first-mentioned slot.

1,633,402. PLOTTING DEVICE. JAMES B. FURBER, Linden, N. J., and KARL L. RANKIN, New York, N. Y. Filed Feb. 5, 1926. Serial No. 86,276. 9 Claims. (Cl. 35—16.)

1. A device of the character described comprising a plate, and plotting elements each slidably connected with the plate so as to be adjustable with respect to said plate, each of said plotting elements comprising members pivotally connected together to permit changes in their angular relationship.



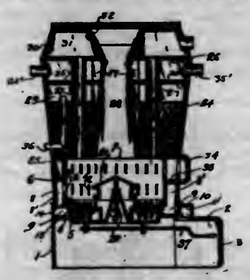
1,633,403. IRONING BOARD. FRANK D. GORMAN, New York, N. Y. Filed Aug. 26, 1926. Serial No. 131,704. 4 Claims. (Cl. 68—10.)



1. An ironing board having a slot therein, a stationary stud projecting above the surface of the board, a second stud projecting above the surface of the board and mounted for adjustment along the slot in the board.

1,633,404. TUBE SOCKET. MONROE GUETT, Hartford, Conn., assignor to Hart & Hegeman Manufacturing Company, Hartford, Conn., a Corporation of Connecticut. Filed Feb. 28, 1925. Serial No. 12,278. 1 Claim. (Cl. 173—328.)

The combination in a socket, of a base having a tubular extension; binding posts on the base; spring contact plates extending from the binding posts into the opening in the socket; non-elastic plates, also secured to the binding posts and extending under the spring contact plates to limit their movement; and means for attaching a tube to the socket.



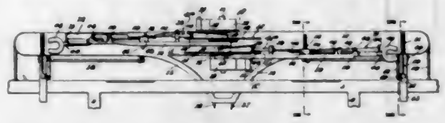
1,633,405. SWITCH. MONROE GUETT, Hartford, Conn., assignor to Hart & Hegeman Manufacturing Company, Hartford, Conn., a Corporation of Connecticut. Filed Mar. 6, 1925. Serial No. 13,580. 1 Claim. (Cl. 200—5.)

The combination in an electric switch, of a casing having two parallel slots therein; and two levers arranged side by side, one lever projecting through one slot and the other lever projecting through the other slot, each lever being provided with a finger pad, the pad of one lever being at right angles to the pad of the other lever.

1,633,406. CAST-IRON STEAM-HEATING FURNACE. WILLIAM A. HAGSTRUM, Columbus, Ohio. Filed Sept. 12, 1925. Serial No. 56,055. 2 Claims. (Cl. 110—1.)

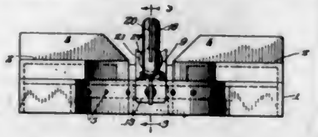
1. A furnace of the class described, comprising a fire pot, a boiler mounted on the fire pot, said fire pot comprising spaced walls to provide an air chamber, means for permitting the egress of air from the chamber into the fire pot, means for conducting air to the chamber, a ring mounted in the fire pot, standards supported by the ring, a bolt adjustably supported by the standards, a conical spreader mounted on the bolt and adjustable therewith, and means for guiding the spreader in its movement.

1,633,407. ANTISPLASH DEVICE FOR STORAGE BATTERIES. ABRAHAM HALIKMAN, New York, N. Y. Filed May 11, 1926. Serial No. 108,857. 1 Claim. (Cl. 136—163.)



In a storage battery, a tubular filling member formed with a main bore and a bottom having an opening extending therethrough of an appreciably less diameter

than said main bore, said filling member being internally threaded at its outer end, a funnel-shaped container having a tapering portion and an externally threaded cylindrical portion, said cylindrical portion being screwed into

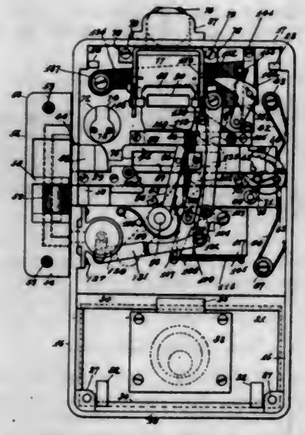


the threaded part of said filling member, said funnel-shaped container also being formed at its outer end with a threaded cylindrical section, and a closure cap normally screwed onto said threaded section.

1,633,408. MUSIC-SHEET TURNER. STEVE HALMI, Yonkers, N. Y. Filed Sept. 10, 1925. Serial No. 55,516. 15 Claims. (Cl. 84—521.)

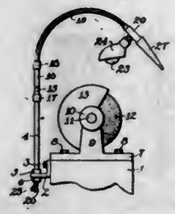
6. In a music sheet turner, the combination with a music rack, of a pair of tensioned sheet turning arms, a shaft pivotally supporting the same, a pinion fixed to each arm and journaled on the shaft, a sliding rack bar meshing with each pinion, operating cords attached to the rack bars, a sheet clamp at each end of the music rack, separate operating means for each clamp, a part of the operating means being arranged in the path of movement of the arms, a sheet carrying magnet carried by each arm adapted to engage said part of the operating means to move the same transversely of the arm and permit closing of the sheet clamp, the magnet being pivotally supported on the arm, a tensioned rod on the arm connected to the magnet and a cam device associated with the rod for moving the magnet into sheet engaging position and permitting return thereof for operating the part of the operating means.

1,633,409. MITER BOX. EDWARD A. HOOVER, Bradley, and WILLIAM C. KIRCHNER, Kankakee, Ill. Filed June 3, 1925. Serial No. 34,517. 3 Claims. (Cl. 143—88.)



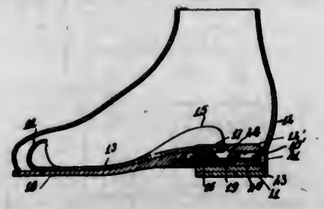
1. A miter box having, in combination, a base comprising raised end portions and an intermediate sector portion, said end portions forming a divided work table, a divided back, a member pivotally mounted on said sector portion for adjustment about a vertical axis in the plane of said back, means to secure said member in its adjusted position, said member having bearings at each end thereof and a bearing trough semicircular in section throughout its length, a U-shaped saw frame pivoted in said member and adjustable about a horizontal axis in the plane of said work table, said saw frame comprising a cylindrically surfaced cross bar coacting with said bearings and trough, and a pair of bifurcated arms extending perpendicular thereto adapted to guide a saw across said table, said cross bar having its central portion between said bearings reduced in section so as not to extend above the plane of the said table, said member having a plate member depending from one end thereof, said saw frame having a guide member depending therefrom adjacent said plate member, and means to clamp said plate member and guide member in fixed relation to secure said saw frame in its adjusted position and against longitudinal movement.

1,633,410. THERMOSTATIC VALVE. MOSES G. HUBBARD, Chatham, N. J. Filed Feb. 12, 1924. Serial No. 692,222. 15 Claims. (Cl. 236—66.)



1. An air valve for steam heating systems having an apertured seat open at one side to the atmosphere, a freely movable member on the other side adapted to open or to close the aperture, a thermostat for operating the movable member, said movable member moving to open position whenever the atmospheric pressure is greater than the pressure inside the system and movable by gravity when the thermostat is cold.

1,633,411. COIN-CONTROLLED LOCK. FREDERICK W. KASSLER, St. Louis, Mo. Filed Dec. 29, 1925. Serial No. 78,206. 14 Claims. (Cl. 194—74.)



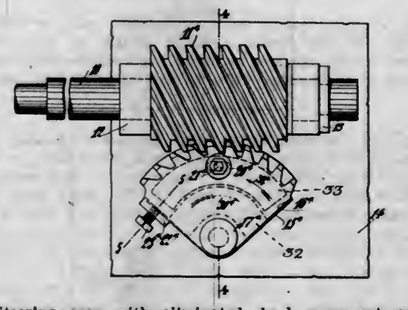
1. In a coin controlled lock, a locking bolt normally spring projected into locking position, means operative upon insertion of a coin for retracting said bolt, automatically acting means for latching said bolt in retracted position, and means operative only after said bolt has been fully retracted and latched for shifting the coin to inoperative position.

1,633,412. EYE AND FACE SHIELD FOR GRINDING WHEELS. THOMAS J. KELLEHER, Chicago, Ill. Filed Aug. 22, 1925. Serial No. 51,800. 1 Claim. (Cl. 51—272.)

In an eye and face shield, a vertical tubular member, an additional tubular member and a non-extensible flexible tubular member mounted at one end on said additional tubular member in combination with a lamp, a frame, a transparent member slidably mounted in said frame, a tubular connection, said lamp mounted on said connection, a bolt extending through said frame and into said connection, an eccentric washer on said bolt interposed between said frame and said connection, and said connection secured on said non-extensible tubular member, and electric conductors extending through all said tubular members and in electric connection with said lamp; whereby adjustment of said lamp to illumine work necessarily adjusts said transparent member between said work and the workman doing said work.

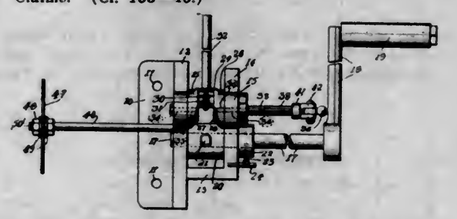
1,633,413. ADJUSTABLE SHOE. STEFANO LA MARCA, Brooklyn, N. Y. Filed Feb. 2, 1926. Serial No. 85,481. 3 Claims. (Cl. 36—1.)

3. The combination with a shoe, of an inner sole therefor adapted to be moved bodily with respect to said shoe, arch supporting means on said inner sole, a tubular member having an internally screw threaded aperture therein mounted on the lower surface of said inner sole, a threaded member journaled in said shoe and screw threaded into said tubular aperture, said threaded member being adapted to be rotated for moving said inner sole longitudinally of said shoe, and a toe receiving socket on the end of said inner sole adapted to restrict the forward movement of a foot within said shoe.



1,633,414. COMBINED LICENSE-PLATE AND IDENTIFICATION-CARD HOLDER. ADOLPH G. LORENZ, Little Rock, Ark. Filed Mar. 14, 1927. Serial No. 175,277. 2 Claims. (Cl. 40—63.)

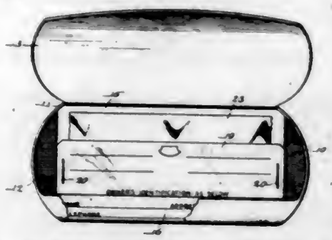
1. In a vehicle license plate, an apertured portion having marginal forwardly offset circumferentially spaced bead sections and a rearwardly offset strap transverse of the apertured portion, disposed at one side of the diametrical center of the apertured portion, said strap having a medial slot and the said plate having a pair of



parallel slots for the reception of a sealing device coacting with the strap to seal the identification device in the apertured portion.

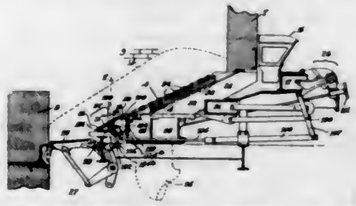
1,633,415. STEERING GEAR. WILLIAM OVERDICK, Brooklyn, N. Y. Filed Apr. 21, 1924. Serial No. 707,859. 1 Claim. (Cl. 74—79.)

Steering gear with eliminated dead movement comprising in combination a driving rod with a worm thread on it; a movement transmitting driven shaft; two essentially alike segmental disks on the driven shaft with circumferential gearings meshing with the said worm thread; a longitudinal slot in the toothed circumference of the one segmental disk and a screwed fastening pin extending from the other segmental disk through the said slot, with a fastening nut at the end of this pin; a lap-over at the one side of the one segmental disk near to its toothed circumference, and a set screw in this lap-over, adapted to bear on the other segmental disk; an arc shaped groove made in the one of the segmental disks in the medium zone between its turning center and the toothed circumference; an arc shaped rut or abutment below the toothed circumference of the lower segmental disk.



1,633,416. MACHINE FOR MAKING HOOK SUPPORTS. JOSEPH A. PEREIRA and FREDRICK ROBERTS, Yuba City, Calif. Filed July 23, 1926. Serial No. 124,470. 5 Claims. (Cl. 153—40.)

5. In a device of the character described, a base, a drum rotatably carried by the base having a hook adapted to engage a wire blank for coiling it about the drum, means supported by the base for forming eyes on the ends of



the wire blank including a pivoted wire former and a retractile core upon which each of the ends of the wire blank is coiled adapted to be retracted for moving the core out of the path of the eyes after said eyes are formed thereon.

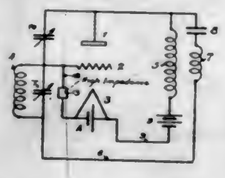
1,633,417. EYEGLASS-CASE HOLDING AND PROTECTING DEVICE. DYER W. PERRY, Keene, N. H. Filed Dec. 2, 1926. Serial No. 152,198. 5 Claims. (Cl. 206—5.)

1. The combination with an eyeglass case, of means within the case having a glazed surface on which the lenses of the eyeglass may rest, and cushioning means acting in conjunction with the first mentioned means.

1,633,418. FURNACE GRATE. ERNEST B. PRIEBE, Inwood, N. Y., and DANIEL P. MINER, Providence, R. I.; said Miner assignor of his undivided one-half interest to Warren C. Drake, Inwood, N. Y. Filed June 25, 1921. Serial No. 480,394. 2 Claims. (Cl. 110—44.)

1. In a furnace grate having a plurality of parallel inclined fuel retorts discharging longitudinally, the combination therewith of an extension grate receiving burning fuel from the retorts and conducting it longitudinally towards a rear dumping point, consisting of numerous downwardly inclined longitudinal grate bars, with their upper sides in downwardly trending step formation, each bar having a larger vertical depth than either its transverse thickness or the height of each step and constructed with horizontal ribs at its two sides projecting into the spaces between the ribs of the adjacent grate bars to provide numerous air passages between the ribs and bars into the fuel bed.

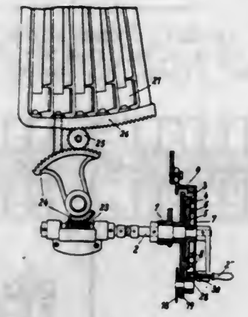
1,633,419. ARTIFICIAL-MINNOW FISHHOOK. CHARLES M. REED, Kabletown, W. Va. Filed Nov. 26, 1926. Serial No. 150,936. 5 Claims. (Cl. 43—36.)



1. An artificial bait comprising a minnow, hooks adapted to occupy an inactive position within the minnow, retractable means for holding the hooks in said position, a main line secured to the minnow, a trip line secured to the main line and the means, and means adapted to move the hooks into active position beyond the minnow on the retraction of said first means.

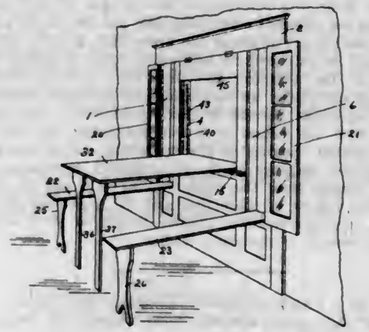
1,633,420. CAP FOR CONTAINERS. WALTER SCHLAYER, Jamaica, New York, N. Y., assignor to Fred Schlayer, Woodhaven, Long Island, N. Y. Filed July 15, 1926. Serial No. 122,642. 6 Claims. (Cl. 221—60.)

1. A closure structure for a collapsible tube formed with a threaded outlet member, comprising a tubular threaded member screwed onto said threaded outlet member, said tubular threaded member having a discharge opening registering with the opening in said outlet member and an annular bead surrounding said discharge opening, a spring provided with a supporting plate, said spring surrounding said outlet member below said tubular member, a closure plate carried by said supporting plate, said supporting plate surrounding said tubular member normally held by said spring against said annular bead, said closure plate being formed with a depression, a packing member arranged in said depression and engaging said bead when the closure plate is in a closed position, means carried by said spring acting as a catch for normally holding the closure plate in a closed position, said spring normally tending to quickly move the closure plate to an open position when said catch is released.



1,633,421. MEANS FOR PREVENTING RETROACTIVE EFFECTS IN AUDION AMPLIFIER CIRCUITS. GEORGE A. SOMERSALO, New York, N. Y. Filed Feb. 11, 1926. Serial No. 87,608. 14 Claims. (Cl. 179—171.)

1. An audion amplifier network comprising an alternating current plate filament circuit including an output inductance, an input circuit between grid and plate connected to the output circuit at a point between the plate and the output inductance and including an inductance inductively coupled to the inductance in the plate filament circuit whereby to neutralize the inherent capacity of the audion electrodes, and means for preventing high direct current voltage from reaching the grid.

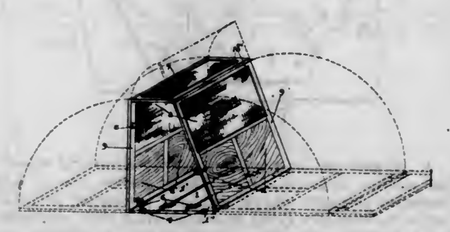


1,633,422. MATRIX-SETTING AND LINE-CASTING MACHINE. OTTO STERN, Berlin, Germany, assignor to the Firm: Standard Compositor Aktiengesellschaft, Berlin, Germany. Filed July 2, 1925, Serial No. 41,138, and in Germany Feb. 14, 1924. 8 Claims. (Cl. 199—45.)

1. In a matrix-setting and line-casting machine, the combination of a casing wheel adapted to receive a plurality of moulds, a casting device associated with said casting wheel, and an indicating device connected to said

casting wheel, said indicating device being adapted to indicate the temporary working positions of said casting wheel relatively to said casting device.

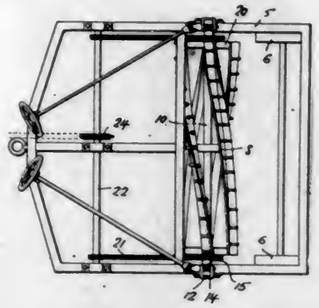
1,633,423. WALL FURNITURE. HARRY G. TALBOTT, Baltimore, Md. Filed Sept. 9, 1925. Serial No. 55,214. 1 Claim. (Cl. 45—51.)



In wall furniture, a frame comprising a pair of end uprights and a pair of intermediate uprights provided on their inner sides with ways, a top board extending across and connecting the upper ends of the end and intermediate uprights, a strip connecting the intermediate uprights forward of the ways at a height suitable for supporting a table, a bar connecting each end upright to the adjacent intermediate upright at a height suitable for a bench so as to leave above it the space extending to the top board, a table having its inner edge provided with pivots extending into the ways on the inner sides of the intermediate uprights and adapted to be moved into the space between the intermediate uprights in rear of the table supporting bar and having a supporting leg at its free end, a bench in each of the spaces between the end uprights and the intermediate uprights hinged at its inner end and of a length sufficient to extend near the top board, provided with a supporting leg at its free end and having a length greater than the height of the table supporting bar, adapted to be swung into said space between an end upright and an intermediate upright, a door hinged to each end upright adapted to close the space between the end upright and the intermediate upright extending from the cross bar to the top board, a closure board hinged to the lower edge of the top board between the intermediate uprights adapted to close the upper end of the space between the intermediate uprights above the table supporting bar, and a slide movable in the ways in the inner sides of the intermediate uprights adapted to close the space above the table supporting bar and below the lower edge of the board hinged to the top board, said slide having a length not greater than the height of the table supporting bar.

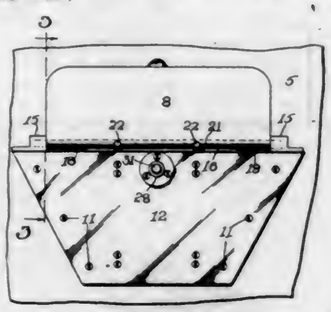
1,633,424. LIQUID APPLICATOR. EDWARD THEMAK, New York, N. Y. Filed Sept. 23, 1925. Serial No. 58,179. 1 Claim. (Cl. 215—12.)

A liquid applicator comprising a container having a single minute opening at one end, said end being spherical, a casing covering and protecting said container, said casing being formed with a body and a cap having a spherical end, said body falling short of said container end, said body nearest the container end having a threaded section and a raised roughened bead at one end of the threaded section, said cap having a threaded section and a pad having a concave seat arranged within the spherical end thereof, said pad being adapted to engage the spherical end of said container and close said aperture, the length of the cap and body being such that the cap will be stopped in its movement as it is screwed onto the body by said roughened bead before an undesirable pressure is applied to said container by the pad on the cap.



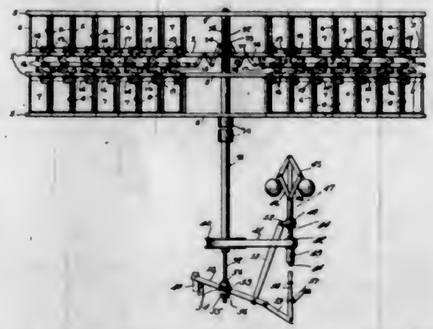
1,633,425. PORTABLE COLLAPSIBLE CRATE. WILLIAM D. THIXTON, Belmar, N. J. Filed Nov. 23, 1926. Serial No. 150,274. 1 Claim. (Cl. 217—47.)

A portable crate for the purpose set forth comprising a collapsible body portion formed of front, rear and top walls and a bottom, said top wall being foraminous, said front and said rear wall having the lower portion thereof imperforate and the upper portion thereof foraminus, means for hinging said front and rear walls at their lower ends to said bottom, means for hinging said



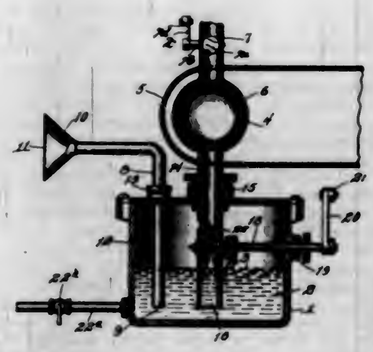
top wall to the upper end of the front wall, said top wall of less width than said bottom, a pair of foraminous side walls, means projecting laterally from the ends of said bottom for detachably supporting said side walls from the lower ends thereof in an upright position, said side walls of less height than the front and rear walls to form an opening at each side of the crate when set up, means for detachably connecting the top wall above said bottom to the upper end of said rear wall, and means for detachably connecting said side walls to the front and rear walls.

1,633,426. ROAD GRADER. EDWIN WALWORTH, Lincoln, Nebr. Filed July 3, 1926. Serial No. 120,340. 3 Claims. (Cl. 37—108.)



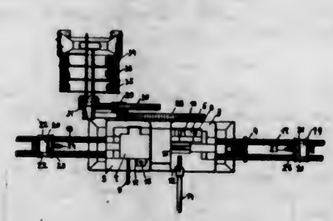
1. In a road grader, a scraper bar including an angle iron having grooves on each side portion thereof, said grooves extending transversely of said side portions, a plurality of teeth receivable in the grooves, and means for holding said teeth in said grooves.

1,633,427. ARMREST. PAUL WIESE, Waterbury, Conn. Filed Aug. 19, 1926. Serial No. 130,271. 4 Claims. (Cl. 155—198.)



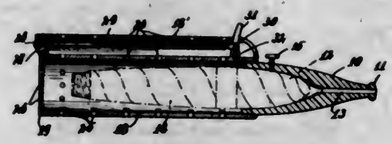
1. An arm rest or the like including a vertical mounting plate, a supporting plate hinged on the top of said mounting plate for vertical swinging movement, yieldable means to normally swing said supporting plate upwardly to a vertical inoperative position, and a vertical upwardly spring-projected latch bolt mounted on the mounting plate and adapted to retain the supporting plate in a downwardly swung operative horizontal position, a tubular guide at the inner side of the mounting plate having a push button slidable therein, an elbow fixed to said tubular guide and extending through the mounting plate and terminating in a downwardly directed end, a flexible push element slidable in the elbow and engaged at one end by the push button, and means operatively connecting the other end of the push element with the latch bolt whereby the latter may be depressed for release upon pressing said push button.

1,633,428. AUTOMATIC WIND MOTOR. STEFAN ZGLICZYNSKI, Baltimore, Md. Filed Nov. 28, 1925. Serial No. 71,991. 3 Claims. (Cl. 170—26.)



1. In a wind motor, a wind wheel embodying a plurality of arms, each arm comprising spaced side bars, journaled rods connecting the bars, a blade carried by each rod, means associated with each blade for holding the same in closed operative positions and including a shaft pivotally supported at the free swinging side edge of each blade, lug projections on one side of said shaft engaging the adjacent connecting rod, an arm at the other side of said shaft adjacent the lower end, a roller in the lower end of said arm, a bell crank lever pivotally supported in the adjacent side bar with one leg thereof engaging the roller, an operating rod having a series of slotted openings therein, a link connected to the other leg of each bell crank lever and extending into an adjacent slotted opening of the operating rod, a group of said slotted openings being of gradually increasing operative length from the outer end of said rod to effect sequential release of the blades and the remainder of said slotted openings being of similar length to effect simultaneous release of the other blades.

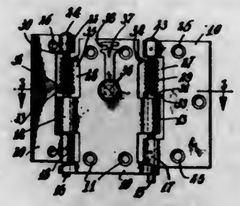
1,633,429. CARBURETOR. CHARLES B. ALLEN, Atlanta, Ga. Filed Oct. 21, 1924. Serial No. 744,995. 1 Claim. (Cl. 261—76.)



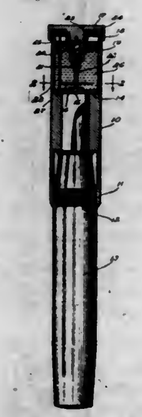
A carburetor comprising a casing defining a fuel chamber and having fuel supply means connected therewith, a pipe extending through the top of the casing and terminating short of the bottom thereof and provided at an intermediate point with a fuel valve having actuating means exterior to the casing, said pipe constituting a conductor for connection with the intake manifold of an internal combustion engine, and a second pipe extending through the top of the casing and also terminating adjacent the bottom thereof, said second pipe having an angular bend terminating in a funnel to provide an air supply to the casing, the first said pipe being provided with a lateral port directly above the plane of the fuel valve.

1,633,430. UPSETTING MACHINE. KARL AUERBACH, Saalfeld-Saale, Germany, assignor to Herman F. Hoevel, New York, N. Y. Filed Oct. 9, 1925, Serial No. 61,423, and in Germany May 7, 1924. 5 Claims. (Cl. 78—17.)

1. An upsetting-machine comprising in combination with the machine frame, a guide on said frame, a carriage for the work and an upsetting carriage movably mounted on said guide the one opposite the other, a spindle drive for the work carriage, a pair of racks on each carriage projecting from the rear ends of the same, and abutments for the work said abutments being adjustably mounted one on each pair of racks and design to sustain the axial shearing stress produced by the upsetting resistance.



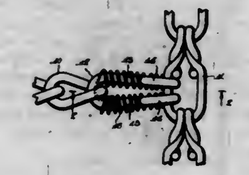
1,633,431. SAFETY CIGAR HOLDER. ALEXANDER BAGAMERY, South River, N. J. Filed Mar. 6, 1926. Serial No. 92,785. 4 Claims. (Cl. 131—51.)



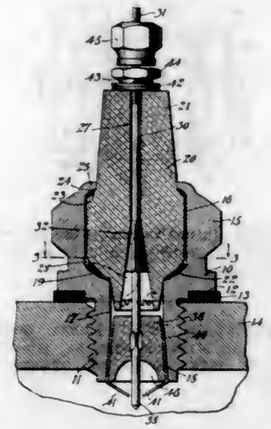
1. A receiver for cigar ashes adapted to be placed over the lighted end of a cigar, to prevent the ashes of the said cigar from dropping therefrom, and a cap hinged to said receiver for closing the end thereof, a spring for normally holding said cap in tight fitting relation on the end of said receiver and a system of levers for opening said cap against the pressure of said spring.

1,633,432. DOOR HINGE. ADÉLARD BOUCHER, Winchendon, Mass. Filed Aug. 3, 1925. Serial No. 47,741. 2 Claims. (Cl. 16—132.)

1. Hinge comprising a central leaf member and lateral auxiliary leaf members, integral pintles secured at upper and lower ends to one of said leaf members for hingedly securing the lateral leaves to said central leaf at opposite edges thereof, springs wound about one part of said pintles and secured with their upper ends to said central member, collars on said pintles on which the lower ends of said springs rest, pins on said collars, and a latch movably secured to said central member and spaced therefrom adapted to be turned to engage the pins on said collars, and means for fastening said hinge to a door or to two adjacent doors.

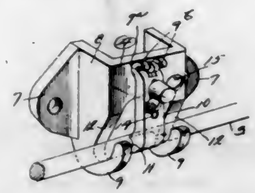


1,633,433. FOUNTAIN PEN. HENRY BOYER, Jersey City, N. J., and MAURICE KLEVINS, Brooklyn, N. Y. Filed Mar. 26, 1926. Serial No. 97,733. 5 Claims (Cl. 120—42.)



1. A fountain pen cap having an ink reservoir therein and a valve controlling the discharge of ink from said reservoir.

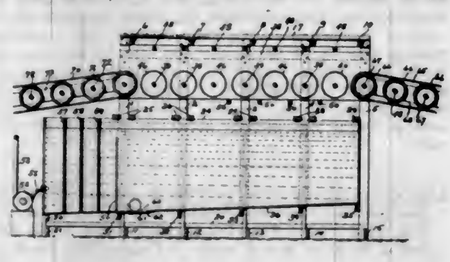
1,633,434. CHAIN LINK. WILLIAM J. BRYAN, Jersey City, N. J. Filed May 25, 1926. Serial No. 111,613. 4 Claims. (Cl. 24—239.)



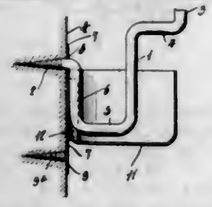
1. A link of the class described including a length of metal bent into approximately U-shape to define a pair of converging shanks, the ends of the shanks being reversely bent upon themselves to form hooks, and a coiled expansion spring encircling the shanks and having its ends disposed under the hooks.

1,633,435. SPARK PLUG. EUGENIO N. DE ALCOCER and FRANCISCO O. DE ALCOCER, Mexico, Mexico. Filed Dec. 28, 1923. Serial No. 683,228. 5 Claims. (Cl. 123—169.)

1. In a spark plug, the combination with the shell and insulator member, of a removable plug member fitted within and closing the lower end of the shell and carrying spaced central and grounded electrodes, and a stem extending through the insulator member and detachably connected with the central electrode, said stem and insulator member having interengageable portions for effecting the frictional coupling of the stem with the central electrode upon axial movement of the stem.



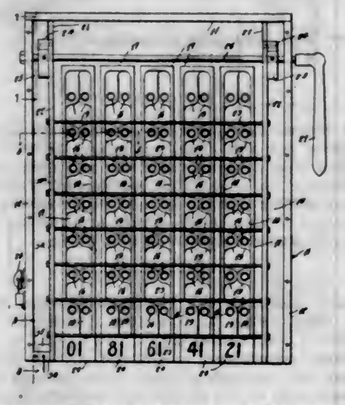
1,633,436. AWNING-ROD CLAMP. FRANCIS R. CLIFTON, Omaha, Nebr. Filed Feb. 23, 1924. Serial No. 694,606. 3 Claims. (Cl. 156—15.)



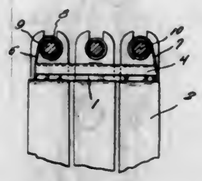
1. An awning clamp comprising a bracket adapted to be secured to a window frame, spaced outwardly extending hooked arms carried by said bracket, and adapted to receive the awning rod, a jaw hingedly connected to the bracket above the hooked arms and hingedly movable in a plane at a right angle to the bracket and rod, the lower end of said jaw being adapted to engage and hold the rod in the hooked arms and a bolt extending through an elongated slot in said jaw and into the bracket forming means whereby the jaw may be forced into clamping engagement with a rod in the hooked arms.

1,633,437. VEGETABLE-WASHING MACHINE. CECIL C. DANIELS, Weslaco, Tex., assignor of one-fourth to F. W. Stephens and one-fourth to Luther Hughes, Weslaco, Tex. Filed Jan. 26, 1926. Serial No. 83,926. 7 Claims. (Cl. 146—200.)

1. In a machine for cleaning vegetables, a series of cylindrical drums formed of wire netting, having their axes parallel and in the same horizontal plane, and so arranged as to leave a substantial space between the peripheries of adjacent drums, means for rotating the drums, and means for forcing water upward between the peripheries of adjacent drums.

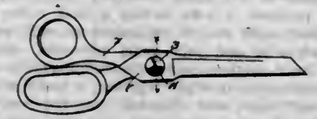


1,633,438. ANTPROOF SHELF BRACKET. HERMAN E. DE PEW, Alameda, Calif. Filed Aug. 5, 1926. Serial No. 127,326. 3 Claims. (Cl. 248—18.)



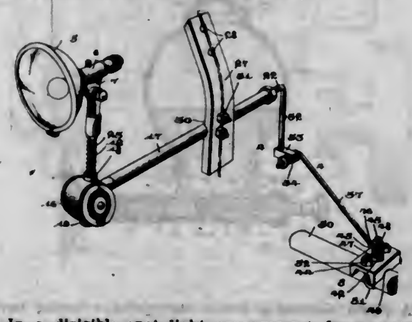
1. A shelf bracket, including a U-shaped member, an arm extending at an angle to one of the sides of the member and adapted to engage a support, the other side of the member formed to support a shelf, and a cup shaped container the vertical wall of which frictionally engages between the U-shaped member and the support and to hold a liquid immersing the member.

1,633,439. AUTOMATIC SIGNAL INDICATOR FOR CREELING FRAMES. ALFRED J. DION, Indian Orchard, Mass. Filed May 7, 1925. Serial No. 28,664. 10 Claims. (Cl. 28—51.)



1. A device of the character set forth, comprising a casing provided with openings in the opposite sides thereof, vertical plates slidably arranged within the casing and provided with tubes, vertical bars slidably mounted within the casing, rods carried by the bars, means for movably supporting the bars and rods, said means comprising lugs secured to the bars, a shaft journaled in the casing, cams secured to the shaft and contacting with the lugs, and a lever connected to the shaft.

1,633,440. MEANS FOR PREVENTING CHATTERING IN TRANSMISSIONS. CHARLES BENJAMIN EPPERSON, Petersburg, Va., assignor of one-third to J. H. Tucker, Petersburg, Va., and one-third to J. L. Rawlings, Sutherland, Va. Filed Nov. 24, 1924, Serial No. 751,925. Renewed Apr. 1, 1927. 4 Claims. (Cl. 188—264.)

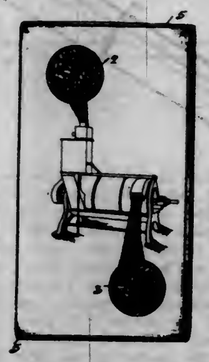


3. In a means for applying a composition to the drums of a transmission mechanism, the composition being in the form of a bar, and means for supporting the bar in frictional engagement with the drum.

1,633,441. SHEARS OR SCISSORS AND THE LIKE. ALFRED T. FIRTH, New York, N. Y. Filed Jan. 29, 1926. Serial No. 84,677. 2 Claims. (Cl. 30—13.)

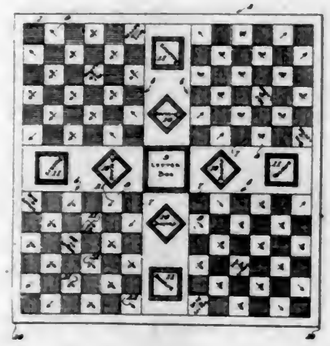
1. In a cutting implement of the type described, a pair of pivotally connected shear members having cutting blades, one of which is formed with an annular bearing groove in the wall of the pivot hole, in which are situated anti-friction balls, and the other formed with a screw threaded pivot hole in which is secured a headed pivot formed with a bearing portion with which the anti-friction balls contact, said pivot head being of fillister form, and said bearing groove formed with a cylindrical socket extension of appreciable depth, into which the pivot head fits with its under surface in contact with the balls.

1,633,442. DIRIGIBLE HEADLIGHT. SAMUEL PENN FOSTER, Chattanooga, Tenn., assignor to Robert C. Lynn, Chattanooga, Tenn. Filed Sept. 21, 1926. Serial No. 136,836. 8 Claims. (Cl. 240—62.)



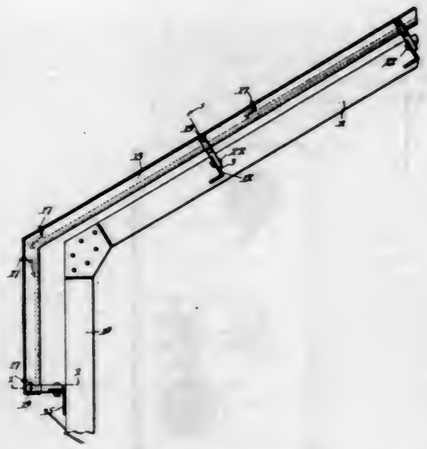
1. In a dirigible spot light arrangement for a motor vehicle, a bracket attachable to a stationary part of the motor vehicle at the front of the latter, a tubular supporting member attached to said bracket and extending in the direction of length of the motor vehicle, a housing body at the forward end of said tubular supporting member, said housing body having vertically alined bearings, a standard journaled in said alined bearings and having a portion extending through said housing body, a spot light supported on said standard, an actuating shaft extending through said tubular supporting member into said housing body, meshed gears within said housing body and secured to the adjacent ends of said standard and said actuating shaft, respectively, and a motion transmitting connection between the actuating shaft and the tie rod of the steering mechanism of the motor vehicle.

1,633,443. COLOSCOPE. EMMANUEL JOSEPH FRANGEDAKIS, Philadelphia, Pa. Filed Aug. 31, 1926. Serial No. 132,740. 5 Claims. (Cl. 128—22.)



4. In an instrument for anal examination, the combination with a plurality of substantially parallel arms adapted for insertion in the rectum, of means for spreading said arms transversely while retaining their substantial parallelism, and illuminating means mounted in at least one of said arms.

1,633,444. ADVERTISING OR SAMPLE PACKAGE. HENRY A. FAUITEMA, Chambersburg, Pa., assignor to The Wolf Company, Chambersburg, Pa., a Corporation of Pennsylvania. Filed Oct 13, 1925. Serial No. 62,826. 5 Claims. (Cl. 35—12.)

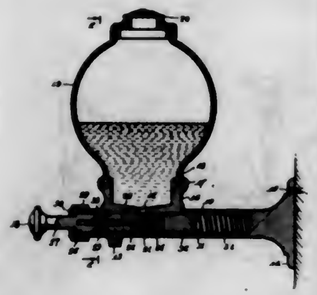


1. An advertising package including a picture of the thing advertised, together with pockets having transparent covers rendering their contents visible from the outside of the package, said pockets being appropriately located with respect to the said picture to graphically illustrate the function of the thing pictured.

1,633,445. GAME APPARATUS. WILLIAM W. GAIL and FRANK B. CONNELLY, Billings, Mont. Filed Mar. 6, 1925, Serial No. 13,453. Renewed Nov. 9, 1926. 3 Claims. (Cl. 273—130.)

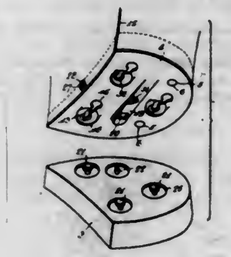
1. In a word spelling game adapted to be played with lettered game pieces, a square board having at each corner a checkered square, said squares being spaced to provide a field having the shape of an equal armed cross, said board having a main game piece receiving area indicated at the intersection of the arms of the cross and further having on each arm of the cross areas indicated as "Reserve" and "Discard" areas for the reception of reserved and discarded game pieces.

1,633,446. BUILDING CONSTRUCTION. ARTHUR B. KLEINHANS, Easton, Pa. Filed Mar. 1, 1926. Serial No. 91,544. 11 Claims. (Cl. 189—4.)



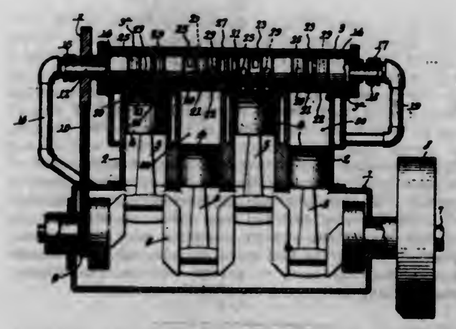
1. In a building structure, in combination with the structural framework including stringers of covering panels or panes, astragals having a channel in its under side constructed of resilient material for supporting said panes and adapted to flex laterally to accommodate slight expansion of the panes, means for supporting said astragals from the stringers to permit of slight movements thereof bodily in a longitudinal direction, said supporting means including lugs connecting said stringers and astragals.

1,633,447. SMOCK. HANNAH LEWIS, New York, N. Y. Filed Apr. 13, 1926. Serial No. 101,679. 2 Claims. (Cl. 2—74.)



1. A smock of the class described comprising sleeve and body portions, a yoke having a back collar shaped portion, front lapel shaped extensions on said yoke, the adjacent edges of said yoke, lapel extension, sleeve portions and body portions being disposed inwardly stitches securing said adjacent edges together, a braid secured to said adjacent edges and disposed over the point therebetween for covering the same and for providing a marginal outwardly projecting ridge adapted to simulate the free edge of a folded lapel and collar, and a padding member disposed around the unattached edges of said collar and lapel portions, the material of said yoke being rolled around and secured to said padding to cause the free edges of said collar and lapel extensions to resemble folded edges of a folded collar and lapel.

1,633,448. LIQUID-SOAP DISPENSER. WINFRED N. LURCOTT, Elizabeth, N. J., assignor to Moore Bros. Co., New York, N. Y., a Corporation of New York. Filed Sept. 17, 1926. Serial No. 136,126. 1 Claim. (Cl. 221—102.)

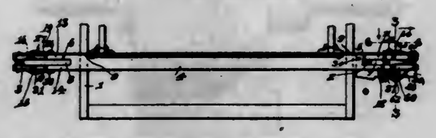


A liquid dispensing device comprising a casing having an inlet and an outlet, a liquid receptacle in communication with said inlet, a plunger arranged for movement in said casing, said plunger having means for controlling said inlet and outlet to alternately open and close the inlet and outlet in the movement of said plunger, said plunger being bifurcated to provide a passageway between the furcations, said plunger being reduced in its length at two points so that the passageway will alternately communicate with the inlet and the outlet in the movement of the plunger in opposite directions, said furcations having a normal tendency to flex away from each other so as to impinge against the wall of the casing, and means extending between said furcations from the wall of the casing to prevent the plunger from turning and for limiting the longitudinal movement of the plunger in one direction.

1,633,449. DETACHABLE-HEEL CONSTRUCTION. MAURICE MAYOROWITZ, New York, N. Y. Filed May 1, 1926. Serial No. 106,147. 10 Claims. (Cl. 36—36.)

1. A coupling, including a plate, a lift, movable spring seats cut from the plate, said movable seats being separated for a portion of their length from the plate and having bayonet slots extending transversely of the plate, pins projecting upwardly from the lift, and heads on the pins adapted to be moved into the larger openings of the slots and moved along the slots to the center of the seats when the lift is moved transversely relative to the heel whereby the seats are put under tension to hold the lift against the plate.

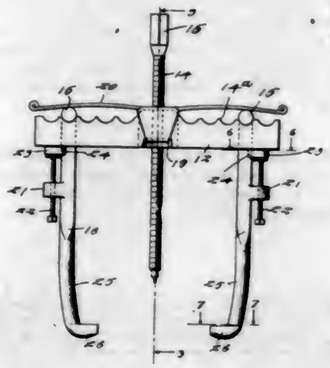
1,633,450. ENGINE VALVE. BENJAMIN F. MCKEE, Arma, Kans. Filed June 23, 1926. Serial No. 118,010. 1 Claim. (Cl. 123—78.)



An internal combustion engine comprising a cylinder, a piston operating in the cylinder, the space between the piston and the cylinder head forming a cylinder combustion chamber, a valve casing having a vent, and a valve rotatable in the casing, the valve having a circumferential inlet chamber and a circumferential exhaust chamber, the casing having an inlet for the inlet chamber, and an outlet for the exhaust chamber, the valve being provided with external inlet and exhaust grooves and with a combustion chamber groove extended part-way around the valve, the combustion chamber groove being adapted to communicate with the vent, and the casing having a port by which the combustion chamber can communicate with the cylinder combustion chamber, the valve having a longitudinal passage establishing communication between the inlet groove and the inlet chamber, the valve having a longitudinal passage establishing communication between the exhaust groove and the exhaust chamber, the casing having other ports by which the inlet and exhaust grooves communicate with the cylinder combustion chamber, and means for rotating the valve in consonance with the movement of the piston.

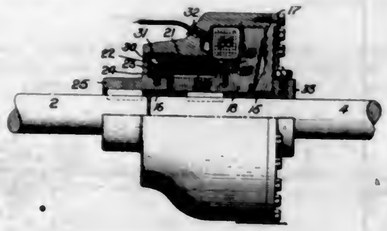
1,633,451. HEATING ROLL FOR PRINTING PRESSES. BERNARD F. MCLAUGHLIN and JOSEPH LOFTUS, Brooklyn, N. Y. Filed Dec. 23, 1925. Serial No. 77,414. 2 Claims. (Cl. 34—18.)

1. In a heating means for printing presses, a stationary tube adapted to be supported at the delivery end of the press, means within the tube for generating heat, a hollow roll mounted for rotation upon the tube and over which the printed sheets are adapted to pass, and means associated with the stationary tube and adapted for cooperation with the respective ends of the rotatable roll for preventing the longitudinal movement of the roll on the tube.



1,633,452. CHECK ATTACHMENT FOR LOOMS. HENRY G. MCLEMORE, Columbus, Ga. Filed May 19, 1926. Serial No. 110,218. 4 Claims. (Cl. 139—164.)

1. A check attachment for loom picker sticks comprising two pairs of spring controlled binder elements, means for pivotally connecting one pair of binder elements directly to the lower face of a lay at the left or lever end of the loom, the controlling spring for the binder elements at the lever end of the loom connected to the sides of the lay and bearing against the outer side of such binder elements, a spacing block secured directly to the lower face of the lay at the right or battery end of the loom, a support adapted to be secured to a quill chute at the battery end of the loom, a binder element having its inner end pivotally supported from and arranged below said block, a binder element pivotally connected to said support and opposing the binder element arranged below said block, and a pair of controlling springs for said last mentioned binder elements, one of said controlling springs adapted to be



connected to the lay and bear against the binder element pivotally supported from said block, and the other of said controlling springs carried by the support and bearing against the binder element pivoted therewith.

1,633,453. PULLING DEVICE FOR GEARS AND THE LIKE. JOHN W. MILLER, El Dorado, Ark. Filed Apr. 24, 1926. Serial No. 104,475. 4 Claims. (Cl. 29—85.)

3. A pulling tool of the class described comprising a head, plates having hooks detachably engaging said head, resilient wings extending from the plates, and jaws to engage the work fastened against the head against accidental displacement by said wings.

1,633,454. ELECTROMAGNETIC POWER-TRANSMITTING MEANS. CHESTER B. MILLS, Brooklyn, N. Y., assignor to The Sperry Gyroscope Company, Brooklyn, N. Y., a Corporation of New York. Filed July 12, 1921. Serial No. 484,045. 9 Claims. (Cl. 172—239.)

1. An electro-magnetic clutch comprising a ring of non-magnetic material of high electrical conductivity connected with a rotatable member, a row of independent spaced magnetic elements carried by said ring, an annular row of independent spaced magnetic elements connected with a second rotatable member and surrounding the first mentioned elements, a second annular row of independent spaced magnetic elements connected with the last-mentioned rotatable member and surrounded by the first-mentioned elements, and means for passing magnetic flux through said rows of elements.

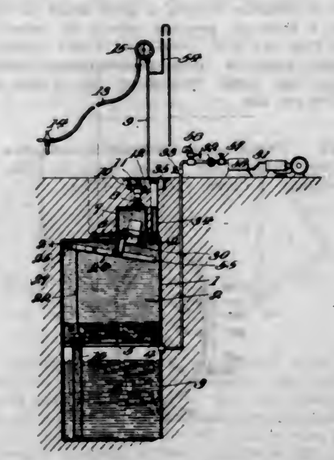
1,633,455. WRENCH. RALPH L. MURPHY, Miera, N. Mex., assignor of one-half to Ira L. Robinson, Miera, N. Mex. Filed Aug. 31, 1926. Serial No. 132,868. 3 Claims. (Cl. 81—99.)

1. A pipe wrench comprising a handle, a rigid jaw in fixed relation to the handle, having reduced portions, the latter provided with beveled ends and beveled shoulders, a removable jaw, bits having reduced shanks to engage the reduced portions of the rigid jaw, and having beveled ends and shoulders complementary to those of

the rigid jaw, and a pivot bolt extending through the rigid and movable jaws for the support of the latter, and also extending through the said bit shanks, and serving to simultaneously pivot the movable jaw and hold the bits of the rigid jaw in place.

1,633,456. FIGURE TOY. HUGO W. NORBERG, Flint, Mich. Filed Dec. 16, 1926. Serial No. 155,204. 2 Claims. (Cl. 46—40.)

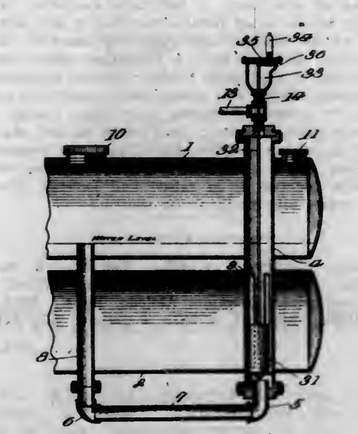
2. A toy comprising an upstanding figure having as a part thereof a stationary arm and a normally locked pivoted arm coacting therewith to provide for holding a ball in an elevated position and capable when released to provide for the dropping of the ball, said figure further having as a part thereof a normally projected pivoted leg to provide for the kicking of the ball when dropped, a spring controlled retaining mechanism within said figure for said pivoted arm and adapted when actuated in one direction to release said pivoted arm, and a spring controlled shifting mechanism carried by said figure for moving said leg from normal position on the release of said arm and for returning said leg to normal position to kick the ball when dropped, said mechanisms having coacting parts to provide for the actuation of the retaining mechanism to release said arm.



1,633,457. SELF-ADJUSTED CAP. HYMAN L. ROSENFELD, Bronx, N. Y. Filed May 29, 1925. Serial No. 33,588. 2 Claims. (Cl. 2—197.)

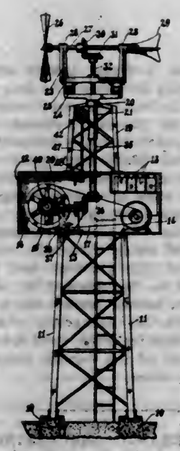
2. In a cap of the class described an elastic band disposed around the head receiving opening thereof positioned adjacent the outer surface of the material comprising said cap, a socket member mounted on the side portion of said cap and secured to the material thereof comprising a plurality of individual sockets having vertical slots therein and provided with open upper ends, and a fastening means on said elastic band comprising a pointed extension depending from its upper end in

position to be inserted through the open upper end of any desired socket and moved vertically downward into said socket, said sockets and fastening extension being located on the side of said cap in position to be manipulated while the latter is being worn for adjusting the size of the head receiving opening of said cap.



1,633,458. GASOLINE-DISPENSING SYSTEM. CLARENCE SCHOCK, Mount Joy, Pa. Filed Mar. 6, 1924. Serial No. 697,386. 9 Claims. (Cl. 221—67.)

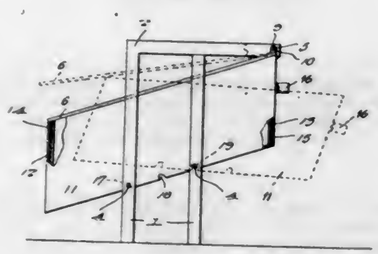
1. A dispensing system for gasoline comprising superimposed tanks in communication, means for supplying gasoline to the upper tank, a fluid heavier than gasoline contained in the lower tank, and means for forcing the heavier fluid into the upper tank to displace the gasoline therefrom comprising a device for supplying air under pressure to the lower tank.



1,633,459. SYSTEM FOR DISPENSING GASOLINE FROM UNDERGROUND STORAGE TANKS. CLARENCE SCHOCK, Mount Joy, Pa. Filed Sept. 4, 1924. Serial No. 735,866. 7 Claims. (Cl. 221—74.)

1. In a dispensing system a gasoline receptacle, a discharge outlet therefor, a water receptacle at a lower level than said gasoline receptacle, a source of air under pressure in communication with said water receptacle, a tubular member connecting the lower portions of said receptacles, a float for controlling the opening in the end of said tubular member which connects with said

water receptacle, the said float being buoyant in the water contained in the system and gravitating in the air in said system when the supply of water has been depleted, to thereby cut off communication between said receptacles.

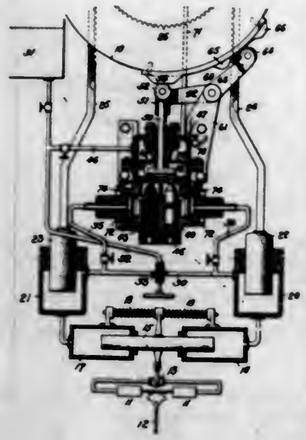


1,633,460. WIND-POWER-GENERATING DEVICE. GIOVANNI SILVESTRIN, Port Arthur, Ontario, Canada, assignor of one-half to Giuseppe Nobile. Filed July 26, 1926. Serial No. 124,845. 3 Claims. (Cl. 170—77.)

1. A wind power generating device comprising a superstructure having an opening in the upper extremity thereof, a subetantially vertical tubular shaft disposed

longitudinally of said super-structure, a sleeve slidably mounted on the upper end of said shaft and slidably mounted in said opening comprising a flange on the upper extremity thereof adapted to engage the edge of said super-structure around said opening for limiting the downward movement of said sleeve, a disc support mounted on said flange, a turn-table supported thereon, an inner tubular shaft slidably mounted in said first mentioned tubular member and rotatively mounted in said disc support and turn-table, a projection rigidly mounted on the side of said inner tubular member disposed in a longitudinal slot in said outer tubular shaft for imparting rotary movement thereto, said inner tubular shaft being extensible relative to said outer tubular shaft for permitting raising and lowering of said disc support and turn-table, and a wind mill rotatively mounted on said turn-table adapted to be raised and lowered therewith and to rotate said inner tubular shaft.

1,633,461. DISPLAY CASE. TED LEONE SOPHER, Abilene, Kans., assignor of one-half to William Johnson and Albert Johnson, Abilene, Kans. Filed Mar. 19, 1926. Serial No. 95,981. 4 Claims. (Cl. 211—6.)



1. In combination, a frame having spaced side portions and overhanging portions extending from said side portions and also having transverse rods interposed between and carried by the side portions, the said transverse rods spaced apart and the forward rod being arranged in a horizontal plane below that of the rear rod, and further having a transverse rod interposed between and carried by the ends of the overhanging portions, a cover having at one end upstanding apertured lugs loosely receiving the last-named transverse rods, said cover being free to swing vertically, and a body arranged between said side portions and having its top open and arranged to be opposed to said cover, and further having in its bottom portion three spaced notches for cooperation with the transverse rods between the side portions; the rear transverse rod being in a vertical plane spaced in front of the vertical plane of the center of movement of the cover.

1,633,462. CERAMIC INSULATING MATERIAL. HAROLD H. SORTWELL, Trenton, N. J., assignor to The Star Porcelain Company, Trenton, N. J., a Corporation of New Jersey. Filed Feb. 27, 1924. Serial No. 695,576. 1 Claim. (Cl. 106—12.)

Black porcelain insulating material containing 45 parts of black iron ore, 35 parts of red burning clay, 15 parts of potter's flint and 5 parts of feldspar.

1,633,463. TELEMOTOR SYSTEM. ELMER A. SPERRY, Jr., Brooklyn, N. Y., assignor to The Sperry Gyroscope Company, Brooklyn, N. Y., a Corporation of New York. Filed May 16, 1924. Serial No. 713,712. 18 Claims. (Cl. 138—23.)

1. In a telemotor system, a pilot wheel an operating member, a hydraulic pressure system for operating said member from the pilot wheel, and means operable when said pilot wheel is in a predetermined position for equalizing the liquid throughout the system and for separating out air.

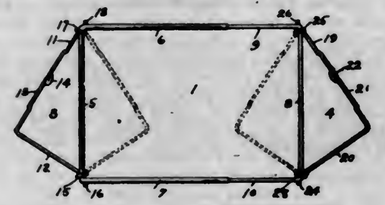
1,633,464. TAILBOARD SCRAPER. GEORGE SWAIN SPREYER, Fallon, Nev. Filed July 6, 1925. Serial No. 41,793. 1 Claim. (Cl. 37—179.)

In a scraper of the character described, a body comprising a back, end members projecting forwardly therefrom and having curved edges, metallic bands covering said edges and terminally secured to said back, a lateral extension projecting from one side edge of each band and having spaced openings therein, a curved shoe supported by said band and having openings arranged at one side of the longitudinal center thereof to register with the openings of said extension, and fastening elements passed through said aligned openings for securing the shoe to the extension.

1,633,465. COMBINED COAL STOKER AND BURNER. JOHN CHRISTIAN ST. CLAIR, Butte, Mont. Filed July 22, 1925. Serial No. 45,367. 4 Claims. (Cl. 110—46.)

1. In a device of the character described, an elongated hollow body having a bottom and formed to produce a fuel supply chamber at one end of the body, a fire box at

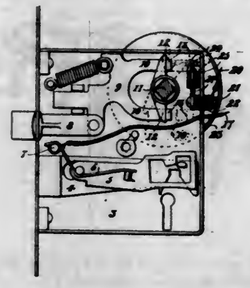
the opposite end of the body and a fuel feeding passage connecting said fuel supply chamber and said fire box, a plunger movable longitudinally in said fuel supply chamber and said fuel feeding passage for feeding fuel from the fuel supply chamber to said fire box, said plunger being



movable through an opening in the outer end wall of said fuel supply chamber and comprising an inverted channel shaped member closed at its inner end and open at its bottom, the inner end wall of said plunger extending at right angles with the longitudinal axis of said plunger.

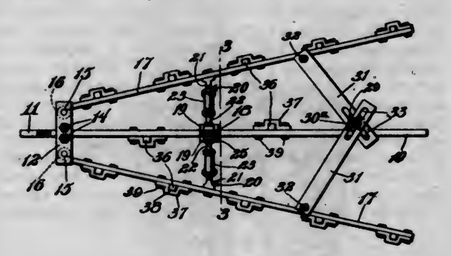
1,633,466. PROCESS OF PREPARING STABLE COLLOIDAL SOLUTIONS OF SILVER. WALTHER TRAXL, Vienna, Austria. Filed Mar. 6, 1924, Serial No. 697,415, and in Germany Mar. 13, 1923. 17 Claims. (Cl. 252—6.)

1. A process of preparing stable colloidal solutions of silver in an oil, by introducing silver compounds capable of forming soaps with fatty substances into the said oil at a temperature between 200 and 300 degrees centigrade, filtering the obtained solution and enriching it with colloidal silver by treating the said solution with a reducing agent, and repeating the addition of silver compounds and the reducing operation, several times.



1,633,467. WINDOW AWNING. WILLIAM ARTHUR WHITEHEAD, Terre Haute, Ind. Filed Nov. 9, 1926. Serial No. 147,319. 5 Claims. (Cl. 156—15.)

1. An awning comprising a rectangular main frame having vertical and horizontal members, and triangular side frames one at each end of the main frame each consisting of an upright member and a horizontal member at right angles thereto, the side frames being hinged to the vertical members of the main frame by coils at the free ends of the upright and horizontal members extending about said vertical members of the main frame.

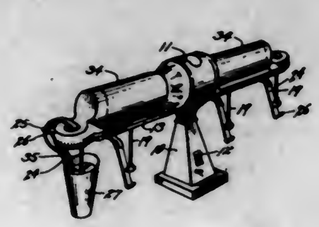


1,633,468. BURGLAR ALARM. JOHN YENDAUCH, Waterloo, Ontario, Canada. Filed Dec. 30, 1922. Serial No. 610,065. 3 Claims. (Cl. 200—55.)

1. In a burglar alarm electric circuit closer, the combination with the encased lock mechanism of a door having an electric wire grounded thereto, of a pin inclosed in an insulating sleeve clamped between adjacent edges of the lock casing parts at the rear end thereof, a second electric wire connected to the outer end of said pin, a flexible contact arm having one end thereof fixed to the inner end of said pin normally lying parallel with the end wall of the casing and spaced therefrom, and having its free end disposed in the path of movement of a movable part of the lock mechanism, and a buffer insulator fixed to the contact arm intermediate the ends thereof and so positioned with respect to the free contact end of the arm to prevent accidental engagement between the contact arm and casing and permitting

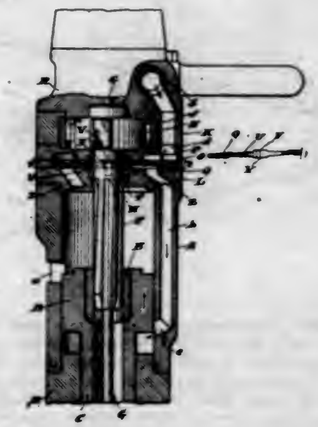
the flexing of the contact arm when engaged by a part of the lock mechanism to move into contact with the lock casing.

1,633,469. MULCHER ATTACHMENT FOR CULTIVATORS. WILLIAM T. ATCHLEY, Delta, Colo. Filed Sept. 17, 1925. Serial No. 56,979. 1 Claim. (Cl. 97—5.)



A mulcher attachment for cultivators comprising a horizontal main bar having a vertically directed forward end, a vertically directed bar rigidly connected with the main bar intermediate its ends, the vertically directed forward end of the main bar and the last named bar being adapted for connection with the beam of a cultivator, a pair of side bars pivoted to the main bar adjacent the forward end of the horizontal section thereof and braces for adjustably positioning the side bars with relation to the main bar extending between the side bars and the vertically directed bar, said braces each comprising two sections and a turn-buckle connecting the sections, one section engaging the associated side bar and being secured thereto, the other section having at its free end an angular portion confronting the vertically directed bar and provided with a longitudinally extending slot.

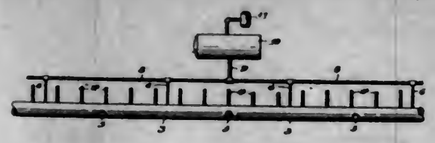
1,633,470. DRINK MIXER. CHARLES M. BALL, Jr., Denver, Colo. Filed Oct. 9, 1926. Serial No. 140,482. 4 Claims. (Cl. 259—131.)



1. A drink mixer comprising a support; a motor carried by said support; a motor shaft extending entirely through said motor and projecting from each side thereof; transmission elements carried by said motor shaft at each side of said motor; a plurality of mixing stems arranged each side of said motor and adapted to be driven from said transmission elements; means for in-

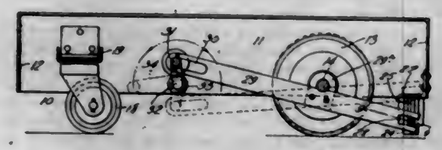
dependently connecting and disconnecting said mixing stems with said transmission elements, said means comprising a friction face carried by each of said stems;

and a cup support adapted to cause said friction face to engage said transmission element when a weight has been placed upon said cup support.



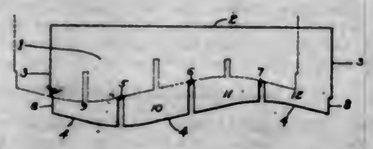
1,633,471. DISK VALVE FOR ROCK DRILLS. LEWIS C. BAYLES and FRED M. SLATER, Easton, Pa., assignors to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed May 27, 1925. Serial No. 33,118. 3 Claims. (Cl. 121—22.)

1. A fluid actuated rock drill comprising a cylinder and reciprocating piston, automatic rotation means for the drill steel including a rifle bar, a head block having a valve seat portion, a valve box at the rear of the cylinder having a shallow recess forming a valve chamber, said valve box being provided with an annular flange forming a valve stop, and a fluid distributing plate valve in said shallow recess in the form of a thin flat oscillating plate encircling the rifle bar, the valve being uniformly tapered from its median diameter towards the periphery at each side and bearing on the seat portion of the head piece along said diameter to form a fulcrum.



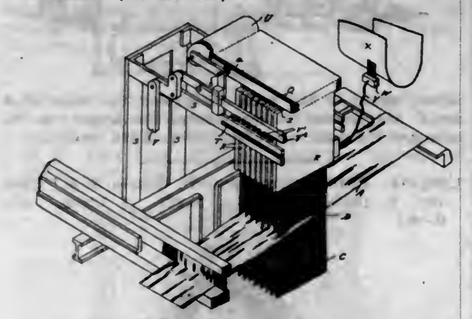
1,633,472. APPARATUS FOR REMOVING AIR FROM STEAM-CONDENSING SYSTEMS. ARTHUR E. BROUGHTON, Minneapolis, Minn. Filed July 10, 1924. Serial No. 725,316. 6 Claims. (Cl. 257—24.)

1. In mechanism for removing air from steam condensing systems, the combination with a receptacle adapted to be supplied with steam, of means for permitting withdrawal of air from said receptacle substan-



tially continuously, a receiver adapted to collect the air so removed and means for periodically allowing the escape of air from said receiver.

1,633,473. GUIDING OR CONTROLLING MECHANISM FOR TRUCKS OR THE LIKE. ELLIS CLYDE BUSH, Jamestown, N. Y., assignor to Art Metal Construction Company, Jamestown, N. Y. Filed Dec. 19, 1924. Serial No. 757,052. 4 Claims. (Cl. 280—44.)

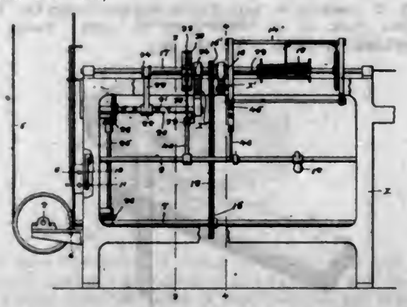


1. In a truck, the combination of a frame, a pair of carrying wheels rotatable in planes extending longitudinally thereof, a caster swivelled on said frame and cooperating with said wheels to support and steer the truck, a pair of auxiliary wheels arranged at right angles to said carrying wheels, a pair of levers pivoted on said frame and on each of which one of said auxiliary wheels is journalled, a single operating lever pivoted on said frame and connected to said pair of levers, and means for swinging said operating lever on its pivot to rock said other levers, whereby said auxiliary wheels are lowered and said carrying wheels are raised to permit said truck to be supported by and be moved sidewise of said frame on said auxiliary wheels and casters.

1,633,474. STRIP SHINGLE. LEON BUSHA, Minneapolis, Minn., assignor to William Edwin Nelson, Minneapolis, Minn. Filed Feb. 11, 1924. Serial No. 692,158. 4 Claims. (Cl. 108—8.)

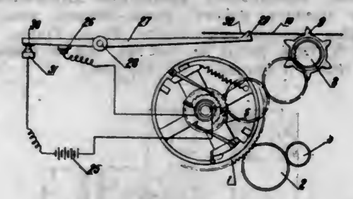
1. A strip shingle comprising a body portion having a straight upper edge and a sinuous lower edge to produce crests and valleys when a plurality of shingles are laid on a roof, the sinuous lower edge being so cut that when shingles are formed from a sheet of material, the sinuous projections of all such shingles will be the same, whereby shingles may be cut from a rectangular sheet of material without waste, and when a series of said shingles are laid in overlapping relation with the crests of the sinuous edges slightly displaced, a waving or ridge and valley appearance will be given to the shingled surface.

1,633,475. PATTERN-CONTROLLED SHEDDING MECHANISM. THOMAS ALBERT BRIGGS CARVER, London, England. Filed July 10, 1923, Serial No. 650,712, and in Great Britain Sept. 8, 1922. Renewed Apr. 21, 1927. 9 Claims. (Cl. 139—62.)



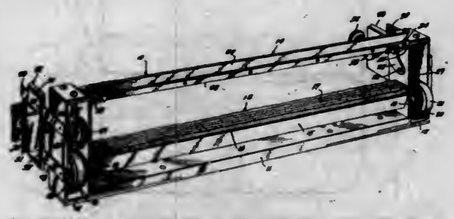
1. In apparatus for the weaving of damask and the like, lifting actions controlling each separate thread and grouped in separate laterally adjustable self-contained rows, selecting elements in said lifting actions, and means for operating electrically said selecting elements to effect the selection between pattern and ground.

1,633,476. SUPPORT FOR SEATS AND THE LIKE. L'Union Generale d'Electricite, Paris, France. Filed Mar. 19, 1925, Serial No. 16,813, and in Great Britain Mar. 21, 1924. 2 Claims. (Cl. 155—119.)



1. In supports for detachable seating surfaces of the type comprising upper and lower supporting rails to which the seating surfaces are attached, a support for one rail to fixedly connect the said rail at an elevated point, a main support such as a floor having slots, hinged arms for the other rail independent of and disconnected from the support for the first mentioned rail, said hinged arms extending through said slots and battens fixed beneath the main support and at each side of the slots and carrying the pivots of the hinged arms.

1,633,477. STOP AND BRAKE FOR TWINE MACHINES. JAMES B. CRAWFORD, Bismarck, N. Dak. Filed Oct. 27, 1926. Serial No. 144,591. 2 Claims. (Cl. 117—51.)

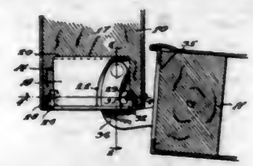


1. In a twine forming machine of the class described, a brake for the flier thereof, shipper means for the belt thereof, means operable by the stoppage of the bobbin thereof for applying the brake and causing the shipper to shift the belt to the loose pulley, said means comprising a pulley on the bobbin shaft, a brake band engaging the pulley and adapted to be lifted by the rotary movement of the pulley, spring means for resisting the lifting movement, a weighted shaft for operating the brake and the shipper and means for holding the said shaft with its weight in raised position as long as the band is in raised position.

1,633,478. DEVICE FOR REGULATING THE ADVANCE OF A BAND WITH REFERENCE TO A CINEMATOGRAPHIC APPARATUS CONTROLLING SAID BAND. CHARLES EUGÈNE EDOUARD DELACOMMUNE, Paris, France. Filed Mar. 23, 1925, Serial No. 17,736, and in France Mar. 26, 1924. Renewed May 17, 1927. 3 Claims. (Cl. 88—16.2.)

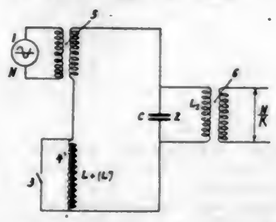
1. A device for shifting the movement of a band controlled by a cinematographic apparatus with reference to said apparatus comprising a driving wheel actuated by cinematographic apparatus, a shaft to which said driving wheel is secured, a driven wheel actuating the band, and mounted loose on said shaft, an electric circuit, an electromagnet in said circuit mounted loose on said shaft, means controlled by the band for closing electric circuit, means whereby the driven wheel is secured to the driving wheel when the electromagnet is not excited, a projection on the driving wheel towards which the electromagnet is caused to move when it is excited, means whereby the electromagnet is secured to the driven wheel when it moves with reference to said projection and means for keeping the electromagnet in its original position with reference to the driving wheel when it is not excited.

1,633,479. WINDOW-CLEANING DEVICE. STEVE DI ROSA, Brooklyn, N. Y. Filed Dec. 10, 1926. Serial No. 153,941. 7 Claims. (Cl. 15—250.)



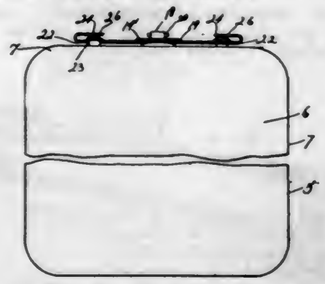
1. In combination with a window casing having a sash slidably mounted therein, of a cleaning device including moistening means, drying means, and means operable by said window sash for alternately causing said moistening means and said drying means to engage the glass pane of said sash upon sliding movement of said sash in opposite directions.

1,633,480. HINGE. MICHAEL J. ECONOMIDES, Brooklyn, N. Y. Filed Sept. 26, 1925. Serial No. 58,795. 4 Claims. (Cl. 16—135.)



1. In a hinge, a hinge member formed of a sheet metal blank having lugs and bent to define a box open at the

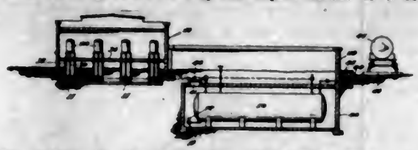
front thereof and provided with top and bottom walls, said lugs being bent into overlapping relation on a side



of the box at the front corner thereof and being secured together for rigidly limiting said walls against spreading movement at the open front of the box.

1,633,481. FREQUENCY REDUCING ARRANGEMENT. JEAN GUSTAVE FALLOU, Paris, France, assignor to L'Union Generale d'Electricite, Paris, France. Filed Nov. 8, 1926, Serial No. 147,143, and in France Jan. 19, 1926. 5 Claims. (Cl. 250—36.)

1. Frequency reducing arrangement comprising a circuit adapted to oscillate freely at a fundamental frequency and at the harmonics thereof, a supply of alternating current the frequency of which is equal to that of one of these harmonics, and adapted to keep up the said harmonic, means for starting the free oscillations of the circuit and its harmonics and means for selecting the desired oscillations.



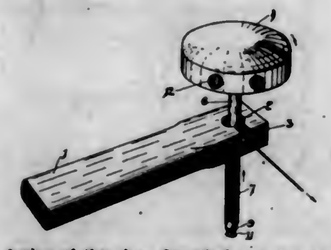
1,633,482. SANITARY HEATING PACK. PERCE R. GALT, Philadelphia, Pa. Filed Feb. 3, 1926. Serial No. 85,717. 7 Claims. (Cl. 150—8.)

1. A sanitary heating pack including a casing provided with an opening communicating with the interior, a closure seat surrounding said opening, a closure for coaction with said seat and including a convex head, a latch rotatably mounted on the convex head of said closure, and means carried by the casing for coaction with the latch to hold the closure within its seat.

1,633,483. GASOLINE-DISPENSING SYSTEM. OTA T. GRAHAM, Richmond, Va. Filed Nov. 18, 1924. Serial No. 750,699. 18 Claims. (Cl. 137—78.)

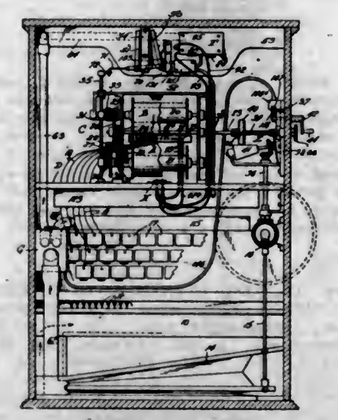
1. A chain station dispensing system for cities or the like including a reservoir, a supply main extending from the reservoir into the city, branches leading from the main, dispensing devices connected with the respective branches and operable to dispense liquid direct to a consumer, means in the main for closing the same at a break, and means for maintaining the supply in the main and the branches at both sides of the break.

1,633,484. BUOY. OTTO GUIDOTTI, Buffalo, N. Y. Filed Dec. 9, 1925. Serial No. 74,227. 1 Claim. (Cl. 9—8.)



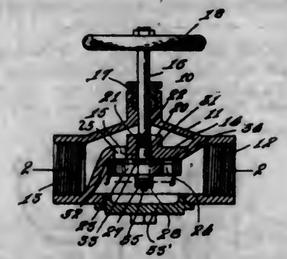
A buoy comprising a spherical body having an inner shell and an outer shell, said inner shell consisting of semi-sperical rubber sections, the joint between which is sealed, and said outer shell consisting of semi-spherical metal sections, the joint between which is sealed, bushings extending through diametrically opposite parts of the inner and outer shells of said body and each having an internal screw thread and inner and outer flanges bearing respectively against the inner side of the inner shell and the outer side of the outer shell, and a tie rod extending diametrically through said body and bushings and having externally threaded parts engaging the threads of the bushings and having its ends projecting beyond the outer side of the body to form pins for receiving a stay line.

1,633,485. PROCESS OF PURIFYING ALKALI-METAL CYANIDE SOLUTIONS CONTAINING SULPHIDES. KURT HERRDEGEN, Ludwigshafen-on-the-Rhine, Germany, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany, a Corporation of Germany. Filed Nov. 27, 1926, Serial No. 151,263, and in Germany Dec. 4, 1925. 1 Claim. (Cl. 23—84.)



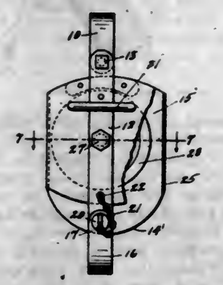
The process of purifying alkali metal cyanide solutions containing sulphides which consists in treating the solution with a bismouth compound capable of forming bismuth sulphide.

1,633,486. SPINNING TOY. FRANZ LUNZ, New York, N. Y., assignor to Aero Toy & Manufacturing Co., Inc., New York, N. Y. Filed Jan. 26, 1927. Serial No. 163,692. 1 Claim. (Cl. 46—32.)



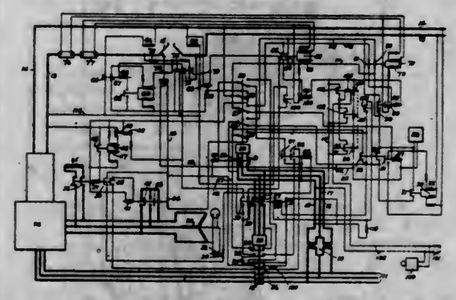
In a device of the class described, an elongated handle having a perforation therethrough at one end thereof and an open slot extending from the perforation to the edge of said handle, a spinning device comprising a body and an elongated stem, a cord wound around the stem, said stem with cord adapted to pass perpendicularly to the handle and through said perforation, the end of said cord adapted to drop into said slot, said slot then being covered by said body, said stem having the lower end pointed, and a removable cartridge cap fitting frictionally over said pointed stem end.

1,633,487. AUTOMATIC MUSICAL INSTRUMENT. CHRISTIAN MAERTEN, Jr., North Tonawanda, N. Y., assignor to Artizan Factories, Inc., North Tonawanda, N. Y. Filed June 16, 1924. Serial No. 720,266. 19 Claims. (Cl. 84—24.)



1. In an automatic musical instrument, the combination of a plurality of speaking devices, individual pneumatic controlling means for each of said devices including a primary pneumatic, a source of compressed air for operating said speaking devices and said pneumatics, a tracker, a perforated note sheet, and a winding roll for moving said note sheet over said tracker, said primary pneumatics being adapted to be automatically actuated for sounding said speaking devices by the relief of the compressed air from said pneumatics outwardly through said tracker and said note sheet directly to the atmosphere, said speaking devices and primary pneumatics being remote from said tracker and note sheet.

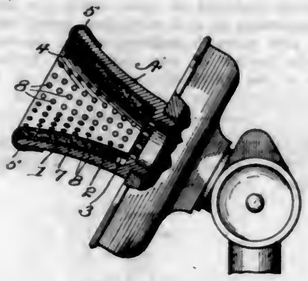
1,633,488. VALVE. PATRICK J. MCGINN, New York, N. Y. Filed Sept. 20, 1926. Serial No. 136,647. 1 Claim. (Cl. 251—84.)



A valve comprising a casing having an inlet and an outlet, a partition therebetween and having a port therein, a valve stem journalled in said partition and extending beyond said casing, co-acting screw threads between said partition and said valve stem causing longitudinal movement of the latter upon turning movement of the same, a valve disk fixedly mounted on said valve stem beneath said partition and having a port therein for register with said first port when said valve stem has been turned to an "on" position but out of register therewith when in an "off" position, a compressible washer carried by said stem and interposed between said partition and said valve disk for turning movement with said stem to seal the joint between said partition and said disk at all times during the limits of the turning movemens of said valve stem, said washer having a slot therein in alignment with the port in said valve disk, and an arm carried by the lower end of said valve stem for co-action with a stop member provided on said casing for limiting the turning movement of said valve stem to an "on" position to cause said ports to register, and a removable screw cap in the bottom of said casing for facilitating the assembly of the valve disk and washer on said valve stem.

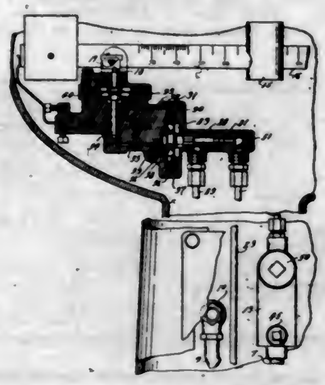
1,633,489. SAFETY BLOCK. WILLIAM H. MCKISSICK, Tulsa, Okla. Filed Nov. 6, 1925. Serial No. 67,227. 11 Claims. (Cl. 254—193.)

1. In a safety block, a block housing comprising two members pivoted to each other eccentrically, one of said members being rotatable with relation to the other to open the sides of the housing, and a sheave mounted in the housing.



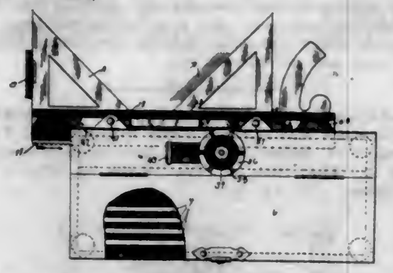
1,633,490. SWITCHING ARRANGEMENT FOR ELECTRIC SUBSTATIONS. RICHARD CALDWELL MINTON, East Boldon, England, assignor to A. Reyrolle & Company Limited, Hebburn-on-Tyne, England, a British Company. Filed Sept. 8, 1924, Serial No. 736,630, and in Great Britain Nov. 3, 1923. 24 Claims. (Cl. 171—118.)

1. An automatic or semi-automatic electric substation, including in combination a load circuit, a generator adapted when running to supply power to the load circuit, an electric motor driving the generator, a power supply circuit for the motor, a starting-up relay controlled in accordance with the conditions of the load circuit, and a time-element contact-making device adapted to be brought into operation by the starting-up relay and having a plurality of contacts which are operated at predetermined



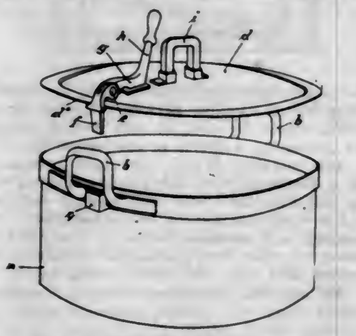
time intervals and are so arranged as to initiate operations for starting up the motor-driven generator only after the necessary conditions in the load circuit have persisted for a predetermined time and also to allow a plurality of consecutive attempts to be made to start up the generator.

1,633,491. MOUTHPIECE ATTACHMENT FOR TELEPHONES. CHARLES HARRY MONKS, Ridgewood, N. J. Filed Oct. 2, 1926. Serial No. 139,133. 1 Claim. (Cl. 179—185.)



An attachment for mouth pieces comprising an outer shell of substantially conical formation, an inwardly right angled disposed flange formed on the inner end of said outer shell, an annular flange formed on the inner edge of the flange first mentioned, an inner shell having its inner end frictionally engaging the annular flange and being spaced from the walls of the outer shell, said inner shell being provided with a plurality of apertures arranged in row formation, ears integrally formed on the outer end of said inner shell and arranged in spaced parallelism therewith for clamping the attachment to a mouth piece and antiseptic material disposed between the shells for the purpose specified.

1,633,492. PNEUMATIC-TIRE-CHARGING EQUIPMENT. EARL M. MORLEY, Delta, Ohio, assignor to The Air-Scale Company, Toledo, Ohio, a Corporation of Ohio. Filed Mar. 6, 1926. Serial No. 92,790. 6 Claims. (Cl. 221—73.5.)



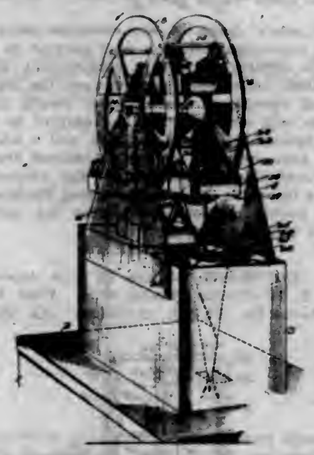
1. A pneumatic tire air charger comprising a compressed gas supply, a line therefrom, a delivery valve for supplying air from the line to a pneumatic tire, and means in said line for removal of non-gaseous material, said means embodying a condensation receiver, a blow-off therefrom, and an entrained particle remover including a filter providing an impediment to gas flow for slowing up valve operation to reduce tendency to hammer.

1,633,493. SET-SHIFT PARALLEL RULER. ALEXANDER MORRIS and VICTORIA L. MORRIS, San Francisco, Calif. Filed Feb. 12, 1926. Serial No. 87,887. 4 Claims. (Cl. 33—110.)

1. A device of the character described comprising means forming a supporting surface, a rack bar slidably mounted on said surface, means supporting said bar comprising an elongated member angular in cross-section secured to and movable therewith, means mounted on said first-named means for moving said rack bar in successive steps, a plate on said second-named means and adapted to be moved by the actuation of said rack bar, and means for frictionally securing a drawing instrument to said plate.

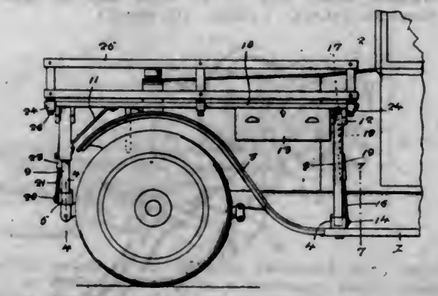
1,633,494. COOKING UTENSIL WITH HINGED AND REMOVABLE LID. EWALD NEUMANN, Brunswick, Germany. Filed July 8, 1926, Serial No. 121,195, and in Germany Feb. 18, 1925. 3 Claims. (Cl. 53—8.)

2. A cooking utensil including in combination, a vessel, a lid, a closed socket on the vessel adjacent the upper edge thereof, a plug pivotally connected to the lid and adapted to be removably arranged concentrically within and in frictional engagement with the walls of the socket.



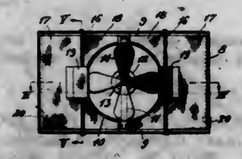
1,633,495. COAT HOOK. JOHN B. O'CONNOR, Aurora, Ill., assignor to Lyon Metallic Manufacturing Company, Aurora, Ill., a Corporation of Illinois. Filed May 21, 1924. Serial No. 714,765. 4 Claims. (Cl. 248—22.)

1. The combination with a relatively thin wall, of a hook having a base with a projection, on one side of the wall, a backing having a recess opposite said projection



on the other side of the wall, and means extending thru the wall to draw the hook and backing toward each other, the wall being distorted by said projection into the recess.

1,633,496. TOY. CARRIE ELIZABETH RICHARDSON, Simpsonville, S. C. Filed July 29, 1925. Serial No. 46,855. 6 Claims. (Cl. 46—37.)



1. A toy comprising a rotary wheel, a gravity motor for operating said wheel, said gravity motor including a vertically movable weight connected with said wheel, and means for regulating the downward movement of said weight, said regulating means comprising a receptacle in which said weight may move vertically, said receptacle having a discharge orifice at its lower end, and means movably supporting said weight within the receptacle and adapted to pass gradually from the receptacle through said discharge orifice, thus permitting downward movement of the weight in said receptacle, said receptacle being substantially cone-shaped.

1,633,497. LUGGAGE CARRIER. FERDINAND H. SCHOELERMAN, Keystone, Iowa. Filed Nov. 22, 1926. Serial No. 150,010. 1 Claim. (Cl. 224—29.)

The combination with the front portion of an automobile, of channel members secured on the running board adjacent to the front mud guards of the automobile, a hollow member fixedly supported to and extending beyond the front of the automobile, said channel and hollow members designed to receive therein the legs on tables which are arranged over the front mud guards, removable and adjustable means securing the tables on the said members, blocks secured in the said members and contacting with the confronting sides of the table legs, and a hinged cover for the top of the hollow member swingable between and contactable with the outer legs of the respective tables, in combination with a removable luggage carrier for the tables.

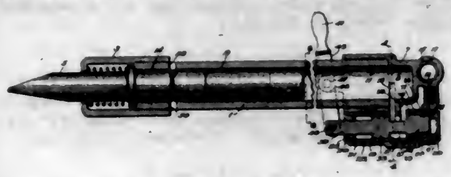
1,633,498. TEMPERATURE-CONTROLLING APPLIANCE. KURT L. SEELBACH, Cleveland, Ohio, assignor to James C. Miles, Cleveland, Ohio. Filed Apr. 21, 1921. Serial No. 463,298. 14 Claims. (Cl. 98—39.)

1. The combination of a temperature controlling compartment provided with a pair of air inlets and an air outlet, a door for one inlet and adapted by the action of gravity to assume an open position, said door carrying a vane, and means for propelling an air current through the other inlet and against said vane whereby to close said door.

1,633,499. POULTRY-TRUSSING DEVICE. JAMES M. SELDEN, Pittsburgh, Pa. Filed Mar. 6, 1925. Serial No. 13,539. 9 Claims. (Cl. 17—1.)

1. A device for trussing poultry, comprising a shank and a holding hook extending laterally from one side of the shank and with its free end projecting in the opposite direction and located beyond the opposite side of said shank.

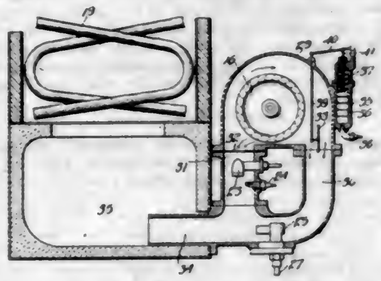
1,633,500. PUNCTURE-SEALING COMPOSITION FOR PNEUMATIC TIRES. ENRICO SERCHI, Siena, Italy, assignor to Isidore Braggiotti, Brookline, Mass. Filed Apr. 16, 1924, Serial No. 706,996, and in Italy May 2, 1923. 3 Claims. (Cl. 134—17.5.)



3. A composition for sealing punctures in pneumatic tires and the like having approximately the following composition:

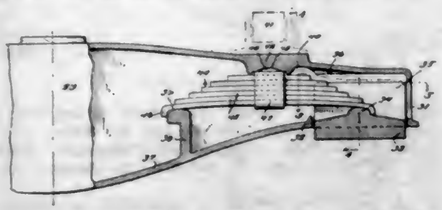
	Parts by weight.
Talcum powder	20
Glycerine	10
Dextrine	15
Water	45
Coloring	.00025

1,633,501. IMPACT TOOL. ERNEST H. SHAFF, Grand Haven, Mich., assignor to William H. Keller, Inc., Grand Haven, Mich., a Corporation of Michigan. Filed Oct. 10, 1922. Serial No. 593,577. 21 Claims. (Cl. 121—21.)



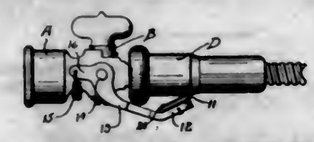
1. An impact tool having, in combination, a cylinder, a hammer piston, a tool for actuation by said hammer piston, means forming an ejector, a source of pressure fluid supply, piston actuating means including a coordinated controlling valve mechanism and means forming ports and passages controlled by said valve mechanism, said valve mechanism operative for effecting by said ports and passages alternate admission of pressure fluid from said source to an end of said cylinder and admission of

pressure fluid from said source to said ejector with connection of the latter to said end of said cylinder, said valve mechanism also operative to effect by said



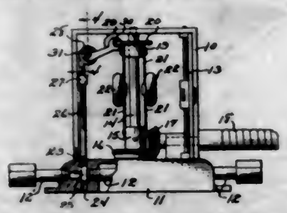
ports and passages exhaust of said pressure fluid admitted to said cylinder by passages independent of said ejector.

1,633,502. CONTROL SYSTEM FOR LIQUID-FUEL BURNERS. ALLEN C. STALEY, La Fayette, Ind. Filed Dec. 7, 1921. Serial No. 520,630. 4 Claims. (Cl. 158—28.)



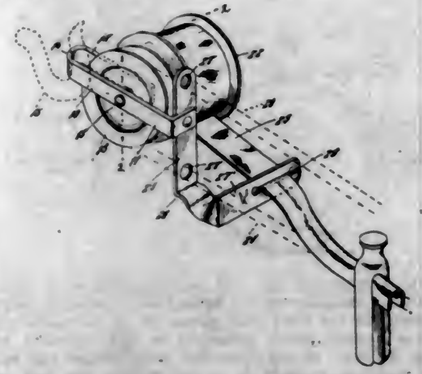
1. A control system for liquid fuel vapor pressure generators comprising a primary fuel nozzle, a secondary aspirator fuel nozzle, a pump for supplying fuel under pressure to the primary nozzle, a float controlled chamber for controlling the supply of fuel to the secondary nozzle, means for supplying air to both nozzles, means for diminishing the air supply to the aspirator nozzle as the vapor pressure increases beyond a predetermined point, and an auxiliary prime mover operated by the vapor, said auxiliary prime mover being arranged to operate the fuel pump and air supplying means at times when the secondary nozzle is inoperative, substantially as set forth.

1,633,503. TRUCK BOLSTER WITH ABSORPTION MECHANISM. THOMAS H. SYMINGTON and PERCY R. DRENNING, Baltimore, Md., assignors, by mesne assignments, to T. H. Symington and Son, Inc., Baltimore, Md., a Corporation of Maryland. Filed Oct. 7, 1926. Serial No. 140,185. 8 Claims. (Cl. 105—197.)



1. A truck bolster provided at the bottom of each end with an opening, a follower mounted for vertical movement within each opening and adapted to seat upon bolster supporting springs located within a side frame, and a bank of elongated plate springs located within each end of the bolster and engaging the follower to constitute cushioning means acting in series with the truck springs, said plate springs extending longitudinally of the bolster.

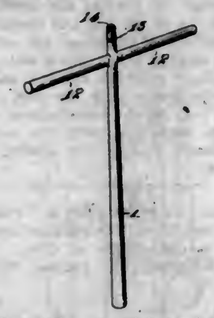
1,633,504. SAFETY GAS DEVICE OR COCK. ROBERT L. UHL, Chino, Calif. Filed Apr. 3, 1926. Serial No. 99,682. 2 Claims. (Cl. 284—13.)



1. In a safety device of the character described, a gas outlet connection having a nose adapted to have a rubber tube engaged thereon, a substantially U-shaped arm structure straddlingly engaged upon the connection and pivoted thereto, a valve member loosely pivotally mounted on said arm structure and adapted to fit conformingly against the end of the nose, and a coil spring having its ends connected with said U-shaped arm structure and extending transversely of the connection in engagement therewith for normally urging the arm structure into certain position as to bring the valve into engagement with the nose.

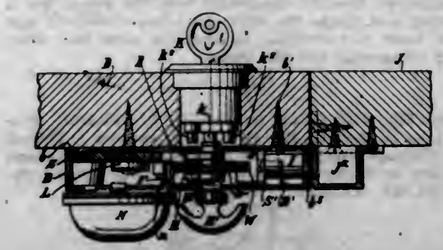
1,633,505. GOVERNOR. JAMES H. VAN AUSDAL and JOSEPH T. BLACKBURN, Vinita, Okla. Filed July 21, 1926. Serial No. 123,999. 2 Claims. (Cl. 264—15.)

1. In an automatic speed control device for a vehicle having a fuel supply pipe, a valve operating in said pipe, a governor driven from the vehicle, an arm connecting the valve and governor, whereby the valve is automatically closed when the vehicle reaches a predetermined speed, said arm being capable of pivotal movement on the valve, for adjusting the governor, whereby the speed at which the valve is automatically closed can be regulated, and means for holding the valve and said arm fixed relatively for use.



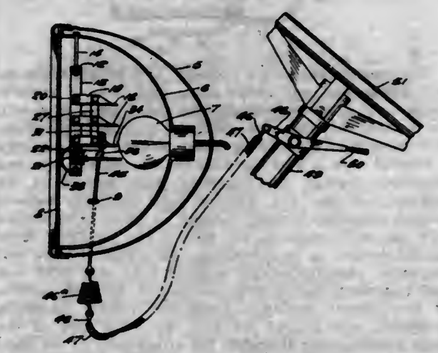
1,633,506. CLOTHESLINE PULLEY. AUGUSTIN J. WHELAN, Jersey City, N. J. Filed May 26, 1926. Serial No. 111,814. 1 Claim. (Cl. 68—3.)

A device of the class described comprising a bracket formed of a single piece of material bent upon itself to provide a pair of spaced parallel arms, a shaft jour-



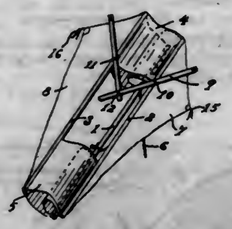
nalled in said arms and having a squared portion extending outwardly beyond one of said arms, a pulley wheel fixedly mounted on said shaft and interposed between said arms, and a reel having a square bore for the reception of the squared portion on said shaft, said reel adapted to contain a length of tape for covering a clothes line which is adapted to pass about said pulley wheel, and a tape and clothes line guide carried by one of said arms and extending forward of said pulley wheel and said reel.

1,633,507. HAIR WRAPPER. NENA M. ADAMS, Chicago, Ill. Filed May 7, 1926. Serial No. 107,477. 1 Claim. (Cl. 132—33.)



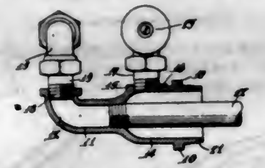
A hair waving device comprising a longitudinal tapering shank which is round in cross section, oppositely disposed arms extending therefrom adjacent the narrow end thereof, a kerf provided in the narrow end of said shank, and an annular groove provided in said shank adjacent the said end, said kerf and groove adapted to receive a piece of cord by which the device is attached to the base of a hank of hair to be waved, whereby the hank of hair may be twisted over and under said arms to produce a wave therein, while the free end of the hair is adapted to be wound about said shank to produce a curl therein.

1,633,508. CLOSURE LOCK. JOHN BARON, Long Island City, N. Y., assignor, by mesne assignments, to Louis Laxer and Charles Young, New York, N. Y. Original application filed June 24, 1925, Serial No. 39,202. Divided and this application filed Mar. 2, 1926. Serial No. 91,696. 2 Claims. (Cl. 116—8.)



1. In locking means of the character designated, the combination of a slidable bolt plate, a stationary ward plate, a spring latch mounted on said slidable bolt plate and adapted to engage with the wards of said stationary ward plate, latch key lock means adapted to actuate said spring latch and slidable bolt plate, jamb bolt means mounted for actuation by said slidable bolt plate, an alarm sounding device mounted on said slidable bolt plate, means for normally holding said alarm sounding device inactive, said alarm sounding device including an actuating member normally disposed out of the path of movement of said spring latch but disposed in the path of the same upon movement of said jamb bolt means to locked position for engagement by said spring latch upon movement of said jamb bolt means to a retracted position other than by said key lock means for releasing said last means for permitting said alarm to sound.

1,633,509. HEADLIGHT-DEFLECTING ATTACHMENT. RUFUS L. ANDERSON, Orlando, Fla. Filed Nov. 9, 1926. Serial No. 68,020. 7 Claims. (Cl. 240—45.2.)

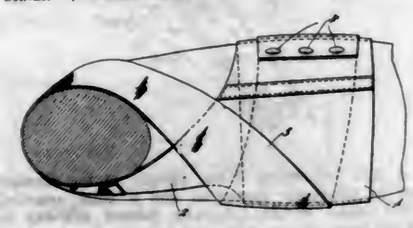


1. The combination with a headlight provided with the usual casing having a reflector and light source therein, of a plurality of sheet metal shutters pivotally mounted in advance of the light source within the reflector, the shutters being normally disposed in open horizontal, parallel planes and operatively arranged in upper and lower groups respectively embodying a plurality of shutters and a single shutter, the shutters of the upper group having edge-overlapping engagement when closed and the lower shutter fitting close to the lowermost of the upper group of shutters, and means connected to the shutters for simultaneously moving the shutters of the upper group upwardly and the remaining lowermost shutter downwardly.

1,633,510. KITE. GEORGE W. AYLING, Springfield, Ill. Filed Oct. 30, 1925. Serial No. 65,756. 2 Claims. (Cl. 244—22.)

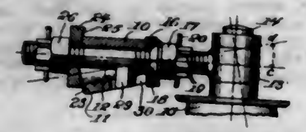
1. A kite comprising three upright frame members spaced in triangular formation and a right angularly disposed frame member pivotally jointed mid-way between its ends and pivotally secured to each of the two adjacent upright frame members above their centers; a pair of main plane members secured to and encompassing said frame members near their respective ends thereof and a pair of wing members detachably secured to corresponding ends of said brace member by means of a loop on the wing members held within a slot in the ends of said brace member; said wing members secured to said adjacent frame members throughout their length whereby the kite may be quickly assembled for use or quickly dismounted, folded and ready to be carried conveniently.

1,633,511. COMBINATION RADIATOR CONNECTION. RAYMOND J. BALDWIN, Wissinoming, Pa. Filed Dec. 19, 1925. Serial No. 76,555. 1 Claim. (Cl. 137—75.)



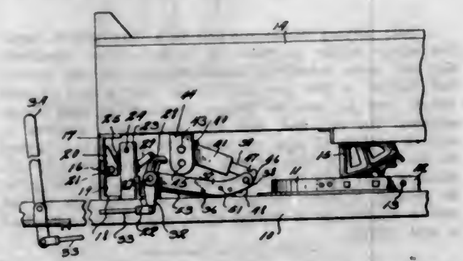
The combination with a radiator, of a connecting member having inlet and outlet pipes, said member comprising a body with substantially one-half thereof of a relatively large diameter, the remaining portion being gradually reduced to a relatively small member provided with a reduced bore, a pipe threaded in the reduced bore and extending through the relatively large portion of the member and into the radiator, said relatively reduced portion extending laterally causing an elbow to be formed with an outlet opening, the wall of the relatively large portion having an inlet opening, and a control valve and an outlet pipe threadingly connected in said inlet and outlet openings respectively, one end of the large portion of the member having a gland nut formed integrally therewith, and beyond the nut, the outer face of the large portion being threaded, for attachment to the radiator.

1,633,512. SNUBBER HOOK AND QUICK-FASTENER LINK. DONALD M. BATESON, Marshalltown, Iowa. Filed Jan. 21, 1926. Serial No. 82,743. 6 Claims. (Cl. 267—72.)



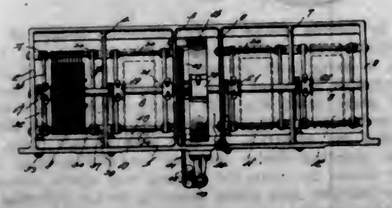
1. In a device of the class described, a pair of members comprising wire elements bent double, each having a loop at one end slidably receiving the other, and having a hook at its other end, a coil spring on said members between the loops, the spring serving as an adjustable closure for one hook, and a stop washer loosely mounted on one of said members between the other hook and the adjacent loop having at opposite edges, oppositely projecting members.

1,633,513. ARCH SUPPORT. CARL G. BERGMANN, Chicago, Ill. Filed May 31, 1924. Serial No. 717,180. 1 Claim. (Cl. 128—166.)



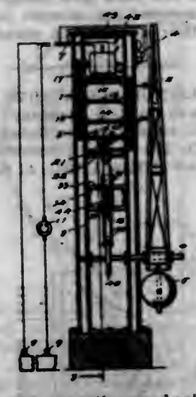
An arch support comprising a flexible loop shaped body adapted to embrace the arch portion of the foot, an extension on the body disposed at an acute angle thereto, an elastic strip having one end secured to the body at the outer end of the extension, and having its other end adapted to be passed around the ankle and arranged in crossed relation with the extension at a point above the instep with its normally free end passed around beneath the arch of the foot and detachably connected to one side of the body.

1,633,514. FAN SUPPORT. SEDGIE KIAH BILBO, Tylertown, Miss. Filed June 19, 1925. Serial No. 38,376. 1 Claim. (Cl. 308—15.)



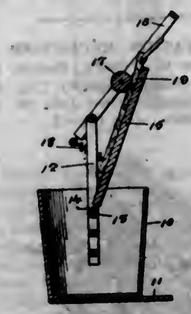
A device of the character described comprising an arm, a bearing carried thereby and provided with a slot, a rod passing through the bearing and having its opposite ends threaded, a lug on the rod and engaged in the slot, means for supporting a pulley at one end of the rod, one end of the bearing being flared and provided with serrations, a locking plate on the rod and also having serrations and engageable with the first mentioned serrations and lock nuts on the opposite ends of the rod and one of which is engageable with the serrated locking member and adapted to lock the bearing in lateral or adjusted position.

1,633,515. SELF-DUMPING TRUCK. PERRY A. BRICK, Galion, Ohio, assignor to The National Grave Vault Co., Galion, Ohio, a Corporation of Ohio. Filed Mar. 4, 1926. Serial No. 92,369. 10 Claims. (Cl. 298—38.)



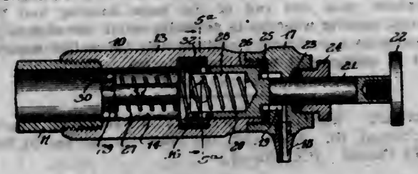
1. In a truck, a chassis, a tiltable body thereon having a keeper, a latch pivotally mounted upon the chassis for swinging movement over and into engagement with the keeper, and having a rounded eccentric lower face engageable with the keeper, a shaft upon which the latch is mounted, having a handle whereby the latch may be withdrawn from its engagement with the keeper, and a spring surrounding the shaft and acting thereon to urge the shaft in a direction to carry the latch into wedging engagement with the keeper.

1,633,516. MULTIPLE VARIABLE CONDENSER. WILLIAM M. BROWER, Palo Alto, Calif., assignor to Federal Telegraph Company, San Francisco, Calif., a Corporation of California. Filed Jan. 17, 1927. Serial No. 161,665. 4 Claims. (Cl. 175—41.5.)



1. A multiple variable condenser comprising a chassis constituted by an integral substantially rectangular housing, a plurality of integral web members disposed in said housing at points spaced along said chassis providing compartments electrostatically isolated one from another, a variable condenser including stator and rotor plates disposed in each of said compartments, said stator plates being insulatingly suspended from the web members of said compartments, a shaft member passing through said chassis and journaled in the walls of said compartments for carrying said sets of rotor plates, whereby said sets of rotor plates may be variably interleaved with said sets of stator plates.

1,633,517. TRAIN-CONTROLLED RAILWAY-CROSSING GATE. AMOS E. BROWN, Damascus, Ark. Filed Aug. 26, 1926. Serial No. 131,737. 3 Claims. (Cl. 246—125.)

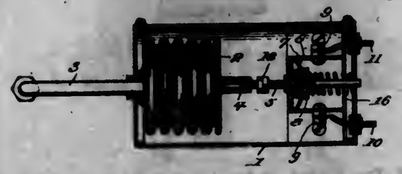


1. A crossing gate operating mechanism, comprising a stand, a shaft journaled therein, a gate secured to said shaft, a disk secured to the shaft, an electric motor supported in the stand and controlled by a train, an internally threaded plunger, a stem on said plunger, a link connecting said stem and disk, a threaded shaft engaging in said plunger, said shaft being geared to said motor to actuate the gate to closed position, and a counterweight to return the gate to open position when the motor is stopped.

1,633,518. MOP WRINGER. FRANK CLAY, St. Louis, Mo., assignor of five-sixths to Joseph Adler and one-sixth to Elmer C. Rodenmeyer, St. Louis, Mo. Filed Oct. 22, 1926. Serial No. 143,461. 3 Claims. (Cl. 15—262.)

1. A mop wringer comprising a receptacle, standards carried upon the inner sides thereof and disposed appreciable distances above the periphery thereof, a transversely disposed shaft carried by the standards, a platform mounted for oscillatory movement upon said shaft, an operating handle pivotally mounted upon the upper extremities of the standards, means for yieldingly connecting the handle with the platform, and a roller member journaled upon the operating handle adapted for frictional engagement with the platform to wring a mop head between the roller and the platform.

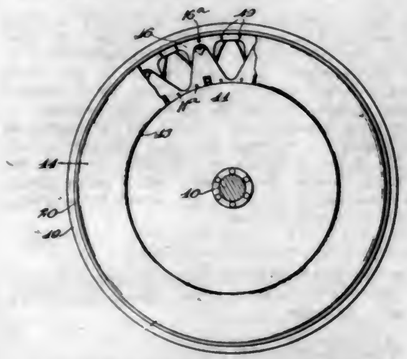
1,633,519. LIQUID-DISPENSING APPARATUS. CLARENCE P. CROWELL, Rochester, N. Y., assignor to Rochester Germicide Company Inc., Rochester, N. Y., a Corporation of New York. Filed Aug. 28, 1925. Serial No. 53,057. 4 Claims. (Cl. 221—102.)



1. A liquid dispensing apparatus comprising a casing having inner and outer spaced valve chambers of equal bore and an intermediate chamber therebetween of greater cross-sectional area than either of said valve chambers, a valve normally closing the outer chamber and being movable through the intermediate chamber to close the inner chamber, said valve being so constructed that subsequent to entering the inner chamber it will permit the latter to remain in communication with the intermediate chamber for a predetermined period during inward movement of the valve, and means for returning said valve to normal position.

1,633,520. ROLLER BOX. HAROLD G. DURNELL, Bartlesville, Okla. Filed June 18, 1926. Serial No. 116,999. 4 Claims. (Cl. 308—7.)

1. A roller box of the class described comprising an elongated box having a slot in its top and a slot in its bottom with the bottom sloping downwardly toward the slot and a roller movably mounted in the box and adapted to support a rod line, said roller being tapered to conform to the sloping bottom.



1,633,521. AUTOMATIC SWITCH. WILLIAM EDWARDS, Rock Springs, Wyo. Filed Feb. 19, 1925. Serial No. 10,395. 1 Claim. (Cl. 200—81.)

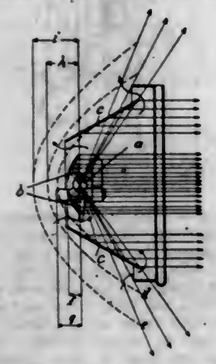
A device of the class described including a housing, an expansible member arranged within the housing and forming a chamber which is adapted to be placed in communication with the oiling system of an internal combustion motor, a switch housing in the main housing in alignment

with an expansible member, a threaded socket on one end of the expansible member, a threaded stem movable through one end of the switch housing and adjustably connected to the socket, nuts adjustable on the stem and disposed between the switch housing and the threaded socket for adjusting the limit of movement of the expansible member, a flexible switch member adjustable on the stem within the switch housing, oppositely disposed contacts carried by the switch housing and arranged upon opposite sides of the switch member and a coil spring mounted upon the stem within the switch housing and disposed upon one end of the main housing and the switch member whereby to normally retain the expansible member in a contractive position and the switch member out of engagement with the contacts.

1,633,522. RESILIENT WHEEL. CHARLES B. EVANS, Chicago, Ill. Filed Oct. 10, 1925. Serial No. 61,789. 11 Claims. (Cl. 152—8.)

1. A resilient wheel comprising a pair of disks having their outer portions offset to define reinforcing shoulders, a pair of annuli confined between the outer portions of said disks and having offsets defining shoulders, dust-excluding covers having beads engaged with said first and second-named shoulders, and springs having connection with said disks and said annuli.

1,633,523. POLISHING WHEEL AND PROCESS FOR TREATING SAME. WILLIAM E. FOSTER, Detroit, Mich. Filed Apr. 9, 1925. Serial No. 21,886. 5 Claims. (Cl. 51—193.)

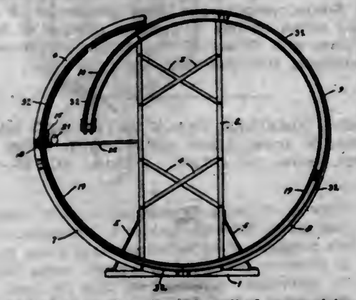


5. The method of forming a polishing wheel from a plurality of superimposed sections consisting in infusing into each of said sections a mixture equally of oil and glue, pressing the surplus oil from each of said sections and gluing the faces of said sections together by affixing thereto an independent layer of glue.

1,633,524. TIRE-CHAIN FASTENER. JAMES ACHILLES GARLAND, Portsmouth, N. H. Filed Nov. 23, 1925. Serial No. 70,937. 3 Claims. (Cl. 24—241.)

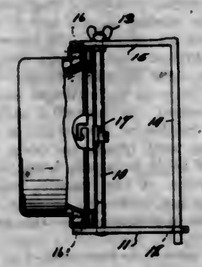
1. In a device of the class described, a plurality of pivotally mounted jaws movable towards each other, means for mounting the jaws, said mounting means including jaw engaging devices constituting flanged elements formed on the mounting means, for retaining the jaws in position to hold the end links of a chain, and a pivotally and resiliently mounted key movable between the jaws and preventing their movement in releasing position.

1,633,525. REFLECTOR FOR QUARTZ LAMPS. FRITZ GIRARD, Hanau-on-the-Main, Germany. Filed Aug. 24, 1921, Serial No. 494,983, and in Germany Feb. 2, 1919. 6 Claims. (Cl. 250—34.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



1. Irradiating device comprising a reflector of refractory material, a quartz lamp near the focus of said refractory reflector and a second reflector, said refractory reflector being arranged to reflect the rearwardly emitted rays, said second reflector the forwards emitted rays of said lamp, said second reflector having a greater focal length than said refractory reflector.

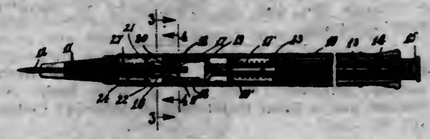
1,633,526. ROTATION MECHANISM FOR ROCK DRILLS. CHARLES C. HANSEN, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed June 26, 1926. Serial No. 118,737. 1 Claim. (Cl. 121—7.)



A rotation mechanism for percussive drills comprising a rifle bar having a ratchet head, a pawl ring surrounding said ratchet head, pawls to engage said ratchet head and supported by said pawl ring, bores and counterbores concentric in said ring, differential piston plungers in said bores and counterbores to actuate said pawls, atmospheric leak ports at the bottom of said bores to relieve fluid pressure under the heads of said piston plungers, and a circumferential groove in said pawl ring in communication with a source of constant pressure.

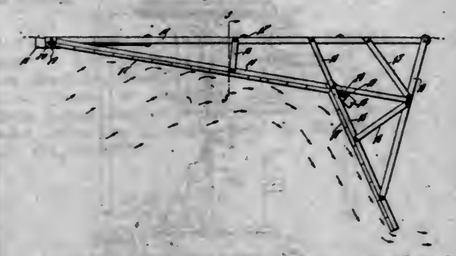
1,633,527. MECHANICAL GOLF INSTRUCTOR AND EXERCISER. JOHN HANSEN, Bettendorf, Iowa, assignor of four twenty-fifths to William H. Martin, ten twenty-fifths to T. S. Cunningham, and one twenty-fifth to Thomas McQuarrie, Davenport, Iowa. Filed Oct. 25, 1926. Serial No. 143,977. 6 Claims. (Cl. 273—35.)

1. A device of the class described, comprising a rail and support therefor, a traveller movable along said rail, and adapted for connection with the head end of a golf club, and mechanism associated with said traveller for giving a gradual rotation to the stick of a golf club connected therewith during the movement of said traveller along the rail, conforming to the usual movement of the stick in making a stroke.



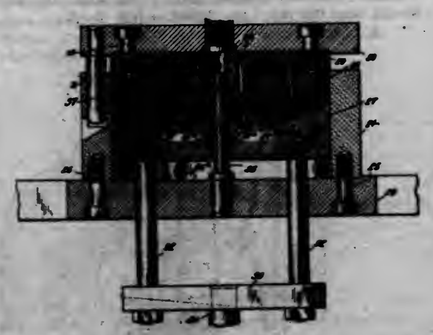
1,633,528. HEADLIGHT-DOOR REMOVER AND REPLACER. JOHN W. HELLER, Arlington, Kans. Filed Mar. 27, 1926. Serial No. 97,934. 4 Claims. (Cl. 81—53.)

1. A device for removing headlight doors comprising two opposed approximately parallel members having longitudinally extending grooves upon their inside confronting faces, a rod connecting said members and having means whereby one of the members may be forced toward the other, and a cross bar pivotally mounted upon the rod midway between said members, the cross bar having one face thereof at its ends disposed in the same plane as the ends of said rod.



1,633,529. MAGAZINE PENCIL. CHARLES C. HOFFMAN, New York, N. Y. Filed Oct. 26, 1925. Serial No. 64,769. 2 Claims. (Cl. 120—17.)

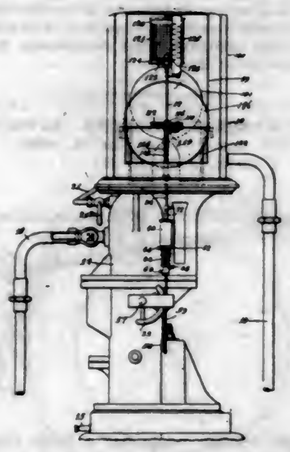
1. A magazine lead pencil comprising an outer casing, a slidable member mounted in said casing, a pair of jaws pivotally mounted on said slidable member, operating mechanism for said jaws comprising an internal cam member, and a handle for said cam member extending outside of said casing, said operating mechanism being



adapted to cause said jaws to grip the lead of said pencil when said handle is turned in a clockwise direction and to release said jaws when said handle is turned in a counterclockwise direction.

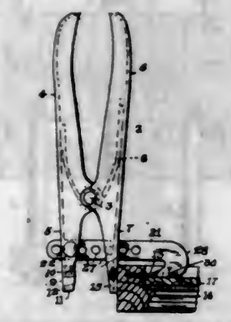
1,633,530. CURRENT RETARDER. LEWIS JORGENSEN, Sioux City, Iowa. Filed Apr. 6, 1925. Serial No. 21,144. 1 Claim. (Cl. 61—3.)

A current retarder comprising a frame adapted to be arranged vertically against the bank of a stream, and including front and rear sections arranged substantially V-shaped in plan, said frame including an additional section projecting forwardly from one end thereof and suitably braced, a wall supported upon the front section and against which the stream of water is adapted to initially strike, a wall supported by said additional section and arranged obliquely to the first mentioned wall, and against which the water is directed from said first mentioned section, and caused to move away from the bank, and means carried by the frame and adapted to be embedded in the ground for supporting the frame in position for use.



1,633,531. SPRAY DISK AND METHOD AND APPARATUS FOR MAKING THE SAME. ANDREW P. KELLER, Tiffin, Ohio. Filed June 28, 1926. Serial No. 118,908. 7 Claims. (Cl. 25—27.)

4. Apparatus for molding a spray disk, said apparatus comprising a mold member adapted to shape the outer face of the disk and molding means including outwardly diverging aperture-molding projections for molding the

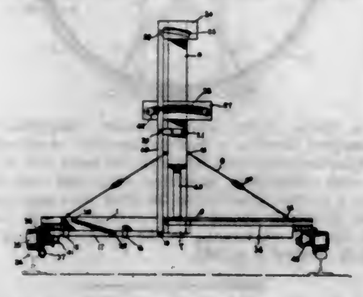


inner face and the apertures of the disk, the said mold member and the said molding means being so constructed and arranged as to permit the said pins to be forced so far through the disk as substantially to make it through-apertured.

1,633,532. LIQUID METER. WALTER GEORGE KENT, London, England. Filed Apr. 2, 1923, Serial No. 629,359, and in Great Britain Apr. 5, 1922. 17 Claims. (Cl. 73—167.)

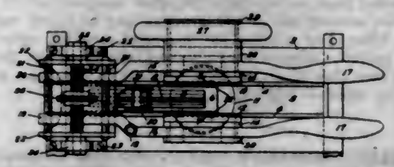
1. In a register for meters of the venturi type, the combination of a modified U-tube for containing the working liquid having means therein actuated by the height of the liquid in one leg thereof, an oscillatable spindle, an arm rigidly secured to said oscillatable spindle, a link connecting said arm with said liquid actuated means in the leg of the U-tube, indicating means for said register and means connecting said indicating means to said spindle, the link and arm being so arranged that the angle through which the spindle is turned by a definite movement of said liquid actuated means is larger at small pressure differences than at large pressure differences and the U-tube being so shaped that the movement of the indicating means is proportionate to the rate of flow.

1,633,533. BRAD DRIVING AND EXTRACTING TOOL. ALBERT L. KERN, Aurora, Ill. Filed Aug. 19, 1926. Serial No. 130,180. 9 Claims. (Cl. 7—3.)



1. In combination, a tool of the character described comprising a pair of levers pivotally connected together, the upper end portions of said pair of levers formed to provide operating handles, the lower end of one of said pair of levers forming a bracing leg and the lower end of the other of said pair of levers provided with a brad extracting claw, and a driving bar connected to one of said levers and having a brad driving claw formed at the free end thereof.

1,633,534. GLASS AND PROCESS OF MAKING THE SAME. BERNARD LONG, Paris, France, assignor to Société Anonyme des Manufactures des Glaces & Produits Chimiques de Saint-Gobain, Chauny & Cirey, Paris, France. Filed Jan. 12, 1926. Serial No. 80,840. 3 Claims. (Cl. 106—36.1.)

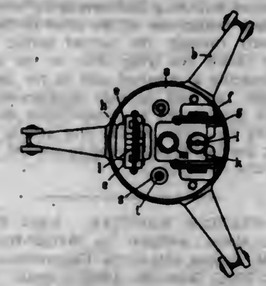


1. A glass having high absorption for short rays such as the X-rays, containing a large percentage of X-ray absorbing oxides tending to decrease changes of fluidity of the glass with change of temperature conditions, and also containing zirconium oxide.

1,633,535. COMBINED TRACK LEVEL AND GAUGE. CHARLES S. LUSK, Alfred Station, N. Y. Filed Sept. 3, 1921. Serial No. 498,209. 1 Claim. (Cl. 33—145.)

In a track gauge, a truck, a transverse beam carried by said truck and forming therewith a cross member for bridging the space between opposite rails of a railway track, flanged wheels carried by said truck, the treads of said wheels forming rail-tread engaging surfaces, and the flanges of the wheels on one side of said truck constituting shoulders for engaging the inner surface of the rail-tread of the adjacent rail, at least some of said wheels being inclined at such an angle to the longitudinal direction of said track as to maintain said rail-engaging shoulders in constant contact with said adjacent rail through forward motion of said truck, a gauge bar slidably supported by said transverse beam, the outer end of said gauge bar being engagable with the inner surface of the tread portion of the opposite rail, a spring for urging said gauge bar outwardly, a scale, and means for registering lateral movement of said gauge bar upon said scale.

1,633,536. GOLF-BALL MARKER. JOSEPH E. McGINNESS, Pittsburgh, Pa. Filed July 13, 1926. Serial No. 122,148. 13 Claims. (Cl. 101—38.)



1. A golf ball marker comprising a supporting frame, a ball clamp thereon, a freely movable type carriage, and means independent of the type carriage for rotating the ball clamp.

1,633,537. SAFETY SHEAVE BLOCK. WILLIAM H. MCKISSICK, Tulsa, Okla. Filed May 3, 1926. Serial No. 106,373. 9 Claims. (Cl. 254—197.)

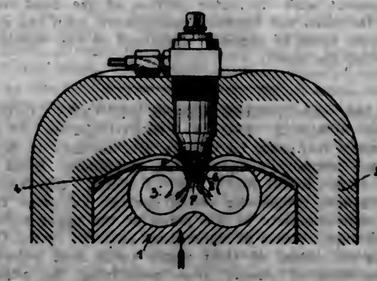
1. In a safety block, a support, a becket, from which the support is suspended, a sheave journaled on the support, a pair of guard plates attached to the support and having upright guard flanges at each side normally in registration, one of said plates being immovably attached to the support, and the other plates being laterally adjustable and non-rotatable.

1,633,538. LAMP SUPPORT. KARL MENSING, Hanau, Germany, assignor to The Firm: Quarzlampen-Gesellschaft, m. b. H., Hanau, Germany. Filed July 22, 1925, Serial No. 45,388, and in Germany Apr. 4, 1925. 6 Claims. (Cl. 250—34.)

1. Electric lamp support comprising a base plate, a hood covering said plate, a standard supported in a centric depression of said plate and extending through a centric opening in said hood, a transformer and a choke coil removably fixed on said plate around said standard, feet elements removably fixed to said plate and a sleeve embracing said standard near the upper part of said hood and removably fixed to one of the parts fixed on said plate.

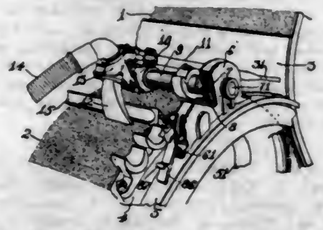
1,633,539. CONNECTING LINK. WILLIAM R. MILLER, Medford, and ISRAEL GORDON, Malden, Mass. Filed Jan. 21, 1927. Serial No. 162,616. 1 Claim. (Cl. 24—236.)

A compound snap hook, comprising an elongated piece of metal bent upon itself at its ends to form spaced hooks of curved formation, with the section connecting the hooks bent inwardly at its middle portion sufficiently to bring its outer side approximately into line with the longitudinal centre of the compound hook; and an elongated curved spring rigidly secured at its middle portion to said inwardly bent section of the hook with its concave side facing outwardly, said spring being disposed in the plane of the hook and being of suitable length, and outward curvature at its ends, to cause its ends to lap the inner concave faces of the open ends of the hook and to press into forcible engagement with said faces, the lapping convex portions on the ends of the outer concave side of the spring being arranged to fit the lapping concave faces of the hooks, and to meet and form points with the inner convex side of spring at its extreme ends; whereby said inner convex face of the spring merges at the ends of the spring into the concave inner faces of the hooks; said spring being of a thickness less than the thickness of the material from which the rest of the device is formed.



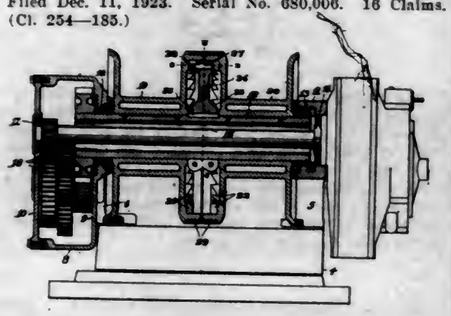
1,633,540. AERIAL ILLUMINATING DEVICE. STEPHEN G. VAN DERBECK, Hackensack, N. J., and JOSEPH BORTOLIN, Brooklyn, N. Y., assignors of one-third to Waldo R. Blackwell, Brooklyn, N. Y.; Frederick Lampe executor of said Waldo R. Blackwell, deceased. Filed July 31, 1923. Serial No. 654,846. 1 Claim. (Cl. 40—127.)

The combination with an aeroplane of a plurality of hangers extending therefrom, pairs of supporting rods supported by said hangers, girders for said supporting rods, each of the girders having a cap hinged thereto, said caps and the ends of the girders having supporting surfaces to engage said rods, a latch spring to lock each cap to its girder, a bolt extending through each cap and the girder to bolt them together, and a letter connected to the lower faces of said girders.



1,633,541. INTERNAL-COMBUSTION ENGINE. LORENZ KONRAD BRAREN, Munich, Germany, assignor to the Firm: Friedrich Deckel, Präcisionsmechanik und Maschinenbau, Munich, Bavaria, Germany. Filed Jan. 6, 1926, Serial No. 79,655, and in Germany Jan. 14, 1925. 5 Claims. (Cl. 123—32.)

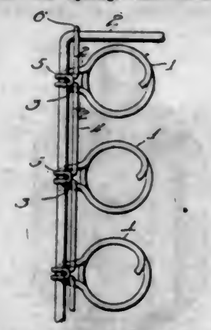
1. In internal combustion engines of the type where the fuel is injected at or near the end of compression a piston, a cylinder, and means for injecting fuel lo-



cated centrally in the head of said cylinder, said piston and the head of said cylinder at the end of compression forming a combustion chamber of the shape of a torus surrounding said fuel injecting means and also a flat annular space surrounding said torus and extending tangentially to said torus.

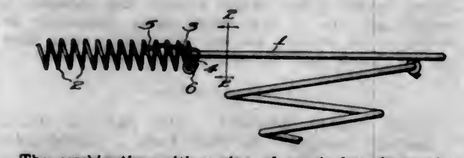
1,633,542. PNEUMATIC STRIPPER ATTACHMENT FOR CARDING ENGINES. ERNEST CLARK, Abington, Mass., assignor to Abington Textile Machinery Works, Boston, Mass., a trust. Filed Feb. 23, 1926. Serial No. 89,855. 3 Claims. (Cl. 19—109.)

1. In a pneumatic stripper attachment for carding engines, the combination with a stripper-nozzle, a traverse-screw, and an actuating gear, of a change-gear on said traverse-screw, an idler-gear intermediate said actuating gear and said change-gear, and a slotted support providing for adjustment of the idler-gear to suit change-gears of different diameters.



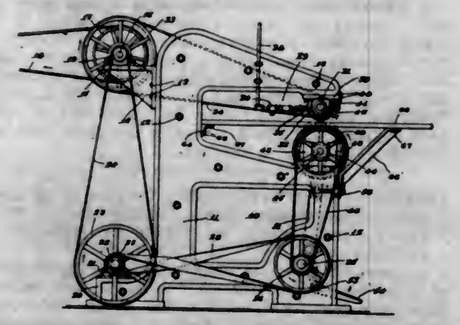
1,633,543. HOIST. OMAR E. CLARK, Denver, Colo. Filed Dec. 11, 1923. Serial No. 680,006. 16 Claims. (Cl. 254—185.)

1. In combination, a reversibly rotatable shaft, and means for rotating it in reverse directions, a radially disposed driving head rigidly fixed to the shaft, winding drums loosely journaled on the shaft on opposite sides of the head, and a reciprocable dog having a movable engagement with the outer portion of the head remote from the shaft for alternate engagement with the drums to rotate them in opposite directions on the reverse rotation of the shaft.



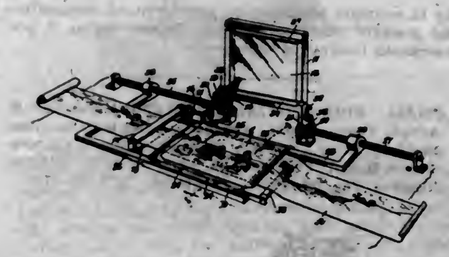
1,633,544. ANCHORING MEANS BETWEEN CUSHIONING SPRINGS AND A SURROUNDING FRAME. DARWIN HANAUER, La Grange, Ill., assignor to Kinney Rome Company, a Corporation of Illinois. Filed May 21, 1925. Serial No. 31,798. 1 Claim. (Cl. 5—260.)

A cushion comprising coiled springs, an outer frame lying approximately in the plane of the upper turns of said springs, certain of the springs adjacent to the frame having the metal of their upper turns bent outwardly in the form of double arms underlying the adjacent frame member, and a tie wire extending along said frame member across the tops of said arms and having a series of U-shaped loops formed in the same, each loop extending down through the space within one of the double arms on the springs and then upwardly past



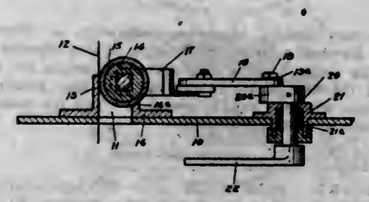
the outer side and across the top of said frame member so as to fit snugly on said frame member and press the arms against said frame member.

1,633,545. SPRING STRUCTURE. DARWIN HANAUER, La Grange, Ill., assignor to Kinney Rome Company, a Corporation of Illinois. Filed Jan. 22, 1926. Serial No. 82,953. 1 Claim. (Cl. 5—269.)



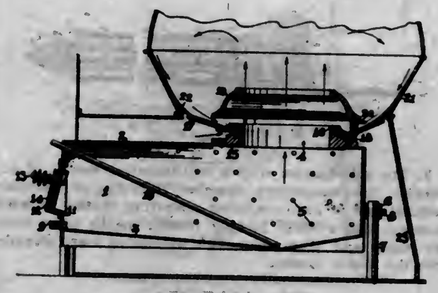
The combination with a ring of a spiral spring and a helical spring lying in the same plane as said ring and engaged at one end therewith, of a V-shaped clip looped over the wire of said ring and having its arms extending into the helical spring, one of the arms of the clip being bent outwardly through the helical spring to form a substantially closed eye lying close to the apex of the clip and embracing a terminal coil of the helical spring so as to hold the coil in said engagement with the ring, and the parts being so proportioned that the bend connecting the two arms of the clip stands apart from the adjacent portion of said ring to permit the ring to be wedged into the clip.

1,633,546. GLAZING MACHINE. DANA E. HARDING, Arlington, Mass., assignor to Wright-Harding Company, East Boston, Mass., a Corporation of Massachusetts. Filed May 13, 1925. Serial No. 30,032. 2 Claims. (Cl. 149—15.)



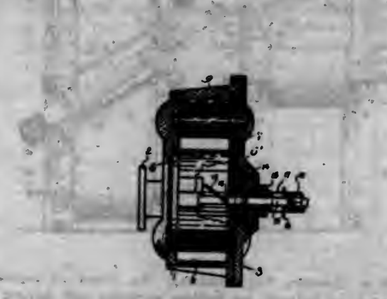
2. In an improved glazing and burnishing machine, the combination of a rotatably mounted heated glazing roll provided with a plurality of parallelly arranged corrugations on its periphery, means for rotating the same at a high speed, a shaft, slidably mounted bearings for said shaft, a feeding roll mounted on said shaft, a treadle, and connecting means between the treadle and said shaft for moving the same vertically to bring the feeding roll into and out of engagement with the corrugated roll.

1,633,547. APPARATUS FOR PRODUCING ANIMATED DRAWINGS. EARL HURD, New York, N. Y., assignor to Bray-Hurd Process Company, Inc., New York, N. Y., a Corporation of New York. Filed Mar. 9, 1926. Serial No. 93,369. 11 Claims. (Cl. 88—16.)



1. An apparatus for use in making animated drawings, including a pair of rollers adapted to engage with and advance a panorama strip or background, means for determining the position of a series of pictures adapted to be superposed thereon, and showing a movable object in successive positions, a frame adapted to hold the picture and panorama strip flat during photographing, and means for connecting said frame and said rollers for actuating the latter upon movement of said frame.

1,633,548. SEAL FOR DRIERS, HEATERS, OR THE LIKE. ROBERT R. JONES, Akron, Ohio, assignor to The Firestone Tire and Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed Dec. 4, 1925. Serial No. 73,291. 2 Claims. (Cl. 34—48.)

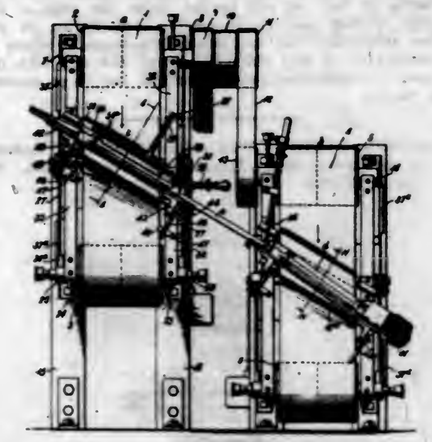


1. A seal for apparatus of the class described, comprising an abutment member adjacent one side of an opening therein, a roller movable across said opening into engagement with said abutment member, a sealing member adjacent the other side of said opening and formed with an arc-shaped seat for said roller, and means for moving the roller over said opening, comprising a yoke on which the roller is journaled, a crank shaft journaled in the casing, said shaft projecting from the casing, an operating lever secured on the shaft outside of the casing and a link connecting said crank shaft to said yoke, said connection being adapted to permit said roller to ride over said arc-shaped seat when it is moved from over said opening.

1,633,549. LIQUID-FUEL BURNER. HARRY C. LITTLE, Larkspur, Calif., assignor to V. J. B. Cheda, San Rafael, Calif. Filed Nov. 29, 1926. Serial No. 151,571. 6 Claims. (Cl. 158—92.)

1. A liquid fuel burner having a combustion chamber enclosed by side walls, a top and a bottom, a large opening located in the top through which the gases of combustion may pass from the combustion chamber, a ring resting on the top and located inside the edge of the large opening, and an air-guiding ring resting on the first mentioned ring and spaced therefrom, whereby a quantity of air may enter the burner and mix with the gases of combustion passing through the large opening in the top.

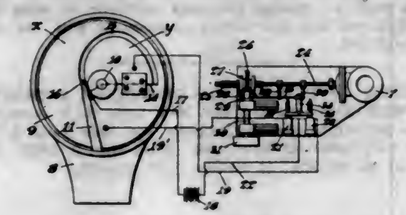
1,633,550. FLUID POWER TRANSMISSION. EDWARD H. MCKINNEY, Salina, Kans. Filed Nov. 27, 1925. Serial No. 71,798. 4 Claims. (Cl. 192—58.)



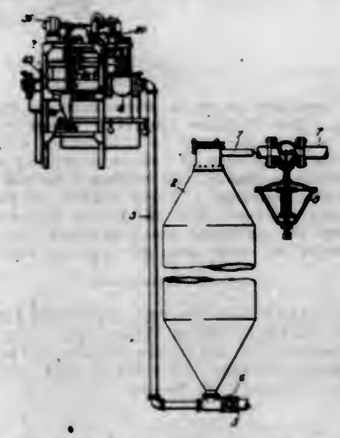
1. In a fluid power transmission, a drive shaft and a driven shaft, a housing rigidly attached to the drive shaft, a rotor in said housing rigidly attached to the driven shaft, an annular working chamber circumscribing the periphery of said motor, said chamber being filled with fluid, three rotatable abutments engaging with the peripheral face of said rotor, gears on one side of said rotor and abutments, said gears being in mesh for correct timing purposes, recesses across the faces of said abutments, divided pistons slidably engaging through the axis of said rotor, slots angling across the inner ends of the members of said pistons, said slots angling in opposite directions, a bar transversely engaging between the members of said pistons, protruding pins in said bar engaging in said slots, and means for reciprocating said bar for the reciprocation of the members of said pistons in opposite directions simultaneously for the purpose described.

1,633,551. ROCK DRILL. GUSTAVE M. NELL, Denver, Colo., assignor to The Denver Rock Drill Manufacturing Company, Denver, Colo., a Corporation of Delaware. Filed June 28, 1920. Serial No. 392,225. 13 Claims. (Cl. 121—9.)

1. The combination with a tool-actuating motor, of extensible feeding means therefor including a cylinder member and a piston member operating in the cylinder member, and a brake for the feeding means other than the motor and having a portion extending longitudinally into the piston member.



1,633,552. MACHINE FOR TRIMMING THE EDGES OF MOLDED DISKS. CYRUS B. WELLS, Auburn, N. Y., assignor to The Scranton Button Company, Scranton, Pa., a Corporation of Pennsylvania. Filed Apr. 12, 1926. Serial No. 101,490. 6 Claims. (Cl. 51—135.)



1. In a machine for trimming the edges of molded disks, such as buttons, an endless abrasive belt having a stretch adapted to travel downwardly, means for driving the belt, and a disk guide extending across the face of said stretch and inclined downwardly toward the discharge end, said guide having parallel top and bottom walls adapted to hold the disks edgewise with respect to the belt, and having one side wall, the latter spaced from the belt by approximately the width of the disks which are to be trimmed and the side of the guide opposite said side wall being open to permit the disks to engage the belt.

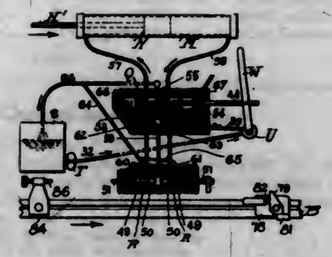
1,633,553. APPARATUS FOR TREATING PULP. CARLTON H. ALLEN, Millinocket, Me., assignor of one-half to Great Northern Paper Company, Millinocket, Me., a Corporation of Maine. Filed Dec. 29, 1919. Serial No. 348,059. Renewed Nov. 20, 1926. 3 Claims. (Cl. 92—7.)

1. A pulp treating apparatus of the character described comprising, in combination, a digester, means for supplying steam to said digester, means for automatically controlling the supply of steam to said digester and additional means for automatically controlling the discharge of fluids from said digester, said means cooperating to maintain substantially predetermined temperature and pressure conditions in said digester during a predetermined interval of time.

1,633,554. PULP-COOKING APPARATUS. CARLTON H. ALLEN, Dayton, Ohio, assignor of one-half to Great Northern Paper Company, Millinocket, Me., a Corporation of Maine. Filed Jan. 26, 1923. Serial No. 615,034. Renewed Nov. 20, 1926. 14 Claims. (Cl. 92—7.)

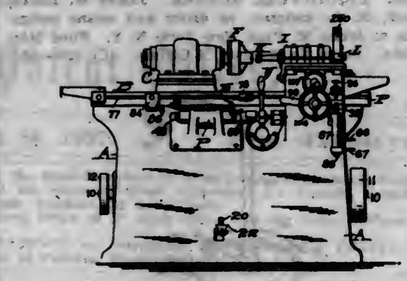
1. A pulp cooking apparatus comprising, in combination, a digester, a steam line leading to said digester for supplying steam thereto, and automatic means for controlling the flow of steam through said line jointly in accordance with the rate of steam flow and the pressure conditions in said digester.

1,633,555. CONTAINER AND SEALING MEANS THEREFOR. FRANCIS R. BURGESS, Chicago, Ill., assignor to American Flange & Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 3, 1927. Serial No. 172,375. 10 Claims. (Cl. 220—39.)



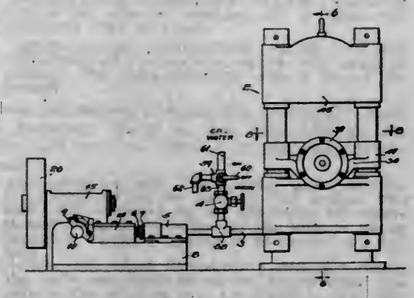
1. The combination with a container formed with a hole through a wall thereof; of an interiorly threaded bushing assembled with said wall in alignment with said hole, said bushing having a circumscribing flange which laps the wall where the wall surrounds said hole; a closure plug screwed within the bore of the bushing; and a hood assembled with said container wall by said flange and covering the outer end of said plug to prevent undetectable access thereto.

1,633,556. CONTAINER AND SEALING MEANS THEREFOR. FRANCIS R. BURGESS, Chicago, Ill., assignor to American Flange & Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 3, 1927. Serial No. 172,376. 7 Claims. (Cl. 220—39.)



1. The combination with a container formed with a hole through a wall thereof; of an interiorly threaded bushing received in said hole and assembled with said wall, said bushing having a circumscribing flange of polygonal contour and which laps the wall where the wall surrounds said hole, the wall be formed with angular portions receiving angular portions of said flange to prevent the bushing from turning; a closure plug screwed within the bore of the bushing; and a guard lapping the plug and having a portion confined between said container wall and bushing flange in said angular wall portions and having angular portions receiving said angular portions of the flange.

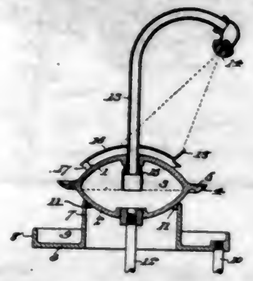
1,633,557. FLUID-PRESSURE-OPERATING MECHANISM FOR RECIPROCATING MEMBERS. RALPH L. MORGAN, Worcester, Mass., assignor, by mesne assignments, to Greenfield Tap and Die Corporation, Greenfield, Mass., a Corporation of Massachusetts. Filed Nov. 20, 1920. Serial No. 425,475. 11 Claims. (Cl. 121—45.)



1. The combination of a frame or base, a moving member fitted to slide thereon, a cylinder and piston for reciprocating the member, a main valve for controlling the flow to the cylinder, an operating handle effective for manual movement of said main valve, auxiliary valve mechanism connected to control the movements of said main valve, and means to automatically actuate said auxiliary valve mechanism, said auxiliary valve mechanism automatically returning to normal position after such actuation and as the direction of movement of said moving member is reversed, and being connected to relieve said main valve of unbalanced pressure, when in normal position, whereby said main valve may be thereafter freely moved manually by said handle while connected for automatic control.

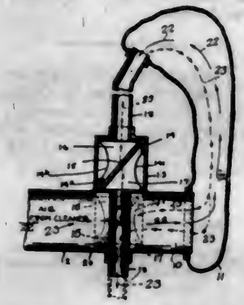
1,633,558. GRINDING MACHINE. RALPH L. MORGAN, Worcester, Mass., assignor to Greenfield Tap and Die Corporation, Greenfield, Mass., a Corporation of Massachusetts. Original application filed Nov. 20, 1920, Serial No. 425,475. Divided and this application filed Mar. 12, 1923. Serial No. 624,358. 27 Claims. (Cl. 51—233.)

1. A grinding machine having, in combination, a grinding wheel, a frame, a member fitted to slide thereon to produce relative axial movement of the wheel and work a cylinder and piston for reciprocating said member, and controlling mechanism therefor normally effective to maintain a given adjusted uniform rate of travel of said sliding member, said controlling mechanism including a main valve for said cylinder, a speed adjusting device, and a valve which may be actuated to give said member a higher speed when the wheel and work are in spaced relation, while leaving the normal speed adjustment unchanged.



1,633,559. PRESS. JOHN S. GULLBORG, Chicago, Ill., assignor, by mesne assignments, to Alemite Die-Casting & Mfg. Co., Chicago, Ill., a Corporation of Illinois. Filed Aug. 31, 1923. Serial No. 660,303. 2 Claims. (Cl. 78—42.)

1. In a hydraulic press system, a hydraulic press including a cylinder, a piston reciprocably mounted in the cylinder, and a platen spaced from and connected to the cylinder having a portion cooperable with the top of the piston, a pulsator including a reciprocatory member having a small amplitude of movement, but moving with great force, said member moving slowly initially, speeding up in the middle of the stroke, and ending the stroke relatively slowly, and a fluid connection between the press cylinder and said reciprocatory member for causing the force of said member to be applied to and magnified by the liquid in the press to actuate said press



piston, said movement of the reciprocatory member causing said press piston to move the metal being worked slowly initially to move it more rapidly on the intermediate portion of the stroke and to move it slowly finally so as to give the metal time to set.

1,633,560. LIQUID-FUEL BURNER. JAMES W. LOGAN, Newark, N. J., assignor, by direct and mesne assignments, to Jenny M. Page, New York, N. Y. Filed Mar. 14, 1924. Serial No. 699,240. 6 Claims. (Cl. 158—66.)

1. A gravity fed liquid fuel burner comprising, a hollow casing forming a combined liquid fuel and gas chamber, a liquid fuel feed pipe opening into the bottom of the chamber, a gas burner pipe leading from the top of the chamber and having its nozzle directed downwardly toward said casing, and a hollow extension for the gas burner pipe projecting downwardly a predetermined distance into the chamber, the bore of said extension being larger than the bore of the gas burner pipe.

1,633,561. DIRT-EJECTING VACUUM CLEANER. THOMAS DREW, West Springfield, Mass. Filed June 17, 1926. Serial No. 116,704. 2 Claims. (Cl. 15—16.)

1. In a vacuum cleaner an elongated dirt receptacle, means for attaching the dirt receptacle to the body of the vacuum cleaner comprising a pipe connection to which an end of the said receptacle is attached, the pipe connection having an upper hollow extension, a pipe leading from the extension and communicating with the interior of the extension, a valve body which is slidably located in the extension and formed with oppositely disposed ports, an inclined partition plate in the said body located between the ports, the said pipe leading from the extension on one side of the said partition plate and communicating with one port of said valve and one end of the receptacle, the said valve having a downwardly extending tubular extension on the other side of the partition plate and communicating with the other port and passing downwardly across and through the said pipe connection.

Patents Nos. 1,633,562 to 1,634,249.

THE
OFFICIAL GAZETTE
OF THE
United States Patent Office.

Vol. 359—No. 4. TUESDAY, JUNE 28, 1927. Price—$10 per year.

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscription, $10.00 per annum; single numbers, 25 cents each.

PRINTED COPIES OF PATENTS are furnished by the Patent Office at 10 cents each. For the latter, address the Commissioner of Patents, Washington, D. C.

CIRCULARS OF GENERAL INFORMATION concerning PATENTS or concerning TRADE-MARKS, PRINTS, and LABELS will be sent without cost on request to the Commissioner of Patents, Washington, D. C.

Changes in Classification.

Order No. 3,013, June 9, 1927, directs:

In *class 28, Textiles* (Division 21), establish the following subclass and definition, the patents contained in this subclass having been taken from class 28, subclass 56, Pile tufting, loom replenishing:

Pile tufting, pattern setting
55.6 With loom replenishing.

55.6. PILE TUFTING, PATTERN SETTING, WITH LOOM REPLENISHING. Also having mechanism for facilitating the threading of the tuft threads through the tubes of the loom tube frame.
Search this class, subclass 56, for the replenishing mechanism.

In *class 28, Textiles* (Division 21), subclass 56, Pile tufting, loom replenishing, add to the definition the following note:

Search this class, subclass 55.6.

In *class 128, Surgery* (Division 43), abolish the following subclasses, with their definitions, the patents formerly contained in these subclasses having been placed for the most part in class 128, Surgery, existing subclass 173, Medicators, Atomizers, and subclasses 173.1, 173.2, and 173.3, indented thereunder, established in this order, and in class 299, Fluid Sprinkling, Spraying, and Diffusing, various subclasses of Sprayers:

Medicators
Atomizers
174 Aspirating and pressure
175 Nebulizers,
176 Piston,
177 Aspirating
178 Nebulizers
179 Piston,
180 Piston,
181 Steam current,
182 Pressure
183 Piston.

In *class 128, Surgery* (Division 43), establish the following subclasses and definitions, the patents contained in these subclasses having been taken for the most part from subclasses 174–183 of this class, abolished in this order:

Medicators
Atomizers
173.1 Multiple fluid,
173.2 Steam.
173.3 With tongue depressors.

173.1. MEDICATORS, ATOMIZERS, MULTIPLE FLUID. Atomizers within the scope of subclass 173 having means to mix and deliver a plurality of medicines.

173.2 MEDICATORS, ATOMIZERS, STEAM. Atomizers within the scope of subclass 173 in which the atomizing fluid is steam.

173.3. MEDICATORS, ATOMIZERS, WITH TONGUE DEPRESSORS. Atomizers within the scope of subclass 173 when combined with a tongue depressor.

In *class 128, Surgery* (Division 43), subclass 173, Medicators, Atomizers, cancel the first note following the definition and insert at the end of the definition the following:

when provided with some means which particularly adapts them for surgical and medical use, such, for example, as an applicator or nozzle formed to apply to orifices of the body or means formed to enable the spray to be carried into the body.

Note.—Atomizers which only spray a medicine against the body and those in which the invention lies only in the spraying part are found in class 299, Fluid Sprinkling, Spraying, and Diffusing, subclasses 53–100, indented under "Sprayers."

In *class 299, Fluid Sprinkling, Spraying, and Diffusing* (Division 46), establish the following subclass and definition, the patents contained in this subclass having been taken for the most part from class 128, Surgery, subclasses 174–183, abolished in this order:

Sprayers
Multiple fluid
Hand-pump atomizer type
88.5 Nebulizers.

88.5. SPRAYERS, MULTIPLE FLUID, HAND-PUMP ATOMIZER TYPE, NEBULIZERS. Includes those air-blast atomizers in which the atomization takes place within the container of the liquid which is being atomized. The vapor thus formed is delivered from the container through a tube or nozzle.

Condition of Applications Under Examination at Close of Business June 17, 1927.

(Total number of applications awaiting action, excluding Trade-Mark Division, 63,547; Trade-Mark Division, 1,887. Oldest new case, Oct. 30, 1926; oldest amended, Oct. 22, 1926. The dates given are 1927 except where † indicates 1926.)

Room No.	Divisions, Examiners, and Subjects of Inventions.	Oldest new application and oldest action by applicant awaiting office action. New.	Amended.	No. of applications awaiting action.
112	1. LOEFFLER, F. A., Closure Operators; Fences; Gates; Tillage; Scattering Unloaders	Mar. 28	Apr. 1	597
126	2. HADEN, C. F., Bee Culture; Dairy; Preserving; Presses; Tobacco	Feb. 19	Feb. 19	797
331	3. LINDSEY, A., Electric Heating; Electrochemistry; Heating; Metal Founding; Metallurgical Apparatus; Metallurgy; Metal Treatment; Plastic Metal Working.	Jan. 17	Feb. 4	1,587
234	4. MERRITT, A. D., Conveyers; Hoists; Handling Apparatus and Implements, and Pushing and Pulling.	†Dec. 27	Jan. 10	1,550
108*	5. MACNAB, J. F., Harvesters; Jewelry; Music; Acoustics; Sound Recording; Knotters	Jan. 10	†Dec. 27	962
318	6. LEWERS, A. M., Chemistry; Chemistry—Carbon Compounds; Substance Preparation	†Nov. 24	†Nov. 9	1,578
106	7. JARBOE, C. G., Amusement and Exercising Devices; Toys; Optics; Photography	Jan. 11	Jan. 12	1,303
133	8. HENRY, O. C., Beds; Chairs and Seats; Furniture; Kitchen and Table Articles; Store Furniture	Feb. 3	Feb. 9	1,625
221	9. ADAMS, R. E., Pumps; Fluid and Fluid-Current Motors	Mar. 15	Mar. 15	998
118	10. HUNTER, O. F., Land Vehicles—Animal Draft Appliances, Bodies and Tops	Jan. 8	Jan. 14	1,227
148*	11. ARMSTRONG, H. C., Boots, Shoes, and Leggings; Button, Eyelet, and Rivet Setting; Harness; Hides, Skins, and Leather Manufactures; Nailing and Stapling; Whip Apparatus; Cutting and Punching Sheets and Bars.	Feb. 11	Feb. 15	938
380	12. PIERCE, P. P., Machine Elements	Jan. 6	Jan. 14	1,268
154*	13. CLIFT, J. W., Bolt, Nail, Nut, Rivet, and Screw Making; Chain, Staple, and Horseshoe Making; Driven, Headed, and Screw-Threaded Fastenings; Gear Cutting, Milling, and Planing; Metal Drawing; Metal Forging and Welding; Metal Rolling; Metal Working; Needle and Pin Making; Turning; Boring and Drilling.	Jan. 17	Jan. 20	1,287
102*	14. BRUMBAUGH, N. J., Compound Tools; Farriery; Metal Bending; Metal Tools and Implements, Making; Sheet-Metal Ware, Making; Tools; Wire Fabrics and Structure; Wire Working; Metal Working, Assembling, and Blanks and Processes.	†Dec. 20	Feb. 3	1,240
329	15. REDROW, W. L., Glass; Paper Making; Plastic Block and Earthenware Apparatus; Plastics	Jan. 27	Jan. 31	1,467
242*	16. SPENCER, C. J., Batteries; Resistances and Rheostats; Telegraphy; Telephony	Feb. 14	Mar. 8	746
307	17. RAFTER, G. S., Label Pasting and Paper Hanging; Nut and Bolt Locks; Ornamentation; Paper Manufactures; Printing; Type Casting; Sheet-Material Associating or Folding; Sheet or Web Feeding or Delivering; Type Setting.	†Nov. 5	†Dec. 6	730
229	18. PORTER, M. E., Motors, Expansible-Chamber Type; Power Plants; Speed-Responsive Devices	†Nov. 20	†Nov. 19	1,046
236	19. GLASCOCK, E. S., Furnaces; Heating Systems; Liquid and Gaseous Fuel Burners; Stoves and Furnaces.	Feb. 18	Mar. 18	899
179	20. GROVE, S. D., Miscellaneous Hardware; Closure Fasteners; Locks and Latches; Safes; Undertaking.	Feb. 23	Feb. 21	932
212	21. THURBER, W. L., Winding and Reeling; Textiles; Cloth Finishing	Jan. 18	Jan. 20	997
244*	22. COLWELL, J. H., Aeronautics; Amusement Devices, Games; Firearms, Ordnance, and Explosive Devices; Air Guns, Catapults, and Targets; Boats and Buoys; Ships; Marine Propulsion.	†Dec. 31	Jan. 4	915

DECISIONS IN PATENT AND TRADE-MARK CASES.

Supreme Court of the United States.

THE I. T. S. RUBBER COMPANY *v.* ESSEX RUBBER COMPANY.

Decided November 22, 1926.

1. INFRINGEMENT — ESTOPPEL — PRIOR SUIT BETWEEN COMPLAINANT AND CUSTOMER OF DEFENDANT.

Where in one circuit the I. T. S. Co. brought suit against W., a dealer in the E. Company's article of manufacture involved in the present suit, W. voluntarily allowed the suit to go by default, and the E. Co. refused to become a party to the suit or to assume any control over it, but only in the adjustment of the damages after a pro confesso decree had been entered the E. Co., however, having previously written W. that it would reimburse him for any losses he sustained by reason of the suit, *Held* that the E. Co. was not estopped from contesting the question of infringement in a suit brought against it later by the I. T. S. Co. in another circuit.

2. CLAIMS—CONSTRUCTION OF—LIMITING WORD OMITTED THROUGH CLERICAL ERROR—CLAIM CONSTRUED AS UNDERSTOOD BY COUNSEL FOR APPLICANT AND EXAMINER.

Where the omission of a limiting word from one of the claims was through a clerical error due to oversight, and both counsel for the applicant and the Examiner understood that it was contained in that claim as well as the others, the claim should be construed and have the same effect as if it had been included.

3. CLAIM NARROWED TO OBTAIN A PATENT CAN NOT BE BROADENED—ERROR OF EXAMINER.

Where an applicant for a patent to cover a new combination is compelled by the rejection of his application by the Patent Office to narrow his claim by the introduction of a new element, he can not after the issue of the patent broaden his claim by dropping the element which he was compelled to include in order to secure his patent. If dissatisfied with the rejection, he should pursue his remedy by appeal, and where in order to get his patent he accepts one with a narrower claim he is bound by it. Whether the Examiner was right or wrong in rejecting the original claim the court is not to inquire.

4. SAME—ALL RESTRICTIONS MUST BE REGARDED AS MATERIAL—LIMITATIONS LOOKED UPON AS DISCLAIMERS.

An applicant having limited his claim by amendment and accepted a patent brings himself within the rules that if the claim to a combination be restricted to specific elements all must be regarded as material and that limitations imposed by the inventor, especially such as were introduced into an application after it had been persistently rejected, must be strictly construed against the inventor and looked upon as disclaimers.

5. SAME—DOCTRINE OF EQUIVALENTS INAPPLICABLE.

Where an applicant whose claim is rejected on reference to a prior patent without objection or appeal voluntarily restricts himself by an amendment of his claim to a specific structure, having thus narrowed his claim in order to obtain a patent, he "may not by construction, or by resort of the doctrine of equivalents, give to the claim the larger scope which it might have had without the amendments which amount to a disclaimer."

ON WRIT of certiorari to the United States Circuit Court of Appeals for the First Circuit.

Mr. F. O. Richey and *Mr. Melville Church* for I. T. S. Rubber Company.

Mr. Lucius E. Varney for Essex Rubber Company.

Mr. Justice SANFORD delivered the opinion of the Court.

This is a suit in equity brought by the I. T. S. Rubber Company against the Essex Rubber Company in the Federal District Court for Massachusetts, for the infringement of United States Patent No. 14,049, on resilient heels, reissued to the I. T. S. Company January 11, 1916, as assignee, on an original patent to John G. Tufford, issued in 1914. After final hearing on the pleadings and proof[1] the bill was dismissed by the district court for want of infringement. This was affirmed by the circuit court of appeals, 1 F. (2d) 780. And there being a conflict of opinion with the Circuit Court of Appeals for the Sixth Circuit as to the scope of the patent, this writ of certiorari was granted.

The Essex Company, which manufactures and sells the heels alleged to infringe, expressly admitted the validity of the reissued patent. And the only questions are: first, whether it is estopped to deny infringement; second, if not, whether infringement is shown.

1. In the courts below the I. T. S. Company relied on estoppels by reason of adjudications in various prior suits brought by it in the sixth circuit against dealers in the Essex Company's heels. In the brief for the I. T. S. Company in this Court it is asserted, in general terms, that the action of the Essex Company "in suits brought against its jobbers in the sixth circuit estop it from denying infringement here," and that the circuit court of appeals erred in holding that it was not estopped by the decrees in such suits. The argument in the brief, however, specifies and deals with only one of such prior suits; and there being as to the others no semblance of compliance with the requirements of rule 25 of this Court,[2] we need consider only the suit specifically relied on.

That was a suit brought by the I. T. S. Company against one Wendt, a dealer in Essex heels of a type involved in the present suit, in which infringement of the patent was adjudged. The I. T. S. Company contends that the Essex Company, although not a party of record, took entire control of the defense, participated in the suit until the final decree, paid all the expenses, and is now estopped from denying infringement as therein adjudged.

The material facts found by the district court are: The Essex Company, after being notified by Wendt of the commencement of the suit, notified

[1] Various intermediate proceedings, on a preliminary motion to dismiss, appear in 270 Fed. 598 (D. C.), 276 Fed. 475 (C. C. A.), and 309 O. G., 447; 281 Fed. 5 (C. C. A.).

[2] This rule provides that the brief for the plaintiff in error, appellant or petitioner shall contain, inter alia, a "concise statement of the case, containing all that is material to the consideration of the questions presented, with appropriate page references to the printed record," cl. 2(d); a "specification of such of the assigned errors as are intended to be urged," cl. 2(e); and an "argument exhibiting clearly the points of fact and of law being presented," cl. 2(f). 266 U. S. 671.

the counsel of the I. T. S. Company that it did not wish to, and would not, appear. Wendt thereafter voluntarily allowed the suit to go by default, and an order was entered taking the bill pro confesso. This was followed by an interlocutory decree pro confesso adjudging the infringement of the patent and Wendt's liability for damages and profits, and ordering an accounting. Down to the entry of this decree the Essex Company exercised no control over the management and conduct of the suit. Thereafter the Essex Company, having previously written Wendt that it would reimburse him for any losses he sustained by reason of the suit, suggested that he and counsel whom it had employed procure an adjustment of the damages and profits. Wendt and the counsel for the Essex Company thereupon secured an agreement to settle the case by Wendt's payment of $1,000. This was embodied in a stipulation signed by the I. T. S. Company's counsel and by the Essex Company's counsel as counsel for Wendt, and filed in the case. This stipulation, with the interlocutory decree, was thereafter made the basis of a final decree, readjudging the infringement, reciting the settlement, and adjudging that the I. T. S. Company recover of Wendt $1,000 and the costs of the suit. Wendt paid this judgment and was reimbursed by the Essex Company. The district court further found specifically that, under the circumstances, the Essex Company did not control the suit; and held that, even though the I. T. S. Company understood that the counsel negotiating the settlement represented the Essex Company as well as Wendt in adjusting the damages, it was not estopped from contesting the question of infringement raised in the present case.

[1] On the appeal the circuit court of appeals stated that the record showed clearly that the Essex Company refused to become a party to the suit or assume any control over it, and took no part in the conduct or control of the suit, "but only in the adjustment of the damages" after the pro confesso decree had been entered; and approved both the findings and rulings of the district court.

There is nothing which, under the well-settled rule, *Del Pozo* v. *Wilson Cypress Co.*, 269 U. S. 82, 89, justifies us in disturbing the concurrent findings of fact of the two courts below; and we concur in their ruling that on the facts thus found the Essex Company is not estopped from contesting the question of infringement.

2. The question of infringement as here presented turns upon matters of law arising out of a file-wrapper defense interposed by the Essex Company, which insists that the reissued patent, although valid, was so limited in scope by the proceedings in the Patent Office that the Essex heels do not infringe.

The patent covers the part of a shoe commonly called a rubber heel, or cushion heel lift.[2] This is usually made of rubber, and is attached to the under side of the leather heel so as to furnish a yielding, resilient heel, giving softness to the tread and quietness in walking. These heels, which are in common use, are of two types, the flat and the concavo-convex, both of which were old when Tufford made his invention. The flat heel, which is the older, is cemented to the leather and then fastened on by nails or screws. The driving in of the nails or screws, however, has a tendency to cause the rubber to spring away from the leather around the edges and produce an open seam. In the concavo-convex type the body of the rubber heel is curved downwards. It is attached to the leather heel, without any cement, by placing its upper concave side under the leather, pressing it upward flatly and then nailing or screwing it on tightly. This, through the tendency of the rubber to resume its original curved form, tends to keep it tightly pressed upwards against the leather and overcome the tendency of the flat heels to separate from the leather at the edges. This characteristic of the concavo-convex heels, often called "the tight-edge effect," was referred to as early as 1889 in Ferguson's patent No. 638,228.

The Tufford heel is of the concavo-convex type. We insert here reproductions of Figure 2 of the drawings of the reissued patent, which is described as "a front to rear sectional view through the lift in position disposed against the under side of a shoe heel and immediately prior to application thereto," and shows one-half of the lift on a median section; and of Figure 4, which is described as "a perspective view looking at the upper side of the lift removed."

The reissued patent contains 10 claims. The first four, which repeat the claims of the original patent, relate merely to the form and position of the washers in a cushion heel lift, and to grooves, channels and suction areas in its concave surface. They are not here involved. The others are additional claims relating to shape defining improvements. The bill charges infringement of the new claims 5 to 9, inclusive. Claim 5 reads:

> A heel lift of substantially non-metallic resilient material having its body portion of concavo-convex form on every line of cross section, *the concave upper face lying entirely below a plane passing through the rear upper edge and the breast*[4] *corners of the lift.*

The last clause in this claim, which we have italicised—about which the present controversy turns—is contained in all the other claims in suit in identical or precisely equivalent words, except that in claim 8 the word "rear" does not appear before the words "upper edge."[5] For immediate purposes we treat claim 5 as typical of all claims in suit, passing for the moment the consideration of the question whether there is any essential distinction in respect to claim 8.

[2] The under layers of shoe heels were called "lifts" by the cobblers.

[4] The "breast" is the front face of the heel.

[5] All these claims are set forth in full in the opinion of the circuit court of appeals, at p. 781.

The Essex Company contends: (1) That by the proceedings in the Patent Office these claims were limited to the form of concavo-convex heel lift in which the concave upper face lies entirely below a plane passing through the rear upper edge and breast corners, that is, one in which, owing to the curvature of the upper face, only its rear edge and breast corners lie in the same horizontal plane, and its side and breast edges, as well as all other portions of its surface, lie below the plane passing through and defined by these three points—this being referred to as the "three-point-contact" form, since when the lift is brought in contact with the leather heel, before being flattened, only the rear edge and two breast corners will touch the leather. (2) That the claims, thus limited, are not infringed by the Essex heels, as their upper side edges, having no vertical curve, lie in and not below the plane passing through the rear edge and breast corners.

The file wrapper shows that on the application for the reissued patent it contained as first presented no reference to the position of the upper rear edge and breast edges of the lift in relation to the other portions of its upper surface. Several new claims were submitted some of which, as least,[6] described a lift having its attaching face concave on every line of cross section. These were rejected by the Examiner on reference to Nerger's patent No. 661,129. Another set of claims was then substituted describing a heel lift of resilient material comprising a body portion of concavo-convex form on every line of cross section and normally held in such form by its own inherent resiliency. These were also rejected by the examiner on reference to Nerger.

After an interview with the Examiner in which the applicant exhibited samples of his own lift and the Nerger lift, he then amended the specification by inserting the statement:

> By reference to Figs. 2 and 4 of the drawings, *it will be seen that the concave upper face of the lift lies entirely below a plane tangent to the rear upper edge and the breast corners of the lift*, whereby to cause the entire margin of said lift to exert a uniform pressure on the heel of a shoe when the lift is positioned on the heel and the convex face thereof depressed to flatten said lift.

He also substituted another set of claims, 5 to 9, inclusive. Claim 5—which was typical of all the others unless claim 8 was differentiated by the fact that the word "rear" did not appear before the words "upper edge"—read:

> A heel lift of substantially non-metallic resilient material having its body portion of concavo-convex form on every line of cross section, *the concave upper face lying entirely below a plane tangent to the rear upper edge and the breast corners of the lift.*

In presenting these amendments counsel for the applicant urged that Nerger's lift was not concavo-convex on every line of cross section since the deepest portion of the concavity in its upper surface was at the breast; and that its concave upper surface did not lie entirely below a plane tangent to the rear edge and breast corners. In replying, the Examiner, after calling attention to the fact that on the application for the original patent the applicant had presented claims for a lift in which all the edges of the attaching face occupied the same plane—which were rejected—stated that Figure 2 of the drawings indicated the same construction and did not show a lift whose concave upper face lay entirely below a plane tangent to the rear upper edge and breast corners, as set forth in the amendment to the specification, since a point midway between the breast corners was in contact with the upper heel, and "a plane tangent to the rear edge and the breast corners would also pass through the entire front [breast] edge"; that the applicant's sample lift did "not correspond to the drawing, since all the points of its breast except the two corner points lie below a straight line passing through these points"; that in "each of the claims 5, 6, 7, 8 and 9 the applicant specifies that the concave upper face lies entirely below a plane tangent to the rear upper edge and the breast corners"; and that these claims do "not read on the drawing, and are therefore rejected."

To meet this rejection the applicant further amended the specification by substituting for the prior amendment the statement:

> By references to Figs. 2 and 4 of the drawings, it will be seen that the concave upper face of the lift lies entirely below a plane passing through the rear upper edge and breast corners of the lift. * * * *In other words, owing to the curvature of the concave attaching face of the lift, the rear upper edge and breast corners of said concave attaching face are disposed in a plane above the upper side edges and the breast edges of the lift.*

He also amended each of the claims by substituting the words "passing through" for "tangent to"—corresponding to the change that had been made in the specification—and added claim 10, reading:

> A heel lift of substantially resilient material comprising a body portion, the attaching face of which is concave and the tread face convex on every line of cross section, the rear upper edge and breast corners of the concave attaching face of the lift being disposed in a plane above the upper side and breast edges of said concave attaching face.

In presenting these amendments counsel for the applicant stated that the matter quoted by the Examiner from the file wrapper of the original patent merely showed, if anything, that error had crept into the prosecution of the original application, which should be corrected; that as Figure 4 of the drawings showed—

> that the breast lift was cut away on a curved line, the attaching face of the lift at the breast thereof must necessarily lie in a plane below the breast corners and the rear edge of said lift or, in other words, the rear upper edge and breast corners of the concave attaching face are disposed in a plane above the upper side and breast edges thereof;

that the showing in Figure 2 was therefore obviously erroneous, and, although claim 10 read upon it without any correction, it did not clearly illustrate the applicant's invention; and that permission was requested to correct the drawing. This was granted, and Figure 2 was changed to the form which we have reproduced in this opinion, showing that the upper side and breast edges lie below a plane passing through the rear edge and breast

[6] The file wrapper does not set forth all of these claims.

corners. The new claims were then allowed, and the patent was reissued.

It thus appears that the applicant acquiesced in the successive rejections by the Examiner on reference to Nerger of claims for a lift having its attaching face concave on every line of cross section and for a lift of resilient material of a concavo-convex form on every line of cross section, and that to meet this reference he amended the specification so as to state not only that the concave upper surface lies entirely below a plane passing through the rear upper edge and breast corners, but that "in other words," owing to the curvature of the concave attaching face the rear upper edge and breast corners are disposed in a plane above the upper side and breast edges; amended the claims to describe a lift whose concave upper surface lies entirely below a plane passing through the rear upper edge and breast corners; and finally changed his drawing so as to correspond precisely with these amendments—and that then, and not until then, were the claims allowed.

We think that by this proceeding the claims were limited to the specific form of a "three-point-contact" lift, that is, to one in which, owing to the vertical curve of the upper side and breast edges, these edges, as well as all other portions of the upper surface, lie below the plane passing through and defined by the rear upper edge and breast corners. We cannot agree with the opinion of the Circuit Court of Appeals for the Sixth Circuit in *United States Rubber Co.* v. *I. T. S. Rubber Co.*, 260 Fed. 947, 948, that claim 10, which contains the limiting clause "the concave attaching face of the lift being disposed in a plane above the upper side and breast edges," is the only one which is limited to the three-point-contact lift. It is true that if the limiting clause in claims 5 to 9, "the concave upper face lying entirely below a plane passing through the rear upper edge and breast corners," stood alone, there might be some question as to whether the side and breast edges were to be considered as a part of the upper face. However, the meaning of this clause was made entirely clear by the last amendment to the specification, adding to the previous statement that the concave upper face lies entirely below a plane passing through the rear upper edge and breast corners, that, "in other words," the rear upper edge and breast corners are disposed in a plane above the upper side and breast edges. We are unable to agree with the view that the phrase "in other words" was here used to connect alternative thoughts which were not identical, and think that they were used in their ordinary sense to introduce a specific element of the identical matter previously described, precisely defining a lift whose upper surface lies below a plane passing through the rear edge and breast corners as one whose upper side and breast edges lie below this plane—this being emphasized by the statement made by counsel for the applicant and the corresponding change which was made in the drawing. The limiting clause in claims 5 to 9 must therefore be read in the sense in which it is thus defined by the specification, that is, as referring to a three-point-contact lift whose side and breast edges, as well as all other points in its upper surface, lie below the plane passing through the rear edge and breast corners.

There is no ground for differentiating claims 5 to 9 from claim 10 in this respect in order to give effect to claim 10. The Circuit Court of Appeals for the Sixth Circuit expressly declined to rest its conclusion on this ground (p. 948). And as to this it suffices to say, that, as was pointed out by the district judge, claims 5 to 9 are sufficiently differentiated in other respects by the presence of subsidiary elements relating to the character of the material, nail openings, etc., that do not appear in claim 10.

We find, further, no significance in the substitution of the words "passing through" for "tangent to" in the specification and claims. These phrases were used interchangeably by the Examiner. The applicant pointed out no distinction in their meaning, and, so far as appears, merely adopted "passing through" as the preferred form of equivalent expressions. And they have no difference in meaning as used in the specification and claims; the one phrase as well as the other aptly defining the plane passing through the upper rear edge and breast corners.

[2] We also find that the fact that the word "rear" does not appear before the words "upper edge" in claim 8 is not a ground upon which it may be differentiated from the others. It appears that this omission was inadvertent and unnoticed. The applicant called no attention to the omission and did not differentiate this claim from the others in his effort to avoid the reference to Nerger's patent. The Examiner stated that "each of the claims 5, 6, 7, 8, and 9" specified a plane tangent to "the rear upper edge and the breast corners." And we can not believe that if the applicant's counsel intended to differentiate this claim from the others by the omission of the word "rear," he would have failed to disclose the distinction which he had in mind and permitted the Examiner to pass upon the claim under a misapprehension as to its language. It was also stated by the district judge that at the preliminary hearing on the motion to dismiss, the I. T. S. Company recognized that this clause in claim 8 read the same as in the other claims; that this had apparently been its position before other courts where these claims had been considered;[7] and that it did not change its position in this respect until after the circuit court of appeals on the hearing in that court on the motion to dismiss had called attention to the omission of the word "rear." We concur in the finding of the district judge that the omission of the word "rear" was through a clerical error due to oversight, and that both the counsel for the applicant and the Examiner understood that it was contained in claim 8 as well as the others; and we are of opinion that the claim should be construed and have the same effect as if it had been included. This is not in any real sense, a remaking of the claim; but is merely giving to it the meaning which was intended by the applicant and understood by the Examiner.

[7] Thus in the U. S. Rubber Co. case the Circuit Court of Appeals for the Sixth Circuit stated that "each of the claims 5 to 9, inclusive," contain the limiting clause referring to "a plane passing through the rear upper edge and breast corners."

Furthermore, if by the omission of the word "rear" this claim should otherwise be regarded as calling for a lift whose upper face lies entirely below a plane passing through the entire "upper edge" and the breast corners, thereby making it a claim for a lift having all its upper edges in the same plane, such a construction would not only conflict with the express disclaimer of counsel for the applicant, but, as held by the circuit court of appeals, render the claim invalid as being for a different invention from that described in the specification and drawings of the original patent. *Mahn* v. *Harwood*, 112 U. S. 354, 359, 30 O. G. 657; *Parker & Whipple Co.* v. *Yale Lock Co.*, 41 O. G. 811, 123 U. S. 87, 97. And, so construed, it would not read on the specification and drawings of the reissued patent.

Having thus reached the conclusion that all of the claims in suit are limited to the three-point-contact form of lift, it is unnecessary to determine here whether in calling for a lift of concavo-convex form on every line of cross section, any of them are also limited to a "saucer-shaped," as distinguished from a "scoop-shaped," lift, that is, to one having in its upper surface a low spot centrally disposed which is below the lowest point in the breast edge, as has been held by the Circuit Court of Appeals for the Sixth and Seventh Circuits.[8]

[3, 4, 5] It is well settled that where an applicant for a patent to cover a new combination is compelled by the rejection of his application by the Patent Office to narrow his claim by the introduction of a new element, he can not after the issue of the patent broaden his claim by dropping the element which he was compelled to include in order to secure his patent. *Shepard* v. *Carrigan*, 34 O. G. 1157, 116 U. S. 593, 597. If dissatisfied with the rejection he should pursue his remedy by appeal; and where, in order to get his patent, he accepts one with a narrower claim, he is bound by it. *Shepard* v. *Carrigan*, supra, 597; *Hubbell* v. *United States*, 93 O. G. 1124, 179 U. S. 77, 83. Whether the Examiner was right or wrong in rejecting the original claim, the Court is not to inquire. *Hubbell* v. *United States*, supra, 83. The applicant having limited his claim by amendment and accepted a patent, brings himself within the rules that if the claim to a combination be restricted to specified elements, all must be regarded as material, and that limitations imposed by the inventor, especially such as were introduced into an application after it had been persistently rejected, must be strictly construed against the inventor and looked upon as disclaimers. *Sargent* v. *Hall Safe & Lock Co.*, 31 O. G. 661, 114 U. S. 63, 86; *Shepard* v. *Carrigan*, supra, 598; *Hubbell* v. *United States*, supra, 85. The patentee is thereafter estopped to claim the benefit of his rejected claim or such a construction of his amended claim as would be equivalent thereto. *Morgan Envelope Co.* v. *Albany Paper Co.*, 67 O. G. 271, 152 U. S. 425, 429. So where an applicant whose claim is rejected on reference to a prior patent, without objection or appeal, voluntarily restricts himself by an amendment of his claim to a specific structure, having thus narrowed his claim in order to obtain a patent, he "may not by construction, or by resort to the doctrine of equivalents, give to the claim the larger scope which it might have had without the amendments which amount to a disclaimer." *Weber Elec. Co.* v. *Freeman Elec. Co.*, 288 O. G. 631, 256 U. S. 668, 677.

It results that as the claims in suit were limited by the proceedings in the Patent Office to the specific form of a three-point-contact lift, they are not infringed by the heels made by the Essex Company, which are not three-point-contact lifts, their upper side edges having no vertical curve and lying entirely in the same horizontal plane as the rear edge and breast corners. Nor can they be held to be infringements even if we assume that, as asserted, they function in the same manner as three-point-contact lifts, and would infringe, as was conceded in the district court, if the claims were not restricted by the limiting clause and were entitled to a construction warranting a wide range of equivalents. By the limitation of the claims in the Patent Office proceeding to the three-point-contact lift the patentee made this precise form a material element, and having thus narrowed the claims, can not, as was said in the Weber Electric Company case, now enlarge their scope by a resort to the doctrine of equivalents. This would render nugatory the specific limitation.

The decree is accordingly affirmed.

Rubber Co.*, 268 Fed. 250; *Hill Rubber Heel Co.* v. *I. T. S. Rubber Co.*, 269 Fed. 270; and *I. T. S. Rubber Co.* v. *Tee Pee Rubber Co.*, 288 Fed. 794, in the sixth circuit; and *United States Rubber Co.* v. *I. T. S. Rubber Co.*, 288 Fed. 786, in the seventh circuit.

Court of Appeals of the District of Columbia.

IN RE CLARK.

No. 1,891. Decided February 7, 1927.

PATENTABILITY—CLAIMS—NEW COMBINATION PATENTABLE.

Where applicant's claims 11 to 19 included a rubber paving block of uniform thickness having on its lower surface projections arranged in spaced relation both lengthwise and crosswise of the surface, and in the patents to A. and F. the blocks do not have uniform thickness while in the patents to A. and D. the projections are spaced in one direction only, *Held* that applicant in combining a block of uniform thickness with projections which interlock with a base and prevent creeping in both directions is entitled to protection and the claims are patentable.

APPEAL from the Patent Office. Affirmed in part.

Mr. E. C. Seward for Clark.

Mr. T. A. Hostetler for the Commissioner of Patents.

Before MARTIN, Chief Justice, and ROBB and VAN ORSDEL, Associate Justices.

VAN ORSDEL, *J.*:

Appellant Clark appeals from the decision of the Commissioner of Patents denying the patentability of claims 11 to 28 for an invention relating to paving or flooring composed of rubber. Claims 11 and 20 illustrate the invention in issue, and read as follows:

11. A paving or flooring element composed of rubber having a continuous upper surface and projections on its lower surface for engagement with a support, said projections being arranged in spaced relation both lengthwise and crosswise of the lower surface of the element.

20. In combination with a relatively hard support, a paving or flooring element composed of rubber having a continuous upper surface and projections on its lower surface for engagement with said support, said projections being arranged in spaced relation both lengthwise and crosswise of the lower surface of the element.

The claims in issue call for a paving block with a continuous upper surface of rubber, disclosed to be of equal and uniform thickness, and projections on its lower surface which interlock the rubber with the base, separate from each other, both longitudinally and transversely of the block, so as to form lugs or studs. The support to which the rubber surface is attached may consist of an iron base which in turn is embedded in, or rests upon, a plastic concrete layer. Or the rubber surface may be embedded directly upon a concrete layer, excluding the necessity of the iron support element.

It was held by the Board of Examiners in Chief that appellant in his specification did not show a structure which would dispense with the iron base, and that he could not, therefore, make claims 11 to 19 inclusive, dispensing with the iron base, for want of support in his original disclosure. This ruling of the Examiners in Chief was properly reversed by the Commissioner, holding:

The block is an element of the combination, and I see no reason for objecting to a claim which is broad enough to include such rubber block, whether it is connected to an iron base or not. Obviously, the block has its utility independently of the iron support, and it is immaterial that appellant did not state this fact in his original specification.

On this conclusion the Commissioner held that all claims of the type embodied in the first group, 11 to 19 inclusive, are sufficient to warrant the allowance if they are otherwise patentable. He then proceeded to deny the patentability of all the claims in issue, in view of the prior art.

The prior art does not disclose a block consisting of a rubber surface of uniform thickness, except in the Dessau patent [No. 1,233,200]. The references to the patents to Farmer [No. 788,458], Dessau and Anderson [No. 1,280,363], all disclose a block supported on an iron base. In Anderson the rubber block is attached to the iron support by ribs and interlocking grooves in the iron, thus destroying the uniformity of thickness of the rubber, and with nothing to prevent the creeping of the tread along the uniform direction of the ribs and grooves. Appellant's device consists of a block of uniform thickness so adjusted to the support as to prevent the tread against movement in any direction with respect to the supporting element.

Dessau discloses a block of uniform thickness with parallel ribs extending underneath and across the block to be embedded in the iron support, but like the Anderson device, these ribs are separated from each other only in one direction, with nothing to prevent the creeping of the tread along the direction of the ribs.

In the Farmer patent there is disclosed an interlocking tread consisting of projections from the metal support extending up into the rubber block, thereby destroying the uniform thickness of the block, which is one of the chief elements of utility in appellant's device.

We are of opinion that appellant in combining a block of uniform thickness with an interlocking means of attachment to the base, which will prevent the creeping of the tread in any direction, and which so provides the disposition of the points of contact between the rubber element and its support as to clearly increase its utility, strength, and endurance over anything disclosed in the prior art, is entitled to protection.

It appears, however, that claims 20 to 28 were presented for the purpose of avoiding the effect of the Examiner's rejection of claims 11 to 19, and they differ from claims 11 to 19 only in that they specify the "combination with a relatively hard support." Inasmuch as the holding of the Commissioner, which we have approved, that claims 11 to 19 may be read to this extent on appellant's original disclosure, we think that claims 20 to 28 inclusive may be eliminated.

The decision of the Commissioner rejecting claims 11 to 19 inclusive is reversed; and his decision rejecting claims 20 to 28 inclusive is affirmed.

PATENT SUITS.

ADVERSE DECISIONS IN INTERFERENCE.

In interferences involving the indicated claims of the following patents final decisions have been rendered that the respective patentees were not the first inventors with respect to the claims listed:

Pat. 1,475,880, W. J. Rickets, Controlling and regulating system for dynamos, decided May 10, 1927, claims 1, 2, 3, 4, 5, 6, and 7.

Pat. 1,544,373, G. Claude, Method for the direct synthesis of ammonia, decided April 28, 1927, claims 12 and 14.

Pat. 1,550,858, R. J. Winsor, Scarifier, decided May 21, 1927, claims 1 and 2.

Pat. 1,561,469, A. B. Kendall, Exhaust-control mechanism for air-brake system, decided May 16, 1927, claims 9, 11, 12, 13, and 14.

Pat. 1,563,731, C. Ducas, Electrical apparatus and method of manufacturing same, decided May 20, 1927, claims 1, 4, 5, 8, and 9.

Pat. 1,571,216, L. D. Soubier, Method of and apparatus for forming glass tubing, decided May 16, 1927, claims 4, 7, 8, 9, 10, 11, 13, 14, 16, 17, and 18.

Pat. 1,588,501, F. G. Shelain, Knitting machine, decided June 10, 1927, claims 5, 7, 21, 26, and 31.

Disclaimers.

DES. 71,347.—*Edward A. Zeh*, Passaic, N. J. A DISPLAY GLOBE. Patent dated October 26, 1926. Disclaimer filed June 11, 1927, by the patentee.

Hereby enters the following disclaimer, namely:

That he disclaims from the scope of the claim in U. S. Design Patent No. 71,347 of October 26, 1926, the design appearing upon the face of the globe illustrated in said patent, and consisting of a broken circle across the middle of which are two horizontal bars, and stipulates that said bar and circle design constitutes no portion whatever of said patented design, having been used merely for illustrative purposes to show the manner in which any such trade-mark design might be shown on globes of this kind.

1,589,274.—*George H. Wadsworth*, Akron, Ohio. TIRE-SPREADING DEVICE. Patent dated June 15, 1926. Disclaimer filed June 14, 1927, by the patentee.

Therefore enters this disclaimer to that part of the claims in said specification, which is in the following words and numerals, to wit:

"1. A tire spreading tool comprising in combination, a shaft having a right hand threaded portion and a left hand threaded portion, a jaw associated with each threaded portion, said jaws being adapted to engage the inside walls of a tire, and means adjacent one end of the shaft for rotating it and for effecting relative motion of said jaws along said shaft.

"2. A tire spreading tool comprising in combination, a threaded shaft having right and left hand threaded portions, a jaw associated with each threaded portion, and a crank for rotating the shaft.

"3. In combination, a shaft having a right hand threaded portion and a left hand threaded portion, a jaw associated with each threaded portion, a guide bar extending parallel to the axis of the shaft and being slidably engaged by each of said jaws when the shaft is rotated, but allowing movement of the jaws in a direction axially of the shaft, and means for rotating said shaft.

"4. A tire spreading tool comprising in combination spaced bearing blocks, a threaded shaft journaled in said blocks and extending therebetween, a guide member also extending between said blocks and parallel to the axis of the shaft, a jaw in threaded engagement with each threaded portion of said shaft, each jaw having a portion thereof slidably engaging said member, and a crank operatively associated with said shaft and mounted for turning movement outside one of said blocks."

TRADE-MARKS

OFFICIAL GAZETTE, JUNE 28, 1927.

[VOL. 359. No. 4.]

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication.

Marks applied for "under the ten-year proviso" are registrable under the provision in clause (b) of section 5 of said act as amended February 18, 1911.

As provided by section 14 of said act, a fee of ten dollars must accompany each notice of opposition.

Ser. No. 204,496. (CLASS 13. HARDWARE AND PLUMBING AND STEAM-FITTING SUPPLIES.) A. M. BYERS COMPANY, Pittsburgh, Pa. Filed Oct. 28, 1924.

Trade-mark consists of a stripe of uniform width arbitrarily disposed spirally on the metal pipe, no claim being made to the representation of the metal pipe.

Particular description of goods.—Metal Pipe.

Claims use since Oct. 4, 1924.

Ser. No. 206,113. (CLASS 38. PRINTS AND PUBLICATIONS.) DICTAPHONE SALES CORPORATION, New York, N. Y. Filed Dec. 2, 1924.

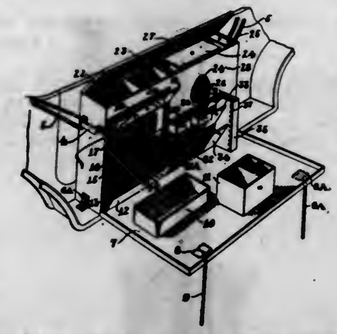
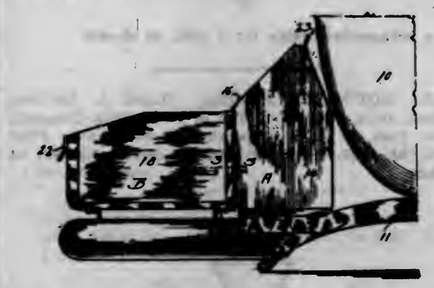
REISSUES

JUNE 28, 1927.



16,663. TRAIN-CONTROL DEVICE. THOMAS H. THOMAS, Edgewood, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Mar. 7, 1927. Serial No. 173,504. Original No. 1,569,155, dated Jan. 12, 1926, Serial No. 701,377, filed Mar. 24, 1924. 8 Claims. (Cl. 303—20.)



1. In an electric circuit controlling mechanism, the combination with two rotating elements, each carrying a plurality of contact segments, of a contact engaging the contact segments of each rotating element and adapted to maintain an electric circuit closed so long as said elements rotate in synchronism, the circuit being opened upon failure of one element to rotate.

16,664. TOURIST'S KITCHENETTE OR CABINET. LOU SHIELDS GILMORE, Los Angeles, Calif., assignor, by mesne assignments, to Tourist Supply Company, Los Angeles, Calif., a Corporation of Delaware. Filed Jan. 19, 1925. Serial No. 3,508. Original No. 1,502,096, dated July 22, 1924, Serial No. 588,596, filed Sept. 16, 1922. 2 Claims. (Cl. 190—12.)

1. A device of the character stated comprising a casing, a closure at the front, a multiplicity of compartments accessible when said closure is open, a hinged top and compartments accessible when said top is opened, said compartments including an ice receptacle and a drinking-water container, a series of compartments intermediate the front and top compartments, and an independent closure therefor, said last named closure being in position to be concealed by the first named closure when closed.

16,665. AUTOMOBILE TRUNK. ERNEST A. ARNDT, Sioux City, Iowa. Filed May 26, 1927. Serial No. 194,269. Original No. 1,594,235, dated July 27, 1926, Serial No. 51,621, filed Aug. 21, 1925. 15 Claims. (Cl. 224—29.)

1. A trunk of the class described, comprising a fixed trunk member, open at the rear and adapted to be rigidly secured to the rear portion of a vehicle, a movable trunk member adapted to move relative to the fixed trunk member, to disclose the contents thereof, to a substantially horizontal position serving, in conjunction with the fixed trunk member, as a luggage carrier in that position, and a spare tire carrier secured to the movable trunk member and movable therewith.

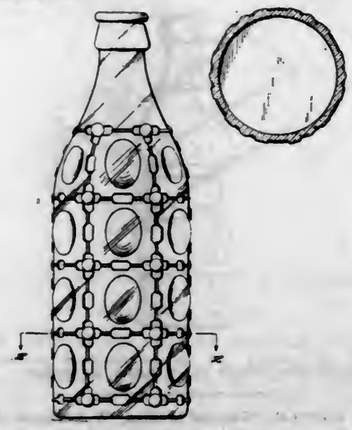
The ornamental design for a box, as shown.

72,953. CIGARETTE HOLDER. JOE M. MARTINEZ, Detroit, Mich. Filed Feb. 27, 1926. Serial No. 16,691. Term of patent 14 years.

The ornamental design for a cigarette holder as shown.

72,954. BOTTLE. GEORGE N. MAS, Washington, D. C. Filed May 6, 1926. Serial No. 17,579. Term of patent 14 years.

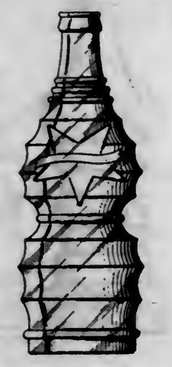


The ornamental design for a bottle, as shown.

72,955. BOTTLE. GEORGE N. MAS, Washington, D. C. Filed May 6, 1926. Serial No. 17,580. Term of patent 14 years.

The ornamental design for a bottle, as shown.

72,956. BOTTLE. GEORGE N. MAS, Washington, D. C. Filed May 6, 1926. Serial No. 17,581. Term of patent 14 years.



The ornamental design for a bottle, as shown.

72,957. BOTTLE. GEORGE N. MAS, Washington, D. C. Filed May 11, 1926. Serial No. 17,641. Term of patent 14 years.

The ornamental design for a bottle, as shown.

72,958. BOTTLE. GEORGE N. MAS, Washington, D. C. Filed May 11, 1926. Serial No. 17,645. Term of patent 14 years.

The ornamental design for a bottle, as shown.

72,959. BOTTLE. GEORGE N. MAS, Washington, D. C. Filed May 11, 1926. Serial No. 17,646. Term of patent 14 years.

The ornamental design for a bottle, as shown.

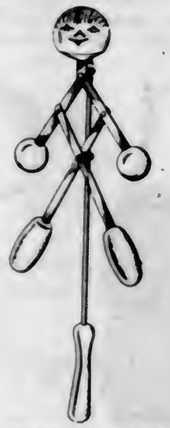
72,960. BOTTLE. GEORGE N. MAS, Washington, D. C. Filed May 11, 1926. Serial No. 17,648. Term of patent 14 years.

The ornamental design for a bottle, as shown.

72,961. BOTTLE. GEORGE N. MAS, Washington, D. C. Filed May 11, 1926. Serial No. 17,650. Term of patent 14 years.

The ornamental design for a bottle, as shown.

72,962. BOTTLE. GEORGE N. MAS, Washington, D. C. Filed May 11, 1926. Serial No. 17,651. Term of patent 14 years.

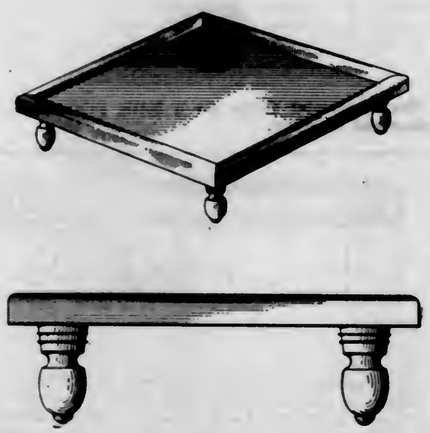


The ornamental design for a bottle, as shown.

72,963. BOTTLE. GEORGE N. MAS, Washington, D. C. Filed May 11, 1926. Serial No. 17,653. Term of patent 14 years.

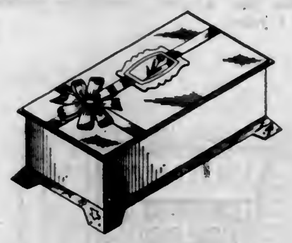
The ornamental design for a bottle, as shown.

72,964. JOINTED FIGURE TOY. CHARLES HAMILTON PAJEAU, Glencoe, Ill., assignor to The Toy Tinkers, Inc., Evanston, Ill., a Corporation of Illinois. Filed Oct. 6, 1926. Serial No. 19,252. Term of patent 3½ years.



The ornamental design for a jointed figure toy, as shown.

72,965. POCKET LIGHTER. ALFRED F. REILLY, Attleboro, Mass., assignor to Evans Case Company, North Attleboro, Mass., a Corporation of Massachusetts. Filed Mar. 9, 1927. Serial No. 21,071. Term of patent 7 years.

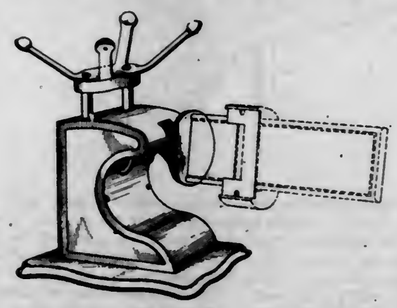


The ornamental design for a pocket lighter as shown.

72,966. TRAY. FLORENCE M. ROSIN, Philadelphia, Pa. Filed Feb. 3, 1927. Serial No. 20,600. Term of patent 8½ years.

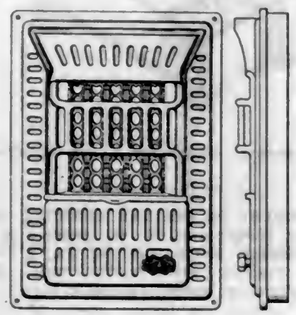
The ornamental design for a tray, as shown.

72,967. BOX. FRANK J. SCHLEICHER, St. Louis, Mo. Filed Apr. 2, 1927. Serial No. 21,436. Term of patent 7 years.



The ornamental design for a box, substantially as shown.

72,968. GOBLET OR SIMILAR ARTICLE. ERNEST C. SCHRADER, Morgantown, W. Va., assignor to Economy Glass Company, Morgantown, W. Va., a Corporation of West Virginia. Filed Jan. 31, 1927. Serial No. 20,553. Term of patent 3½ years.

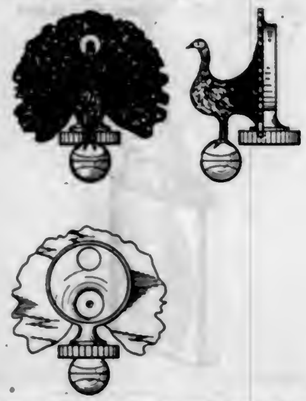


The ornamental design for a goblet, or similar article as shown and described.

72,969. SCALE CASING. FRANK A. SCHULTZ, Chicago, Ill., assignor to Pelouse Manufacturing Co., Chicago, Ill., a Corporation of Illinois. Filed Mar. 14, 1927. Serial No. 21,181. Term of patent 14 years.

The ornamental design for a scale casing as shown.

72,970. GAS HEATER. WILLIAM L. SHARP, Steubenville, Ohio, assignor to The Ohio Foundry and Manufacturing Co., Steubenville, Ohio, a Corporation of Ohio. Filed Mar. 4, 1927. Serial No. 20,968. Term of patent 7 years.



The ornamental design for a gas heater, as shown.

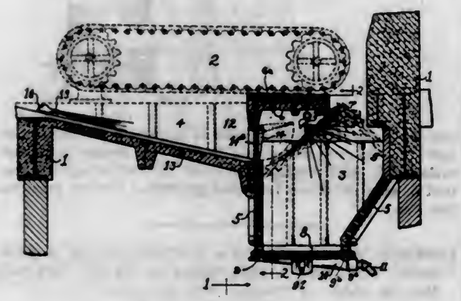
72,971. RING. ARTHUR STELLER, Newark, N. J., assignor to Allsopp Bros., Newark, N. J., a Corporation of New Jersey. Filed Apr. 29, 1927. Serial No. 21,793. Term of patent 3½ years.

The ornamental design for a ring as shown.

72,972. RADIATOR CAP. MAXWELL STOCKMAN, Kansas City, Mo. Filed Mar. 31, 1926. Serial No. 17,129. Term of patent 7 years.

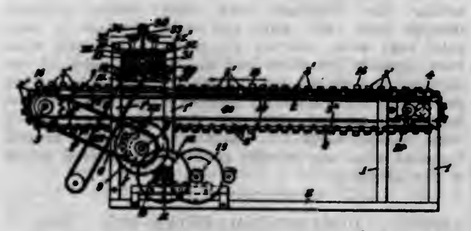
The ornamental design for a radiator cap, as shown.

72,973. BOTTLE. MAURICE S. WALKER, Brookline, Mass. Filed June 17, 1926. Serial No. 18,072. Term of patent 3½ years.



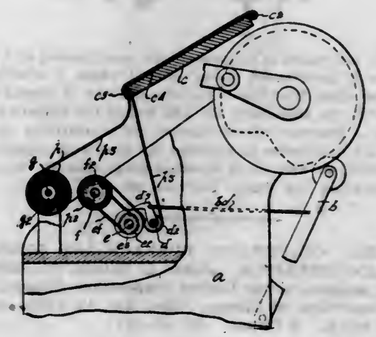
The ornamental design for a bottle substantially as shown and described.

PATENTS



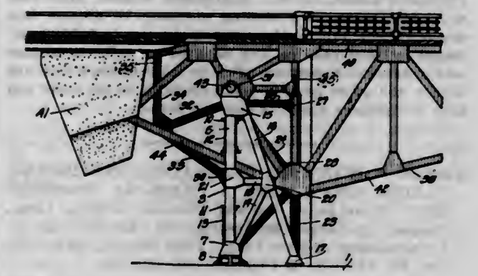
GRANTED JUNE 28, 1927.

1,633,562. HOPPER CONSTRUCTION. FRANK B. ALLEN, Cynwyd, Pa., assignor, by mesne assignments, to Frank H. Dunbar, Cleveland, Ohio. Filed June 20, 1924. Serial No. 721,319. 8 Claims. (Cl. 110—171.)



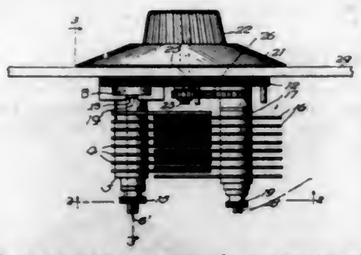
4. A hopper construction comprising a main hopper having an opening in the lower portion thereof, a solid material retaining closure for the said opening, a supplemental hopper adjacent to the main hopper and communicating therewith, means for discharging liquid into each hopper, means for discharging liquid from the supplemental hopper into the main hopper, and means including the said closure for collecting and conducting away water passing through the said opening.

1,633,563. SHINGLE-ABRADING MACHINE. CHARLES M. ABBOTT, Watertown, Mass., assignor to Samuel Cabot, Inc., Boston, Mass., a Corporation of Massachusetts. Filed Oct. 16, 1925. Serial No. 62,929. 6 Claims. (Cl. 144—13.)



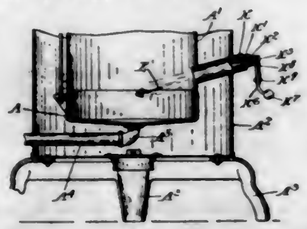
1. A machine for abrasively removing a portion of the softer layers of a sawed shingle while leaving the harder intermediate layers exposed in relief, comprising a rotary abrading device, a conveyor for successively advancing a plurality of shingles past said abrading device while maintaining one surface of the shingle substantially parallel to the line of shingle travel, and means for intermittently moving said conveyor and abrading device relative to each other while a shingle is disposed therebetween whereby to regulate the depth of cut.

1,633,564. PRINTING PRESS. REED ADAMS, Detroit, Mich. Filed Oct. 17, 1923. Serial No. 669,019. 2 Claims. (Cl. 101—407.)



1. The process of printing circular letters consisting in printing the body of the letter from a permanent form and the address from a type inserted in place at each operation of the press, and providing a new tympan surface at each operation of the press.

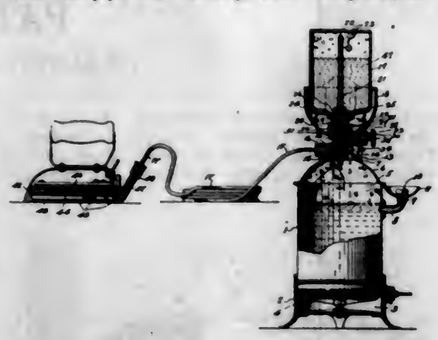
1,633,565. BASCULE BRIDGE. LOUIS R. ASH, HENRY C. TAMMEN, and HARRY G. HUNTER, Kansas City, Mo. Filed Sept. 7, 1926. Serial No. 133,816. 8 Claims. (Cl. 14—36.)



1. In a bascule bridge, spaced trunnion posts, bearings on said posts, a live load supporting member on and forward of the posts, an approach support extending in the opposite direction and supported by said posts, a movable span comprising side trusses and pivot members having mounting in said bearings, and a transverse girder connecting the trusses and adapted to seat on said supporting member when the span is in load carrying position.

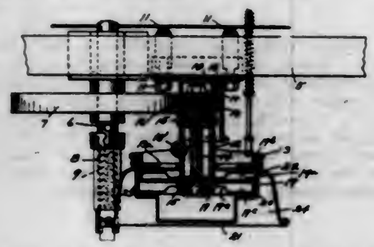
1,633,566. ELECTRICAL CONDENSER. WALTER A. BOCKIUS, Park Ridge, Ill. Filed Feb. 13, 1925. Serial No. 8,889. 8 Claims. (Cl. 175—41.5.)

1. In an electrical condenser, the combination of a pair of sets of interleaved plates, one of which is stationary and the other freely movable into and out of lapped relation with the stationary set, and means for adjusting one set in a substantially rectilinear path relatively to the other set to increase or decrease the maximum capacity of the condenser and so as to effect proportionate variation by operating the freely movable set.



1,633,567. OIL-BURNING FURNACE AND IGNITION MEANS THEREFOR. JAMES L. BREESE, Jr., Chicago, Ill., assignor to Oil Devices Corporation, Chicago, Ill., a Corporation of Illinois. Filed Mar. 12, 1926. Serial No. 94,142. 9 Claims. (Cl. 67—12.)

1. An ignition device for fuels adapted to be burned in a closed burner, which includes a guide passage apertured to receive an inflammable member, a holder for said inflammable member, positioned in said guide passage, propulsive means, for said inflammable member, associated with said holder and tending normally to project said member from said holder, and a friction member positioned in said passage and adapted initially to engage said inflammable member prior to its discharge into the burner, the guide passage being provided at its inner end with a discharge aperture into the burner.

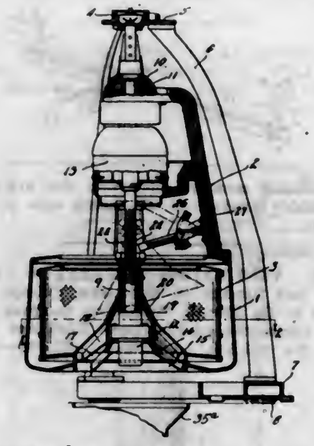


1,633,568. MEANS FOR GENERATING AND IMPREGNATING STEAM WITH A CHEMICAL CONSTITUENT. CHARLES A. BREWER, Noroton Heights, Conn., assignor to Cannon Engineering Co., Brooklyn, N. Y., a Corporation of New York. Filed Nov. 28, 1924. Serial No. 752,573. 3 Claims. (Cl. 167—3.)

1. The combination with a steam generator, of a separable chemical container having a perforable closure, means for supporting said container in operative relation to said generator, a vent-pipe connected with said supporting means so as to project exteriorly above said supporting means, said vent-pipe having a piercing point at its upper free end adapted to pierce the perforable closure of said container to permit said vent-pipe to project upwardly within the latter to a point above the level of the content thereof, said vent-pipe having a perforate upper end portion, said vent-pipe affording a mutually intercommunicating means between said generator and container to equalize the internal pressures therein, a discharge sleeve connected with said supporting means in concentric spaced relation to the lower exterior portion of said vent-pipe, said discharge sleeve being adapted to

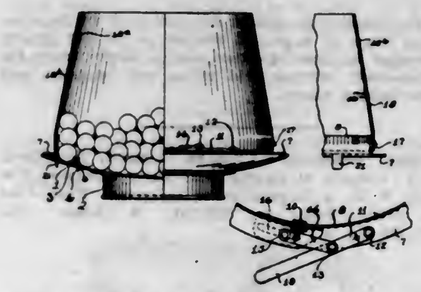
penetrate the container closure to provide a discharge passage for the content of the latter, and means communicating with said discharge passage for delivering the content of said container into said generator for the purposes described.

1,633,569. SIREN. WILLIAM J. CAMMACK, Los Angeles, Calif. Filed Sept. 2, 1925. Serial No. 54,020. Renewed May 20, 1927. 4 Claims. (Cl. 116—38.)



3. In a siren, in combination with a driving member, a movable supporting member, a siren revolubly mounted in said supporting member, said siren having a part adapted to be moved into and out of engagement with said driving member, said siren also having a body with two chambers partitioned from each other, said chambers having inlet openings near their central portions through their outer walls and outlet openings in their outer edge walls, whereby air is drawn into said siren from opposite directions and on opposite sides of the partition and thrown out through the edge walls, means for moving said supporting member to put said part into driving engagement with said driving member, and a brake member adapted to operate on said siren to stop the same when said movable supporting member is moved in one direction.

1,633,570. DUMP-BOTTOM EXTRACTOR. EMIL J. CARROLL, Norwood, Ohio, assignor to The American Laundry Machinery Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Nov. 22, 1924. Serial No. 751,559. 18 Claims. (Cl. 210—74.)

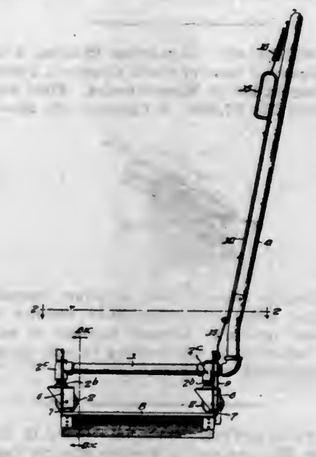


1. An extractor, comprising a work receiving basket rotatable in both forward and reverse directions and provided with a discharge opening, a rotatable closure for said basket opening movable to and from the same to respectively cover and expose said opening, means for preventing rotary movement of said closure so that rotation of said basket provides relative rotary movement therebetween, and means for producing movement of said closure to or from said basket opening during such

relative rotary movement of said closure and said basket, the parts being so constructed and arranged that forward rotation of said basket tends to move said

closure toward said basket opening and reverse rotation of said basket tends to move said closure away from said basket opening.

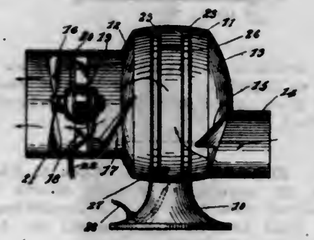
1,633,571. FRUIT PACKER. RAYMOND P. CLARK, Rochester, N. Y., assignor to Clark Paper & Manufacturing Co., Rochester, N. Y., a Corporation of New York. Filed Jan. 26, 1927. Serial No. 163,826. 16 Claims. (Cl. 226—17.)



1. A facing form for fruit packers having an annular guide wall extending upwardly from the face of said form and spaced at its edge from the edge of the form to provide on the outer side of the ring a surface on which a ring of fruit may be arranged, the surface of the form within said guide wall being smooth.

7. A fruit packer comprising a facing form, and an expansible liner holding means for supporting a liner on the form.

13. In a fruit packer, the combination with a facing form, of a liner holder having detachable connection with the facing form and having means for effecting engagement with the liner while the holding means is detached from the facing form.



1,633,572. TRACK DETECTOR. GEORGE C. CLEVELAND, Cleveland, Ohio. Filed May 8, 1924. Serial No. 711,924. 4 Claims. (Cl. 88—14.)

1. A track detector, comprising a carriage adapted to traverse a track rail, and reflecting means carried by said carriage in position to reflect to the view of an observer, at a position above the track, a surface of the rail being traversed, which is normally obscured from view; said reflecting means being movable upon the carriage at will to establish such reflecting position, while

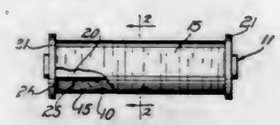
traversing the rail, and means for manipulating said reflecting means extending from the reflecting means to within reach of the observer when at his position of observation.

1,633,573. ELECTRIC HEATER. AUBREY WILL DANIEL, New Orleans, La. Filed July 1, 1926. Serial No. 119,795. 3 Claims. (Cl. 219—42.)

1. An electric heater comprising a standard, a cylinder mounted on a horizontal axis thereon, said cylinder having an inlet and outlet of contracted area at its respective ends, said inlet being non-axial, a pair of spaced rings having opposed insulated openings fixed in said cylinder, heating grids disposed transversely in mentioned openings, and means in said outlet to draw air through the cylinder and grids and expel the same through the outlet.

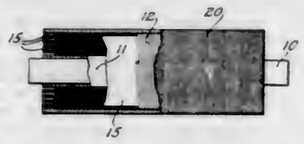
1,633,574. STRING INSTRUMENT. CLARENCE L. DEWEY, Elkhart, Ind. Filed June 26, 1926. Serial No. 118,617. 6 Claims. (Cl. 84—293.)

1. A string instrument comprising a body portion, a neck engaged thereon, a tail piece on said body portion, strings connected to said tail piece and to said neck, a skin head on said body portion, a bridge on said skin head for supporting said strings, a dowel having one end thereof rigidly secured to said neck and projecting



diametrically through said body portion, and means within said body portion for adjustably supporting the other end of said dowel to permit the neck to be adjusted with respect to said springs.

1,633,575. BRACELET. ALEXANDER EKLUND, Attleboro, Mass., assignor to General Chain Company, Providence, R. I., a Corporation of Massachusetts. Filed Sept. 22, 1925. Serial No. 57,909. 8 Claims. (Cl. 59—79.)



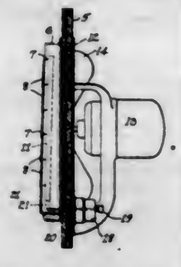
1. An extendible bracelet chain structure comprising a series of band links, connecting links therefor having separable jaws resiliently snapped together at one end, and means responsive to the doubling of said chain upon itself for separating said jaws.

1,633,576. PROTECTIVE COATING. CLEM H. FRANKS, La Grange, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Aug. 26, 1925. Serial No. 52,697. 16 Claims. (Cl. 175—21.)

16. An article of manufacture comprising an electrical coil and an imperforate covering therefor consisting of coalesced fibers of cellulose material reinforced by untreated fibers.

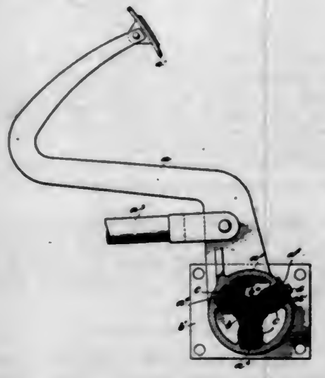
1,633,577. ELECTRICAL COIL. CLEM H. FRANKS, La Grange, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Dec. 22, 1925. Serial No. 76,956. 9 Claims. (Cl. 175—359.)

1. A method of producing electrical coils, which consists in arranging alternate layers of cellulose material and turns of an electrical conductor, and treating the cellulose material to coalesce the material and thereby cause the formation of an imperforate coating for the coiled conductor.



1,633,578. ELECTRIC SWITCH. HARRISON J. L. FRANK, Detroit, Mich., assignor to Mutual Electric and Machine Company, Detroit, Mich., a Corporation of West Virginia. Filed Sept. 17, 1921. Serial No. 501,368. 7 Claims. (Cl. 200—166.)

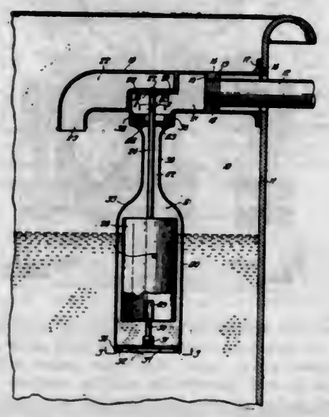
1. In combination, stationary switch contacts, movable knife-blade members adapted to engage therewith and formed with pairs of fingers along one edge, alined pivots for said knife-blade members, a metallic connector bar having forked ends and a shell of insulation adapted to be received between said fingers which are closed onto said bar and insulation, and an operating crank for



said knife-blade members comprising side arms adapted to be slidably received in the forked ends of the connector bar.

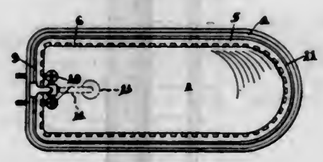
1,633,579. VENTILATING APPARATUS. JOHN M. FRANK and ARTHUR G. SUTCLIFFE, Chicago, Ill., assignors to Ilg Electric Ventilating Company, Chicago, Ill., a Corporation of Louisiana. Filed Apr. 14, 1926. Serial No. 101,859. 6 Claims. (Cl. 98—116.)

3. The combination with a fan, and a motor for driving the same, of a pivoted shutter, means for locking the shutter in closed position, and a single means for simultaneously starting said motor and releasing said shutter locking means.



1,633,580. BEARING. CHARLES FROESCH, New York, N. Y., assignor to International Motor Company, New York, N. Y., a Corporation of Delaware. Filed June 14, 1924. Serial No. 720,002. 6 Claims. (Cl. 287—93.)

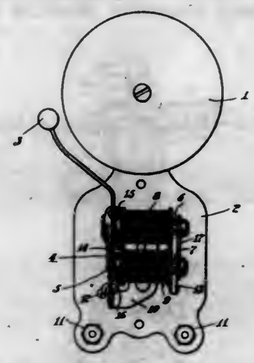
1. In combination, a shaft, a bearing support, a recessed seat comprising a socket shaped portion formed on the shaft, a cooperating seat formed in the bearing support, an aperture formed in the circumferential wall



of the bearing support in register with the seat, a closure for the aperture forming part of said last named seat, and a block of yielding non-metallic material retained between the seats under compression.

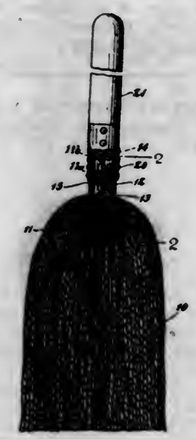
1,633,581. SAFETY FAUCET. CYRIL JOSEPH GORDON and DAVID D. GOLDBERG, Chicago, Ill. Filed Jan. 21, 1926. Serial No. 82,745. 8 Claims. (Cl. 137—104.)

5. In a faucet, a liquid supply tube, a valve controlling the discharge of liquid from said tube, a stem extending rigidly therefrom, a float carried by said stem and a housing carried by said tube, said housing comprising a float chamber having openings therein and having a passage extending from said tube to said chamber, said valve stem normally closing said passage.



1,633,582. BATHTUB. CHARLES T. E. GOULD, Toronto, Ontario, Canada. Filed June 2, 1926. Serial No. 113,210. 3 Claims. (Cl. 4—181.)

1. A rim member for a bath tub having a main waterway and an auxiliary waterway, said waterways being separated by a rib over which water may flow from the main waterway into the auxiliary waterway, said rib having a restricted passage formed therein through which the main waterway may be drained; and a water outlet from said auxiliary waterway.

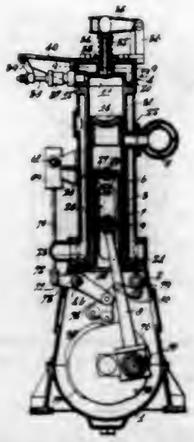


1,633,583. ELECTRIC BELL. WILLIAM F. HENDRY, Ossining, N. Y., assignor to Manhattan Electrical Supply Company, Incorporated, New York, N. Y., a Corporation of Massachusetts. Filed July 15, 1924. Serial No. 726,181. 2 Claims. (Cl. 175—21.)

1. The method of assembling electromagnets which consists in first punching two holes in a metal plate, the metal around the holes being drawn into rings of smaller diameter than the ends of the magnet cores,

then forcing the ends of magnet cores carrying the coils through the perforations, and finally mounting the magnet by means of said plate.

1,633,584. WET MOP. WILLIAM HERTZBERG, Brooklyn, N. Y. Filed Sept. 27, 1926. Serial No. 138,020. 6 Claims. (Cl. 15—228.)



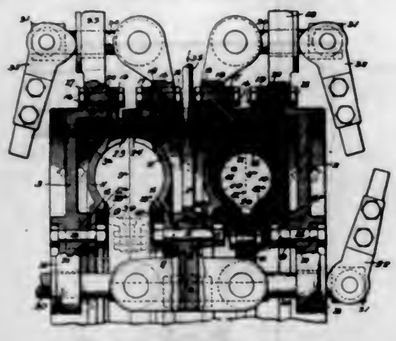
1. A mop comprising cords, a wire formed into a loop adapted to hold said cords, the end portions of said wire being wound about each other to form a stem on said loop, a tubular bushing surrounding said stem, a threaded ferrule covering the upper end of said bushing forming means to attach said mop to the socket of a mop stick and means formed by said wire to lock said loop to said ferrule.

1,633,585. TWO-CYCLE INTERNAL-COMBUSTION ENGINE. LEONARD V. HOSFORD and DAVID DAVIDSON, Portland, Oreg., assignors, by mesne assignments, to Hosford Motor Construction Co., a Corporation of Oregon. Filed Dec. 19, 1924. Serial No. 757,064. 9 Claims. (Cl. 123—74.)

1. In two cycle internal combustion engines having piston controlled exhaust and by-pass ports and ducts, a cylinder head having a centrally located air port with a valve seat and having a compression space, a scavenging valve in said head to deliver air from the by-pass into

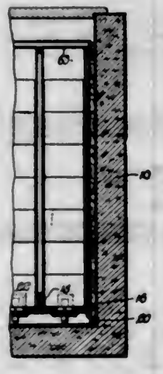
the working chamber, means causing the working piston to draw a fresh air charge into itself on one stroke and deliver it compressed to the by-pass duct on another stroke and again compressing the air in the working

chamber, a fuel valve on the head for injecting fuel crosswise of the head into the compressed air within the compression space of the engine, and an auxiliary valve connected with the by-pass duct for delivering compressed starting air at times.



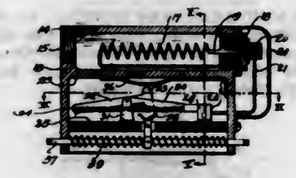
1,633,586. SUDATORY RECEPTOR PAD. WILLIAM A. HUNTER, West Orange, N. J. Filed Oct. 9, 1922. Serial No. 593,252. 2 Claims. (Cl. 2—171.)

1. A device of the character described, including a pad formed of absorbent material, said pad having one longitudinal edge substantially straight and the other longitudinal edge converging from its center toward the ends of said first-mentioned edge, and means secured to the ends of said pad adjacent said straight edge for securing the pad in position, whereby tension on said securing means holds said straight edge in snug engagement with the body and the other edge in spaced relation to the body.



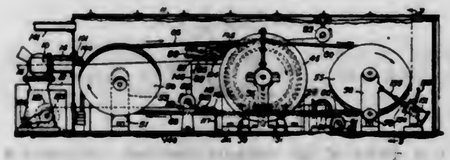
1,633,587. TIRE-VULCANIZING DEVICE. KARL B. KILBORN and WILLIAM S. WOLFE, Akron, Ohio, assignors to Seiberling Rubber Company, Akron, Ohio, a Corporation of Delaware. Filed Nov. 15, 1922. Serial No. 601,045. 3 Claims. (Cl. 18—38.)

1. A tire vulcanizing device comprising a central casing member having an annular cavity open at its opposite sides and defined by inner and outer walls having annular side seating surfaces, annular mold sections formed at their inner and outer edges with surfaces adapted to seat against said seating surfaces on the central casing member so as to close the open sides of the cavity and form in connection therewith a central heating chamber, releasable fastening devices engaging the edges of the mold sections and the inner and outer walls of the casing member and acting to hold the mold sections detachably in place, side casing members hinged to said central casing member and provided each with a cavity opening inwardly and defined by inner and outer marginal walls and an outer side wall, said marginal walls having annular side seating surfaces, an annular



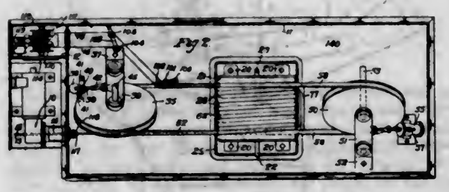
mold section applied to and closing the inner side of the cavity of each side casing member, said mold section being formed at its inner and outer edges with surfaces adapted to seat against the seating surfaces on its associated casing member and forming in connection therewith an annular heating chamber, and releasable fastening devices engaging the inner and outer edges of the last mentioned mold sections and the inner and outer walls of the outer casing members, and acting to hold said mold sections detachably in place.

1,633,588. ICE-CREAM CABINET. EDWARD KLINENBERG, Chicago, Ill. Filed Apr. 30, 1923. Serial No. 635,516. 1 Claim. (Cl. 211—8.)



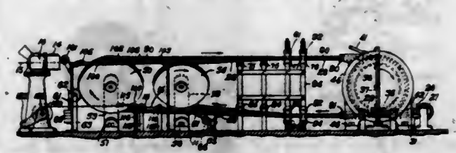
In a dispensing cabinet for bricks of ice cream in cartons, in combination, outer insulating walls, inner container walls spaced therefrom, a water tight lateral passageway out from the bottom of said container, a plurality of shelves in said passageway extending across the bottom of said container, a plurality of magazines in said container resting on said shelves, a plurality of slides, one below each magazine, said shelves having an upwardly extending portion which acts as a spacer between said magazine and horizontal leg portions, the horizontal legs of each shelf having their free edges reversely bent to form a guide for said slides.

1,633,589. THERMOSTATICALLY-CONTROLLED HEATING ELEMENT. LEWIS H. LAMONT, Chicago, Ill. Filed Feb. 12, 1925. Serial No. 8,041. 7 Claims. (Cl. 219—38.)



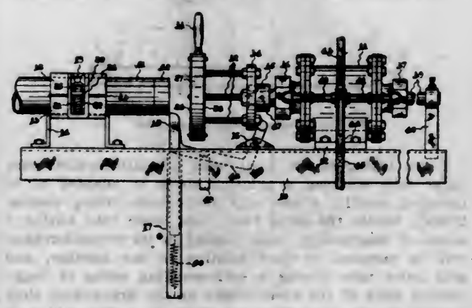
1. A fuel heating device comprising an electrical heating element, a switch controlling said heating element, a snap-over mechanism controlling said switch, and a thermostat adapted to actuate said snap-over mechanism to open the switch at a predetermined temperature.

1,633,590. METHOD OF AND APPARATUS FOR VULCANIZING RUBBER. LESLIE FAWCETT LAMPLOUGH, Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Oct. 25, 1923. Serial No. 670,691. 13 Claims. (Cl. 18—53.)



1. The method of vulcanizing material, which consists in progressively subjecting each portion of said material to mechanical pressure and then gaseous pressure during the subjection of the material to the requisite temperature and for the requisite time to vulcanize it.

1,633,591. METHOD OF AND APPARATUS FOR VULCANIZING MATERIAL. LESLIE FAWCETT LAMPLOUGH, Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Oct. 25, 1923. Serial No. 670,692. 9 Claims. (Cl. 18—53.)



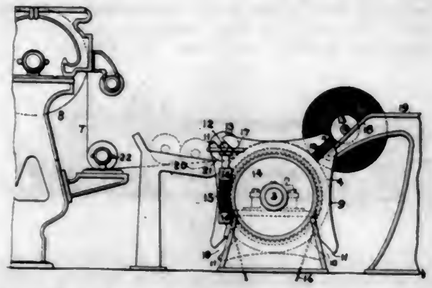
1. In a vulcanizing apparatus, means for vulcanizing strand material, a track, a conveyor for conveying a strand through the vulcanizing means, and an independent train of rollable elements for reducing the friction between the conveyor and the track.

1,633,592. METHOD OF AND APPARATUS FOR VULCANIZING MATERIAL. CARL DEMPSTER HART, La Grange, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Oct. 25, 1923, Serial No. 670,693. Renewed May 6, 1927. 10 Claims. (Cl. 18—53.)

1. A method of vulcanizing strand material, which consists in continuously feeding a strand into an endless mold, and thereafter continuously passing the mold through a supply of steam to vulcanize the strand.

1,633,593. CORE-TIP-REMOVING MACHINE. ERNEST LARBALESTER, Fort William, Ontario, Canada, assignor to Fort William Paper Co., Limited, Fort William, Ontario, Canada. Filed Nov. 5, 1925. Serial No. 67,071. 10 Claims. (Cl. 29—88.2.)

1. In a core-tip removing machine, a clamp adapted to frictionally engage and hold the core, a removing member comprising a head having an opening therein of approximately the diameter of a core tip, tip-engaging means movable axially of the core to engage behind the rim of the core tip, means for actuating said tip engaging means to and from the core, and means for axially moving the core and core-tip removing means relative to one another.



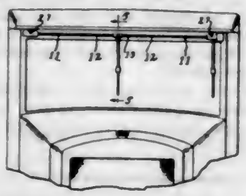
1,633,594. RETTED BAGASSE FIBER AND PROCESS OF PRODUCING SAME. ELBERT C. LATHROP, Philadelphia, Pa., and TREADWAY B. MUNROE, Forest Glen, Md., assignors, by direct and mesne assignments, to Dahlberg & Company, Inc., Chicago, Ill., a Corporation of Delaware. Filed June 20, 1924. Serial No. 721,366. 18 Claims. (Cl. 92—5.)

1. The process of preparing fiber producing material for the production of pulp which consists in subjecting said material to the fermenting action of micro-organisms of the mushroom type.

1,633,595. DEVICE FOR MAKING ROLLS OF PAPER. HARRY LIEBECK, Swarthmore, Pa., assignor to Scott Paper Company, a Corporation of Pennsylvania. Filed Aug. 15, 1923. Serial No. 657,535. 13 Claims. (Cl. 242—65.)

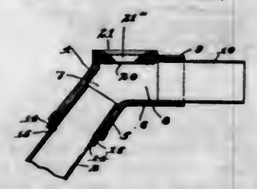
10. In a mechanism of the class described, in combination with a contact drum for propelling web material, a

rotatable member for supporting a plurality of reels for simultaneous co-action with said drum, and means on



said rotatable member for permitting movement of said reels away from said drum as the web material is wound on said reels.

1,633,596. ADJUSTABLE DELIVERY INK CONTAINER FOR ROTARY DUPLICATORS. LÉON LOUIS LIEVENS, Nanterre, France, assignor to La Société d'Etudes, Constructions et Applications Mecaniques, Paris, France. Filed Aug. 23, 1926, Serial No. 131,049, and in France Nov. 4, 1925. 4 Claims. (Cl. 101—119.)

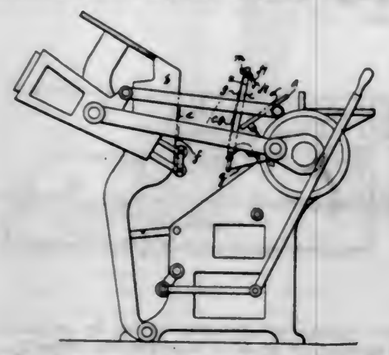


1. An inking device, comprising a relatively-stationary outer tube whereon a printing roller is adapted to be mounted axially, a rotatable inner tube fitting concentrically within the outer tube; said inner tube having a series of longitudinal slots formed in its circumferential wall in successively-offset relation to one another, and said outer tube having a corresponding series of longitudinal slots of the same length as the first-named slots formed in its circumferential wall in a line which is parallel with the common axis of the tubes; and a handle member for rotating the inner tube secured to one end of that tube to bring any selected slot therein into registration with the corresponding slot in the outer tube to the exclusion of all the other slots, said handle having markings for the individual first-named slots to determine their registration positions.

1,633,597. WINDSHIELD WIPER. HOWARD E. MARSH, Lompoc, Calif. Filed Sept. 7, 1926. Serial No. 134,021. 5 Claims. (Cl. 15—253.)

1. A wind shield wiper comprising a sectional shaft, some of the shaft sections having right and left screw threads, the end sections having grooves connecting the adjacent ends of the screw threads, a coupling means for each two adjacent shaft sections, a shoe, means to hold the shoe engaged with the threads as the shaft turns, a wiper bar connected with the shoe, means to rotatably support the shaft on a wind shield, a motor, means to secure the motor to said wind shield, and driving gearing connecting the motor with the shaft.

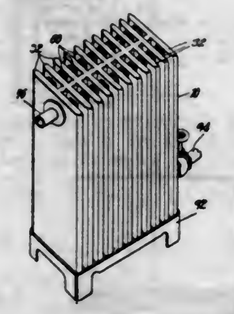
1,633,598. VACUUM-CLEANER DEVICE. STANLEY MCCLATCHIE, Cambridge, Mass., assignor to The Apex Electrical Manufacturing Company, Cleveland, Ohio, a Corporation of Ohio. Filed Apr. 7, 1921. Serial No. 459,394. 10 Claims. (Cl. 15—155.)



1. In vacuum cleaning apparatus, a hand nozzle formed for attachment to a hose and having an oblong inlet mouth for direct application to articles to be cleaned, in combination with a rigid hollow extension tube adapted to be secured to said first nozzle in non-leaking relation, and a suction tool carried by said extension tube, said hand nozzle constituting a handle for said tube and tool.

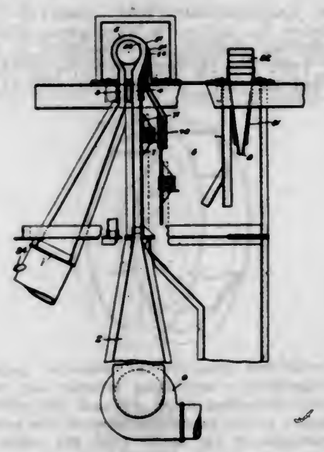
1,633,599. THERMOMETER. MAX E. MOELLER, Brooklyn, N. Y. Filed July 18, 1919. Serial No. 311,833. 3 Claims. (Cl. 73—52.)

1. A device of the character described, comprising a hollow casing, a thermometer mounted within said casing, and a resilient connection between said casing and the sides of said thermometer and surrounding the latter, said connection being secured to the casing at one point and secured to the thermometer at a point distant therefrom, and being of slightly less diameter than the internal diameter of the casing at the point of its connection with the said thermometer.



1,633,600. PRINTING PRESS. ROBERT S. MURPHY, Detroit, Mich., assignor to The Electrograph Company, Detroit, Mich., a Corporation of Michigan. Filed Mar. 25, 1926. Serial No. 97,223. 5 Claims. (Cl. 101—336.)

1. In an apparatus of the kind described, the combination of a frisket frame, a frisket thereon, the frisket frame having upper and lower cross bars, horisontal

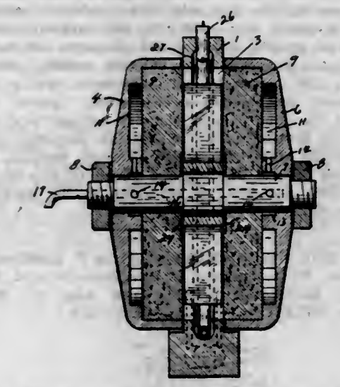


rollers adapted to be secured at various positions intermediate the ends of said cross bars, a vertically extending ribbon passing around said rollers and means for actuating said rollers to move the ribbon by the operation of the apparatus.

1,633,601. RADIATOR. THOMAS E. MURRAY, Brooklyn, N. Y. Original application filed June 7, 1923, Serial No. 643,941. Divided and this application filed Feb. 5, 1924. Serial No. 690,685. 2 Claims. (Cl. 257—139.)

2. A radiator comprising a vessel formed with a series of hollow ribs of thin sheet metal and having stiffening devices between said ribs forming air flues substantially closed in cross-section throughout their height.

1,633,602. DUST COLLECTOR. ARTHUR F. NESBIT, Wilkinsburg, Pa. Filed Dec. 2, 1925. Serial No. 72,760. 4 Claims. (Cl. 183—79.)

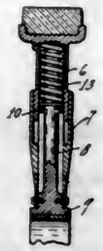


1. Means for effecting centrifugal segregation and separation of the components of a flowing stream which include a main conduit of undiminished cross-sectional area from its inlet to its outlet end, included between opposite parallel walls and curved on an axis to which such opposite walls are parallel, the walls of the conduit throughout the extent of the curve being (but for the opening to the branch conduit) continuous, a branch conduit opening through the wall of the main conduit on the outer side of the curve, such branch conduit being of increasing cross-sectional area and being curved in a widening spiral about the same axis, and means for causing fluid to stream through the conduit and the branch conduit.

1,633,603. AUTOMOBILE BUMPER. SPENCER OTIS, Barrington, Ill., assignor to The Locomotive Terminal Improvement Company, Chicago, Ill., a Corporation of Maine. Filed Oct. 19, 1925. Serial No. 63,212. 5 Claims. (Cl. 293—55.)

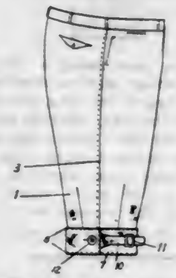
1. A bumper, comprising a front bar, supporting members extending inwardly from the ends of said front bar, and spring yokes connected with said supporting members at intermediate portions of the yokes; said yokes having forwardly extending and diverging arms in position to receive the front bar when the latter is displaced rearwardly, but normally out of contact with said front bar.

1,633,604. FILTERING DEVICE. WILLIAM B. PUMPHREY, Sequoia, Calif. Filed Jan. 11, 1926. Serial No. 80,452. 2 Claims. (Cl. 210—117.)



1. A filtering device comprising a ring, a centrally disposed shaft, two casing sections adapted for engagement with opposite sides of the ring, means for tightening the sections upon the ring, filtering walls within the two sections leaving the space within the ring clear, and means for connecting the said space with a water pipe, the sections being formed with recesses in opposite walls thereof adapted to receive water seeping through the filtering material, and the recesses communicating with a bore in the shaft for guiding the water outwardly.

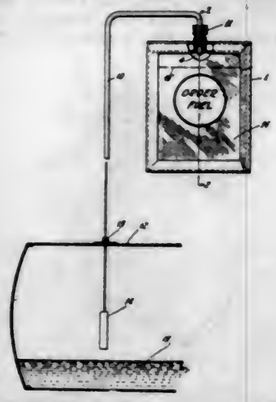
1,633,605. CONTAINER AND COVER THEREFOR. THEODORE MITCHELL PRUDDEN, Hingham, Mass., assignor to Kalix Cup Company, Boston, Mass., a Corporation of Massachusetts. Filed June 3, 1925. Serial No. 34,682. 8 Claims. (Cl. 229—1.5.)



1. A paper closure for an ice cream pack or the like comprising a flat disc of paper stock scored and foldable on diverging chords to form a spoon.

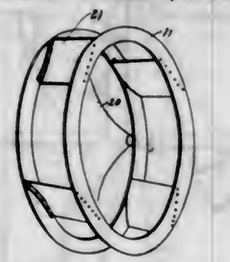
1,633,606. VEHICLE WHEEL. ROBERT RIEHL, St. Louis, Mo. Filed Mar. 26, 1926. Serial No. 97,650. 1 Claim. (Cl. 152—53.)

A vehicle wheel of the class described, comprising an outer rim provided with inwardly projecting hollow housings, converging toward a common center and adapted to reciprocate within radially disposed hollow housing, radiating from a centrally located hub, a plurality of radially disposed spokes connected to said hub and of sufficient length to protrude through the said radially disposed housing into the said first-mentioned housings projecting inwardly from said rim, ball raceways firmly affixed to said spokes, balls in said raceways adapted to be held in said raceways by a suitable washer, slidably surrounding said spokes, helical compression springs surrounding said spokes, one end abutting against said washer and the opposite end abutting against said rim, a hollow hub providing an axle bearing, enclosing sides constituting the aforesaid radially disposed housing, and rigidly joined to said hub, rigidly joined to prevent the ingress of dust and dirt, as set forth in the drawings and specifications.



1,633,607. KNICKERBOCKERS. LESTER F. ROSENBAUM, Kalamazoo, Mich., assignor to Sam Rosenbaum & Sons Company, Kalamazoo, Mich. Filed Aug. 17, 1923. Serial No. 657,887. 1 Claim. (Cl. 2—228.)

A garment having a leg provided with a fent at the bottom thereof having overlapping edges, a band of uniform width stitched throughout its length at its top and bottom edges terminating at the edges of said fent, said band having a button-hole at its overlapping end, an adjusting strap provided with a button at one end to coact with said buttonhole, and a buckle disposed in spaced relation to the underlapping end of said band for adjustably connecting said strap to said band.



1,633,608. SIGNAL FOR FUEL-SUPPLY SYSTEMS. JACK D. SARTAKOFF, New York, N. Y., assignor of one-half to Khetah Corporation, New York, N. Y., a Corporation of New York. Filed Oct. 4, 1926. Serial No. 139,473. 10 Claims. (Cl. 116—118.)

9. In an assembly of the character described, a compartment having transparent walls and vented, a closed reservoir positioned at the rear of the compartment and containing a liquid, a visual signal positioned between the compartment and reservoir, an inverted U tube, the arms of which extend downwardly into both the reservoir and compartment, and means to secure said parts together, in combination with a pressure bell having an open bottom and connected by a tube to the interior of the reservoir, said pressure bell being adapted to be positioned within a fuel tank, whereby the rise in level of

the fuel in the tank will seal the open bottom of the bell and place the air in the bell under pressure for the purpose of forcing the liquid from the reservoir through the U tube into the compartment to conceal the visual signal, the fall of fuel level in the tank below a predetermined minimum serving to suck said liquid back through the U tube into the reservoir to expose the visual signal.

1,633,609. RADIAL-FLOW PUMP. HENRY F. SCHMIDT, Swarthmore, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Oct. 29, 1920, Serial No. 420,468. Renewed Jan. 28, 1927. 1 Claim. (Cl. 230—11.)

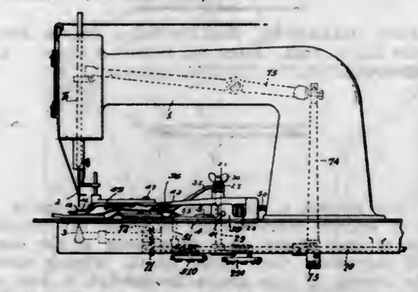
In a radial-flow pump of the character described, a runner comprising a supporting member and blades of progressively increasing pitch arranged circumferentially with reference to the supporting member, the sum of the angles subtended by the blades from the center of the runner being substantially 216°, the leading portion of said blades being substantially tangential to the surface generated by the leading edge of the blades in their rotation.

1,633,610. NETHER GARMENT. ALEXANDER M. SCHNEIDER, New York, N. Y., assignor to G. Sperling, New York, N. Y. Filed July 13, 1926. Serial No. 122,055. 3 Claims. (Cl. 2—224.)

1. Bloomers or pantalets having a crotch portion with a tapering end extending up the front and a tapering end extending up the back, a pair of tapered gussets having their larger ends secured respectively to the side edges of the middle of said crotch portion and extending down the inside leg portions of the garment, the adjoining edges of said crotch portion and gussets respectively being concave at the sides of the crotch portion and at the ends of the gussets to provide oppositely directed sub-

stantially arcuate edges which, where stitched together, render the garment substantially conformative to the wearer and devoid of sharp protruding seams and bulging areas.

1,633,611. MEANS FOR PREVENTING ELECTRICAL INTERFERENCE. ROY B. SHANCK, Woodside, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed May 6, 1922. Serial No. 559,029. 10 Claims. (Cl. 178—69.)



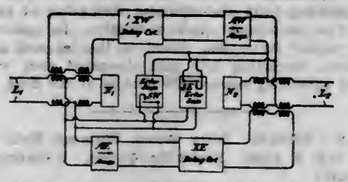
1. In a single-line Morse telegraph system, the method for substantially neutralizing cross-fire which consists in impressing a signaling impulse upon one of the circuits of the said system, causing the said impulse to create a neutralizing impulse in each of the other circuits of the said system in such directions as to prevent both the receiving-end and the sending-end cross-fire impulses.

1,633,612. AIR PROPELLER. ALBERT EUSTACE SHORT, HUGH OSWALD SHORT, and ARTHUR GOUGH, Rochester, England. Filed Oct. 11, 1926, Serial No. 140,893, and in Great Britain Mar. 1, 1926. 2 Claims. (Cl. 170—173.)

1. An air propeller with removable blades, comprising two blades with interlocking inner ends, two wedge-shaped side blocks located in opposite recesses between the blades, two wedge-shaped end blocks located in the other recesses between the blades, longitudinally arranged bolts securing the blades and blocks together by passing through the opposite end blocks and through the blades between them, and transversely arranged bolts securing the blades and blocks together by passing through the opposite side blocks and through the blades between them.

1,633,613. BUTTON-SEWING MACHINE. CHARLES T. A. SIBBALD and JOHN B. RANSOM, Troy, N. Y., assignors, by mesne assignments, to Frederick Osann Company, New York, N. Y., a Corporation of New York. Filed Apr. 27, 1922. Serial No. 557,011. 15 Claims. (Cl. 112—112.)

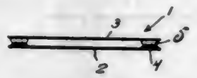
1. In a button sewing machine, a button holder, a material clamp, and means for creating relative movement between the button holder and material clamp following a predetermined number of stitches through the holes in a button and through material, said relative movement positioning the material to receive the stitches through the same button holes at a distance from the original stitches in the material through said button holes.



1,633,614. METHOD OF SEWING ON BUTTONS. CHARLES T. A. SIBBALD and JOHN B. RANSOM, Troy, N. Y., assignors, by mesne assignments, to Frederick Osann Company, New York, N. Y., a Corporation of New York. Original application filed Apr. 27, 1922, Serial No. 557,011. Divided and this application filed June 23, 1924. Serial No. 721,650. 14 Claims. (Cl. 112—265.)

5. The method of securing a plural hole button to material which consists in passing stitching loops through the holes in succession and diverging the loops from each hole to and through spaced points in the material.

14. Means for attaching a button to material, which comprise loop stitches passing through a hole in said button, the stitches emerging from one end of said hole diverging and extending to and engaging the material at spaced points.

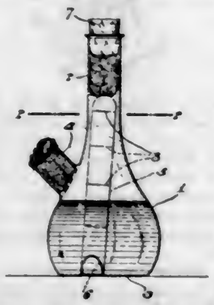


1,633,615. DELAY CIRCUITS FOR VOICE-OPERATED DEVICES. HAROLD C. SILENT, Brooklyn, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Oct. 24, 1925. Serial No. 64,682. 4 Claims. (Cl. 178—44.)

1. In a transmission circuit, a voice operated relay for controlling the transmission over a part of said circuit, and a delay circuit operating to delay the trans-

mission of signaling currents over said part of said circuit until the voice operated relay has had time to function, said delay circuit comprising a network so designed as to compensate for the variation in the delay of the transmission circuit with respect to frequency.

1,633,616. BARRETTE. FRANCES SOKOL, Chelsea, Iowa. Filed Aug. 5, 1925. Serial No. 48,290. 1 Claim. (Cl. 132—48.)



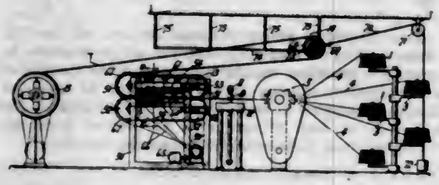
A hair barrette of the class described comprising a pair of separate complementary elongated flat metallic strips of equal length, said strips being of the same width throughout their entire length, between which strips strands of hair are to be fastened, a pair of socket members arranged on the inner face of one strip adjacent the respective ends thereof, and heads carried by the inner face of the complementary strip and adapted to be received in the respective socket members whereby the strips are detachably secured together.

1,633,617. PROCESS FOR TREATING COTTON OR OTHER THREADS CONTAINING CELLULOSE. GIOVANNI TAGLIANI, Basel, Switzerland, assignor, by mesne assignments, to Chemical Works, formerly Sandoz, Basel, Switzerland, a Joint Stock Company. Filed June 29, 1925, Serial No. 40,452, and in Germany July 3, 1924. 2 Claims. (Cl. 8—5.)

1. A process of rendering cellulose fibres, preliminarily dyed with substantive dyestuffs, indifferent to substantive dyestuffs, which comprises, alkalizing the dyed fibres and treating them with aromatic sulphonic chlorides.

1,633,618. FERMENTATION APPARATUS. GEORGE E. THOMAS, Philadelphia, Pa. Filed Oct. 15, 1926. Serial No. 141,799. 5 Claims. (Cl. 23—253.)

1. A fermentation apparatus comprising a flask having an enlarged liquid containing formation at its base, and an elongated open neck formation, extending above the enlarged formation, and a second shorter neck formation projecting from the enlarged formation at one side of the first mentioned neck formation, in combination with a tubular formation, closed at the top and open at the bottom, extending into said elongated neck with its open end extending toward the bottom of the flask.



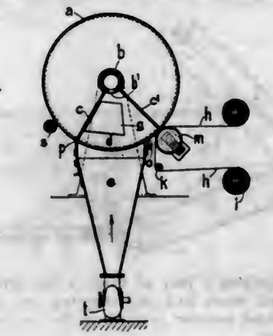
1,633,619. FENCE. JOHN WARD, Watauga Falls, N. C. Filed Jan. 4, 1926. Serial No. 79,204. 2 Claims. (Cl. 256—26.)

1. In a fence, the combination of posts, bands mounted on the posts and having offstanding portions, panels between the posts having detachable connection with the bands thereof, one of the panels having a batten at one end, in which is formed a longitudinal slot, and a flat headed bolt mounted in the offstanding portions of a band and adapted to have its flat head pass through the slot of the batten and adjusted crosswise of the slot to lock the panel in closed position.

2. A fence, comprising posts, upper and lower bands mounted upon the posts and having offstanding portions, bolts mounted in the offstanding portions of the bands, spreader means associated with the posts for holding the bands in spaced relation, and panels, comprising end battens in which are formed longitudinal slots to receive the bolts mounted in the offstanding portions of the bands.

1,633,620. PROCESS FOR THE MANUFACTURE OF TIRE BEADS. STERLING W. ALDERFER, Akron, Ohio. Filed Oct. 20, 1926. Serial No. 142,948. 15 Claims. (Cl. 154—14.)

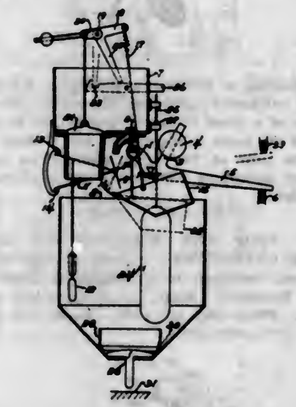
1. The process of manufacturing tire beads, comprising leading a plurality of individual wires from separate sources, dividing the wires into groups, forcing a mass of tenacious rubber about the wires while the groups are spaced apart, reducing the wires and the rubber to a flat tape whereby the wires are brought into substantially the same plane, encasing the tape so formed with a jacket of rubber, cooling the tape, and winding a plurality of layers thereof into a ring constituting the bead.



1,633,621. FILTRATION OF SOLUTIONS AND THE LIKE. JOSEPH BLUMENFELD, London, England. Filed July 28, 1924, Serial No. 728,785, and in Great Britain Aug. 3, 1923. 7 Claims. (Cl. 210—23.)

1. A process for the clarification of by the removal of suspended matter from solutions which result from chemical attack upon minerals or the like containing metallic elements of the fourth group, said process comprising adding to the solution to be clarified compounds capable of forming by reaction within said solution a colloidal metallic sulphide having an electric charge of opposite sign to that of said suspended matter.

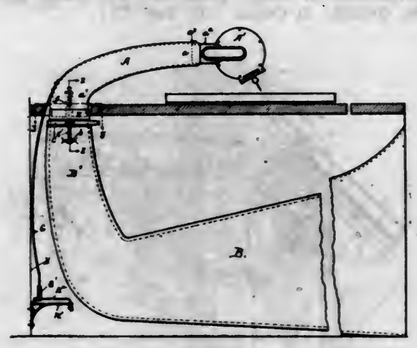
1,633,622. APPARATUS FOR TRANSFERRING MICA ONTO A FIBROUS WEB. JOSEF BOHER, Breitenbach, near Basel, Switzerland. Filed Apr. 19, 1926. Serial No. 103,144. 3 Claims. (Cl. 154—2.5.)



1. An apparatus for transferring mica onto a fibrous web, comprising a mica supplied trunk, means to keep mica flakes therein in suspension, a rotary perforated drum arranged above said trunk, a stationary hollow shaft carrying said drum, means to rotate said drum around this shaft, a stationary suction chamber within said drum, arranged to communicate with the hollow

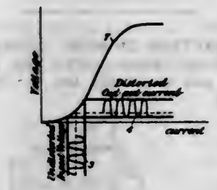
space of the shaft and to draw up the mica flakes against the periphery of the drum, suction means connected to both ends of said shaft, and a heated pressure roller in

contact with the drum outside the suction area to press a fibrous web coated with an adhesive against the drum for receiving the mica layer supplied by the drum.



1,633,623. AUTOMATIC WEIGHING APPARATUS WITH TARE WEIGHING. BALTUS BOULOGNE, Pasoeroean, Java. Filed Mar. 9, 1926, Serial No. 93,486, and in the Netherlands Feb. 6, 1925. 4 Claims. (Cl. 249—2.)

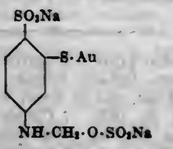
1. In an automatic weighing apparatus, a weighing tank, a weighing beam, a main and auxiliary admission valves for the material to be weighed, a device for opening the auxiliary admission valve by the movement of the weighing beam when the weighing tank returns empty to the charging position, a tank below the auxiliary admission valve movable by the weight of the on-flowing material, and a device acting in response to movement of the second mentioned tank to cause the opening of the main admission valve.



1,633,624. PHONOGRAPH TONE ARM AND RESONATOR. WILLIAM T. CARNES, Kansas City, Mo., assignor to Carnes Artificial Limb Company, Kansas City, Mo. Filed Dec. 19, 1923. Serial No. 681,512. 6 Claims. (Cl. 274—23.)

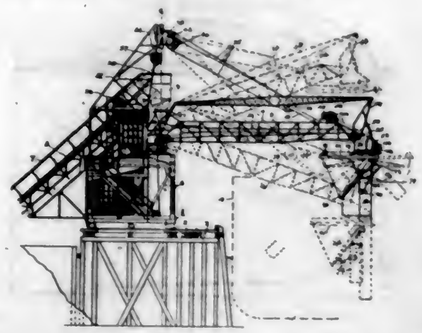
1. In an apparatus of the class described, an amplifier, a spider-ring secured upon the receiving end thereof, an upright post supported upon said ring, a swivel ring journalled on said post, means to give vertical adjustment to said ring with relation to said post, said ring having vertical slots in its upper edge at diametrically opposite points along the upper edge of its periphery, a

tone arm adapted to receive said ring, and trunnion studs secured in the wall of said arm and adapted to enter said slots.



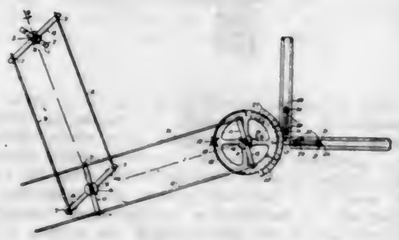
1,633,625. SECRECY SYSTEM. LLOYD ESPENSCHIED, Queens, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Mar. 5, 1921, Serial No. 449,879. Renewed Oct. 9, 1925. 3 Claims. (Cl. 179—1.)

1. The method of providing secrecy in a system of communication which consists in translating original message currents into a current wave whose elements bear a non-linear relation to the corresponding elements of the original message currents, transmitting the translated wave to a receiving station, and subjecting the received wave at said station to a non-linear translation complementary to the translation at the sending station whereby the message currents will be restored to original formation.



1,633,626. HEAVY METAL MERCAPTO SULPHONIC COMPOUNDS. ADOLF FELDT, Berlin-Wilmersdorf, WALTER SCHOELLER, Berlin-Westend, and ERICH BORGWARDT, Berlin, Germany, assignors to Chemische-Fabrik auf Actien (vorm. E. Schering), Berlin, Germany. Filed Dec. 10, 1925, Serial No. 74,632, and in Germany Dec. 15, 1924. 8 Claims. (Cl. 260—11.)

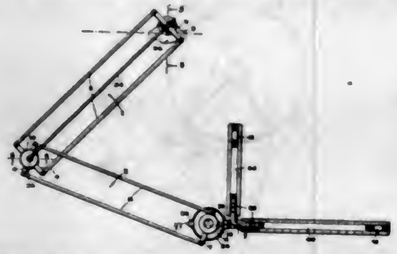
3. As a new product the disodium salt of 4-iminomethylene sulphurous acid-2-mercapteaurobenzene-1-sulphonic acid, corresponding to the formula



being easily soluble in water and having a gold content of about 35 percent.

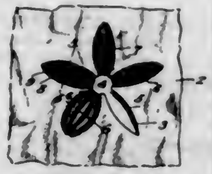
1,633,627. MECHANISM FOR HANDLING MATERIAL. MAHLON E. FIRST, Lakewood, Ohio, assignor to The C. O. Bartlett & Snow Company, Cleveland, Ohio, a Corporation of Ohio. Filed Nov. 11, 1922. Serial No. 600,249. 21 Claims. (Cl. 198—72.)

1. In mechanism of the character described, the combination of a suitable base, a boom supported therefrom and oscillable in a vertical plane, drums at the respective ends of said boom rotatable about transverse axes, an endless conveyor passing over said drums, a spout head oscillably mounted in the outer end of said boom about the axis of the corresponding conveyor drum, and means independent of an operator for holding said head in substantially vertical position.



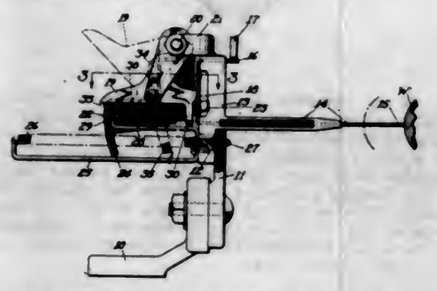
1,633,628. DRAFTING DEVICE. JOSEPH O. FORTIN, Ottawa, Ontario, Canada. Filed Oct 2, 1922, Serial No. 591,850, and in Canada Oct. 4, 1921. 6 Claims. (Cl. 33—79.)

1. A drafting machine comprising a plurality of pivotally connected parallelogram-shaped structures, each consisting of a pair of parallel short links pivotally connected by a pair of parallel longer links, an anchoring device, a single vertical pivot member on said anchoring device, means on said pivot member for clamping the short link at one end of the machine in any desired angular position to said device, a drafting member rotatable about the middle point of the short link adjacent the other end of the machine, and a vertical pivot member for connecting the other short link of each parallelogram structure to the adjacent short link of the other parallelogram structure.



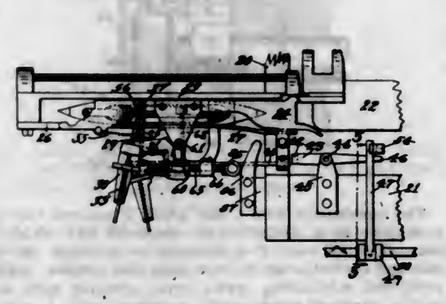
1,633,629. DRAFTING MACHINE. JOSEPH OVILA FORTIN, Ottawa, Ontario, Canada. Filed May 23, 1925, Serial No. 32,364, and in Great Britain June 24, 1924. Renewed Oct. 29, 1926. 7 Claims. (Cl. 33—79.)

1. A drafting machine comprising, in combination, a pair of pivotally connected parallelogram-shaped structures each consisting of a pair of parallel short links pivotally connected by a pair of parallel longer links, an anchoring device pivoted to the short link at one end of the machine, and a drafting member carried by the short link at the other end of the machine, said drafting



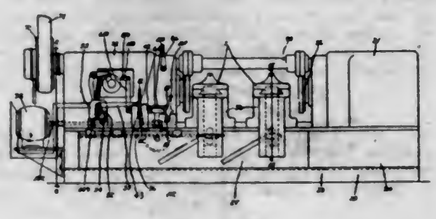
member comprising a pair of rules, a bar pivoted to the last mentioned short link and carrying one of the rules and a graduated member pivoted on the bar and carrying the other rule.

1,633,630. ORNAMENTAL FABRIC. FRIEDA E. FUHRER, Richmond, Va. Filed Mar. 21, 1924. Serial No. 700,875. 3 Claims. (Cl. 2—278.)



1. The process of fabric ornamentation which consists in looping successive layers of differently colored yarns at one side of a piece of fabric, connecting said yarns at the ends of the loops to the fabric, and slitting the yarns between the ends of the loops whereby an ornamental tufted effect embodying different colors is afforded on the piece of fabric.

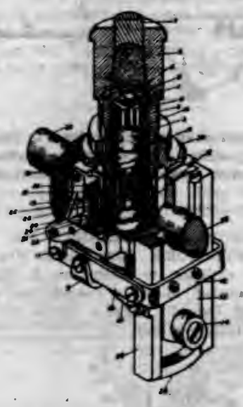
1,633,631. STOP FOR WEIGHTS OF MULTIPLE-NEEDLE DETECTORS. ALBERT A. GORDON, Worcester, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed Dec. 21, 1925. Serial No. 76,823. 4 Claims. (Cl. 139—276.)



1. In a weft detector for looms, a carrier, a plurality of needle detectors slidably mounted in the carrier, a plurality of weights one for each needle detector to hold said needles rearwardly in engagement with the yarn to be detected, a stop mounted on the carrier, and a finger extending from each weight to engage the stop when said weights are moved forwardly by the needles, said stop preventing excess movement of the weights beyond the position corresponding to the foremost position assumed by the needle detectors.

1,633,632. WEFT-DETECTING MECHANISM FOR DROP-BOX LOOMS. ALBERT A. GORDON, Worcester, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed Jan. 26, 1926. Serial No. 83,859. 7 Claims. (Cl. 139—233.)

1. In a loom having a plurality of drop boxes at one end thereof, in combination, a plurality of weft detectors corresponding in number with said boxes and associated therewith, a single actuating means effective to render any one of said detectors operative, a pattern controlled selective connector, and means to give said connector a preliminary selective movement to interpose said connector between said actuating means and a selected detector before the operating movement of said actuating means.



1,633,633. CRANK-SHAFT LATHE. WILLIAM F. GROENE, Cincinnati, Ohio, assignor to The R. K. Leblond Machine Tool Company, Cincinnati, Ohio, a Corporation of Delaware. Filed June 13, 1924. Serial No. 719,906. 10 Claims. (Cl. 82—9.)

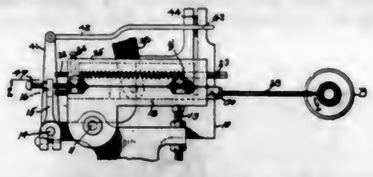
1. The combination with a lathe, of means for automatically moving the cutting tools thereof into and from operation upon the work, for returning the tools to their original position, for continuing the movement of the work for a determinable period after the tools have completed their normal work and for stopping the lathe, and means for interlocking said means for precluding accidental operation of any parts thereof.

10. The combination with a lathe comprising a revolving spindle adapted to move work, tool holders for operation upon the work, means for revolving the spindle, and means for moving the tool holders relative to work associated with the spindle, the tool holders being adapted to assume a normal or beginning position, of means for arresting relative movement of the tool holders, means for rendering a determinable continuity of rotation of the spindle and for then rendering the means for revolving the spindle inoperative upon the spindle, auxiliary means for then returning the tool holders to their beginning or normal position, and interlocking means for precluding operation of the enumerated means in other than their predetermined order.

1,633,634. GLASS-FORMING MACHINE AND PROCESS. ORIN A. HANFORD, Columbus, Ohio, assignor to The Federal Glass Company, Columbus, Ohio, a Corporation of Ohio. Filed Apr. 14, 1921. Serial No. 461,268. 6 Claims. (Cl. 49—18.)

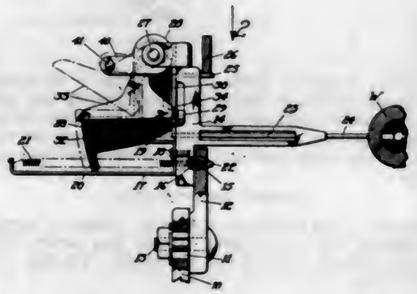
3. The method of handling glass blanks in the making of blown glassware which comprises forcing the glass into a groove, supporting the glass by friction against force of gravity, blowing the blank while suspended from the holding device and then ejecting the glass from said groove.

1,633,635. ADVERTISING DEVICE. CHARLES NATHON HARMON and JOHN PETER DAMES, Ann Arbor, Mich. Filed June 1, 1925. Serial No. 34,120. 1 Claim. (Cl. 40—129.)



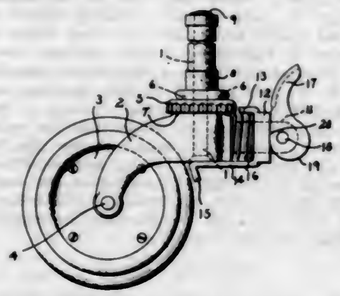
An advertising device comprising in combination with a vehicle, the body thereof including spaced vertical strips, and spaced horizontally extending strips whereby a plurality of rectangular shaped openings are formed in the sides of the body, a sign board hingedly supported in the rear of each of said openings, and providing a closure therefor, whereby the sign on the front face of each sign board is visible from the exterior of the vehicle, a glass panel supported over the front of each of the openings and covering the respective signs, incandescent electric lamps arranged on the exterior of the body directly over the openings, and reflectors associated with the lamps for directing the rays of light downwardly onto the sides.

1,633,636. WEFT DETECTOR FOR LOOMS. ELBRIDGE R. HOLMES, Worcester, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed Oct. 1, 1924. Serial No. 741,038. 9 Claims. (Cl. 139—269.)



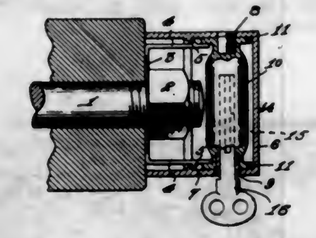
1. In a weft detector for looms operating with a bobbin having inclined surfaces, an actuator to effect a change in the operation of the loom, controller mechanism for the actuator, a detector element mounted for angular movement and normally clearing a portion of the con-

troller mechanism when moved forwardly by a sufficient supply of weft, and resilient means holding said detector in said clearing position, said detector when engaging



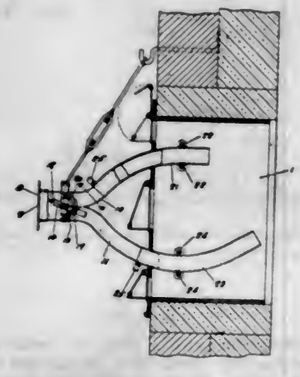
an inclined portion sliding therealong to move angularly and engage a portion of the controller mechanism as said detector is moved forwardly by the advancing bobbin.

1,633,637. STOP FOR WEIGHTS OF MULTIPLE-NEEDLE DETECTORS. ELBRIDGE R. HOLMES, Worcester, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed Dec. 21, 1925. Serial No. 76,822. 7 Claims. (Cl. 139—276.)



1. In a weft detector having a plurality of yarn engaging detector needles and weights for said needles to hold said needles yieldingly against the yarn, a stop yieldingly mounted and positioned to engage the weights to restrain excess movement thereof.

1,633,638. CASTER. NELSON L. JARVIS and FRANK J. JARVIS, Palmer, Mass. Filed Dec. 22, 1925. Serial No. 76,989. 6 Claims. (Cl. 16—35.)

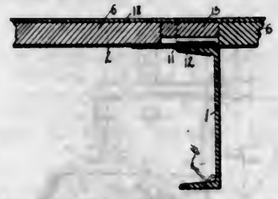


1. In a device of the character described, a roller support having a roller fork and a slide extension beyond the fork, a roller in the fork a caster stem carried by the support and extending therebeyond, a lock member on the stem having edge serrations and a slide yoke on the slide extensions of the support having a pair of arms substantially parallel to the slide extensions, one arm being adapted to engage the edge serrations of the lock member.

1,633,639. NUT ENCASEMENT. EMORY R. JOHNS, Dallas, Tex. Filed July 26, 1926. Serial No. 125,093. 1 Claim. (Cl. 70—122.)

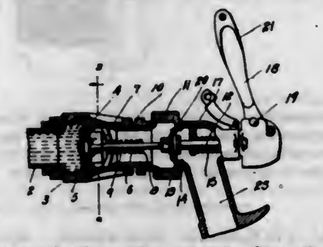
The combination with a bolt which is screwed through a support or a device to be supported and which is engaged by a nut, of a disc-member arranged on the bolt and contacted by the nut, said disc member having peripheral outstanding spring arms provided with outwardly directed substantially V-shaped lugs, a casing section having an inner groove to receive the lugs of the spring arms therein, a barrel revoluble in the casing section, said barrel having flanged ends whose inner faces are formed with cam extensions, said barrel having a bore designed for coengagement with a removable key, all as and for the purpose set forth.

1,633,640. FURNACE-FUEL-FEEDING APPARATUS. THEODORE JOHNSON, Erie, Pa., assignor, by mesne assignments, to Erie City Iron Works, a Corporation of Pennsylvania. Filed Jan. 10, 1923. Serial No. 611,713. 5 Claims. (Cl. 110—104.)



1. In a furnace fuel feeding apparatus, the combination with a furnace; of a fuel and air conduit leading to the furnace including means comprising arcuate telescoping tubes for varying through the sliding adjustment of one tube upon the other the direction of discharge of the conduit into the furnace.

1,633,641. ROOF CONSTRUCTION. FREDERICK C. KASCH, Akron, Ohio. Filed Aug. 9, 1926. Serial No. 127,990. 3 Claims. (Cl. 108—13.)

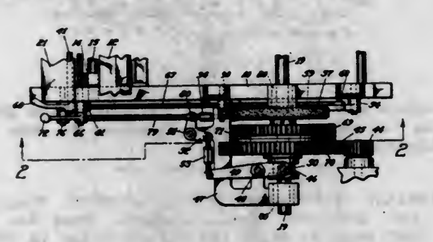


3. In a roof structure the combination of flanged purlins and a foundation comprising a plurality of metal sheets having parallel channels, the sheets being laid over the purlins with overlapping edges parallel to the purlins, the sheets being provided with apertures in the bottom of a channel through the overlapped portions arranged in register with the edges of the flanged purlins,

and U-shaped metal clips passed through the apertures, one arm of each clip bearing against the underside of a flanged purlin and the other arm bearing against the

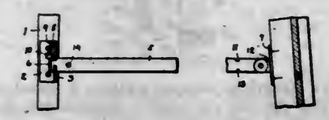
upper surface of the upper sheet, the apertures being wider than the thickness of the clip so as to permit free contraction and expansion of the sheets.

1,633,642. TANK FOR DISPENSING LIQUIDS. ANDREW A. KRAMER, Kansas City, Mo. Filed June 9, 1922. Serial No. 567,150. 2 Claims. (Cl. 137—21.)



1. The combination with a tank for dispensing liquids, of a conduit leading therefrom, a valve seat within the conduit, a valve coacting with the seat, a spring acting on the valve to move it toward its seat in the direction of flow of liquid through the conduit said spring encircling a stem projecting from the valve in the direction of flow of the liquid through the conduit, a faucet on the end of the conduit, a valve therein and a handle for moving the last named valve from its seat and for engaging the said stem and moving its valve against the flow of liquid through the conduit away from its seat, the said conduit being weakened at a point between the said valves to locate a break in the conduit.

1,633,643. BRUSH ATTACHMENT FOR HOSE. ORMOND E. LOOMIS, Belmont, Mass., assignor to Dario Company, Boston, Mass., a Corporation of Massachusetts. Filed Sept. 18, 1925. Serial No. 57,068. 3 Claims. (Cl. 15—128.)

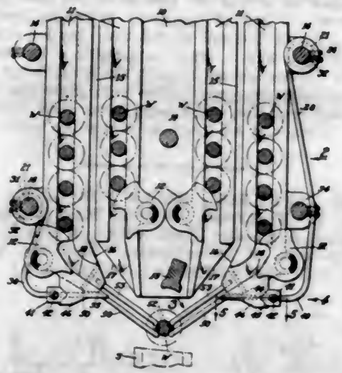


1. A brush attachment for a hose comprising a holder having a body portion which is substantially straight longitudinally and arcuate in cross-section to fit the hose and which has a pair of attaching clips adjacent each end shaped to embrace the hose, the clips being formed integrally with the body portion with their free ends spaced apart to permit the passage of the hose laterally therebetween, a pair of oppositely extending brush supporting arms at one end of the body portion and integral therewith, and a brush comprising a twisted wire core with bristles secured thereto, the brush being formed in a loop with the ends of the core projecting beyond the bristles, and the brush supporting arms being bent around the ends of said core to secure the brush to the holder.

1,633,644. AUXILIARY BRAKE FOR LOOMS. BENJAMIN F. MCGUINESS, Grafton, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed Dec. 4, 1925. Serial No. 73,246. 6 Claims. (Cl. 139—375.)

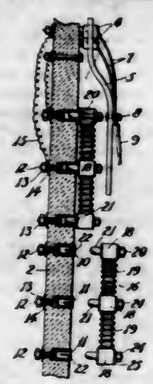
1. In a loom, a driving shaft, a lay connected thereto, means to drive the shaft, a pair of brakes both effective to resist motion of the shaft and lay, one of said brakes being relatively light and effective to offer slight resistance to movement of the lay and shaft whenever the shaft and means to drive are disconnected, and the other brake capable of remaining in non-braking position when the shaft and driving means therefor are disconnected, and operative connections between the brakes to cause the light brake to become operative to brake the shaft when the main brake is effective.

1,633,645. SASH ADJUSTER AND FASTENER. ALBIN E. MOLBERG, Duluth, Minn. Filed Mar. 12, 1926. Serial No. 94,175. 3 Claims. (Cl. 292—267.)



1. In combination, an angular bracket one flange of which is adapted to be secured to a window stop and the other flange having a T-shaped slot therein, an angular bracket one flange of which is adapted to be secured to a storm sash for the window and having a notch in the other flange, an operating rod one end of which is pivotally connected to the sash bracket and adapted to reciprocate in the T-shaped slot, and means for securely holding the rod or bracket from dislodgment from the T-shaped slot.

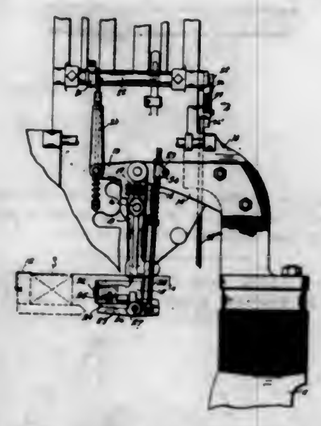
1,633,646. YIELDABLE GIVEWAY FOR WEFT-REPLENISHING LOOMS. OSCAR V. PAYNE, Worcester, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed Nov. 15, 1926. Serial No. 148,404. 7 Claims. (Cl. 139—251.)



1. In a weft replenishing mechanism having a frame to hold a plurality of stacks of bobbins, a pair of yieldable supports for the tip of the bobbin, one of said supports

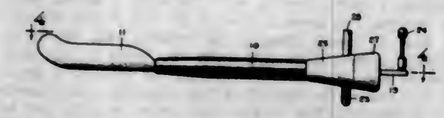
being formed of wire bent on itself and having two inclined portions spaced vertically and horizontally, the upper portion to engage the tip of the bobbin and prevent

endwise movement thereof and the lower portion guiding the bobbin toward and supporting the same in transfer position.



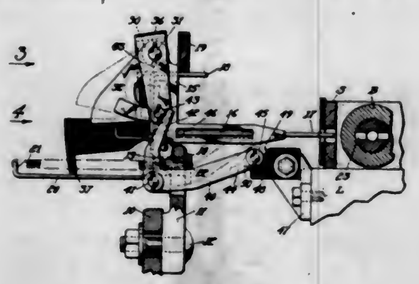
1,633,647. ELECTRICAL DIMMER SWITCH. WILLIAM ROW, Melbourne, Victoria, Australia. Filed Nov. 2, 1925, Serial No. 66,373, and in Australia Nov. 13, 1924. Renewed May 20, 1927. 3 Claims. (Cl. 201—48.)

2. In an electrical dimmer switch, a panel, contact studs carried thereby, and sockets fitted in the panel and opening to one surface of the panel, said sockets being projected to the opposite surface of the panel for the connection of conductors leading to the contact studs, and independent resistance elements formed with plugs to frictionally engage in said sockets to interconnect the sockets through said resistance, each of said resistance elements comprising a core of insulating material, screws passed through the core and formed with said plugs, and a resistance wire wound about the core of insulating material and connected to the screws.



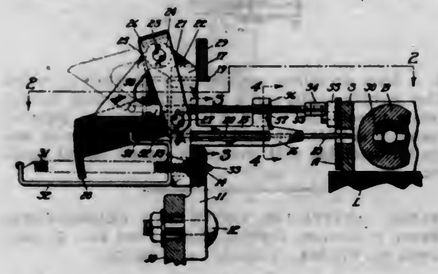
1,633,648. SHUTTLE PLACER FOR WEFT-REPLENISHING LOOMS. EPPA H. RYON, Waltham, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed Aug. 8, 1922. Serial No. 580,526. 3 Claims. (Cl. 139—253.)

1. In a loom having a weft carrier magazine, a lay and a shuttle, in combination a depending supporting member mounted on a pivot on said magazine and swinging downward in the path of the advancing shuttle, said member having movement in a single plane only and substantially perpendicular to the path of the shuttle, a shuttle positioning roll mounted on said member to rotate about a substantially vertical axis when in operative posi-



tion, said member and roll having a normal forward inoperative position, and means to move said parts rearward upon indication of weft carrier transfer to position said roll for engagement by a misplaced shuttle.

1,633,649. DIATHERMIC ELECTRODE. MAXIMILIAN STERN, New York, N. Y. Filed Jan. 12, 1926. Serial No. 80,720. 16 Claims. (Cl. 174—89.)

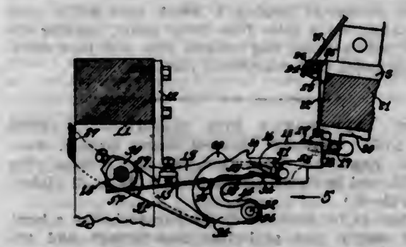


1. In an electrode of the character described, a pair of contact members which are relatively foldable like the covers of a book to permit easy insertion thereof into a body cavity when they are folded.

1,633,650. MULTIPLE-NEEDLE DETECTOR FOR LOOMS. KENNETH J. UNWIN, Shrewsbury, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed Jan. 5, 1926. Serial No. 79,438. 1 Claim. (Cl. 139—276.)

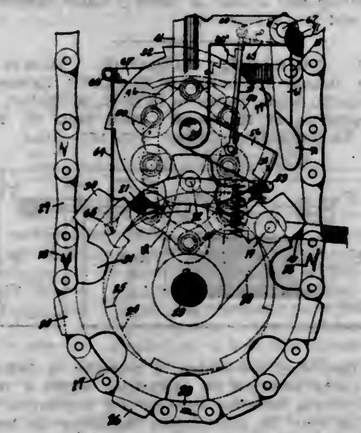
In a weft detector for looms, a plurality of detectors to engage the surface to be detected, a carrier on which said detectors are mounted, a plurality of weights one for each detector, a lay, a lever pivotally mounted with respect to the carrier, a cam carried by the lay to engage a portion of the lever to set the latter in motion gradually, and connections between the lever and the weights to impart the gradually increasing motion of the lever to the weights to the end that the inertia of the weights may be overcome gradually.

1,633,651. WEIGHT-CONTROLLED DETECTOR FOR LOOMS. KENNETH J. UNWIN, Shrewsbury, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed Jan. 5, 1926. Serial No. 79,437. 6 Claims. (Cl. 139—276.)



1. In a weft detector for looms, a detecting element having a movement which it derives from the moving yarn to be detected, means to return the detector to normal detecting position, and mechanism other than the detector to move said means out of operative relationship with the detector member prior to engagement of the latter with the yarn to be detected.

1,633,652. PHOTOGRAPHIC TRANSPARENCY AND METHOD OF COLORING SAME. ARTHUR G. WADDINGHAM, Jackson Heights, N. Y., assignor to Color Cinema Productions, Inc., New York, N. Y., a Corporation of Delaware. Filed May 8, 1926. Serial No. 107,789. 2 Claims. (Cl. 95—2.)

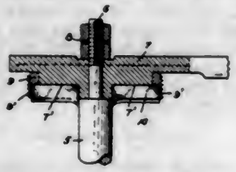


1. A process of coloring a photographic double coated motion picture film having developed images recording different color values of a scene on opposite sides of the film, which include bleaching the film on both sides, washing the film, applying to both sides of the film a bath including uranium nitrate, to color the images on both sides of the film red, washing the film, fixing the film, and, after washing the film again, subjecting the images recording the green color values of the scene to a bath composed of ferrous sulphate, ferric chloride, sulpuhric acid and water.

1,633,653. FILLING STOP MOTION FOR LOOMS. WALTER H. WAKEFIELD, Worcester, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed Dec. 14, 1925. Serial No. 75,183. 6 Claims. (Cl. 139—375.)

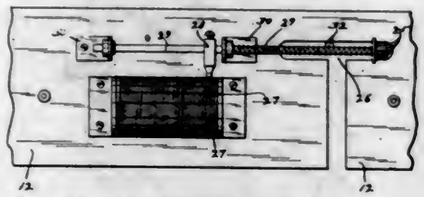
1. In a filling stop motion for looms, a shipper shaft, a movable actuating member having a pair of operating faces, a dagger movable back and forth in the loom and controlled as to its position by weft, means to shield one of said faces from the dagger when the actuating member is in initial position, means moving with the shipper shaft to hold the actuating member locked when the other face of the actuating member is in operative position with respect to the dagger, and connections to effect angular movement of the shipper shaft to stop the loom when the dagger engages said other operative face of the actuating member, the locking means moving with the shipper shaft out of locking position with respect to the actuating member when the shipper shaft moves to stop the loom.

1,633,654. CHAIN CONTROL FOR AXMINSTER LOOMS. WALTER H. WAKEFIELD, Worcester, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed Oct. 12, 1926. Serial No. 141,183. 10 Claims. (Cl. 139—7.)



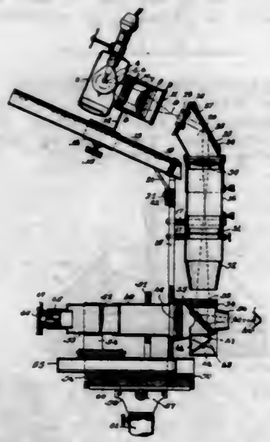
1. In an Axminster loom having a plurality of tube frames, a tube frame transporting chain, means to advance the same to present the tube frames one at a time to a position from which they are moved to the fabric being woven, and mechanism controlled by the transporting chain to arrest the movement of the latter for a plurality of picks, to the end that the same tube frame may be operative on a plurality of successive picks of the loom.

1,633,655. HAND-OPERATED CREASING DEVICE. HARRISON B. WALTER, Chicago, Ill., assignor to Container Corporation of America, Chicago, Ill., a Corporation of Delaware. Filed July 26, 1926. Serial No. 125,001. 5 Claims. (Cl. 92—70.)



1. A creasing machine comprising a table, means providing a slot or groove in said table, a male member mounted on said table back of said slot or groove on an axis extending parallel thereto, said male member having an active element adapted to co-act with said slot or groove, and a hand lever for operating said male member.

1,633,656. APPARATUS FOR FILLING CONTAINERS WITH EXPLOSIVES. CECIL G. YOUNG, U. S. Army, Dover, N. J. Filed Feb. 8, 1926. Serial No. 86,944. 5 Claims. (Cl. 86—20.) (Granted under the act of Mar. 3, 1883, 22 Stat. L., 625.)



1. A former unit for use in charging containers with explosive comprising a ring securable in the loading aperture of a container, a handle member diametrically spanning the ring and fixed thereto, a member carried by the handle member centrally of the loading aperture of the container and a pair of cutting blades carried by the ring and handle members.

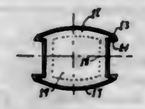
1,633,657. TIME-LOCK INDICATOR. THOMAS C. ADAMS, HAROLD A. NOYES, and EDWARD G. LAWRENCE, Minneapolis, Minn., assignors to O. B. McClintock Co., a Corporation of Minnesota. Filed Sept. 27, 1924. Serial No. 740,293. 7 Claims. (Cl. 177—311.)

1. In time clock mechanism, a plurality of lock-controlling clocks arranged for application within a vault, a time-of-release indicator arranged for application outside of the vault for continuously indicating the length of time remaining before release, and means whereby said indicator will be operated by the clock set for earliest lock-releasing action.

1,633,658. EYE-TESTING DEVICE. EARL J. BROWN, Chicago, Ill. Filed Oct. 26, 1922. Serial No. 596,922. 13 Claims. (Cl. 88—20.)

1. In an eye testing device, an optical lens system for observing the eye, a light transmission mirror disposed obliquely across the path of observation of said system and between said system and the eye under examination, means for projecting a beam of polarized light upon said mirror in such a manner that it will be reflected into the eye under observation, and an analyzer included in the lens system.

1,633,659. STEEL RAILING. FRANK CERNY, Berwyn, Ill. Filed Aug. 5, 1925. Serial No. 48,185. 4 Claims. (Cl. 256—72.)

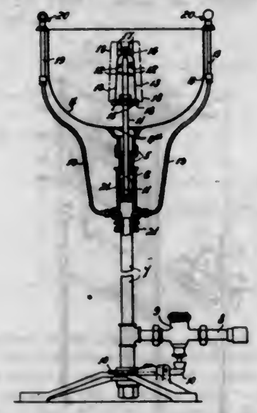


1. A fence or railing comprising a plurality of rolled-section metallic posts, and a cross rail extending through openings in said posts, said cross rail having a plurality of pairs of notches arranged to engage a portion of said posts for retaining said cross rail against lateral movement.

1,633,660. ARTIFICIAL TOOTH AND BRIDGEWORK. HENRY D. CHIPPS, Corinth, Miss. Filed Dec. 5, 1923. Serial No. 678,684. 1 Claim. (Cl. 32—9.)

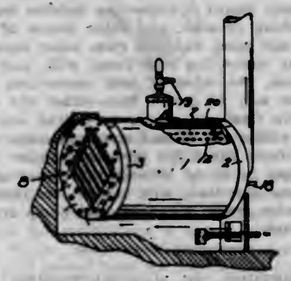
In an artificial tooth having an upwardly extending front face portion, a root extension, an occlusion element, a saddle portion for the occlusion element positioned in the rear of the upwardly extending portion, a socket extending lengthwise of the tooth, a peripheral seat formed by a portion of the tooth projecting from the face of the tooth approximately at right angles to the socket, an extending portion from the seat integrally connected with the tooth for the purpose of receiving the occlusion element and holding it firmly in position, and a pin for the occlusion element adapted to interlock in the socket.

1,633,661. PROCESS OF MAKING WATCHCASES. ISIDOR DINSTMAN, New York, N. Y., assignor to Diel Watch Case Company, a Corporation of New York. Filed July 27, 1926. Serial No. 125,218. 4 Claims. (Cl. 29—179.)



1. The process of making a watch case which comprises cutting out a piece from sheet metal, bending the edges to form a flange and integral lugs, and then thickening the metal that constitutes the lugs.

1,633,662. APPARATUS FOR WASHING GLASSES AND LIKE VESSELS. JOSEPH HENRY HARDIE, Morecambe, England. Filed Jan. 6, 1927, Serial No. 159,250, and in Great Britain Aug. 6, 1925. 2 Claims. (Cl. 141—3.)

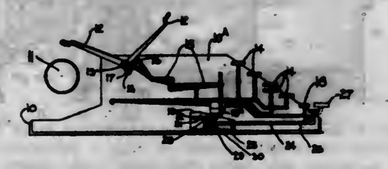


1. A washer for tumblers or the like, including a bowl, a water supply pipe projecting therethrough and terminating into a plurality of angularly disposed spray nozzles adapted to direct a spray tangentially upon the inner surface of a tumbler placed thereover, a rotary tumbler support mounted to rotate about said supply

pipe and support a tumbler to envelope said nozzles, a second supply pipe surrounding said support and adapted to direct a plurality of radial streams of water upon

the exterior of a tumbler placed upon said support, and means for connecting said supply lines to a source of water.

1,633,663. HIGH-PRESSURE STEAM BOILER. EDWIN A. HARDISON, Los Angeles, Calif., assignor to First National Bank & Trust Co., Santa Paula, Calif. Filed Apr. 18, 1921. Serial No. 462,100. 2 Claims. (Cl. 122—145.)



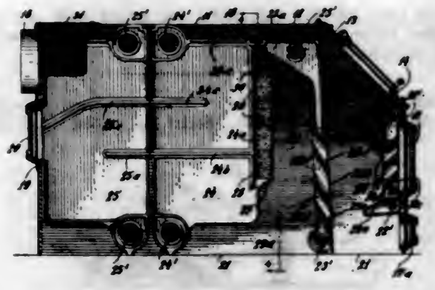
1. A steam boiler of the character set forth comprising a shell and two heads therefor to form a container, said heads provided with orifices and inner and outer grooved flanges; a flue open to said orifices and being formed with four flat sides having ends seated in said inner grooved flanges, said flue forming with said shell a chamber therebetween; criss-cross tubes for said flue communicating at their ends with said chamber; a flanged beam secured to the crown of said shell and forming a track; and a carriage secured to said flue and having an anti-friction trolley adapted to travel on said track to facilitate removal of the flue container when one of the heads is detached.

1,633,664. RADIATOR. LEWIS D. HARNETT, Columbus, Ohio, assignor to The Buckeye Blower Company, Columbus, Ohio, a Corporation of Ohio. Filed Aug. 30, 1926. Serial No. 132,435. 1 Claim. (Cl. 257—139.)

In combination, headers, a plurality of pipe members connected to said headers having flat sides and rounded ends, the distance between said sides being materially less than the distance between said ends, and a series of plates having sleeves thereon adapted to fit over said pipes, and means on the ends of said plates formed at right angles thereto having inwardly turned ends, said ends engaging with the rear surface of the next adjacent plate whereby said plates are spaced from one another by broad bearing surfaces engaging the rear sides of each plate.

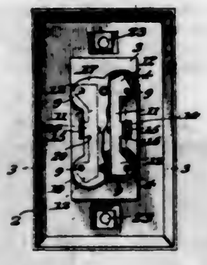
1,633,665. TYPEWRITER. JOHN HILGERT, Chicago, Ill. Filed July 6, 1925. Serial No. 41,586. 1 Claim. (Cl. 197—27.)

In a typewriter having a plurality of pivoted type-bars and mechanism for operating said type-bars, a pair of supports, an arm pivotally mounted on each support, a contact member connected with and extending between said arms, and adapted for movement with said arms, said contact member extending below said mechanism, a lever pivotally mounted on each of said supports below said arm, links connecting said levers with said arms, a spring connected to each of said levers for normally retaining said arms and contact member in lowered position, and a cross bar connecting said levers at their outer operative ends to afford simultaneous movement of same whereby a downward movement of the outer ends of said levers will cause an upward movement of said arms with the connecting contact member into engagement with the underside of said mechanism to thereby release the engaged type-bars.



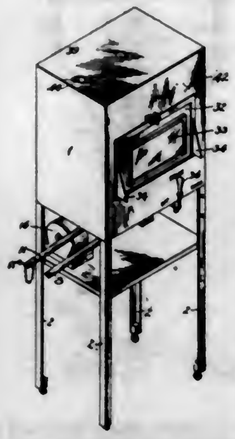
1,633,666. BOILER. FRANK B. HOWELL, Buffalo, N. Y. assignor to American Radiator Company, Chicago, Ill., a Corporation of New Jersey. Filed Dec. 23, 1920. Serial No. 432,687. 15 Claims. (Cl. 122—223.)

1. A boiler of the character described comprising front, rear and intermediate series of connected sections forming a fuel receptacle and a combustion chamber, and a series of connected sections constituting the back of the boiler; said series of sections disposed to the rear of the



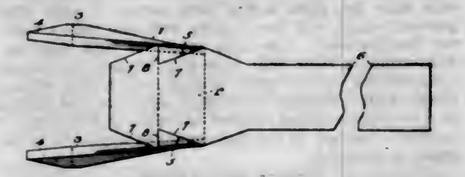
series constituting the front of said combustion chamber forming a series of flues extending from said combustion chamber to the smoke outlet of the boiler, substantially as specified.

1,633,667. BOILER. FRANK B. HOWELL, Buffalo, N. Y., assignor to American Radiator Company, Chicago, Ill., a Corporation of New Jersey. Filed Jan. 17, 1921. Serial No. 438,053. Renewed Nov. 22, 1926. 2 Claims. (Cl. 122—223.)



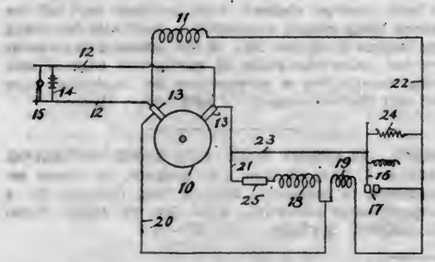
1. A boiler of the character described comprising front, rear and intermediate series of connected sections forming a fuel receptacle and a combustion chamber, and a series of connected sections constituting the back of the boiler; said series of sections disposed to the rear of the series constituting the front of said combustion chamber forming a series of flues extending from said combustion chamber to the smoke outlet of the boiler, each of said flues comprising a plurality of communicating parts arranged one above the other, substantially as specified.

1,633,668. DUPLEX RECEPTACLE. WILLIAM ILG, Jackson, Mich., assignor to Reynolds Spring Company, Jackson, Mich., a Corporation of Delaware. Filed May 5, 1926. Serial No. 106,972. 3 Claims. (Cl. 173—330.)



1. A duplex receptacle comprising a relatively thin face plate of insulating material provided at its inner face with spaced inwardly projecting enlargements having slots for the reception of knife contacts, spring contacts arranged within the slots of the enlargements, transversely spaced longitudinally disposed conductor bars bridging the intervening space between the enlargements and connecting the spring contacts and provided at the said intervening space between the enlargements with means for the attachment of electric wires.

1,633,669. DISHWASHING MACHINE. RUSSE J. IRVIN, Mount Vernon, N. Y., assignor to Robert C. Mitchell, Mount Vernon, N. Y. Filed May 19, 1923. Serial No. 640,035. 9 Claims. (Cl. 141—9.)



1. A dish washing machine comprising a housing, a dish washing chamber in the lower part thereof, a combined supply and rinse water tank located above said washing chamber having an overflow communicating with said dish washing chamber whereby said chamber may be filled through said tank, a movable dish support within said chamber, spraying means within the chamber for directing jets of water against dishes placed on said support, a pump, means of connection between said pump and said washing chamber, and other means of connection between said pump and said rinse water tank, means for alternately connecting said pump with, and disconnecting it from, the other of said connections at will whereby water may be drawn from either the washing chamber or the rinse water tank as desired, and a connection from said pump to said spraying means whereby water drawn from either the washing chamber or rinse water tank may be forced through said spraying means for the purpose described, with means for limiting the amount of water freely drawn by said pump from said rinse water tank.

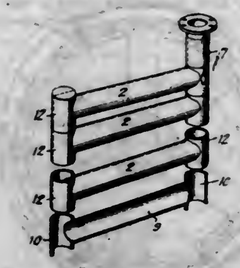
1,633,670. METHOD OF MANUFACTURING DRAFT YOKES. BYRON W. KADEL, Baltimore, Md., assignor, by mesne assignments, to The Symington Company, a Corporation of Maryland. Filed Sept. 2, 1922. Serial No. 585,946. 8 Claims. (Cl. 29—167.)

1. The method of manufacturing a hooded draft yoke which consists in forming the hooded end portion by piercing a billet, cutting away portions of oppositely disposed walls of said pierced billet, the uncut portions of said walls forming bands for connecting the other two oppositely disposed walls, undercutting the inner faces of said outer surfaces of said bands, and finally connecting the loop member at its free ends to said bands and to the adjacent uncut walls to complete the yoke.

1,633,671. GENERATOR REGULATION. BENNETT M. LEECE, Cleveland, Ohio, assignor to The Leece-Neville Company, Cleveland, Ohio, a Corporation of Ohio. Filed Dec. 10, 1925. Serial No. 74,450. 4 Claims. (Cl. 171—229.)

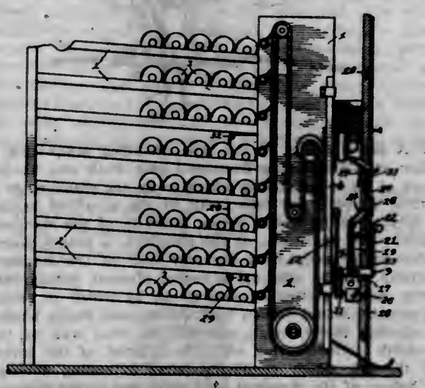
1. In a system of the character described, a generator, a regulator therefor comprising a vibratory member and a coil for vibrating the same, and means for causing the ampere turns of the regulator coil to be gradually increased for a time after the generator is started.

1,633,672. INDICATING INSTRUMENT. LEWIS A. MAPEL, St. Louis, Mo., assignor to The Automatic Appliance Company, St. Louis, Mo., a Corporation of Missouri. Filed Oct. 7, 1920. Serial No. 415,316. 13 Claims. (Cl. 73—54.)



1. An apparatus for indicating the head of a liquid in a vehicle tank wherein the liquid splashes while the vehicle is in motion, comprising, an indicating device connected with the tank and having an element which is responsive to the varying head of the liquid in the tank, means cooperating with and for establishing a datum level for said indicating device, including a cup arranged within the tank and spaced from the wall thereof, and a liquid gathering element arranged to engage the wall of the tank and leading to said cup in order to maintain such datum level uniform.

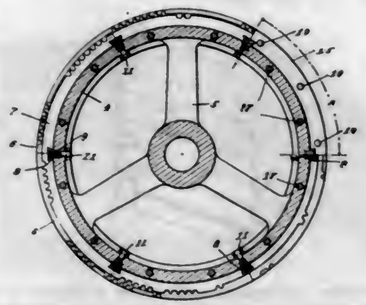
1,633,673. LIQUID-LEVEL GAUGE. LEWIS A. MAPEL, St. Louis, Mo., assignor to The Automatic Appliance Company, St. Louis, Mo., a Corporation of Missouri. Filed Oct. 25, 1920. Serial No. 419,552. 7 Claims. (Cl. 73—54.)



1. An apparatus for indicating the head of a liquid in a vehicle tank wherein the liquid splashes while the vehicle is in motion, comprising, an indicating device connected with the tank and having an element which is responsive to the varying head of the liquid in the tank, means cooperating with and for establishing a datum level for said indicating device, including a cup arranged within the tank and spaced from the wall thereof, and a liquid gathering element arranged to engage the wall of the tank and leading to said cup in order to maintain such datum level.

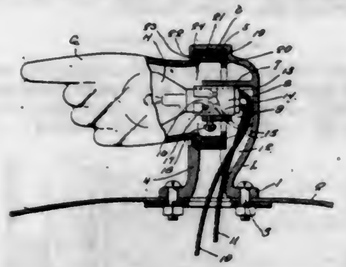
1,633,674. BOILER. THOMAS E. MURRAY, Brooklyn, N. Y. Filed July 10, 1922. Serial No. 573,928. 3 Claims. (Cl. 122—226.)

1. A boiler including in combination a number of units each comprising a pair of headers and communicating tubes spaced apart from each other and extending between said headers; each unit being formed of a number of identical sections comprising a communicating tube with a short tubular member across each end, which tubular members are butt welded to one another end to end to form the headers; and each such section being formed of two identical segments butt welded to each other along their edges, each segment being an integral piece of sheet metal of uniform thickness, the central part of which constitutes substantially one-half of a communicating tube and the ends of which constitute halves of said short tubular members.



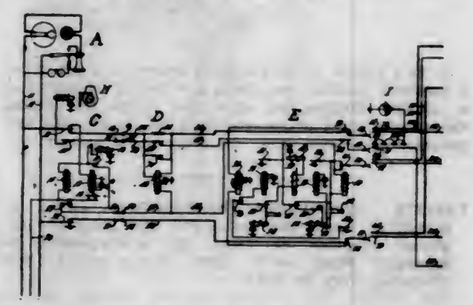
1,633,675. COIN-CONTROLLED ACTUATING MECHANISM FOR DISPENSING MACHINES. FREDERICK R. OLIVER, Los Angeles, Calif. Filed Jan. 16, 1926. Serial No. 81,682. 4 Claims. (Cl. 194—85.)

1. A coin controlled operating mechanism for dispensing machines comprising a pivotally movable arm provided with an arcuate downward lateral extension formed upon the outer end thereof and having a slot formed longitudinally therein to receive and normally retain a coin, the arcuate sides of the slots being arranged to engage the adjacent faces of the coin to hold said coin against pivotal movement within the slot; a lever pivotally mounted upon an axis in common with the arm,



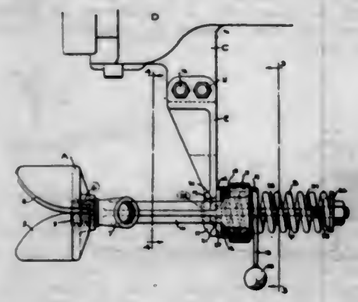
said lever being normally movable past the extension and arranged to engage a coin held in the slot of said extension; and means for pivotally moving the lever to engage the coin and thereby move the arm to operate the dispensing mechanism.

1,633,676. PATTERN CYLINDER FOR KNITTING MACHINES. WILLIAM S. PARKER, Rockford, Ill., assignor to Burson Knitting Company, Rockford, Ill., a Corporation of Illinois. Filed June 25, 1924. Serial No. 722,197. 11 Claims. (Cl. 66—66.)



1. A pattern cylinder comprising a drum, plural series of elongated segmental pattern plates detachably mounted on the periphery of the drum, each of said plates being peripherally contoured to a predetermined desired form, and means for holding the plates of the different series in end to end alignment.

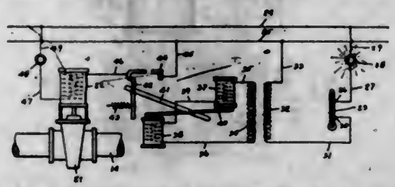
1,633,677. AUTOMOBILE SIGNAL DEVICE. FRANCIS A. PURCELL, Brooklyn, N. Y. Filed Mar. 20, 1925. Serial No. 17,099. 4 Claims. (Cl. 177—329.)



2. A signal device of the type described comprising a hollow standard having front and rear walls and having means at its lower end by which to fix the standard to a suitable support, the front wall of the standard having an opening therethrough facing laterally of the standard adjacent the upper end of the standard, a hollow sleeve projecting laterally from the rear wall of the standard centrally of said opening, a socket element within said sleeve, means carried by said sleeve by which to retain the socket element within said sleeve, said sleeve having an opening therethrough adjacent the rear wall of the standard communicating with the interior of the standard through which conductor wires extending through the hollow of the standard may reach the socket element, a lamp carried by the socket element projecting exteriorally of the standard through the opening, a hollow glass indicating element telescoping over said lamp and having an attaching portion projecting into said opening, a cushion element surrounding the attaching portion of the indicating element and fitting snugly between said attaching portion and the surrounding wall of the opening, said cushion element having a part interposed between the end edge of the indicating element and a rear wall portion of the standard to resiliently limit the movement of the indicating element into said opening, a separately formed retaining member engaging between the indicating element and a wall portion of said opening to retain the indicating element in close engagement with said cushion element, and the rear wall of the standard being shaped to provide a vertically extending recess internally at the rear of the standard continuous above and below the plane of the bottom edge of said opening constituting a passage-way for conductor wires about said cushion element to said socket element.

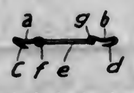
1,633,678. ELAPSED TIME AND ZONE METERING. ARTHUR J. RAY, Chicago, Ill., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill., a Corporation of Delaware. Filed Jan. 22, 1923. Serial No. 614,093. 9 Claims. (Cl. 179—9.)

1. In a multi-office telephone system, automatic switches including a selector for setting up local connections in each exchange, a repeater for cooperating with said selector to establish inter-exchange connections, elapsed time meters for the calling subscribers, a constantly operating meter mechanism connected to certain bank contacts of the selector and directly effective, when such selector is used to set up a local connection to operate the meter of the calling party periodically for the duration of a call, an auxiliary switch associated with said repeater having a wiper connected to other bank contacts of said selector, other meter operating mechanisms accessible to said wiper, and circuit arrangements such that when an inter-exchange connection is established said auxiliary switch wiper is positioned to cause the calling party's meter to be directly operated by a particular one of said last mechanisms instead of by the first.



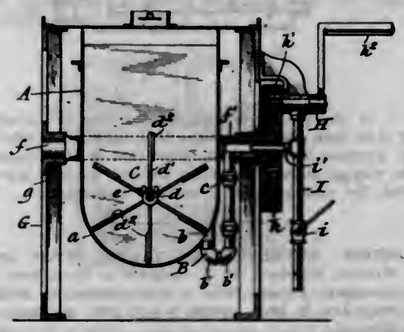
1,633,679. AUTOMATIC TRAIN-PIPE COUPLING. JOSEPH ROBINSON, New York, N. Y. Filed Nov. 23, 1920, Serial No. 426,025. Renewed Nov. 12, 1925. 18 Claims. (Cl. 285—58.)

1. In an automatic train pipe coupling, the combination of a coupling head and a supporting bracket therefor, of means for extending said head and for varying



the distance between the head and said bracket, said means comprising a spring the coils of which are adapted to be deflected or constrained when mating coupling heads couple up in service, and a device engaging one end of said spring and serving to adjust said head forward of the bracket without varying the number of coils of the spring that are deflected or constrained upon coupling of said mating heads, and means for anchoring the other end of said spring to said bracket.

1,633,680. TEMPERATURE CONTROL. JOHN J. SCHLOSSER, Frankfort, Ind., assignor to Schlosser Brothers, Frankfort, Ind., a Corporation. Filed Feb. 2, 1926. Serial No. 85,529. 3 Claims. (Cl. 236—78.)

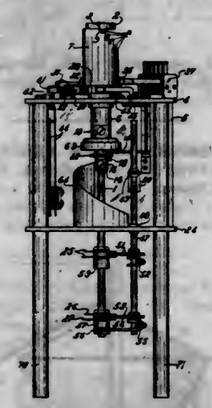


1. In a heating system, the combination of a source of energy, a source of heat, a valve therefor, an electrical circuit connected to said source of energy and controlling the valve including a switch, another circuit connected to the source of energy and including a temperature responsive switch, and a third circuit magnetically connected to the last mentioned circuit and including means mechanically connected to said first mentioned switch for controlling the same, whereby said last mentioned circuit controls said first mentioned switch.

1,633,681. FASTENER PARTICULARLY FOR BANDAGES. RICHARD SCHUFTAN, Wilmersdorf, near Berlin, Germany. Filed Apr. 5, 1926, Serial No. 99,826, and in Germany Apr. 15, 1925. 3 Claims. (Cl. 24—87.)

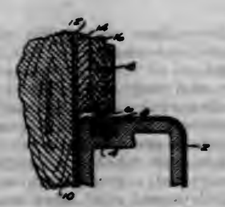
1. A fastening, particularly for bandages, consisting in combination of two hook shaped members having back portions curved inwardly towards the open side of the hook and oppositely disposed teeth lying somewhat parallel to the inclined portion of the back located opposite thereon; an elastic medium connecting said portions with each other; and means provided on said members serving to secure the elastic medium.

1,633,682. CONCRETE MIXER. KARL R. SCHUSTER, Hopatcong, N. J. Filed Apr. 28, 1924. Serial No. 709,483. 12 Claims. (Cl. 83—73.)



1. In a mixer, a dumpable receptacle, an agitator mounted within said receptacle and movable therewith in the discharge of a mixed mass therefrom, and means for feeding fluid under pressure, whereby the energy of said fluid is utilized for rotating said agitator and for agitating the materials composing the mass within the receptacle.

1,633,683. CELLULOSE-ESTER COMPOSITION. GEORGE L. SCHWARTZ, Wilmington, Del., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a Corporation of Delaware. Filed June 15, 1923. Serial No. 645,677. 41 Claims. (Cl. 134—79.)



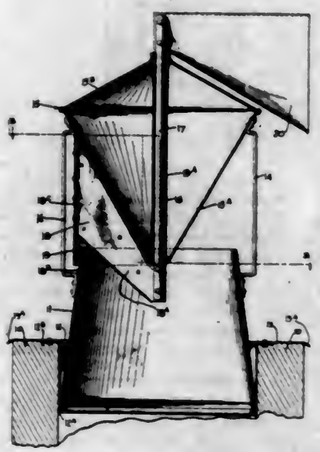
1. A composition of matter comprising nitrocellulose and a mixed ester of a lower and a higher saturated fatty acid, the alcohol radical of said ester being that of a polyhydric alcohol having between 1 and 4 hydroxyl groups.

1,633,684. AUTOMATIC TELEPHONE-SWITCHING APPARATUS. HANS SENGEBUSCH, Chicago, Ill., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill., a Corporation of Delaware. Filed Aug. 27, 1925. Serial No. 52,731. 40 Claims. (Cl. 179—27.5.)

1. An automatic switching mechanism having a vertically and radially movable shaft provided with wipers, terminals arranged in horizontal rows accessible to said wipers, an electromagnet having only one pawl operated thereby, means including said electromagnet and pawl for moving said wipers vertically to select a certain desired row, and for then moving said wipers radially to select certain terminals within said row, said means also operative for moving said wipers into normal position.

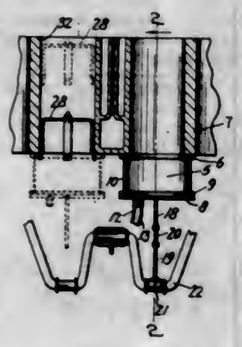
1,633,685. BUILDING STRUCTURE COMPRISING WATER RECEPTORS. CHARLES W. STARK, Trenton, N. J. Filed Dec. 30, 1926. Serial No. 157,916. 3 Claims. (Cl. 72—0.5.)

1. In a building construction a wall, a water receptor of the type described having a portion built into the wall, a recess with a restricted opening formed in the upper



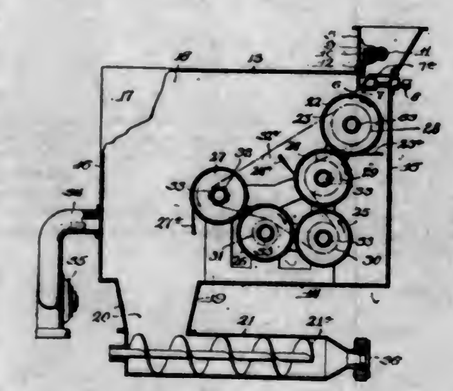
face of that portion of the receptor which extends into the wall, a metal plate anchored by cement in said recess and extending upwardly therefrom, and cement, forming part of the wall, embracing the upper portion of said metal plate but not anchored thereto, whereby a joint is formed between the receptor and the wall which will provide a water stop both at the time when the receptor is built into the wall and after relative movement of the receptor and the wall has taken place.

1,633,686. GOLF TEE. ANDREW J. STONE, Paris, France. Filed Sept. 11, 1926. Serial No. 134,788. 5 Claims. (Cl. 273—33.)



5. A golf tee comprising a pin having a cup shaped head and a subuliform rubber protective casing disposed about said pin.

1,633,687. CHIMNEY-DRAFT REGULATOR. JOSEF SUBERT, Oak Park, Ill. Filed Oct. 1, 1924. Serial No. 741,074. 5 Claims. (Cl. 98—71.)

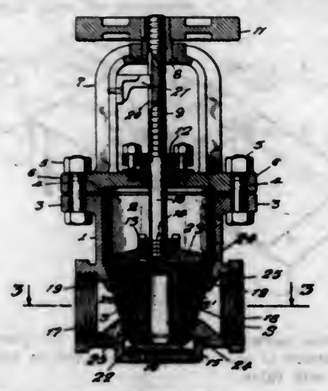


1. In a chimney draft control, the combination of a body adapted for mounting on the top of a chimney, a deflector having an inverted conical surface and being mounted above said body and rigidly thereto, a tubular member extending vertically and centrally through said deflector, a rotatably mounted mast comprising a round bar passing through said tubular member and projecting above and below said deflector, a shield positioned between said body and said deflector, said shield being rigidly connected to said mast below said deflector, and means responsive to wind pressure for controlling the position of said shield, said means comprising a sheet metal vane rigidly connected to the upper portion of said mast.

1,633,688. WASTE RECEIVER. MAXIMILIAN W. THARTE, Denver, Colo. Filed Nov. 2, 1926. Serial No. 145,868. 2 Claims. (Cl. 51—270.)

1. The combination of a waste receiver comprising a receptacle adapted to engage an open-ended engine block below the cylinder, and means cooperative with the crank shaft for holding the receptacle in engagement with the block.

1,633,689. PROCESS OF TREATING SOAP. ADOLPH F. THAL, Chicago, Ill. Filed July 16, 1925. Serial No. 44,082. 2 Claims. (Cl. 87—16.)

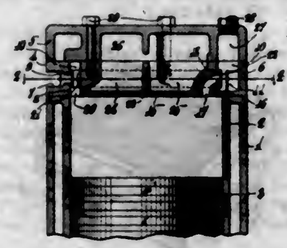


1. In the process of treating soap for the production of cake soap and soap flakes in a chamber in which the air pressure is maintained below that of the atmosphere, the step of milling saponified material as it is taken hot from the soap kettle in a rarefied atmosphere.

1,633,690. NONREVOLUBLE VALVE. WYLIE GEMMEL WILSON, Elizabeth, N. J., assignor to Loose Seat Valve Company, Dover, Del., a Corporation of Delaware. Filed Jan. 6, 1926. Serial No. 79,576. 2 Claims. (Cl. 251—61.)

1. A conical sealing member of dense, slightly compressible material; means for reciprocating said member; a cooperating, conical sealing wall provided with

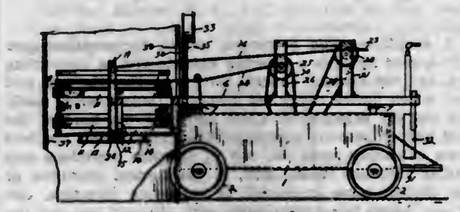
ports; the sealing member having, opposable to each port, a recess longer in the direction of the movement of the sealing member than the corresponding dimension



of the immediately opposable port, the recesses being spaced apart and each wholly enclosed by a sealing face contactible with the conical sealing wall around the ports.

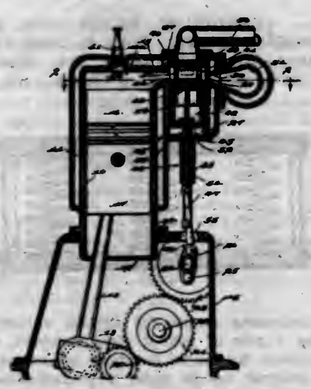
1,633,691. PRINTING PRESS. MARTIN W. BRUESHABER, Chicago, Ill., assignor to Goss Printing Press Company, Chicago, Ill. Filed July 2, 1923. Serial No. 648,958. 11 Claims. (Cl. 101—152.)

1. An intaglio printing press including in combination a printing couple including a full width intaglio printing cylinder, a plurality of narrow width intaglio cylinders variably positionable across the press relatively to the full width intaglio cylinder and relatively to each other and a corresponding plurality of devices for individually inking the narrow intaglio cylinders, each of which is independently variably positionable across the press.



1,633,692. VALVE MECHANISM. LEWIS J. CLAPP, Claremont, N. H., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Mar. 18, 1921, Serial No. 453,513. Renewed Sept. 28, 1926. 21 Claims. (Cl. 230—34.)

1. In a compressor valve mechanism, coaxial valve seating surfaces, inlet and discharge ports traversing said surfaces, and a single radially flexible valve cooperating with said ports.



13. In a pump valve mechanism, a housing having a chamber formed therein, a portion of whose inner periphery is semi-cylindrical and also provided with a portion cut back opposite said semi-cylindrical portion, a member disposed within said chamber and having a portion of its periphery semi-cylindrical, a portion opposite said semi-cylindrical portion cut back from a cylindrical surface, the semi-cylindrical portions of said member and said housing being disposed opposite the cut back portions of the housing and member, ports traversing the semi-cylindrical portions of the peripheries of the member and housing, a single valve member cooperating with said ports, flow passages communicating with said ports, and flow passages communicating with the cut back portions of said member and housing.

1,633,693. CUPOLA-CHARGING CAR. JOSHUA K. CLUTTS, Detroit, Mich. Filed Sept. 21, 1925. Serial No. 57,586. 25 Claims. (Cl. 214—18.)

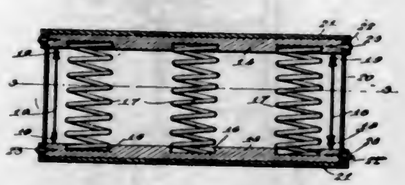
1. In combination, a receptacle having an outlet at its lower end, a pair of downwardly opening pivotal closures controlling said outlet, and a pair of toggle links connecting said closures and establishing a common control thereof, and positioned beneath said receptacle.

1,633,694. ENGINE VALVE. ARTHUR E. COLCHESTER, Dorchester, Mass. Filed Nov. 13, 1925. Serial No. 68,860. 5 Claims. (Cl. 123—79.)

1. In an internal combustion engine, the combination of a cylinder having a port, a valve casing connected with the cylinder, a stationary sleeve in the casing spaced from the casing to provide an annular passage, said sleeve having ports connecting the interior of the sleeve with said passage, an exhaust port in the casing in communication with the passage, a sleeve slidably mounted between the stationary sleeve and the casing and adapted to cover the ports in the casing, cylinder, and stationary sleeve a piston valve slidably mounted in the stationary sleeve and adapted to control the ports in said sleeve, means for reciprocating the slidable sleeve and piston valve and an intake pipe connected with the casing above the stationary sleeve, so that when the piston valve is

moved to the opposite end of the sleeve, said valve will aid in drawing in a fuel charge into the sleeve, in advance of the opening of the ports in said sleeve by the piston valve.

1,633,695. STEERING-GEAR-CENTERING DEVICE. GEORGE F. COLLEY, Richmond, Va., assignor to Hugh H. Weedon, Richmond, Va. Filed July 30, 1925. Serial No. 47,129. 1 Claim. (Cl. 280—93.)

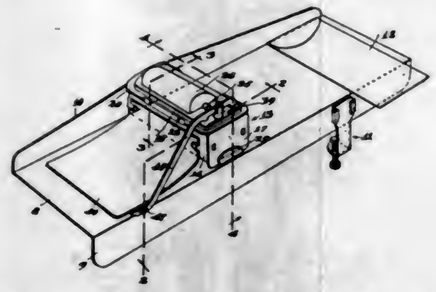


A stabilizing and protecting device for steering gear which gear includes a steering knuckle arm, a connecting rod, and the steering knuckle bolt connecting the arm and rod, which device comprises a substantially conical resilient coil for engagement about and over the head of the said bolt to prevent accidental loss thereof, and resilient arms extending from the coil in opposite directions and having terminal hooks, both, in the normal condition of the device, being presented in the same direction, one of said hooks being engageable with the said rod and the other engageable with the steering knuckle arm.

1,633,696. STENCIL SHEET. ALEX BROOKING DAVIS, Cincinnati, Ohio, assignor to A. B. Dick Company, Chicago, Ill., a Corporation of Illinois. Filed Oct. 26, 1925. Serial No. 65,051. 18 Claims. (Cl. 41—38.6.)

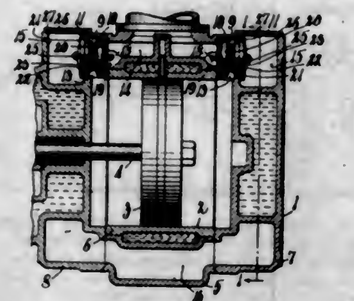
1. A type-impressible stencil sheet comprising a porous base having a coating including pectin.

11. As a new article of manufacture, coagulated pectin.



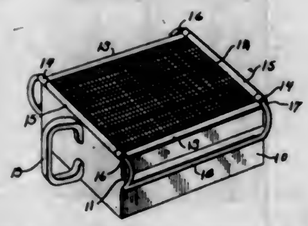
1,633,697. CUSHIONING MEANS FOR TILTABLE AUTOMOBILE SEATS. CECIL C. DAVIS and GEORGE I. CLARKE, West Palm Beach, Fla. Filed June 3, 1926. Serial No. 113,518. 2 Claims. (Cl. 267—70.)

1. A cushioning means for tiltable automobile seats comprising a pair of spaced rigid members, a resilient means between the spaced members, means for maintaining the resilient means under a predetermined tension and for retaining the rigid members in spaced relation, a covering secured to the end and side edges of the rigid members and forming a closure to house the resilient means.



1,633,698. ENVELOPE SEALER. DWIGHT C. DAVIS, Monterey Park, Calif. Filed Feb. 16, 1925. Serial No. 9,409. 5 Claims. (Cl. 91—54.4.)

4. An envelope sealing device of the character described, comprising a base plate having an upwardly projecting side flange, a housing carried by said flange and projecting above the upper surface of the base plate in spaced relation thereto, an inclined tray arranged beneath said housing, an absorptive pad carried by said tray, a reservoir carried by said housing having a discharge orifice through which liquid may be delivered to the upper portion of said tray, a valve normally closing said orifice, and a lever for opening said valve having an



end portion normally projecting below the plane of the upper surface of said base plate adapted on being lifted to open said valve.

1,633,699. COMPRESSOR OR PUMPING MECHANISM. FRANK A. HALLECK, Michigan City, Ind., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Mar. 14, 1924. Serial No. 699,191. 14 Claims. (Cl. 230—34.)

1. In a pump, a cylinder, a head therefor, a valve cage, means common to said cylinder, said head and said cage for holding said several elements assembled, and means whereby said cage is removable while said head is retained in its operative relation to said cylinder.

1,633,700. GRATER. CHARLOTTE B. HAWKINS, Parkdale, Ark. Filed June 7, 1926. Serial No. 114,339. 3 Claims. (Cl. 146—180.)

1. In combination, a receptacle, a grate constituting a closure therefor and comprising a foraminated body portion, metallic members binding the edges of said body portion, a reinforcing frame-like structure forming part

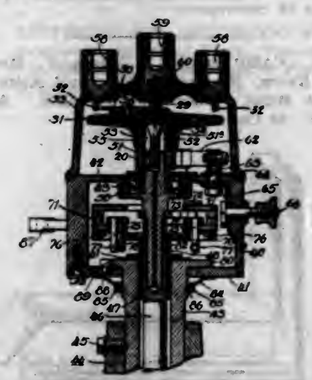
of the grate and extended beyond the sides thereof to provide handles, and means carried by the receptacle and cooperating with said handles for holding the grate against displacement upon the receptacle.

1,633,701. SOUNDING LINE. ELBERT J. HAYNES, Cleveland, Ohio. Filed Jan. 18, 1926. Serial No. 82,161. 8 Claims. (Cl. 137—90.)

1. A cable comprising a hose, an elongated flexible tension member substantially covering said hose, a tubular armor embracing said tension member comprising groups of sections seating lengthwise of the cable upon each other, and abutments fixed upon said tension member beneath said groups, each abutment receiving the accumulated thrust of the armor sections of the overlying group and transmitting such thrust to said tension member.

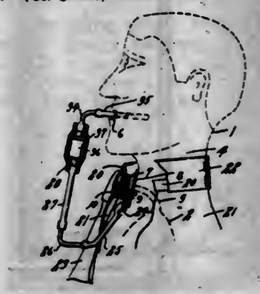
1,633,702. BUILDING STRUCTURE. JAMES MONROE HEWLETT and RICHARD BUCKMINSTER FULLER, Lawrence, N. Y., assignors to Stockade Building System, Inc., a Corporation of New York. Filed Oct. 8, 1926. Serial No. 140,234. 5 Claims. (Cl. 72—45.)

1. A building structure comprising a stockade-like series of vertical concrete columns, horizontal concrete beams substantially integral therewith connecting said columns, and adapted to distribute a load thereto, non-integral beams having ends resting on said horizontal concrete beams and compressible fibrous blocks embracing said concrete elements and filling the air spaces between them, and also embracing the ends of said non-integral beams whereby said non-integral beams are located in proper spaced relation to each other and the spaces between the ends thereof are substantially sealed.



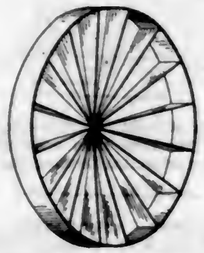
1,633,703. SIGN-MAKING DEVICE. JIRO KAJI, Vancouver, British Columbia, Canada. Filed Oct. 18, 1924. Serial No. 744,484. 2 Claims. (Cl. 33—174.)

1. A device for facilitating the painting of signs comprising a body having a straight edge and also having at its straight edge side a projection shaped to form a letter of the alphabet; said body also having on its face and



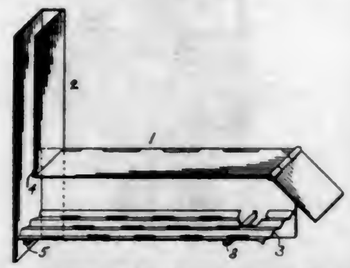
extending from its straight edge scale lines defining fractions of an inch, the scale lines being positioned at opposite sides of the projection forming the letter.

1,633,704. IGNITION APPARATUS. RAYMOND P. LANSING, Montclair, N. J., assignor to Eclipse Machine Company, Elmira, N. Y., a Corporation of New York. Filed Mar. 17, 1924. Serial No. 699,834. 3 Claims. (Cl. 200—21.)



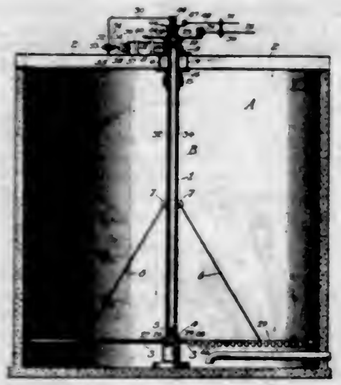
2. A breaker-distributor unit comprising a casing, a supporting sleeve mounted in fixed position and extending through a wall of said casing, said sleeve having an annular flange engaging the inner surface of said wall, a spring washer extending around said sleeve and engaging the outer surface of said wall opposite said flange, and means including a locking ring for detachably securing said spring washer in position.

1,633,705. BREATHING AND VOCAL ATTACHMENT. ELMER I. MCKESSON, Toledo, Ohio, assignor to The Vocophone Company, Toledo, Ohio, a Corporation of Ohio. Filed June 22, 1925. Serial No. 38,680. 7 Claims. (Cl. 3—1.)



1. The combination with a lung duct connection of an air column vibrator, a duct connection thereo, of a check valve for permitting intake air to said connection to by-pass said vibrator.

1,633,706. X-RAY SCREEN FOR TAKING SKIAGRAMS. RUDOLF MANNL, Karlsbad, Czechoslovakia. Filed July 9, 1925, Serial No. 42,503, and in Czechoslovakia July 11, 1924. 4 Claims. (Cl. 250—34.)

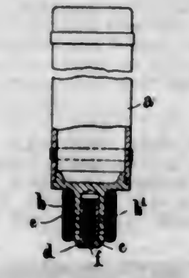


1. An X-ray screen having plates converging in a common point, said plates being of decreasing height toward said point of convergence.

1,633,707. CAMP STOVE. GEORGE F. MILLER and FLOYD KEITH, Menomonie, Wis.; said Keith assignor to said Miller. Filed May 17, 1924. Serial No. 713,910. 12 Claims. (Cl. 126—9.)

1. In a camp stove, a three-part hinged body portion, and a rigid chimney detachably coacting therewith of size permitting insertion therein of said body portion.

1,633,708. AGITATOR. ROLAND E. MINOGUE, Manitowoc, Wis., assignor of one-third to Henry Vanderwerp, Manitowoc, Wis. Filed Sept. 28, 1925. Serial No. 59,100. 22 Claims. (Cl. 259—24.)



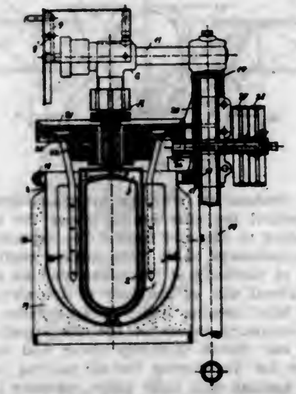
1. In an agitator, the combination of a rotatable shaft, means for rotating said shaft, an agitator bar secured to said shaft, a source of supply of air under pressure, means defining channels adapted to communicate with said source of air supply comprising pipes the discharge ends of which, respectively, are positioned on the agitator bar at different distances from the axis of the agitator shaft, and means for controlling the admission of air from said source of air supply to said distributing channels operating to admit air thereto during predetermined spaced intervals of time.

1,633,709. FILTERING ELEMENT. JOHN J. NAUDLE, Brooklyn, N. Y. Filed Jan. 12, 1924. Serial No. 685,822. 23 Claims. (Cl. 210—195.)

1. A filtering element comprising a metal screen provided with an edge binding of U-shaped cross-section and consisting of perforated metal.

1,633,710. TRENCH MORTAR AND THE LIKE. HENRY NEWTON, Darley, near Derby, England. Original application filed Nov. 17, 1917, Serial No. 202,475, and in Great Britain Mar. 22, 1916. Divided and this application filed Mar. 11, 1922. Serial No. 543,001. 5 Claims. (Cl. 102—29.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

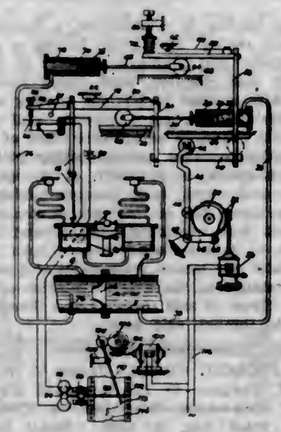
1. A charge for trench mortars and other low pressure guns comprising a metal container having gas apertures, a primary charge within said container, and a secondary charge spaced from said primary charge by said container.



3. A projectile for trench mortars and other low pressure guns comprising a body portion containing explosive, tail vanes secured upon the end of said body portion, and a propellant charge located and retained between said vanes.

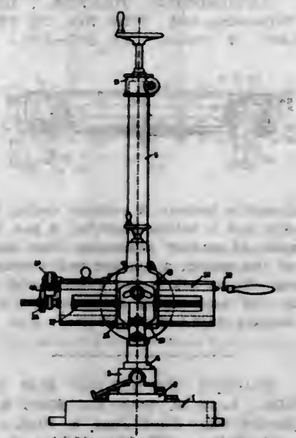
1,633,711. VITAMIN FOOD PRODUCT AND METHOD. ROBERT K. PRINCE, Westfield, Mass., assignor to Vitamin Food Co., Inc., New York, N. Y., a Corporation of Delaware. Filed Jan. 2, 1925. Serial No. 280. 12 Claims. (Cl. 99—11.)

3. A vitamin food product consisting of granules of dried yeast, each granule being impregnated with an oil rich in vitamin A and coated with a film of edible air-excluding substance.



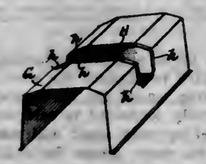
10. The method of producing a vitamin-containing foodstuff which consists in mixing a dried yeast in granular form with an oil rich in vitamin A until the granules absorb the oil and thereafter thoroughly stirring into the mass of oil-impregnated granules a solution of Karaya gum and then drying said mass, whereby each granule is provided with an air-excluding film.

1,633,712. ICE-MAKING MACHINE. MAX RIBI, Zurich, Switzerland, assignor to Catharina Ribi, Zurich, Switzerland. Filed Sept. 14, 1925, Serial No. 56,854, and in Switzerland Sept. 29, 1924. 5 Claims. (Cl. 62—105.)



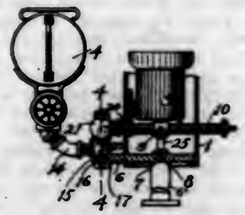
1. In an ice making machine, an upright support, a pair of superposed horizontal supporting members carried by said upright support, a valve casing mounted upon the upright support above the upper horizontal supporting member, an outer receptacle detachably suspended from the lower horizontal supporting member, a pair of cylinders disposed one within the other and forming an expansion chamber between them, said cylinder being arranged with the receptacle so as to form a freezing chamber between the receptacle and the inner cylinder, suspending means for said cylinders extending upwardly through the upper horizontal supporting member and fastened to the valve casing, said suspending means being provided with refrigerant flow passages connecting said valve casing and expansion chamber, and valve means in the valve casing for controlling the flow of the refrigerant.

1,633,713. COMPOUND SYSTEM FOR TRANSMITTING A PLURALITY OF VALUES. ERICH ROUČKA, Blansko, Czechoslovakia. Filed Jan. 15, 1924, Serial No. 686,329, and in Czechoslovakia Jan. 15, 1923. 2 Claims. (Cl. 177—351.)



1. In a system for transmitting variable conditions, the combination of a plurality of sensitive devices each movable responsive to and corresponding to variations in the magnitude of one of a plurality of different component conditions, a lever system including a plurality of levers, means connecting one end of one of said levers to one of said devices, means connecting the other end of said lever to one end of a second lever, means connecting the other end of said second lever to one end of a third lever, means for applying a constant auxiliary force to the other end of said third lever, a movable fulcrum intermediate the end of each of said levers, means for varying the position of the fulcrum of the second lever in regular cycles of equal intervals of time, means cooperating with the first-mentioned end of said first-mentioned lever for producing impulses of auxiliary energy, and operative connections between each of the fulcrums of the first-mentioned lever and the third lever and two others of said sensitive devices respectively for varying the positions of said fulcrums corresponding to the magnitudes of the respective component conditions, whereby during each of said cycles an impulse of auxiliary energy is produced the time position of which in said cycle is a function of the resultant value produced by compound action of said component conditions.

1,633,714. UNIVERSAL AND AUTOMATIC MACHINE TOOL. ALEXANDER SCHWOB, Paris, France. Filed June 6, 1923, Serial No. 643,699, and in France June 2, 1922. 6 Claims. (Cl. 29—33.)

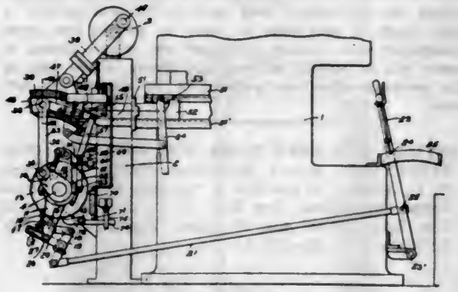


1. In a universal and automatic machine tool, a base plate, a column on the base plate, a sleeve on the column, collars on the sleeve, rods movable in said collars, a plate fixed to said rods to serve as carrier for interchangeable tools, means to adjust the latter, means to ensure the automatic advance and stroke of the tool, in the necessary direction, and means to operate the machine.

1,633,715. CONCRETE FORM FOR BUILDING CONSTRUCTION. ELWYN EGGLESTON SEELYE, New York, N. Y., assignor of one-half to National Concrete Metal Forms Corporation, New York, N. Y., a Corporation of New York. Filed Apr. 23, 1924. Serial No. 708,379. 7 Claims. (Cl. 25—131.5.)

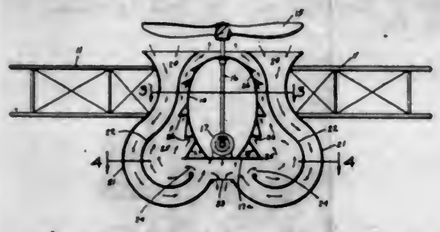
1. In a structure of the class described, a mold provided with a transverse slot and a header-beam mold positioned in said slot and separable from said mold.

1,633,716. BURNER FOR HOT-WATER HEATERS. PETER S. SINCLAIR, Holyoke, Mass. Filed May 8, 1923, Serial No. 637,478. Renewed Sept. 22, 1926. 8 Claims. (Cl. 158—36.)



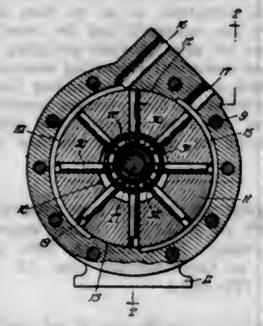
1. In a burner, a burner element, a bearing plate for supporting the burner, said plate having an arc-shaped groove therein and an opening concentric with said groove, an oil supply pipe on which the burner element is mounted, pivotally secured in the opening in the bearing plate, and a support for the burner element secured to the oil supply pipe and disposed in the arc-shaped groove.

1,633,717. AUTOMOBILE HEATER. HERBERT B. TYLER, Valparaiso, Ind. Filed Nov. 22, 1923. Serial No. 676,452. 9 Claims. (Cl. 257—136.)



4. In automobile heaters, a suitable casing having side and end walls and a bottom therefor, a pan having side and end walls of smaller dimension than the side and end walls of the casing, a heating unit contained in the pan, pivoted elbows below the casing, and means for holding the pan and casing in assembled relation between the heating unit and the elbows.

1,633,718. SPACING MECHANISM FOR PUNCHING MACHINES. LARS H. VOLD and KARL R. HAMMERSTROM, Butler, Pa. Filed June 2, 1926. Serial No. 113,152. 21 Claims. (Cl. 164—116.)



1. In a punch press a feed mechanism comprising a work carrier adapted to advance the work in the path of the punch, actuating means for the carrier comprising a feed shaft operatively connected to said carrier, a ratchet mechanism carried by said shaft and adapted to intermittently rotate the same, means for automatically operating said ratchet mechanism, manually operated means for said ratchet mechanism to advance the work carrier to a predetermined starting point.

1,633,719. AIRPLANE. HENRY WISSE, Anderson, Ind. Filed Sept. 28, 1926. Serial No. 138,205. 4 Claims. (Cl. 244—18.)

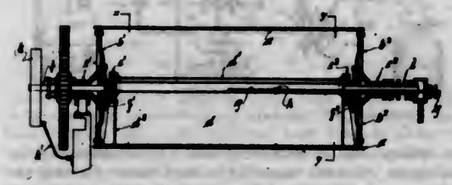
1. The combination with an airplane having a body, of a horizontal propeller central above the body of the plane tending to lift and control the vertical movement thereof, a horizontal baffle plate secured centrally on the underside of the body of the plane, and an air chamber on each lateral side of the body of the airplane having an upper inlet opening under said propeller for receiving the downward thrust of the air therefrom and at its lower end curved upwardly under and towards said baffle plate for discharging the air passing therethrough upwardly against said baffle plate, whereby the air currents through said chambers will tend to lift the body of the airplane and resist swaying movement of the airplane while rising or descending.

1,633,720. PUMP. IRVEN H. WILSEY, Chicago, Ill., assignor to J. B. Tuthill, Chicago, Ill. Filed Aug. 24, 1925. Serial No. 51,917. 6 Claims. (Cl. 103—120.)

1. A pump having, in combination, a hollow casing, a rotor in said casing, said rotor having a central cylindrical chamber and having a plurality of radial bores opening into said chamber, said casing having a pair of diametrically opposed projections bearing against said rotor and dividing the space between said casing and said rotor into chambers at opposite sides of said rotor, inlet and outlet passages communicating with said last mentioned chambers, a plurality of plungers slidably mounted in said bores, each plunger having a lateral notch on its inner end, and adjustable cam means positioned in said first mentioned chamber and engaging in said notches to actuate said plungers upon rotation of said rotor, said cam means being adjustable between said projections relative to the axis of rotation of said rotor to vary the throw of said plungers and thereby vary the flow of liquid through said pump.

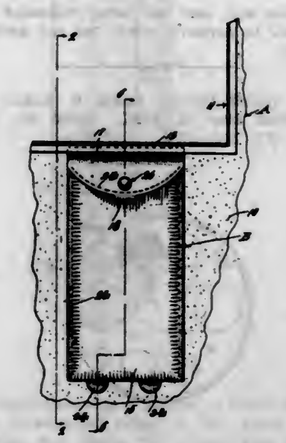
1,633,721. FOLDING CHAIR. JAMES V. YOUNG, Rushville, Ind., assignor to The Standard Manufacturing Company, Cambridge City, Ind., a Corporation of Indiana. Filed Aug. 8, 1923. Serial No. 656,398. 1 Claim. (Cl. 155—142.)

A folding chair comprising spaced front legs, a back fixed to and between the upper end portions of said front legs, rear legs having their upper ends between the front legs and pivoted to said front legs beneath the lower end of the back, a seat extending between the front legs and pivoted between its front and rear ends to the front legs below the back and below the pivotal connection of the rear legs with the front legs,



the main body of said seat extending between the rear legs and having sliding interlocking connections with said rear legs, said seat body when in operative position being spaced below the lower end of the back and between the rear legs.

1,633,722. CLOTHESLINE FASTENER. FREDERICK ALEXANDER, East St. Louis, Ill. Filed Mar. 28, 1927. Serial No. 178,932. 1 Claim. (Cl. 24—129.)



A device of the class described adapted to hold a rope and comprising a support, a body member bent on a transverse line intermediate its ends to form two branches one of which has a notch in its end, and means for fastening the member to the support at a plurality of points lying in said transverse line, said fastening being loose enough to permit slight oscillation of said member about said transverse line, but preventing other movement.

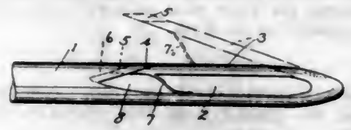
1,633,723. STEAM-HEATED CYLINDER AND THE LIKE AND MEANS FOR DRAINING THE SAME. JOHN MELROSE ARNOT, Bury, England. Filed Jan. 6, 1925, Serial No. 881, and in Great Britain Dec. 1, 1924. 4 Claims. (Cl. 34—4.)

1. In steam-heated cylinders and the like, an axially mounted scoop extending the full length of the cylinder, and means exterior to the cylinder for either holding same stationary or rotating same, the scoop embodying a scroll by which the water of condensation may be caught as it is caused to pass to same by the rotations of the scoop, or by the centrifugal momentum of the cylinder when the cylinder is rotated at a high speed, and means for conveying the water from the scroll to the exterior of the cylinder, as set forth.

1,633,724. MAINTENANCE RECORD. CARL BURRIS, Clayton, Mo. Filed June 21, 1926. Serial No. 117,511. 5 Claims. (Cl. 224—29.)

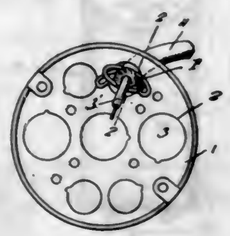
1. In a maintenance record, the combination of a receptacle, means for attaching the receptacle to an automotive vehicle, an account book carried by the receptacle, and means formed from a single blank of material and secured to said book for carrying a pencil and for facilitating the removal of the book from said receptacle.

1,633,725. BUTTON RECEPTACLE. JAMES C. DAY, South Orange, N. J., assignor to The Whitehead & Hoag Company, Newark, N. J., a Corporation of New Jersey. Filed Nov. 23, 1926. Serial No. 150,219. 1 Claim. (Cl. 40—1.5.)



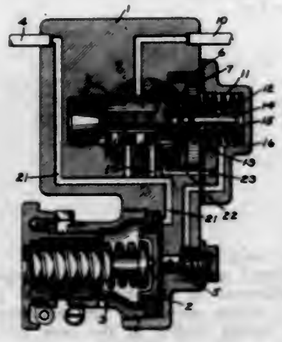
A button comprising a front plate and a rear plate having a dished central portion, and an open-ended receptacle positioned in the dished central portion, the edge of the dished central portion extending outwardly to form a partial closure of the open end of the receptacle.

1,633,726. NEEDLE. EDMUND DZIUK, Detroit, Mich. Filed Oct. 13, 1923. Serial No. 668,290. 2 Claims. (Cl. 223—87.)



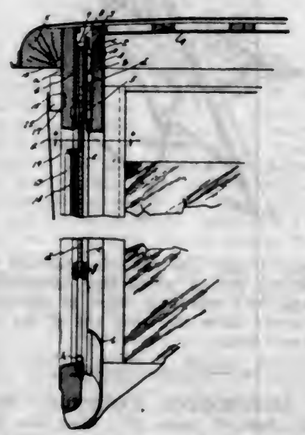
1. A needle having an elongated eye and having one wall of said eye slit adjacent one end of the eye and

outwardly flexible about its other end, the body portion of the needle being formed with a seat for the free end



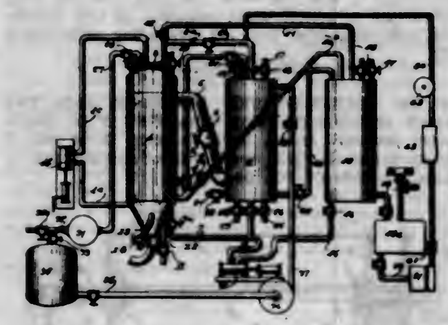
of the flexible wall, said seat being channeled lengthwise of the needle to normally retain the end portion of the flexible wall.

1,633,727. LOOM LOCK. REESE B. EARLY, Riverside, Calif. Filed May 12, 1925. Serial No. 29,710. 5 Claims. (Cl. 247—25.)



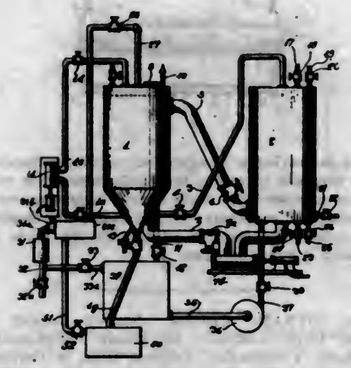
2. A loom fastener formed of a circular looped wire substantially square in cross section, its ends bent to form laterally extending yielding arms, and terminating in loops.

1,633,728. FEED-VALVE DEVICE. CLYDE C. FARMER, Pittsburgh, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Nov. 29, 1924. Serial No. 752,973. 5 Claims. (Cl. 50—11.)



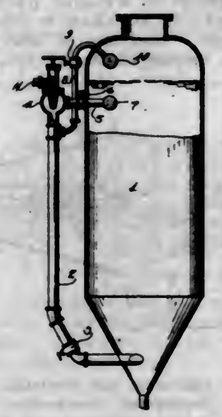
2. A feed or reducing valve device including a fluid supply portion for supplying fluid under pressure to an outlet and comprising a piston, a valve operated by said piston and having a position providing a restricted communication through which fluid under pressure is supplied to said outlet, a spring for yieldingly limiting the movement of said piston beyond said position, and an additional spring acting on said piston.

1,633,729. AUTOMOBILE BODY CONSTRUCTION. GEORGE FAUSER, Detroit, Mich., assignor, by mesne assignments, to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Mar. 26, 1924. Serial No. 701,908. 12 Claims. (Cl. 296—89.)



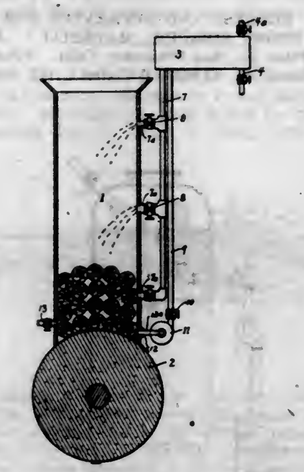
8. In an automobile body construction, a windshield comprising pillars, sill and a header forming a header chamber, and provided with removable inner header board, means for removably fastening the inner header board in place, a windshield panel movable from opened to closed position between said pillars and a window regulator supported on the inside of the removable header board for operating the said movable panel.

1,633,730. APPARATUS AND PROCESS FOR MAKING PAPER PULP. FREDERICK K. FISH, Jr., San Francisco, Calif. Filed July 11, 1925, Serial No. 42,960, and in Canada Dec. 22, 1924. 15 Claims. (Cl. 92—13.)



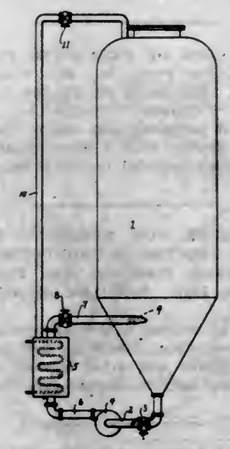
1. The process of producing fibre pulp consisting in removing air from the material to be treated, treating the air free material with liquor charged with volatile extractives of plant material, and subjecting the so treated material to a second digesting operation with a renewed and strengthened liquor containing solvent extractives.

1,633,731. PROCESS FOR TREATING PLANT MATERIAL. FREDERICK K. FISH, Jr., San Francisco, Calif. Filed July 11, 1925, Serial No. 42,961, and in Canada Dec. 20, 1924. 36 Claims. (Cl. 92—13.)



1. The process of treating plant material comprising impregnating the plant material with heated liquor initially charged with an alkali and volatile and other solvent extractives of plant material to remove from the material being treated solvent extractives and other by-products of the plant material.

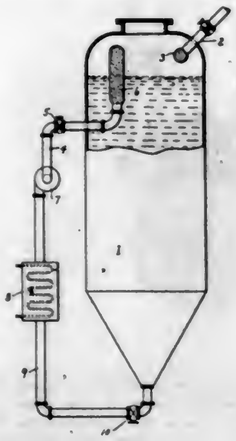
1,633,732. PROCESS AND APPARATUS FOR MAKING PULP FROM FIBROUS MATERIAL. FREDERICK K. FISH, Jr., San Francisco, Calif. Filed July 14, 1925, Serial No. 43,595. Renewed May 24, 1927. 8 Claims. (Cl. 92—7.)



1. The process of making pulp from fibrous material in a digester, consisting in cooking the material in a heated liquor under pressure and with a space above the body of said liquor, withdrawing gases and volatile extractives from said space and liquor from the upper portion of the body of liquor in the digester by means of steam under pressure, mixing the gases and volatile extractives with the withdrawn liquid and returning the mixture to the lower portion of the digester for use in the same cook.

1,633,733. PROCESS AND APPARATUS FOR MANUFACTURING GROUND-WOOD PULP. FREDERICK K. FISH, Jr., San Francisco, Calif. Filed July 14, 1925, Serial No. 43,596, and in Canada Mar. 21, 1925. 15 Claims. (Cl. 92—6.)

1. In combination with a grinder, a liquor supply tank, means for distributing liquor in the upper portion of the magazine, and means for withdrawing liquor from the lower portion of the grinder and discharging it into said tank.



1,633,734. PROCESS AND APPARATUS FOR DIGESTING OR COOKING FIBROUS MATERIAL. FREDERICK K. FISH, Jr., San Francisco, Calif. Filed July 14, 1925, Serial No. 43,597. Renewed May 24, 1927. 10 Claims. (Cl. 92—7.)

1. A process of digesting fibrous material which consists in treating the material with a cooking liquor in a digester, withdrawing a portion of the liquor from the bottom of the digester, raising the temperature of the

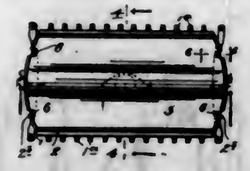
withdrawn portion of liquor and returning it to the lower conical part of the digester, and there releasing it in a manner to cause agitation without any substantial compacting of the charge.

1,633,735. PROCESS AND APPARATUS FOR MAKING PULP FROM FIBROUS MATERIAL. FREDERICK KNAPP FISH, Jr., San Francisco, Calif. Filed July 15, 1925. Serial No. 43,852. 6 Claims. (Cl. 92—7.)

1. In a process of making pulp from fibrous material the steps which consist in mixing and removing gases, volatile solvent extractives, and liquor in liquid form from the upper portion of the digester in which the material is being treated, mixing the said gases and liquor and returning the same to the lower portion of the digester for use in the same cook.

1,633,736. PROCESS OF PREPARING PAPER PULP. FREDERICK KNAPP FISH, Jr., San Francisco, Calif. Filed May 24, 1926, Serial No. 111,368, and in Canada July 7, 1925. 8 Claims. (Cl. 92—9.)

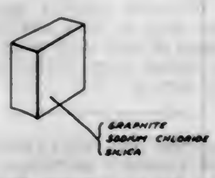
1. A process of producing ppip which consists in cooking chips in a digester with a liquor containing solvent extractives of plant material to which sulphur has been added.



1,633,737. LIQUOR FOR TREATING PLANT MATERIAL AND PROCESS OF PRODUCING THE SAME. FREDERICK KNAPP FISH, Jr., San Francisco, Calif. Filed May 24, 1926. Serial No. 111,457. 7 Claims. (Cl. 92—11.)

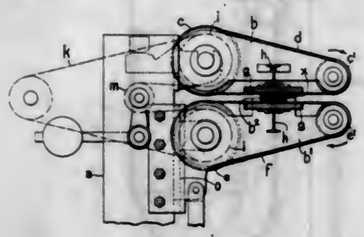
1. A process of making liquor for treating plant material, which comprises dissolving soda ash in water charged with volatile and other solvent extractives of wood and passing sulphur dioxide into the solution so formed.

1,633,738. PULP FIBER. FREDERICK KNAPP FISH, Jr., San Francisco, Calif. Filed May 24, 1926. Serial No. 111,458. 9 Claims. (Cl. 92—3.)



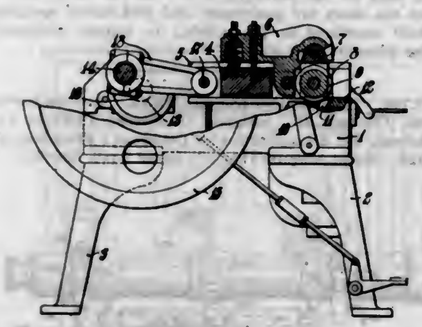
1. As a new article of manufacture, wood fiber, mechanically produced, having a substantially white color and evenly permeated before grinding with the natural preservatives of the wood treated.

1,633,739. SAFETY RAZOR. HENRY J. GAISMAN, New York, N. Y. Filed Nov. 21, 1922. Serial No. 602,378. 8 Claims. (Cl. 30—12.)



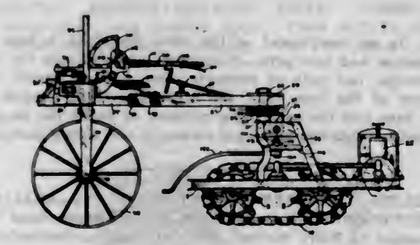
1. A blade having a non-circular opening substantially centrally disposed to retain the blade in shaving relation to a guard member, said blade having means spaced from said opening to cooperate with a clamping member to retain the latter in shaving relation to the blade to cooperate with a guard member.

1,633,740. DYNAMO BRUSH. NELSON ROBERT HAAS, Dayton, Ohio, assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio, a Corporation of Delaware. Filed Dec. 1, 1924. Serial No. 753,407. 5 Claims. (Cl. 171—325.)



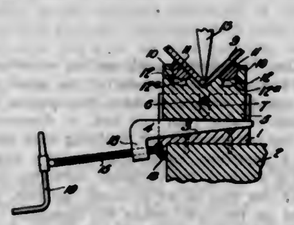
4. A dynamo brush including graphite and silica.

1,633,741. MACHINE FOR TIGHTENING THE INSULATION APPLIED ON WINDING BARS OF ELECTRIC MACHINES AND APPARATUS. EMIL HAEFELY, Basel, Switzerland. Filed Mar. 8, 1923, Serial No. 623,814, and in Switzerland Mar. 9, 1922. 1 Claim. (Cl. 173—244.)



A machine for tightening the insulation applied on winding bars of rectangular cross-section for electric machines and apparatus, comprising two rows of movable narrow smoothing bands, a movable carrier for one of said rows of smoothing bands, a driving device to cause the smoothing bands of the two rows to run in opposite directions, said two rows of bands constituting a free space between them throughout their operative length, and means to receive an insulated winding bar within said space in such a position as to present their wide sides only to said smoothing bands, while their narrow sides remain free, so that the smoothing bands when moving over the said wide sides of the winding bar produce a continuous smoothing and tightening of the insulating material round about the same.

1,633,742. FORGING MACHINE. HALBERT B. HALVORSEN, Michigan City, Ind., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Apr. 20, 1925. Serial No. 24,420. 4 Claims. (Cl. 76—5.)

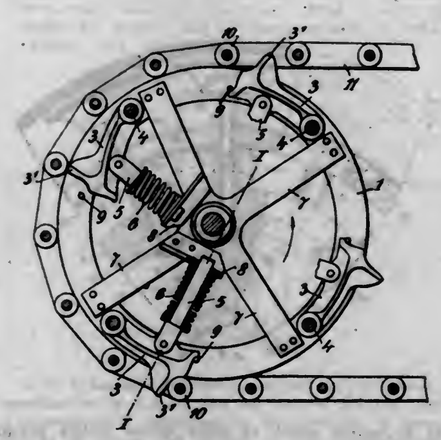


4. A cutter bit forging machine comprising a crosshead carrying forging die means movable in a straight line, and a crank and connecting rod for actuating the same disposed to the rear thereof, said crank being so disposed as to impart at the moment of forging an actuating force to said crosshead in substantial alinement with the path of movement thereof.

1,633,743. TRACTOR. HARVEY C. HUBBELL, Cincinnati, Ohio. Filed Mar. 10, 1922. Serial No. 542,644. 8 Claims. (Cl. 180—9.1.)

1. In a power driven tractor, rear and front frames, struts mounted on said front frame, a fifth wheel connected to said struts, a fulcrum horizontally mounted in said struts and pivotally supporting said fifth wheel whereby the front driving members and frame are adapted to assume varying positions in relation to said rear frame.

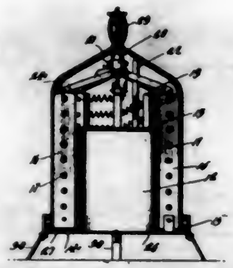
1,633,744. APPARATUS FOR FLANGING AND BENDING METAL PLATES. GEORGE HUGHES, Southampton, England. Filed Jan. 29, 1926. Serial No. 84,652. 7 Claims. (Cl. 153—12.)



1. In apparatus of the type specified for forming or modifying angles in metal plates a metal block, part circular section rollers in correspondingly radiused recesses in said block, the metal block being provided with transverse channels with which projections carried by the part circular section rollers co-operate for positioning the rollers and limiting their axial rotation in said recesses, and a channel section open ended bracket in which said block is supported and guided.

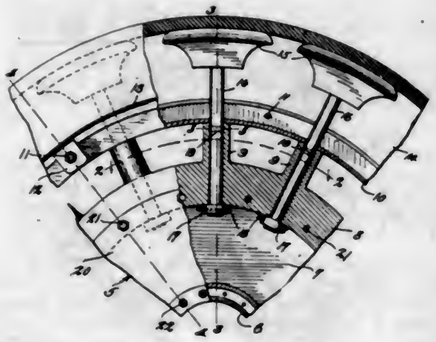
1,633,745. TALKING MACHINE. ISAAK JACOBSOHN, Spandau, Germany, assignor to Bruno Muller, Gorlitz, Germany. Filed May 29, 1924, Serial No. 716,789, and in Germany June 2, 1923. 1 Claim. (Cl. 274—11.)

In a talking machine of the character described, the combination with a sound reproducing needle and with a record carrier composed of an endless travelling steel band having the record on one edge, of a pair of distanced supporting pulleys on which the band is wound so as to form a coil having a plurality of strands, a deflecting pulley arranged coaxially with and connected to one of said supporting pulleys so that it can be used for transferring the band from the inside to the outside of the coil, said deflecting pulley being made narrower than the band so that the record edge of the latter will be held in a projecting position relative to the same, for contact with the needle.



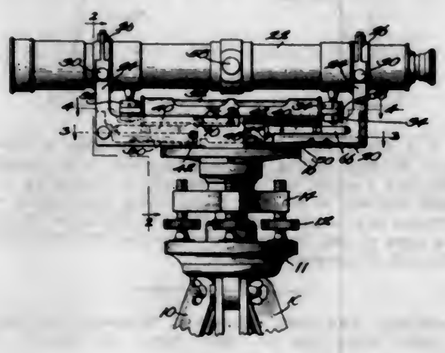
1,633,746. CHAIN WHEEL FOR CHAIN-TRACK DRIVES. VIKTOR JERECZEK, Weissensee, near Berlin, Germany, assignor to Stock Motorpflug Aktiengesellschaft, Berlin, Germany, a Corporation of Germany. Filed Feb. 24, 1927, Serial No. 170,672, and in Germany Dec. 17, 1925. 2 Claims. (Cl. 74—61.)

2. In a driving toothed wheel, the combination of a rim comprising a pair of spaced members, a number of peripherally spaced lever arms arranged between said



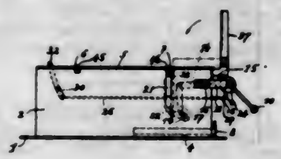
rim members, pins connecting said rim members and on which said lever arms are spaced, spokes extending to said rim members, plates on said spokes, guide rods slidably mounted in said plates and pivotally connected at their outer ends to said lever arms, and coiled springs arranged around the guide rods and exerting their thrust against said plates and said rods to move the latter and the said lever arms radially outward.

1,633,747. ELECTRIC HEATING APPARATUS. CARL E. JOHNSON, Detroit, Mich. Filed July 30, 1925. Serial No. 47,109. 4 Claims. (Cl. 219—34.)



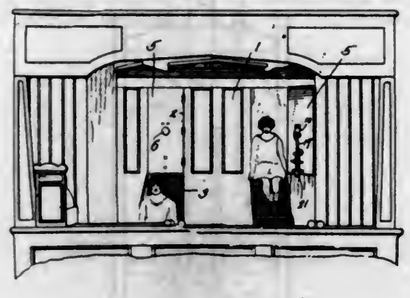
1. A device of the class described including, in combination, a cylindrical outer casing, a cylindrical inner casing, a plurality of support bars interposed between the inner and outer casings, a supporting stand formed on the lower end of the casings, a brace frame connected to the upper extremities of the support bars, and a heating element arranged spirally between the inner and outer casings and extending through suitable apertures formed on the said bars.

1,633,748. PNEUMATIC CUSHION WHEEL. JOHN BOBBY KEAR and JACOB R. YOUNG, Albuquerque, N. Mex. Filed June 18, 1926. Serial No. 116,929. 1 Claim. (Cl. 152—29.)



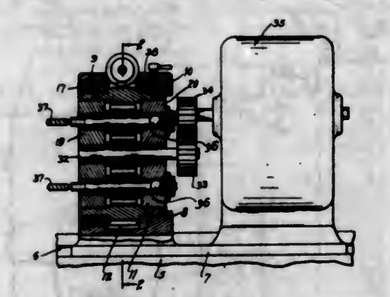
In a cushion wheel, an inner hollow section having integral spokes, said spokes being hollow, the inner section having openings communicating with the hollow spokes, plates secured to the inner section and providing a housing with the inner section, plungers operating through the hollow spokes, means on the plungers for providing fluid-tight connections between the plungers and walls of the hollow spokes, heads on the inner ends of the plungers and operating between the plates, a felloe having openings, secured to the spokes, shoes on the outer ends of the plungers, a tire on the felloe and in which the shoes are positioned, and said heads operating in fluid contained in the housing to restrict movement of the plungers.

1,633,749. SURVEYING INSTRUMENT. ADOLPH LANGSNER, Chicago, Ill., assignor to Eugene Dietzgen Co., Chicago, Ill., a Corporation of Delaware. Filed May 17, 1926. Serial No. 109,477. 8 Claims. (Cl. 33—73.)



1. In an instrument of the class described, a base, a telescope and two pairs of supports on said base for the telescope, one pair of supports being located nearer the center of the base than the other and being hinged to the base and the base being recessed to house the hinged supports when the latter are swung to non-acting position.

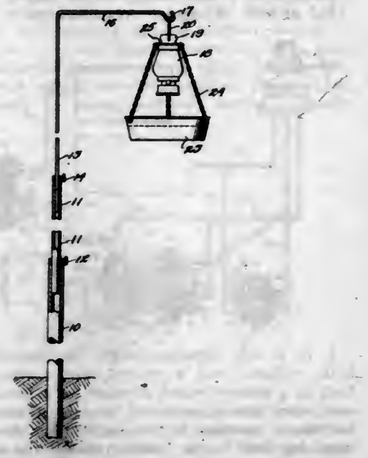
1,633,750. MACHINE FOR CLOSING AND SEALING ENVELOPES. RUDOLF MOHN, Sulgen, Switzerland, assignor to Willy Muller, Thal, St. Gallen, Switzerland. Filed Mar. 3, 1926, Serial No. 92,080, and in Switzerland Dec. 31, 1925. 3 Claims. (Cl. 120—6.)



1. A machine for closing and sealing envelopes, comprising a box having a straight slotted top plate on which an envelope can be supported with the sealing flap projecting through a slot into the box, a dampening pad arranged in the box, means for applying said pad to the sealing flap, a partition supporting the flap against the pad, means for feeding the envelope forwards along the top plate over the slot so as to close the flap, a presser plate mounted on the box, means for clamping the envelope between said presser plate and the top plate of the box for sticking the closed flap in position, and means for delivering the closed envelope.

1,633,751. AMUSEMENT APPARATUS. JOHN D. PONTIOUS, Hammond, Ind., assignor of one-half to Lizzie Pontious, Hammond, Ind. Filed Sept. 9, 1926. Serial No. 134,441. 2 Claims. (Cl. 273—102.)

1. An amusement apparatus including an enclosure having a door opening, a chute inclined downwardly and forwardly beyond the enclosure from the opening, said chute extending into the enclosure, a door for closing the opening and retaining an object on that portion of the chute within the enclosure, means for holding the door in closed position, a target movably mounted on the door, and means actuated by the target when shifted from normal position, for releasing the door.

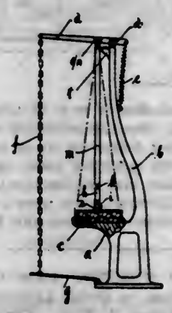


1,633,752. BORING-MACHINE HEAD. ALBERT V. RACKSTRAW, Los Angeles, Calif. Filed Oct. 27, 1926. Serial No. 144,558. 2 Claims. (Cl. 144—110.)

1. A boring machine comprising a casing, a sleeve journaled in said casing, a centrally disposed shaft journaled in said sleeve provided with a gear, a plurality of irregularly spaced spindles journaled in said sleeve surrounding said centrally disposed shaft provided with gears meshing with the gear on said centrally disposed shaft, worm teeth on the periphery of said sleeve, a worm journaled in said casing adapted to engage with said worm teeth, and means for rotating said worm.

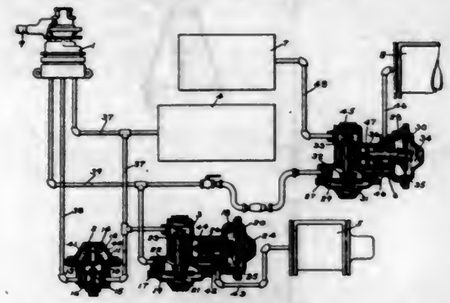
1,633,753. INSECT-DESTROYING DEVICE. MATT RAY, Arkadelphia, Ark. Filed Sept. 29, 1926. Serial No. 138,452. 4 Claims. (Cl. 43—113.)

1. In a device of the class described, a standard including a plurality of relatively adjustable elements, an illuminating device carried by the standard, said device last named including a cap, an oil receptacle, and means for suspending the oil receptacle from the cap, said means comprising a frame including resilient outwardly extending and interlocking end portions, and flexible members connected with the frame.



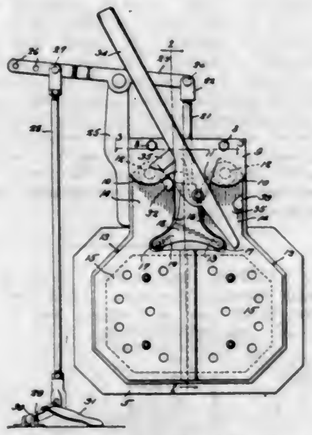
1,633,754. METHOD OF MAKING PRECIPITATED ANTIMONY SULPHIDE. RAWSON E. STARK, Elyria, Ohio, assignor to The Stibium Products Company, Elyria, Ohio, a Corporation of Ohio. Filed Dec. 26, 1922. Serial No. 608,917. 17 Claims. (Cl. 134—58.)

1. A process of making antimony sulphide, which includes treating an oxy-compound of antimony with sulphur and an agent supplying a combinable metal, and subjecting the reaction-product to a precipitating action.



2. A process of making antimony sulphide, which includes treating an oxy-compound of antimony with sulphur and an agent supplying a combinable metal, and subjecting the reaction-product to a precipitating agent comprising an inorganic acid.

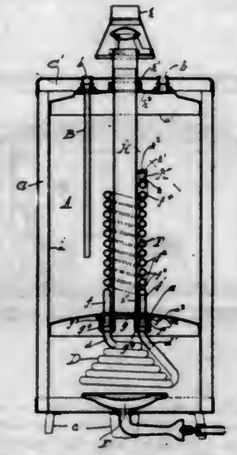
1,633,755. CUTTING MACHINE. PAUL WOLKOGON-WOLYNSKI, Bielefeld, Germany. Filed Nov. 6, 1925, Serial No. 67,307, and in Germany Nov. 6, 1924. 3 Claims. (Cl. 164—26.)



1. In a machine for cutting shaped leather pieces, the combination of a table and an integral bracket thereon, a pressure-lever fulcrumed on said bracket, a pressure-bar at its upper end pivoted to said pressure-lever so as to be movable over the whole table and adapted to be depressed by said lever and a cutter on the lower end of said pressure-bar, substantially as set forth.

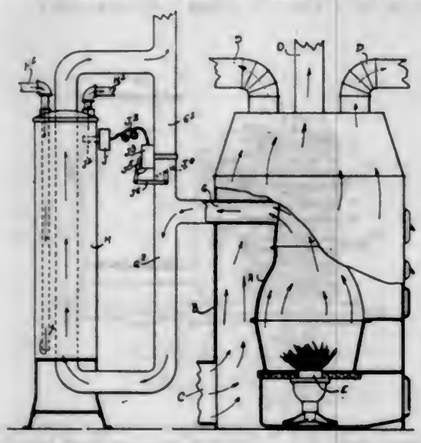
1,633,756. FLUID-PRESSURE-BRAKE SYSTEM. BURTON S. AIKMAN, Milwaukee, Wis., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed July 7, 1925. Serial No. 42,016. 9 Claims. (Cl. 303—25.)

1. In a fluid pressure brake, the combination with a brake cylinder and a control pipe normally containing fluid at a predetermined pressure, of a movable abutment and valve means operated by said abutment upon an increase in pressure in the control pipe above normal for supplying fluid to the brake cylinder, and a second movable abutment and valve means operated by said abutment upon a reduction in pressure in the control pipe below normal for supplying fluid to the brake cylinder.



1,633,757. FIRE DOOR. HENRY D. BABBEE, Greensboro, N. C. Filed Aug. 26, 1926. Serial No. 131,670. 2 Claims. (Cl. 110—176.)

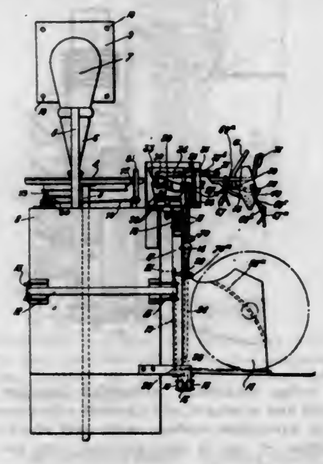
1. A fire door including a pair of pivotally supported door sections having upwardly extended end portions, the adjacent edges thereof being cut away to define cams, a head having laterally extended arms operating between the upwardly extended end portions, rollers at the ends of the arms and adapted to move over the cams to move the door sections outwardly when the head is elevated.



1,633,758. LIQUID HEATER. FRED W. BIRTCH, Buffalo, N. Y., assignor to Birtch Laboratories Inc., Buffalo, N. Y. Filed Sept. 1, 1925. Serial No. 53,959. 9 Claims. (Cl. 122—32.)

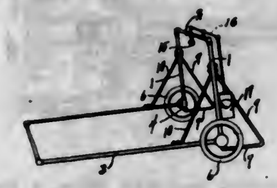
1. A water heater including a container for the water to be heated, and a heating circuit in which water may circulate without mixing with the water in said container, said heating circuit including a portion arranged exterior to said container and to which heat is applied for heating the water in said circuit, a part arranged within said container and through which the heated water circulates and imparts its heat to the water in said container, means for mounting said circuit on said container and a passage in said mounting means connecting

the interior of said circuit with said container and through which water may flow for filling said circuit and during expansion and contraction of the water in said circuit.



1,633,759. THERMOSTATIC CONTROL FOR DOMESTIC AND HOT-WATER HEATERS. JAMES L. BREESE, Jr., Chicago, Ill., assignor to Oil Devices Corporation, Chicago, Ill., a Corporation of Illinois. Filed Mar. 12, 1926. Serial No. 94,141. 3 Claims. (Cl. 236—20.)

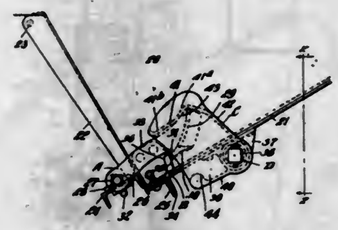
1. In association with a domestic heating plant, a domestic hot water supply tank, a chimney passage for said heating plant, a bypass therefrom adapted to heat said tank, and thermostatic means for regulating the passage of flue gases through said bypass in response to the temperature of the water in said tank.



1,633,760. SOUND-REPRODUCING INSTRUMENT. THOMAS BREWIN, Fife, Scotland. Filed Oct. 20, 1923, Serial No. 669,770, and in Great Britain Oct. 25, 1922. 7 Claims. (Cl. 274—10.)

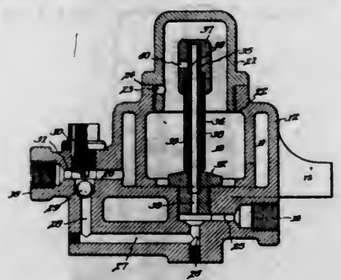
1. In a sound reproducing machine having a rotating table and a tone arm, a number of record compartments for storing records, a sliding carrier capable of being positioned opposite any one of said compartments, a support on said sliding carrier, a swinging arm capable of executing vertical and horizontal swinging movements about said support, a record gripping device mounted on said swinging arm, means for transferring a record from a record compartment to said record gripping device and for returning the record from said record gripping device to the record compartment, means for moving said swinging arm into and out of engagement with said transferring means and for moving said swinging

arm into and out of position over said rotating table, means for transferring a record from said record gripping device to said rotating table and for returning the record to said record gripping device, means controlled from a distance for shifting said sliding carrier into position opposite any one of said record compartments, and means controlled from a distance for actuating said means for moving said swinging arm including means actuated by said record gripping device for manipulating said tone arm.



1,633,761. COMBINATION TRUCK AND WEIGHER. EMETT L. BYRNS, Mineral Wells, Tex., assignor to G. C. Briscoe, Mineral Wells, Tex. Filed June 7, 1924. Serial No. 718,474. 6 Claims. (Cl. 265—52.)

1. A combination weigher and truck comprising upright frame members and spindles rigid therewith, wheels supporting said spindles, a supporting member carried by said uprights directly above said spindles, a lifting member rigid with said upright members, and weighing and carrying devices carried by said supporting member.

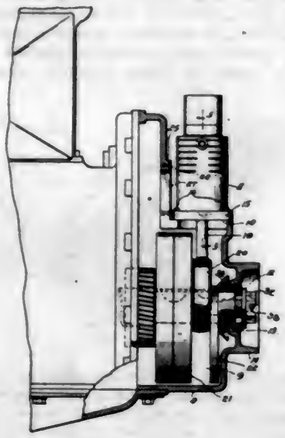


1,633,762. CAR-DOOR-LOCKING MECHANISM. ARGYLE CAMPBELL and ALBERT E. ZIMMER, Chicago, Ill., assignors to Enterprise Railway Equipment Company, Chicago, Ill., a Corporation of Illinois. Filed Aug. 26, 1921. Serial No. 495,665. 17 Claims. (Cl. 105—308.)

1. In a car having a fixed member and a door member pivoted to swing about an axis extending transversely of the car, the combination with an element having a fixed shoulder mounted on one of said members; of a second shouldered element pivotally mounted on the other of said members to swing about an axis paralleling the pivotal axis of the door member and cooperable with said first named shouldered element to lock the door in fully closed position, said pivoted locking element having a cam edge at the free end thereof cooperable with said first named shouldered element and by which the two elements are guided into cooperative relation as the door member is swung to closed position; means, operable

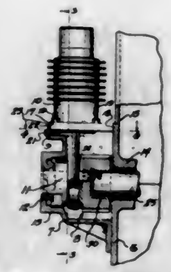
from either side of the car, for effecting disengagement of said two shouldered elements by positively imparting pivotal movement to said second named element, and means limiting the movement of said pivotally mounted element to a predetermined position when disengaged from said element having a fixed shoulder such that, the said cam edge of said pivoted element will necessarily engage said element having a fixed shoulder and be guided thereby as the door member is moved to closed position.

1,633,763. LUBRICATOR. CHARLES A. CAMPBELL, Watertown, N. Y., assignor to The New York Air Brake Company, a Corporation of New York. Filed June 6, 1923. Serial No. 643,691. 10 Claims. (Cl. 184—55.)



8. The combination of a closed shell adapted to contain oil and a confined body of air; a duct leading from a point below the level of oil to a point above the same, within said shell; a second duct arranged to discharge into the confined air within said shell in aspirative jet relation with the upper end of said first duct; and means for connecting said second duct with the working space of a reciprocative compressor.

1,633,764. AUTOMOTIVE COMPRESSOR. NIELS A. CHRISTENSEN, Milwaukee, Wis. Filed Aug. 3, 1925. Serial No. 47,933. 8 Claims. (Cl. 230—39.)

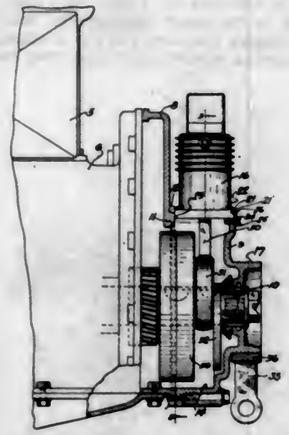


1. In an automotive engine, the combination of a front cover plate forming a closure for the front end of the engine crank case having a forwardly extending compressor crank case portion, an engine crank shaft extending into such portion, said cover plate having a cyl-

inder-supporting portion, an air compressor cylinder mounted on said cylinder-supporting portion, a piston working in said cylinder, a crank member within said

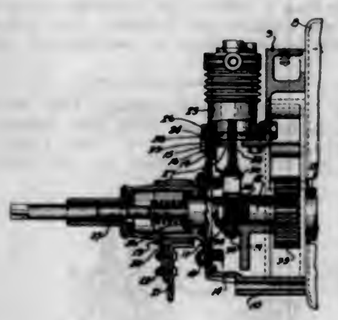
compressor crank case mounted directly on and continuously driven by said crank shaft, and a driving connection between said piston and said crank member.

1,633,765. COMPRESSOR MOUNTING. NIELS A. CHRISTENSEN, Milwaukee, Wis. Filed Nov. 9, 1925. Serial No. 67,923. 5 Claims. (Cl. 230—39.)



1. In an automotive type engine, the combination with the crankcase of the engine having a pad portion at its front end, of a detachable front cover plate having a part forming the crankcase of an air compressor and a compressor-cylinder-supporting portion for said compressor, and a compressor cylinder having its base portion mounted on said cylinder-supporting portion of said front cover plate and its rear edge abutting against said pad portion of said engine crankcase.

1,633,766. ENGINE-DRIVEN COMPRESSOR. NIELS A. CHRISTENSEN, Milwaukee, Wis. Filed Nov. 23, 1925. Serial No. 70,908. 5 Claims. (Cl. 123—195.)

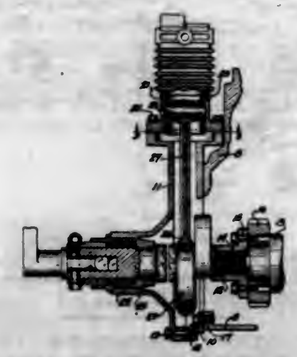


1. In an internal combustion engine, the combination with the engine crank case and an engine shaft, of a sectional front cover plate secured to the crank case of the engine and providing a compressor crank case and a compressor cylinder-supporting portion, a compressor

cylinder mounted upon said cylinder-supporting portion, a piston working in said cylinder, and a driving connection between said piston and said shaft including a connecting-rod having an adjustable big end bearing, said

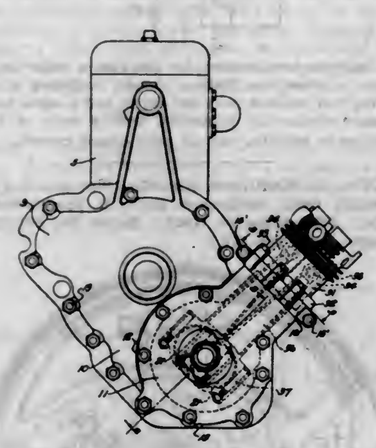
sections being detachably connected together and so constructed and arranged as to permit adjustment of said bearing in assembled relation with said shaft upon the disconnection of one of said sections from the other.

1,633,767. DIRECT-DRIVE COMPRESSOR. NIELS A. CHRISTENSEN, Cleveland, Ohio. Filed Dec. 10, 1925. Serial No. 74,551. 2 Claims. (Cl. 230—39.)



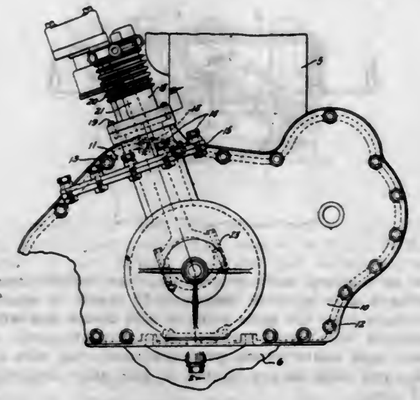
1. In an internal combustion engine, a front cover-plate comprising a cover section detachably secured to the crankcase of the engine and provided with a compressor crankcase portion, a compressor-cylinder-supporting portion and an open end, and a cover section detachably secured over the open end of said first-named section and having a trunnion-bearing extension.

1,633,768. AUTOMOTIVE ENGINE COMPRESSOR. NIELS A. CHRISTENSEN, Cleveland, Ohio. Filed Jan. 18, 1926. Serial No. 82,095. 5 Claims. (Cl. 123—195.)



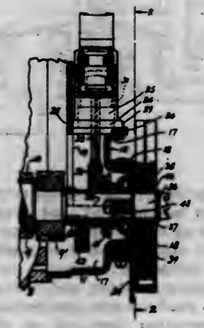
1. In an internal combustion engine, a front cover-plate forming a compressor crank case and compressor cylinder support, comprising a cover section detachably secured to the crank case of the engine, and a cover section detachably secured to said first-named cover section,

said sections, being joined together along a plane extending through the compressor crank case and the compressor cylinder support whereby the removal of the second-named cover section provides access to the drive



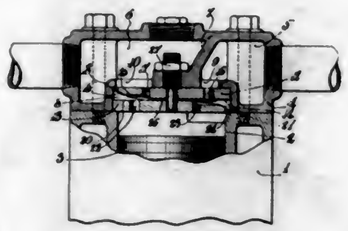
for the compressor including the connecting rod and its drive shaft and permits inspection and adjustment of the big end bearing of said connecting-rod while assembled to its drive shaft.

1,633,769. MULTICYLINDER AUTOMOTIVE COMPRESSOR. NIELS A. CHRISTENSEN, Cleveland, Ohio. Filed Apr. 29, 1926. Serial No. 105,452. 1 Claim. (Cl. 230—39.)



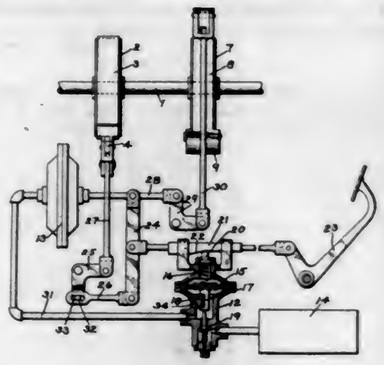
In an automotive engine, the combination with the crank case and crank shaft of the engine, of a front cover plate forming a closure for the front end of the engine crank case and having a forwardly extending compressor crank case portion into which the front end of the engine crank shaft projects, said cover plate havig a cylinder-supporting portion, air compressor cylinders mounted on said cylinder-supporting portion, a piston working in each cylinder, and crank members mounted on and continuously driven by said crank shaft and operatively connected to said pistons, the moving parts of said compressor being dynamically balanced whereby to relieve the extended end of said engine crank shaft of vibrational forces.

1,633,770. AUTOMOTIVE ENGINE COMPRESSOR. NIELS A. CHRISTENSEN, Cleveland, Ohio. Filed May 10, 1926. Serial No. 108,056. 4 Claims. (Cl. 123—195.)



1. In an automotive engine, the combination with the drive connection of the compressor of a detachable front cover plate comprising a plurality of sections detachably secured to the crank case of the engine and detachably secured together at an angle to the plane of their connection with the crank case of the engine whereby removal of one of said sections permits ready inspection of the drive connection for the compressor.

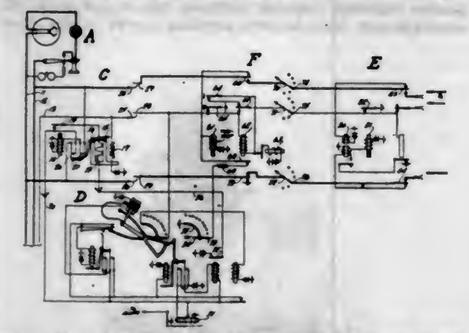
1,633,771. FRONT END COMPRESSOR. NIELS A. CHRISTENSEN, Cleveland, Ohio. Filed June 7, 1926. Serial No. 114,210. 4 Claims. (Cl. 123—2.)



1. In an automotive engine, a front cover plate detachably secured to the engine crank case and comprising a plurality of sections secured together to provide a compressor crank case portion, a compressor-cylinder-supporting portion and a trunnion-bearing portion, said sections being joined in a vertical plane and in a plane within the diameter of the trunnion-bearing whereby access to the crank case portion of the compressor is obtained upon the removal of one of the sections without jacking the engine up from its trunnion.

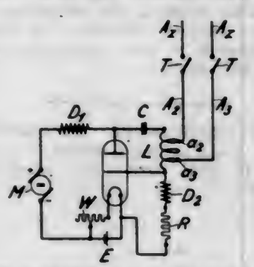
1,633,772. VALVE MECHANISM. LEWIS J. CLAPP, Claremont, N. H., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Mar. 18, 1921. Serial No. 453,512. 43 Claims. (Cl. 230—231.)

1. In a pump valve mechanism, cage forming means having a pair of slots increasing in depth in opposite directions from the same point in said means and which terminate with their greatest depths substantially adjacent, said means having ports communicating with said slots, and valve means located in said slots controlling said ports.



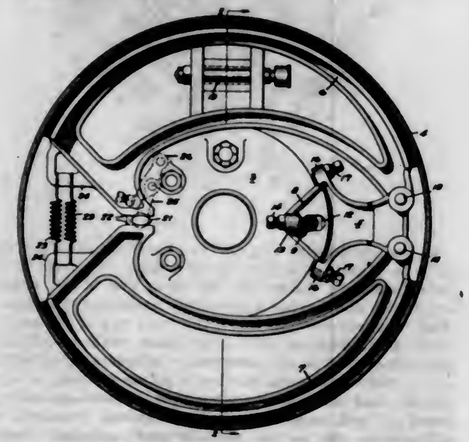
1,633,773. VEHICLE BRAKE MECHANISM. JOHN F. CRAIG, Edgewood, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Sept. 22, 1922. Serial No. 589,764. 4 Claims. (Cl. 188—151.)

3. In a vehicle brake, the combination with two sets of brake applying members, of fluid pressure means for operating one set of brake applying members, mechanical means movable to control said fluid pressure means and adapted upon a further movement to operate the other set of brake applying members, and means operated upon movement of the fluid pressure controlled brake applying members for preventing operation of the mechanically controlled brake applying members upon said further movement of the mechanical means.



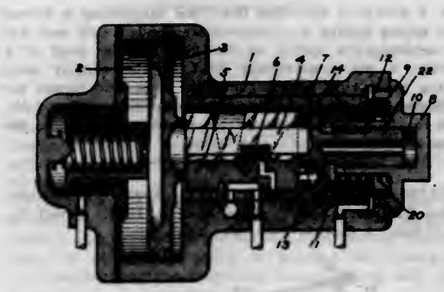
1,633,774. AUTOMATIC TELEPHONE SYSTEM. RALPH W. ENOSBERG, Lake Mills, Wis., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill., a Corporation of Delaware. Filed Aug. 10, 1925. Serial No. 49,219. 12 Claims. (Cl. 179—18.)

1. In a telephone system, a non-numerical switch having wipers which normally stand on the trunk line last used, a plunger line switch controlled over a calling subscriber's line for seizing said non-numerical switch, a master switch for positioning said line switch before said



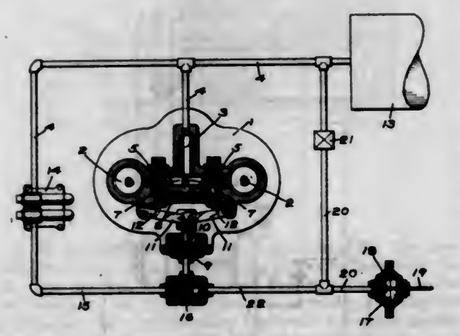
non-numerical switch, and means responsive to the operation of said master switch for causing said non-numerical switch to seek an idle trunk line.

1,633,775. ANTENNA ARRANGEMENT FOR SHORT-WAVE APPARATUS. ABRAHAM ESAU, Jena, Germany. Filed Oct. 8, 1926, Serial No. 140,378, and in Germany Oct. 7, 1925. 4 Claims. (Cl. 250—33.)



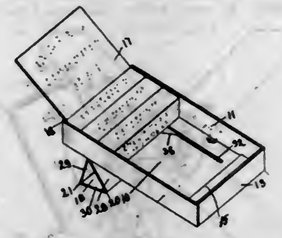
1. Antenna arrangement for short-wave radiation, comprising a closed oscillation circuit including a wave-carrying coil isolated from the earth, and a wave radiator in direct conducting connection with a node of voltage of the wave carrying coil in said closed circuit.

1,633,776. AUTOMOBILE BRAKE. WILLIAM B. FAGEOL, Oakland, Calif., assignor to Rollie B. Fageol, Oakland, Calif. Filed June 18, 1923. Serial No. 646,028. 9 Claims. (Cl. 188—78.)



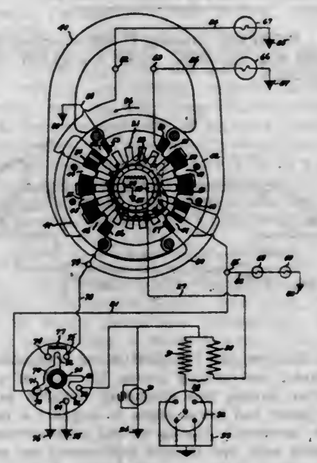
1. The combination with a rear axle and its housing which housing is provided on its end with a flange, a brake actuating cam journalled in said flange, a wheel associated with the axle and a brake drum secured to the wheel of a bracket rigidly secured to said flange and extending radially therefrom, means for adjusting the position of the bracket with respect to the flange and brake shoes pivoted to the bracket and engaging said cam.

1,633,777. RETARDED RELEASE-VALVE DEVICE. CLYDE C. FARMER, Pittsburgh, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Sept. 8, 1925. Serial No. 54,887. 2 Claims. (Cl. 303—72.)



1. A triple valve device comprising a casing having a piston chamber and a valve chamber, a piston in said piston chamber, a slide valve mounted in said valve chamber, a piston stem carried by said piston for operating said valve, a guide member extending rearwardly of said stem, a collar disposed between said stem and said extension, and a tubular stop member engaging said valve and having a flange engaging said collar.

1,633,778. COMPRESSOR-CONTROLLING DEVICE. CLYDE C. FARMER, Pittsburgh, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Aug. 27, 1926. Serial No. 131,924. 8 Claims. (Cl. 303—11.)

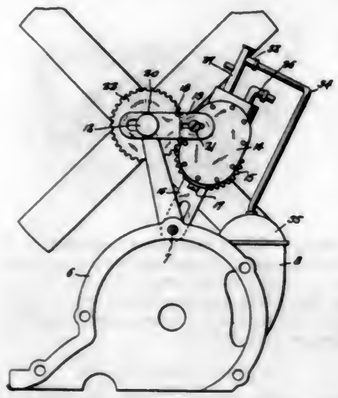


1. The combination with a motor vehicle clutch controlling device and a fluid compressor, of means for unloading the compressor upon operating said controlling device to disengage the clutch.

1,633,779. DISPLAY PACKAGE. FREDERICK-GEORGE FISHER, Quincy, Mass. Filed Feb. 23, 1923. Serial No. 620,706. 10 Claims. (Cl. 206—44.)

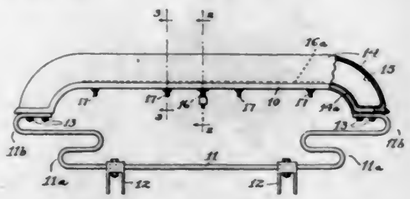
1. A display box comprising a box body having a slot in its bottom, and a supporting member having a portion adapted to pass through such slot and having notches arranged to receive portions of the box bottom adjacent to the ends of said slot, whereby the supporting member is interlocked with the box.

1,633,780. ELECTRICAL GENERATING SYSTEM. JOHN T. FITZSIMMONS, Dayton, Ohio, assignor to General Motors Research Corporation, Dayton, Ohio, a Corporation of Delaware. Filed Mar. 14, 1925. Serial No. 15,639. 7 Claims. (Cl. 290—41.)



1. An electrical system comprising, in combination, a generator having a rotor and a field magnet provided with pole teeth carrying windings; electrical translation devices; and circuits and a controller therefor operable to one position to cause the devices to be operated by current from said pole windings, and operable to another position to discontinue operation of said devices and for causing certain of the pole windings to be short circuited.

1,633,781. OIL-PUMP MECHANISM. ALFRED FRANK FRANCA, Sandy Ridge, Pa. Filed July 28, 1926. Serial No. 125,561. 3 Claims. (Cl. 184—1.)

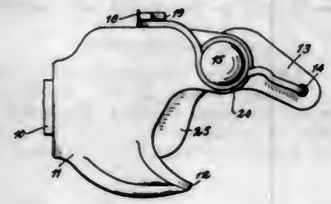


1. Means for supporting an oil pump on an engine; wherein the engine includes a crank case, a timing gear cover plate, bolts holding the cover plate to the crank case, an arm on one of said bolts terminating in a bearing, a fan shaft journaled in the bearing, and an oil cup associated with the bearing; comprising an L-shaped bracket having its ends slotted, one slotted end being

pierced by said bolt which mounts the arm, a screw piercing the other slotted end of the bracket for engaging the same with the oil pump, a plate having offset

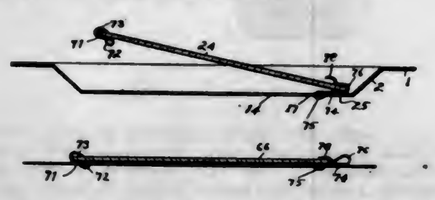
slotted ends, one of the slotted ends of the plates being pierced by the oil cup, a screw piercing the other slotted end of the plate and engaged with the gear pump.

1,633,782. BUMPER. GEORGE C. GEANOPULOS, Evanston, Ill. Filed Aug. 10, 1925. Serial No. 49,250. 8 Claims. (Cl. 293—55.)



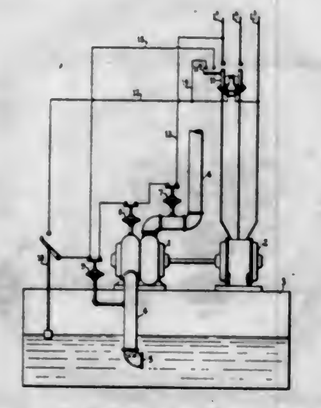
1. In a bumper, the combination of a mounting member to extend horizontally across the end of a vehicle, said member having lips extending towards each other along its upper and lower edges to support a cushioning element, a pneumatic casing having edge extensions engaging under said lips to hold said casing on said member, a pneumatic tube in said casing, and a retaining bar in said casing between its edge extensions clamping said casing in place on said member.

1,633,783. CUTLERY ARTICLE. DAVID J. GILES, Latrobe, Pa., assignor to Latrobe Electric Steel Company, Latrobe, Pa., a Corporation of Pennsylvania. Filed Mar. 25, 1925. Serial No. 18,155. 4 Claims. (Cl. 30—9.)



1. An article of cutlery comprising a steel blade and a silver handle separated from the blade by a body of metal having an exteriorly exposed portion, and which body is electro-positive to both the steel blade and silver handle when the article is subjected to an electrolyte.

1,633,784. DEVICE FOR HOLDING THE MOVABLE JAWS OF COUPLERS OPEN. JAKOB HOJNOWSKI, Nekoosa, Wis. Filed Dec. 24, 1926. Serial No. 156,861. 2 Claims. (Cl. 213—116.)



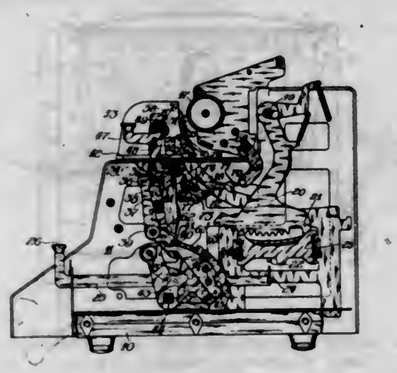
1. A device of the class described comprising a strong wire spring having an intermediate bend, a bolt and nut for securing the spring at the bend to the head of a coupler, a pin transversely held in the coupler head having the spring wound about its ends, and means for anchoring the outer extreme angularly bent ends of the wire in the swinging jaw of the coupler for holding the same open.

1,633,785. ILLUMINATED SIGN. JOSEPH HOTCHNER, San Francisco, Calif. Filed June 9, 1926. Serial No. 114,625. 4 Claims. (Cl. 40—133.)

3. An illuminated sign comprising clips for securing a translucent plate to letter plates, each clip consisting of a spring member having a plain hook on one side and having a hook with a shoulder portion formed at its opposite end.

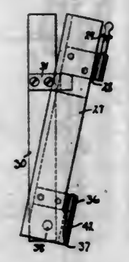
1,633,786. CONTROLLER FOR POWER-DRIVEN PUMPS. BAYARD M. HORTER, Kingston, Pa., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis., a Corporation of Wisconsin. Filed Oct. 22, 1924. Serial No. 745,180. 15 Claims. (Cl. 103—26.)

1. The combination with a hydraulic pump, of driving means therefor, means for initiating the operation of said driving means, and means in the discharge side of said pump subject to control in accordance with priming conditions in the pump to render said first mentioned means inoperative.



1,633,787. OIL AND GREASE PROOF PAPER AND CONTAINER MADE THEREFROM. OTTO KRESS, Appleton, Wis., assignor to American Lakes Paper Company, Chicago, Ill., a Corporation of Delaware. Filed Aug. 1, 1925. Serial No. 47,439. 9 Claims. (Cl. 154—40.)

1. A composite oil and grease proof sheet comprising two sheets of paper permanently united together by a non-drying cement insoluble in oil and carrying water in sufficient quantity to prevent the passage of oil therethrough.

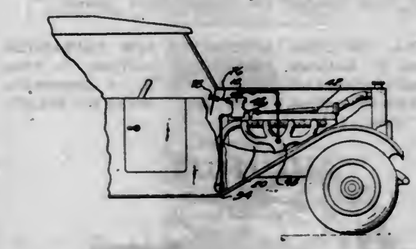


9. The method of making an oil and grease proof container that consists in interposing between two sheets of paper a non-drying cement insoluble in oil and carrying water in sufficient quantity to prevent the passage of oil therethrough, and thereafter incorporating said sheet in the form of a container.

1,633,788. NONPRINT MECHANISM FOR ADDING MACHINES. HARRY LANDSIEDEL, Cincinnati, Ohio, assignor to The Dalton Adding Machine Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Oct. 4, 1922, Serial No. 592,197. Renewed Sept. 18, 1926. 9 Claims. (Cl. 235—58.)

1. In a mechanism of the class described, the combination of a main shaft, type carriers, hammers for the type carriers, latching means for the hammers, means controlled by the type carriers for normally effecting unlatching of the corresponding hammers, non-print mechanism for blocking the normal operation of the latch releasing mechanism, means actuated by the main shaft for automatically restoring the non-print mechanism to normal position, locking means for counteracting the effect of said restoring means, a platen, means for normally rotating the platen, and means actuated by the non-print mechanism for rendering ineffective the action of said platen rotating means, substantially as described.

1,633,789. COMBINED SLIDING AND SWINGING WINDOW. CLAUDE A. LEWIS, Houston, Tex., assignor to American Window Company, Houston, Tex., a Corporation of Delaware. Filed Sept. 21, 1926. Serial No. 136,748. 6 Claims. (Cl. 20—50.)

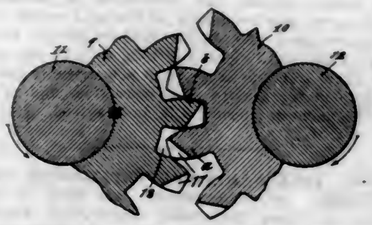


1. In a window, a casing, opposite riders slidable vertically in said casing, an upper sash mounted on said riders to swing inwardly on both a vertical and a horizontal axis.

1,633,790. CEMENT COMPOSITION. ROBERT SETH LINDSTROM, Chicago, Ill. Filed May 31, 1924. Serial No. 716,958. 2 Claims. (Cl. 106—24.)

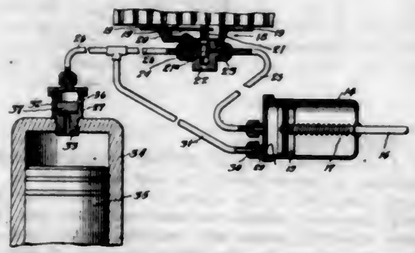
1. A composition adapted, when admixed as described with sand or like aggregate and water, to form a water and wear-resisting, non-dusting, concrete surfacing, for floors, walks, and the like, comprising an intimate admixture in dry powdered form of Portland cement ground to a fineness such that substantially 90 percent will pass through a 200 mesh sieve, and from 5 to 10 per cent by weight of an iron free abrasive of substantially the hardness and specific gravity of carborundum and of about 100 mesh fineness, substantially as described.

1,633,791. INTERNAL-COMBUSTION-ENGINE DECARBONIZER. ARLINGTON MOORE, New York, N. Y., assignor to Moore Inventions Corporation, Worcester, Mass., a Corporation of Massachusetts. Filed Sept. 27, 1922. Serial No. 590,859. 6 Claims. (Cl. 123—25.)



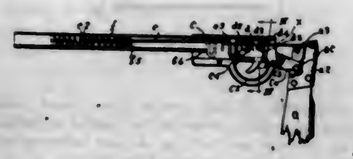
1. A decarboniser for an internal combustion engine comprising a hollow steam chamber supported on the exhaust manifold of the engine, a heat conductor projecting into said steam chamber and also into said exhaust manifold, means for supplying water from the circulation system to the steam chamber, means for conducting the steam to the intake manifold, and a valve in said steam chamber for controlling the generation of steam and the supplying thereof to the intake manifold.

1,633,792. TOWROPE. GEORGE M. PETE and CLAYTON F. PETE, Toledo, Ohio. Filed Apr. 24, 1925. Serial No. 25,550. 2 Claims. (Cl. 280—33.14.)



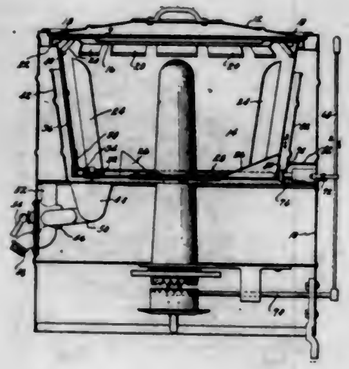
1. A tow rope having an eye at an end thereof and a hitch having an eye at an end thereof interengaged with the rope eye, a relatively straight portion on said hitch adjacent said eye, and a plurality of helical convolutions integral with said straight portion and surrounding said rope whereby tension is directly exerted on the straight shank portion.

1,633,793. GEAR PUMP. FREDERIC PORST, Chicago, Ill., assignor to Hardinge Brothers, Inc., a Corporation of Illinois. Filed Jan. 25, 1924. Serial No. 688,463. 4 Claims. (Cl. 103—126.)



1. A gear pump comprising a pair of meshing involute gears, the teeth of said gears each having a slot therein extending from a point on the leading face of and adjacent the end of said tooth, to a point on the trailing face of said tooth adjacent the pitched circle thereof.

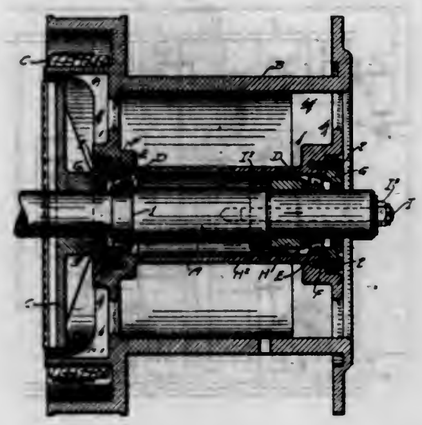
1,633,794. SHUTTER APPARATUS FOR RADIATORS. JAMES F. RALEIGH, Chicago, Ill., assignor to Pines Manufacturing Company, Chicago, Ill., a Corporation of Delaware. Filed Dec. 22, 1923. Serial No. 682,219. 15 Claims. (Cl. 123—174.)



1. In a shutter attachment unit, the combination of a shell, shutters supported by said shell, an expansible chamber supported by said shell, operating connections between the movable wall of said expansible chamber and said shutters, a thermostatic unit supported by said shell, a conduit connecting with said expansible chamber, a valve actuated by said thermostatic unit and controlling the passage of fluid through said conduit, and an engine-operated fluid pump connected to said conduit.

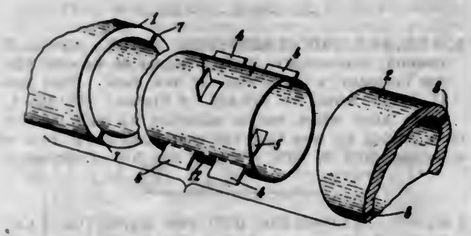
1,633,795. SPRING GUN. WILLIAM F. SCHMIDT, Wyandotte, Mich., assignor to The All-Metal Products Company, Wyandotte, Mich., a Corporation of Michigan. Filed June 4, 1921. Serial No. 475,093. 3 Claims. (Cl. 124—10.)

2. In an apparatus of the kind described, a barrel having a slot b^2 b^3 in its rear wall and an aperture b^4, a spring piece having a pivot pin adapted to slide therein and to engage in said slot and aperture for the purpose described.



1,633,796. WASHING MACHINE. CYRIL G. SINCLAIR, Toronto, Ontario, Canada, assignor, by mesne assignments, to Reliance Storage and Warehouse Company, Detroit, Mich., a Corporation of Michigan. Filed Mar. 31, 1925. Serial No. 19,710. 9 Claims. (Cl. 68—18.)

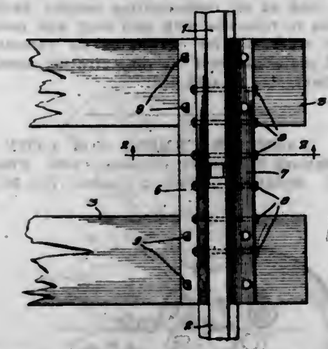
9. In a washing machine, a vat, a clothes basket rotatably supported therein, said basket provided in proximity its upper edge with a discharge aperture through its side wall and a shroud open at each end extending from the side wall over such discharge aperture.



1,633,797. ADJUSTABLE BEARING MECHANISM FOR DRUMS, SLEEVES, AND THE LIKE. GEORGE R. TAAFFE, Joplin, Mo., assignor to United Iron Works, Inc., Joplin, Mo., a Corporation of Missouri. Filed June 21, 1924. Serial No. 721,467. 4 Claims. (Cl. 308—207.)

1. The combination of a shaft, a sleeve surrounding said shaft, friction-reducing bearings arranged between said shaft and sleeve at the opposite ends of the sleeve and comprising inner members mounted on said shaft, and a device arranged between the bearings and operable from one end of the sleeve for moving the inner member of

one bearing longitudinally of the shaft away from the inner member of the other bearing so as to simultaneously adjust both bearings to compensate for wear.

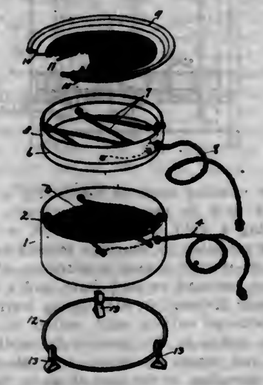


1,633,798. METHOD AND MEANS FOR CONNECTING TUBES. JAMES A. TAYLOR, Portland, Me. Filed Mar. 31, 1926. Serial No. 98,851. 8 Claims. (Cl. 285—197.)

1. A connector for tubes comprising a tubular member of an external diameter substantially equal to the internal diameter of the tubes to be connected, said member having axially extending flanges projectable through slots in said tubes, and means independent of said slots for limiting the extent to which said connector may be forced into each of said tubes.

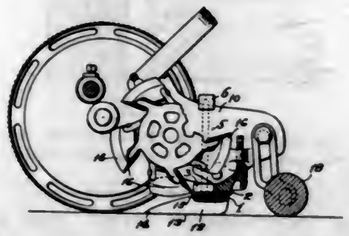
1,633,799. RAIL JOINT. AUGUST WASS, Mellerud, Sweden. Filed Sept. 17, 1924. Serial No. 738,285. 1 Claim. (Cl. 238—244.)

In a rail joint, fish plates formed with longitudinal recessed faces adapted for disposal adjacent the web of the rail and extending obliquely downward over and beyond the rail base to rest upon the tie, an angle iron received by one fish plate upon one side of the rail, said angle iron being co-extensive with and resting upon the inclined portion of said fish plate, a bar received by the other fish plate upon the opposite side of the rail, said bar being co-extensive with and resting upon the inclined portion of said fish plate, adjusting bolts connecting said angle iron, fish plates and bar to the web of the rail, and spikes for securing said members to the rail ties.



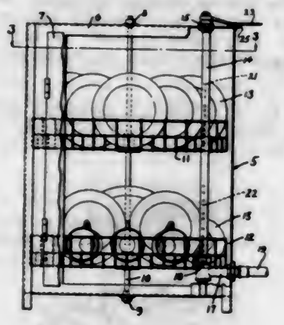
1,633,800. DISHWASHING DEVICE. FRED A. WILCOX, La Porte, Ind. Filed Jan. 12, 1925. Serial No. 1,958. 6 Claims. (Cl. 299—84.)

1. A device of the character described comprising a soap receptacle, a discharge pipe extending axially through said soap receptacle, a handle member having a water passage therethrough, a valve casing carried by said handle member and secured to one end of the soap receptacle, a disc valve carried by the handle member and seated on the adjacent end of the soap receptacle, said disc valve cooperating with ports carried by the adjacent end of the soap receptacle and by the valve, whereby water passing through the handle member may be selectively directed longitudinally through the discharge pipe or by-passed through the soap receptacle and then longitudinally through the discharge pipe.



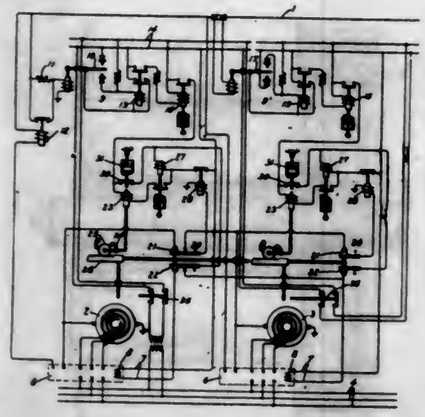
1,633,801. ELECTRICAL HEATING APPLIANCE. MAUDE S. WILLIAMS, Los Angeles, Calif. Filed June 9, 1925. Serial No. 35,911. 5 Claims. (Cl. 219—42.)

5. An electrical appliance including a body member open at both ends and adapted at one end to telescope over a motor fan and at its other end adapted to have



other elements telescoped detachably therewith, a heating element within said body, a combination guard and grate adapted to be telescoped with the outer end of said body, and an air concentrating member having one end adapted to telescope with said body and reduced in size at its other end for converging air currents, said guard and grate and said air concentrating member being interchangeable in said body.

1,633,802. RAKE ATTACHMENT FOR LAWN MOWERS. EDWARD S. WRIGHT, Glendale, Calif. Filed Sept. 26, 1925. Serial No. 58,760. 2 Claims. (Cl. 56—294.)

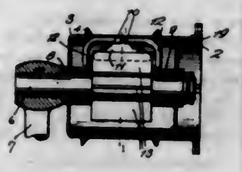


1. An attachment for lawn mowers set forth comprising an attachment bar having runners on its under face and adapted on its upper face to fit against the under side of the cutter bar of a lawn mower and provided at its ends with slotted lugs; bolts bent at the upper ends to form hooks to hook over the frame of the lawn mower and having the lower end portions threaded and adapted to enter the slots of the lugs; and nuts screwed onto the lower ends of the bolts to tighten the bar against the under side of the lawn mower cutter bar.

1,633,803. DISHWASHING MACHINE. FREDERICK A. BALLIN, Los Angeles, Calif. Filed Aug. 1, 1925. Serial No. 47,402. 3 Claims. (Cl. 141—9.)

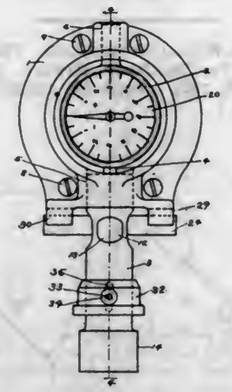
1. A dish washing machine comprising a casing having in its front wall an opening and closure therefor, said casing having a fluid discharge outlet, a vertically disposed shaft mounted in bearings formed on the top and bottom walls of said casing, a plurality of dish carriers spaced apart mounted on said shaft, and a fluid discharge pipe vertically disposed in said casing having a plurality of fluid discharge outlets, said outlets discharging fluid against the dishes in the carriers to rotate and cleanse the same, and means to rotate said discharge pipe to change the direction of the jets of water issuing through the discharge outlets formed therein, whereby to increase or diminish the velocity of rotation of the carriers or to reverse their direction of rotation.

1,633,804. SYSTEM OF ELECTRICAL DISTRIBUTION. EARL M. BILL, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Feb. 8, 1921. Serial No. 443,435. 13 Claims. (Cl. 171—118.)



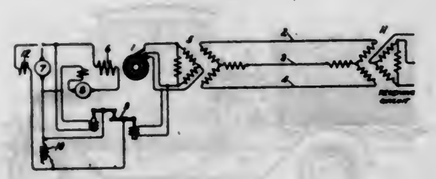
1. In a system of distribution, a distribution circuit, a plurality of dynamo electric machines adapted to be started and subsequently to be connected automatically to said distribution circuit to supply current thereto, a plurality of control devices adapted to be operated in a predetermined sequence, each one of said control devices normally being adapted to control the starting of a different one of said machines, and means associated with each control device and operative in response to a predetermined condition of the machine normally controlled thereby for placing a different machine under the control of such control device and all of the other control devices following such control device in said predetermined sequence.

1,633,805. HEAT-RESISTING ALLOY. GERALD R. BROPHY, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed June 17, 1921. Serial No. 478,422. 8 Claims. (Cl. 75—1.)



8. An alloy which resists oxidation at high temperatures having an iron base and containing about 10% of aluminum 30% to 40% of nickel and 5% of chromium.

1,633,806. SELF-OILING HUB FOR RADIATOR FANS. RALPH F. CRAWFORD, Salina, Kans. Filed Sept. 28, 1925. Serial No. 59,087. 2 Claims. (Cl. 308—117.)



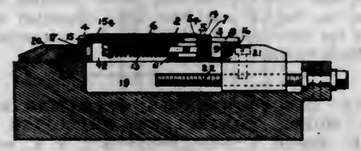
1. A self oiling hub for radiator fans and the like, consisting of a hollow hub having spaced rotary bearings upon the fan shaft and provided with means for deflecting in opposite directions the oil contained in said hub and delivering the same simultaneously to said spaced bearings including a scoop device having its mouth located centrally of said hub adjacent the concave inner surface of the hub and oppositely extending channels leading from said mouth to and terminating adjacent said spaced bearings.

1,633,807. INTERNAL MICROMETER CALIPER. PHILIP J. DARLINGTON, Brookline, Mass. Filed Aug. 16, 1926. Serial No. 129,394. 6 Claims. (Cl. 33—178.)

1. In a micrometer caliper having a frame, a plug with an expansible and contractible measuring end extending from said frame, said plug having a bore with a tapering section within its measuring end, a plunger longitudinally movable in the bore of the plug, said plunger having a tapering end adapted to engage the tapering section of the bore and expand the plug, means for moving the plunger longitudinally within the plug, and an indicator adjustably held by the frame and adapted to be engaged by and to indicate the position of the plunger.

1,633,808. REGULATING SYSTEM FOR DYNAMO-ELECTRIC MACHINES. ROBERT E. DOHERTY, Scotia, N. Y., assignor to General Electric Company, a New York Corporation. Filed May 9, 1925. Serial No. 29,246. 10 Claims. (Cl. 171—119.)

1. The combination of a synchronous dynamo-electric machine, an excitation circuit therefor, a main source of electrical energy for said excitation circuit, and an auxiliary source of excitation interposed in said excitation circuit responsive to current transients induced in the excitation circuit of said synchronous machine.

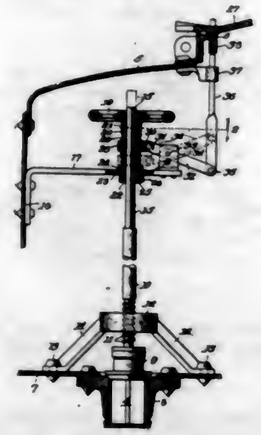


1,633,809. FIGURE WHEELED TOY. JOHN A. EKELUND, Minneapolis, Minn. Filed Oct. 4, 1926. Serial No. 139,353. 7 Claims. (Cl. 46—45.)

1. A toy comprising a base, an axle shaft journaled in said base, said shaft having a crank portion formed therein, traction wheels secured to said shaft, a pivot secured to said base, a member having a portion adapted to hook over said pivot for swinging movement thereabout, said member having another portion adapted to be engaged with the crank portion of said shaft, whereby as said traction wheels are rotated oscillatory motion

will be imparted to said member about said pivot as an axis, said member being releasable from said pivot and said shaft.

1,633,810. PLATE HOLDER FOR PRINTING PRESSES. WALTER C. FELLOWS, Philadelphia, Pa., assignor to C. R. Carver Company, a Corporation of Pennsylvania. Filed Feb. 18, 1926. Serial No. 88,996. 8 Claims. (Cl. 101—383.)

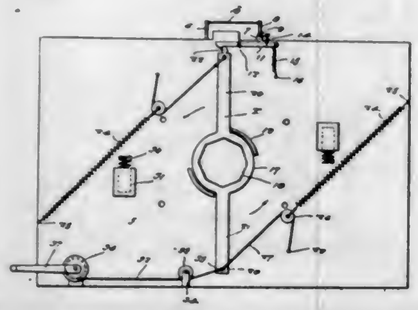


1. An engraved plate holder for printing and embossing presses, consisting of a holder bed rabbeted at front and back portions and having a flat upper surface bounded at one end by an undercut shoulder and having at the opposite end a slot at right angles to the alinement of the undercut shoulder, a sliding clamping block movable in said slot and having an undercut edge facing in the opposite direction to the undercut shoulder on the bed, and spring devices enclosed within the bed for moving the sliding clamping block toward the undercut shoulder with a yielding pressure, combined with a chuck having a flat upper surface and a stationary jaw of a height to fit under the rabbeted portion of the holder bed at one side, a movable jaw adjustable upon the chuck toward and from the fixed jaw and having a height above the surface of the chuck so as to fit under the rabbeted portion of the holder bed and clamp the same tightly against the fixed jaw, and adjusting means for the chuck arranged below the level of the supporting surface for the plate holder.

1,633,811. TANK CAR. FRED G. GARLICK, Chicago, Ill., assignor to General American Tank Car Corporation, Chicago, Ill., a Corporation of West Virginia. Filed July 12, 1926. Serial No. 121,847. 6 Claims. (Cl. 137—21.)

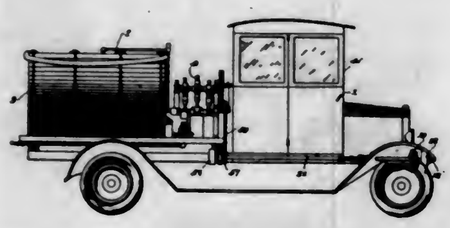
1. In a tank structure having an opening in its upper portion and an outlet, a cover for said opening, a valve for said outlet, a stem operatively connected with said valve and having a threaded portion, a stationary member with which said threaded portion engages, a second

member operatively engaged by, and rotatable with, said stem and relative to which said stem is movable lengthwise, said second member being threaded reversely to said first-referred-to threaded portion, a nut engaging the threads on said second member, a fulcrum mounted



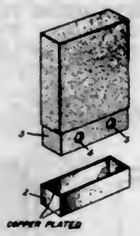
contiguous to said second member, a telltale device mounted near said fulcrum, and a lever mounted on said fulcrum, one end of said lever being connected to said nut and the other end of said lever being connected with said telltale device.

1,633,812. ELECTROMAGNETIC OPERATING MEANS AND MOTOR CONTROLLER EMPLOYING THE SAME. ROBERT W. GOFF, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Apr. 18, 1925. Serial No. 24,247. 7 Claims. (Cl. 200—104.)



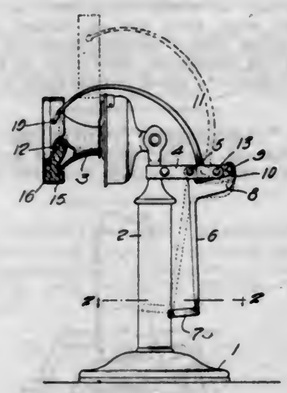
1. Operating means for a device having a normal and two operative positions comprising an operating member, an electromagnet having a magnetic movable element for operating the said member, and means comprising a resilient connection interposed between said member and said element through which, upon the intial energization of said electromagnet, the said member is operated from the normal position to the first operative position and is held therein with the member put under a strain to the second operative position which becomes effective to initiate the operation of the member to the second position upon a momentary deenergization of said electromagnet and through which the said electromagnet completes the movement of the member to the second position upon a reenergization of the electromagnet.

1,633,813. OIL-WELL-CONTROLLED FIRE EXTINGUISHER. TED BENJAMIN HAWLEY, Kevin, Mont. Filed Sept. 17, 1926. Serial No. 136,151. 6 Claims. (Cl. 137—162.)



1. A device of the class described including a plate, a valve shut-off tool rotatable above the plate and adapted to operatively engage a valve, means associated with said tool tending to swing it to shut off the valve, a latch associated with said tool for holding it in its valve open position, means tending to release the latch from engagement with said tool, and fuse means for holding said latch in an engaged position with said tool.

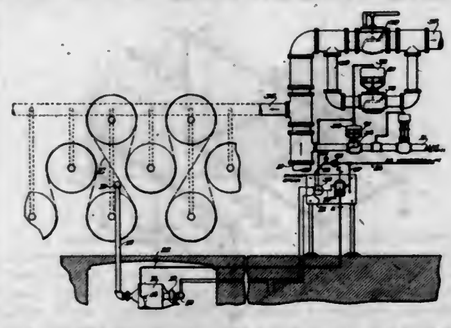
1,633,814. POWER TAKE-OFF. THOMAS A. JONES, Walla Walla, Wash. Filed Feb. 25, 1926. Serial No. 90,467. 2 Claims. (Cl. 180—53.)



1. In a power take off mechanism, a frame, a hanger mounted on said frame and arranged to mount antifriction bearings, a shaft rotatably mounted in said hanger and provided with a flexible coupling attachable to the crank shaft of an engine, and provided with clutch mechanism, a counter shaft operated in said hanger, means for operating said clutch mechanism simultaneously with the control of said engine, means operably connecting said shaft and said counter shaft, an auxiliary butterfly valve positioned within the intake manifold of said engine, a governor mounted on said counter shaft and detachably attached to said butterfly valve, and means to frictionally secure said butterfly valve in an open position when said governor is detached therefrom.

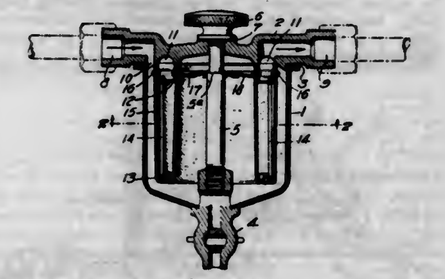
1,633,815. ELECTRIC TERMINAL. FLOYD C. KELLEY, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Continuation in part of my copending application, Serial No. 728,977, filed July 29, 1924. This application filed Sept. 14, 1925. Serial No. 56,163. 4 Claims. (Cl. 171—325.)

2. A brush for a dynamo electric machine comprising a body of carbonaceous material, a sheet metal cap frictionally engaging with said body and metallic anchors engaging with depressions in said carbonaceous body and joined by a layer of copper to said cap.



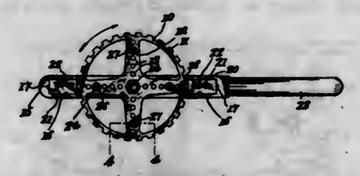
1,633,816. DEVICE FOR USE WITH TELEPHONES. CHARLES B. KINKEAD, Huntington, W. Va. Filed Mar. 26, 1927. Serial No. 178,699. 5 Claims. (Cl. 179—185.)

5. In combination, a telephone having a standard and a mouthpiece, an arm mechanically attached to the standard having an antiseptic container attached to one end, means to manually raise the container to a point above the mouthpiece, release of said manual means allowing the container to drop back into position under the action of gravity.



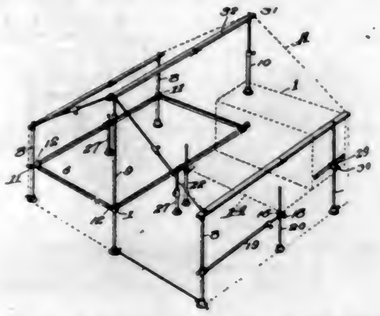
1,633,817. METHOD OF AND APPARATUS FOR CONTROLLING THE MOISTURE CONTENT OF PAPER. FRANK E. P. KLAGES, Chicago, Ill., assignor to The Powers Regulator Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 4, 1926. Serial No. 92,185. 8 Claims. (Cl. 34—48.)

1. The method of regulating the moisture content of a sheet of paper during the process of manufacture, which consists in drying said sheet by a continuous process, delivering a body of air over and in intimate contact with the moving sheet at a point a substantial distance short of the point of completion of said drying process, then continuously testing the moisture content of said body



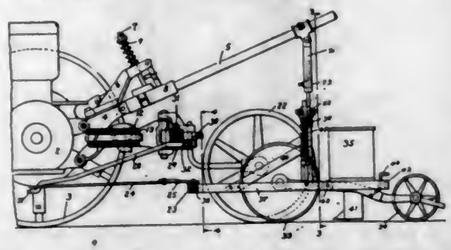
of air, then controlling the heat supplied to said sheet of paper during the process of drying in accordance with the moisture content of said body of air.

1,633,818. FILTER. AXEL W. KOGSTROM, Upper Darby, Pa., assignor of one-half to Allison F. H. Scott, Philadelphia, Pa. Filed June 4, 1925. Serial No. 35,019. 12 Claims. (Cl. 210—165.)



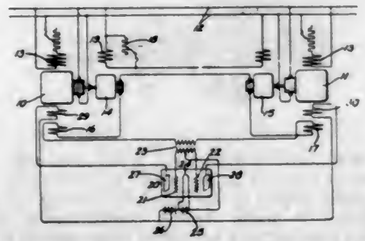
1. A filter comprising a settling chamber and a cap therefor provided with inlet and outlet passages, means for clamping the cap to the chamber, a filter element, and means including said clamping means and a flexible spider supported thereon for resiliently holding the filter element over the outlet passage.

1,633,819. RATCHET FLANGE SETTER. HENRY N. LONG, Roanoke, Va., assignor to Walter K. Queen, Needham Heights, Mass. Filed Feb. 8, 1926. Serial No. 86,960. 3 Claims. (Cl. 81—60.)



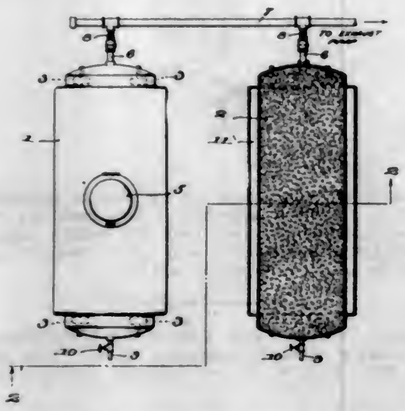
1. A flange setter comprising a wheel, adjustable centering means mounted on the wheel for engaging a pipe flange, means carried by the wheel for binding the pipe flange thereto, a handle member axially pivoted to the wheel, and independently adjustable pawls carried by the handle member for interlocking engagement with the wheel for rotating the same in opposite directions upon the reciprocation of the handle member.

1,633,820. ADJUSTABLE TRUNK-RACK CAMPING OUTFIT. THOMAS J. LONG and JAMES L. TUTTLE, Wellington, Kans. Filed May 14, 1926. Serial No. 109,102. 4 Claims. (Cl. 5—119.)



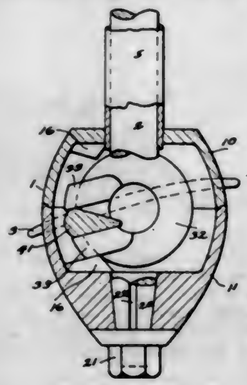
1. In an adjustable trunk rack camping outfit, the combination of a box container provided with a rack bar attached to its outside, a bed frame provided with a hook resting on said rack bar for partly supporting the bed frame on said box container, and additional supporting means for said bed frame.

1,633,821. TRACTION-MACHINE HITCH FOR SEEDERS. JOSEPH MADER, Minneapolis, Minn., assignor, by mesne assignments, to New Beeman Tractor Company, Minneapolis, Minn., a Corporation of Minnesota. Filed Jan. 8, 1920. Serial No. 350,103. 15 Claims. (Cl. 97—48.)



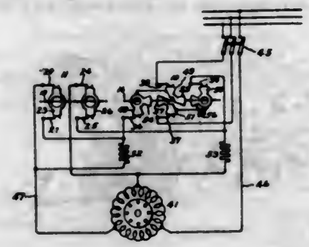
11. The combination, with a traction machine, a draft bar supported at either end by a wheel and connected to said machine and having a forwardly and downwardly projecting draft rod, of an implement frame between said wheels and a draft member connected with said implement frame and having its forward end loosely connected with the forward portion of said draft rod.

1,633,822. SYSTEM OF MOTOR CONTROL. NICOLAS MINORSKY, Philadelphia, Pa., assignor to General Electric Company, a Corporation of New York. Filed Sept. 1, 1925. Serial No. 53,899. 5 Claims. (Cl. 172—293.)



1. In combination, a plurality of mechanically independent electric motors, and speed regulating means for each of said motors, said means including thermionic means connected with the motors to respond to the rate of variation of the speeds of the motors from a predetermined relation for controlling the speeds of the motors to restore the said speed relation and cause the motors to operate practically as if they were mechanically connected.

1,633,823. PROCESS OF SULPHURIZING, DEHYDRATING, AND DESULPHURIZING FRUIT. CHARLES C. MOORE, San Francisco, Calif. Filed Feb. 15, 1926. Serial No. 88,204. 4 Claims. (Cl. 99—9.)

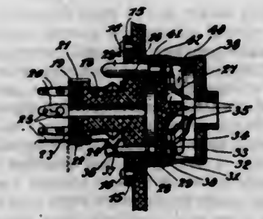


1. A process of desulphurizing fruit which has been sulphurized while fresh for the purpose of arresting enzymic action during dehydration which consists in subjecting the sulphurized dried fruit to a vacuum of about 25 inches for a period of from three to six hours.

1,633,824. REVERSIBLE PROPELLER. WILHELM NIEDERGESAESS, Seattle, Wash. Filed Sept. 16, 1926. Serial No. 135,764. 4 Claims. (Cl. 170—163.)

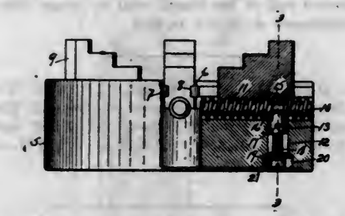
1. In a reversible propeller, a hollow hub, blades mounted to turn upon the hub about radial axes when reversing, the hub ends of the blades having holding lugs located within the hollow of the hub and eccentric of their reversing axes, a blade controlling member movable within said hollow lengthwise of the propeller axis, said controlling member having lugs engaging the lugs on the hub ends of the blades, the active engaging faces of said lugs being angularly positioned to make plane contacts between the acting faces when in adjusted positions.

1,633,825. REVERSING CONTROLLER. ARTHUR C. PRESCOTT, East Orange, N. J., assignor to General Electric Company, a Corporation of New York. Filed Jan. 30, 1926. Serial No. 84,997. 6 Claims. (Cl. 172—240.)



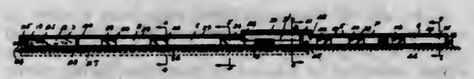
3. A controller for periodically reversing an electric motor comprising two independently rotatable shafts one of which is journalled in the other, reversing contact mechanism operated by the first of said shafts between two positions, resilient biasing means for effecting a snap action movement of said mechanism and for holding said mechanism in the position to which last operated by said first shaft, a second contact mechanism biased to one position and operated by the second of said shafts to a second position, a common operating means for said shafts, a direct driving connection between said second shaft and said operating means, and a resilient driving connection between said first shaft and said operating means.

1,633,826. ALLOY. WILLIAM E. RUDER, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed June 7, 1923, Serial No. 644,057. Renewed Apr. 29, 1927. 6 Claims. (Cl. 75—1.)



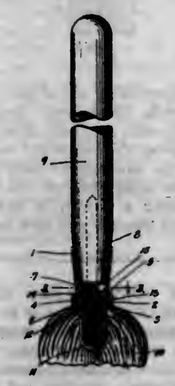
2. A heat resisting alloy having an iron base and containing from 25 to 40% of nickel, from 7 to 9% of aluminum and from 7 to 15% of chromium.

1,633,827. CONNECTER FOR RADIORECEIVERS. SAMUEL SIEGEL, New York, N. Y., assignor to Aerovox Wireless Corporation, a Corporation of New York. Filed Nov. 20, 1924. Serial No. 750,966. 3 Claims. (Cl. 173—332.)



1. A multiple contact socket for use with a panel having an opening and adapted to be secured in said opening with its outer face exposed and substantially flush with the outer face of the panel, comprising a face portion having a plurality of plug receiving openings therethrough circumferentially arranged, and a hub having an outer diameter less than the diameter of the circle in which the plug receiving openings are arranged, said hub portion having a plurality of spring contacts in alignment with the openings and adapted to engage plugs projected through said openings.

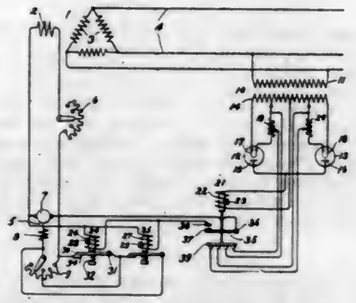
1,633,828. CHUCK. HARRY E. SLOAN, Hartford, Conn., assignor to The Cushman Chuck Company, Hartford, Conn., a Corporation of Connecticut. Filed May 5, 1922. Serial No. 558,560. 2 Claims. (Cl. 279—112.)



1. A chuck comprising a body and a chuck jaw slidably mounted thereon, one of said members having a hole therethrough including a counterbored portion, a feed screw support comprising two members engaging a feed screw from opposite sides to afford a support therefor, said members fitting said hole whereby they are held together, a retaining screw fitting a threaded opening in said support, a tensioning device located underneath the head of said screw to exert pressure thereagainst that is resisted by the bottom of said counterbored part, and a jaw feeding screw engaged by said support and held thereby.

1,633,829. TUNNEL KILN. HALVER R. STRAIGHT, Adel, Iowa. Filed May 8, 1925. Serial No. 28,848. 9 Claims. (Cl. 25—142.)

1. In combination, a kiln tunnel, a series of ware bearing cars adapted to travel longitudinally through said tunnel, each of said cars being provided with a fire proof floor having a series of horizontally arranged grooves in its upper surface, said car floor being designed to support and carry ware to be burned, said ware being arranged so as to form vertical passages having their lower ends communicating with said horizontal grooves of said floor, means for forcing a cooling medium through said horizontal passages from each end and thence upwardly through the vertical passages as the ware is being cooled.



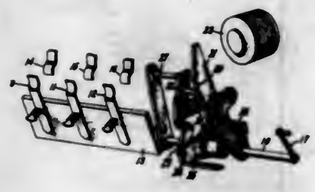
1,633,830. MOP. HERBERT M. STURGIS, Kansas City, Mo. Filed Apr. 20, 1925. Serial No. 24,466. 3 Claims. (Cl. 15—228.)

1. A mop comprising a conical ferrule having an annular internal socket, a disc engaged in said socket and having an axial threaded opening, a mop swab secured

to said disc, a handle having a tapered end receivable in the conical ferrule, and a threaded pin in the end of the handle engageable with the threaded opening of the disc whereby upon screwing the threaded pin in the opening the tapered end of the handle will be drawn into frictional engagement with the ferrule.

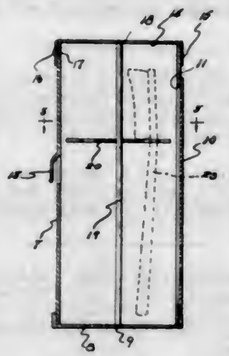
1,633,831. REGULATING SYSTEM. LOUIS W. THOMPSON, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Apr. 21, 1924. Serial No. 707,850. 8 Claims. (Cl. 171—229.)

1. An electric circuit regulator comprising a relay for causing a change to be produced in an electrical condition of a circuit to be regulated, an electron discharge device connected to respond to variations in the electrical condition of said circuit for controlling the actuation of said relay, and means operable in response to actuation of said relay for controlling said device to prevent hunting.



1,633,832. FUSE PLUG. JULIUS C. TOURNIER, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed May 2, 1924. Serial No. 710,641. 5 Claims. (Cl. 200—130.)

1. A fuse plug comprising a contact member provided with external contacts respectively connected to spaced internal contacts thereon, a handle member provided with means adapted to press the respective ends of a fuse link into engagement with said spaced internal contacts, and a central screw extending through one of said external contacts and engaging a thread in the handle member whereby said contact member and said handle member are clamped together.

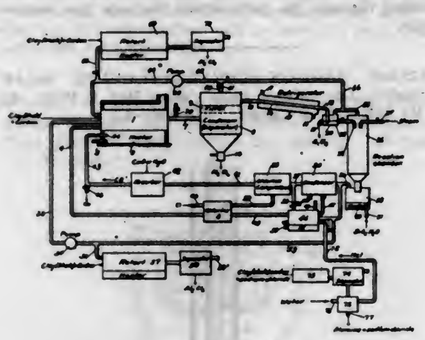


1,633,833. MOTOR CONTROLLER. GEORGE R. TOWNSEND, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Apr. 1, 1925. Serial No. 19,980. 2 Claims. (Cl. 200—106.)

1. A motor controller having a plurality of cooperating contacts for establishing starting and running connections, an operating shaft having a handle for operating the contacts, an electromagnet having an armature for holding the said contacts in the running position, the said armature being mounted on the said shaft for rotation with respect thereto, a lever carried by and pivotally mounted with respect to said armature, the said lever having one end operatively connected with said contacts and the other end operatively connected with said shaft, and a spring associated with said lever, the connections being such that operating the said handle from the initial

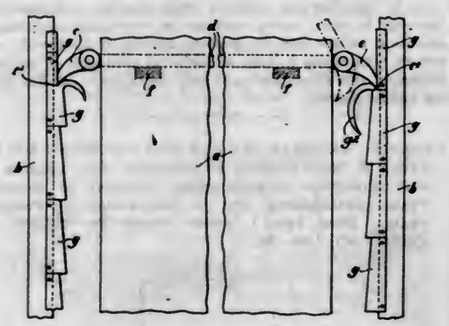
position to a second position moves the said armature to the attracted position, places the said spring under strain and moves the said contacts to establish the starting connections, the strain of the spring being thereupon effective by reason of the holding effect of said armature to operate the said lever and move the said contacts to establish the running connections when the said handle is released.

1,633,834. TOOTHBRUSH HOLDER. CHARLES VAITULIS, Detroit, Mich. Filed Aug. 28, 1925. Serial No. 52,991. 1 Claim. (Cl. 206—15.1.)



A tooth brush holder of the class described, comprising a receptacle having an opening formed centrally in its bottom; a tongue punched from said receptacle and outwardly offset therefrom for engagement with a supporting member; a removable cap mounted on said receptacle and having an opening formed centrally therein in registration with the opening in said bottom; a shaft rotatably mounted at opposite ends of said openings; a disc fixedly mounted on said shaft and provided with a plurality of peripheral notches each adapted for the reception of a tooth brush handle, said shaft and said disc being removable from said receptacle upon removal of said cap from said receptacle.

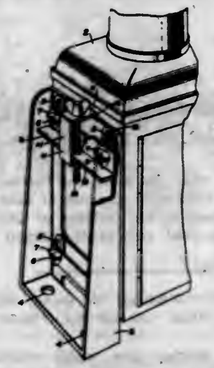
1,633,835. ALUMINUM-CHLORIDE PRODUCTION. EDSON R. WOLCOTT, Los Angeles, Calif., assignor, by mesne assignments, to The Texas Company, New York, N. Y., a Corporation of Delaware. Filed Feb. 2, 1921. Serial No. 441,783. 18 Claims. (Cl. 23—95.)



1. The process for producing aluminum chloride which consists in heating aluminum silicate material in the presence of carbon and chlorine to produce aluminum chloride and silicon tetrachloride, withdrawing the gases

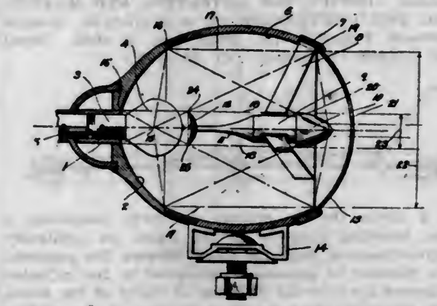
resulting from such reaction, cooling the gases to condense and collect the aluminum chloride and then to condense and collect silicon tetrachloride, and maintaining

a body of silicon tetrachloride so condensed in the path of the effluent gases to produce a liquid seal to prevent access of moisture to the aluminum chloride.



1,633,836. SAFETY CATCH FOR ELEVATORS, LIFTS, OR THE LIKE. JULIUS WÜSTENHÖFER, Dortmund, Germany. Filed Sept. 23, 1926, Serial No. 137,196, and in Germany Dec. 27, 1924. 6 Claims. (Cl. 187—85.)

1. A device for catching falling cages comprising in combination with the cage and with the guide bars for the cage, tools on the cage and adapted to be brought automatically into the operative position when the rope breaks, and work pieces or elements detachably fixed in a continuous row on said guide bars and designed to be worked upon by said tools.

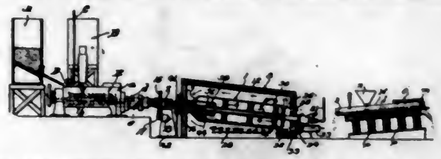


1,633,837. PROJECTION LANTERN. JESSE PAUL YOUTZ, Rio de Janeiro, Brazil, assignor to General Electric Company, a Corporation of New York. Filed Apr. 30, 1924. Serial No. 710,149. 1 Claim. (Cl. 88—24.)

In a projector, a frame, a housing, an upright plate adapted to be screwed to the frame of the projector, guide openings in the plate, a pair of bolts projecting through said guides, a cross beam suspended between said bolts behind the plate whereby the housing may be raised and lowered by raising and lowering said beam, and sliding said bolts in said guides, a support for said beam in the form of an angle piece with one leg of the piece supported by the plate and the other leg of the piece resting against said beam and in sliding engagement therewith, and a threaded element between the piece and the beam for raising and lowering the beam

and thereby operating the housing, said threaded element being supported by the angle piece and in threaded engagement with said beam.

1,633,838. LIGHT-PROJECTING DEVICE. HENRY R. ZIMMERMAN, Topeka, Kans. Filed Mar. 2, 1925. Serial No. 12,709. 1 Claim. (Cl. 240—41.)



In a lamp, a light source, a concave parabolical reflector in rear of the light source and having its focal point substantially coinciding with the light source for directing rays into parallelism to form a beam, a concave ellipsoidal reflector having one of its focal points substantially coinciding with that of the parabolical reflector and its other focal point located forwardly on a straight line passing through the focal point and the vertex of the parabolical reflector for reflecting rays of light not encompassed by the parabolical reflector into converging lines toward its forward focal point, and a convex parabolical reflector whose focal point coincides substantially with the forward focal point of the ellipsoidal reflector and whose vertex is directed away from the vertex of the concave parabolical reflector and so disposed with respect to the ellipsoidal reflector as to intercept the light rays received from the ellipsoidal reflector and direct them forwardly into parallelism to form a condensed beam substantially concentric with the beam projected by the concave parabolical reflector.

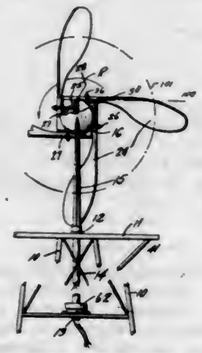
1,633,839. APPARATUS FOR UTILIZING LOW-GRADE IRON ORE. HENRY HAVELOCK HINDSHAW, Minneapolis, Minn., assignor to Hindshaw Engineering & Development Company, Minneapolis, Minn. Filed Jan. 24, 1921. Serial No. 439,343. 5 Claims. (Cl. 263—34.)

1. An apparatus for treating low grade iron ore comprising a heating chamber, an inclined open-ended cylindrical kiln rotatably mounted therein, a hollow shaft

supporting said member, means for feeding material into said hollow shaft and thence into the kiln at the upper end thereof, heating means disposed in said chamber below said kiln, a circular plate of smaller diameter than

said kiln disposed near the open end thereof, whereby an annular outlet is formed at the end of said cylinder, the ore being discharged at the bottom of said outlet, and gases which are formed will be discharged at the upper end of said outlet.

1,633,840. GLUE. WILLIAM R. LONG, St. Louis, Mo. Filed Sept. 24, 1924. Serial No. 739,707. 1 Claim. (Cl. 87—17.)

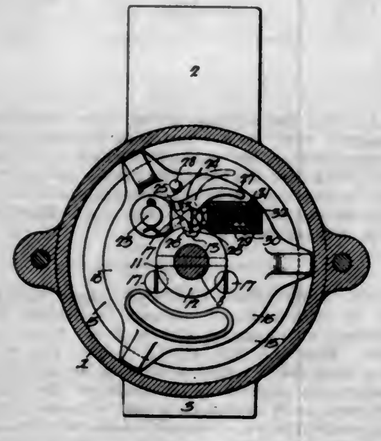


The process of making glue, which consists in mixing together in the cold, a specially converted starch, 8% finely ground caustic soda, and 4% granulated borax, the converted starch being a product formed by heating and agitating a mixture of corn starch and a small amount of a dilute solution of muriatic acid at temperatures above 212° F. and thereafter neutralizing it with soda ash.

1,633,841. DEVICE FOR DETECTING AND MEASURING THE UNEVENNESS OF A SURFACE. HAROLD ANDREW, Princeton, Ill. Filed Sept. 4, 1924. Serial No. 735,968. 5 Claims. (Cl. 33—174.)

1. A device for the purpose set forth comprising a frame, traveling supports for the frame, an oscillatory indicator mounted upon the frame between the supports, and a plurality of gage elements carried by the indicator and spaced apart in the direction of travel of the frame to be separately actuated by variations in the surface over which the frame travels and respectively locate depressions and elevations therein.

1,633,842. WIND MOTOR. GARRIE R. BISHOP, Runnells, Iowa. Filed Oct. 12, 1925. Serial No. 62,013. 4 Claims. (Cl. 170—163.)

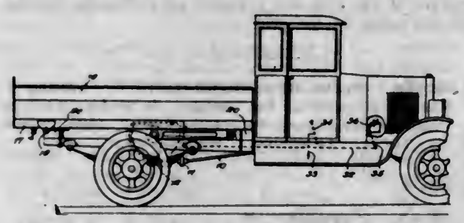


1. In a device of the class described, a shaft, a hub mounted thereon, a blade having at one end a stub shaft mounted rotatably in the hub, said blade having the greater part of its area on the following side of the line of the axis of the stub shaft and having a substantial area on such side and radially beyond the line of a circle having its center in the stub shaft and its circumference passing through the point where the axis line leaves the blade.

1,633,843. SNAP-ON SUCKER-ROD GUIDE. RALPH R. BOSTIC, Los Angeles, Calif. Filed May 1, 1926. Serial No. 105,996. 8 Claims. (Cl. 308—4.)

1. In combination with a well casing, a sucker rod movable in said casing and means engaging said casing and said sucker rod to prevent flexing of said rod, said means comprising a strip of material arranged to entirely surround and to engage said rod throughout substantially its entire length.

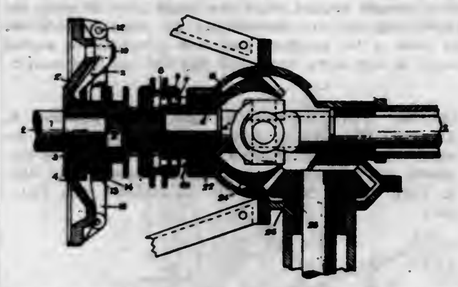
1,633,844. RELEASE CLUTCH FOR GRINDING MILLS. JACOB S. BUCKWALTER, Philadelphia, Pa., assignor to The Enterprise Manufacturing Company of Pennsylvania, Philadelphia, Pa., a Corporation of Pennsylvania. Filed July 1, 1924. Serial No. 723,534. 1 Claim. (Cl. 192—56.)



The combination in clutch release mechanism, of a shaft; a collar on the shaft having a transverse groove therein; a movable member mounted on the shaft; a latch pivoted to said member and having a projection extending into the groove in the collar and having a beveled wall in which is a beveled notch, and a spring-pressed plunger mounted on the movable member and having a beveled end arranged to engage the notch in the latch to retain the latch in engagement with the collar, or with the beveled wall to hold the latch out of engagement with the collar.

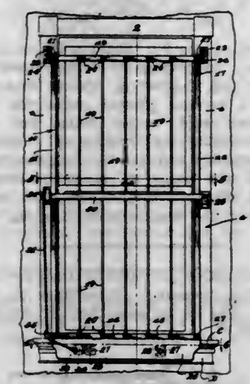
1,633,845. GRINDER FOR THE CUTTERS OF PENCIL SHARPENERS. GEORGE E. BURTON, Philadelphia, Pa. Filed Aug. 25, 1923. Serial No. 659,297. 8 Claims. (Cl. 51—250.)

1. In a pencil sharpener having a rotary carrier and rotary cutters therein, of grinders rotated with said carrier and movable into and out of engagement with said cutters, and means for holding said grinders in either position.



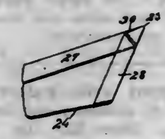
1,633,846. POWER HOIST FOR DUMP TRUCKS. RALPH F. CRAWFORD, Salina, Kans. Filed May 5, 1926. Serial No. 106,944. 1 Claim. (Cl. 298—21.)

In a hoist for dump truck bodies, the combination with a motor, fuel supply means therefor having a throttle, a pivoted dump body, hoisting mechanism therefor, and a power connection between said motor and said hoisting mechanism including a clutch, of means operable by said hoisting mechanism to operate the throttle in said fuel supply means and to disengage said clutch.



1,633,847. POWER TAKE-OFF MECHANISM FOR MOTOR VEHICLES. RALPH F. CRAWFORD, Salina, Kans. Filed Aug. 12, 1926. Serial No. 128,813. 5 Claims. (Cl. 74—7.)

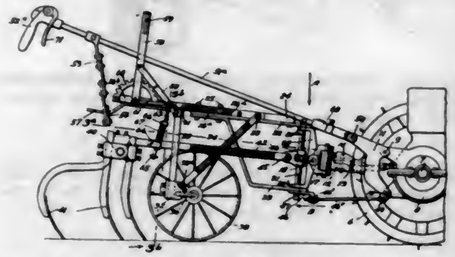
1. In power take off mechanism for motor vehicles, a drive shaft in two sections, the forward shaft section having a clutch member loose thereon and a clutch member fast thereon and carrying an annular series of clutch springs acting to press the two members of the clutch together, a manually operable device including a shiftable collar upon the forward shaft section for exerting tension upon one end of said springs to release the clutch, the rear shaft section carrying one member of the universal and having clutch teeth, a countershaft, a sleeve upon said rear shaft section provided with clutch teeth and a gearing connection with said countershaft, and means for selectively driving said rear shaft section or said sleeve



including shiftable clutch means upon the forward shaft section having clutch teeth and located between the rear shaft section and said shiftable collar.

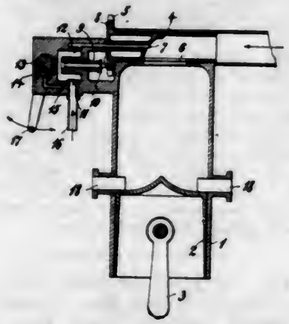
1,633,848. WINDOW BARRIER. LIZZIE DANDRIDGE, Wichita, Kans. Filed Sept. 15, 1926. Serial No. 135,631. 10 Claims. (Cl. 20—71.)

1. In combination with a window frame of a barrier frame constructed of openwork having eyes at its upper end, prong members carried by the window frame for engaging into said eyes, a shield arranged on the lower portion of said barrier frame and extending below the window opening, and securing elements arranged under said shield for attaching the lower end of the barrier frame to the window frame, said securing elements preventing upward movement of the barrier frame for disengaging said prongs from said eyes.



1,633,849. FOLDING METHOD AND PRODUCT. WALTER L. DIXON, Boston, Mass., assignor to Reece Folding Machine Company, Boston, Mass., a Corporation of Maine. Original application filed Apr. 3, 1924, Serial No. 703,951. Divided and this application filed June 9, 1924. Serial No. 718,834. 2 Claims. (Cl. 2—143.)

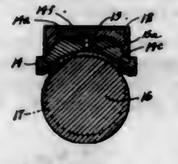
1. The method of producing an infolded blank having an acute angled corner, formed by the fold lines of two infolded margins, comprising infolding the first of the



two lineal margins adjacent such corner and forming the excess corner material into a doubled flap with its base hinged directly to the infolded first margin and the unfolded second margin with the hinge line between the doubled flap and the infolded margin lying between the fold lines of the margins, and then infolding the second margin in and down upon such flap and the first margin.

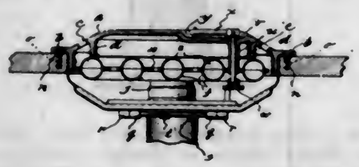
1,633,850. FOUR-WHEELED TRACTOR. FORREST V. DONALD, Minneapolis, Minn., assignor, by mesne assignments, to New Beeman Tractor Company, Minneapolis, Minn., a Corporation of Minnesota. Filed Jan. 3, 1921. Serial No. 434,562. 15 Claims. (Cl. 180—19.)

1. A four-wheel tractor comprising an internal combustion engine, supporting tractive means therefor, a trailer frame and supporting wheels therefor, a king-bolt forming a vertical pivotal connection substantially midway between said trailer frame and said engine, means for oscillating said engine on a vertical axis to steer the machine, and means cooperating with said king-bolt and said frame to resist buckling downward thrust on said king-bolt resulting from the reactive forces of the torque of the engine while turning the machine.



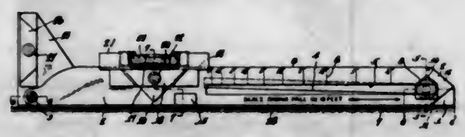
1,633,851. INTERNAL-COMBUSTION ENGINE. FRITZ DÜRR, Munich, Germany. Filed July 23, 1926, Serial No. 124,381, and in Germany July 27, 1925. 4 Claims. (Cl. 123—29.)

1. In an internal combustion engine, in combination, a rotary tubular valve for controlling the scavenging and the charging air, a fuel injecting nozzle opening axially into said valve and a fuel supply pump adapted to operate in the cycle of said valve and to supply the fuel to the charge air in countercurrent.



1,633,852. BEARING FOR RAILWAY-AXLE JOURNALS. GEORGE F. ENDICOTT and GEORGE H. GOODELL, St. Paul, Minn. Filed Nov. 19, 1924. Serial No. 750,773. 2 Claims. (Cl. 308—56.)

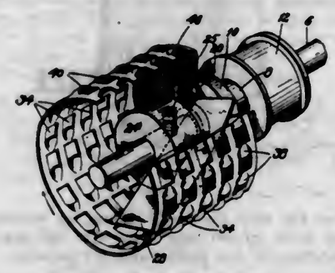
1. A bearing for a railway journal comprising a member having a continuous semi-cylindrical surface adapted to engage the anti-friction metal next to the journal, said member having a longitudinal groove formed in its top portion dividing said member substantially into segments having a connecting portion of small cross section, said semi-cylindrical surface being formed to fit a full sized axle journal and said member having laterally spaced



relatively high portions adapted to carry the load on said journal whereby when said journal wears said connecting portion will be distorted under load and said sections will conform approximately to the worn journal.

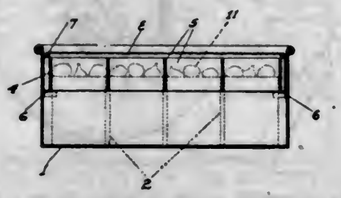
1,633,853. EXHAUST GAS HEATER. CHARLES FORTH, Detroit, Mich., assignor to Capital Manufacturing Co., Detroit, Mich., a Corporation of Michigan. Filed Sept. 10, 1923. Serial No. 661,896. 9 Claims. (Cl. 257—136.)

1. In an exhaust heater, the combination of a grid and a pan forming a housing, an exhaust gas heating element comprising a plurality of separated pipes united by a header, said heating element supported in the pan, and a depending flange depending from the bottom of the grid and resting on the heating element to divide the interior of the housing into an air intake chamber along the margin of the grid and a heated air delivering chamber on the inside of the grid.



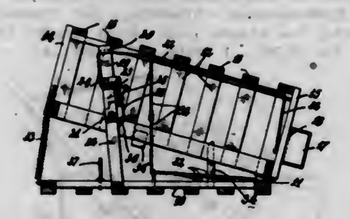
1,633,854. GRADE-MEASURING DEVICE. GROVER C. FRANTZ, Harrisburg, Pa., assignor to Modern Utilities Company, Harrisburg, Pa. Filed Jan. 2, 1926. Serial No. 78,794. 14 Claims. (Cl. 33—88.)

1. A grade indicator including an elongated base of inverted T-cross section having a slot extending longitudinally thereof in the vertical part thereof; a leveling bar pivoted to the base, having a slot inclined relatively to the slot in the base, and means slidable in the slots for angularly adjusting the base relatively to the bar.



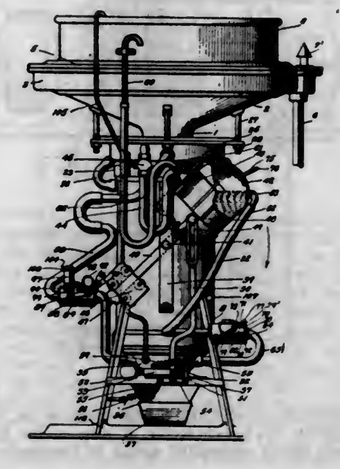
1,633,855. MACHINE FOR REMOVING SURPLUS MATERIAL FROM BOOTS AND SHOES. ROBERT P. FRYE, Marlboro, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Feb. 21, 1924. Serial No. 694,265. 11 Claims. (Cl. 12—83.5.)

9. A machine for removing surplus material from the bottoms of boots and shoes, comprising a shaft, a sleeve on the shaft, means for rotating the sleeve, a hollow shell secured to said sleeve and having abrading projections and perforations and an open end, a scraper blade having one edge secured to said shaft and its opposite edge adjacent to the interior of the shell and inclined to the axis of the shaft, and means to rotate



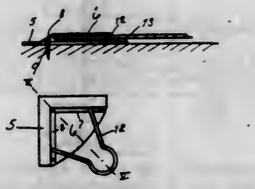
the blade to cause it to remove material from the interior of the shell and create a current of air inwardly through the perforations of the shell and outwardly through the open end of the shell.

1,633,856. CONTAINER FOR FRUIT-CANNING APPARATUS. ALBERT T. GAHAN, Stockton, Calif. Filed Sept. 27, 1926. Serial No. 137,908. 8 Claims. (Cl. 53—1.)



1. In fruit canning apparatus, an open topped container to receive a number of cans in horizontally alined relation, a frame member divided into a number of vertical-sided compartments to be supported in the container so that the compartment-sides project part way between adjacent cans, and a foraminous cover over and adjacent said frame.

1,633,857. ANIMAL AND BIRD TRAP. DANIEL GONZALEZ, Gallup, N. Mex. Filed Oct. 21, 1926. Serial No. 143,054. 2 Claims. (Cl. 43—62.)

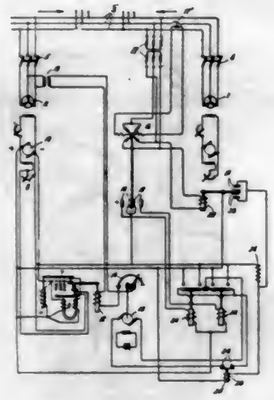


1. In an animal and bird trap of the class described, a base having a cage hinged thereto, a container adapted to hold bait attached to the said cage, an upper support pivotally attached to the top of the said cage, a lower support pivotally attached to the said upper support, a trap proper attached to the said upper support, adapted to hold the said cage in an open position, flexible members attached to the said trap proper as a means of closing the said cage, so as to entrap animals or birds enticed therein, said cage provided with a locking means, so as to prevent the escape of the said animals or birds entrapped therein.

1,633,858. APPARATUS FOR SEPARATING FLUIDS. HOWARD T. GROVES and JOSEPH W. CUSHMAN, Parsons, Kans., assignors to G & C. Oil Separator Corporation, Parsons, Kans., a Corporation of Kansas. Filed Jan. 2, 1925. Serial No. 73. 18 Claims. (Cl. 210—51.)

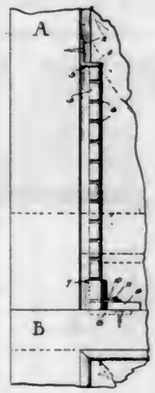
1. An apparatus for separating materials of different specific gravity comprising an upper chamber having an over-flow for the lightest material, an over-flow chamber for heavier material and a discharge for the heaviest material and a liquid accumulating, weight overbalancing motor for mechanically controlling the last named discharge.

1,633,859. FASTENING DEVICE. VERNON L. HARVEY, San Francisco, Calif. Filed Jan. 31, 1925. Serial No. 6,084. 4 Claims. (Cl. 40—156.)



3. A print holding device comprising a plate provided with a flat portion adapted to lie against a wall and a raised portion providing a free space to the wall therebeneath connected to said flat portion by an intermediate portion extending angularly from one to the other, and a tack point projecting rearwardly from said intermediate portion.

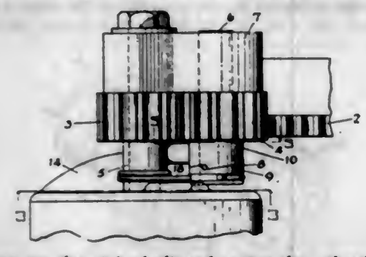
1,633,860. SYSTEM OF DISTRIBUTION. MAX HERKLOTZ, Berlin, Germany, assignor to General Electric Company, a Corporation of New York. Filed Mar. 20, 1924, Serial No. 700,550, and in Germany Mar. 27, 1923. 6 Claims. (Cl. 171—119.)



1. In a system of distribution, an alternating current load circuit, a plurality of sources of current adapted to supply current to said circuit, voltage regulating means for maintaining constant the voltage of one of said

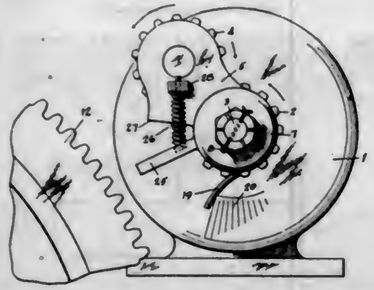
sources, and means operative in response to the power factor of one of said sources to change the setting of said regulating means to adjust the value of voltage main-

tained constant by said regulating means so as to maintain constant the power factor of said source to which said power factor responsive means is responsive.



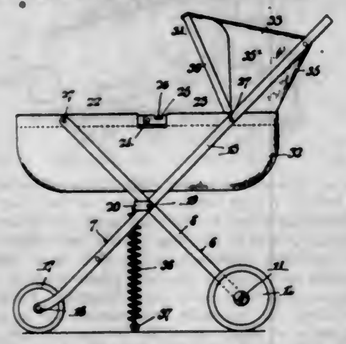
1,633,861. ADJUSTABLE WINDOW-SASH-FASTENING DEVICE. ANDREW INGMAN, Marshfield, Oreg. Filed Oct. 16, 1926. Serial No. 141,993. 4 Claims. (Cl. 292—57.)

1. In a window sash fastener, a bar having brackets at opposite ends thereof for attachment to the upper window sash, said bar having a series of horizontal slots in one side thereof, a sash fastening member slidably mounted on said bar, and a cam member pivoted on said fastening member and operable to engage the slots in said bar.



1,633,862. ENGINE STARTER. SHERMAN L. KELLY and LAWRENCE E. KOOS, Toledo, Ohio. Filed Aug. 1, 1925. Serial No. 47,478. 5 Claims. (Cl. 74—7.)

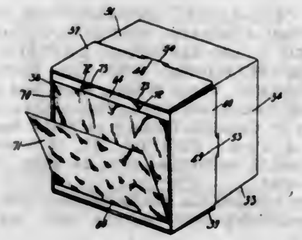
1. In an engine starter, a motor shaft, a pinion on the motor shaft, a member supported on the motor shaft and oscillatable about the axis of the motor shaft, a stub shaft secured to the member, an idler rotatably supported on the stub shaft and meshing with the pinion, means located on the stub shaft for locking the idler from



rotation on the stub shaft and means for releasing the idler when it is carried into mesh with the gear wheel by the rotation of the pinion and the member.

1,633,863. ENGINE-STARTER DEVICE. SHERMAN L. KELLY and LAWRENCE E. KOOS, Toledo, Ohio. Filed Mar. 29, 1926. Serial No. 98,127. 6 Claims. (Cl. 74—7.)

1. In an engine starter, a motor shaft, a pinion on the motor shaft, an arm located on the motor shaft, an idler pivotally supported on the arm and meshing with the pinion, a friction clutch member, the arm and the clutch member having a cam surface for movement of the arm and member longitudinally with respect to the shaft, a friction member secured to the shaft for frictionally engaging the clutch member for rotating the arm and the clutch member with the shaft, a means for operating the clutch member to release the arm, and the clutch member when the gears are in mesh.

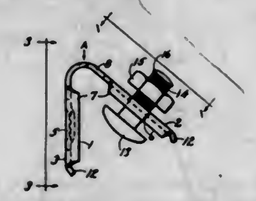


1,633,864. COLLAPSIBLE BABY CARRIAGE. STUART L. KLINGELSMITH, Alhambra, and FREDERICK J. KOEPKE, Los Angeles, Calif. Filed May 12, 1925. Serial No. 29,702. 1 Claim. (Cl. 280—41.)

In a baby carriage structure, a pair of supporting frames pivoted together inwardly of their ends, a collapsible body structure carried by said supporting frames,

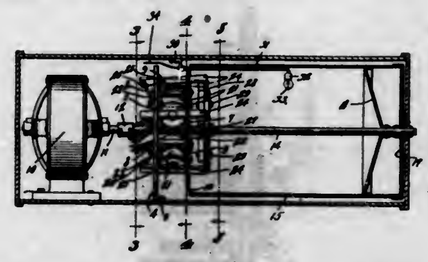
a strut, angular members at the outer ends of said strut, said angular members overlying the outer faces of said supporting frames at their points of crossing, the pivots connecting said supporting frames together also passing through said angular members, whereby portions of said strut operate to limit the movement of said frames in one direction, and wheels at the lower ends of said supporting frames.

1,633,865. DISPENSER BOX. WILLIAM A. LORENZ, Hartford, Conn., assignor to The Otaka Fabric Company, Hartford, Conn., a Corporation of Connecticut. Filed Jan. 18, 1924. Serial No. 686,993. 6 Claims. (Cl. 206—57.)



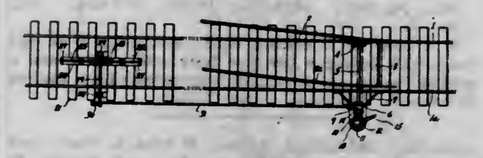
5. A dispenser box for dispensing articles, having four walls and a back, and having a front, said front being provided with four flaps, each having a projecting lock, and each of the four walls being provided with slots into which the locks engage when the said flaps are folded back in order to keep the flaps open, and having a rod or rods fixed in the box at its back to enable articles to be strung thereon.

1,633,866. MANUFACTURE OF CONDENSATION PRODUCTS AND DYESTUFFS OF THE BENZANTHRONE SERIES. ARTHUR LÜTTRINGHAUS, Mannheim, HEINRICH NERESHEIMER, Ludwigshafen-on-the-Rhine, and HUGO WOLFF, Mannheim, Germany, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany, a Corporation of Germany. Filed Oct. 16, 1925, Serial No. 62,934, and in Germany Oct. 25, 1924. 4 Claims. (Cl. 260—61.)



3. As new articles of manufacture, 2.Bzl'-dibenzanthronyls.

1,633,867. CONDUCTOR SUPPORT. SAMUEL S. MATTHES, Mansfield, Ohio, assignor to The Ohio Brass Company, Mansfield, Ohio, a Corporation of New Jersey. Filed Sept. 2, 1925. Serial No. 54,013. 10 Claims. (Cl. 191—43.)



1. A suspension clamp for a conductor comprising a unitary body member bent midway its length to form sides with the opposite edges adjacent to grip the conductor, registering transverse passages through the sides, fastening means positioned within the passages to draw the gripping edges into and maintain them in engagement with the conductor and a weakened portion adjacent and to one side of the center of the bight to permit one side of the clamp to move relative to the other side and the edge thereof into engagement with the conductor.

1,633,868. SIGNALING DEVICE. CHARLES E. MYERS, Vancouver, Wash. Filed Jan. 4, 1922. Serial No. 526,891. 1 Claim. (Cl. 177—327.)

In a device of the class described, a tubular casing, a first transverse plate secured to the casing and located within the casing, a second transverse plate disposed parallel to the first plate, both plates having openings, securing elements connecting the plates and supporting the second plate from the first plate in spaced relation to the casing, a shaft journaled in the plates, electromagnets located radially with respect to the shaft and disposed between the plates, means for mounting the magnets on the second plate independently of the first plate, armature levers extended through the openings of both plates and fulcrumed intermediate their ends on the first plate, springs located outwardly of the first plate and connecting the ends of the armatures with the first plate, a stop projecting from the shaft, the springs constituting means for holding the opposite ends of the armatures out of the path of the stop, the armatures being mounted to swing radially of the shaft and being responsive to the electro-magnets to dispose the last-specified ends of the armatures in the path of the stop, a signal carried by the shaft, and a motor connected to the shaft, the signal and the motor being located within the casing.

1,633,869. SWITCH-OPERATING MECHANISM. PETE PETERSON, Monroe, Wash. Filed Mar. 25, 1926. Serial No. 97,293. 2 Claims. (Cl. 246—323.)

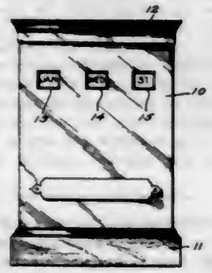
1. A switch actuating mechanism comprising a fixed support, a bearing sleeve rotatable in the said support, a shaft operatively connected with the switch and extending in a threaded connection through the said bearing, a lever arm extending from the bearing whereby it may be rotated in opposite directions to effect longitudinal movement of the shaft for opening or closing the switch, a rocker shaft mounted transversely of the track at some distance from the switch, a rocker lever mounted on the rocker shaft in position to be engaged and actuated by a control member on a car moving along the track, a lever fixed to the latter shaft and a link operatively connecting the lever with the rotating arm of the said bearing.

1,633,870. CONDENSER. EARL F. POTTER, Glencoe, Ill., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill., a Corporation of Illinois. Filed Jan. 26, 1923. Serial No. 614,964. 7 Claims. (Cl. 175—41.5.)

1. In a device of the character described including a fixed element and a rotatable element, a shaft for said

rotatable element, a second fixed element, a movable element associated with said second fixed element, a shaft for said movable element extending through the shaft of

said rotatable element, and means rotatably secured in said first shaft for moving the shaft of said movable element longitudinally in the first said shaft.



1,633,871. METHOD OF REVIVIFYING SPENT ADSORBENTS FOR OIL TREATMENTS. PAUL W. PRUTZMAN, Los Angeles, Calif., assignor, by mesne assignments, to Contact Filtration Company, San Francisco, Calif., a Corporation of Delaware. Filed Sept. 2, 1922. Serial No. 586,031. 7 Claims. (Cl. 252—2.)

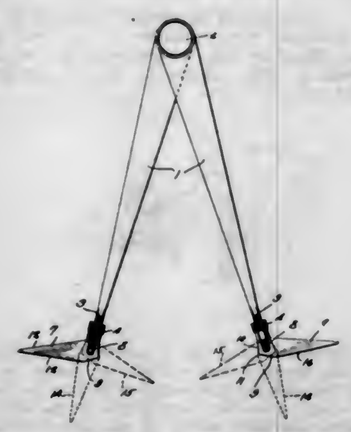
1. The method of revivifying spent oil purifying adsorbents for the production of a mudded body for the decolorization of oils, which consists in washing from the spent adsorbent the entrained oil with an organic solvent for the oil, then washing out the adsorbed bodies with an organic solvent for such bodies, then separating any excess quantity of such solvent and finally treating the adsorbent with water for the separation of the remainder of such solvent and leaving the revivified spent adsorbent in a thickened mudded or plastic condition.

1,633,872. PROCESS OF PRODUCING CRACKERS AND THE PRODUCTS OF SAID PROCESS. HUGH F. RIPPEY, Seattle, Wash., assignor to I. F. Laucks, Inc., Seattle, Wash., a Corporation of Washington. Filed Mar. 26, 1925. Serial No. 18,637. 8 Claims. (Cl. 99—10.)

8. A base for a cracker dough comprising flour and coconut oil having a low free fatty acid content and a melting point of seventy-two to seventy-four degrees Fahrenheit.

1,633,873. CALENDAR BANK. WALTER E. SMILY and THOMAS HANNAH, Pittsburgh, Pa., and MILTON E. WINANS, Irvington, N. J.; said Hannah and Winans assignors to said Smily. Filed Oct. 29, 1926. Serial No. 144,972. 3 Claims. (Cl. 194—94.)

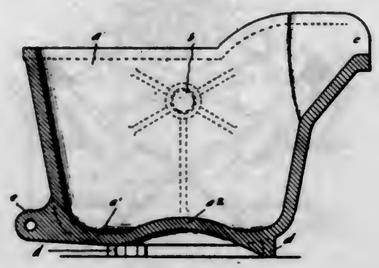
1. A calendar bank comprising, in combination: a casing having a plurality of coin slots therein; a separate registering wheel for each slot, each of said registering wheels being mounted within said casing for advancement by direct engagement with an inserted coin, each of said registering wheels having a series of teeth thereon; a spring mounted adjacent each coin slot and its respective series of teeth, each of said springs being adapted to hold an inserted coin in its slot so that one portion thereof is in restraining engagement with the teeth of its respective registering wheel while another portion of said coin is within the confines of its slot until another coin is inserted in said slot, and each of said springs also engaging the teeth of its respective registering wheel to prevent backward rotation of its registering wheel, substantially as specified.



1,633,874. CHROMABLE AZODYESTUFFS DERIVED FROM FORMALDEHYDE SULPHUROUS ACID AND NITRATED 1-(AZO-NAPHTHOL)-2-HYDROXY-NAPHTHALENE-4-SULPHONIC ACID AND PROCESS OF MAKING SAME. FRITZ STRAUB, Basel, and HERMANN SCHNEIDER, Riehen, near Basel, Switzerland, assignors to Society of Chemical Industry in Basle, Basel, Switzerland, a Firm. Filed July 21, 1926, Serial No. 124,097, and in Switzerland Sept. 24, 1925. 4 Claims. (Cl. 260—89.)

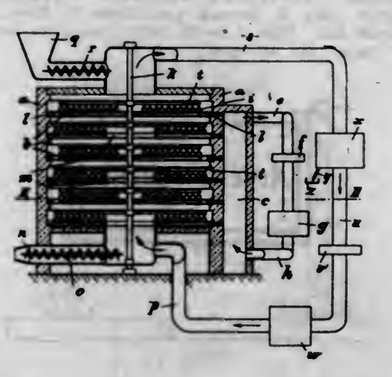
3. As new products the herein described new azo dyestuffs corresponding very probably with the general formula:

wherein R stands for the residue of an unsulphonated naphthol, which products form black powders which dissolve in water to violet-brown solutions, in dilute caustic soda solution to black and in concentrated sulphuric acid to blue solutions, and which dye wool, when afterchromed, very fast black shades which are particularly fast to potting.



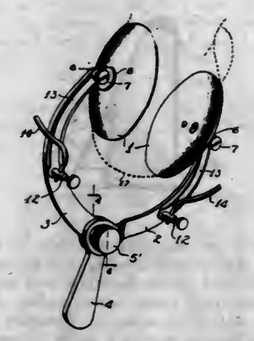
1,633,875. COMBINED CALIPER AND DIVIDER. ULYSSES G. SWEENEY, Mount Bullion, Calif. Filed Jan. 18, 1927. Serial No. 161,862. 1 Claim. (Cl. 33—149.)

A pair of calipers comprising pivotally connected arms, and points pivoted to the free ends of the arms respectively, each point having similar, angularly-related end edges, said edges defining corner angles, and a nut



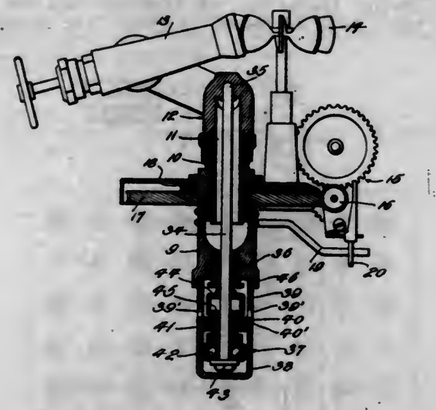
threaded on each arm, each adapted to bear at its end upon one of said edges to hold its respective point in adjusted position, the nuts having threaded bores for the reception of the arms, and the corner angles being receivable in the bores of the nuts thereby to hold the points in still other adjusted positions.

1,633,876. CAST-STEEL LADLE. ERNEST G. SWIGERT, Portland, Oreg. Filed Aug. 31, 1925. Serial No. 53,525. 1 Claim. (Cl. 22—81.)



A ladle adapted for carrying molten metal inducing interior heating, the bottom of the ladle being formed of substantially uniform thickness, and with an incurved area whereby the linear dimensions of the bottom between diametrically opposed points in the side walls of the ladle are increased to permit unequal expansion and shrinkage of the bottom and neutralize the strains tending to cause crasing and cracking of the bottom.

1,633,877. PROCESS OF RECOVERING HYDROCHLORIC ACID. HENRI TERRISSE and MARCEL LEVY, Geneva, Switzerland. Filed Mar. 15, 1921, Serial No. 452,414, and in Switzerland Mar. 25, 1920. 1 Claim. (Cl. 23—154.)

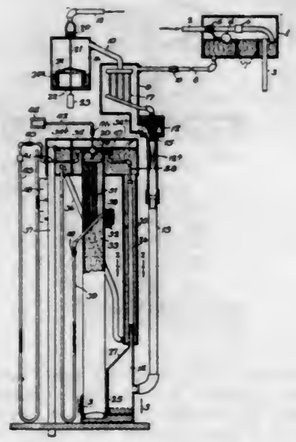


A process for separating and recovering hydrochloric acid solution from a powdery mixture of lignine, dextrine and glucose, comprising indirectly heating the mixture by conveying the same in thin layers in one direction and in direct contact with a gaseous current which has been previously heated sufficiently to remove the hydrochloric acid in a vaporized state from the solid material without deteriorating the same and to dry the remaining solid material, then condensing and separating the vaporized hydrochloric acid from the gaseous current, and reheating the gaseous current and again using it as before for removing the hydrochloric acid of the powdery mixture.

1,633,878. ELECTRICAL THERAPEUTIC DEVICE. GEORGE W. WALLERICH, Chicago, Ill. Filed Feb. 9, 1925. Serial No. 7,965. 2 Claims. (Cl. 174—89.)

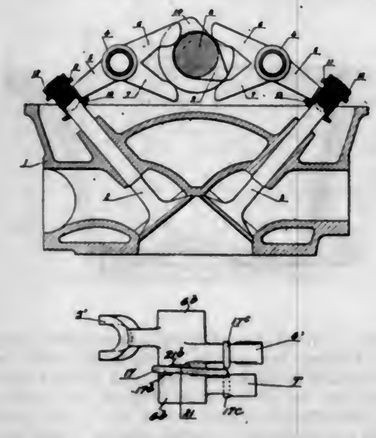
1. A therapeutic device adapted for application to a pathologic organism, said device comprising a pair of arms hinged together, mutually insulated electrodes on the distal ends of said arms formed to snugly fit and to embrace said organism, means to secure the setting of said arms, and means to supply electric current to said electrodes for transmission through the said organism.

1,633,879. LAWN-SPRINKLER BEARING ASSEMBLY. GEORGE ZINT, Wapakoneta, Ohio. Original application filed Mar. 8, 1926, Serial No. 93,238. Divided and this application filed Dec. 13, 1926. Serial No. 154,537. 3 Claims. (Cl. 286—7.)



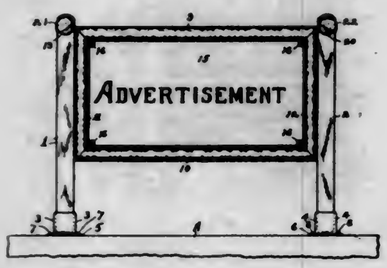
1. An assembly of the class set forth comprising a hollow liquid-conducting body having a stuffing box at its lower end, a rod passing downwardly through said stuffing box, a housing abutting the lower end of said body and formed of upper and lower cup-like sections detachably connected with each other, the upper section having an opening in its bottom through which said rod passes into the lower section, a thrust bearing within said lower section having operative connection with said rod to hold the latter against upward movement, and means within said upper cup-like housing section to prevent liquid from running down the rod into the lower housing section, said upper section having an outlet for the arrested liquid.

1,633,880. POULTRY FEEDER. HARM AHLRICHS, Sherman, Ill. Filed Oct. 28, 1926. Serial No. 144,786. 4 Claims. (Cl. 119—61.)



1. In a device of the class described, a substantially weather tight container consisting of a bottom, a pair of triangular side walls rising therefrom and having vertical front edges and rear edges which incline forwardly, a vertical front wall terminating in upwardly spaced relation with said bottom leaving a space to accommodate a pan, a narrow top between the upper end portions of said side walls and downwardly spaced from their upper extremities, said top inclining rearwardly, a back wall contacting with said inclined rear edges of said side walls and having flanges lying against the outer sides of the latter, the upper end of said back wall having a forwardly projecting rearwardly inclined flange lying on said rearwardly inclined top, and pivots connecting the upper ends of the first named flanges with the upper ends of said side walls at points somewhat above said top, said pivots permitting rearward and upward swinging of said back wall.

1,633,881. APPARATUS FOR ANALYZING GASES. JULIUS ALSBERG, New York, N. Y., and PAUL J. RALPH, Trenton, N. J.; said Ralph assignor to said Alsberg. Original application filed May 18, 1917, Serial No. 169,475. Divided and this application filed Feb. 5, 1924. Serial No. 690,855. 8 Claims. (Cl. 23—256.)

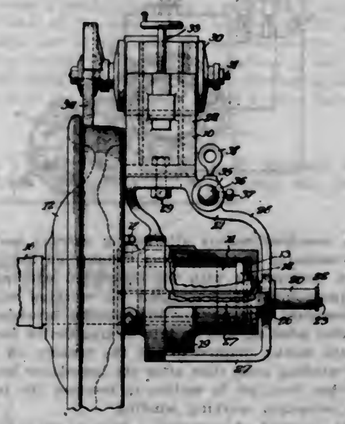


1. In an apparatus for analyzing a mixture of gases, a gas inlet, a water inlet, means adapted to cooperate with said gas inlet to control the pressure of the gases as they are drawn into said apparatus, means for equalizing the temperature between said gases and the water flowing through said water inlet, means for causing the absorption of one of said gases in said water, means for separating the unabsorbed gases from said water, a restricted outlet for said unabsorbed gases, and means whereby the pressure required to force said unabsorbed gases through said outlet acts to indicate the proportion said absorbed gas bears to said unabsorbed gases.

1,633,882. VALVE-OPERATING MECHANISM. ERNEST MAURICE BALLOT, Paris, France. Filed Oct. 26, 1925. Serial No. 64,952, and in France Nov. 17, 1924. 1 Claim. (Cl. 123—90.)

Valve operating mechanism comprising a pair of rocker arms each provided with a hub portion, a lug on one of said hub portions arranged for slight play in a recess in the other hub portion and a spring having a coil arranged around the hub portions and having hook shaped ends engaging said arms to yieldably force the same toward each other.

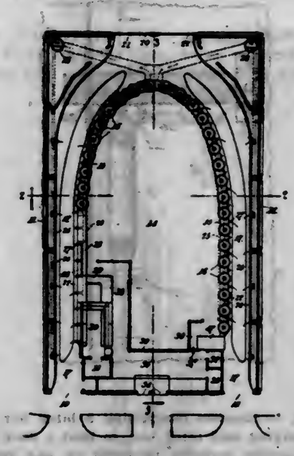
1,633,883. MINIATURE ELECTRIC ADVERTISING SIGN. ROY E. BENHAM and HOMER B. ROSS, Richmond, Ind. Filed June 15, 1923. Serial No. 645,673. 1 Claim. (Cl. 40—130.)



A miniature electric advertising sign comprising a pair of spaced apart vertical posts, a socket for the lower end of each post, means for rigidly securing the sockets to a flat surface, a pair of rails, a pair of stiles located at right-angles to the rails and rigidly connected therewith, the rails and the stiles forming a frame located between said posts, backing secured to the rear sides of the frame members and extending out over the rear sides of the posts and secured thereto thereby rigidly securing the frame to the posts, a sheet of material attached to the face of the backing and extending between the members of the frame and adapted to have an advertisement printed thereon, a light fixture extending out from the upper portion of each post, and a reflector connected to each post and arranged to direct the light from the respective fixtures onto said sheet which carries an advertisement.

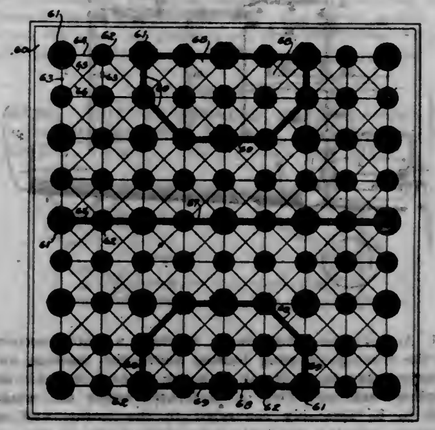
1,633,884. PAPER CAN. RAYMOND A. BENNETT, Roxbury, and ALBION M. BOOTHBY, Watertown, Mass., assignors to Boothby Fibre Can Company, Boston, Mass., a Corporation of Massachusetts. Filed June 21, 1922. Serial No. 569,909. 2 Claims. (Cl. 229—5.5.)

1. A paper container comprising the combination, with a shell, of a cover closing the end of the shell and having a central body portion within the hollow of the shell and terminating in a flange extending in the outward direction of the axis from said central portion and fitting closely the inside of the shell; the said body portion of the cover being dished inward and adapted under pressure from within to press said flange more tightly against the shell.



1,633,885. PORTABLE GRINDER. MIGUEL CASTILLO, Mexico City, Mexico, assignor of one-half to S. W. Fisher, Chicago, Ill. Filed Mar. 27, 1924, Serial No. 702,338, and in Mexico June 19, 1923. 1 Claim. (Cl. 51—254.)

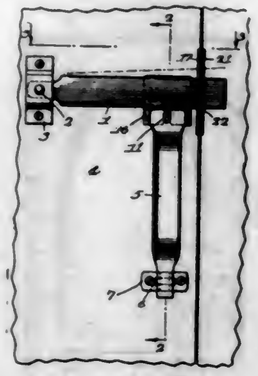
1. In an apparatus for removing flat spots from railroad car wheels, an eccentric bearing member adapted to be fixedly mounted on the axle of the wheel, a pedestal revolubly mounted on said bearing member to rotate and slide freely axially both directly thereon, and a grinding unit mounted on said pedestal.



10. A portable grinder for removing flat spots from railroad car wheels comprising a pedestal having an eccentric bearing member by which it is revolubly and slidably mounted on the axle of the car wheel and having a portion adjacent its other end offset in the direction of the plane of the wheel, and a grinding unit adjustably mounted on said offset portion with its axis aligned with a vertical radius of the car wheel when the pedestal is vertically disposed and in a plane passing through the highest point of the eccentric mounting and axis thereof, said axis being disposed below the axis of the wheel.

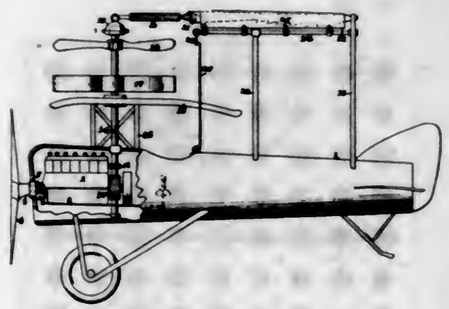
1,633,886. SELF-SERVING STORE. JAMES R. DUFFIN, Louisville, Ky. Filed Dec. 4, 1926. Serial No. 152,602. 13 Claims. (Cl. 186—1.)

1. In a store structure of the character set forth, the combination with a display means for goods, of a vehicle driveway along one side of the same that gives occupants of vehicles traversing the same access to the goods, an area for pedestrians along the opposite side of said display means and affording access to the goods on said means, and an entryway to said area.



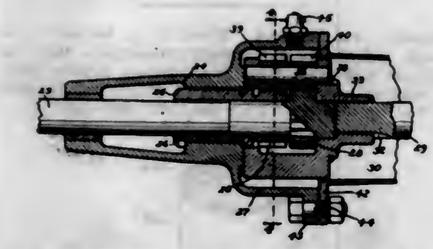
1,633,887. GAME. LOUIS ESPITALLIER, Jennings, La. Filed Sept. 3, 1925. Serial No. 54,329. 5 Claims. (Cl. 273—131.)

1. A game comprising a board having a plurality of spaces upon the face thereof, said spaces being connected by vertical, horizontal and diagonal lines, a de-



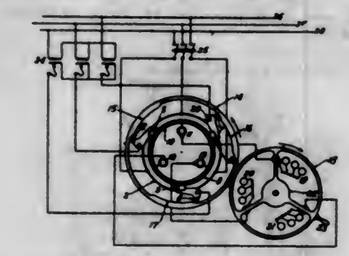
termined number of spaces being bounded by heavy vertical, horizontal and diagonal lines for segregating a determined area, and a plurality of game pieces of different game values adapted for movement over the lines and into the spaces.

1,633,888. DOOR LATCH. WILLIAM D. FERRIS, Sterling, Ill., assignor to Frantz Manufacturing Co., Sterling, Ill., a Corporation of Illinois. Filed Jan. 28, 1926. Serial No. 84,316. 3 Claims. (Cl. 292—234.)



1. A latch mechanism comprising a latch bar, a strike piece for engaging said latch bar, to hold a door in closed position, a handle movably mounted on one side of the door, adapted for use in opening and closing the door, and engaging means rigid with said handle and thereby having movement in unison therewith to automatically lift the latch when the door is opened.

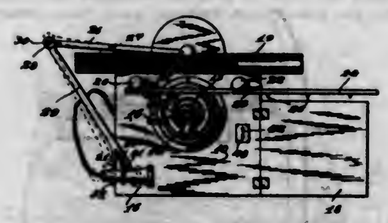
1,633,889. AIRPLANE. GERMANO FIGLIETTI, San Francisco, Calif. Filed Nov. 29, 1926. Serial No. 151,570. 4 Claims. (Cl. 244—15.)



1. An airplane comprising a fuselage, a motor, secured to the fuselage, a wing located above the fuselage and attached thereto, a lifting propeller adapted to raise the airplane, said propeller to be located above the wings, and to be rotatably connected to the motor, and an exhaust propeller rotatably connected to the motor and located between said lifting propeller and the wing, thereby to prevent the inrushing of the air below the lifting propeller and to maintain a low atmospheric pressure above the wing.

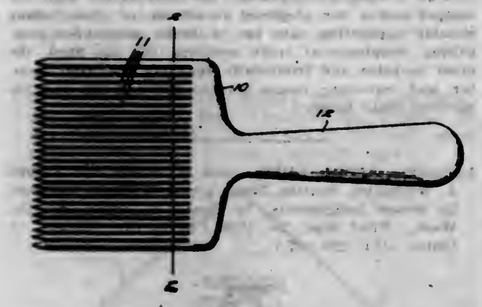
1,633,890. STEERING-GEAR REDUCTION. HENRY FORD, Dearborn, Mich. Filed June 1, 1926. Serial No. 112,763. 2 Claims. (Cl. 74—34.)

1. In a steering gear reduction device, a two part housing having a gear housing portion and a steering column portion, the gear housing portion having an enlargement at the upper end thereof, a sleeve fixed in said gear housing and having a stationary gear at the inner end thereof, a driven shaft extended through said sleeve into the gear housing and having a gear formed at the inner end thereof, a driving shaft extended into said housing, a planetary spider of generally cylindrical shape having spaced recesses in its walls and pairs of aligned parallel openings adjacent to said recesses, said spider also having a sleeve extended from one end thereof and a groove adjacent to said sleeve, means for securing the driving shaft in the sleeve, pins mounted in said pairs of openings, resilient means mounted in the groove to lock said pins in the spider, and pairs of planetary gears mounted in said recesses on said pins in position to coact with the stationary gear and said second gear to impart rotation from the driving to the driven shaft.



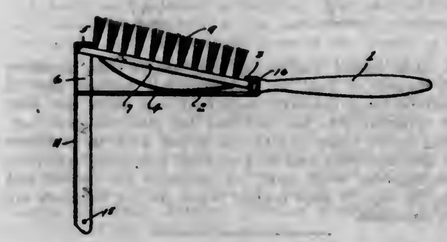
1,633,891. NONSYNCHRONOUS MOTOR. VALÈRE A. FYNN, St. Louis, Mo. Filed Oct. 22, 1926. Serial No. 143,429. 4 Claims. (Cl. 172—280.)

1. A non-synchronous alternating current motor, having a commuted and a working winding on its secondary, brushes cooperating with the commuted winding, means for introducing impedance into the working winding on the secondary, means for raising the brushes off the commuted winding, and an interlocking device for the two aforesaid means adapted to lift the brushes off the commuted winding some time after the impedance introducing means has been set in motion to increase the impedance of the secondary working winding.



4. The method of operating a phase compensated alternating current induction motor having a commutator and cooperating brushes, comprising, starting the machine by impressing an alternating voltage on the primary and introducing impedance into its secondary member, decreasing said impedance and shortcircuiting the secondary member, concurrently interrupting the compensating circuits at starting by lifting the brushes off the winding with which they cooperate, and reestablishing cooperative relation between the commuted winding and the brushes after the machine has reached a sufficient speed.

1,633,892. TELEPHONE EQUIPMENT. MARTIN D. GARNER, Tulsa, Okla. Filed Aug. 31, 1925. Serial No. 53,713. 5 Claims. (Cl. 179—81.)

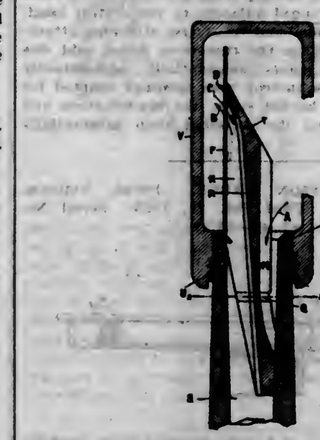


1. In telephone equipment, a telephone circuit switch, a light circuit controlled thereby, a manually operable switch to control the light circuit, a booth closure and means operatively associated therewith to reset the last named switch in initial position when said closure is opened.

1,633,893. COMB. RALPH N. HYMER, Newberg, Oreg. Filed Sept. 7,. 1926. Serial No. 134,096. 2 Claims. (Cl. 132—11.)

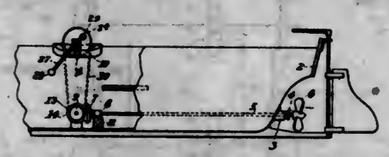
1. A barber's comb comprising a body, teeth extending from one side of the body, and a handle extending from the opposite side of the body, the toothed portion of the comb being arcuate transversely to conform to the curvature of the head, whereby the hair projecting beyond the convex face of the comb may be cut off to even lengths.

1,633,894. HAIR BRUSH. FRANK W. KELLOGG, Reedsport, Oreg. Filed May 1, 1926. Serial No. 106,095. 3 Claims. (Cl. 15—202.)



1. A hair brush embodying an inner back, including a handle; an outer back embracing the inner back; an inwardly turned end wall formed upon the outer back; an inwardly projecting portion formed on the inner back; one or more brush elements disposed upon said inner back and having the ends thereof positioned below the inwardly turned end wall and the inwardly projecting portion aforesaid; and a yielding element disposed between said brush elements and said inner back, and causing the ends of said brush elements to engage, the inwardly turned end wall and the inwardly projecting portion aforesaid.

1,633,895. METHOD OF WORKING SUGAR CANE. ALBERT EMIL KIENZLE, Cairo, Egypt. Filed Mar. 25, 1925, Serial No. 18,300, and in Germany Jan. 19, 1923. 1 Claim. (Cl. 99—11.)



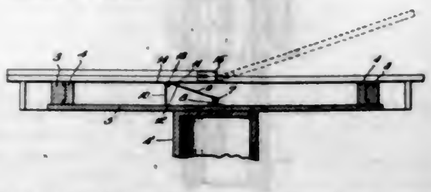
Process of treating sugar-cane which comprises reducing the cane to flour and dividing the flour into a plurality of grades with respect to sugar content by sifting.

1,633,896. FOUNTAIN PEN. THEODOR KOVÁCS, Meran, Italy. Filed June 16, 1924, Serial No. 720,430, and in Germany July 17, 1923. 1 Claim. (Cl. 120—50.)

A fountain pen, comprising, in combination, an ink receptacle and a feed immovably located therein and extending from the open end thereof to below the pen, said insert having in its upper side an air-channel having capillary grooves in its bottom, and in its lower side an ink filling channel communicating constantly with said ink receptacle, this communication being at least partly so narrow as to be adapted to prevent the passage of air therethrough if closed by ink, the first mentioned air-channel being however, so wide that it is unable to retain ink when the fountain pen is in practically vertical position, substantially and for the purpose set forth.

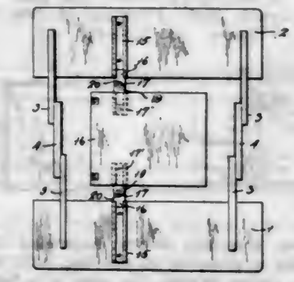
1,633,897. BOAT-PROPELLING DEVICE. OTTO LEWETZKI, Detroit, Mich. Filed Aug. 21, 1926. Serial No. 130,592. 4 Claims. (Cl. 115—21.)

1. A boat propelling device comprising a propeller shaft having a propeller on one end, said shaft being adapted to project through the stern of a boat, a cross shaft, means for driving said propeller shaft from said cross shaft, discs rotatably mounted in bearings adapted to be secured to the sides of a boat; an eccentric opening in each of said discs, operating handles having outer ends taking into said eccentric openings, means for mounting said operating handles intermediately of their



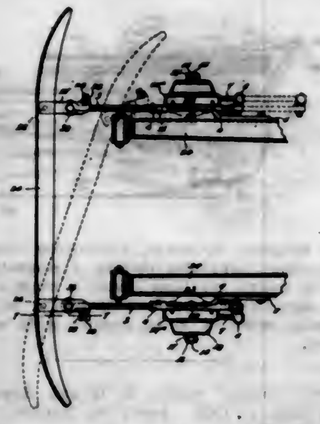
length so that as their inner ends are moved through a substantially circular path said discs will be rotated, and means for driving said cross shaft by the rotation of said discs.

1,633,898. COMBINED BRUSH AND POLISHER. FRANK A. LISI, Philadelphia, Pa. Filed May 29, 1926. Serial No. 112,568. 2 Claims. (Cl. 15—114.)



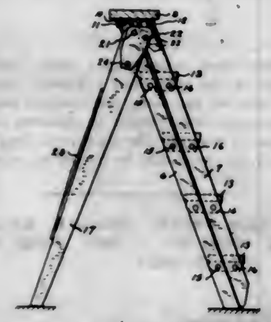
1. The combination with a block, of a polishing strip to be used in connection therewith, provided at its ends with transverse hems, headed studs attached to the ends of the block and arranged adjacent to the central longitudinal axis of the same, and transverse stiffening attaching ribs arranged within the transverse hems, said ribs being provided at points substantially equi-distantly spaced from the ends thereof with openings adapted for the reception of the headed studs, the headed studs and stiffening ribs holding the polishing strip substantially flat upon the block.

1,633,899. EXTENSION TABLE. PETER NYHOLM, Edgewood, Wash. Filed Feb. 21, 1925. Serial No. 10,873. 2 Claims. (Cl. 45—112.)



2. A filler leaf support for an extension table comprising a link or hinge adapted to be permanently connected at one end to the table structure and at its other end to a filler leaf, a prop pivotally connected with the link or hinge, a stop extending from the prop and engaging the upper face of the link to prevent collapsing of the link and prop in their elevated positions, and a support also extending from the prop and adapted to engage the under face of the filler leaf.

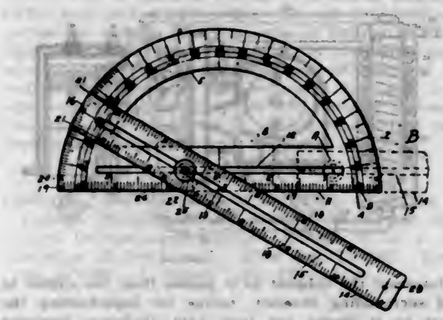
1,633,900. REVOLVING-LEAF EXTENSION TABLE. PETER NYHOLM, Edgewood, Wash. Filed Feb. 21, 1925. Serial No. 10,874. 4 Claims. (Cl. 45—112.)



1. In an extension table, the combination with the permanent top sections, a slideway secured to the underface of each section, a filler leaf, slideways secured to the underface of said leaf, a slide mounted in each of said slideways and means pivotally connecting the slide of the filler leaf to the slides of the top sections.

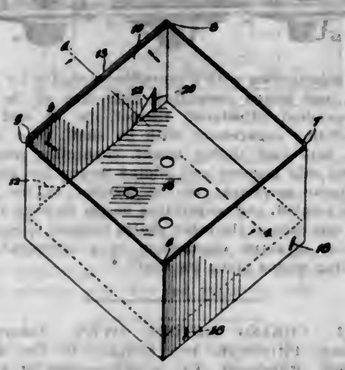
1,633,901. BUMPER MECHANISM. EMIL P. OHLENDORF, Moline, Ill. Filed Sept. 10, 1926. Serial No. 134,701. 11 Claims. (Cl. 293—55.)

1. In a bumper mechanism, the combination with the bumper and a bar projected therefrom, of guide means slidably supporting said bar, a brake mechanism comprising complemental brake members, the one fixed, the other movable and frictionally engaging the fixed member, and connecting means between the said bar and the movable brake member.



1,633,902. STEPLADDER. GUS E. OLSON and ALFRED J. WILLIAMS, Seattle, Wash.; said Williams assignor, by mesne assignments, to Daniel O. Olson, Seattle, Wash. Filed Sept. 20, 1926. Serial No. 136,468. 1 Claim. (Cl. 228—37.)

A step ladder embodying two spaced side members each formed of two relatively movable parallel bars, a transverse step pivotally connected near each end with each adjacent side bar and two leg members each connected at its upper end by two pivots with the adjacent two side bars said two bars at each side being relatively close together when said leg members are folded and being in edge to edge contact when the leg members are fully extended.

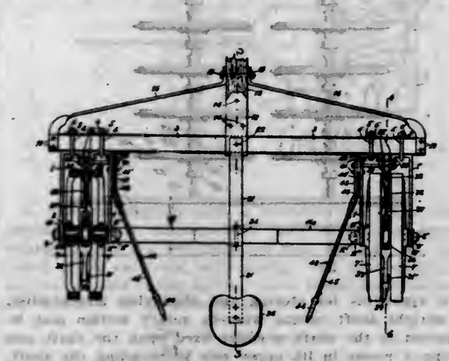


1,633,903. PROTRACTOR DRAWING INSTRUMENT. FRANK N. PERRIN, Detroit, Mich. Filed Mar. 26, 1926. Serial No. 97,547. 4 Claims. (Cl. 33—101.)

1. A drawing instrument comprising a semi-circular shaped protractor frame with one straight side positioned along the diameter line of the protractor circle, a slotted recess formed near the straight side of the frame, said slot being positioned parallel to the straight side of said frame and extended nearly the entire width thereof, a thin scale member, having a slotted recess nearly the entire length thereof, attached to the protractor frame by a central pivot engaging the slots of both the scale and protractor, said pivot provided with means for locking

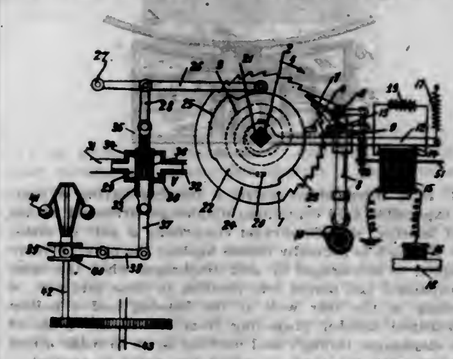
the said scale in any desired position on the protractor frame, also having a sharp engaging point projecting from the bottom side of the pivot for engaging a supporting sheet to establish a center point thereon, and the scale being provided with a pencil hole in one end thereof for describing circles about said centerpoint.

1,633,904. COLLAPSIBLE BERRY BOX. HANS PETERSEN, Minneapolis, Minn., assignor to William H. Schafer, Minneapolis, Minn. Filed July 27, 1926. Serial No. 125,229. 1 Claim. (Cl. 229—23.)



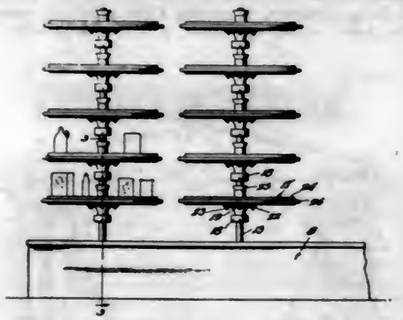
A berry box including a length of sheet material having transversely disposed scored portions for providing a rectangular body portion, the ends of the length of the sheet material being positioned one on the other to provide a double wall including an inner and outer section, said inner section having an elongated opening extending to points adjacent to the edges of the body portion, said elongated opening having widened end portions, the outer section having an elongated opening communicating with the first mentioned opening and a bottom member having a tongue fitted in the last mentioned opening and having cut away portions defining shoulders engaging the ends of the elongated opening.

1,633,905. FARMING IMPLEMENT. JOSE B. RAMOS, Habana, Cuba. Filed June 12, 1923, Serial No. 644,976, and in Cuba Mar. 28, 1928. 1 Claim. (Cl. 55—60.)



Apparatus of the class described, comprising a frame having a transverse bar and a draft tongue, pairs of rearwardly extending brackets connected to said bar adja-

cent its ends, an axle carried by each pair of brackets, spaced supporting wheels mounted on said axles, a frame element arranged between the brackets of each pair, connected at its front end to said brackets and provided with a vertical longitudinal slot at the point through which the associated axle extends, a lever pivotally mounted on each axle and arranged in the slot of one of said frame elements, a cutting knife pivotally connected to the lower end of each lever, a rigid link pivotally con-



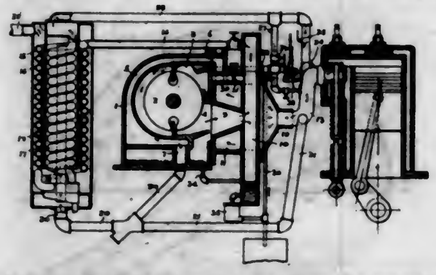
necting the rear portion of each cutting knife with the rear end of one of said frame elements, a hand lever associated with each of said levers and having a pivotal shaft provided with an arm, said pivotal shafts having bearings in said brackets, a segment plate secured to the innermost of each of said brackets, a dog on each of said hand levers arranged for engagement with one of said segment plates to lock said hand lever in adjusted position and links connecting said arms with the upper portions of the first named levers.

1,633,906. SAFETY DEVICE FOR RAILWAYS. JULES JOSEPH HENRI MOREL-REVOIL, Paris, France. Filed Jan. 21, 1926, Serial No. 82,786, and in France Jan. 27, 1925. 4 Claims. (Cl. 246—182.)

1. A safety device for railways comprising an engine, a toothed wheel borne by same, a spiral spring urging same, a catch device controlled by the engine wheels and adapted to give the toothed wheel a step by step motion against the action of the spring, a part borne by the said wheel, an arrangement adapted to actuate the braking device when it is pushed by the part borne by the toothed wheel, a device adapted to release the catches from the toothed wheel a polarized electromagnet adapted when it is excited to actuate the last mentioned device and track apparatus fed with D. C. and feeding the electromagnet when the engine passes over said apparatus.

1,633,907. STORAGE AND DISPLAY APPARATUS FOR MERCHANDISE. WILLIAM P. RYLANDER, Austin, Tex., assignor of one-third to Thomas F. Caldwell, Austin, Tex., and one-third to Parrish H. Rylander, San Antonio, Tex. Filed July 3, 1926. Serial No. 120,480. 1 Claim. (Cl. 211—20.)

In apparatus for storing and displaying merchandise, an upright shaft, means whereby rotary motion may be imparted to the shaft, a collar fixed upon the shaft and having a recess in its upper side surrounding the shaft, a hub having a bore fitting the said shaft and engaging at its lower end in the recess of the collar, a flange outstanding from the said hub circumferentially thereof, and a shelf disposed centrally upon the said flange and secured thereto and rotatable with the shaft through frictional engagement of the hub with the said collar and with the shaft, the upper end of the hub being extended above the shelf and provided with a pocket for receiving oil to be conducted to the recess of the collar.



1,633,908. THERMOSTATIC VALVE. LOUIS W. SCHNEPP, Huntington Beach, Calif., assignor, by direct and mesne assignments, to First National Bank of Anaheim, trustee for Snap-O-Stat Company, a Copartnership, Anaheim, Calif. Filed May 28, 1925. Serial No. 33,409. 5 Claims. (Cl. 236—32.)

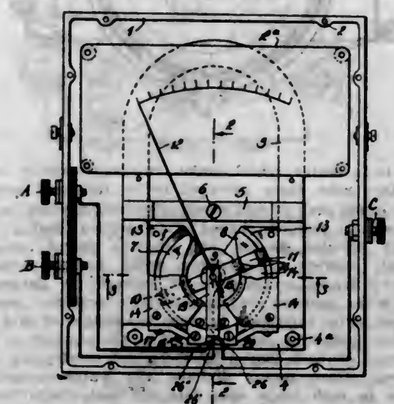
1. In a thermostatic valve, a housing having a port, an expansible fluid containing diaphragm arranged within said housing, said diaphragm comprising a pair of disks, one of which is normally dished against the other, a valve adapted to be engaged by said diaphragm when the same is expanded and moved into position to close said port, a bushing in the rear wall of the housing and a hollow cup-shaped member projecting from one of the walls of the diaphragm through said bushing so as to make direct contact with the tank to which the valve is applied.

1,633,909. INTERNAL-COMBUSTION ENGINE. WILLIAM E. SHORE, Staten Island, N. Y. Filed Feb. 9, 1924. Serial No. 691,610. 4 Claims. (Cl. 123—133.)

1. The combination with an internal combustion engine, of a vapor expanding mechanism having a chamber extending therearound immediately contacting with the inner wall thereof and connected with the exhaust from the engine, means for feeding a hydrocarbon in the presence of a restricted quantity of an expansible suspension medium to said vapor expanding mechanism, a discharge conduit leading from said vapor expanding mechanism and extending through said surrounding chamber, a chamber having an opening in one wall connected with said discharge conduit and having the wall opposite interposed in the path of the engine exhaust and adapted

to intercept the exhaust as it passes from the engine to said surrounding chamber, means for superheating the vapor as it passes out from said discharge receiving chamber and a conduit leading from said superheating means to the intake manifold of the engine.

1,633,910. SHAFT-ADJUSTING MECHANISM. ANDRO E. SHOWALTER and JAMES WARD JOHNSON, Richvalley, Ind. Filed May 21, 1926. Serial No. 110,743. 8 Claims. (Cl. 74—7.)

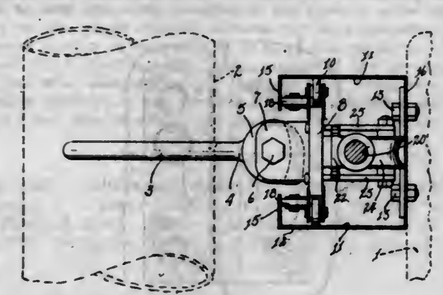


1. In combination with a plurality of shafts for a radio receiver, and means associated with each of the shafts for independent adjustment thereof, one of said means having sliding engagement with its shaft, of a member movable with said sliding means, connecting means between the said member and sliding means for imparting a rectilinear movement to the member as the sliding means is rotated, and cooperating means between the said member and each of the other shafts adapted to be thrown into or out of active engagement by a movement of the said sliding means along its shaft.

1,633,911. COKING RETORT OVEN. JOSEPH VAN ACKEREN, Pittsburgh, Pa., assignor to The Koppers Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Jan. 18, 1921. Serial No. 438,222. 6 Claims. (Cl. 202—9.)

1. In a coking retort oven, in combination: coking-chambers; heating-walls contiguous thereto and each constituted of vertical combustion flues disposed in groups operating alternately for upflow combustion and downflow of combustion-products, such vertical flues extending upward substantially to the top of the coal-charge space in the adjacent coking-chambers; horizontal flues immediately above and each directly communicating with vertical flues within one of said groups; a connection-flue above said horizontal flues of each heating-wall and disposed higher than the coking-chambers, said connection-flue connecting the aforesaid horizontal flue of one group with the horizontal flue of a reversely flowing group of vertical flues of the same heating-wall, each of said horizontal flues porting intermediate its ends into said connection-flue whereby each part of said horizontal flue is required to accommodate the volume of combustion products collecting from or distributing to only part of the vertical flues served by such horizontal flue; and cross-regenerators respectively serving the mutually connected burning and off-flow groups of vertical flues of each such heating-wall; substantially as specified.

1,633,912. INDICATING OHMMETER. CHARLES E. VAWTER, Philadelphia, Pa., assignor to Weston Electrical Instrument Corporation, Newark, N. J., a Corporation of New Jersey. Filed Jan. 7, 1922. Serial No. 527,705. 6 Claims. (Cl. 171—95.)



2. An instrument of the class described, comprising a magnet for producing the magnetic field of the instrument, a core intermediate the poles of the magnet for determining the distribution of flux in said field, said core being stationary relative to the magnet, and a shunt path of variable reluctance between the magnet and the core for regulating the density of the magnetic flux in the gap between said core and magnetic pole.

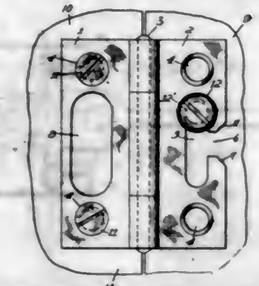
1,633,913. SCREW CUTTER. EDUARD WILLE, Kronenberg, Germany. Filed Nov. 25, 1924. Serial No. 752,105, and in Germany Sept. 5, 1924. 9 Claims. (Cl. 10—141.)

2. A screw cutter comprising for each turn of the screw a pair of first teeth, adapted to cut a normal screw thread profile, and a plurality of second teeth, the bases of which being substantially equal to those of the first teeth while the lengths of these second teeth in the direction of the diameter being greater than those of the first teeth, the cutting edges of the first and the second teeth being substantially arranged in the projection on the periphery of one and the same circle.

1,633,914. COAL-SPOUT-OPERATING DEVICE. GEORGE M. WUTZLER, Waukegan, Ill. Filed Jan. 29, 1925. Serial No. 5,614. 2 Claims. (Cl. 214—35.)

1. The combination with a movable coal spout, of a carriage loosely connected to said spout and having wheels, means for reciprocating said carriage, an elongated casing enclosing said carriage and said reciprocating means, said casing having walls whose inner surfaces are adapted to guide said wheels.

1,633,915. CONDENSER. GEORGE A. YANOCHOWSKI, Chicago, Ill., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill., a Corporation of Illinois. Filed Jan. 25, 1923. Serial No. 614,752. 15 Claims. (Cl. 175—41.5.)

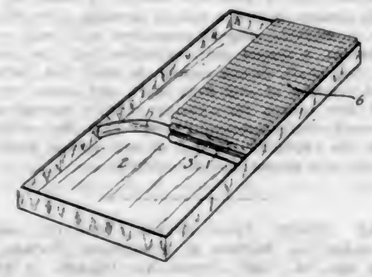


1. In a device of the character described, including a fixed element and a rotatable element, a shaft for said rotatable element having a central opening, a second fixed element, a movable element associated with said second fixed element, a second shaft extending into the opening in said first shaft, means secured on said first shaft for effecting rotation of said first shaft, and means secured in said first means for causing endwise movement of said second shaft independently of said first shaft to regulate the operative relation of said second fixed element and said second movable element.

1,633,916. HINGE. FRANK ZOUPAL, Cicero, Ill., assignor of one-half to William P. Pondelicek, Berwyn, Ill. Filed Apr. 16, 1926. Serial No. 102,499. 1 Claim. (Cl. 16—149.)

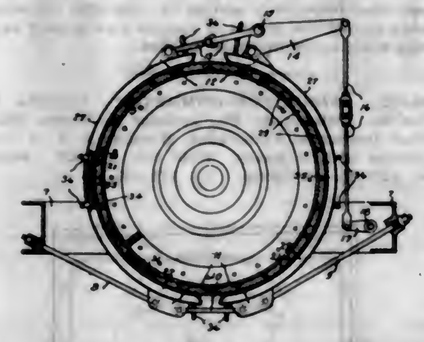
A hinge comprising a pair of hinge members, each of said members having a pair of aligned screw openings, one of said members having a slot in alignment with certain of said screw openings and extending above and below the central portion of the member, a second slot communicating with said first named slot and extending to the edge of the member, the outer portions of the slot

being flared to provide a guide edge, the companion hinge member having a slot extending above and below the central portion of the hinge to equal distances, and being



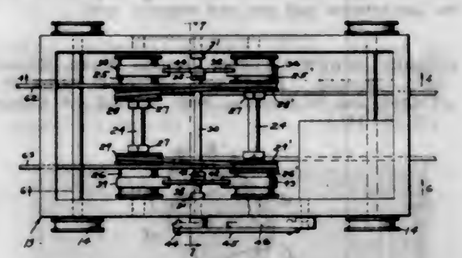
arranged to receive the head of a retaining member when the latter is in either end of the first named slot of the other hinge member.

1,633,917. CHICKEN FEEDER. HERMANN C. BADENHOP, Wauseon, Ohio. Filed Aug. 25, 1926. Serial No. 131,453. 3 Claims. (Cl. 119—61.)



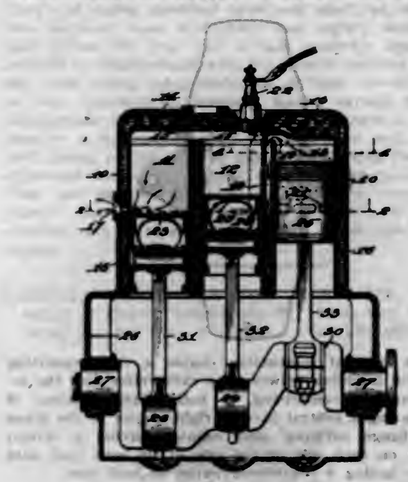
1. In a device of the class described, a base tray comprising ends and sides, the tray being provided with upstanding intermediate and terminal arches, the terminal arches bearing against the ends of the tray, and ties connecting the sides of the tray and holding the terminal arches engaged with the ends of the tray.

1,633,918. GALLEY TYPE CLAMP. EDWIN W. BEEDLE, San Francisco, Calif. Filed Aug. 20, 1925. Serial No. 51,369. 3 Claims. (Cl. 276—43.)



1. A galley type-clamp, comprising a stiff handle-like body, adapted to engage the type with its side and one wall of the galley with its end; and a blade, rigidly secured to and extending axially from the other end of said stiff body, said stiff body and blade being together longer than the width of the galley, and said blade being laterally flexible in said extended portion, and adapted to be bent into flexed position when the stiff body is brought into engagement with the type, and thus to engage the other wall of the galley, thereby forcing said stiff body laterally against the type to hold it in place and clamping the body in said holding position.

1,633,919. BRAKE MECHANISM. KNUTE BERGER, Seattle, Wash. Filed Aug. 2, 1926. Serial No. 126,609. 2 Claims. (Cl. 188—264.)

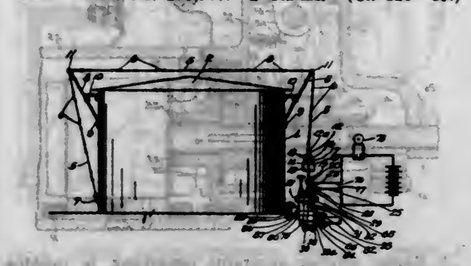


2. In a water cooled brake, two substantially semi-circular brake shoes arranged to be tightened onto a brake drum, each of said shoes comprising a wider curved member of channel shaped cross section having outwardly directed flanges, and another curved, channel shaped, member of narrower width having inwardly directed flanges arranged to fit between the flanges of said wider member to form water circulation spaces, packing strips interposed between the flanges of said two members, retaining plates secured to the exterior of said narrower channel shaped members and overlapping said packing strips, means dividing the water-circulation spaces in each brake shoe into different compartments and water circulation pipes connected with each compartment.

1,633,920. SAWMILL CARRIAGE. EARLY T. BRADFORD, Three Notch, Ala. Filed Apr. 19, 1926. Serial No. 102,967. 6 Claims. (Cl. 143—105.)

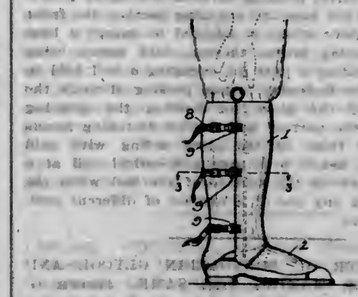
5. In a saw mill carriage feed mechanism, a track, a carriage to travel thereon, a pair of separate endless belts extending longitudinally of the track, means to continuously drive the belts in opposite directions, pairs of pulleys rotatably mounted upon the carriage, the pulleys in one pair engaging one belt and the pulleys in the other pair engaging the other belt, each belt passing about the outer portions only of the pulleys which they engage, pairs of drums attached to the pairs of pulleys, a pair of brake devices for each pair of drums, and means to alternately render one pair of brake devices active and the other pair inactive.

1,633,921. INTERNAL-COMBUSTION ENGINE. EVERETT R. BURTNETT, Los Angeles, Calif., assignor, by direct and mesne assignments, to The Automotive Valves Co., Los Angeles, Calif. (a Voluntary Trust). Filed Oct. 26, 1922. Serial No. 596,953. 1 Claim. (Cl. 123—53.)



In a two stroke cycle power development and charge induction unit, a series of three cylinders arranged in a row, each cylinder having a straight diameter bore, the cylinder at one end of the row functioning as a pump cylinder, the head or inner ends of the chambers in the other two cylinders being connected by a common compression and combustion clearance chamber and functioning as combustion chambers, a transfer duct leading from the head end of the chamber in the pumping cylinder to the intermediate portion of the adjacent combustion chamber, there being exhaust ports formed through the intermediate portion of the wall surrounding the other one of the combustion chambers, pistons arranged for reciprocatory movement within the chambers of the three cylinders, a crank shaft having three crank pins, to which the three pistons are respectively connected by separate connections, the pins of said crank shaft to which the piston in the pumping cylinder and the piston in the immediately adjacent combustion cylinder are connected being arranged 180° apart and the crank pin to which the piston that operates within the combustion chamber having the exhaust ports, being disposed 120° to the rear, in the direction of crank rotation, from the pin to which the piston in the pumping chamber is connected.

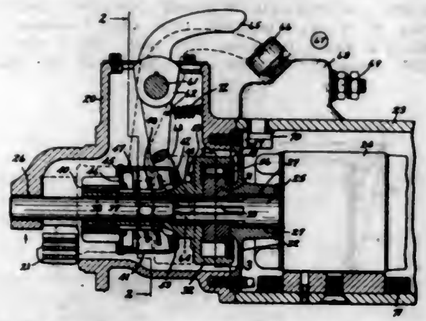
1,633,922. MANUFACTURE OF COMMUTATORS. JOHN J. CARTER, Lansing, Mich., assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio, a Corporation of Delaware. Filed May 21, 1925. Serial No. 31,960. 5 Claims. (Cl. 29—155.5.)



1. The method of manufacture of commutators which includes shaping a cylindrical tube of ductile metal having a cylindrical bore into a tube having a plurality of spaced, longitudinally extending tangs by means of suitable dies which cause sections of the metal of the tube to be forced out leaving spaces between the tang-forming portions of the tube, and which cause the metal forced out to flow into other portions of the tube in order to add to the length thereof, slotting the tube through a greater portion of its length so as to provide segments of equal width, held together by the unslotted end portion of the tube, securely joining the tube to a metal core, located centrally of the tube, by a molded insulating material, and then removing the unslotted end of the tube.

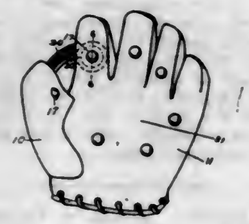
1,633,923. AUTOMATIC WEIGHT OPENING VALVE. JOHN W. CASEY, Oklahoma City, Okla., assignor to Minnie E. Casey, Oklahoma City, Okla. Filed July 30, 1926. Serial No. 125,960. 2 Claims. (Cl. 220—89.)

1. A device of the character described, comprising a wedge shaped valve block slidable in a similar shaped way in a housing therearound, and having entrance ports and exit ports adapted to connect similar ports in said valve, said last named ports adapted to be connected by a suitable means to a tank and to a discharge line; a valve stem having a weight therearound, both being adapted to connect with a wire having a plurality of fusible links therein, and surrounding a tank; means for keeping said wire and said links from the sides and top of said tank, an insulating gasket and a copper ring on said valve stem, a second copper ring therebelow, and a second insulating gasket, the second ring being adapted to contact said first ring and to close an electric circuit thereby to sound an alarm; a gate in a second housing of said valve, adapted to shut off the liquid in the tank from the valve and discharge line; means normally holding said gate in inoperative position, and means for sealing said last mentioned means.



1,633,924. LEGGING. HOWARD F. CHESTER, Brooklyn Heights Village, Ohio. Filed Sept. 6, 1924. Serial No. 736,204. 5 Claims. (Cl. 36—2.)

5. A legging comprising a body portion of flexible material adapted to be wrapped around the limb of a wearer, a fold along one edge of said legging forming a casing,

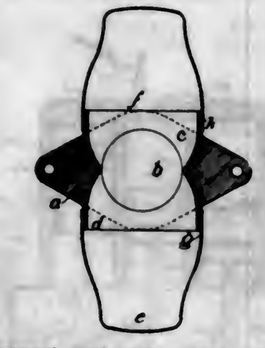


portions of said casing being notched out, a pin occupying said casing, and fastening members attached to said legging and adapted to co-operate with the pin at the notches in the casing, said pin being slidable to release the fastening members.

1,633,925. ENGINE-STARTING APPARATUS. WILLIAM A. CHRYST, Dayton, Ohio, assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio, a Corporation of Delaware. Filed Mar. 17, 1925. Serial No. 16,206. 6 Claims. (Cl. 74—7.)

1. Engine starting apparatus comprising, in combination, a motor, a shaft driven by the motor, an overrunning clutch connected with the shaft for rotation therewith and sliding movement thereon, a pinion including a hub splined to the clutch and adapted to mesh with a gear of the engine to be started, and means for moving the clutch along the shaft.

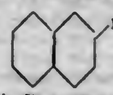
1,633,926. BASEBALL GLOVE. BURNIE J. CRAIG, Los Angeles, Calif. Filed Jan. 8, 1923. Serial No. 611,229. 4 Claims. (Cl. 2—19.)



1. A base ball glove having a front portion to engage a base ball and a rear portion to receive the thumb and fingers of the wearer, padding between the finger receiving portions and the base ball engaging portion, the front portion of the glove which is adapted to engage a base ball having gripping means thereon, said means being flexible and including a part for engaging a ball held in the glove, flexible fastening means passing through the front portion of the glove for holding the gripping means in place, the part of said flexible fastening means exposed on the front of the glove acting with said flexible gripping means to engage a spherical ball at a plurality of places on the surface of the ball when the ball is gripped in any one of a number of different positions by the glove.

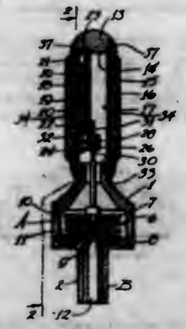
1,633,927. ETHER OF POLYOLEFIN GLYCOL AND PROCESS FOR MAKING THE SAME. JOSEPH G. DAVIDSON, Yonkers, N. Y., assignor to Carbide & Carbon Chemicals Corporation, a Corporation of New York. Filed July 20, 1925. Serial No. 44,930. 5 Claims. (Cl. 260—1.51.)

1. A polyolefin glycol ether.



1,633,928. FUEL-REGULATION DEVICE FOR INTERNAL-COMBUSTION ENGINES. RICHARD OWEN DONNELLY, Victoria, British Columbia, Canada. Filed June 22, 1922, Serial No. 570,266, and in Canada Jan. 31, 1922. 1 Claim. (Cl. 123—119.)

In an internal combustion engine a fuel regulating device for insertion between the carburetter and the intake manifold comprising, a hollow-flange-member of metal having a central bore at right angles to the plane of its flange surfaces, said member having a lateral chamber on each side of the axis of its bore, each said chamber having a constricted outlet to said bore.

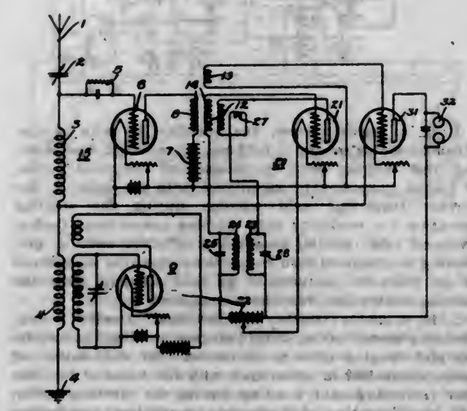


1,633,929. OMEGA-AMINOALKYL-AMINONAPHTHALENES. WALTER DUISBERG, Leverkusen, near Cologne, and WINFRID HENTRICH, LUDWIG ZEH, and JOHANN HUIRMANN, Wiesdorf, near Cologne, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y., a Corporation of Delaware. Filed Apr. 17, 1925, Serial No. 23,962, and in Germany May 21, 1924. 10 Claims. (Cl. 260—127.)

9. As new products omega-aminoalkyl-2-aminonaphthalenes of the general formula

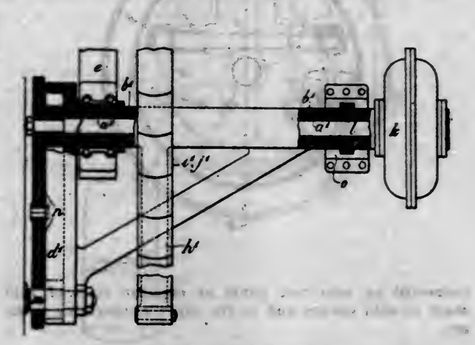
in which formula R represents an alkylene group, which products are greyish white solid substances, difficultly soluble in water, easily soluble in dilute mineral acids, forming well crystallized salts with mineral acids and reacting with nitrous acid with formation of colored solutions.

1,633,930. DETECTORMETER. HARLEY H. DULEY, Chicago, Ill. Filed Sept. 28, 1925. Serial No. 59,218. 1 Claim. (Cl. 116—114.)



A device of the type described comprising a casing, a transparent dial having colored portions thereon disposed in said casing, a thermostatic member carried by said casing, a vertically disposed rack carried by said thermostatic member and provided with a guide and stop portions, strips horizontally disposed in said casing, a shaft rotatably disposed in said strips, a pinion disposed between said rack, said guide and said stop portions and rigidly mounted upon said shaft, an indicator arm disposed upon said shaft and rigidly secured to said pinion, the free end of said indicator arm being adapted to communicate with the colored portions of said dial, said casing being fashioned to limit the expansion of said thermostatic member, means carried by said thermostatic member for limiting the contraction of said member, a transparent glass disposed upon each side of said casing, an opaque disc having an opening therein in alignment with said indicator arm and said colored portions and disposed adjacent each of said transparent glasses whereby said indicator arm and said colored portions may be readily viewed from either side of said casing.

1,633,931. GRATE BAR FOR FINE FUEL. HUMPHREY A. ELLIS, Philadelphia, Pa. Filed Mar. 7, 1924. Serial No. 697,456. 6 Claims. (Cl. 126—163.)



1. A grate bar having longitudinally extending strengthening ribs on the under surface thereof and diagonal openings sloping upwardly and away from each other from common inlets on the under side of the bar between the ribs and communicating with spaced vertically extending openings to the upper face of the grate.

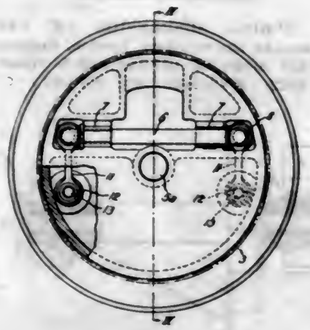
1,633,932. WIRELESS RECEIVING SYSTEM. FRANK B. FALKNOR, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 26, 1923. Serial No. 634,727. 3 Claims. (Cl. 250—20.)

1. A radio receiving system comprising a radio receptor circuit, a heterodyne generator and a beat-resolving means cooperating therewith, and a super-regenerative detector operatively associated with the output of said beat-resolving means.

1,633,933. SPRING SUSPENSION OF VEHICLES. FRANK SMEDLEY FARNSWORTH, London, England. Filed Dec. 5, 1923, Serial No. 678,743, and in Great Britain Dec. 15, 1922. 2 Claims. (Cl. 267—19.)

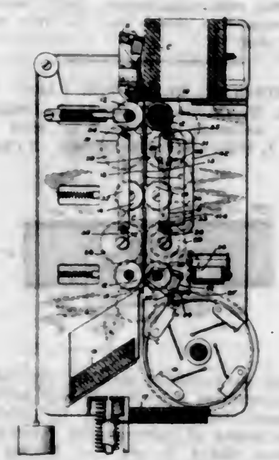
1. A vehicle spring suspension system including a rear axle, an elongated sleeve mounted for free rotation on the axle for substantially half the length of the latter, bearings carried by the vehicle frame for supporting the respective ends of the sleeve, a crank arm connected to the sleeve and supporting the wheels, a second crank arm connected to the sleeve and projected therefrom in a direction substantially at right angles to the sleeve, a vehicle spring supporting means, and a connection between said supporting means and the free end of the second crank arm.

1,633,934. STRIKING PLATE FOR CARS. BENJAMIN F. FAUNCE, Westmont, and HENRY C. DORRIS, Johnstown, Pa., assignors to Bethlehem Steel Company. Filed June 1, 1925. Serial No. 33,968. 3 Claims. (Cl. 213—60.)



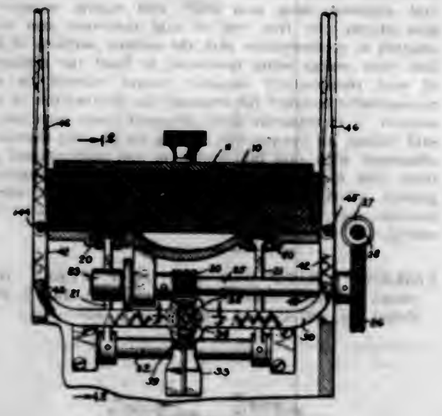
1. A pressed steel striking plate for the end sill of a railway car comprising a horizontal body portion and a pair of integral laterally-extending leg portions, said body portion having an uninterrupted substantially rectangular recess dished in one face thereof and also having a laterally-disposed channel open to said recess and sloping from the bottom of said recess to the normal plane of the plate, said leg portions having flanges at their inner and bottom marginal edges which extend at right lines from the face of said leg portions in the general direction of said dished portion.

1,633,935. COUPLING. GEORGE HERBERT FLETCHER, Sheffield, and HERMANN RUSBY, Stocksbridge, England, assignors to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Aug. 13, 1925, Serial No. 49,876, and in Great Britain Aug. 14, 1924. 7 Claims. (Cl. 64—27.)



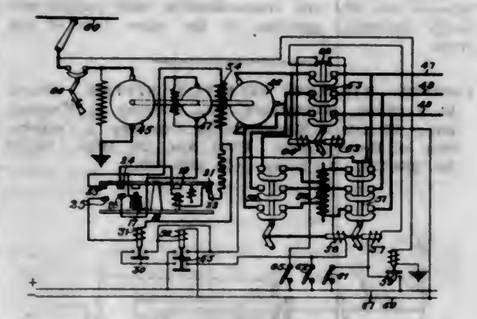
1. A coupling comprising a pair of co-operating members to be coupled, a shaft journalled in one of said

members transversely to the axis thereof, a plurality of cranks on said shaft, and a pair of links respectively



connected by universal joints at opposite ends of said shaft to said cranks and to the other co-operating member.

1,633,936. PERFORATION-READING DEVICE FOR SORTING MACHINES AND THE LIKE. EUGENE A. FORD, West Newton, Mass., assignor to The Tabulating Machine Company, Endicott, N. Y., a Corporation of New Jersey. Filed Feb. 25, 1924. Serial No. 695,000. 18 Claims. (Cl. 209—110.)



1. In a card controlled machine adapted for reading the index point perforations of passing record cards and determining the control of the machine upon the passage of all cards having predetermined index point punched designations therein, said machine comprising in combination, means for feeding record cards through the machine, means for simultaneously sensing at one reading operation a plurality of the perforations of each passing record card while the card is in motion, means for setting the aforesaid sensing means in accordance with desired index point values, and means for controlling the operation of the machine upon the passage of a record card which has punchings therein corresponding to the set-up of the sensing devices.

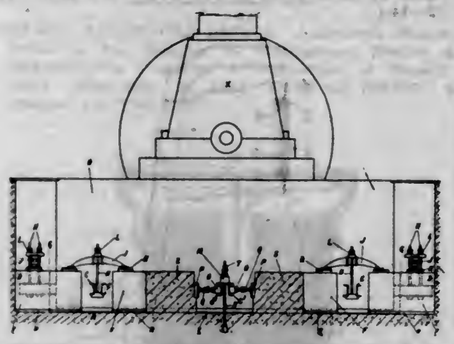
1,633,937. CARD-FEEDING APPARATUS. EUGENE A. FORD, Scarsdale, N. Y., assignor to The Tabulating Machine Company, Endicott, N. Y., a Corporation of New Jersey. Filed Aug. 13, 1925. Serial No. 50,093. 9 Claims. (Cl. 271—44.)

1. In a card feeding apparatus, a card magazine having oppositely disposed movable walls, and means to vibrate both of said walls to jog both edges of the cards which are disposed in a stack between said walls.

1,633,938. SYNCHRONOUS-MOTOR STARTER. WALTER C. GOODWIN, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed July 30, 1920. Serial No. 400,141. 5 Claims. (Cl. 171—118.)

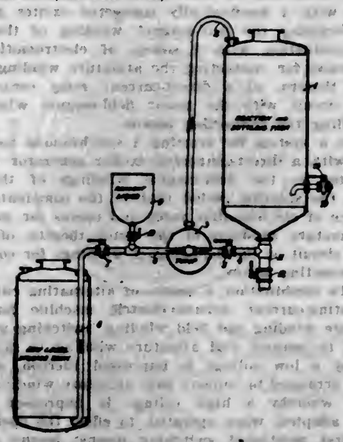
1. In a motor starter, the combination with a synchronous motor having a field-magnet winding, and starting and running primary connections for said motor, of means controlled in accordance with the value of the current traversing said winding during the starting operation for rendering said starting connections ineffective and said running connections effective and for preventing a change in said connections upon the occurrence of an inductive disturbance in said winding after the running connections have been completed.

2. In a motor starter, the combination with a synchronous motor having a field-magnet winding, and starting and running primary connections for said motor, of means controlled in accordance with the value of the current traversing said winding during the starting operation for rendering said starting connections ineffective and said running connections effective and for preventing a change in said connections upon the occurrence of an inductive disturbance in said winding after the running connections have been completed, said means comprising a circuit-controlling device, actuating and holding means therefor and a relay for controlling said actuating means.



3. In a motor starter, the combination with a synchronous motor having a field-magnet winding, and starting and running primary connections for said motor, of means controlled in accordance with the value of the current traversing said winding during the starting operating for readering said starting connections ineffective and said running connections effective and for preventing a change in said connections upon the occurrence of an inductive disturbance in said winding after the running connections have been completed, said means comprising a circuit-controlling device, actuating and holding means therefor and a relay having an actuating coil in circuit with said field-magnet winding.

1,633,939. BELT CONNECTER. GEORGE G. GRACE, Los Angeles, Calif., assignor of one-half to Richard E. Kline, Los Angeles, Calif. Filed Oct. 26, 1925. Serial No. 64,814. 4 Claims. (Cl. 24—33.)

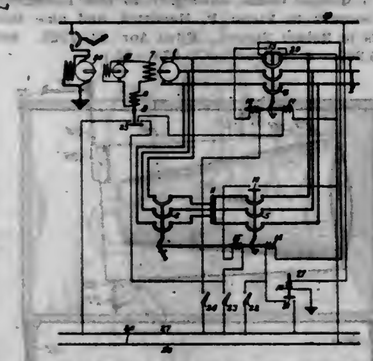


1. A belt connecter embodying a pair of hingedly connected leaves, said leaves having bolt holes and being countersunk to provide conical depressions on the undersides of the leaves, and attachment bolts whose shanks extend through the belt at the underside of the leaves and through said bolt holes, the bolt heads being disposed at the under side of the belt, and nuts on the bolts at the upper side of the leaves, said bolts being adapted to be taken up to press the belt into said conical depressions, said bolt shanks being of a diameter to extend through the bolt holes with appreciable clearance, and lock-washers on the bolts between the leaves and nuts, said washers having annular flanges adapted to extend into the bolt holes around the bolt shanks.

1,633,940. MACHINERY FOUNDATION. ROBERT BERTRAM GREY, London, England. Filed Apr. 7, 1926, Serial No. 100,213, and in Great Britain Apr. 29, 1925. 1 Claim. (Cl. 248—16.)

In a foundation for machinery or the like, the combination of a concrete raft, a foundation structure, joists embedded in and projecting in directions at right angles to one another from said structure, supporting blocks spaced laterally from said structure and supported on said raft, tension means by which said structure is suspended, said tension means being secured to said joists, resilient means for supporting said tension means, said resilient means being supported by said blocks, conveniently adjustable means permitting alteration of the periodicity of vertical vibrations of said structure, and spring means and associated adjustable devices for controlling horizontal movements of said structure.

1,633,941. PROCESS FOR REMOVING SUSPENDED MATTERS FROM OILS AND ORGANIC SOLVENTS. HARRY HEY, Dewsbury, England. Filed Nov. 26, 1921, Serial No. 517,875, and in Great Britain Dec. 16, 1920. 4 Claims. (Cl. 196—16.)



1. The process of reclaiming a used mineral oil or organic solvent containing suspended matter comprising the steps of mixing a sulphonated unsaturated oil intimately with said mineral oil or solvent to be treated and allowing the suspended matter thus precipitated to separate by gravity.

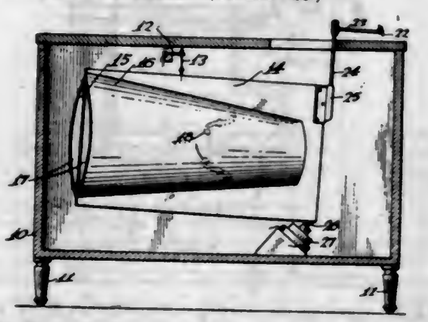
1,633,942. PROCESS FOR REMOVING SUSPENDED MATTERS FROM OILS AND ORGANIC SOLVENTS. HARRY HEY, Dewsbury, England. Original application filed Nov. 26, 1921, Serial No. 517,875, and in Great Britain Dec. 16, 1920. Divided and this application filed Mar. 11, 1924. Serial No. 698,570. 2 Claims. (Cl. 196—16.)

1. The process of reclaiming a used mineral oil or organic solvent containing suspended matter comprising the steps of mixing a sulphonated unsaturated oil diluted with a hydrocarbon solvent intimately with said mineral oil or organic solvent to be treated and allowing the suspended matter thus precipitated to separate by gravity.

1,633,943. MOTOR-STARTING SYSTEM. CLARENCE A. JOHNSON, Larimer, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 3, 1920. Serial No. 386,222. 15 Claims. (Cl. 171—118.)

1. In a system for starting a synchronous motor provided with a direct-connected exciter generator for energizing the field-magnet winding of the motor, the combination with a source of electromotive force and means

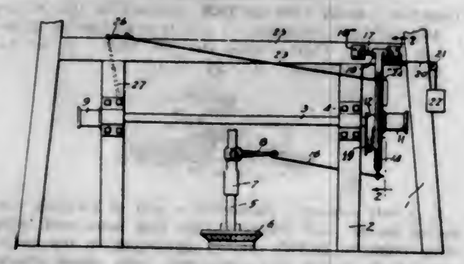
for connecting the armature windings of the motor thereto, of means responsive to the energization of the motor field-magnet from the generator winding for controlling the connecting means.



2. In a system for starting a synchronous motor providing with a mechanically connected exciter generator for energizing the field-magnet winding of the motor, the combination with a source of electromotive force and means for connecting the armature windings of the motor thereto, of a direct-current relay connected in series circuit with the motor field-magnet winding for controlling the connecting means.

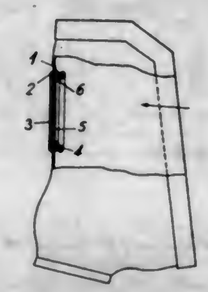
3. In a system for starting a synchronous motor provided with a direct-connected exciter generator normally connected to the field-magnet windings of the motor during the starting period thereof, the combination with a source of electromotive force and means for connecting the armature windings of the motor thereto, of a relay in the circuit of the field-magnet windings for controlling the connecting means.

14. In combination, a source of alternating current, an alternating-current dynamo-electric machine having an armature winding and field winding, switching means arranged to connect said armature winding to said source whereby a low voltage is impressed thereon, switching means arranged to connect said armature winding to said source whereby a high voltage is impressed thereon, means adapted, when operated, to effect the operation of said first mentioned switching means, means arranged to supply direct current to said field winding after the operation of said first mentioned switching means, and means responsive to the current through said field winding to effect the operation of said second mentioned switching means.



15. In combination, a source of alternating current, an alternating-current dynamo-electric machine having an armature winding and a field winding, switching means arranged to connect said armature winding to said source whereby a low voltage is impressed thereon, switching means arranged to connect said armature winding to said source whereby a high voltage is impressed thereon, means adapted, when operated, to effect the operation of said first mentioned switching means, means arranged to supply direct current to said field winding after the operation of said first mentioned switching means, and means responsive to a predetermined amount of direct current through said field winding to effect the operation of said first mentioned switching means to disconnect said armature winding from said source and the operation of said second mentioned switching means to connect said armature winding to said source.

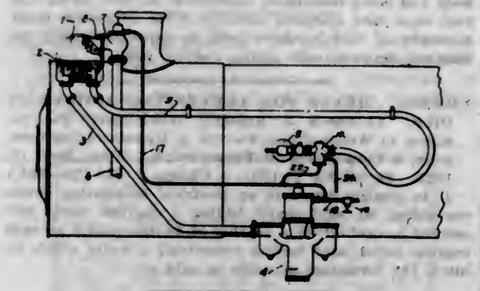
1,633,944. SOUNDING BOARD FOR RADIO RECEIVING SETS AND PHONOGRAPHS. GEORGE C. LINDSEY, Los Angeles, Calif., assignor of seven thirty-seconds to Michael Gozzo, one-eighth to Don Eminger, six thirty-seconds to Victor P. Hendrick, and nine thirty-seconds to Robert Turner. Filed Apr. 23, 1925. Serial No. 25,269. 6 Claims. (Cl. 274—26.)



1. A device of the character described comprising a support, a sounding board of wood freely suspended from the support for vibration throughout its area at audible frequency, a stylus mounted on the support and engaging the sounding board for vibrating the latter, means for reproducing and transmitting sound vibrations to the stylus, and tapered sheet material upon the side of the board with its medial portion spaced from the board to form a sound amplifying chamber, the converging sides of the sheet material being fixed to the board with the ends of the sheet material spaced from the board to form open ends for the sound amplifying chamber, and there being an aperture in the board opposite the sound amplifying chamber.

1,633,945. WELL-DRILLING APPARATUS. JOHN W. MACCLATCHIE, Compton, Calif. Filed Nov. 18, 1925. Serial No. 69,731. 23 Claims. (Cl. 255—35.)

1. Means for converting rotary movement to reciprocating motion, comprising an eccentric, means for rotating the eccentric, a swinging arm, means for axially shifting the arm so that its swinging end is engaged by the eccentric for swinging the arm, and an operating connection secured to the swinging end of the arm.

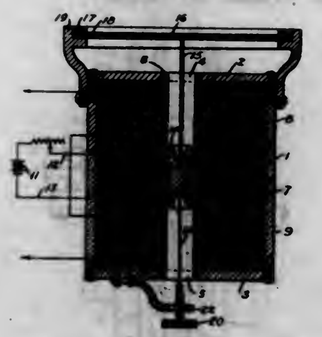


1,633,946. EYEGLASS. MAX MAYER, KARL FINCKH, and FRITZ KOBEP, Berlin, Germany, assignors to the Firm Chemische Werke vormals Auergesellschaft m. b. H. Kommanditgesellschaft, Berlin, Germany. Filed Aug. 12, 1921, Serial No. 491,752, and in Germany May 23, 1916. (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.) 7 Claims. (Cl. 2—14.)

1. Eyeglasses, replaceable sheets of overcasting-proof substance behind the eyeglasses, means for pressing the said sheets toward the eyeglasses, and waterproof transparent layers between the said sheets and the eyeglasses.

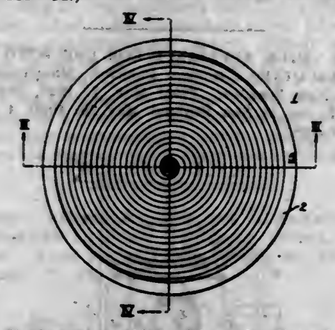
1,633,947. FEED-WATER-HEATER ARRANGEMENT. NEAL TRIMBLE MCKEE, Bronxville, N. Y., assignor to The Super-Heater Company, New York, N. Y. Filed Mar. 19, 1924. Serial No. 700,276. 2 Claims. (Cl. 122—441.)

1. In apparatus of the class described the combination of a feed water heater for heating water for a boiler, a pipe to supply water to it, a second pipe to carry the water from the heater to the boiler, a third pipe delivering exhaust steam to the heater, a steam-driven pump delivering water to the first pipe, a valved steam-pipe supplying steam to the pump, a valve in said second pipe, resilient means tending to keep said valve closed, steam actunted means to open it in opposition to said resilient means, a pipe connecting said steam actuated means to the pipe supplying steam to the pump so that the steam



actuated means receive steam only when the pump does, a valve in the pipe supplying heating steam to the heater, resilient means tending to close it, steam actuated means holding it open in opposition to the resilient means, and a conduit to supply steam to the last named steam actuated means at times when the pump is receiving steam; whereby no steam reaches the heater at times when the pump is not receiving steam.

1,633,948. PRODUCING LEAD COMPOUNDS OF CHROMIC ACIDS. ALEXANDER NATHANSOHN, Bad Harsburg, Germany. Filed Nov. 19, 1924, Serial No. 750,960, and in Germany Sept. 18, 1924. 1 Claim. (Cl. 23—57.)

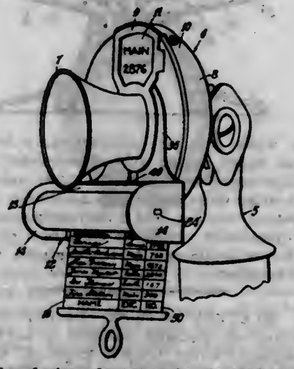


The process for manufacturing lead compounds of chromic acids which consists in lixiviating lead containing materials with a saturated solution of chloride of an alkali forming metal and precipitating the said solution with water soluble compounds containing the acid radicle of chromium.

1,633,949. TELEPHONE DEVICE. ALEXANDER NYMAN, Swissvale, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 20, 1923. Serial No. 663,787. 9 Claims. (Cl. 179—112.)

5. In a telephone receiver, a signal-receiving circuit including two coils wound and positioned to produce opposing fluxes, and a flux-responsive device located between said coils, said device being arranged for translational movement along an axis common to said coils.

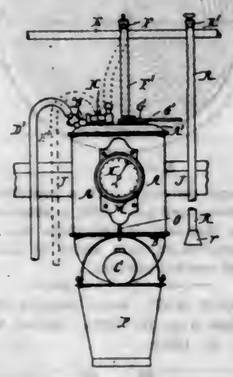
1,633,950. DIAPHRAGM. ALEXANDER NYMAN, Swissvale, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 20, 1923. Serial No. 663,788. 12 Claims. (Cl. 181—32.)



1. A diaphragm provided with a plurality of series of spiral corrugations, and also with a substantially smooth central portion disposed intermediate the opposite surfaces of said diaphragm, said series of corrugations terminating in said central portion.

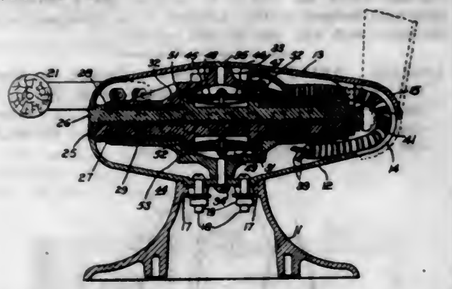
1,633,951. FLOOR MAT. JOHN JOSEPH O'TOOLE, Bellevue, Pa. Filed Aug. 10, 1925. Serial No. 49,490. 5 Claims. (Cl. 4—185.)

1. A floor mat comprising a body of sheet-like material having a permanently-defined portion substantially conforming to the base contour of any one of objects for disposition on the floor and having bases of slightly varying contour which the mat is to embrace and a portion inside said defined portion adapted to be reshaped in accordance with any one of said contours.



1,633,952. TELEPHONE INDEX. GEORGE D. POGUE and WEBSTER V. POGUE, Mount Vernon, N. Y., assignors to Pacquin, Inc., New York, N. Y., a Corporation of New York. Filed Jan. 18, 1924. Serial No. 686,965. 3 Claims. (Cl. 40—10.5.)

1. An index device adapted to be clamped to a suitable support comprising an index-strip-carrying element, a frame supporting said carrying element, relatively movable



clamping elements carried by said frame and adapted to engage said support whereby said frame is adapted to be connected to said support, said clamping elements being in the form of relatively movable jaws, and spring tension means for effecting relative movement between said jaws.

1,633,953. MILK APPLIANCE FOR USE WITH MILKING MACHINES. ROBERT PRESTON, Mangapapa, Gisborne, New Zealand. Filed Mar. 7, 1921, Serial No. 450,297, and in New Zealand May 20, 1920. 4 Claims. (Cl. 31—58.)

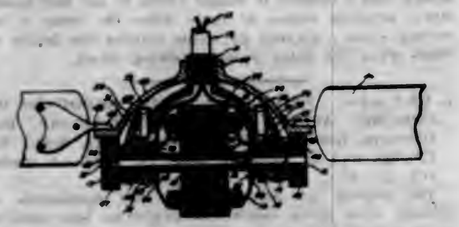
1. Means for the purposes herein described consisting in the combination of an airtight can having means for its connection with the cow being milked, and having an outlet for the milk controlled by a normally closed gravity valve, of a valve upon such can constructed to connect the can with a source of vacuum or with the atmosphere, at will, and a means for suspending a receptacle beneath the said outlet, substantially as specified.

1,633,954. WAFFLE IRON. JOSEPH H. PROCTER, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 12, 1925. Serial No. 55,896. 7 Claims. (Cl. 219—19.)

6. In a waffle iron, in combination, a lower baking surface, an upper baking surface subjected to varying rates of heat-interchange with the lower surface, a plurality of heating units operatively associated with the respective baking surfaces, and a thermally-actuable switch assembly operatively associated with each of the baking surfaces for maintaining the temperatures thereof substantially constant.

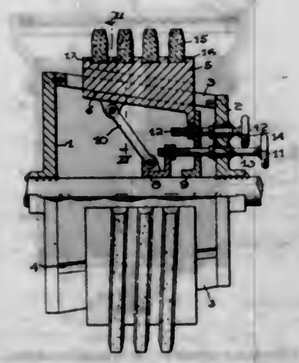
1,633,955. ELECTRICAL FUSE. DOUGLAS GWYN ROBINSON, Weymouth, England, assignor of one-half to William Sheridan Collins, London, England. Filed Apr. 7, 1925, Serial No. 21,260, and in Great Britain Apr. 10, 1924. 7 Claims. (Cl. 200—131.)

1. In an electrical fuse, the combination of spring contact clips, an insulator body, a fuse wire arranged upon the exterior of said body and metal clamping members slidably arranged upon said body, said clamping members pressing said fuse wire against said insulator



body and being detachably engageable in said spring contact clips, said clamping members being adjustable longitudinally of said insulator body to correspond with the distance between said spring contact clips.

1,633,956. MEANS FOR PREVENTING ACIDITY IN OILS. CLARENCE J. RODMAN, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Mar. 12, 1925. Serial No. 15,169. 4 Claims. (Cl. 175—361.)

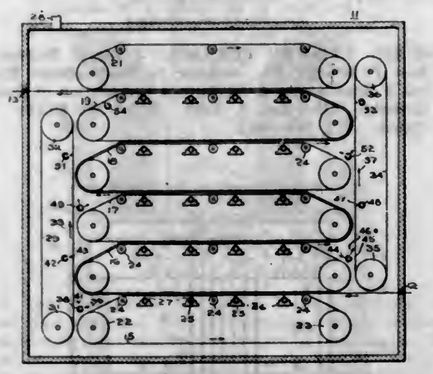


1. In combination with an electrical translating device containing oil, said device having a cuprous metal submerged in said oil, of a coating of another metal on said cuprous metal, said coating comprising a metal which inhibits the formation of acids in said oil.

1,633,957. FAN. GEORGE H. SCHLEICHER, Swissvale, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 7, 1926. Serial No. 133,799. 10 Claims. (Cl. 230—1.)

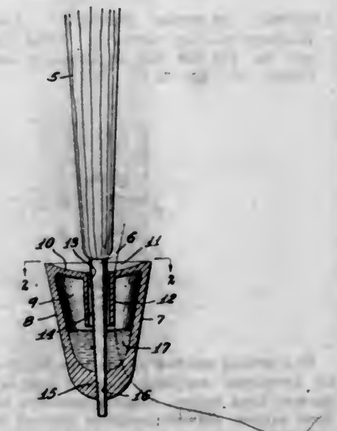
1. In a fan, in combination, a stationary motor provided with rotatably mounted field and armature windings, drive wheels disposed for operation by the field and armature windings, a rotatable track engaging the drive wheels, and fan blades carried by the track.

1,633,958. MEANS FOR GRINDING GEARS. ROBERT W. SCHROTT, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Nov. 5, 1923. Serial No. 672,700. 7 Claims. (Cl. 51—206.)



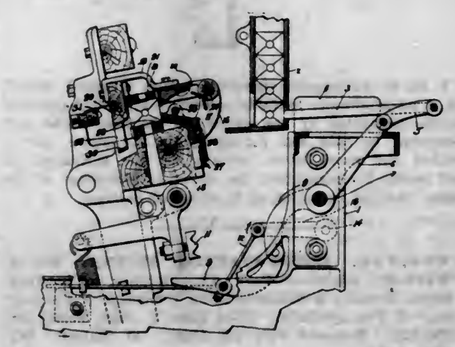
1. An abrasive device comprising a slotted hub member, abrasive material secured in supports movably mounted in said slots and means for adjusting said abrasive material.

1,633,959. METHOD FOR IMPARTING TO DRYING MEANS A LARGE SUPERFICIAL AREA. EDUARD SMOLCZYK, Biesdorf-Sud, near Berlin, Germany. Filed June 3, 1926, Serial No. 113,588, and in Germany June 8, 1925. 1 Claim. (Cl. 34—24.)



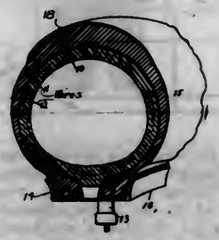
Method for imparting to drying means a large superficial area comprising depositing said means upon a porous carrier, and employing as binder between the carrier and the drying agent a hydrate of the latter.

1,633,960. PAPER-MAKING DEVICE. STEPHEN A. STABOS, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed July 13, 1925. Serial No. 43,204. 6 Claims. (Cl. 34—48.)



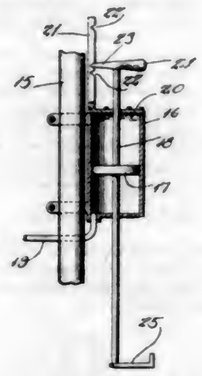
1. In a paper machine, the combination with upper and lower horizontal belts for moving a web of paper, of means moving in a vertical plane for effecting movement of the web in that direction, and pneumatic means for directing the web towards and away from said moving means and away from and towards the moving belts.

1,633,961. UMBRELLA ATTACHMENT. EARL B. SWEETING, New York, N. Y. Filed Sept. 17, 1925. Serial No. 56,845. 2 Claims. (Cl. 135—48.)



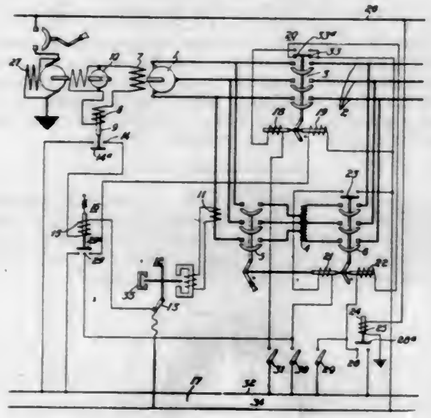
1. A device of the class described comprising a thimble-shaped body having straight and flared walls, the contracted end portion of said body being provided with a comparatively thick portion in which is an elongated aperture opening into said body and outwardly through the contracted end thereof, the enlarged end portion having a flat peripheral edge forming a closure for the chamber within said body, an inwardly directed tubular member centrally of said crosshead and in spaced relation with the contracted end of said body, the bore of said member being in axial alinement with the aperture in the contracted end of said body, the bore of said tubular member having circumferentially spaced radially projecting members to center the umbrella tip in said bore, and the enlarged end of said body forming a suction cup whereby the same may be retained against accidental displacement on a floor or other surface, and whereby an umbrella may be supported in upright position by insertion into the aperture in the contracted end of said body.

1,633,962. SHUTTLE-CHANGING APPARATUS FOR AUTOMATIC LOOMS. KIICHIRO TOYODA, Nagoya, Japan. Filed Apr. 24, 1926. Serial No. 104,272. 5 Claims. (Cl. 139—238.)



1. A shuttle changing apparatus for automatic looms, comprising in combination with the slay, a shuttle box formed by a front plate and a back plate, the front face of said front plate being provided with an inclined guide, and a common rocker arm for said front plate and said back plate to open and close the same in unison, the said front and back plates being opened simultaneously by a fresh shuttle and closed again simultaneously upon the completion of the shuttle changing operation.

1,633,963. PNEUMATIC TIRE. DANIEL M. WEIGEL, Trenton, N. J., assignor, by mesne assignments, to The American Wire Cord Tire Company, Wilmington, Del., a Corporation of Delaware. Filed Aug. 20, 1921. Serial No. 493,887. 6 Claims. (Cl. 152—13.)

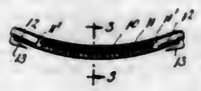


1. An inner tube for use in cooperation with an extensible casing, said tube having a rubber portion and spaced wires embedded therein, extending entirely helicoidally around the said tube and said wires being independent of each other throughout their length; said rubber portion and said wires in themselves constituting the sole means for resisting the tendency of the contained air to rupture the tube and casing.

1,633,964. VEHICLE SIGNAL. ANTON WELLERT, Binghamton, N. Y. Filed Dec. 27, 1926. Serial No. 157,394. 3 Claims. (Cl. 116—39.)

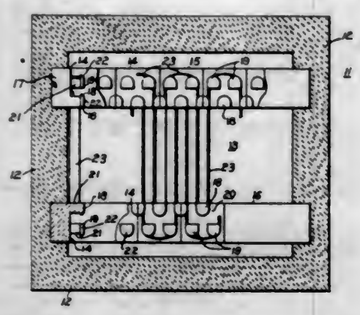
1. In an automobile signaling device, a signal including a longitudinally movable operating rod, fluid pressure means controlled by the driver of the automobile and connected to said rod for operating the same, and a ratchet and pawl device actuated by the movement of said means for regulating the extent of movement of the means and for retaining it in adjusted position.

1,633,965. MOTOR-STARTING SYSTEM. ROY J. WENSLEY, Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 3, 1920, Serial No. 386,322. Renewed July 25, 1923. 20 Claims. (Cl. 171—118.)



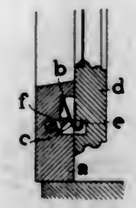
3. A system for starting a synchronous motor comprising a relay responsive to the energization of the motor-field-magnet windings and a relay responsive to the minimum value of current in the armature windings.

19. A system for starting a synchronous motor comprising a relay energized in accordance with the direct-current energization of the motor-field-magnet windings and a relay energized to a degree depending upon the speed of the motor.



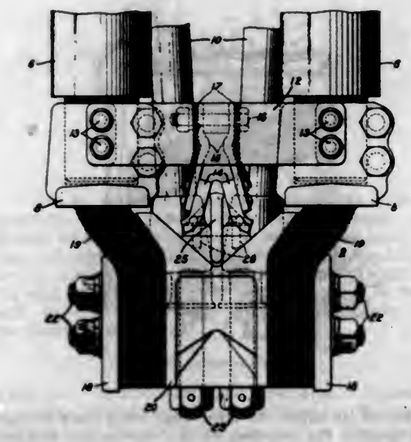
20. A system for starting a synchronous motor comprising a relay and means responsive to the direct-current energization of the motor-field-magnet windings co-operating with means responsive to the speed of the motor to control the relay.

1,633,966. FASTENER. FRANZ WOLF, New York, N. Y. Filed Mar. 21, 1927. Serial No. 176,853. 1 Claim. (Cl. 24—87.)



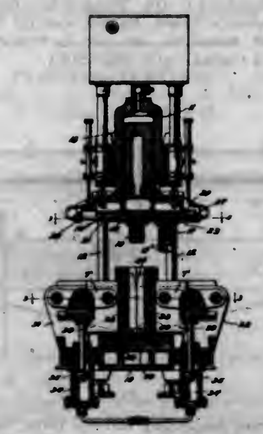
A fastener of the character described, consisting of a hollow pin, a spring mounted therein, plunger like members slidably mounted in said pin and attached to the ends of said spring, the ends of said members projecting outwardly from said pin and having hooks extending longitudinally in opposite directions over the front faces of the end portions of said pin.

1,633,967. ELECTRIC FURNACE. JAMES C. WOODSON, East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Oct. 1, 1925. Serial No. 59,761. 6 Claims. (Cl. 204—64.)



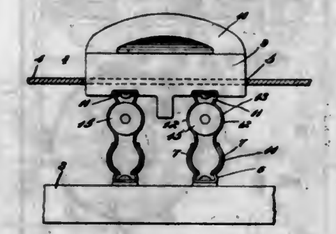
1. In an electric furnace, the combination with a furnace chamber, of a plurality of refractory wall members and a plurality of resistors supported by said refractory wall members in such manner that the depending loop portions along each of the walls are alternately similar.

1,633,968. SLIDING WINDOW. ARTHUR ZEHMAN, Rossberg-Beuthen, Germany. Filed Aug. 27, 1926, Serial No. 131,839, and in Germany July 16, 1925. 1 Claim. (Cl. 20—52.)



In a sliding window of the type made to slide laterally on horizontal supports, movable sashes made to slide against fixed sashes, channel members hinged on to the fixed sashes, channel members secured to the said sliding sashes and adapted to slide along in the said first channel members, springs acting on the said first channel members, means for locking the said sliding sashes together, and means for preventing the said sliding sashes from moving when the same are locked together.

1,633,969. CIRCUIT BREAKER. CHRISTIAN AALBORG, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Mar. 15, 1922. Serial No. 543,909. 3 Claims. (Cl. 200—166.)



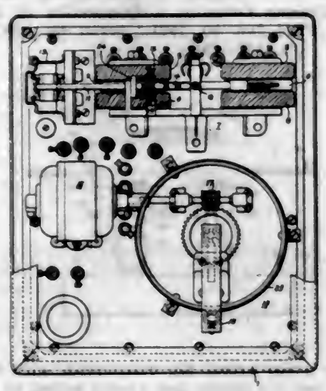
1. The combination, in a circuit breaker, of a pair of conductors provided with a stationary contact member constituting one pole of the breaker, a similar pair of conductors and contact member constituting another pole of the breaker, a bridging member provided with a pair of transversely flared portions, arcing tips located between such flared portions, and an arcing tip carried by each of the said conductors for co-operating with the last named arcing tips.

1,633,970. APPARATUS FOR COMPRESSING INGOTS. SAMUEL S. BALL, Bethlehem, Pa. Filed Apr. 24, 1922. Serial No. 556,242. 10 Claims. (Cl. 78—42.)

1. In mechanism of the class described, in combination, a base for supporting an ingot, a plunger movable relatively to the base for axially compressing the ingot, a die for engaging and supporting the side walls of the ingot during its axial compression, said die comprising a plurality of separable portions which constitute, together with the base, a confining chamber, a horizontally movable carriage supporting each of said separable portions of the die, and means including toggle mechanism for simultaneously operating said carriages.

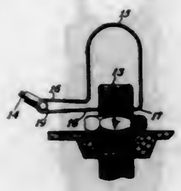
1,633,971. FUSE MECHANISM. HAROLD G. BAXTER, Baldwin, N. Y., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Jan. 20, 1921. Serial No. 438,572. 4 Claims. (Cl. 175—298.)

1. In a panel board, the combination with a board having a fuse clip thereon and a cover having an opening opposite the fuse clip, of a carrier for closing the opening and provided with a clip for yieldingly and releasably supporting a fuse thereon, the said clip having portions extending beyond the fuse for engaging the interior of the fuse clip on the board for preventing release of the fuse from the carrier when the carrier is in closed position.



1,633,972. UNION UNDERGARMENT. ALTHEA T. BERRY, Wolfeboro, N. H. Filed Jan. 5, 1926. Serial No. 79,445. 2 Claims. (Cl. 2—78.)

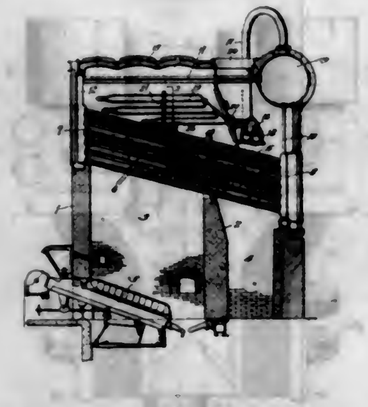
1. A union undergarment comprising a waist portion and two combined lower body and leg portions, the waist portion including front and back sections united by longitudinal side seams, and being of knitted fabric which is relatively inelastic lengthwise of its wales, and elastic crosswise thereof, the wales of the back section extending horizontally throughout the area thereof so that said section is adapted to expand and contract vertically and conform to various movements of the portion of the wearer's body above the waist, while the wales throughout the area of the front section extend vertically, so that said section is adapted to expand and contract horizontally, the combined lower body and leg portions being united to the waist portion by a circumferential seam at the waist line of the garment and



each combined lower body and leg portion being slitted downward from its upper end along the longitudinal median line thereof to form two vent slits extending from the waist line of the garment to the leg portions thereof.

1,633,973. REMOTE METERING SYSTEM. PERRY A. BORDEN, Toronto, Ontario, Canada. Filed Nov. 22, 1924. Serial No. 751,532. 9 Claims. (Cl. 171—34.)

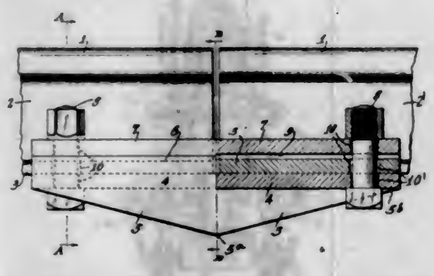
6. A remote metering system comprising current-impulse device operating in accordance with the power and reactive components of the volt-amperes traversing a circuit, respectively, relays controlled thereby and a Kelvin balance having a winding intermittently energized by each relay.



1,633,974. ELECTRICAL CONNECTER. EDGAR W. BREISCH, Edgewood, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Oct. 23, 1920. Serial No. 419,023. 1 Claim. (Cl. 173—273.)

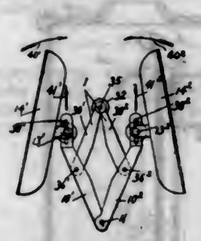
A connecter comprising a unitary flexible metallic strip of substantially inverted U-shape having two legs provided with inwardly bent end portions in substantially the same plane to constitute oppositely disposed cooperating contact jaws for yieldingly gripping a terminal, one of the said jaws being of greater length than the other and constituting one portion of a flap loop extending at right angles to one leg of the strip which constitutes a combined handle and socket for receiving a permanently attached conductor.

1,633,975. SUPERHEATER BAFFLE. BENJAMIN BROIDO, New York, N. Y., assignor to The Superheater Company, New York, N. Y. Filed Mar. 11, 1924. Serial No. 698,385. 3 Claims. (Cl. 122—478.)



1. In a device of the class described the combination of a plurality of tubular superheater elements each comprising a plurality of parallel horizontal branches all in one plane, and a baffle made up of a plurality of baffle units each comprising a plane portion, said baffle units each having a number of notches one to each branch of the associated superheater element extending inward from one of its edges, the other edge being plain through which notches the branches of the superheater elements extend, the notched edge of each unit lying against the plain edge of the adjacent unit.

1,633,976. FLEXIBLE COMPOSITE ARTICLE AND METHOD OF FORMING THE SAME. ARTHUR L. BROWN, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 24, 1920, Serial No. 412,564. Renewed Nov. 8, 1926. 15 Claims. (Cl. 106—22.)

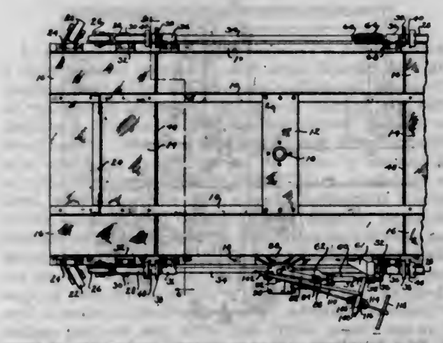


1. A condensation product comprising a phenolic body, a substance containing a methylene group, substantial proportion of a polymerizable vegetable oil less than the proportion of said phenolic body, and a drier for catalyzing the condensation reaction.

1,633,977. RAILWAY OR TRAMWAY RAIL JOINT. EDWIN AUGUSTUS BYRDE, Nagpur, Central India. Filed Jan. 7, 1925, Serial No. 963, and in British India Oct. 14, 1924. 5 Claims. (Cl. 238—210.)

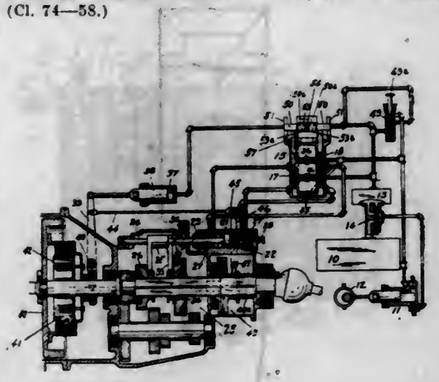
2. A structure for joining railway rails, comprising an upper arch plate bolted to a lower girder plate over the flange of the rail ends, the inner edge of said upper plate having for its skew-back the web of the rail and also alternatively contacting upon the rail flange, and the outer edge of the upper plate having for its skew-back an upward extension of said bottom plate.

1,633,978. APPARATUS FOR THE CUT OF THE MUSTACHE. PIERRE LEON MARTIN VICTOR CALMELS, Tours, France. Filed Dec. 1, 1926, Serial No. 152,006, and in France Dec. 10, 1925. 7 Claims. (Cl. 132—45.)



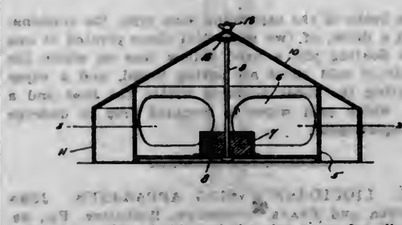
1. In an apparatus for determining the trim of a mustache the combination of the following parts: an arc formed by two arms adapted to be placed in front of the lips, two guide members and means of articulation inserted between said guides and the ends of the arc allowing said guide-members to be inclined relative to said arc, and, thereby, the line for trimming the points of the mustache, to be altered.

1,633,979. DISCONNECTING SWITCH. HERBERT J. CRABBS, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 20, 1923. Serial No. 663,732. 4 Claims. (Cl. 200—169.)



1. A unitary stamped latch for a switch blade comprising a main body portion in one plane, a lug bent into a second plane, and a hook member bent laterally from and then reversely towards said main body portion.

1,633,980. TRANSFER TURNTABLE. ROBERT CRAIG, Maplewood, N. J. Filed Oct. 7, 1926. Serial No. 140,052. 10 Claims. (Cl. 104—44.)

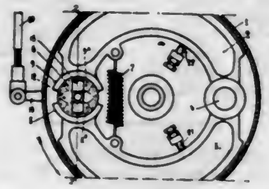


1. In a turntable for vehicles, in combination, a set of wheels adapted to support said turntable for rotation, a set of transfer wheels, and means for rendering either set of wheels effective; said means including a lifting device, an operating device with a variable ratio, and settable means for changing said ratio.

1,633,981. FLUID-PRESSURE CONTROL FOR POWER TRANSMISSIONS. ROGER Q. DAVIS, Akron, Ohio. Filed Jan. 20, 1926. Serial No. 82,497. 10 Claims. (Cl. 74—58.)

4. A fluid pressure control for power transmissions comprising a double acting piston connected to each shiftable gear of the transmission, means normally holding each double acting piston in neutral, a piston connected to the clutch thereof, means normally engaging the clutch, means for providing a supply of fluid pressure, and shiftable means for connecting fluid pressure from the supply means to the one side or the other of either gear operating piston and for connecting the supply means to the clutch operating piston during shifting of the gear and disconnecting the supply means therefrom when the gear has been shifted, said means comprising double acting valves connected to the double acting pistons, a valve connected to the clutch operating piston, and a single means for operating the valves adapted to operate the clutch valve during the shifting of either one of the double acting valves and the latter in either direction.

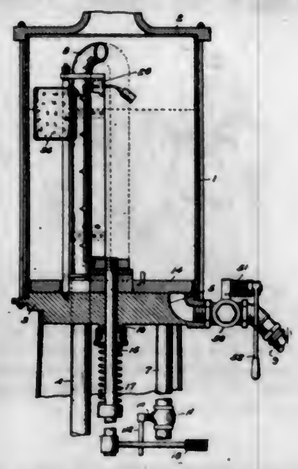
1,633,982. RAT-POISON HOLDER. TIMON DAVIS, Mauston, Wis. Filed Feb. 18, 1927. Serial No. 169,382. 2 Claims. (Cl. 43—131.)



1. In a poison holder of the character described, a pan having spaced oblong openings at its sides, a poison holding cup arranged in the center of the pan, an inverted conical lid for disposition over the top of the pan and being of an area so that the edge of the lid will overlap the edge of the pan, spaced depending legs on the edge of the lid and resting upon the floor surface, and means interconnecting the center of the pan and the apex of said lid.

1,633,983. DISPENSING-CUP CARTON. CECIL F. DAWSON, East Orange, and EDWIN G. WESSMAN, Boonton, N. J., assignors, by mesne assignments, to Individual Drinking Cup Co. Inc., Easton, Pa., a Corporation of Pennsylvania. Filed Nov. 5, 1920. Serial No. 421,981. 26 Claims. (Cl. 206—56.)

3. A carton having a delivery end portion square in cross section, and yieldable fingers extending inwardly from the corner portions at the lower marginal edges of said delivery end portion.

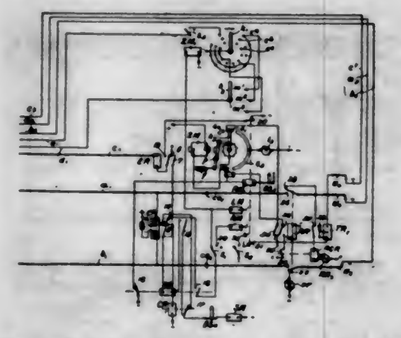


1,633,984. BRAKE OF THE EXPANDING-SHOE TYPE. GUIDO FORNACA, Turin, Italy. Filed Aug. 8, 1925, Serial No. 48,968, and in Italy Aug. 29, 1924. 4 Claims. (Cl. 188—78.)

1. In a brake of the expanding shoe type, the combination with a drum, of two segmental shoes pivoted at one end on a floating pin, a fixed hollow boss on which the other ends of said shoes are spring urged, and a wiper for actuating the shoes mounted within the boss and a shaft on which said wiper is mounted free to undergo lateral displacement.

1,633,985. LIQUID-DISPENSING APPARATUS. JOHN R. FOSTER and FRANK WOODRUFF, Rochester, Pa., assignors to Correct Measure Company, Rochester, Pa., a Corporation of Pennsylvania. Filed Oct. 17, 1925. Serial No. 63,041. 3 Claims. (Cl. 221—100.)

1. In liquid-dispensing apparatus a measuring chamber provided with a delivery orifice and a return orifice, a return conduit leading from the return orifice, a valve in the return conduit, a valve within the measuring chamber provided with a plurality of orifices opening at different levels within the measuring chamber, said valve being movable from return position to successive positions of registry of its orifices with the delivery orifice, and back again to return position, the said valve in the



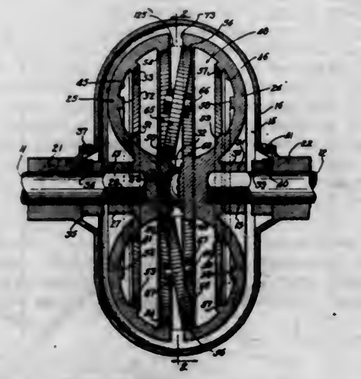
return pipe, otherwise closed, being movable from its normally closed to its open position by the shifting of the said valve in the measuring chamber to return position.

1,633,986. ARTIFICIAL EYE. RICHARD GREINER, Berlin, Germany. Filed July 24, 1926, Serial No. 124,780, and in Germany Nov. 17, 1925. 3 Claims. (Cl. 3—13.)

1. An artificial eye, wherein the white cornea or sclerotic of opalescent glass, is covered with a thin layer of colourless crystal glass.

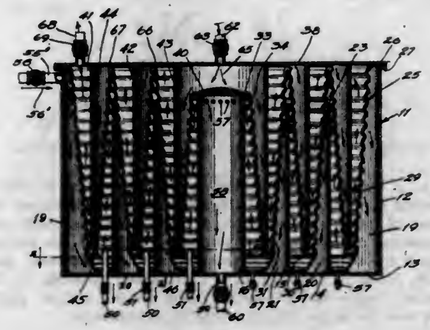
1,633,987. SEMIAUTOMATIC OR AUTOMATIC GRADED-SERVICE TELEPHONE SYSTEM. GEORG HEIMANN, deceased, Charlottenburg, Germany, by Else Hecht, née Heimann, administratrix, Charlottenburg, Germany. Filed Aug. 16, 1921, Serial No. 492,760½, and in Austria Dec. 30, 1913. 32 Claims. (Cl. 179—9.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

1. In a telephone exchange system, a plurality of lines divided into different traffic zones, means for establishing connections between calling and called lines, toll devices



normally inert operating mechanism for said devices and rendered operable upon the establishment of any connections, and means for preventing the establishment of a connection between a calling line and a called line belonging to a certain zone.

1,633,988. PROTECTOR FOR GLASS AND METAL DOOR KNOBS AND AUTOMOBILE HANDLES. GEORGE JONES, Flushing, N. Y. Filed Sept. 2, 1926. Serial No. 133,220. 1 Claim. (Cl. 150—52.)



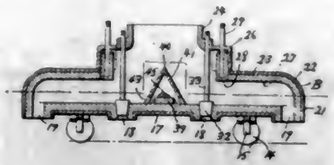
A device of the class described including a hollow flexible body adapted to receive a door knob and shaped in conformity therewith and provided with an opening sufficiently large to pass the knob therethrough and having a hem directly at its edge, and an elastic band in the hem adapted to draw the edge of the opening tightly about the shank of the knob.

1,633,989. TRANSMISSION. RICHARD GIRARD JONES, Hynes, Calif. Filed Dec. 5, 1925. Serial No. 73,373. 3 Claims. (Cl. 74—26.)

1. In combination: a drive element; a driven element; a drive member secured to said drive element, said drive member having an annular semi-cylindrical channel; a driven member secured to said driven element, said driven member having an annular semi-cylindrical channel, said annular semi-cylindrical channels of said drive and driven members being located so as to form a substantially annular cylindrical channel; drive gears carried by said drive member within said annular cylindrical channel; driven gears carried by said driven member within said annular cylindrical channel, said drive and driven gears being arranged in pairs in said annular cylindrical channel so that a drive gear is placed diametrically opposite each of said driven gears; a transmitter gear situated in said annular cylindrical channel adapted to selectively engage pairs of said drive and driven gears; means for moving said transmitter gear into engagement with any pair of said drive and driven gears; guides extending into said annular cylindrical channel; a bracket slidable on said guides; back gear means carried by said bracket, said back gear means being adapted to engage adjacent drive and driven gears; and means for bringing said back gear means into engagement position.

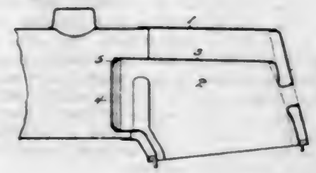
1,633,990. DEPHLEGMATOR. RICHARD GIRARD JONES, Hynes, Calif. Filed Jan. 13, 1926. Serial No. 80,890. 5 Claims. (Cl. 257—243.)

1. In an oil vapor condensing and rectifying device, the combination of: a series of collection chambers each having an inlet and an outlet near the top thereof; a hollow partition member in each chamber through which cooling fluid is circulated; a perforated member depending from the bottom of said hollow partition; and an inverted U-shaped outlet pipe disposed in each chamber, said pipe extending upwardly to substantially the same level as the bottom of the hollow partition, with its inner end disposed near the bottom of the chamber, and an opening in the bend thereof whereby the condensate while being drawn off from near the bottom of the compartment is maintained at a constant level, and is rectified as to boiling point by the hot vapor mixture bubbling through the submerged perforated member.



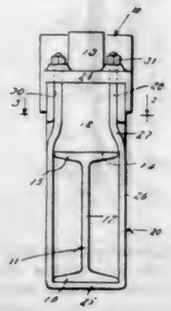
1,633,991. BRIEF CASE. SAMUEL H. LIFTON, Brooklyn, N. Y. Filed May 29, 1924. Serial No. 716,582. 5 Claims. (Cl. 150—1.6.)

1. A brief case comprising front and rear body walls connected at their side and bottom edges by a flexible bellows fold, a rigid strip arranged within the case body at the bottom portion thereof and extending substantially the full width and length thereof, and means for flexibly attaching said strip along one of its longitudinal edges to the base of the case body to thereby permit of the movement of said strip from a position substantially in



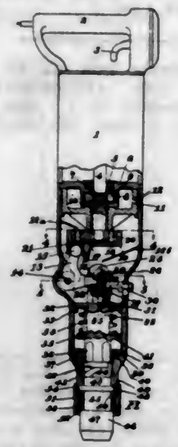
parallel relation with the case walls to an angular position therebetween whereby said bellows fold is expanded and the case walls retained in maximum spaced relation, said strip coinciding with the bottom wall of the case.

1,633,992. BOX FOR POURING STEEL INGOTS. BERNARD J. MADDEN, Duluth, Minn. Filed Jan. 14, 1927. Serial No. 161,166. 4 Claims. (Cl. 22—79.)



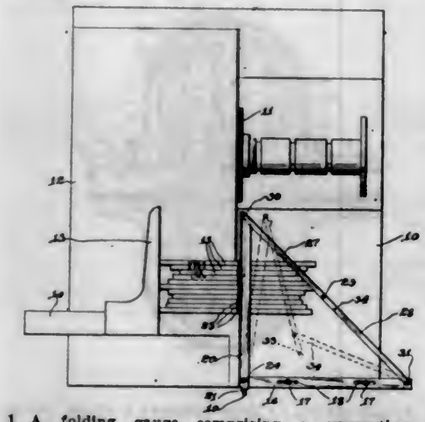
1. A box for pouring steel ingots comprising a bottom having a plurality of openings, means for controlling the flow of molten steel through said openings, said box including an entrance hopper, and a baffle on the bottom below the hopper to split the stream of molten steel, said baffle being in the form of a roof having openings in the bottom edges thereof, and a brick on the bottom under the roof for supporting a quantity of aluminum.

1,633,993. LOCOMOTIVE BOILER. HUGH MCCABE, Lawrence, Mass., assignor to McCabe Manufacturing Company, Lawrence, Mass., a Partnership. Filed Aug. 17, 1926. Serial No. 129,760. 1 Claim. (Cl. 122—512.



A tube sheet for fire boxes of locomotives having a tube sheet proper formed with a flange at its edges, the angle between the tube sheet and the flange being thicker than the tube sheet proper to enable it to bear the stresses of expansion and contraction due to fluctuations in the temperature.

1,633,994. BEARING MOUNTING. IRA J. MCCULLOUGH, Huntington Park, Calif. Filed Jan. 4, 1926. Serial No. 79,085. 3 Claims. (Cl. 308—15.)

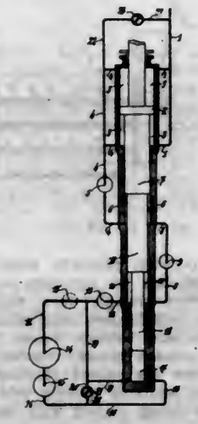


1. A bearing mounting including a support, a bearing, and a U-bolt engaging around the support and having its end portions offset inwardly and engaging the bearing to hold it on the support.

1,633,995. POWER HAMMER. HARRY H. MILLER, Youngstown, Ohio, assignor to Miller-Smythe Electric Company, Youngstown, Ohio. Filed Sept. 15, 1924. Serial No. 737,728. 20 Claims. (Cl. 125—33.)

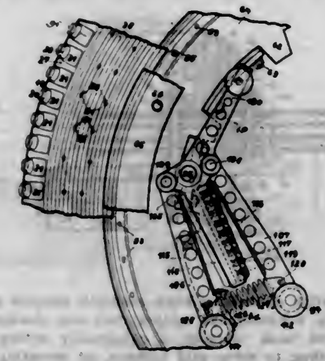
1. A power hammer comprising a percussion member, a drive gear, a pivoted member having one end at all times connected with said gear, the other end being adapted to alternately engage and disengage with said percussion member.

1,633,996. SAW GAUGE. ANTON H. NARROW, Memphis, Tenn. Filed Jan. 30, 1925. Serial No. 5,815. 7 Claims. (Cl. 29—69.)



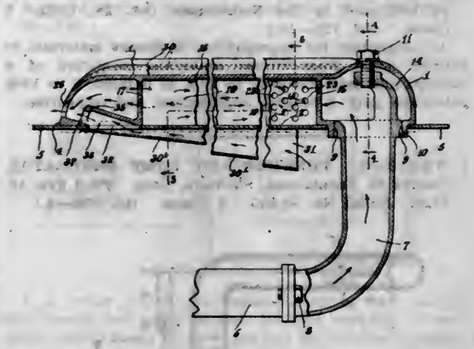
1. A folding gauge comprising a supporting bar, spaced blocks on the supporting bar, a straight edge pivoted to one of said blocks for movement into and out of parallel relation to the supporting bar, said straight edge having one end reduced to receive one of said blocks, and a toggle for locking the straight edge in position at right-angles to the supporting bar, substantially as set forth.

1,633,997. MANUFACTURE OF VAT DYESTUFFS. PAUL NAWIASKY, Ludwigshafen-on-the-Rhine, KARL ZAHN, Hochst-on-the-Main, and KARL SAURWEIN, Ludwigshafen-on-the-Rhine, Germany, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany, a Corporation of Germany. Filed Nov. 23, 1925, Serial No. 71,020, and in Germany Dec. 13, 1924. 3 Claims. (Cl. 260—61.)



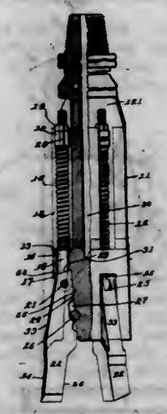
3. As a new article of manufacture a vat dyestuff which can be obtained by acting on Bz-1-chlor-Bz-2-methoxy-benzanthrone with an alkaline condensing agent and which dissolves in concentrated sulfuric acid with a claret red coloration and dyes cotton from a blue vat blue shades which by oxidation turn to a bright greenish blue.

1,633,998. DEVICE FOR THE SIMULTANEOUS OBTAINMENT OF THE COMPRESSION AND THE CIRCULATION OF GASEOUS MIXTURES. GEORGES LÉON EMILE PATART, Paris, France. Filed Jan. 14, 1925, Serial No. 2,445, and in France Jan. 17, 1924. 3 Claims. (Cl. 230—183.)



1. A device for effecting the compression and the circulation of gaseous mixtures, comprising a compressor having a plurality of cylinders in series, a circulation pump whereof the cylinder is contiguous to the cylinder of the compressor which operates under the maximum pressure and the piston is secured to the piston of the said compressor, the discharge conduit of the cylinder of the high pressure compressor opening into the discharge conduit of the pump, piping connecting together the suction conduits and the delivery conduits of the said pump, and controlling means provided in the said piping whereby the output of the said circulation pump may be varied without any change in the operation of the compressor.

1,633,999. ELASTIC TIRE. CURT RISSBACK, Berlin-Friedenau, Germany. Filed Nov. 3, 1922, Serial No. 598,732, and in Germany Nov. 17, 1921. 3 Claims. (Cl. 152—28.)

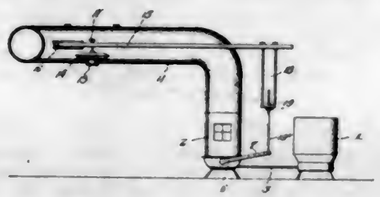


2. An elastic tire having a yielding tread, a plurality of tensioning means, means whereby said tensioning means are supported within the tread, a rigid ring and mechanism to provide resilient resistance between the tire and the ring, varying in magnitude with the angular position of the said ring, said means including a cam and a pair of arms having a resilient cushion therebetween.

1,634,000. EXHAUST MANIFOLD AND MUFFLER. WILLIAM F. SMITH, Poughkeepsie, N. Y., assignor of one-half to Herman A. Schatz, Poughkeepsie, N. Y. Filed Jan. 12, 1925. Serial No. 1,904. 4 Claims. (Cl. 137—160.)

1. In an exhaust manifold for internal combustion engines, a casing having cooling fins on one side thereof and an air duct on the other side thereof, two baffle plates projecting from opposite side walls partly across said casing, two longitudinal walls between said baffle plates and substantially parallel with the side walls of the casing, one of said longitudinal walls being provided with apertures only near one and the other only near the other baffle plate, an exhaust gas intake port between one of said baffle plates and the rear wall of said casing, and an exhaust gas exit port in the front wall of said casing.

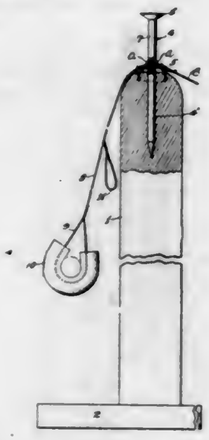
1,634,001. UNDERREAMER. EDWARD TIMBS, Los Angeles, Calif., assignor to Union Tool Company, Torrance, Calif., a Corporation of California. Filed Aug. 4, 1923. Serial No. 655,678. 5 Claims. (Cl. 255—75.)



1. An underreamer comprising a body provided in its peripheral face with longitudinally extending open grooves and cutter pockets in one end, there being holes connecting the grooves and pockets, mandrels extending from

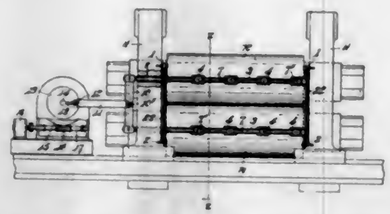
the grooves through the holes, springs in the grooves surrounding the mandrels, nuts on the mandrels to retain the springs, and cutters collapsibly mounted in the pockets and pivotally connected with the mandrels, and cooperating means on the mandrels and walls of the grooves to guide the mandrels.

1,634,002. COMPOSITION FOR IMPREGNATING FIBROUS MATERIALS. WILLEM TOM, Katwijk aan Zee, Netherlands. Filed Nov. 1, 1926, Serial No. 145,696, and in the Netherlands Oct. 28, 1925. 1 Claim. (Cl. 134—15.)



A composition for impregnation of fibrous materials or articles made from fibrous materials consisting of a homogeneous mixture of 15 to 30% of paraffin, 6 to 15% petroleum jelly, 3 to 10% naphthalene, and turpentine.

1,634,003. THERMOSTATIC LAMP REGULATOR. GEORGE M. TROLLINGER, Shelburn, Oreg. Filed Feb. 16, 1926. Serial No. 88,645. 1 Claim. (Cl. 236—4.)

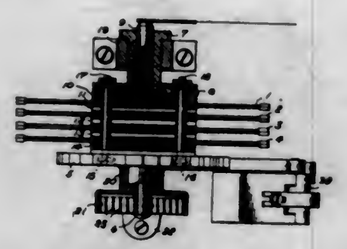


An adjustable connector adapted to be interposed between a thermostatically controlled lever and a lamp controlling lever comprising a U-shaped bail having a bight portion, a rod slidable through the opening, and a nut threaded on the rod to engage the bight portion so that the rod may be adjusted in relation to the bail, said bail adapted to be connected with one lever and said rod adapted to be connected to the other lever.

1,634,004. UNIVERSAL FRUIT-TREE PROP-LINE SUPPORT. JOHN L. UHLIK, Los Angeles, Calif. Filed Jan. 16, 1923. Serial No. 612,942. 1 Claim. (Cl. 85—10.)

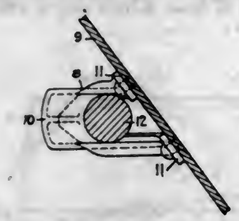
In a device of the character described, a spike having a head, said spike being adapted to be driven into a standard, an integral cup shaped flange arranged to penetrate the material of the standard to serve as a ferrule for the end of said standard; the head of said spike being spaced from said flange to form an elongated shank adapted to receive one end of a supporting line.

1,634,005. ROLL POLISHER. HENRY D. WEISGERBER, Wheeling, W. Va., assignor, by direct and mesne assignments, of one-fourth to V. P. Wendle and one-fourth to L. W. Rose, Dover, Ohio. Filed Dec. 9, 1925. Serial No. 74,321. 4 Claims. (Cl. 80—1.)



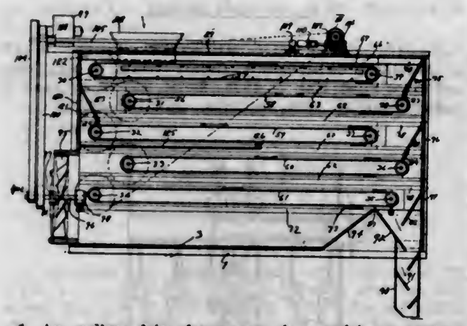
4. In a roll polisher, pivotally mounted levers, bars disposed in parallelism to the rolls and supported by said levers, holders slidable upon said bars, abrasive blocks carried by said holders, longitudinally reciprocable rods attached to said holders, means for reciprocating said rods, and tension means attached to said levers whereby the latter are caused yieldingly to hold said bars advanced to positions wherein said holders present said blocks in yielding contact with the rolls.

1,634,006. DRY CELL. VICTOR YNGVE, South Orange, N. J., assignor, by mesne assignments, to National Carbon Company, Inc., New York, N. Y., a Corporation of New York. Filed Jan. 12, 1925. Serial No. 1,922. 3 Claims. (Cl. 136—139.)



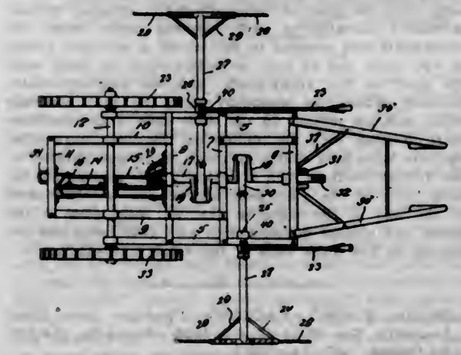
1. The method of preparing dry cell mixture which consists in milling together separate dry depolarizing and carbonaceous materials and a salt, and then adding to the milled product electrolyte.

1,634,007. AUTOMATIC SWITCHING SYSTEM. FRITZ ALDENDORFF, Wilmersdorf, near Berlin, Germany, assignor of one-fourth to Paul Kollsch, New York, N. Y. Filed Jan. 29, 1923, Serial No. 615,627, and in Germany Feb. 2, 1922. 10 Claims. (Cl. 179—27.5.)



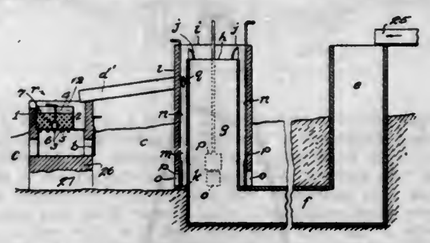
1. A switch comprising bank contacts, brushes adapted to glide in a continuous motion over any desired number of said bank contacts, a continually acting power device tending to move said brushes, an arresting means both for holding the brushes in an initial position against the action of said power and for positively stopping the power-driven brushes on any desired bank contact.

1,634,008. RAILWAY CAR. HARRY T. ANDERSON, Butler, Pa. Filed Jan. 8, 1925. Serial No. 1,295. 3 Claims. (Cl. 105—247.)



1. The combination with a railway car body, of an impact receiving member secured thereto, comprising a base portion and a nose portion, the said member being provided with a recess for the reception of a shaft intermediate the nose portion and the base portion.

1,634,009. ENDLESS DRIER FOR MACARONI. GIUSEPPE BAGNANI, San Francisco, Calif. Filed Feb. 15, 1926. Serial No. 88,256. 2 Claims. (Cl. 34—12.)

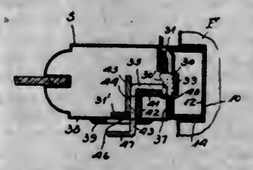


1. An endless drier for macaroni comprising a casing, a series of endless screen belts mounted therein, grooves in both sides of the casing above each belt, slides in said grooves, brushes carried by said slides and adapted to bear on the tops of said belts adjacent the edges thereof, a fan in one end of said casing and means to drive said fan and said endless belts.

1,634,010. COTTON CHOPPER AND WEEDER. EDWIN WORTH BEASLEY, Durham, N. C. Filed Dec. 3, 1926. Serial No. 152,422. 3 Claims. (Cl. 97—18.)

1. In a device of the class described, including a frame, wheels on the frame, a crank shaft journaled longitudinally of the frame, means for imparting intermittent rotation through the crank shaft from the wheels, supporting members depending from the frame, levers pivoted on the supporting members, bearings pivoted on the levers, shanks slidable through the bearings laterally of the machine, blades on the outer ends of the shanks, and connecting rods engaging the inner ends of the shanks and the cranks of the crank shafts.

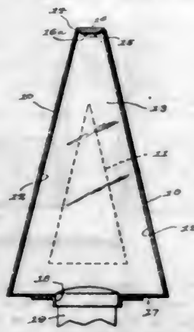
1,634,011. IRRIGATING AND MINING WATER METER. GEORGE W. BEATTIE, Highland, Calif. Filed Sept. 16, 1922. Serial No. 588,712. 5 Claims. (Cl. 73—167.)



1. A water meter comprising a stilling box having inlet means and outlet means, the flow capacity of said outlet means being in such relation to the flow capacity of the inlet means that liquid will raise to a height above the outlet means sufficient to cause the flow through the outlet means to equal the flow through the inlet means; means to regulate the outflow to cause the water to rise to a predetermined level in said stilling box; and means extending below the predetermined water level adapted to prevent whirlpool effects, said outlet means arranged above an open air chamber.

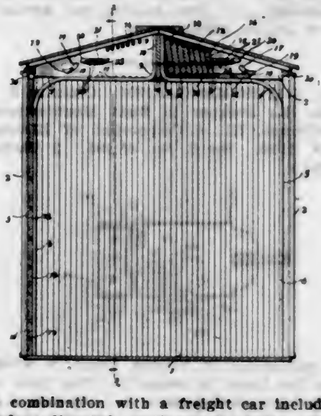
1,634,012. PROCESS OF WEIGHTING FIBERS. OLAV BERG, Paterson, and MAX IMHOFF, Clifton, N. J. Filed Feb. 25, 1926. Serial No. 90,701. 7 Claims. (Cl. 8—13.)

7. A step in the process for weighting silk fabrics which comprises treating silk fabrics with a weak solution of acetic acid, treating the fabrics with a solution of lead acetate, and then treating the fabrics with a solution of sodium phosphate.



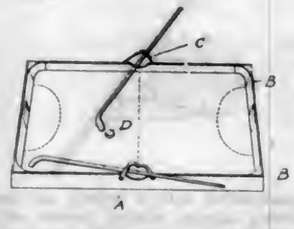
1,634,013. LATCH MECHANISM. CHARLES F. BOUCEK, Chicago, Ill., assignor to Ruda Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 18, 1926. Serial No. 88,995. 2 Claims. (Cl. 292—254.)

1. In combination, a window frame, a window sash hinged to the frame to swing to either open or closed position, a latch plate member on said sash, a yieldable latch tongue projecting into the path of said latch plate member when said sash is moved to closing position, cooperation of said latch plate member with said latch tongue causing first inward shift of said latch tongue and then release thereof into position in front of the latch plate member to thereby lock the sash in closed position, a key member shiftable on said latch plate member in a direction at right angles to said sash, said latch tongue and key member having wedging surfaces



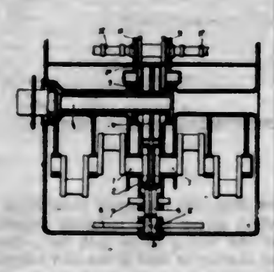
adapted to co-operate upon movement of said key member in inward direction to cause the latch tongue to be shifted away from the path of said latch plate member whereby to permit opening of said sash, said wedging surfaces co-operating when said sash is being closed to shift the key member in outward direction to permit locking engagement of said cam plate with said tongue.

1,634,014. MOTOR-VEHICLE SIGNAL. SAMUEL L. BRAYMAN, New York, N. Y. Filed May 13, 1926. Serial No. 108,952. 2 Claims. (Cl. 40—132.)



1. In a signaling device, the combination with a flashlight, of a truncated casing having openings simulating the human hand, disposed in the opposite faces thereof, and a second set of openings in the sides of said casing, the apex of said casing being apertured to permit the passage of light from said flashlight therethrough and there being an aperture arranged in the base of said casing for the reception of said flashlight, and means adapted to seat within and close the first-mentioned aperture, said means being rabbetted to engage the sides of said aperture to assure a snug fit.

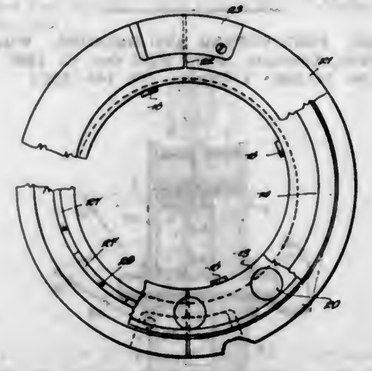
1,634,015. GRAIN DOOR FOR FREIGHT CARS. NORRIS E. BRAY, Kimball, S. Dak. Filed July 14, 1926. Serial No. 122,432. 5 Claims. (Cl. 20—32.)



1. The combination with a freight car including transverse girders disposed at the roof of the car and extending between the sides of the opposite door openings, door sections adapted to extend across the respective door openings in superposed relation and to move into a position between the girders, elements at the lower edges of the girders to deflect the door sections moving thereover into approximately upright positions, and means on the girders to engage the sections and retain them in such approximately upright positions.

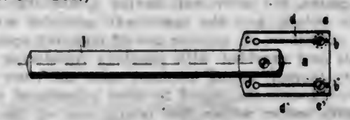
1,634,016. APPARATUS FOR PLAYING A TABLE GAME OF HOCKEY. EDWIN ORMOND BROWN, West Croydon, England. Filed Oct. 14, 1926, Serial No. 141,652, and in Great Britain Jan. 8, 1926. 2 Claims. (Cl. 273—85.)

1. Apparatus for playing a table game comprising a board having raised sides and ends and representations of goals at the ends, said board being marked to represent a hockey field, a disk adapted to slide freely upon said board, recesses in the side walls of the board, sticks adapted to project over the board and lie within said recesses for moving said disk over the board and flexible closures to said recesses to limit the usage of said sticks.



1,634,017. INTERNAL-COMBUSTION ENGINE WITH INCLINED CYLINDERS. GIULIO CESARE CAPPA, Turin, Italy. Filed Mar. 5, 1925, Serial No. 13,276, and in Italy Mar. 12, 1924. 1 Claim. (Cl. 123—55.)

An internal combustion engine of the V-type comprising a two-part crank-shaft mounted in the plane bisecting the angle formed by the two rows of the engine cylinders, a single gear in the middle cross plane of the engine connecting the two parts of the crank-shaft, a driving-shaft mounted above the crank-shaft parallel to and in the same vertical plane of the latter, a single reducing gear centrally mounted on the driving-shaft in mesh with the gear on the crank-shaft, separate secondary-shafts mounted in said bisecting plane below the crank-shaft and parallel to the latter, a separate pinion on the inner end of each secondary-shaft in mesh with the gear on the crank-shaft, separate auxiliary-shafts mounted below the secondary-shafts in said bisecting plane, separate pinions on the inner ends of the auxiliary shaft in mesh with the pinions on the secondary-shafts, separate valve-gear shafts mounted above and parallel to the driving shaft in said bisecting plane, pinions on the inner ends of the valve-gear shafts, gear teeth formed on the hub of the reducing gear on both sides of the latter, and pinions meshing with said gear teeth and the pinions on the inner ends of the valve gear shafts.

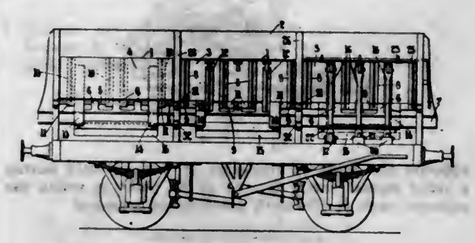


1,634,018. PISTON PACKING. CHARLES LEE COOK, Louisville, Ky. Filed June 8, 1926. Serial No. 114,538. 10 Claims. (Cl. 74—109.)

1. A piston packing comprising a bull ring formed of separable sections, an expansible packing ring associated with each section, and a plurality of separately removable and insertible holding elements of material softer than the bull ring sections and packing rings and interposed between portions thereof, said holding elements being

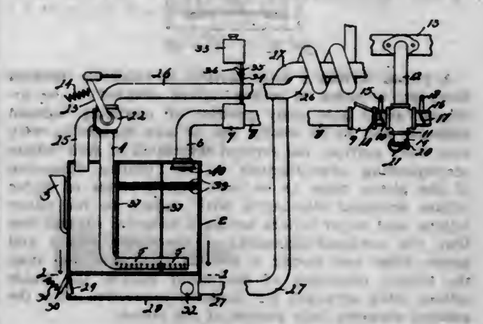
deformed by being compressed between said portions of the sections and packing rings due to the expansion of the packing rings.

1,634,019. CALIPER. HENRI COULLERY, La Chaux de Fonds, Switzerland. Filed Mar. 19, 1923, Serial No. 626,150½, and in Switzerland Mar. 21, 1922. 2 Claims. (Cl. 33—163.)



1. A caliper gage having a slot intersecting one of its edges, a conical shaped wedge, a beveled seat for said wedge, the axis of said seat and said wedge coinciding with the median line of said slot, and means for drawing said wedge into said seat for increasing the length of the intersected edge.

1,634,020. STEAM BOILER. CHARLES WAKEFIELD CROWELL, Salisbury, N. C. Filed Mar. 1, 1921. Serial No. 448,863. 8 Claims. (Cl. 122—42.)

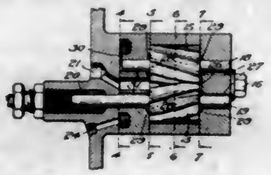


4. A cylindrical boiler, a cylindrical fire box therein having its longitudinal central axis disposed below the longitudinal central axis of the boiler, a head closing one end of the boiler, a tube sheet at the opposite end thereof and forming one wall of a smoke box disposed in advance of the boiler, the bottom of the boiler and fire box, adjacent one end, being cut away to provide a grate opening, a mud frame around said grate opening and attached to the edges of the opening in the fire box and boiler whereby the bottom of the fire box is on a level with the top of the mud frame, a bridge wall extending up from the bottom of the fire box and intermediate the ends thereof, water tubes extending longitudinally through the fire box and through the tube sheets thereof and disposed in the upper portion of the fire box, and fire tubes extending through the front tube sheets of the boiler and fire box respectively and communicating with the smoke box and fire box respectively and disposed in the lower portion of the fire box.

1,634,021. VEHICLE. EUGENE CURRAN, Cardiff, and JOHN JOSEPH HICKEY, Llanishen, near Cardiff, Wales. Filed Sept. 4, 1925, Serial No. 54,569, and in Great Britain June 30, 1925. 12 Claims. (Cl. 105—251.)

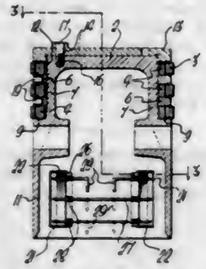
1. In a vehicle, a frame, a bottom formed in two parts, said parts constituting the full area of the bottom transversely of the vehicle, one part sloping down from the side of the vehicle to the middle, and the other part being hinged relatively to the first mentioned part, said hinged part being adapted to be held symmetrically with or in line with said first mentioned part, and a strut pivotally mounted to the free edge of the hinged member and adapted to rest on said frame to support said part in the symmetrical position.

1,634,022. COMBINED TANK AND CARBURETOR. HARRY DALTON, Sr., Philadelphia, Pa. Filed Nov. 15, 1920. Serial No. 424,325. 1 Claim. (Cl. 261—124.)



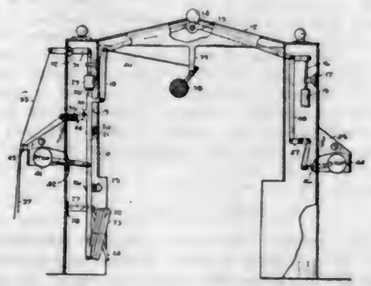
The combination with a fuel tank, partitions dividing the same into compartments, said compartments communicating at their lower corners beneath the fuel and at their upper corners above the fuel, of a heating compartment beneath the tank, warm air conduits entering the tank from the top of one of the compartments, with the lower portion of one of the conduits passing through the partitions at the bottoms thereof, said lower portion of this conduit having perforations within those compartments adjacent that through which the conduit enters, the other conduit extending above the fuel within the tank with its extremity terminating remote from the top of the tank, an exit pipe communicating with that compartment remote from that receiving the warm air conduits, and means connected to the exit pipe and warm air conduits for controlling the flow therethrough.

1,634,023. PUMP. CLARENCE MARION DAVISON, Baltimore, Md., assignor to Poole Engineering & Machine Company, Baltimore, Md., a Corporation of Maryland. Filed Mar. 15, 1926. Serial No. 94,894. 12 Claims. (Cl. 230—141.)



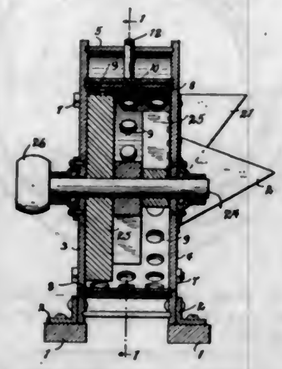
1. In a pump, the combination with the pump chamber casing, of intermeshing spirally cut gears, means for introducing the pump fluid into spaces between inter-

meshing teeth at one end of the gears, means for introducing a sealing liquid into said spaces, and end plates enclosing the ends of the gears, the plate at the end



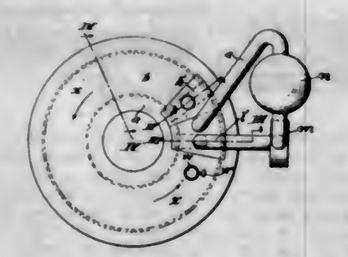
opposite the point of admission of pumped fluid having a relief recess therein located at the point at which the adjacent ends of the teeth are fully intermeshed.

1,634,024. PISTON. GEORGE SEXTON EVANS, Middle Brighton, Victoria, Australia. Filed Nov. 18, 1925, Serial No. 69,883, and in Australia June 24, 1925. 1 Claim. (Cl. 74—108.)



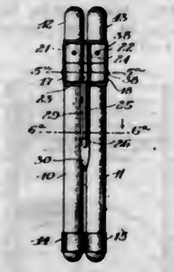
A piston having a body portion of relatively reduced diameter, a series of minor collars adapted to be arranged about said body portion of relatively reduced diameter and to be wholly free of any connection with such body portion, the vertical dimension of said collars corresponding approximately to the similar dimension of the piston rings to be used, and a series of major collars arranged alternately with respect to the minor collars, said major collars having a diameter slightly less than the combined diameters of the minor collars and piston rings and having a vertical dimension less than the similar dimension of the minor collars, the major collars being arranged for threaded connection with the reduced diameter body portion of the piston.

1,634,025. AUTOMATIC GATE. RUPERT IGNATIUS FARRELL, Montreal, Quebec, Canada. Filed Feb. 10, 1926. Serial No. 87,236. 4 Claims. (Cl. 39—27.)



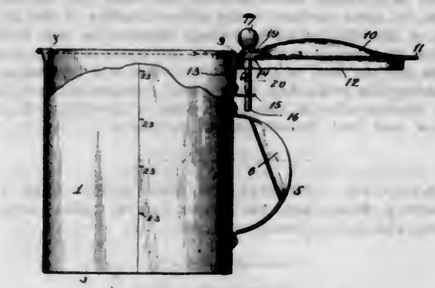
1. In a gate, a plurality of crossed bars pivotally secured to operate in lazy tong fashion, an anchoring bracket pivotally secured to an end bar of said gate, a vertical lever pivotally secured to the coacting end bar, a latch mechanism connected with said lever, a weight bearing on the lever, a pivoted cross arm operatively connected with said lever, and a weight connected with said cross arm.

1,634,026. FEED CUTTER AND GRINDER. WILLIAM E. FRITZ, Indianola, Nebr. Filed Oct. 12, 1926. Serial No. 141,195. 4 Claims. (Cl. 142—122.)



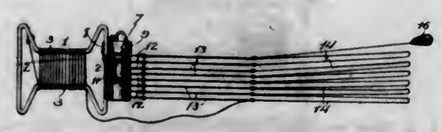
4. A machine of the character specified comprising side plates, inner and outer circular walls clamped between the side plates, the outer wall having a discharge opening in its bottom and the inner wall provided with a plurality of outlets, an annular cut-off mounted upon the inner wall and provided with openings registering with the outlets thereof, means mounted upon the outer wall and connected with the cut-off to effect adjustment thereof, a rotary cutter within the casing, one of the side walls having upper and lower feed openings, hoppers associated with the respective feed openings, and a hinge valve in the lower hopper and normally closing the same and free to swing inward at its lower end.

1,634,027. FURNACE FOR THE HEAT TREATMENT OF PULVERULENT, GRANULAR, OR PULPY MATERIAL. LUDWIG HONIGMANN, Bad Tolz, and FRIEDRICH BARTLING, Munich, Germany. Filed Oct. 16, 1925, Serial No. 62,832, and in Germany Oct. 8, 1924. 5 Claims. (Cl. 263—35.)



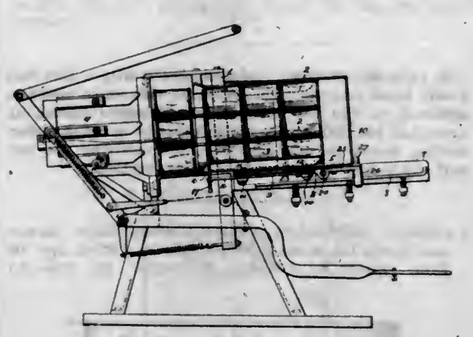
1. A furnace for the heat treatment of pulverulent, granular or pulpy material comprising an annular furnace chamber, a rotatable hearth in said chamber to continuously transport the charging material from a charging point to a discharging point, and means for supporting and rotating said hearth, said hearth having annular projections on its upper surface to form grooves within which the charging material is placed, and means to remove the dried material from said grooves individually.

1,634,028. RECEPTACLE OR CASE FOR THERMOMETERS. GEORGE B. IRELAND and ROE T. SOULE, Rochester, N. Y., assignors to Taylor Instrument Companies, Rochester, N. Y., a Corporation of New York. Filed Jan. 16, 1925. Serial No. 2,867. 3 Claims. (Cl. 206—16.5.)



1. In a device of the class described, a container unit defining two sections, a closure unit defining two cap sections, a slidable connection between the two units, symmetrically disposed relatively to the sections of each unit, said connection permitting relative axial and rotary movement of the units, and means for acting upon the sliding connection, when the closure unit is in closing position, to resist disengagement of the units.

1,634,029. FOOD CONTAINER. JOE KORKAMES, Temple, Tex. Filed June 21, 1926. Serial No. 117,512. 4 Claims. (Cl. 220—33.)



4. The combination with a portable container body and a cover, of a bracket secured to the body, a spindle secured to the cover and supported by said bracket for rotary and longitudinal movement, and a handle secured to the cover under said bracket and spindle, whereby the user when grasping the handle, may apply upward pressure to the spindle to raise the cover.

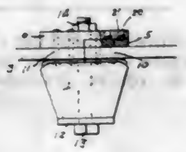
1,634,030. FISHING LINE. JOE KORKAMES, Temple, Tex. Filed Sept. 22, 1926. Serial No. 137,057. 5 Claims. (Cl. 43—31.)

1. A fishing-line holder comprising a reel provided with a hook-receiving housing at one end, said housing being disposed in angular relation to the longitudinal axis of the reel, and means within the housing to maintain hooks received therein in radial relation to the housing and prevent withdrawal thereof through the side of the housing.

1,634,031. MACHINE FOR BOXING OR CASING CANS. ALBERT H. KYLER, Westminster, Md. Filed July 6, 1926. Serial No. 120,742. 9 Claims. (Cl. 226—15.)

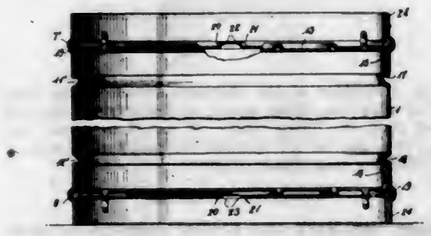
1. In a machine of the character described, the combination with box filling means, and a carriage movable to and from the filling means, of means to permit the tilting of a box on the carriage for facilitating removal of a filled box from the carriage.

1,634,032. NECKTIE AND LINING THEREFOR. HUGO LEONI, New York, N. Y., assignor to Super-Rubber Lining Corporation, New York, N. Y., a Corporation of New York. Filed Dec. 23, 1926. Serial No. 156,659. 10 Claims. (Cl. 2—146.)



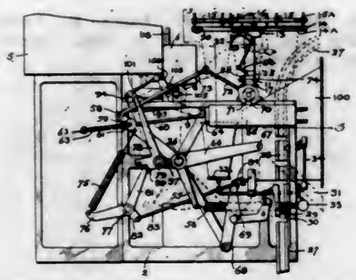
1. A necktie including a body material, a strip of uncreasable elastic material stretchable in all directions and means allowing for and limiting the stretch of the same in the direction of the length of the tie.

1,634,033. BELT SPLICER. DARCY E. LEWELLEN, Columbus, Ind. Filed May 3, 1926. Serial No. 106,256. 6 Claims. (Cl. 24—37.)



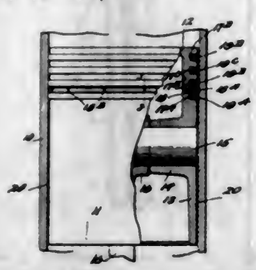
1. In a belt splicer, the combination with a belt and a belt block associated therewith, of a pair of members at the meeting ends of the belt, means interlocking with said members for holding them in fixed position, and means for locking said parts together.

1,634,034. BELT FASTENER. DARCY E. LEWELLEN, Columbus, Ind. Filed May 3, 1926. Serial No. 106,257. 7 Claims. (Cl. 24—37.)



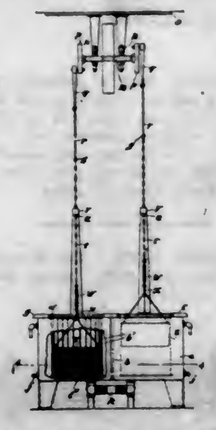
1. In a belt fastener, the combination with a belt, and a belt block associated therewith, of transverse members attached to said belt, one of said members having an extension adapted to span the adjacent member, interlocking means on the extension, for receiving the belt pull and means for locking said parts together.

1,634,035. METALLIC KEG. EDWARD DEAN MAHAN and JAMES IRA MAHAN, Pittsburgh, Pa. Filed Apr. 10, 1924. Serial No. 705,507. 5 Claims. (Cl. 220—5.)



1. A metallic receptacle, comprising a body portion provided with longitudinal interlocking means, said body portion being normally of a substantially semi-circular shape, but said body portion being adapted to be sprung into substantially a circular formation and being retained in such position by the engagement of said interlocking means, a closure removably positioned within each end of the body, and means in each end for retaining the closures in place and for preventing relative longitudinal shifting of the engaged interlocking means.

1,634,036. DRINK-DISPENSING MACHINE. JAMES HOWARD MCLELLAN, Vancouver, British Columbia, Canada. Filed July 6, 1925. Serial No. 41,721. 11 Claims. (Cl. 225—21.)

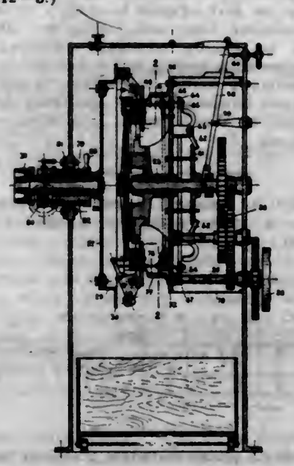


1. A drink dispensing machine comprising a motive power adapted to be set in motion, a cup delivery recess, having a rear opening, a liquid valve, means for supporting a cup adjacent thereto, means as the motive power is set in motion for discharging liquid into the cup, means for moving the filled cups horizontally through the rear opening into the cup, and for depositing another cup adjacent liquid valve after delivery.

1,634,037. PISTON. WELLINGTON W. MUIR, Lockport, N. Y. Filed Nov. 19, 1926. Serial No. 149,479. 4 Claims. (Cl. 74—108.)

1. In an internal combustion engine, the combination of a cylinder, a hollow piston arranged therein and having a head and an integral depending skirt, said skirt having a wrist pin bore therein extending transversely thereof, the outer surface of said skirt having a circumferential groove therein above said wrist pin bore, said skirt also having a second circumferential groove therein above said first groove, said grooves being disposed relatively close to each other to provide a narrow rib therebetween which is integral with the skirt, a packing ring in each of said grooves, said narrow rib having a plurality of relatively small openings extending therethrough from its outer surface to the hollow interior of the piston, a plurality of packing rings disposed in said skirt above said second named groove, the space between said skirt and the wall of the cylinder below said first named packing ring being free from direct communication with the interior of said piston, whereby accumulation of oil below said first named ring is prevented.

1,634,038. DISHWASHING MACHINE. JOHN J. OWENS, Blacksburg, Va. Filed July 9, 1925. Serial No. 42,510. 2 Claims. (Cl. 141—9.)

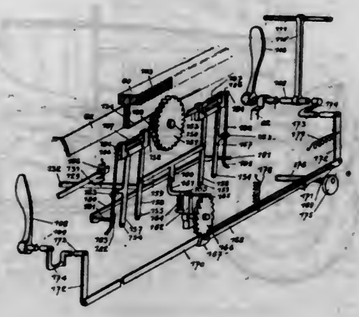


1. A dish washing machine comprising a tank for containing water, a plate secured to the upper edge of the tank and provided with an opening and a counter-sink surrounding the opening, a disk carrying receptacle cage arranged in the tank, including a rim which rests in the counter-sink, vertical guide bars depending from said rim and having a foraminous bottom secured to said bars, a reciprocable dish carrying receptacle arranged in the cage and contacting with the latter and means for reciprocating said receptacle in said cage.

1,634,039. COMBINATION CLOCK AND SCALE. FITZ EDWARD FARKLER, Chicago Heights, Ill. Filed July 27, 1925. Serial No. 46,285. 4 Claims. (Cl. 265—68.)

1. In a scale mechanism, a frame; a scale standard vertically and reciprocatingly mounted through the frame, the said standard having a spindle slot formed laterally therethrough; a scale hand spindle passed through said slot and journaled in said frame; an equalizer bar pivoted horizontally upon the scale standard below and transversely to the scale hand spindle; means extended from the frame for resiliently and adjustably supporting the ends of the equalizer bar respectively; and means connecting the scale standard with the scale hand spindle for causing the latter to rotate under the reciprocatory movement of the former.

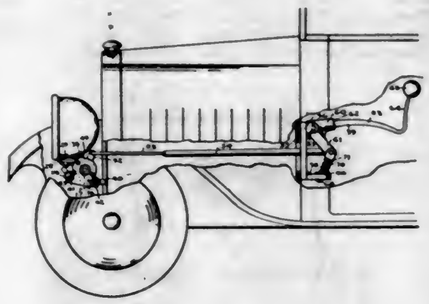
1,634,040. MACHINE FOR THE MANUFACTURE OF CORK TAPS. ARMANDO PARENTI and GIOVANNI BOLOGNINI, Genoa, Italy. Filed Aug. 29, 1924, Serial No. 734,971, and in Italy Sept. 6, 1923. 6 Claims. (Cl. 142—3.)



1. In a cork machine, a rotatable support, a stationary support, pivoted brackets carried by the rotatable support, cork clamping means carried by the brackets, abrading means arranged adjacent the rotatable support, means normally tending to swing the brackets into a position for causing the corks held in the clamping means to engage the abrading means, and means for retracting the bracket to displace corks from the abrading means, said retracting means including a plurality of cam plates, rods engaging the cam plates and movable thereover and connected with the brackets, means connecting the cam plates with the stationary support, and means for adjusting the cam plates with respect to the stationary support.

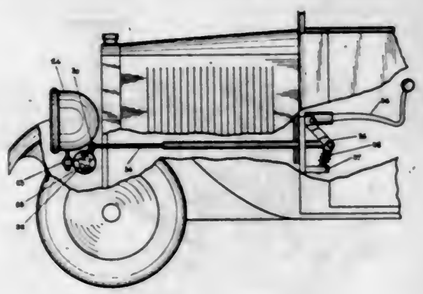
1,634,041. CHEESE MOLD. CHARLES PAULY, Port Washington, Wis., assignor to Pauly and Pauly Cheese Company, Manitowoc, Wis. Filed May 21, 1926. Serial No. 110,644. 1 Claim. (Cl. 100—55.5.)

A cheese mold comprising a bottom portion and a top portion arranged telescopically and adapted to compress a cheese between them, said top portion having a filling aperture and a removable plate covering said filling aperture, and having a positioning tongue adapted to be passed through said aperture and to engage a marginal portion adjacent such aperture.



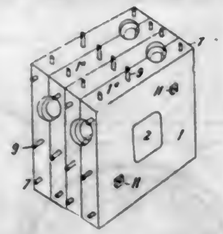
1,634,042. TYPEWRITER. HENRY PEETERS, Warcoing, Belgium. Filed Feb. 20, 1924, Serial No. 694,078, and in Belgium Dec. 21, 1923. 9 Claims. (Cl. 197—82.)

1. An escapement mechanism for typewriters, comprising a power driven carriage, a toothed escapement wheel constantly urged to rotate in one direction by the carriage, control means acting on the escapement wheel, release means normally restraining said control means and actuated by a key or the spacer bar to release the control means, the control means holding the escapement wheel stationary until released by the release means, the control and release means automatically reimmobilizing the escapement wheel after the latter has turned through an angle corresponding to the desired movement



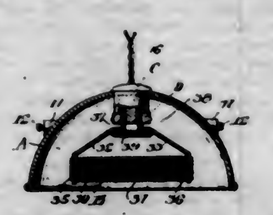
of the carriage, said release means including, a toothed cam wheel, means causing angular movement of the cam wheel upon depression of a key or the spacer bar, and an oscillatable lever having one end constantly in contact with the cam wheel.

1,634,043. VEHICLE HEADLIGHT. GEORGE PIERCE, Montreal, Quebec, Canada. Filed Oct. 31, 1924, Serial No. 747,067. Renewed Feb. 5, 1927. 9 Claims. (Cl. 240—61.)



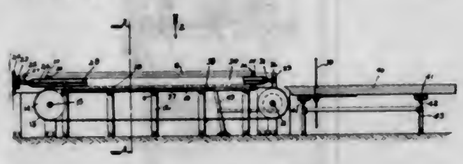
1. In vehicle headlights, a tubular mounting having the lamps clamped thereto, a bearing member for said tubular mounting including an aligning tube reduced at the ends and inserted into short tubes of greater outside dimensions than the aligning tube and spacing the inner wall of the mounting from the latter and extending from brackets adapted to be secured to the vehicle and lever mechanism for operating said mounting.

1,634,044. HEADLIGHT-DIPPING MECHANISM. GEORGE PIERCE, Montreal, Quebec, Canada. Filed May 29, 1925. Serial No. 33,779. 8 Claims. (Cl. 240—61.)



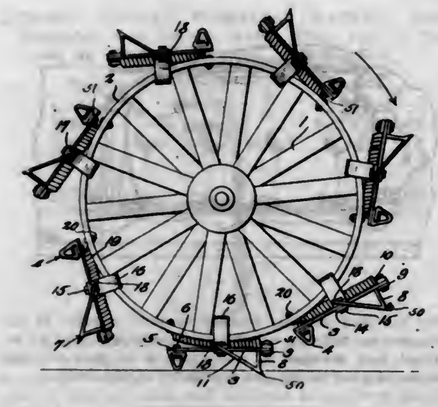
1. In a headlight dipping mechanism, a tubular lamp mounting having a cross slot, bearing brackets adapted to be secured to the vehicle frame, a tube having a cross slot and rigidly secured to said brackets and forming a bearing member for said mounting, a crank shaft inserted in said bearing member and having its crank member projecting through said slots, a lock mechanism secured to said mounting and said bearing member respectively and fixedly securing them in three selective positions in relation to one another, and an operating lever mechanism for selecting a first, second or third position and secured to said crank member.

1,634,045. APPARATUS FOR MAKING HOLLOW BENDS, ANGLES, OR SUCH LIKE BODIES OF CONCRETE OR OTHER MATERIAL. WILLIAM ALFRED PORTER, Brisbane, Queensland, Australia, assignor of one-half to William Valentine Scanlan, Brisbane, Australia. Filed June 30, 1926. Serial No. 119,729, and in Australia Aug. 26, 1925. 5 Claims. (Cl. 25—118.)



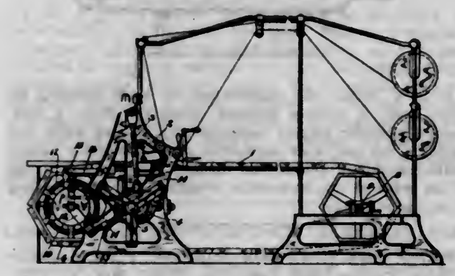
1. In improvement in apparatus for making hollow bends, angles or such like bodies of concrete or other material, the combination of mould boxes consisting of half moulds formed of the required shape held together by sectional covers and provided with a central feel hole as and for the purpose set forth and as herein described.

1,634,046. ELECTRIC HEATER. RUSSEL SUTHERLAND SMART, Ottawa, Ontario, Canada, assignor to Johnston, Dryden & Co., Incorporated, New York, N. Y., a Corporation of New York. Filed May 14, 1917. Serial No. 168,570. 3 Claims. (Cl. 219—34.)



1. In an electric heater, a heating coil, a two part socket having one part adapted to enter a screw socket for an incandescent lamp, and having the other part formed with an electric terminal, connecting means adapted to support the heating coil in advance of and extending transversely across the socket having sliding contact with the terminals thereof and being detachable from the socket by a pull exerted in a direction transverse of the coil.

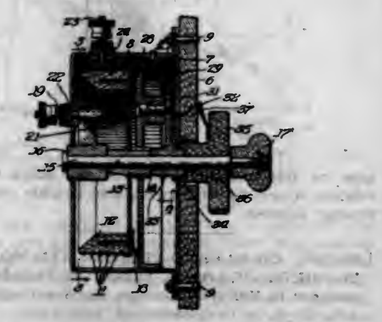
1,634,047. MOLD. GEORGE I. SMITH, Los Angeles, Calif. Filed June 4, 1925. Serial No. 34,820. 7 Claims. (Cl. 25—90.)



1. In a mold for plastic materials, a support, stationary side structures mounted thereon, movable wall structures movable upon the support, and inflatable members disposed between the stationary side structures and the movable wall structures.

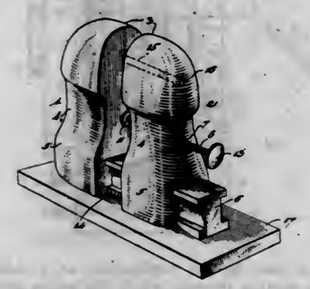
1,634,048. FLEXIBLE-TREAD WHEEL. WYATT C. STARR, Lake Wales, Fla. Filed Apr. 21, 1926. Serial No. 103,571. 3 Claims. (Cl. 305—13.)

1. In a device of the class described, a wheel including a rim having a circumferential groove, a tread member comprising a yoke, and a resilient connector disposed outside of the rim and extended longitudinally of the rim and so shaped in cross section as to fit in the groove of the rim, one end of the connector being attached to the tread member, and the other end of the connector being attached to the rim.



1,634,049. MACHINE FOR USE IN MAKING BOXES. ROSCOE STEELE, Rockaway, N. J., assignor to Wirebounds Patents Company, a Corporation of Maine. Filed Aug. 1, 1922. Serial No. 578,989. 6 Claims. (Cl. 1—8.3.)

1. A machine for use in making boxes comprising, in combination, a support for the box parts; fastener-setting mechanism; means to cause relative step-by-step progression between said mechanism and the box parts; means to vary the extent of said step movements; and a cam operated brake to lock the box parts and fastener-setting mechanism against relative movement during each interval between said step-by-step progression and while said interval occurs.

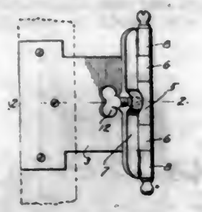


1,634,050. RHEOSTAT. WILLIAM S. SUTTON, Rockford, Ill. Filed Oct. 21, 1922. Serial No. 595,974. 4 Claims. (Cl. 201—56.)

1. In an instrument of the character described the combination of a casing, a shaft mounted therein having an element thereon to be rotated therewith in fine and coarse gradations of adjustment, an adjusting knob fixed to said shaft to communicate direct adjustment to said element, an arm rotatably mounted on the shaft, an operating knob connected to said arm, a gear carried by the arm, a pinion fixed with respect to said adjustable element

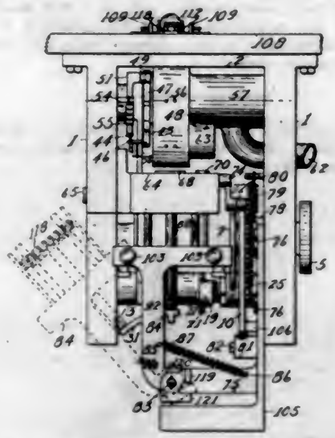
and meshing with said gear, and an internal gear mounted in said casing and meshing with said first mentioned gear, said last mentioned knob being arranged to communicate adjustment to said element indirectly through the transmission recited.

1,634,051. HAT STRETCHER. MAXWELL J. PARSCH, Detroit, Mich. Filed Oct. 16, 1922. Serial No. 594,848. 1 Claim. (Cl. 223—33.)



A hat stretcher comprising a base, a guide extending longitudinally of said base, a block fixed on said base at one end of said guide, a block slidable on said guide to and from said fixed block, said blocks having head and waist portions, a screw shaft disposed parallel to said guide and having one end held rotatably in the waist portion of the fixed block and the opposite end in screw-threaded engagement with the waist portion of the slidable block, and a dowel pin carried by the head of the fixed block and adapted to enter the head of the slidable block.

1,634,052. FRICTIONAL HINGE DEVICE. THEODORE J. RYAN and COMMODORE D. RYAN, Los Angeles, Calif. Filed June 21, 1926. Serial No. 117,320. 4 Claims. (Cl. 16—140.)

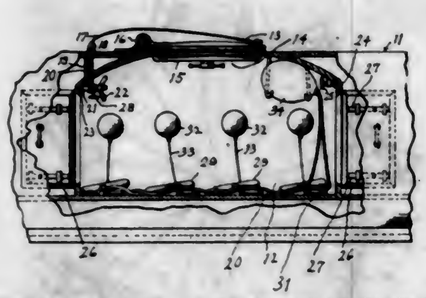


1. A friction hinge device comprising, in combination with a hinge having a pair of leaves provided with alternating knuckle portions whose openings are in alignment with one another, a member embracing the ends of the joint of said hinge and having end portions provided with openings in alignment with the openings in said knuckle portions, end pins engaging in said openings in said end portions and projecting into the end knuckle por-

tions, a loose pin extending within the openings of said knuckle portions between said first-named pins and means mounted on said embracing member and adapted to en-

gage an intermediate knuckle of the hinge to exert a relative lateral thrust between said knuckle and said embracing member.

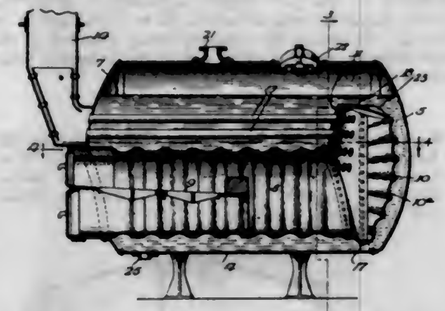
1,634,053. CIGAR-BAND FEEDING AND MOISTENING MACHINE. WALTER H. SCHUSSLER, Philadelphia, Pa., assignor to Universal Tobacco Machine Company, Newark, N. J., a Corporation of New York. Filed Jan. 29, 1924. Serial No. 689,224. 13 Claims. (Cl. 131—61.)



12. In a band feeding mechanism, an article support having an opening through which the bands are brought, a suction member to move the bands through said opening having suction ports, a band support, guides rotatably adjustable on said support, and means to effect relative movement of said member and said band support to bring the bands into the zone of suction of said member, and means to retain said band guides in their adjusted position.

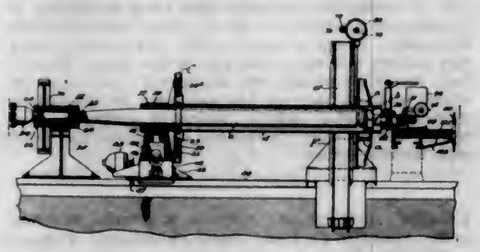
1,634,054. PETROLEUM-OIL COMPOSITION. ALBERT A. SOMERVILLE, Flushing, N. Y., assignor of two-thirds to R. T. Vanderbilt Company, Incorporated, New York, N. Y., a Corporation of New York. Filed June 19, 1926. Serial No. 117,191. 2 Claims. (Cl. 87—9.)

2. An improved petroleum oil composition having improved electrical properties comprising an oil suitable for electrical purposes having incorporated therewith a small amount of para-amido-phenol.



1,634,055. SUBMARINE LIFE-SAVING DEVICE. KUMAZO TANIGUCHI, Kingsburg, Calif. Filed Jan. 18, 1926. Serial No. 82,000. 5 Claims. (Cl. 114—16.7.)

1. In a device of the character set forth, a series of buoyant members each adapted to support a member of the crew upon the water, cables connecting the buoyant members to form a flexible raft, a relatively large float member at one extremity of the series of buoyant members in the series serving as container for drinking water, another buoyant member in the series serving as a con-

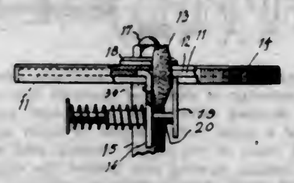


tainer for food rations, another buoyant member in the series serving to carry a light, and a compass, and an individual float member in connection with each buoyant member adapted to support a member of the crew.

1,634,056. STEAM BOILER. JAMES HALL TAYLOR, Oak Park, Ill. Filed Mar. 17, 1924. Serial No. 699,622. 7 Claims. (Cl. 122—149.)

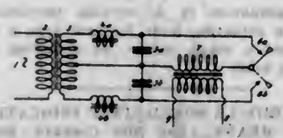
1. In a boiler, the combination of walls forming an outer shell, a furnace disposed inside the shell, a combustion chamber formed independently of said walls and having front and rear outwardly and spherically bulged walls marginally united, the furnace being joined to one of the walls of the combustion chamber, and flues leading from the chamber.

1,634,057. MACHINE FOR SHAPING PIPES. JAMES HALL TAYLOR, Oak Park, Ill. Filed Mar. 6, 1925. Serial No. 13,651. 40 Claims. (Cl. 153—15.)



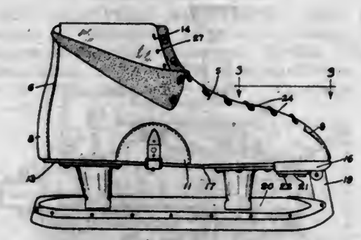
1. In a machine for shaping pipe, the combination of shaping mechanism, means for externally supporting one end of a pipe adjacent the shaping mechanism, means adjacent the supporting means for engaging substantially the entire inner periphery of the said one end of the pipe, and means for supporting the other end of the pipe.

1,634,058. DENTAL VIBRATORY MATRIX. TAKEO TERAGAWA, Los Angeles, Calif. Filed Dec. 6, 1926. Serial No. 152,930. 3 Claims. (Cl. 32—10.)



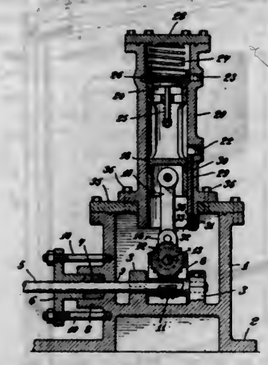
1. In a dental matrix, a plate member having a top face and a depending flange, a spring-actuated movable jaw in opposed relation to the depending flange, a cover slidable on the top face and mounted in opposed relation to the movable jaw, a handle for the plate member, and vibratory elements in the handle adapted for manual manipulation.

1,634,059. DENTAL VIBRATORY MATRIX. TAKEO TERAGAWA, Los Angeles, Calif. Filed Dec. 6, 1926. Serial No. 152,931. 3 Claims. (Cl. 32—10.)



1. In a dental matrix of the character set forth, a plate member having two apertures therein, depending flange portions adjacent to each aperture, a movable jaw mounted in opposed relation to each depending flange portion, springs normally urging the movable jaws to operative position, a cover mounted in the top of the plate member and having apertures to correspond with the apertures in the plate member, a handle for the plate member, and manually actuated vibratory elements mounted in the handle.

1,634,060. CARRIER-FREQUENCY TELEGRAPH SYSTEM. JOHANNES VOPEL, Berlin-Neukolln, Germany, assignor to C. Lorenz Aktiengesellschaft, Berlin-Tempelhof, Germany. Filed Jan. 5, 1926, Serial No. 79,298, and in Germany Jan. 20, 1925. 4 Claims. (Cl. 178—44.)

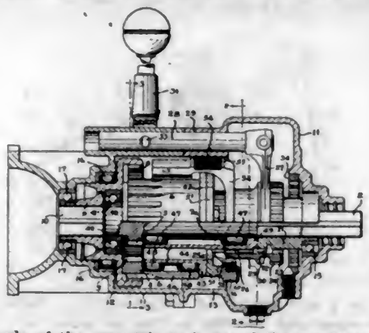


1. In a carrier frequency transmission system, in combination an alternating current source, a repeating transformer having its primary connected with said current source, a pair of circuits resonant to the carrier frequency and containing each one half of the secondary of said repeating transformer and a capacity, a double acting key in connection with the arrangement to connect alternately the one or the other of said pair of resonant circuits with a transmission line.

1,634,061. SKATER'S ARTICLE. WILLIAM W. WARNER, Middletown, Ohio. Filed June 22, 1926. Serial No. 117,858. 10 Claims. (Cl. 208—183.)

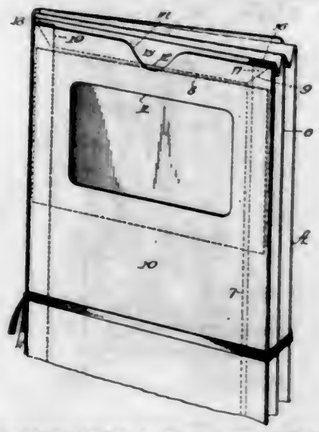
1. As a new article of manufacture, a protector for skate shoes and the like having an inner face bearing a heat insulating material, and comprising a soleless upper provided with a continuous bottom edge, and securing means at the front and center portions of its bottom edges for retaining said bottom edges adjacent the sole of a skate shoe.

1,634,062. COMPRESSOR APPARATUS. WILLIAM WILSON, Brooklyn, N. Y. Filed Apr. 28, 1926. Serial No. 105,273. 3 Claims. (Cl. 230—27.)



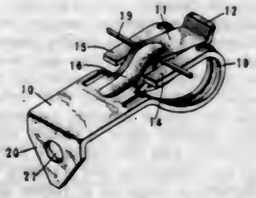
1. In a compressor apparatus, the combination of a compressor cylinder and a gear casing, said cylinder being suitably attached to and opening into said casing; said cylinder containing suitably situated suction and discharge pipe openings, and communicating channels contained within and forming an integral part of the said cylinder wall, and positioned between said suction pipe openings and the interior of said casing, each of said channels containing a one-way valve, whereby the fluid is permitted to flow from said casing towards said suction pipe openings.

1,634,063. TRANSMISSION GEARING. CHARLES E. F. AHLM, Cleveland, Ohio. Filed Oct. 16, 1924. Serial No. 743,911. 7 Claims. (Cl. 74—34.)



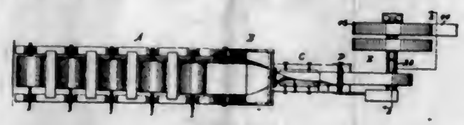
1. In combination a driving member and a driven member, a relatively stationary casing therefor, a pinion on the driving member, a revolving and circulating composite internal-external gear, an internal gear meshing with the external portion thereof and having a driving connection with the driven member, an eccentric bearing for the internal external gear, a dental clutch for connecting the eccentric with the casing to hold the bearing stationary and for connecting the eccentric bearing with the driving member to cause it to rotate therewith, and means including a centrifugal brake having counterweight

carried by and overhanging the eccentric bearing for counterbalancing said eccentric and for causing the rela-



tive speeds of the eccentric and one of the members with which it connects to approach zero before being clutched together.

1,634,064. FILE WALLET. EUGENE F. AHLQUIST, Minneapolis, Minn., assignor to Gaw-O'Hara Envelope Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 20, 1926. Serial No. 96,155. 5 Claims. (Cl. 129—1.)



1. A file wallet having a member comprising the top, one side, and the bottom thereof, flanges on said member at the top and one side integral with one another, the top flange having a diagonal fold at its juncture with the side flange at the corner, a front wall having side flanges bent inwardly against the side flange of said member, and the ends of the side flanges of the front wall lying beneath portions of the top flange of said member.

1,634,065. CONNECTER FOR ELECTRICAL CONDUCTORS. EDMUND R. BARANY, Brooklyn, N. Y. Filed Mar. 14, 1925. Serial No. 15,478. 7 Claims. (Cl. 173—209.)

7. A connecter for electrical conductors comprising a base portion, a part extending forwardly from the base portion and having its extremity bent outwardly, a second part extending forwardly from the base portion and having its end looped back toward the base portion and lying alongside of the first-named forwardly-extending part.

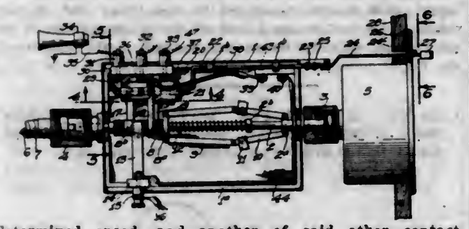
1,634,066. PROCESS OF TREATING TUBING AND APPARATUS THEREFOR. ADELMER M. BATES, Chicago, Ill., assignor to Bates Valve Bag Company, Chicago, Ill., a Corporation of West Virginia. Filed Jan. 19, 1925. Serial No. 3,437. 16 Claims. (Cl. 93—82.)

1. The process which consists in coiling tubing, having an adhered longitudinal seam, before the adhesive has set, with the seam side of the tube outward and supporting the coil from its axis while the adhesive is setting.

1,634,067. PROCESS AND APPARATUS FOR FORMING TUBES. ADELMER M. BATES, Chicago, Ill., assignor to Bates Valve Bag Company, Chicago, Ill., a Corporation of West Virginia. Filed Jan. 19, 1925. Serial No. 3,438. 15 Claims. (Cl. 93—20.)

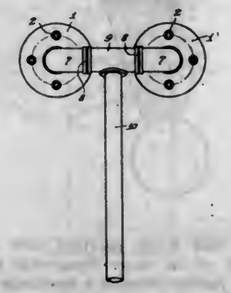
10. In apparatus for forming multi-ply tubes, means to feed a plurality of sheets of material into contacting superposed stepped relation to each other against the underside of a guide roller, means to apply adhesive to the stepped edges of the sheets beneath said roller, and means for folding upward and inward the edges of the superposed sheets to form a multi-ply tube.

1,634,068. CARRYING MECHANISM FOR ACCOUNTING MACHINES. JOSEPH BOYER, Detroit, Mich., assignor to Burroughs Adding Machine Company, a Corporation of Michigan. Filed Jan. 13, 1926. Serial No. 80,945. 14 Claims. (Cl. 235—137.)



1. The combination in a carrying mechanism of a carry arm, an actuating lever for said arm, a latch for said lever, and a single means for actuating both the lever and the latch.

1,634,069. VEHICLE SPEED-LIMIT INDICATING AND CONTROL MEANS. LEE ROY CONDRAY, San Diego, Calif. Filed Nov. 12, 1924. Serial No. 749,566. 8 Claims. (Cl. 175—355.)

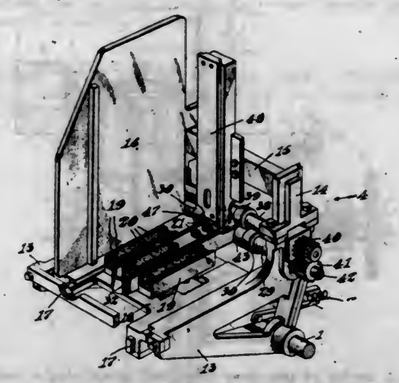


1. In a speed indicating and controlling means, a shaft, a centrifugal governor mounted on said shaft, a rotor reciprocally mounted on said shaft and controlled in its reciprocal movement by said governor and provided with an annular contact portion, a shiftable contact brush positioned in engagement with said rotor and adapted to be engaged by the contact portion thereof, a signal means connected with said contact brush, a lever means

connected with said contact brush adapted to variously shift the same relatively to the contact portion of said rotor, other contact brushes positioned in engagement with said rotor, one being positioned in engagement with the contact member of said rotor and adapted to be disconnected therefrom when said shaft is rotated at a pre-

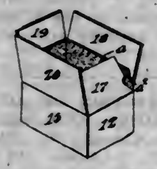
determined speed, and another of said other contact brushes being adapted to be engaged by the contact member of said rotor when said shaft is rotated at said predetermined speed, and an electro-magnet controlled butterfly valve of a fuel supply means connected with said last mentioned contact brush.

1,634,070. DOOR-HOLDING DEVICE. STEPHEN FRONRATH, Detroit, Mich. Filed Jan. 20, 1923. Serial No. 613,851. 1 Claim. (Cl. 292—338.)



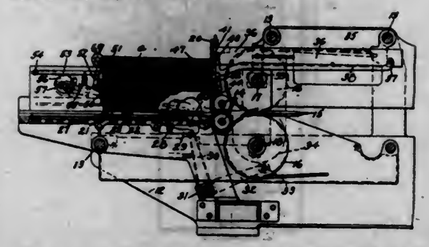
A door holding device comprising spaced apart socket members in a horizontal plane, elbows connected to said socket members and arranged with confronting ends in the same plane as the socket members, a connection between the confronting ends of said elbows, and a depending leg having its upper end pivotally supported by said connection and adapted to be swung upwardly at an inclination to the perpendicular.

1,634,071. REMOVABLE STOCKING SUPPORTER FOR LADIES' GARMENTS. PHILIP KUTZIK, New York, N. Y. Filed Mar. 22, 1926. Serial No. 96,422. 3 Claims. (Cl. 241—1.)



1. In a lady's garment of the character described channeled tabs provided along the lower edges, bands adapted to be passed through the tabs, means to secure the free ends of the bands loosely around the legs and a plurality of garter supports carried with the bands one adjacent each side of each of said tabs.

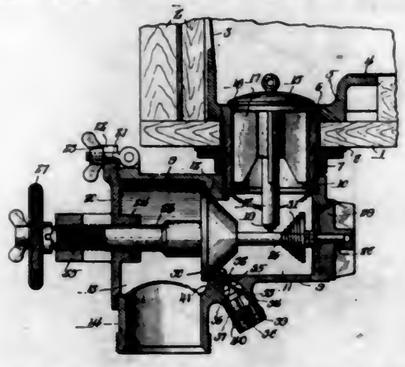
1,634,072. FLAT-FEED MECHANISM. LEON E. LA BOMBARD and MELVIN H. SIDEBOTHAM, Chelsea, Mass., assignors to Specialty Automatic Machine Company, Chelsea, Mass., a Corporation of Massachusetts. Filed July 6, 1925. Serial No. 41,611. 12 Claims. (Cl. 271—44.)



1. A blank feeder including in its construction a flat feeder mounted to reciprocate uniformly in a single plane, and means for preventing contact of any blank with the feeder during movement of the latter in non-feeding direction.

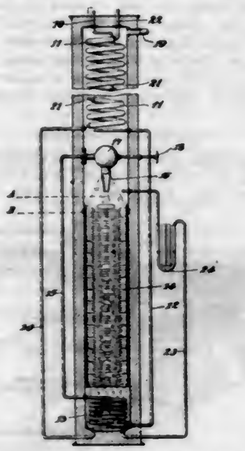
1,634,073. REENFORCED AND LEAK-TIGHT PAPER BOX. ELIE W. LABOMBARDE, Nashua, N. H. Filed Mar. 13, 1924. Serial No. 698,905. 1 Claim. (Cl. 229—49.)

A paper box blank cut and creased to provide foldable flaps and having strips of tough tear-resisting reenforcing material extending across the crease lines of the flaps, the entire areas of said strips being lightly glued to the blank whereby any portions of said strips may be pulled away from the blank without tearing the blank or the strips.



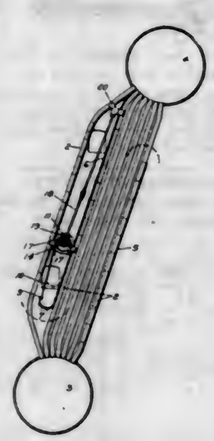
1,634,074. FEEDER FOR SHEET MATERIAL. HAROLD S. LABOMBARDE, Nashua, N. H. Filed Nov. 30, 1925. Serial No. 72,293. 5 Claims. (Cl. 271—44.)

1. A blank feeder having a hopper provided with an outlet at its front, means for forwarding blanks flatwise and singly from the bottom of a pile in the hopper



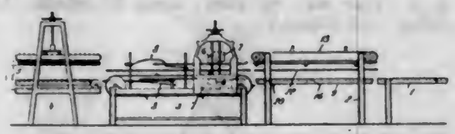
through said outlet, and means having a four motion operation for urging edge portions of the blanks downward, said urging means being located close to said front outlet.

1,634,075. VALVE. OLAF LARSEN, Fort Atkinson, Wis., assignor to The Creamery Package Mfg. Company, Chicago, Ill., a Corporation of Illinois. Filed Oct. 27, 1926. Serial No. 144,481. 5 Claims. (Cl. 277—1.)



5. A device of the class described, comprising a casing having a chamber with an inlet opening and an outlet opening and with an auxiliary opening intermediate of said inlet and outlet openings, valves controlling said inlet and outlet openings operable upon longitudinal axes in angular relation to each other, said valves having portions thereof extending into said chamber, one of said valves being operable with a screw movement and having a spiral cam on its extended portion adapted to operatively engage the extended portion of the other of said valves, and a valve normally closing said auxiliary opening having a portion extending into said chamber for engagement by one of said first mentioned valves whereby said auxiliary valve is opened when said inlet and outlet valves are closed.

1,634,076. LIQUEFACTION OF AIR AND SEPARATION INTO OXYGEN AND NITROGEN. EUGENE GEORGE LUENING, Chicago, Ill. Filed Nov. 3, 1924. Serial No. 747,402. 2 Claims. (Cl. 62—122.)

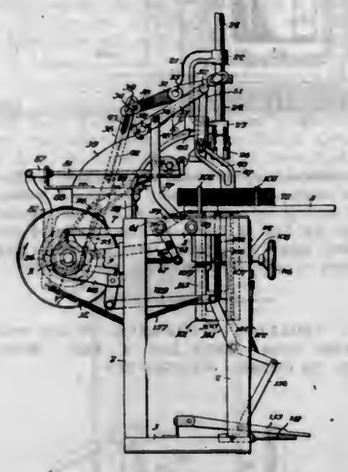


1. An apparatus for liquefying air and separating it into oxygen and nitrogen, which includes a liquid column of very much greater height than diameter, an air liquefying coil at the lower end of the column, means for delivering liquid air from said coil to the column at a point close to the upper end of the latter, means within the liquid column for preventing convection currents in the liquid, said means also retarding the upward movement of bubbles from the surface of said coil through the liquid, and means connected to the lower end of the column and to the upper end of the column adjacent to said liquid delivery means for indicating the height of the liquid column.

1,634,077. BAFFLE FOR WATER-TUBE BOILERS. DANA H. MAYO, Detroit, Mich. Filed July 3, 1925. Serial No. 41,373. 12 Claims. (Cl. 110—98.)

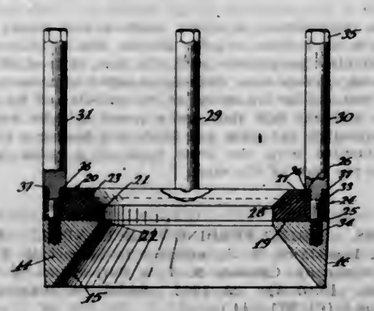
1. A water tube boiler provided with an adjustable baffle composed of an upper immovable portion and a lower movable portion forming a positively connected extension thereof, said movable portion being adapted to be raised and lowered towards and from the immovable portion to vary the gas circulation area.

1,634,078. CARTON-HANDLING APPARATUS. MALCOLM MCFAULL and ARTHUR E. RIDEOUT, New York, N. Y., assignors to Standard Sealing Equipment Corporation, New York, N. Y., a Corporation of New York. Filed Aug. 22, 1924. Serial No. 733,510. 1 Claim. (Cl. 93—2.)



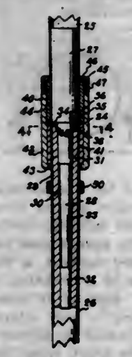
Carton handling apparatus of the class described comprising a support for filled unsealed cartons including conveyer rolls arranged in two parallel longitudinally extending sections, each of said sections being discontinued at different points lengthwise of the support, a dividing member extending longitudinally between said roll sections and offset laterally at said respective discontinuities so that the widthwise extent of said supporting sections falls short of the center opposite said discontinuities, and means for moving the carton along said support centrally positioned with respect to the width of the support, whereby upon passage of a carton over said discontinuities the outer bottom flaps of said cartons are permitted to swing into open position.

1,634,079. PROCESS OF MANUFACTURING WALL BOARDS COMPOSED OF RICE HULLS AND PLASTER. TSUNEGORO NISHI, Tokyo-Fu, Japan. Filed Sept. 4, 1925, Serial No. 54,548, and in Japan Nov. 20, 1924. 3 Claims. (Cl. 18—47.5.)



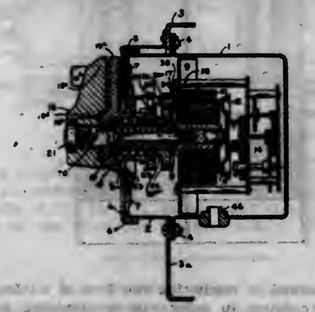
1. The process of manufacturing wallboards composed of rice hulls and plaster in which, after crushing the rice hulls into slender pieces, the same are mixed with plaster and lime, the mixture then being pressed in a mould and thereafter dipped in water.

1,634,080. ENVELOPE MACHINE. ALBERT OLGAY, Glen Ellyn, Ill., assignor to Gaw-O'Hara Envelope Co., Chicago, Ill., a Corporation of Illinois. Filed Feb. 26, 1925. Serial No. 11,656. 6 Claims. (Cl. 93—61.)



1. In an envelope window applying machine, a magazine for holding and supplying window patches including, a receptacle open at the top and bottom, means at the bottom edge of said receptacle for releasably retaining said patches, a relatively fixed head within said receptacle, rigid members connected to the top of said head and having portions extending above the top of said receptacle, and springs connected between the extended portions of said members and the sides of said receptacle.

1,634,081. VALVE-SEAT RETAINER. GEORGE E. PUTNAM, Fullerton, Calif. Filed Sept. 7, 1926. Serial No. 133,850. 7 Claims. (Cl. 251—167.)



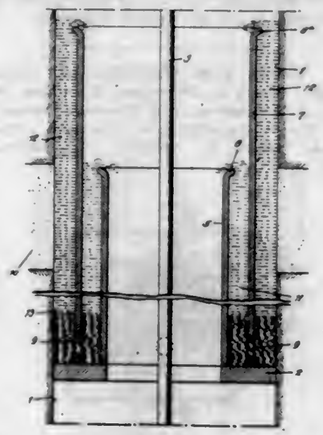
1. A valve having a metal valve seat support with a flat upper face, a rubber valve seat member resting upon the flat upper face, a ring tightly fitting upon the valve seat member, an annular plate extending inwardly from the upper edge of the ring and fitting upon the outer portion of the valve seat member, a flange extending downwardly from the inner edge of the annular plate into a groove extending downwardly from the upper face of the valve seat member, the ring, the flange and the annular plate being formed integral, and screw means inserted downwardly through the annular plate through the rubber valve seat member and screw seated in the metal valve seat support so as to hold the valve seat member from expanding and so as to hold the valve seat member from stretching or moving inwardly.

1,634,082. GOLF CLUB. CHARLES RIGBY, Cincinnati, Ohio. Filed Dec. 6, 1926. Serial No. 152,853. 4 Claims. (Cl. 273—80.)

1. A golf club comprising a handle section and a head section, means at the proximate ends of said sections securing said sections together comprising a tapered shank extending from one of said sections and received in a tapered bore in the other of said sections forming a wedge connection between said sections, means interposed between said sections for arresting relative rotation between said sections, and a rotatable sleeve received over the adjacent ends of said sections, said sleeve and said sections provided with complemental means respectively for drawing said sections together and for dissociating said tapered shank and the wall of said tapered bore by rotations of said sleeve in opposite directions.

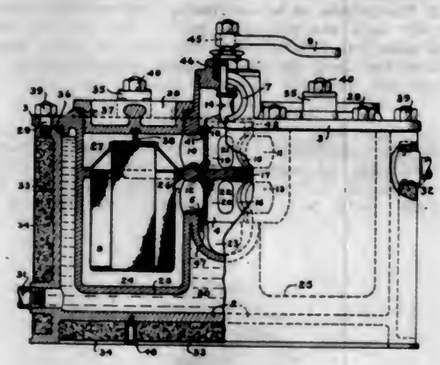
1,634,083. TIMER FOR ELECTRICALLY-OPERATED DEVICES. EDWIN A. RUTENBER, Milwaukee, Wis., assignor to A. J. Lindemann & Hoverson Company, Milwaukee, Wis., a Corporation of Wisconsin. Filed Apr. 24, 1924. Serial No. 708,740. 14 Claims. (Cl. 200—38.)

1. The combination with a clock movement and a main spring for actuating the same, of a clutch connecting said movement and spring, a winding device connected with



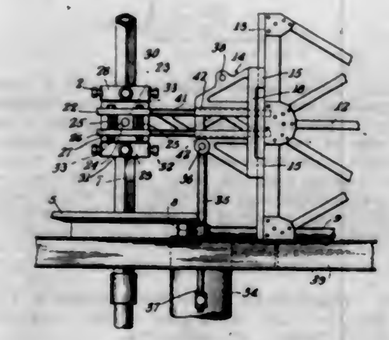
the spring for winding and unwinding the same, electric terminals arranged to be moved into and out of contact to close and break an electric circuit, an operative connection between said spring winding means and one of said terminals whereby movement of the former will operate the latter, a second device for operating an electric terminal, and a connection between the same and the winding device whereby the two may be moved in unison by the spring under the control of the clock movement, said last named connection permitting independent movement of the two connected members.

1,634,084. SUPPORT. JOHANNES RUTHS, Djursholm, Sweden, assignor to Aktiebolaget Vaporackumulator, Stockholm, Sweden, a Corporation. Filed Oct. 24, 1923, Serial No. 670 540, and in Sweden Oct. 25, 1922. 7 Claims. (Cl. 122—510.)



1. Supporting means for a structure comprising a fixed support, a second support spaced from the fixed support and comprising a part adapted to be attached to the structure and means to permit said part to move toward or away from the fixed support, a third support spaced from the fixed support in a direction at an angle to that at which the second support is spaced from the fixed support and comprising a part adapted to be attached to the structure and means to permit the last-mentioned part to move toward or away from the fixed support and a fourth support spaced at an angle from the fixed support with respect to the second and third supports, and comprising a part adapted to be attached to said structure and having movement in all directions with respect to said fixed support.

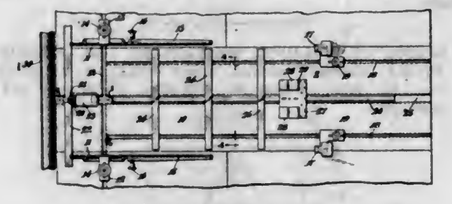
1,634,085. OIL-WELL REGULATION METHOD AND MEANS. JOSEPH F. RYAN, Chicago, Ill. Filed July 13, 1925. Serial No. 43,350. 14 Claims. (Cl. 166—21.)



12. The method of regulating the flow of oil from oil wells which consists in constantly maintaining an hydraulically balanced protective covering of oil on the surface of the oil producing strata whereby the pressure of said oil covering retards the escape of gas from said strata.

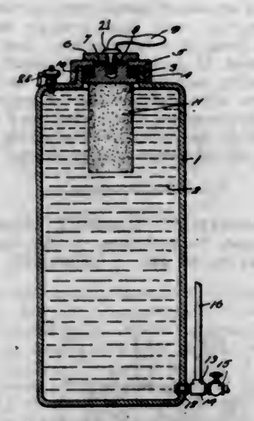
1,634,086. STRAINER. EUGENE M. SCOVILLE, Milwaukee, Wis., assignor of one-half to Floyd L. Swanberg, Pittsburgh, Pa. Filed Sept. 13, 1924. Serial No. 737,633. 10 Claims. (Cl. 210—191.)

7. In combination, a casing, a strainer within said casing, a seating bushing fixedly positioned within said casing, a control valve rotatable within said bushing for regulating the flow of liquid to and from said strainer, and resilient means cooperating with said valve and with said bushing to urge the former against the latter.



1,634,087. DRILLING APPARATUS. WALDO SHELDON, Greenwich, Conn. Filed Aug. 4, 1923. Serial No. 655,742. 20 Claims. (Cl. 255—22.)

1. In combination, a rotary table having means for driving a drill stem, a guide at one side of the table in substantial parallelism with the line of feed of the drill stem, a cross head slidingly engaged with the guide at one end and having means at its opposite end for connection with the drill stem and a power cylinder mounted intermediate the table and guide and having a piston rod connected with the cross head at a point intermediate the ends of the same.

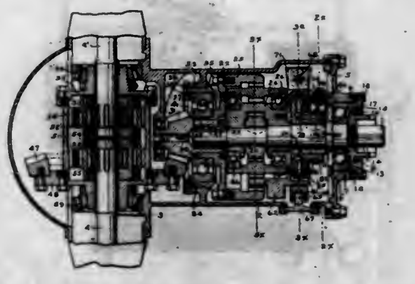


1,634,088. SHEET-FEEDING MECHANISM. KARL SIEG, Brooklawn, N. J., assignor to Samuel M. Langston Company, Camden, N. J., a Corporation of New Jersey. Filed Apr. 23, 1926. Serial No. 104,010. 9 Claims. (Cl. 271—44.)

1. A sheet feeding mechanism including a stack support, a reciprocatory member movable along said support and having a transverse bar for engaging with the lowermost sheet intermediate of the ends of the latter, and a part for engagement with the rear edge of the lower-

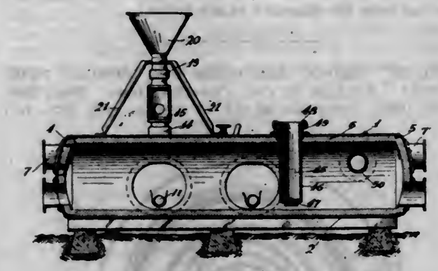
most sheet whereby during the movement of said member in one direction the sheet is advanced and the weight of the stack is in part supported by the member.

1,634,089. CARBONATING APPARATUS. THOMAS B. SLATE, New York, N. Y., assignor, by mesne assignments, to International Patents Fiscal Corporation, New York, N. Y., a Corporation of New York. Filed Jan. 12, 1924. Serial No. 685,890. 4 Claims. (Cl. 220—29.)



1. In a carbonating apparatus, the combination of a container formed with an opening surrounded by a neck affording an inner bearing surface, an airtight closure device adjustably secured to the neck of the container and having an inwardly projecting annular flange, said closure device including spaced members and a resilient ring interposed between the spaced members of said closure, the outer of said spaced members bearing upon the outer face of said annular flange and said resilient ring bearing on the inner face of said annular flange, whereby to provide a closure device adapted to withstand a high pressure from within the container to permit of carbonating the contents of the container by means of carbon dioxide snow.

1,634,090. DI-ACYLACETYL-ARYLENEDIAMINE AND PROCESS OF MAKING SAME. ARTHUR ZITSCHER and ROBERT SCHMITT, Offenbach-on-the-Main, Germany, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Filed May 15, 1923. Serial No. 639,215. 5 Claims. (Cl. 260—124.)

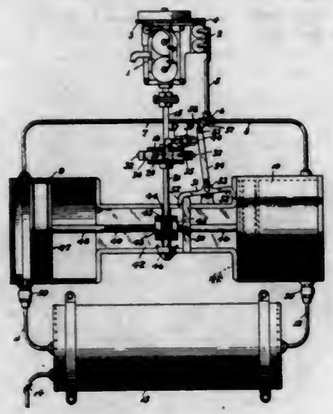


1. A process of making di-acylacetyl-arylenediamines consisting in heating acylacetic acid esters with arylenediamines.

1,634,091. VARIABLE-SPEED GEAR FOR MOTOR VEHICLES. JOHN BETHUNE, Rochester, and JACOB G. VAN ROO, deceased, Rochester, N. Y., by Elizabeth F. Van Roo, executrix, Rochester, N. Y., assignors to Twin High Transmission Company, Syracuse, N. Y., a Corporation of New York. Filed Nov. 10, 1926, Serial No. 147,576, and in Canada Jan. 14, 1926. 11 Claims. (Cl. 74—34.)

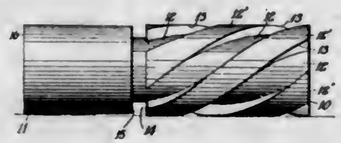
1. In a variable speed gearing for motor vehicles, the combination of a driving shaft, a driven member, a gear mounted on the driving shaft to turn therewith, an internal external gear engaged by the first mentioned gear, an eccentric bearing for said internal external gear revolubly mounted on said driving shaft, frictional means for connecting said bearing member to the driving shaft to rotate therewith, means for holding said bearing member against rotation when said frictional means is released, and a gear operatively connecting the internal external gear with the driven member.

1,634,092. SULPHUR BURNER. HENRY BLUMENBERG, Jr., Los Angeles, Calif., assignor to Stockholders Syndicate, Los Angeles, Calif., a Corporation of California. Filed Oct. 16, 1925. Serial No. 62,928. 13 Claims. (Cl. 23—278.)



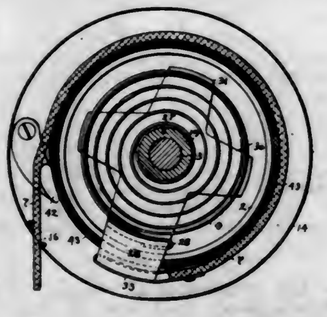
1. A sulphur burning furnace comprising in combination an elongated furnace, a feeder stack located on the side of the furnace, an air inlet at one end and an outlet at the other end for the products of combustion.

1,634,093. AIR COMPRESSOR. VICTOR E. CLARK, Grand Rapids, Mich. Filed June 15, 1925. Serial No. 37,028. 6 Claims. (Cl. 230—32.)



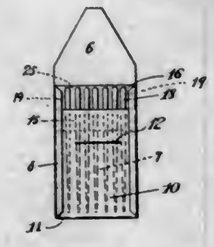
1. In combination, an engine, an air compressor driven by the engine, two cylinders, means for alternately delivering compressed air from the compressor to said

cylinders, and means directly driven by the engine operating in said cylinders to further compress the air



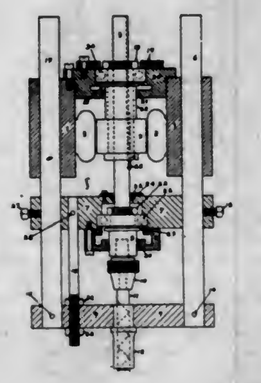
therein, said means compressing the air in one cylinder while compressed air from the compressor is being delivered to the other cylinder.

1,634,094. TUBE-CLEANING PROJECTILE. GEORGE C. COOK, Millington, N. J., and JOHN A. COLEMAN, Woodhaven, N. Y. Filed Feb. 20, 1926. Serial No. 89,562. 4 Claims. (Cl. 15—104.06.)



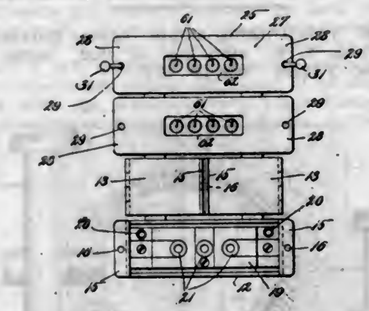
1. A tube cleaning projectile, comprising a substantially cylindrical unitary member, solely of resilient material, having a helically grooved entrance portion and a head or sealing portion, the diameter of the former being not less than the diameter of the latter.

1,634,095. SHOCK ABSORBER FOR SPRING VEHICLES. WILLIAM G. COX, Cleveland, Ohio. Filed Mar. 15, 1926. Serial No. 94,753. 7 Claims. (Cl. 267—10.)



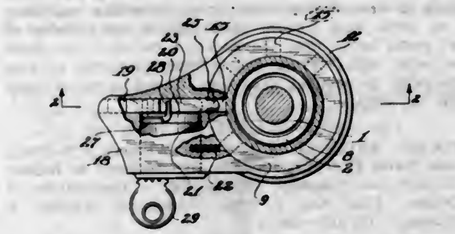
1. A shock absorber for spring vehicles, comprising a cylindrical body having a flange provided with radial projections, a friction belt having a retriever spring within said body, and a cover for said parts having a passage for the belt, said cover also having interlocking bayonet-lock connections with said radial projections permitting rotation of the cover while locked to said body.

1,634,096. ENVELOPE CONTAINER FOR TOOTHPICKS. GEORGE DOSCHER, Mount Vernon, N. Y. Filed Dec. 16, 1926. Serial No. 155,126. 3 Claims. (Cl. 206—20.)



1. As a new article of manufacture, an envelope of the character described made from a single integral paper blank in the form of a substantially, long narrow rectangle weakened at a plurality of parallel transverse lines and bent on said lines to form an envelope having a pocket at its upper entrance portion between the back and front of the envelope, said pocket being of less depth than the envelope and being provided at its bottom with a plurality of spaced perforations as and for the purposes set forth.

1,634,097. MORTISING MACHINE. ALBERT VANDERFORD EDWARDS, Hackettstown, N. J. Filed Nov. 29, 1926. Serial No. 151,449. 2 Claims. (Cl. 144—78.)

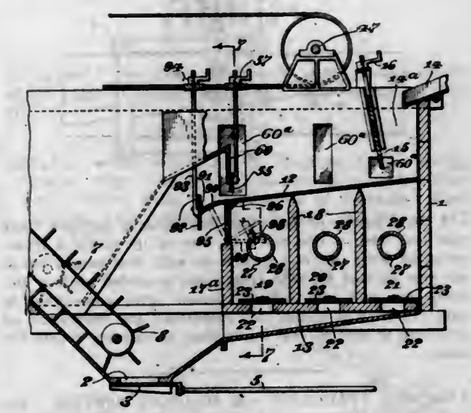


1. In a hollow chisel mortising machine, the combination of a frame, having mounted thereon, the stator of an electric motor, a hollow sleeve, having mounted thereon, the rotor of an electric motor and carried by a bearing mounted in the said frame, a spindle, having a chuck at one end and free to slide in said hollow sleeve, means of rotating said spindle from said hollow sleeve, with a slide in said frame, a crossbar on said slide, having a bearing for said spindle, means of adjusting said crossbar on said slide and means of clamping said crossbar to said slide.

1,634,098. ELECTRIC METER AND THE MOUNTING THEREOF. FREDERIC W. ERICKSON, Larchmont, N. Y. Filed Apr. 15, 1926. Serial No. 102,341. 8 Claims. (Cl. 247—2.)

1. The combination with a hollow receptacle having doors adapted to be sealed closed or to be opened to project in alinement with the sides of the receptacle, of an electric meter having side portions removably engaging said doors when the latter are open.

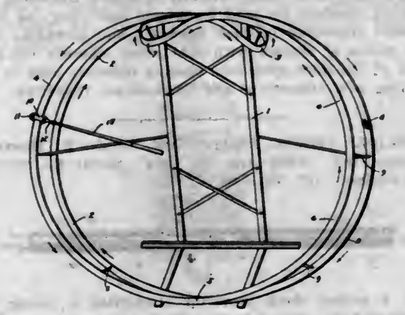
1,634,099. AUTO LOCK. LOYD R. FULTON, Los Angeles, Calif. Filed Feb. 4, 1924. Serial No. 690,509. 2 Claims. (Cl. 70—129.)



1. An automobile lock comprising a locking ring adapted to be rigidly fastened to a steering wheel hub, a second locking ring adapted to be rigidly fastened to a steering post against the first ring, a housing ring encircling the two locking rings and attached to one of the locking rings, a lock casing carried by the housing ring, a locking bolt carried by the lock casing and having two locking heads, the locking rings having holes to receive the heads, and a cylinder lock in the casing for operating the locking bolt, so that when the locking heads are extended the two locking rings are locked together, thereby locking the steering wheel to the steering post.

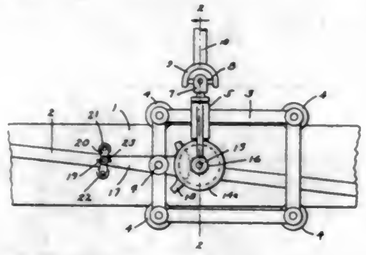
1,634,100. TREATMENT OF ZINC-BEARING ORES AND METALLURGICAL PRODUCTS. HERBERT WILLIAM GEPP, HARRY HEY, and GILBERT RIGG, Melbourne, Victoria, and ROYALE HILLMAN STEVENS and ROWLAND THOMAS DRYLL WILLIAMS, Risdon, Hobart, Tasmania, Australia, assignors to Electrolytic Zinc Company of Australasia Limited, Melbourne, Victoria, Australia. Filed July 30, 1923, Serial No. 654,775, and in Australia Aug. 1, 1922. 13 Claims. (Cl. 23—125.)

1. A method for the treatment of zinc-bearing ores which comprises mixing the said orea with sulphuric acid and subjecting said mixture to a furnacing operation wherein hot gas containing a substantial amount of sulphur dioxide from an external source is brought into contact with the mixture.



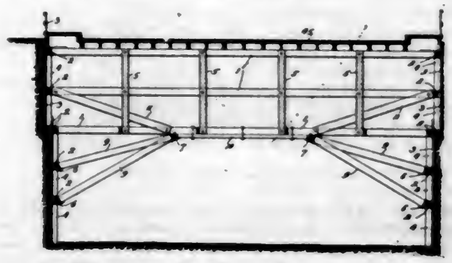
1,634,101. PULSATING JIG. MAXIMILIAN S. HACHITA, Wilkes-Barre, Pa. Filed Nov. 15, 1923. Serial No. 674,904. 1 Claim. (Cl. 209—496.)

In a coal jig, the combination of a chamber for receiving the coal with impurities intermingled therewith for washing and separating the same, the said chamber having a bottom provided with openings extending therethrough, a breast plate and adjustable gate at the rear end of said chamber, the said bottom extending rearwardly and beyond the plane of the said breast plate and gate, a stop plate adjacent the rear edge of the said bottom, a compartment situated underneath the said bottom, the rear wall of the said compartment being in substantially the same plane as that of the said breast plate and gate, the upper portion of said wall comprising a



gravity controlled gate which is adapted to open outwardly upon pressure from within, and means for intermittently and controllably supplying water to the said compartment, the water from the compartment being adapted, in the event of the impurities and coal banking too high against the breast plate and gate, to re-act against the said gravity controlled gate to open the same whereby water is adapted to flow upwardly through the portion of the said bottom beyond and rearwardly of the plane of the said breast plate and gate, substantially as described.

1,634,102. MECHANICAL GOLF INSTRUCTOR AND EXERCISER. JOHN HANSEN, Bettendorf, Iowa, assignor of four twenty-fifths to William H. Martin, ten twenty-fifths to T. S. Cunningham, and one twenty-fifth to Thomas McQuarrie, Davenport, Iowa. Filed Dec. 23, 1926. Serial No. 156,658. 4 Claims. (Cl. 273—35.)

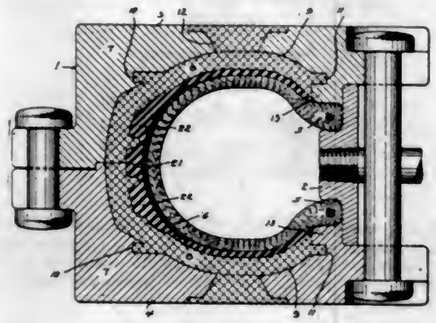


1. A device of the class described, comprising a pair of substantially circular tracks, and golf stick guide slidable thereon, said tracks being provided at their upper sides with means for reversing the movement of said guide.

1,634,103. MECHANICAL GOLF INSTRUCTOR AND EXERCISER. JOHN HANSEN, Bettendorf, Iowa, assignor of four twenty-fifths to William H. Martin, ten twenty-fifths to T. S. Cunningham, and one twenty-fifth to Thomas McQuarrie, Davenport, Iowa. Filed Dec. 29, 1926. Serial No. 157,751. 5 Claims. (Cl. 273—35.)

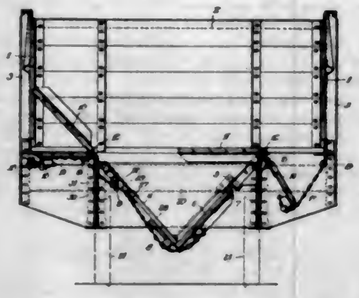
1. In a device of the class described, a suitable track provided with a cam-track on one of its faces, a frame provided with rollers operable on said first-named track, an arm carried by said frame and provided with a follower for said cam-track, a pivotal stick connection in said frame, and means for imparting the movement of said arm to said pivotal connection, to suitably rotate the same.

1,634,104. TIMBERING OR BRACING SYSTEM. ERNEST A. HERRICK and THOMAS LEONARD MACBEAN, New York, N. Y. Filed Mar. 21, 1925. Serial No. 17,208. 2 Claims. (Cl. 61—41.)



1. A bracing means for the sides or banks of an excavation comprising transverse timbering disposed between said sides, longitudinally disposed timbering and bracing members for said transverse timbering and longitudinal timbering inclined inwardly and upwardly from the points of contact with said sides, whereby the pressure of the sides upon said bracing members aids in supporting said transverse and longitudinal timbering.

1,634,105. CHECK PROTECTOR. STEN E. HOFFMAN, Gary, Ind. Filed Apr. 19, 1924. Serial No. 707,559. 2 Claims. (Cl. 101—98.)

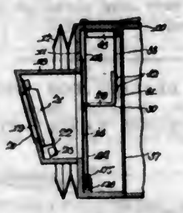


1. A pocket check protector comprising a casing provided with a cover adapted to receive a check between the casing and cover and to produce an impression upon the check by the closing movement of the cover, a plurality of movable type bars slidable along the base of said casing, a slidable inking pad superimposed above said type bars but normally remaining out of contact with the same, means for moving said type bars to permit a selection of characters for an impression upon said check, and means for moving said inking pad forwardly and then downwardly into engagement with said selection of characters.

1,634,106. VULCANIZING MOLD. ERNEST HOPKINSON, New York, N. Y. Filed Apr. 18, 1922. Serial No. 555,294. 1 Claim. (Cl. 18—47.)

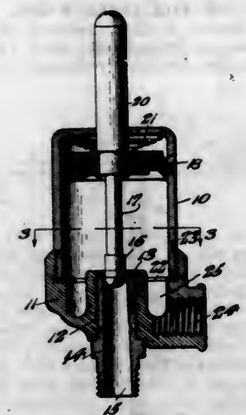
A tire vulcanizing mold having a plurality of complementary sections whose opposed faces are hollowed out to define a molding cavity of the shape of a vulcanized casing in cross-section, each of said sections consisting of an outer hard metallic shell and an inner lining of cast metal softer than the metal of the shell, the inner and outer edges of the lining being protected by ribs flush with its molding face and of hard metal integral with the shell.

1,634,107. RAILWAY DUMP CAR. WILLIAM J. HOSCEIT and DAVID HINDAHL, Chicago, Ill., assignors to Rodger Ballast Car Company, Chicago Ill., a Corporation of Maine. Filed Nov. 1, 1923. Serial No. 672,058. 6 Claims. (Cl. 105—243.)



1. In a dump car, in combination, a cross tie, longitudinal sills, walls between said sills forming a hopper, one of said walls including a sheet metal plate at the upper part of said wall, said sheet metal plate being offset at its lower portion to form a shoulder adapted to receive and support the remainder of said wall, said sheet metal plate extending to a region adjacent to the top of its corresponding longitudinal sill, and an operating shaft in the angle between said plate and said corresponding sill.

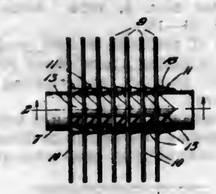
1,634,108. CONCERTINA OR ACCORDION. ROBERT C. LEPPERT, Chicago, Ill. Filed Feb. 10, 1926. Serial No. 87,335. 2 Claims. (Cl. 84—376.)



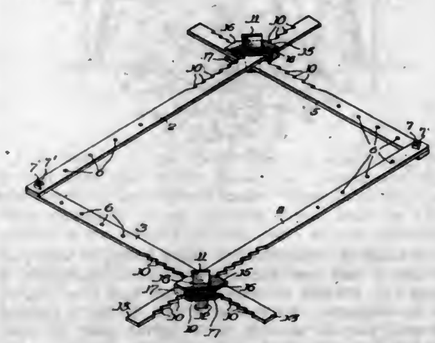
1. In a musical instrument of the class described, the combination with an end-box, of a bellows secured to one end thereof, a wall located between the bellows and

said box having an air-passage-way therein and an opening on each side of said way, a controlling valve hingedly mounted on the rear portion of said wall to close said air-passage-way, means to automatically close said valve and means for manually opening the same, said last named means consisting, of an elbow shaped member having one of its arms adjustably connected to the said valve, a link longitudinally adjustably secured to the other arm of said member and having at its free end an open ended slot, a guide mounted longitudinally on the inner surface of the top of the instrument to co-act with

the slot of said link for guiding the same in its movement, a spring actuated plunger rod mounted longitudinally with respect to the instrument in the said box for contact with said link, and a push pin mounted in the front wall of said box in alignment with the plunger rod and extended through said wall, said push pin having means to retain it in retracted position, said last named means being located at one side of the push pin to prevent its accidental operation when other parts of the instrument are manipulated.



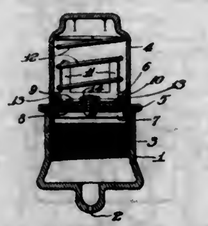
1,634,109. LUBRICATOR. JOHN FRANKLIN MACINDOE, East Falls, Philadelphia, Pa. Filed Dec. 31, 1925. Serial No. 78,597. 5 Claims. (Cl. 184—45.)



1. In a lubricator, a container for lubricant provided with a discharge passage, a valve member for controlling said passage, a plunger slidably mounted within said container and connected to said valve member, means holding said plunger under pressure to eject lubricant from said container by way of said passage, and means to introduce lubricant into said container between said plunger and the inlet to said discharge passage.

1,634,110. RADIATING DEVICE. PATRICK J. MCINTYRE, Detroit, Mich., assignor to Wolverine Tube Company, a Corporation of Michigan. Filed Mar. 17, 1926. Serial No. 95,284. 2 Claims. (Cl. 113—116.)

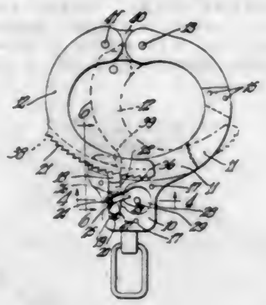
1. In a device of the type set forth, a pipe, and fins having normally tapered sleeves surrounding the pipe and held thereon by friction solely with the sleeves of the fins having their free ends forced one within the other at the posterior end of the next adjacent, said sleeves being slitted to form independent segments whereby the end of one sleeve pinches the ends of the segments of the adjacent sleeve binding the latter tightly onto the pip.



1,634,111. COLUMN CLAMP. CHARLES LOUIS MEYER, Omaha, Nebr., assignor to Concrete Engineering Company, Omaha, Nebr., a Corporation of Nebraska. Filed July 24, 1926. Serial No. 124,628. 9 Claims. (Cl. 144—291.)

1. In a clamp of the character described, intersecting arms, teeth formed in the edges of the outer ends of said arms, the toothed edge of one arm opposed to the toothed edge of the other arm, a member adapted to embrace said arms adjacent but outwardly of the point of intersection of their axes and means cooperative with said member and said toothed edges of said arms for urging the outer ends of said arms apart.

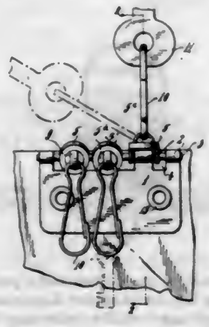
1,634,112. GREASE CUP. KNOWLTON D. MONTGOMERY, Lansdale, Pa. Filed July 17, 1926. Serial No. 123,084. 3 Claims. (Cl. 184—45.)



1. In a grease cup, a chambered body portion having a discharge outlet, a cap in threaded engagement with said body portion, a plunger within said cap and a spring connected at its forward end to said plunger, said plunger having formed from it rearwardly extending spaced guide members to maintain alignment of said spring.

1,634,113. FOOD PRODUCT AND METHOD OF MAKING SAME. ALLIBELLE HAZARD MOORE, Kansas City, Mo., assignor of one-half to Victor L. Phillips, Kansas City, Mo. Filed Sept. 4, 1924. Serial No. 735,871. 7 Claims. (Cl. 99—10.)

2. The process of preparing a food product which includes the steps of baking a raw cereal product containing bran to form granules, and treating the granules with a cooked syrup.



6. A baked cereal food product in the form of granules, each granule consisting of adhering particles of bran and Graham flour in substantially equal proportions.

1,634,114. HANDCUFF. JOHN J. MURPHY, Norwich, Conn., assignor, by mesne assignments, to Peerless Handcuff Company, a Corporation of Massachusetts. Filed Feb. 24, 1924. Serial No. 690,068. 9 Claims. (Cl. 70—24.)

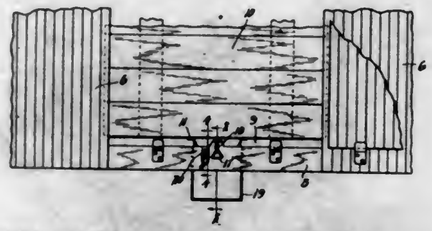
1. A handcuff, comprising, a frame having a body portion and a fixed arm outwardly extending therefrom, a locking arm adapted to cooperate with said fixed arm to form an embrasure for the wrist and having a toothed segmental portion movable in a curved path in close proximity to said body portion, a key retractible locking device mounted in said body portion to engage the teeth on said locking arm, means connecting said arms so that the locking arm is free to swing in said curved path and to move bodily away from said locking device, and means for confining the segmental portion of the locking arm to movement in said curved path except when it has been moved toward said fixed arm beyond normal wrist embracing position.

1,634,115. KEY HOLDER. ISIDOR NEWMAN, New York, N. Y. Filed Apr. 10, 1926. Serial No. 101,036. 5 Claims. (Cl. 150—40.)

1. A key retainer comprising a bar, supporting means for the bar, heads journaled to rotate upon the bar and provided with end openings, disks journaled within the heads and having loops projecting through said openings, the openings in the heads being wider than the loops to permit the latter to be pushed through the openings, the heads having inwardly extending flanges at the openings, the disks being of greater diameter than the openings and the loops and opposing the flanges to rotatively retain the disks on the heads and prevent the disks from being pulled through the openings, and key retaining members movably connected with the loops, whereby the heads and the keys may swing on the bar as an axis, the disks and the keys may be rotated axially and the members with the keys may swivel on the loops when the device is retained in the hand.

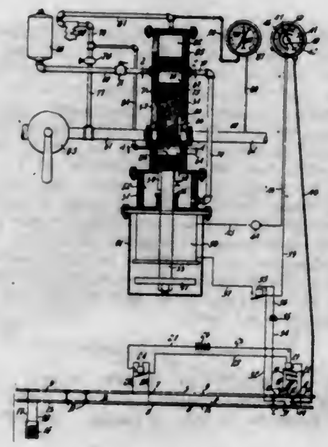
1,634,116. FOOT BEARING FOR SHOES. WILLIAM HENRY NICKERSON, Brookline, Mass. Filed Jan. 13, 1926. Serial No. 81,075. 1 Claim. (Cl. 36—76.)

A foot bearing for shoes comprising an insole divided or split edgewise from its heel end through its shank portion to form a bottom layer, a displaceable top layer, and an undivided forepart, each layer including a heel and a shank portion; a molded longitudinal arch supporter interposed between the layers, and a resiliently compressible supplemental arch supporter engaged with the forward end of the longitudinal supporter and formed to support a metatarsal arch, the top layer covering and conforming to the two supporters.



1,634,117. COVER FOR TIMER WIRES. WILLIAM J. PETERSON, Minot, N. Dak., assignor of one-half to Oscar H. Larson, Minneapolis, Minn. Filed Apr. 3, 1922. Serial No. 549,182. 7 Claims. (Cl. 200—19.)

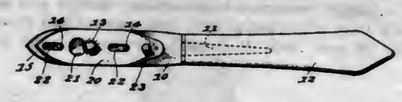
3. The structure set forth in claim 2, and a cover enclosing said disks and holding them in fixed relation.



1,634,118. GRAIN-CAR STRUCTURE. JOHN P. POLNASZEK, Minneapolis, Minn., assignor of one-half to Andre L. Pinet, Robbinsdale, Minn. Filed Apr. 19, 1926. Serial No. 102,844. 3 Claims. (Cl. 105—239.)

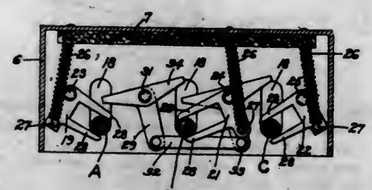
1. In a freight car having the usual doorway adapted to receive a grain door, said car having a floor opening immediately adjacent said doorway, a delivery chute extending downwardly and outwardly from said floor opening, a gate horizontally movable across said opening and outwardly from the doorway of said car, means for normally holding said gate inwardly in closed position, and means for opening said gate from without said car,

whereby material in the car pressing against the grain door may be withdrawn to permit the grain door to be removed.



1,634,119. AUTOMATIC TRAIN-CONTROL DEVICE. GEORGE H. SANBORN, Malden, Mass. Filed Apr. 24, 1923. Serial No. 634,355. 7 Claims. (Cl. 246—182.)

1. A train control device comprising, in combination, a track, a train upon said track, a relay upon said train electrically connected to said track, a solenoid upon said train, an electric circuit upon said train opened and closed by said relay and embodying therein an auxiliary source of electric supply connected to said solenoid, a casing embodying therein a pressure chamber, a cylinder communicating with said pressure chamber, a train pipe communicating with said cylinder, a piston within said cylinder and embodying therein an exhaust valve for said train pipe, said solenoid being operatively connected to said piston and adapted to close said exhaust valve, means rendered effective by the breaking of an electric circuit to actuate said piston to open said exhaust valve, a fluid pressure reservoir and means to conduct pressure fluid from said reservoir to said pressure chamber beneath said piston to move the latter and close said exhaust valve.



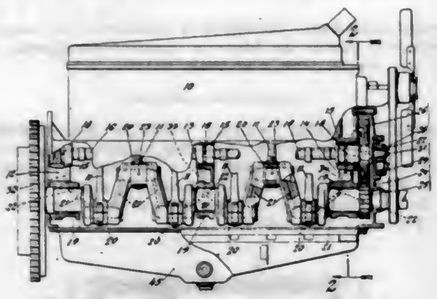
1,634,120. INK ERASER. GEORGE SCHRADE, Bridgeport, Conn. Filed Jan. 5, 1926. Serial No. 79,847. 1 Claim. (Cl. 120—39.)

An eraser comprising a head member having a headed stud and guide pin upon one side thereof, a removable eraser blade adapted to fit against the side of the head and having holes to receive the headed stud and the pin, attachable relatively thin spring clamping member normally bent longitudinal and also provided with openings to receive the stud and pin and adapted to be deflected and slid on the blade to engage the underside of the

headed stud under tension in a manner to be secured thereby to clamp the blade by resilient engagement of its end portion with said blade.

1,634,121. INTERLOCKING SWITCH MECHANISM. JOHN E. SEDERHOLM, St. Paul, Minn., assignor to American Hoist & Derrick Co., a Partnership composed of F. J. Johnson and W. O. Washburn, Ramsey County, Minn. Filed Aug. 2, 1924. Serial No. 729,807. 7 Claims. (Cl. 200—50.)

1. A device of the class described comprising three pivoted knife-edge switch levers first, second and third, said levers normally alined at one throw limit, the levers being swingable to an opposite throw limit in planes parallel to one another through small arcs of substantially equal length and in the same direction, a first rockable element having an extension arranged across the path of the first lever, a second rockable element having extensions arranged respectively across the paths of the first and second switch levers, said rockable elements having a common pivot, a third rockable element having extensions across the paths of the second and third switch levers, said first and third rockable elements being connected for movement in unison, and spring controlled pivoted elements engaging the switch levers to hold the same at either throw limit and to snap the levers to those limits after movement has been manually initiated.



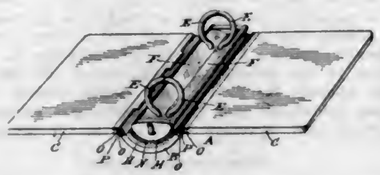
1,634,122. METHOD OF PRODUCING SODIUM FLUORIDE. EARL P. STEVENSON, Newton, Mass., assignor to Arthur D. Little, Inc., Cambridge, Mass., a Corporation of Massachusetts. Filed Oct. 8, 1921, Serial No. 506,360. Renewed Dec. 1, 1926. 2 Claims. (Cl. 23—88.)

2. A process for obtaining sodium fluoride from sodium fluosilicate which consists in decomposing the fluosilicate into sodium fluoride and hydrosilicic acid by treatment with a carbonate evolving carbon dioxide in the reaction, next treating the hydrosilicic acid with a caustic reagent to convert it into a soluble silicate, separating the alkali solution of the silicate from the sodium fluoride, and finally treating the filtrate with carbon dioxide to decompose the silicate and form a bicarbonate suitable for conversion into carbonate for re-use in the process.

1,634,123. OILING SYSTEM FOR INTERNAL-COMBUSTION ENGINES. ALEX TAUB, Detroit, Mich., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Dec. 12, 1923. Serial No. 680,177. 3 Claims. (Cl. 184—6.)

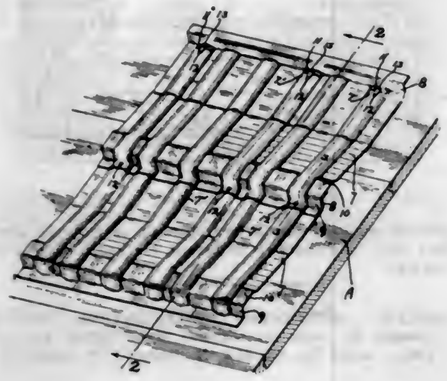
2. In a lubricating system for internal combustion engines and in combination with a crank shaft supported in bearings disposed one adjacent each end thereof and

in an intermediate bearing between said end bearings; a valve operating shaft supported in end and intermediate bearings, and having annular grooves at said bearings, and a passage extending longitudinally thereof and ports leading from said passage into said grooves and through which oil may flow from said passage to said valve



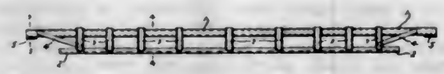
operating shaft bearings; separate and independent oil supply conduits leading one from each valve operating shaft bearing to a crank shaft bearing; and an oil supply pump comprising a rotatable member mounted directly upon one end of said valve operating shaft and arranged to discharge oil into and through the passage aforesaid extending along said valve operating shaft.

1,634,124. METHOD OF THICKENING AND STABILIZING LATEX AND PRODUCT. MERWYN C. TEAGUE, Jackson Heights, N. Y., assignor to American Rubber Company, East Cambridge, Mass., a Corporation of Massachusetts. Original application filed June 9, 1924, Serial No. 719,015. Divided and this application filed Sept. 30, 1925. Serial No. 59,595. 10 Claims. (Cl. 18—50.)



3. The process of treating latex which comprises thickening the continuous phase and stabilizing the latex by the addition thereto of the ammonium-base soap of a higher aliphatic acid, without substantial modification of the colloidal condition of the rubber hydrocarbon.

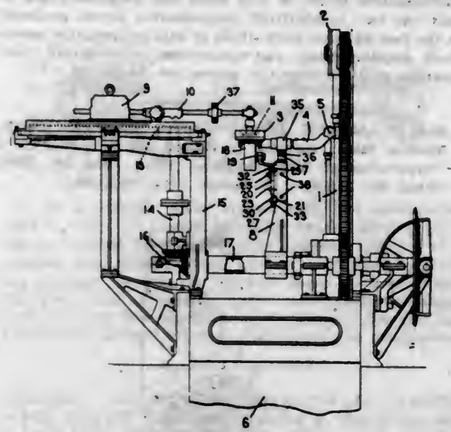
1,634,125. LOOSE-LEAF BINDER. CLARENCE D. TRUSSELL, Poughkeepsie, N. Y., assignor to Trussell Manufacturing Company, Poughkeepsie, N. Y., a Corporation of New York. Original application filed Jan. 31, 1919, Serial No. 274,337. Divided and this application filed Dec. 13, 1920. Serial No. 430,581. 14 Claims. (Cl. 129—4.)



8. A cover for a loose-leaf binder comprising cover members consisting of a back and sides, having interengaging hinge members whereby they are hinged together, the cover sides each formed of leather-like material, the hinge members being substantially within the thickness of the cover sides.

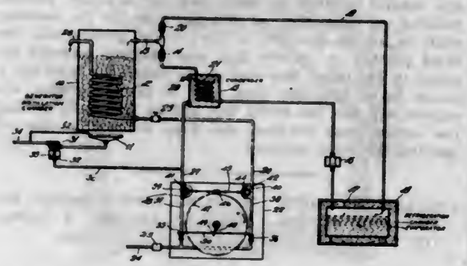
1,634,126. SHINGLE. RUDOLPH K. TYRA, Minneapolis, Minn., assignor to F. L. TYRA, Minneapolis, Minn. Filed Dec. 4, 1924. Serial No. 753,830. 1 Claim. (Cl. 108—17.)

A shingle in the form of a stamped sheet formed at its upper edge with an upstanding lap flange and at its lower edge with a downturned approximately L-shaped lap flange, said downturned lap flange of the one shingle being arranged to overlap the upstanding upper flange of a lower shingle, the said shingle having a raised ridge extending above its lower lap flange and said shingle having longitudinal corrugations extending from its upper lap flange through the raised ridge and to said lower lap flange, and the upper lap flange of said shingle being also approximately L-shaped, adapting the L-shaped upper and lower flanges of adjacent shingles to be overlapped and nested, said shingle at its lower portion, just above its lap flange, having an opening through which the prong of an anchoring device may be projected as and for the purposes set forth.



1,634,127. STRUCTURAL-STEEL JOIST. NORMAN WAGNER, Hamilton, Ontario, Canada. Filed Mar. 1, 1926. Serial No. 91,583. 2 Claims. (Cl. 189—37.)

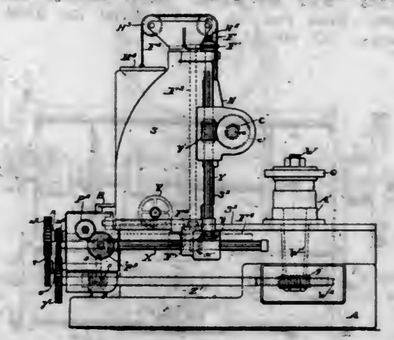
1. A structural steel joist of the class described comprising, spaced apart top and bottom chords one of which has top and bottom flanges, and posts secured to said chords and constituting the entire web system over a portion of the joist, said posts rigidly secured to that chord having top and bottom flanges.



1,634,128. APPARATUS FOR MOLDING ARTICLES FROM PULP. BERT R. WILLIAMSON, Fairfield, Me., assignor to Keyes Fibre Company, Waterville, Me., a Corporation of Maine. Filed Aug. 16, 1926. Serial No. 129,372. 5 Claims. (Cl. 92—56.)

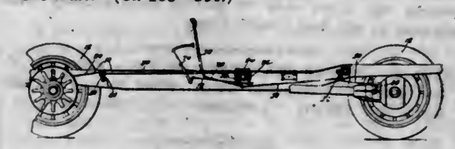
1. A machine for molding articles from pulp comprising a travelling mold having two mold members movable relatively toward and from each other and between which an article may be molded from pulp, a swinging arm on which one of the mold members is carried and by which it is moved toward and from the other mold member, a guide for controlling swinging movements of said arm as the mold travels, a pick-off member to remove a molded article from the swinging mold member, means to bring the pick-off into registry with the swinging mold member at a predetermined point in its travel, and

means other than the guide to position the swinging mold member at the time the pick-off is in registry therewith.



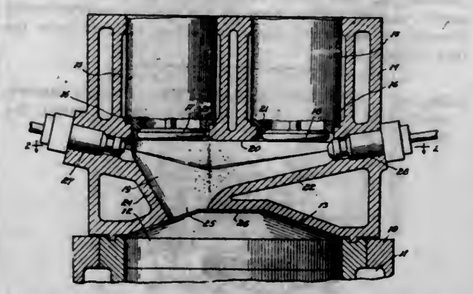
1,634,129. REFRIGERATION PROCESS AND APPARATUS. DANIEL J. YOUNG, Tacoma, Wash. Filed Oct. 20, 1925. Serial No. 63,624. 4 Claims. (Cl. 62,178.)

1. In a refrigeration process of the generating and absorption type, consisting of successive cycles, one cycle including the successive steps of heating an absorbent medium to expel a refrigerant therefrom and subsequently cooling said refrigerant by the use of a cooling fluid, the other cycle including the steps of expanding the refrigerant and subsequently absorbing the same in said absorbent medium with the use of the cooling fluid for said absorbent medium, the improvement which consists in using a measured volume of cooling fluid during each cycle, and alternating the cycles when a predetermined volume of said fluid has passed.



1,634,130. SIMPLIFIED HOBBER. WILLIAM F. ZIMMERMANN, Maplewood, N. J., assignor to Gould & Eberhardt, Newark, N. J., a Corporation of New Jersey. Original application filed Aug. 27, 1924, Serial No. 734,487. Divided and this application filed Jan. 17, 1925. Serial No. 3,021. 15 Claims. (Cl. 90—4.)

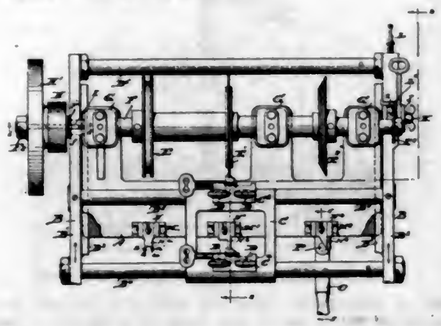
1. A balanced-drive hobbing-machine comprising a bed; a relatively heavy stanchion shiftably supported thereon; a work-supporting spindle non-shiftably journaled in said bed near one end thereof; a splined shaft and a parallel transmission shaft, each journaled on said bed transversely to said spindle; a pair of spur change gears connecting said two shafts; a splined transmission shaft journaled on said stanchion parallel with said spindle; a head slidable on said stanchion; a hob-supporting spindle on said head; a pair of angle gears connecting said hob spindle with said splined transmission shaft, one of said angle gears being splined to said shaft; a



pair of angle-gears connecting said shaft to said first-mentioned shaft, one of said gears being splined to said first-mentioned shaft; and a pair of angle gears connecting said parallel transmission shaft with said non-shiftable work spindle.

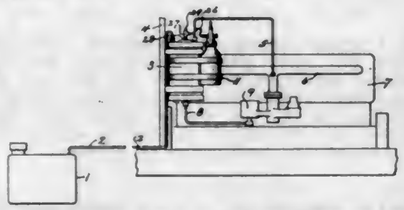
1,634,131. VEHICLE HAVING FOUR-WHEEL BRAKES. DAVID E. ANDERSON, Detroit, Mich., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Jan. 31, 1923. Serial No. 616,099. 3 Claims. (Cl. 188—106.)

1. A vehicle having, in combination, front wheel brakes, rear wheel brakes, two different devices for operating respectively said front and said rear wheel brakes, and a readily separable connection between said devices so that the front and rear wheel brakes may be operated either (1) together by either of said devices, or (2) independently of one another by said devices.



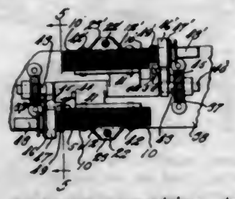
1,634,132. OIL ENGINE. OTTO A. BANNER, Milwaukee, Wis., assignor to The Falk Corporation, Milwaukee, Wis., a Corporation of Wisconsin. Filed July 11, 1925. Serial No. 42,925. 6 Claims. (Cl. 123—32.)

1. In an oil engine the combination of a cylinder having a piston space and an elongated chamber extending transversely thereof, said chamber being deeper at one end than at the other, a restricted passage connecting said piston space and said chamber adjacent the deeper



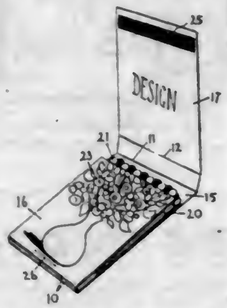
end thereof, and means for producing a plurality of impacting fuel sprays which meet in a zone in said chamber adjacent one side of said passage.

1,634,133. KEY MACHINE. HARRY BRISSER, Detroit, Mich. Filed Feb. 14, 1925. Serial No. 9,094. 5 Claims. (Cl. 90—13.2.)



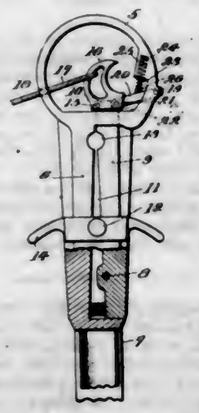
1. A key milling machine, comprising a shaft having cutters; a plurality of supports on which are positioned independently adjustable guides; a manually adjustable framoe movable transversely to the cutter shaft; a second frame hinged to and longitudinally slidable upon the first named frame and adapted to swing backwardly and forwardly to clear the guides and to position at the desired guide, and a manually operated swinging lever adapted to be detachably engaged with the hinged frame, whereby the latter may be shifted longitudinally with reference to the first named frame.

1,634,134. UPPER-CYLINDER OILER. CHARLES C. BOGARDUS, Los Angeles, Calif. Filed Nov. 16, 1926. Serial No. 148,641. 2 Claims. (Cl. 123—196.)



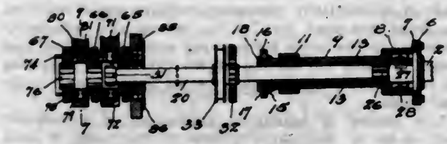
1. In combination with an internal combustion engine and a source of fuel supply therefor, of means including a vacuum tank operatively connected to said engine for transferring fuel from said source of supply to said engine, and means operated by the vacuum intermittently induced in said tank for introducing a liquid into the fuel in said tank.

1,634,135. IGNITION APPARATUS. PHELPS BROWN, Springfield, Mass. Filed Oct. 12, 1925. Serial No. 62,057. 20 Claims. (Cl. 123—149.)



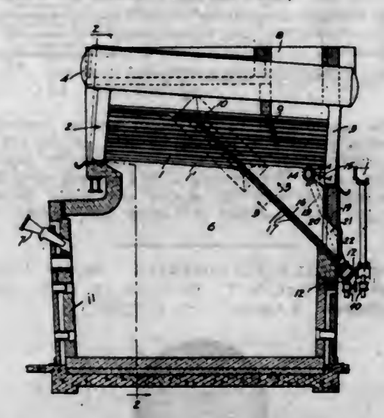
1. Ignition apparatus, comprising, two generating units including reciprocable armature flux changing means and means for operating the latter, each unit arranged for the production of an intermittent electromotive force on each stroke of said reciprocable means, controlling means arranged to time the production of the electromotive forces in said units one with the other so that the two intermittent electromotive forces produced in the two units on each stroke of said reciprocable means occur simultaneously, and connections between said units whereby said electromotive forces are merged.

1,634,136. MATCH BOOK. GEORGE FREDERIC CLARK, Boston, Mass., assignor to Boston Match Company, a Corporation of Massachusetts. Filed June 24, 1926. Serial No. 118,321. 2 Claims. (Cl. 206—29.)



1. In a match book, the combination of a rectangular one-piece cover, folded into three substantially equal portions, a book of matches fastened at the junction of the central portion or back and an adjacent portion forming an inside flap, so that the heads of the matches shall be at the junction of the central portion and the third portion or outside flap, and igniting material secured to the inner free end of the outer flap whereby a match taken from the book may be placed between the outside flap and the inside flap and be ignited by pulling the match from between the flaps without danger of igniting the other matches.

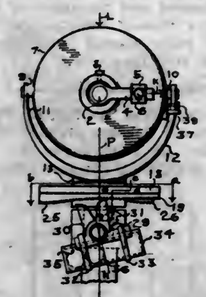
1,634,137. HAYFORK. HARRY S. COLEMAN, Dayton, Pa. Filed Nov. 4, 1926. Serial No. 146,204. 9 Claims. (Cl. 294—130.)



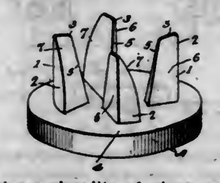
1. A locking mechanism for the jaws of a hay fork, comprising a trigger mounted upon the end of one jaw member, a ring carried by the other jaw member, a bolt bar pivotally connected to the trigger and the ring, and the end of said bar adapted to engage one jaw member, for the purpose described.

1,634,138. VARIABLE SPEED-TRANSMISSION MECHANISM. GEORGE W. DALLIMORE, Oakland, Calif. Filed Sept. 17, 1924. Serial No. 738,241. 4 Claims. (Cl. 74—59.)

1. In a variable speed transmission the combination with a series of loosely journaled spaced driving gears having co-axial hubs and locking members therein, of a slidable transmission shaft having complementary locking members thereon, an annular flange on each adjoining gear, and a bearing sleeve overlapping adjoining hubs, an outer bearing sleeve and a support therefor, and anti-friction devices between said flanges and said sleeves.



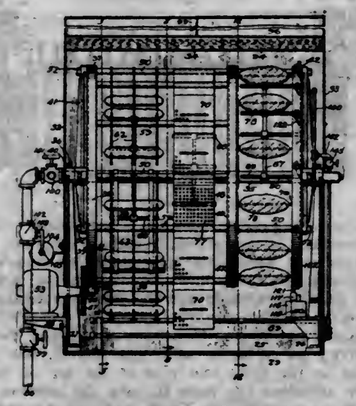
1,634,139. WATER-TUBE BRIDGE-WALL BAFFLE FOR STEAM BOILERS. EDWARD J. FRANKLIN, Salt Lake City, Utah. Filed July 7, 1925. Serial No. 41,963. 4 Claims. (Cl. 122—235.)



1. In a water tube boiler, in combination with a furnace having a combustion chamber, a bank of water tubes above said combustion chamber and connected for circulation of water therethrough, the lowermost row of said tubes having their rear end portions inclined downwardly and rearwardly to a position adjacent the rear wall of the furnace and in such position as to be clear of the remaining tubes of said bank, means connecting the rear ends of said lowermost row of tubes to the water circulating system, inclined refractory baffle means supported upon said inclined portions of said tubes and cooperating wtih the rear wall of the furnace to form a pocket below said remaining tubes for collection of solid material, and normally closed opening means in the wall of the furnace for permitting access to said pocket.

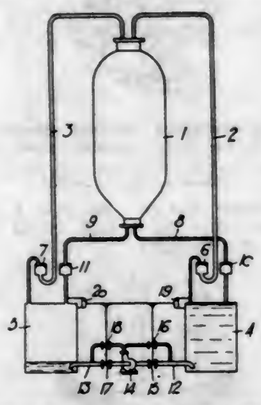
1,634,140. APPARATUS FOR IMPARTING OSCILLATING MOTIONS TO ROTATING FANS. JOSEPH N. GILBERT, Grand Island, Nebr. Filed July 3, 1926. Serial No. 120,452. 7 Claims. (Cl. 230—264.)

1. Means for imparting an oscillating motion to a spinning weight, comprising in combination a spinning axle, a second axle about which said spinning axle is rotatable, a weight unsymmetrically distributed in relation to the spinning axle and rigidly attached thereto, opposing means that oppose rotation of the spinning axle about said second axle, in clockwise direction only, a second opposing means that oppose rotation about said second axle in counter-clockwise direction only and reversing means alternating the said opposing means at fixed points in the arc of rotation about said second axle.



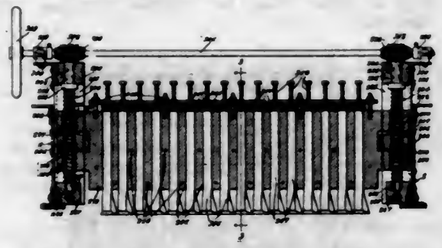
1,634,141. PUMP VALVE. WILLIAM R. HAMILTON, Dewey, Okla. Filed Mar. 7, 1922. Serial No. 541,812. 1 Claim. (Cl. 251—129.)

A valve having a plurality of wings, each of said wings being elongated in a substantial radial direction and having a plane side and an outer face substantially parallel to the axis of the valve, and the opposite side and inner face beveled and terminating in a sharp edge at the outer end, to cause the valve to turn on being engaged by a liquid, said opposite side being curved from the base to the outer end thereof in a substantially convex form.



1,634,142. APPARATUS FOR TOASTING FOOD ARTICLES. ROBERT O. HAMMOND, Buffalo, N. Y., assignor to Stanley S. Jenkins, Buffalo, N. Y. Filed July 12, 1924. Serial No. 725,720. 7 Claims. (Cl. 126—41.)

1. An apparatus for toasting food articles comprising a movable carrier, and a holder for the food articles having a bottom part adapted to support said articles on the underside, front and rear parts extending upwardly from the front and rear ends of said bottom

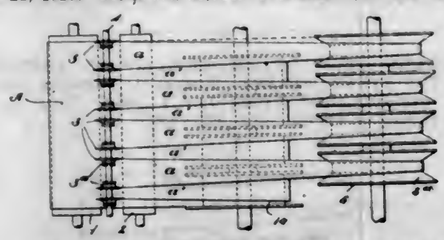


part for confining the food articles thereon and a hook detachably arranged at the upper end of said rear part and adapted to engage said carrier said front and rear parts being perforated and the space at two corresponding vertical edges thereof being unobstructed and the opposite vertical edges thereof being provided with inwardly projecting stop lugs.

1,634,143. MEANS FOR BOILING FIBROUS MATTERS. NILS KNUT FREDRIK HANSON, Stockholm, Sweden. Filed Mar. 11, 1926, Serial No. 93,986, and in Sweden Oct. 18, 1924. 2 Claims. (Cl. 92—7.)

1. An apparatus for treating fibrous matters in order to extract viscous substances therefrom comprising a digester, two receptacles, a connection between said receptacles, a pump mechanism in said connection adapted to pass a fluid in either direction through said connection, separate connections between each receptacle and the top and bottom of said digester, and back-pressure valves inserted in said last-mentioned connections.

1,634,144. PLANING OR SCARIFYING MECHANISM. FRED MERRILL HARGRAVE, Cedar Rapids, Iowa. Original application filed Sept. 15, 1925, Serial No. 56,508. Divided and this application filed Jan. 25, 1927. Serial No. 163,499. 7 Claims. (Cl. 262—10.)



1. In a road building machine, a supporting structure, a non-rotating carrier arranged within, extending transversely of and having its ends connected therewith, a set of surface working tools mounted in the front and in the rear face of said carrier, said sets permanently disposed vertically, means detachably connected with and extending across the front and rear faces of the carrier for securing said sets thereto, and means mounted at the front and rear of the top of the carrier for adjusting the tools to vary the position thereof with respect to the road surface, the said last mentioned means providing for the independent vertical adjustment of each of the tools of each of the sets.

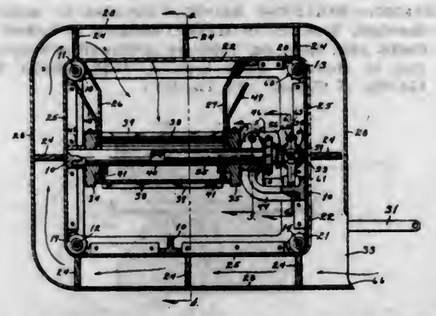
6. A planer or scarifying mechanism comprising a non-rotating carrier, a set of surface working tools mounted in the front and in the rear face of said carrier, each of the tools of each of said sets including an elongated vertically disposed shank, the shanks of each set arranged in parallelism, each of the shanks of each of the tools of each set merging at its lower end in a planer blade of substantially triangular contour, means abutting the front and rear face of the carrier and detachably connected to the latter for securing said sets thereto, and means mounted on the top of the carrier for adjusting the tools to vary the position thereof with respect to the road surface.

7. A planer or scarifying mechanism in accordance with claim 6, the planer blades of the tools of each set having cutting edges thereof arranged with the right end of a cutting edge of a blade of a set positioned directly behind the left end of the cutting edge of the next blade to the right of each set.

1,634,145. ART OF MAKING LAMINATED BELTS. EDGAR F. HATHAWAY, Wellesley, Mass. Filed Aug. 22, 1925. Serial No. 51,744. 3 Claims. (Cl. 154—4.)

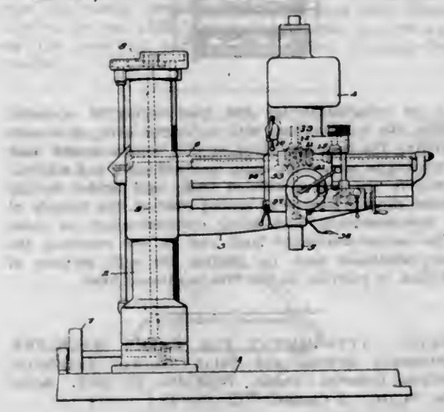
1. The improvement in the art of making laminated belts which consists in severing a sheet of the belting fabric into relatively narrow strips longitudinally tapered from end to end, and winding such a tapered strip into a laminated coil with the narrow end inside, thereby producing a laminated belt of tapered cross section.

1,634,146. PLAY-BALL COVERING. BEULAH LOUISE HENRY, New York, N. Y. Filed Dec. 11, 1926. Serial No. 154,296. 3 Claims. (Cl. 273—58.)



1. A play ball covering comprising two segmental gores, and a zonal gore connected between said segmental gores.

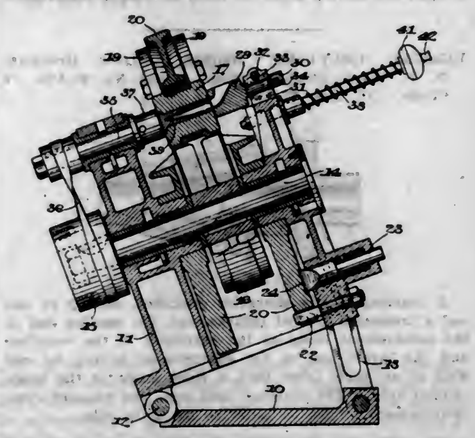
1,634,147. TRAP-NEST DOOR FOR POULTRY. ADOLPH R. HOEFT, Chicago, Ill. Filed Apr. 11, 1924. Serial No. 705,831. 12 Claims. (Cl. 119—49.)



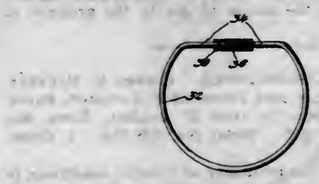
1. In a trap nest door, a swingable upper section having a fixed pivot, and a lower section interlocked with the first section so as at all times to be held in parallel relation thereto and slidable thereon, and pivot means for said second section movable from and toward said fixed pivot.

1,634,148. LOADING MACHINE. LOGAN JOHNSON, Centerville, Iowa. Filed Aug. 12, 1926. Serial No. 128,800. 6 Claims. (Cl. 198—7.)

1. A loading machine, comprising a frame, endless chains mounted for travel around said frame, a series of pick-up paddles fixed to said chains and extending transversely of the machine, an elevator mounted in said frame below the upper run of said endless chains, said elevator being arranged for adjustment of its inclination in either direction, and means for driving said elevator selectively in either direction.



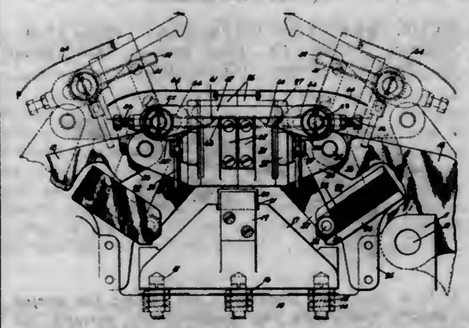
1,634,149. BRAKE MECHANISM FOR DRILL SPINDLES. DAVID C. KLAUSMEYER, Cincinnati, Ohio, assignor to The Cincinnati Bickford Tool Company, Oakley, Cincinnati, Ohio, a Corporation of Ohio. Filed Mar. 21, 1925. Serial No. 17,306. 14 Claims. (Cl. 192—17.)



1. In a radial drill, a prime-mover; a spindle; a driving connection between the prime-mover and the spindle; means to disconnect the spindle from the prime-mover; and means to arrest the rotation of said spindle when it is disconnected from said prime-mover.

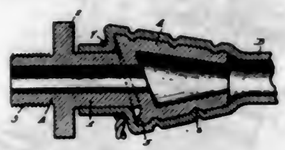
1,634,150. CONTINUOUS CENTRIFUGAL CASTING MACHINE. LOUIS T. KNOCKE, Waukesha, Wis. Filed Mar. 7, 1923. Serial No. 623,415. 9 Claims. (Cl. 22—65.)

3. In a centrifugal casting machine, a suitably mounted rotary mold having a central mold cavity, blocking means for blocking the opposite ends of the mold cavity, pouring means through which the mold cavity may be supplied with molten material while the mold is rotating between the blocking means, a casting ejector for forcing the casting out of the mold cavity while the mold is rotating, and means for shifting the position of the mold while it is rotating from its filling position between the blocking means to its ejecting position in register with the ejector.



1,634,151. PISTON. JOHN D. LANNON and RALPH R. TODD, Pontiac, Mich., assignors to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Apr. 19, 1923. Serial No. 633,218. 2 Claims. (Cl. 94—108.)

2. A split bracing ring for a piston having one side flattened to bring its ends into alinement with one another, and a turn-buckle device adjustably connecting said ends.



1,634,152. METAL-CASTING APPARATUS. CHARLES L. LEE and THOMAS C. VAN DEGRIFT, Dayton, Ohio, assignors to General Motors Research Corporation, Dayton, Ohio, a Corporation of Delaware. Filed July 23, 1925. Serial No. 45,612. 12 Claims. (Cl. 22—154.)

1. In a casting machine comprising mold sections movable toward and from each other; an ejector movably mounted on each of said mold sections, and means for

temporarily connecting the ejector mounted on one section to the other section whereby the ejectors will operate to eject the casting when the mold sections are separated.

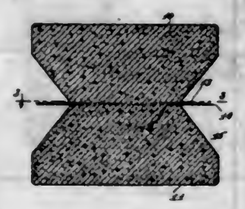
1,634,153. COUPLING. GEORGE C. LONG, Brooklyn, N. Y. Filed Feb. 27, 1926. Serial No. 91,186. 1 Claim. (Cl. 285—77.)

A coupling of the character described, having at one end a truncated conical enlargement, the smaller end of the enlargement being at the extremity of the coupling, and the larger end of the enlargement having its end wall at an angle other than a right angle to the longitudinal axis of the coupling, said wall also recessed conically inwardly from its outer to its inner edge.

1,634,154. PROCESS FOR TREATING LIQUIDS. CORNELIS LOURENS, Amsterdam, Netherlands, assignor to Naamlooze Vennootschap Algemeine Norit Maatschappij, known as General Norit Company, Limited, Amsterdam, Netherlands, a Corporation of the Netherlands. Filed Nov. 11, 1922, Serial No. 600,484, and in the Netherlands Nov. 14, 1921. 12 Claims. (Cl. 210—28.)

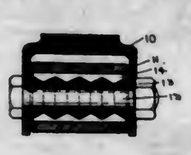
1. In a process in which a gaseous agent is caused to act upon a liquid material, the step of subjecting the liquid material to the action of gas in the presence of active carbon.

1,634,155. HOG CONDITIONER. ELBERT E. MCCARTY, CLARENCE C. DICUS, and THEODORE F. LANGKOP, Bunceton, Mo., assignors to Ovie E. Bradley, Elmo, Mo. Filed Oct. 12, 1923. Serial No. 668,194. 1 Claim. (Cl. 167—10.)



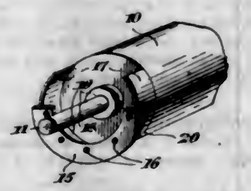
A compound for the treatment of necrotic conditions in animals comprising Areca nuts, sulphur, sodium bicarbonate, lime, common salt, Glauber's salt and cannel coal, the said constituents being in powdered form, the proportions of the Areca nuts, sulphur and sodium bicarbonate being approximately the same, the proportions of the lime, common salt and Glauber's salt each being slightly greater than the proportions of the Areca nuts, sulphur and sodium bicarbonate, and the proportion of the cannel coal being materially greater than the combined proportions of all of the other constituents of the compound.

1,634,156. MEASURING INSTRUMENT. HARRY C. MCCOMMON, Altoona, Pa. Filed July 3, 1926. Serial No. 120,419. 6 Claims. (Cl. 33—147.)



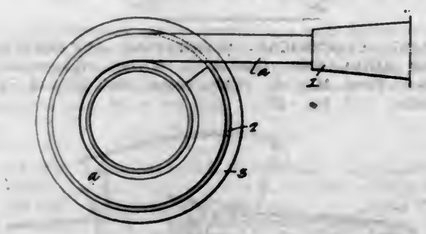
1. In a measuring instrument for testing the setting of gauges, comprising two independently movable elements presenting projecting gauging surfaces for convenient application of the gauge to be tested, micrometer means for adjusting one of these elements in definite spaced relation to the other one, so that the gauging surfaces of the two elements will be separated by a distance equal to a given desired dimension, and an indicating gauge having its operating stem rigidly fastened to the other element to give a measured indication of its movement relative to the adjusted position of the first named element.

1,634,157. BUILDING BLOCK. RAYMOND L. MORRIS, Honolulu, Territory of Hawaii, assignor to Lewers & Cooke, Ltd., Honolulu, Territory of Hawaii, a Corporation of Hawaii. Filed Sept. 8, 1926. Serial No. 134,263. 7 Claims. (Cl. 72—0.5.)



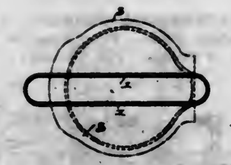
1. A building block including top and bottom faces and side faces and a plate projecting laterally from the side faces of the block, the edges of said plate being shaped to prevent the passage of ground-nesting termites or similar insect pests from the bottom to the top thereof.

1,634,158. ATTACHMENT OF MOTOR-VEHICLE ROAD SPRINGS. DOUGLAS ROBERTSON, Nuriootpa, Australia. Filed Jan. 6, 1926. Serial No. 79,621. 1 Claim. (Cl. 267—54.)



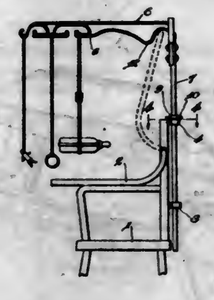
In an attachment for the road spring of a motor vehicle, the combination with a hinged bolt, of a bush encircling the bolt and fitted to said bolt, a second bush cylindrical in shape and split longitudinally and adapted to receive the first-mentioned bush, said bushes having circular threads located in spaced relation, the threads of the first-mentioned bush being complementary to those of the second-mentioned bush and an eye receiving the second-mentioned bush for holding the split sections of said bush in position on the first-mentioned bush.

1,634,159. ATTACHMENT FOR PAPER MACHINES. JEFFERSON SCHELL and ORIAN THOMAS PATTERSON, Ottawa, Ontario, Canada. Filed Jan. 27, 1926. Serial No. 84,230. 2 Claims. (Cl. 34—48.)



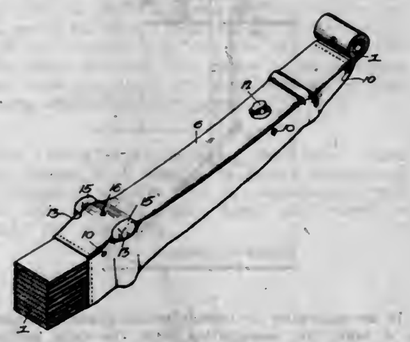
1. In a paper making machine the combination with a frame having suitable bearings therein and a roll having a spindle journalled therein designed to be supported in said bearings, of a plate rigidly mounted on the frame and formed with an extension conforming to the contour of the roll and designed to bridge the space between the end of the roll and the frame.

1,634,160. PROCESS OF MANUFACTURING INNER TUBES. CHARLES HERBERT SEMPLE, Youngstown, Ohio, assignor, by direct and mesne assignments, to Semple-Lee Processes, Inc., Akron, Ohio, a Corporation of Delaware. Filed Dec. 23, 1924. Serial No. 757,693. 4 Claims. (Cl. 18—53.)



1. The method of making collapsible endless rubber tubes which comprises shaping hot rubber stock into a continuous tube of closed cross-sectional form, bending the tube in such cross-sectional form to approximately its final condition of longitudinal curvature before substantial cooling of the tube, the tube being bent by uniform progression of external bending forces along the tube without full-section internal support of the tube in the region of such forces, cutting successive lengths from the curved portion of the continuous tube, joining together the two ends of respective lengths, and vulcanizing the resulting endless tubes under internal fluid pressure.

1,634,161. INNER TUBE FOR AUTOMOBILE TIRES. CHARLES H. SEMPLE, Canton, Ohio, assignor to Semple-Lee Processes, Inc., Akron, Ohio, a Corporation of Delaware. Filed Feb. 3, 1926. Serial No. 85,735. 6 Claims. (Cl. 152—13.)

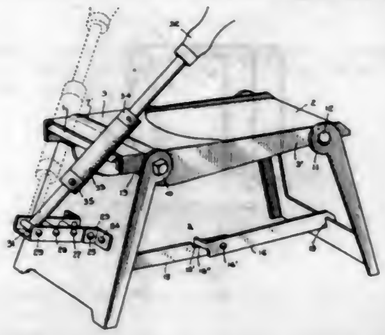


1. The combination of an inner tube and a tire casing therefor, said inner tube when in a deflated condition being of oblate cross-sectional form and having a greater outside diameter than the outside diameter of the tube cavity of the tire casing and a cross-sectional perimeter not greater than that of the tube-cavity of the casing, the construction of the tube at its inner periphery being such that by its resistance to outward pull of the side walls upon inflation of the tube, the tube will be caused to assume substantially the size and shape of the cavity before developing substantial binding pressure of the tube against the casing.

1,634,162. BRACKET. JOHN A. TESK, Chicago, Ill. Filed May 28, 1924. Serial No. 716,464. 3 Claims. (Cl. 155—188.)

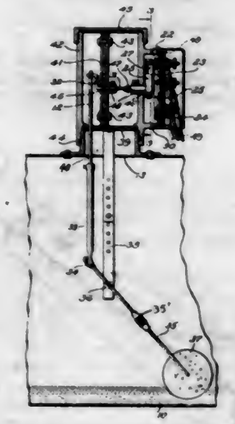
1. In a device of the character stated, an upright, means for mounting the upright on a high chair for sliding and rotary adjustment, means for securing the upright in adjustment, a bracket extending from the upright, a member extending from the upright in parallelism with the bracket and adapted for reception of a swinging tray mounted on the chair when the tray is raised, and tray receiving and retaining members carried by the upright at opposite sides thereof and disposed at right angles to the first mentioned member.

1,634,163. SPRING BOOT. JOHN WARREN WATSON and RICHARD A. WATSON, Wayne, Pa. Filed Jan. 7, 1924. Serial No. 684,860. 1 Claim. (Cl. 267—37.)



In a spring boot, the combination with a body member impervious to dirt and water and adapted to enclose the spring, of absorbent material attached to the inner side of the body member and adapted to rest against the top and sides of the spring, said body member and absorbent material having therein apertures for the projecting portions of a spring clip, an independent strip of material similar to that of the body member intermediate the latter and the absorbent member and overlying the said apertures, said strip being secured to the body member intermediate the said apertures to permit free passage of portions of the end sections thereof through the apertures in the body member.

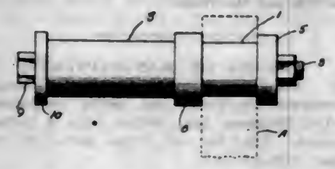
1,634,164. KNEE CLAMP. AXEL M. WESTERBERG and JACOB M. SICKLE, New York, N. Y. Filed Dec. 23, 1926. Serial No. 156,623. 9 Claims. (Cl. 29—83.)



1. A foldable tool holding and edge finishing device comprising in combination a pair of relatively movable

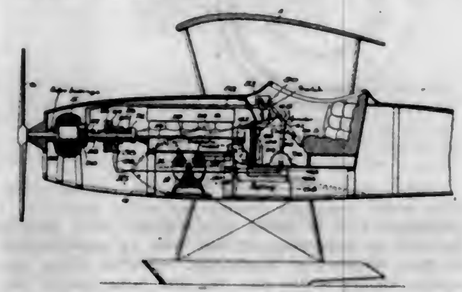
jaws pivotally connected with each other, relatively movable supports for the device hingedly connected to

one of said jaws, the other of said jaws being freely disposed so that manual pressure may be applied thereto for clamping the tool in said jaws.



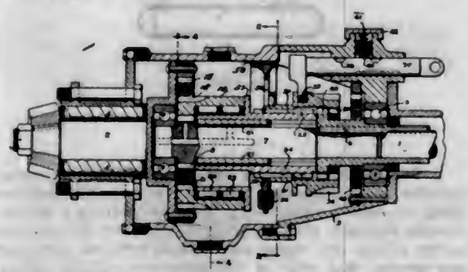
1,634,165. ELECTRIC GASOLINE GAUGE. WILLIAM EDWARD WILLIAMS, Roosevelt, N. Y. Filed Jan. 22, 1925. Serial No. 4,091. 1 Claim. (Cl. 73—82.)

In an apparatus for indicating the quantity of gasoline in a tank, the combination with the tank having an opening in the top wall thereof, of a housing detachably connected with the tank at its opening, removable partitions in said housing which combine with the walls of the housing to provide an airtight chamber therein, an adjustable bracket carried by one of said partitions, an adjustable float arm pivotally connected, with said bracket, a crank turnably supported by the other of said partitions and a wall of said housing, and an adjustable rod connected to said float arm and said crank.



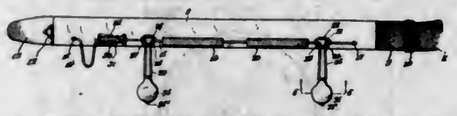
1,634,166. WRIST PIN. ORVIS C. WILLIS and OSCAR COX, Cotton Valley, La. Filed Oct. 2, 1926. Serial No. 139,218. 2 Claims. (Cl. 74—38.)

1. A wrist pin of the character described comprising a member including a body, a threaded projection formed on said body and being provided with a bore aligned with a bore in the body, a second member formed with threads on its interior surface and adapted to receive the threaded projection for associating said members in alignment, flanges formed on said members and together with the body of the first mentioned member provide a hub for receiving a crank, a washer and means passing through said bores, washer and the second member re-



spectively for securing the washer against the outer end of the second mentioned member and cooperating with the threads for holding said members associated.

1,634,167. ELECTRICAL GENERATING APPARATUS FOR AIRPLANES. GEORGE A. WILSON, Greenwood, Miss. Filed May 6, 1926. Serial No. 107,234. 5 Claims. (Cl. 244—25.)

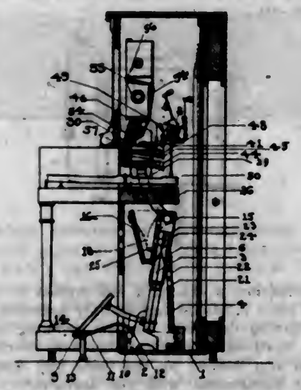


1. A prime mover comprising a gasoline motor having a crank shaft, a secondary mover comprising an electric motor having an armature shaft, a device to be driven being mounted upon the armature shaft, a mounting for the foregoing structures being set in motion by operation of said device, means operated by the motion of the mounting for generating and storing electrical current, a circuit embracing the electric motor and the current storage, said circuit having a switch capable of closure to operate the electric motor, and a clutch with an operating control therefor, having elements mounted upon continuous ends of said shafts permitting variable operation of said device by either the primary or secondary mover.

1,634,168. TRANSMISSION GEARING. CHARLES E. F. AHLM, Cleveland, Ohio. Filed June 30, 1924. Serial No. 723,153. 9 Claims. (Cl. 74—34.)

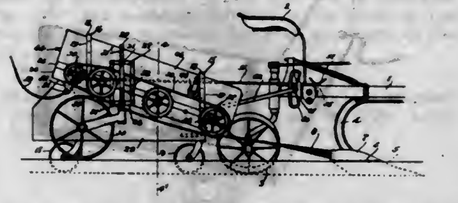
1. A driving and driven member, a pinion on the driving member, a composite internal external gear, an internal gear meshing with the external portion thereof, and having a driving connection with the driven member, an eccentric bearing for the internal external gear, a clutch for connecting the eccentric bearing with the driving member to cause it to rotate, a clutch member coacting with the first clutch member for preventing rotation of the eccentric bearing, and means for bringing the eccentric bearing to a stop before bringing the last mentioned clutch members together.

1,634,169. GARTER. MONTAGUE MOSELEY BEAR, Atlanta, Ga. Filed Nov. 29, 1926. Serial No. 151,465. 5 Claims. (Cl. 241—6.)



1. An improved garter comprising a web having securing means, a flexible loose cord secured to the web, means for forming loops in the cord, means whereby said loops may be enlarged and diminished, and hosiery clasps carried by said loops of the cord.

1,634,170. NURSING-BOTTLE NIPPLE. ARCHIBALD M. BROWN, Akron, Ohio. Filed Apr. 10, 1926. Serial No. 101,148. 3 Claims. (Cl. 128—252.)



2. A nipple having the usual teat and provided in its side wall with an opening, a wedge-shaped flap integrally connected at its butt end to the wall of the nipple and having its smaller end normally overlying the inner end of the opening to seal the same and a second wedge-shaped flap overlying the first named flap and having its butt end secured to the wall of the nipple adjacent the smaller end of the first named flap.

1,634,171. PNEUMATIC PLAYER MECHANISM FOR MUSICAL INSTRUMENTS. THEODORE P. BROWN, Worcester, Mass., assignor, by mesne assignments, to Simplex Player Action Co., Worcester, Mass. Filed Sept. 5, 1923. Serial No. 661,092. 5 Claims. (Cl. 84—33.)

1. In a player for musical instruments, the combination with a valve mechanism for controlling a pneumatic player action, and a suction creating device, of a collapsible reservoir adapted to be exhausted by the operation of said suction creating device, said reservoir comprising a substantially rigid leaf and a movable leaf of material having marked resiliency as compared to said rigid leaf.

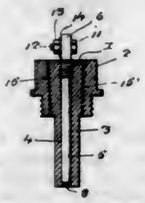
1,634,172. WEED ERADICATOR. FRANKLIN KING CARRICK, Rapid City, Manitoba, Canada. Filed Mar. 6, 1925. Serial No. 13,547. 3 Claims. (Cl. 97—10.)

1. A portable weed eradicating machine comprising a platform, an engine mounted thereon, opposing suitably supported spaced side walls positioned to one side of the platform, a set of spaced cross shafts rotatably carried by the side walls and extending therebetween, a further set of similar cross shafts alternated between the former shafts and rotatably mounted in the side walls, a driving connection between the engine shaft and one of the cross shafts, a driving connection between the latter cross shaft and the remaining cross shafts of the set containing it whereby the cross shafts of that set are rotated in the same direction and at the same speed, a driving connection between the said cross shaft and the cross shafts of the other set whereby the latter set of cross shafts are rotated in the same direction and at a different speed to the former set of cross shafts, outstanding teeth carried by all of the cross shafts, the teeth of adjacent shafts being in staggered relation and lapping, means for passing ploughed earth to the foremost teeth of the machine and with the top side of the ploughed earth uppermost and means disposed between the side walls and above the teeth yieldingly pressing the passing earth towards the teeth.

1,634,173. SOCKET TERMINAL. FRANCIS C. CHADWICK, Newark, N. J., assignor to Beaver Machine and Tool Company, Newark, N. J., a Corporation of New York. Filed Nov. 18, 1921. Serial No. 516,020. 5 Claims. (Cl. 173—332.)

1. A socket terminal comprising a resilient support member consisting of two similarly formed oppositely disposed parts, means for connecting the parts of the support member adjacent one end thereof, the opposite ends of the parts of the support member being resiliently spreadable, and a two part contact member each part of which midway of its length is pivotally connected to the resiliently spreadable end of one of the parts of the said support member with the inner ends of the said parts of the contact member lying between the parts of the support member and the outer ends of the parts of the contact member extending beyond the parts of the said support member.

1,634,174. DISPLAY SIGN AND METHOD OF PRODUCING THE SAME. SHERMAN CORNETT, Reece, Kans. Filed Apr. 20, 1926. Serial No. 103,322. 6 Claims. (Cl. 88—16.)



1. Apparatus of the character described comprising a base, a pair of transversely spaced vertical spools rotatably supported on said base, releasable means for preventing rotation of said spools, a screen strip extending between said spools and partially wound on said spools, said screen strip having openings formed therein, a pair of other vertical spools spaced transversely of the base, and a film strip trained about said last named spools and having a stretch extending parallel to said screen strip close to the inner face of the latter, said film strip having a plurality of longitudinally spaced colored areas produced thereon each adapted to cover an opening in said screen strip as said film strip moves on said second named spools close to said screen strip.

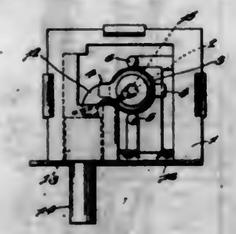
1,634,175. POWDER PUFF. JOSEPH J. COSIN, Brooklyn, N. Y. Filed Sept. 11, 1925. Serial No. 55,857. 6 Claims. (Cl. 132—78.5.)

1. A powder puff characterized by a substantially flat filler between the walls of the powder puff, and means extending substantially parallel to said walls and the filler for retaining the filler in place and the walls from collapsing toward each other from a substantially parallel relationship.

1,634,176. INDICATOR. WILFRED CUNLIFFE, Stamford, Conn. Filed Nov. 3, 1924. Serial No. 747,650. 1 Claim. (Cl. 136—182.)

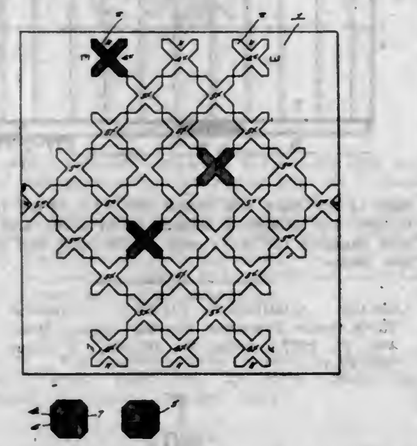
In an indicator, an electrode therefor comprising a cap provided with converging vent openings arranged therethrough and being formed with threads on a portion of its exterior surface, a depending elongated portion formed integral with the cap and together therewith being formed with a single longitudinal bore, a lead rod passing through the bore of the cap and received in the bore of the depending portion respectively, and said rod terminating adjacent the lower end of the bore of the elongated portion to provide a recess in said depending portion, said rod being threadedly secured in said cap and an aperture flat head formed on the upper end of said rod.

1,634,177. TRAP-CHAIN RING. LUKE M. DART and GEORGE G. HARRIS, Eagle Lake, Me. Filed Dec. 29, 1926. Serial No. 157,851. 2 Claims. (Cl. 43—96.)



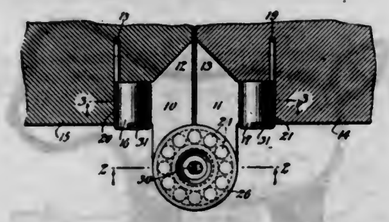
2. A device of the class described comprising a ring formed of a strip of metal having its ends twisted together, with the portions at the ends of the twist converging inwardly and connected together by a half twist, the converging portions forming an eye and the parts beyond the half twist diverging and having pointed ends.

1,634,178. CARPENTER'S GAUGE. JOHN HARRIS EDMONDSON, Pine Bluff, Ark. Filed Sept. 7, 1923. Serial No. 661,495. 1 Claim. (Cl. 33—194.)



A device of the class described, comprising relatively adjustable bars, end pieces, and means for pivotally connecting the end pieces with the bars, said end pieces each comprising a flat plate and an end flange extending perpendicularly with reference to the surface of the plate and at an angle of approximately 45 degrees with the lateral edge of the plate, and adapted to lie parallel with the edges of the bars when the end pieces are approximately perpendicular to each other.

1,634,179. SWITCH. ULRICH FEICHTER, Chicago, Ill. Filed Apr. 18, 1925. Serial No. 24,182. 1 Claim. (Cl. 200—64.)

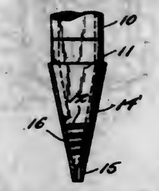


In combination, a casing, a rod carried by the casing, a contact plate rotatably and slidably associated with the rod and having depressed portions defining cam shaped elements, stationary contact elements carried by the casing, an arm defined by the plate and adapted alternately for engagement with the stationary contact elements, a ratchet defined by sectional parts, one of the sectional parts being connected to the plate, the other of the sectional parts being rotatably associated with the rod, and a plunger carried by the casing, said plunger having an end portion arranged in the path of the arm and adapted for operative engagement therewith, substantially as described.

1,634,180. GAME APPARATUS. WALTER ALFRED FELTON, Newburgh, N. Y. Filed May 17, 1926. Serial No. 109,717. 1 Claim. (Cl. 273—131.)

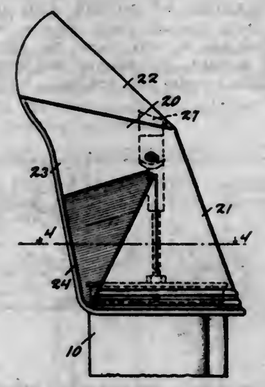
A game apparatus comprising a board having on its face sets of cruciform locations contrasting in color to the face of the board; the said cruciform locations being arranged in sets at right angles to the side edges of the board and with the several sets in parallelism and with the cruciform locations in each set spaced apart, and also with the said cruciform locations arranged in diagonal sets with the confronting ends of the cruciform locations in the diagonal sets joined to each other, and major and minor playing pieces adapted to be moved on the locations of the board; the major playing pieces being provided on their faces with cruciform figures, to coincide with the cruciform configuration of the locations on the board and to thereby conduce to movement of said playing pieces in orderly fashion.

1,634,181. HINGE. ERNEST FLAGG, New York, N. Y. Filed Dec. 30, 1925. Serial No. 78,400. 3 Claims. (Cl. 16—136.)



3. A hinge construction which comprises a pair of hinge plates, a portion of one plate being bent up at its edges to form a cup, and centrally raised to form a boss, a portion of the other plate having a relatively large central opening therein, the material at the edges of the opening being bent down to form a flange encircling the boss, said flange defining with the flange of the cup, a ball race, a cover plate to be disposed over said plate portions, centrally depressed to fit within the opening in the upper plate, said cover plate and boss having aligned apertures therein for the reception of an interlocking pin for holding the plates together.

1,634,182. COLORLESS CROOKES GLASS. PHILIP VICTOR WILLINGHAM GELL, CHARLES EDWIN GOULD, WILFRED MARSH HAMPTON, and HAROLD SHARPE MARTIN, Smethwick, England, assignors to Chance Brothers and Co., Limited, Smethwick, England. Filed May 11, 1925. Serial No. 29,615. 2 Claims. (Cl. 106—36.1.)

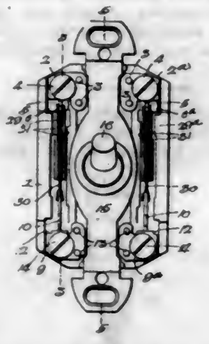


1. A glass for use in lenses, said glass containing cerium in sufficient quantities to partially absorb the ultra-violet rays and didymium in sufficient quantities to assist in the absorption of such rays and to neutralize the color that would be imparted to the glass by the cerium, and with the cerium to absorb practically all the ultra-violet rays.

1,634,183. PIPETTE. MAURILLE GERVAIS and WILFRED BIRON, New Bedford, Mass. Filed Oct. 18, 1926. Serial No. 142,408. 3 Claims. (Cl. 23—292.)

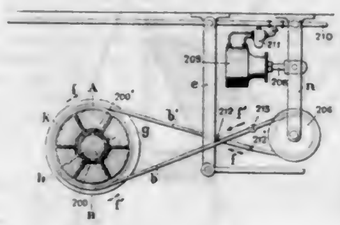
1. The combination with a tube having a tapered end, of a cone-shaped cap connected with the tapered end and having a discharge nozzle portion.

1,634,184. VENTILATOR. JACOB GOLDSTEIN, West Hazleton, Pa. Filed Mar. 1, 1926. Serial No. 91,606. 2 Claims. (Cl. 98—71.)



1. A ventilating device of the class described comprising a cowl formed from a sheet metal blank to provide a conical back portion and side portions defining the open front of the cowl, the blank being further formed to provide a transversely rounded upwardly and forwardly extending top and the material of the blank being folded upon itself longitudinally medially of the said top to provide an upstanding vane, and means for supporting the cowl for rotation.

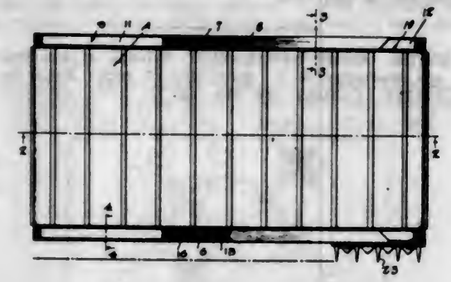
1,634,185. DOUBLE-THROW SWITCH. MONROE GUETT, Hartford, Conn., assignor to Hart & Hegeman Manufacturing Company, Hartford, Conn., a Corporation of Connecticut. Filed July 1, 1925. Serial No. 40,872. 1 Claim. (Cl. 200—15.)



The combination in a double pole, double throw switch, of a recessed base of non-conducting material; a plate extending across the recess of the base; a switch lever

pivotally mounted on the plate; a carrier located within the recess and pivotally mounted on the plate, said carrier having two sets of blades; sections of non-conducting material mounted on the carrier between the sets of blades; snap mechanism connecting the switch lever with the carrier; a pair of double terminals located at one end of the base; a single pair of terminals located at the opposite end of the base; and a single pair of inter-

mediate terminals located in the recess of the base between the double and single terminals and so positioned that, when the carrier is in one position, the blades will engage one of the contacting portions of the double terminal and one of the single terminals, and, when the carrier is shifted, the blades will engage the other contacting portion of the double terminal and the other single terminal.

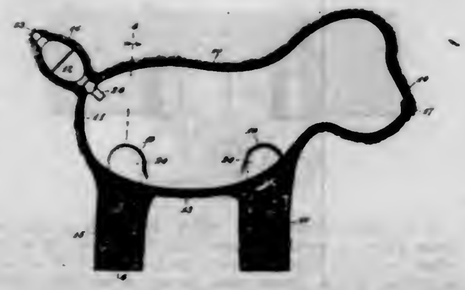


1,634,186. BRAKING OF MOTOR AND OTHER VEHICLES. PAUL HALLOT, Paris, France. Original application filed Apr. 6, 1921, Serial No. 459,140, and in France Dec. 6, 1913. Divided and this application filed Feb. 23, 1923. Serial No. 620,763. 4 Claims. (Cl. 188—141.)

1. In a braking device for motor and other vehicles, a shaft, a casing, a plurality of fixed and loose pulleys in the casing, means for causing a loose pulley to turn with the shaft, a pivoted arm, means for swinging the arm, a pulley carried by the arm, a belt passing around the fixed and loose pulleys and the pulley of the arm, a brake controlling lever, and means on the belt adapted to engage said lever.

1,634,187. PLATFORM-CANVAS-ADJUSTING MECHANISM FOR GRAIN BINDERS. HENRY HARTVIKSON, Rugby, N. Dak. Filed Oct. 5, 1925. Serial No. 60,626. 2 Claims. (Cl. 198—208.)

1. A conveyor of the character described comprising a pan, a sectional frame arranged within the pan including rigid side beams disposed at one end of the pan and slidable side beams disposed at the opposite end of the pan, guides carried by the pan for receiving the slidable side beams, rollers carried by the other ends of the rigid and slidable side beams, an endless belt trained about said rollers, guide sockets formed in the inner ends of the slidable side beams, guide rods carried by the inner

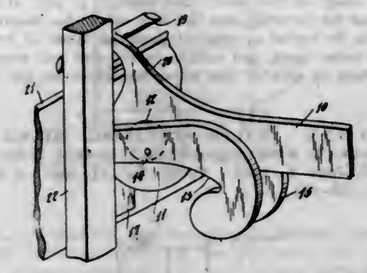


ends of the rigid side beams slidably received in said sockets, and expansion springs coiled about said guide rods engaging the inner ends of the rigid and slidable side beams.

1,634,188. ADMISSION TICKET. CLARENCE HEAD, Birch Coulee Township, Renville County, Minn. Filed Feb. 21, 1927. Serial No. 169,984. 4 Claims. (Cl. 40—1.5.)

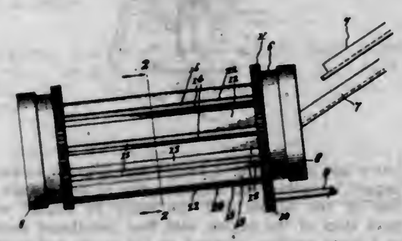
1. In an admission ticket of the character described, a frangible disc carrying admission data, means rigidly associated with the disc for insertion in a button hole and only removable from the button hole by breaking the disc, and means constructed for non-removable engagement upon the pin in back of the button hole.

1,634,189. POODLE-DOG DOLL. BEULAH LOUISE HENRY, New York, N. Y., assignor of one-half to Edwin A. Guinzburg, New York, N. Y. Filed June 24, 1926. Serial No. 118,292. 5 Claims. (Cl. 46—40.)



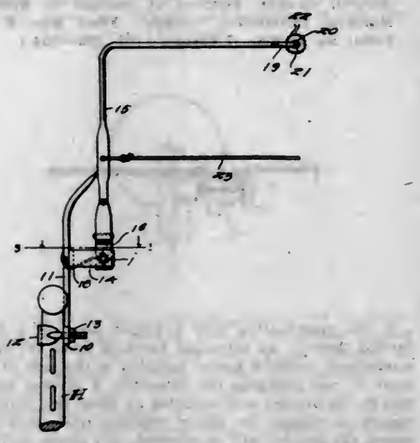
1. A doll comprising an inflatable outer structure having characteristics simulating a natural object, a hollow appendage on the outer structure and opening thereinto, and means for inflating and deflating said outer structure, said means including an air compressing and releasing device, said device arranged in said appendage of the outer structure.

1,634,190. HAIR STRUCTURE. WILLIAM HEPNER, Los Angeles, Calif. Filed Sept. 28, 1926. Serial No. 138,177. 10 Claims. (Cl. 132—53.)



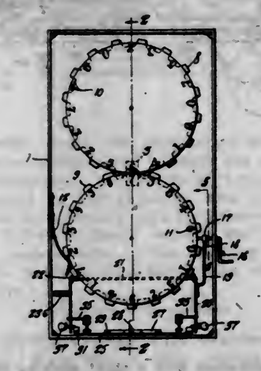
1. A hair structure comprising a relatively long and narrow foundation member adapted to span the forehead along the hair line from approximately temple to temple; strands of hair extending from all parts of one side of said foundation member; and a flexible member attached to said foundation and extending beneath the under rear side of the head and adapted to be covered and concealed by the natural hair of the wearer.

1,634,191. WRECKING TOOL. JOHN E. HOFFMAN, Casper, Wyo. Filed Sept. 22, 1926. Serial No. 136,998. 3 Claims. (Cl. 254—131.)



1. A tool of the class described comprising a lever adapted for abutment against a part of the work, a shoe adapted for abutment against another part of the work, a disk journaled on the lever, means connecting the shoe to the disk eccentrically of the latter.

1,634,192. NAIL-SORTING DEVICE. OLIVER H. HOVDA, Billings, Mont. Filed May 21, 1926. Serial No. 110,733. 5 Claims. (Cl. 209—86.)



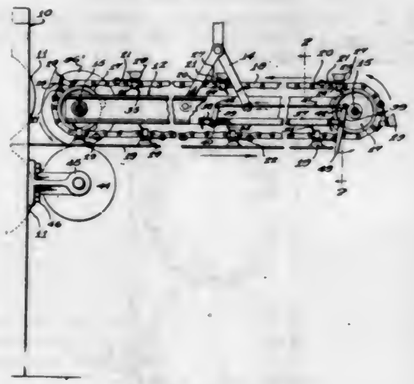
1. An improved nail sorting device, comprising a drum having sorting pockets, inclined plates for diverting the nails to the sorting pockets, long partitions in said pockets for regulating the length of nails delivered thereto, and short partitions in the pockets between the long partitions for up-ending the nails.

1,634,193. WHIPPING OR PRODDING DEVICE. WILLIAM HUBER, Bentley, N. Dak., assignor of one-half to Otto W. Meyer, Bentley, N. Dak. Filed May 20, 1926. Serial No. 110,492. 2 Claims. (Cl. 54—1.)

2. A device of the class described comprising an attaching bracket having an offset end, a U-shaped auxiliary bracket on said attaching bracket adjacent said end, a prodding instrument having an end of U-shape disposed within the auxiliary bracket, an element pivotally connecting said end to said auxiliary bracket, a spring surrounding said element and urging the instrument into contact with the first mentioned end, and means to operate said prodding instrument.

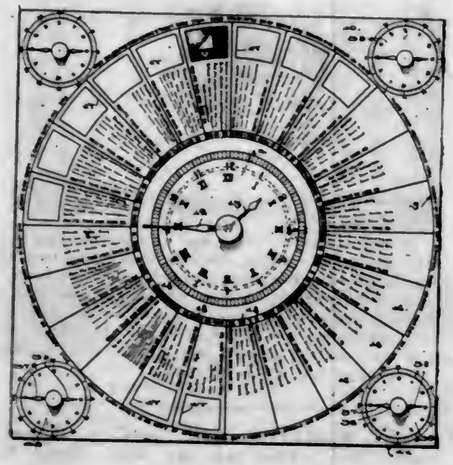
1,634,194. EDUCATIONAL TOY. JOSEPH H. JACOBS, Paxton, Mont. Filed Aug. 9, 1926. Serial No. 128,217. 4 Claims. (Cl. 35—2.)

1. In a mathematical toy, a casing having a sight opening, intermeshing toothed discs in the casing, one of said discs having a greater number of teeth than the



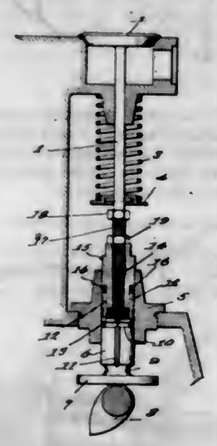
other and both of said discs having figures inscribed on the outer face thereof, and the aligning figures on the respective discs arranged to be displayed through the sight opening, a pin wheel on one of the discs, a shaft having a cranked end for engaging the pins of the disc, an operating handle for the shaft and means operable to engage the shaft to hold the same from turning.

1,634,195. LATCH. BENJAMIN W. JOHNSTON, Rosedale, Alberta, Canada, assignor of one-half to Berton A. McEwen, Drumheller, Canada. Filed Mar. 5, 1925. Serial No. 13,358. 7 Claims. (Cl. 292—254.)



1. The combination with a hinged door, of a bracket carried thereby, an extension provided upon the bracket, a relatively yieldable keeper mounted in the path of movement of and engaging the extension, a pivoted bar carried by the bracket and including an offset end portion arranged to engage the keeper whereby when said bar is moved the bracket will be released, and means carried by the bar for holding the latter against pivotal movement.

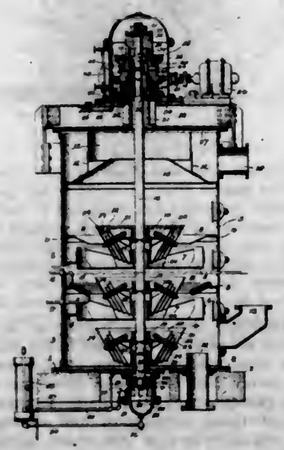
1,634,196. SHEET PILER. LEWIS JONES, New York, N. Y. Filed Jan. 17, 1927. Serial No. 161,662. 20 Claims. (Cl. 271—74.)



1. The combination with a sheet working machine having power driven means for discharging sheets therefrom, of freely movable means adapted to engage and support the sheets and to be actuated solely by movement thereof as they are discharged from the sheet working machine.

1,634,197. CLOCK-DIAL GAME. GEORGE KENT, North Chatham, Mass. Filed Dec. 8, 1926. Serial No. 153,386. 2 Claims. (Cl. 273—141.)

1. A game comprising a housing having a dial indicating a clock on the outer face thereof, a pair of hands mounted for rotation over the dial, means for causing one hand to be moved at twelve times the speed of rotation of the other hand, and indicia on the dial and representing points as gain or loss when designated by the hands.

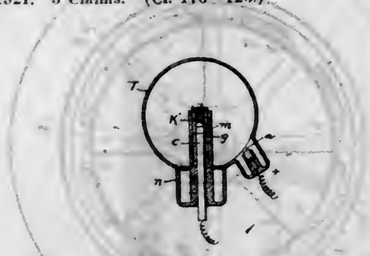


1,634,198. VALVE-ACTUATING MECHANISM. CHARLES R. KINKAID and EMIT T. SHREVE, Rotan, Tex. Filed June 7, 1926. Serial No. 114,358. 1 Claim. (Cl. 123—90.)

A valve lift comprising a tappet and a guide therefor, said tappet including two sections, one to be engaged by the cam of the engine and the other to engage with the valve stem of the engine, said first mentioned section having a body portion received in the guide and having a head portion to be contacted by the cam, said body portion having a reduced neck at its juncture with the head and an annular groove adjacent to its outer end, said body having longitudinal oil grooves therethrough, pins

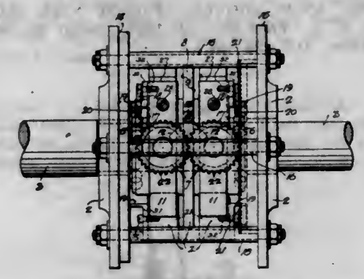
extending from the outer end of the said section, the second tappet section having a portion of its body received in the guide and having openings for the reception of the pins, a compressible ring gasket between the tappet sections, a tappet screw threaded in the bore of the last mentioned tappet section, a binding nut thereon contacting with said section and a spring received in the bore of the last mentioned tappet section, contacting with the end of the screw therein and also contacting with the first mentioned tappet section.

1,634,199. CENTRIFUGAL CONTACT APPARATUS. PAUL M. KUEHN, Baltimore, Md., assignor to The Bartlett Hayward Company, Baltimore, Md., a Corporation of Maryland. Filed Feb. 2, 1923. Serial No. 616,512. 3 Claims. (Cl. 308—142.)



1. In combination with a vertically disposed shaft: a rockable side thrust bearing for the lower end of the shaft; a fixed supporting member located adjacent the upper end of the shaft and through which said upper end passes in spaced relation; a driven hub-like member supported on said supporting member; a second hub-like member secured to the upper end of the shaft; toothed driving connections between said hubs; a ring-shaped block encircling the shaft and interposed between the adjacent ends of the hub-like members; a pair of diametrically disposed pins interposed between the lower hub and said block; and a second set of pins interposed between the block and the lower face of the upper hub, the two sets of pins being arranged at right angles to each other, said pins and blocks permitting the shaft to tilt or swing.

1,634,200. RAIL-FASTENING MEANS FOR RAILWAY TIES. CHARLES W. LEE, Lock Haven, Pa. Filed Jan. 13, 1927. Serial No. 160,879. 2 Claims. (Cl. 238—279.)

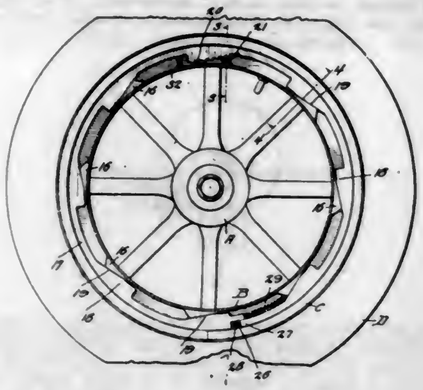


1. Rail fastening means for railway ties, comprising a tie having a vertical opening, clamping members slidably engaging in said opening and having alined longitudinal slots therein, said members provided with means to engage the base of a railway rail, a rod slidably engaging the tie and engaging in said slots to hold the members in clamping positions, a shaft journaled in the tie, and operative connections between the shaft and rod to move it into and out of engagement with the clamping members.

1,634,201. GLOW-DISCHARGE TUBE. JOSEPH MASSOLLE and JOSEF ENGL, Berlin-Grunewald, and HANS VOGT, Berlin-Wilmersdorf, Germany, assignors to Tri-Ergon Limited, Zurich, Switzerland. Filed Mar. 20, 1922, Serial No. 545,376, and in Germany Mar. 24, 1921. 5 Claims. (Cl. 176—126.)

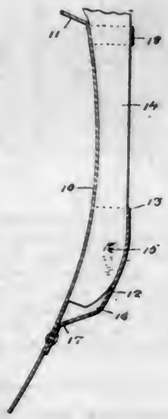
1. In a glow discharge tube adapted for use in photographically recording electric current variations having a cathode and anode and containing a gas, adapted to provide a luminous discharge in the space adjacent to the cathode and based thereon, the combination of an elongated cathode member having a forward end surface adapted to be entirely covered with a negative glow discharge, and means for preventing the spreading of the glow from said forward end surface on to any surfaces adjacent to said forward end surface.

1,634,202. ROLLER CLUTCH. STOCKTON H. MORTIMER, Philadelphia, Pa. Filed Jan. 7, 1926. Serial No. 79,853. 8 Claims. (Cl. 192—45.)



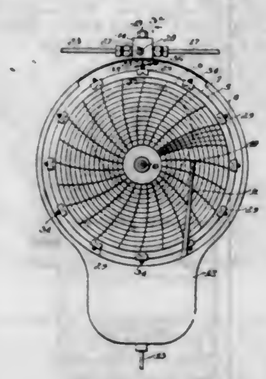
2. In a roller clutch, the combination of rotary driving and driven members, one of which has a flat friction surface perpendicular to the axis of rotation, a radial cylinder carried by and rotatable with respect to the other member and provided with a friction surface thereon, and a roller interposed between the members and adapted to engage both friction surfaces to transmit power in one direction from the driving member to the driven member.

1,634,203. DEMOUNTABLE RIM. ERNST W. NELSON, Ong, Nebr. Filed Feb. 8, 1927. Serial No. 166,723. 3 Claims. (Cl. 301—27.)



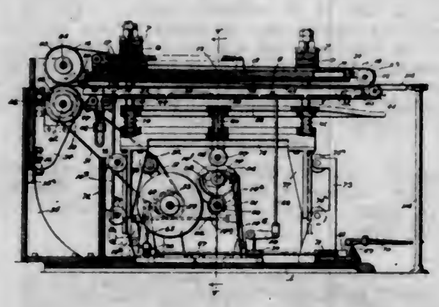
1. In a wheel, the combination with a felloe having an annular groove adjacent to one side thereof and opening through the outer periphery thereof, an abutment formed on the felloe circumferentially thereof at the side opposite the groove, a demountable rim engageable

on the felloe and having inner spaced circumferentially arranged abutments, one of the abutments being cooperative with the abutment on the felloe, a split partially overlapping expansion ring mounted in the groove in the felloe and having spaced beveled projections, risers arranged in the base of the groove and coacting with the beveled projections on the ring to effect the expansion and contraction of the latter and when expanded to



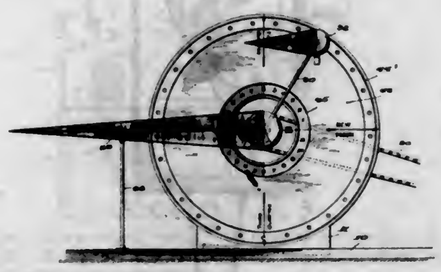
engage and lock the other abutment on the demountable rim, a toothed rack formed on the inner periphery of the ring, a pinion arranged in the groove in the felloe and meshing with the toothed rack, an actuating head connected with the pinion and disposed exteriorly of the felloe, means rotatably supporting the pinion in the felloe, and means carried by the last named means and cooperating with said head to maintain it fast after adjustment of the pinion.

1,634,204. SNOW SHOVEL. FAYETTE NIMS, Montour Falls, N. Y. Filed Feb. 24, 1926. Serial No. 90,389. 2 Claims. (Cl. 294—54.)



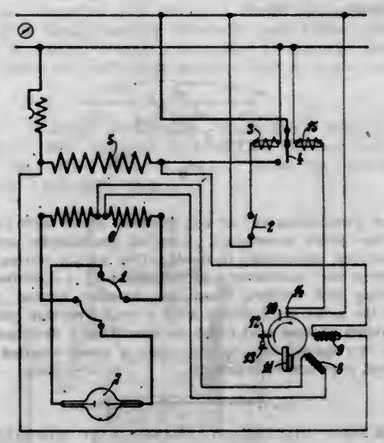
1. In a snow shovel, a blade curved from its lower to its upper edge, a handle socket attached to and extending down the back of the blade below the center thereof and opening upwardly, the outer wall of the socket having a curve slightly different from the curve of the blade and providing an opening of less area than the cross sectional area of the socket, a handle shaped adjacent its lower end to conform to the shape of the socket and providing a head-like portion to engage the walls of the socket and a strap near the upper edge of the blade around the handle which acts as a handle lock.

1,634,205. COMBINED RECORDING AND CONTROLLING MECHANISM. RAYMOND E. OLSON, Rochester, N. Y., assignor to Taylor Instrument Companies, Rochester, N. Y., a Corporation of New York. Filed Apr. 18, 1925. Serial No. 24,242. 3 Claims. (Cl. 161—7.)



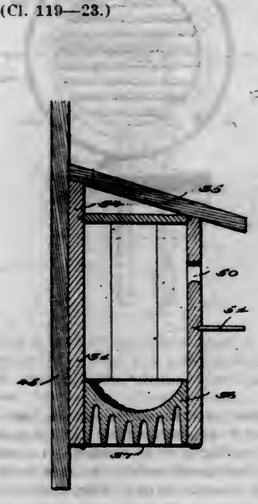
1. In a recording apparatus having a record chart holder, a motor for rotating the chart holder and a casing enclosing the same, the combination of a device disposed outside the casing and means for operating the same, including an element movable radially through the casing and an abutment constructed and arranged to be attached to the periphery of the chart holder for cooperation with the said element, said abutment including a contact member adjustable in radial direction.

1,634,206. SEAM OPENER. HERBERT E. PAGE, Syracuse, N. Y., assignor to United States Hoffman Machinery Corporation, New York, N. Y., a Corporation of Delaware. Filed Mar. 16, 1925. Serial No. 16,002. 13 Claims. (Cl. 68—9.)



1. In a seam opening and pressing machine, the combination of a pair of relatively moving pressing elements; a spreader for the seam located at the end of one of said elements; a tiltable support therefor; a roller carried by the support; an endless belt passing about said roller, with one run of the belt passing inwardly beneath and along the face of the adjacent pressing element; a second endless belt one run whereof passes along the pressing face of the other pressing element; and means under the control of the operator for manipulating the tiltable support.

1,634,207. ASTRONOMICAL DEVICE. DAVID PHILLIPS, Daytona Beach, Fla. Filed Apr. 12, 1926. Serial No. 101,493. 7 Claims. (Cl. 35—3.)

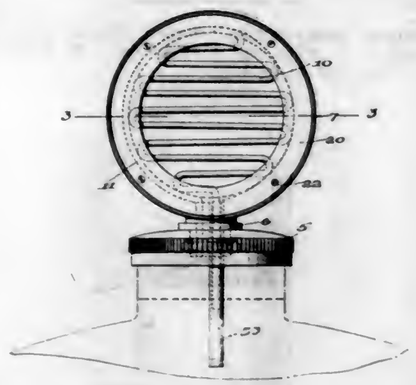


1. A device of the class described comprising a globe representing the earth, a conically shaped member embracing a portion of the globe and extending outwardly therefrom, said member being adapted to represent the shadow of the earth, means for maintaining said shadow in a predetermined position, a globe adapted to be revolved about the first mentioned globe and representing the moon, and means for causing the second mentioned globe to be revolved around the first mentioned globe and pass through the shadow associated with the first mentioned globe.

1,634,208. ELECTRIC RELAY FOR RADIOGRAPHY. HECTOR PAUL PILON, Paris, France. Filed Sept. 24, 1925. Serial No. 58,462, and in France Nov. 18, 1924. 3 Claims. (Cl. 250—34.)

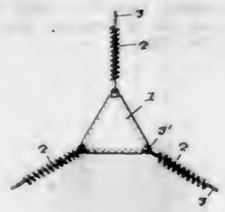
1. In an X-ray photographic apparatus, a transformer for supplying an X-ray tube and including primary and secondary windings, a field winding shunt connected with the primary winding of the transformer, a second field winding connected in series with the secondary winding of the transformer to produce with the first field winding a magnetic field, a rotatable disc arranged in said magnetic field, and means for opening the circuit of the transformer primary winding upon rotation of the disc to a predetermined extent.

1,634,209. BIRD HOUSE. OSCAR C. REIBER, West Webster, N. Y. Filed Sept. 4, 1925. Serial No. 54,494. 5 Claims. (Cl. 119—23.)



1. In a bird house, a nesting compartment open at its lower end, and a nest-bottom made of moisture absorbent material and fitting in the lower end of the compartment, said nest-bottom having spaced ventilating channels in its lower face, said channels being open to the atmosphere at their bottoms.

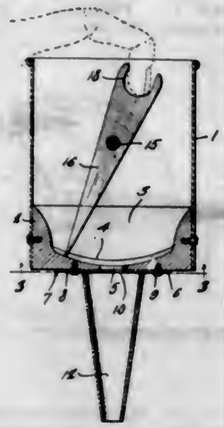
1,634,210. DIAPHRAGMLESS MICROPHONE. EUGEN REISZ, Berlin-Dahlem, Germany. Filed Nov. 12, 1925, Serial No. 68,665, and in Germany Sept. 19, 1925. 9 Claims. (Cl. 179—122.)



1. In a microphone, a vibration free insulating base, a pair of fixed electrodes mounted therein, a layer of contact material extending between and over said fixed electrodes, said contact material consisting of a mixture of coarse grained and fine dust or powder filling the interstices between the grains and flexible means for holding and pressing the grains together with a constant normal pressure.

1,634,211. CONDENSER FOR AUTOMOBILE RADIATORS. GEORGE D. ROBERTS, Hartford, Conn. Filed Apr. 9, 1926. Serial No. 100,926. 3 Claims. (Cl. 257—25.)

1. A condenser for automobile radiators comprising a cap adapted for attachment to an automobile radiator neck, a body having a stem connected to said cap, a serpentine tube positioned within the said body and having a plurality of communicating downwardly inclined branches for the passage of fluid, and keeper plates detachably secured to opposite sides of said body and detachably holding said serpentine tube in place.



1,634,212. MACHINE SPRING. GRACE ROGERSON, Jasonville, Ind., assignor of one-third to Oliver Shank, Jasonville, Ind. Filed May 26, 1926. Serial No. 111,831. 1 Claim. (Cl. 267—69.)

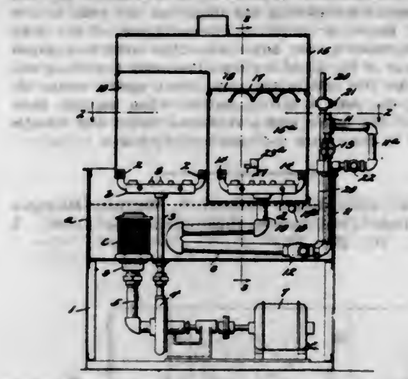
A spring device of the class described comprising a central member of triangular shape and formed of a triangular piece of wire having each corner looped and a triangular strip of material having its edges rolled around the straight portions of the wire, with its corners cut away to expose the loops and a coiled spring connected with each loop.

1,634,213. SEEDER. JAMES W. ROOKWOOD, Mountain View, Okla. Filed Oct. 5, 1925. Serial No. 60,540. 1 Claim. (Cl. 221—119.)

A seeder including a hopper body, a removable bottom therefor, having a concave upper face formed with a central opening, a longitudinal channel within said bottom traversing the opening, a manually actuated agitator having its lower end movable through said channel, an outlet spout having communication with the opening, an

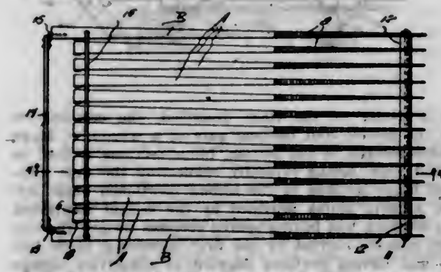
adjustable plate mounted upon the spout and the bottom and formed with a V-shaped opening having a rounded end portion and means whereby said plate may be manually adjusted to regulate the flow of material from the hopper through the spout.

1,634,214. ASSEMBLING DEVICE FOR BRIDGES, PLATES, AND THE LIKE IN TIMEPIECE MOVEMENTS, COUNTING MECHANISMS, AND LIKE APPARATUS. CHARLES ROSAT, Boudry, Switzerland, assignor to Fabriques des Montres Zenith, successeur de Fabriques des Montres Zenith Georges Favretacot & Co., Le Locle, Switzerland. Filed May 10, 1926, Serial No. 108,184, and in Switzerland May 26, 1925. 1 Claim. (Cl. 58—1.)



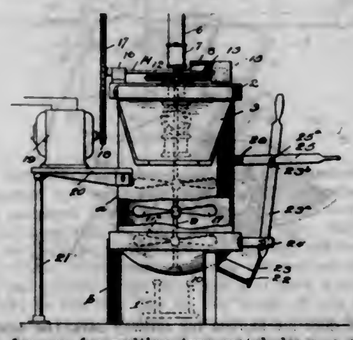
An assembling device for bridges, plates and the like in time piece movements, counting mechanisms and like apparatus, comprising in combination with a setting pillar between the components to be assembled a combined distancing and holding clasp like member formed of one and the same steel ribbon with a rolled portion pivotally arranged around said pillar to constitute a distance piece and two spring ears to constitute a clasp adapted to be turned over said components.

1,634,215. BOTTLE WASHING AND STERILIZING APPARATUS. LOUIS ROSENFELD, Baltimore, Md., assignor to Cherry-Bassett Company, Baltimore, Md., a Corporation of Delaware. Filed Jan. 27, 1927. Serial No. 163,857. 4 Claims. (Cl. 141—7.)



1. The combination with a tank adapted to contain washing liquid, a washing spray-head adapted to drain into the tank and means for forcing liquid from the tank

through the spray-head, of a rinsing spray-head, a conduit submerged in the tank and communicating with said latter head, means for admitting a restricted flow of

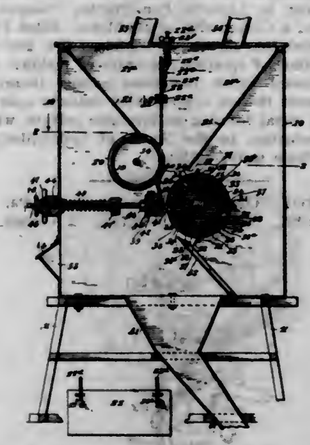


water from a source outside the tank to said conduit to slowly fill the same, and means for admitting steam to said conduit at intervals.

1,634,216. ROAD SCRAPER. ROBERT A. RUSSELL, Rustburg, Va. Filed Dec. 9, 1926. Serial No. 153,652. 14 Claims. (Cl. 37—143.)

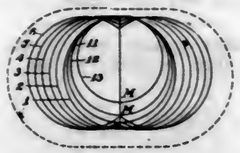
5. A device of the class described including a plurality of blades disposed in coextensive relationship, means for holding said blades in said relationship, each blade including an elongated web having a flange on one edge thereof, said flange tapering forwardly, said blades being disposed in spaced relation, and means at the rear ends of said blades for preventing portions thereof from overlapping.

1,634,217. DROSS FURNACE. GEORGE C. SCHIMPF, Baltimore, Md., assignor to Harry D. Harvey, Baltimore, Md. Filed Nov. 23, 1925. Serial No. 70,809. 1 Claim. (Cl. 266—34.)



In a furnace for melting type metal dross, a melting pot having a hopper at one side, near the top, for the admission of dross, a cover extending over the furnace, a lid for said hopper, hinged to said cover, a shaft arranged vertically in the pot and extending through the cover, said shaft having blades at its lower end, a horizontally arranged shaft geared to said vertical shaft, bearings on the cover in which said horizontal shaft is mounted, and means for driving said latter shaft.

1,634,218. TABLE. ADINA SMALL, New York, N. Y. Filed Feb. 4, 1922. Serial No. 534,049. 1 Claim. (Cl. 45—47.)



A table having a supporting column and a plurality of leaves of irregular oval shape and a supporting column, a single rotatable and slidable hinge connecting the inner end of each leaf to the top of said column, said leaves being spaced apart, means for supporting each said leaf, comprising a rod hinged to the leaf and retained within said column when in inoperative position, a plurality of stops within the column and operable upon said rod and a spring adjacent each said stop to cause said rod to engage said stop.

1,634,219. GRAIN-REDUCING MACHINE. OLIVER P. SMITH, Portland, Oreg. Filed Nov. 4, 1925. Serial No. 66,782. 2 Claims. (Cl. 83—6.)

1. In a grain reducing machine of the character described, comprising a casing, a roller journalled transversely in the casing, adjustable cutter blades in parallelogram relation upon the roller, and having their knife edges projecting from the surface thereof, a cutter bar arranged at one side of the roller and having plural knife edge ribs longitudinally thereof coacting with the knife edges of the blades, a guide rail carried upon the top of said bar, tensioned adjustable means supporting the bar in working relation to the roller, and a feeding roll above and coacting with the guide rail.

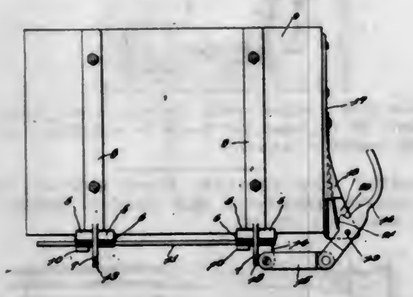
1,634,220. INTERNAL STRUCTURE FOR LARGE SUBMARINES WITH TWIN-SCREW PROPELLERS. NABOR SOLIANI, Genoa, Italy, assignor to "Ansaldo" Societa Anonima, Genoa, Italy. Filed Apr. 10, 1924, Serial No. 705,653, and in Italy Apr. 13, 1923. 4 Claims. (Cl. 114—16.)

1. An improved internal structure for submarines of the character described, comprising a body composed of fore and aft sections, a uniform midship portion the cross section of which consists of the part peripheries of two intersecting circles, and the fore and aft portions of the body being tapered uniformly and having the cross section consisting of part peripheries of circles of the same diameter of the circles of the midship portions and with the centers of the circles approaching one another towards the end of the ship, thereby obtaining a perfectly developed surface.

1,634,221. MANUFACTURE OF BETAINE HYDROCHLORIDE, ETC. DONALD K. TRESSLER, Pittsburgh, Pa., assignor to Larrowe Construction Company, Detroit, Mich., a Corporation of Michigan. Filed July 2, 1924. Serial No. 723,684. 7 Claims. (Cl. 260—112.)

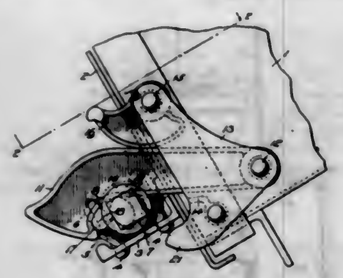
1. A process of recovering betaine hydrochloride and glutamic acid from the residual liquors of beet molasses which comprises adding hydrochloride acid to the cool solution, thus precipitating betaine hydrochloride and inorganic chlorides and subsequently heating the remaining solution to precipitate the glutamic acid as glutamic acid hydrochloride.

1,634,222. PROCESS OF PREPARING BETAINE HYDROCHLORIDE. DONALD K. TRESSLER, Pittsburgh, Pa., assignor to Larrowe Construction Company, Detroit, Mich., a Corporation of Michigan. Filed July 13, 1925. Serial No. 43,895. 6 Claims. (Cl. 260—112.)



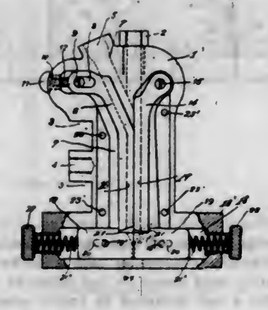
1. The method of treating concentrated residual liquors of beet molasses which comprises adding thereto and causing to react therein concentrated sulfuric acid and a chloride of a metal forming an insoluble sulfate, with the resulting production in the liquor of hydrochloric acid and the insoluble metal sulfate.

1,634,223. TOY. OTTO T. WEAVER, Dormont, Pa. Filed Jan. 24, 1927, Serial No. 163,182. 2 Claims. (Cl. 46—40.)



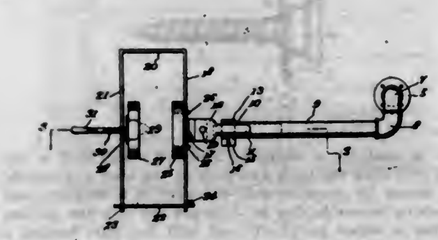
1. In a toy of the class described, a figure, an arm pivoted to the figure, a revoluble stop and go signal adjacent to the figure, a spring actuated motor, stop means for the motor, a wheel having spaced lugs operated by the motor, a finger in the path of contact with the lugs of the wheel, a swingable yoke to which the finger is pivoted, spring means for locking the finger on the yoke in one position, means actuated by the swinging of the yoke when influenced by the finger when the latter is engaged by the lugs of the wheel for simultaneously imparting motion to the arm and to the stop signal, spring means influencing the yoke to initial position when the lugs have ridden off the finger and a combined buffer and whistle actuated by the return movement of the yoke.

1,634,224. END GATE. HENRY O. WENZEL, Michigan City, Ind. Filed July 6, 1925. Serial No. 41,801. 1 Claim. (Cl. 296—57.)



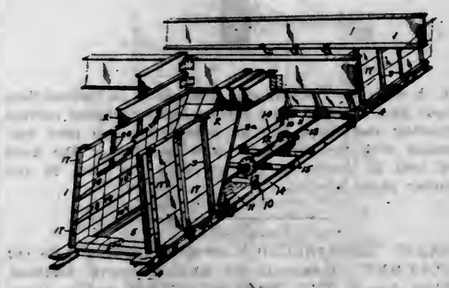
In a device of the class described, the combination with the bottom and the end gate of a wagon, of hinge sections secured to the bottom, hinge sections secured to the end gate, means pivotally connecting the first mentioned hinge sections to the second mentioned hinge sections, arcuate plates provided by the second mentioned hinge sections, and having spaced recesses formed therein, means slidably carried by the first mentioned hinge sections and having portions adapted to selectively engage the recesses, and means for operating said last mentioned means, said operating means including a pivotally supported operating lever, a link connection between the operating lever and said last mentioned means, and a spring member controlling operation of the operating lever in one direction.

1,634,225. DOOR MECHANISM FOR RAILWAY CARS. WILLIAM E. WINB, Toledo, Ohio. Filed Aug. 19, 1925. Serial No. 51,095. 10 Claims. (Cl. 105—308.)



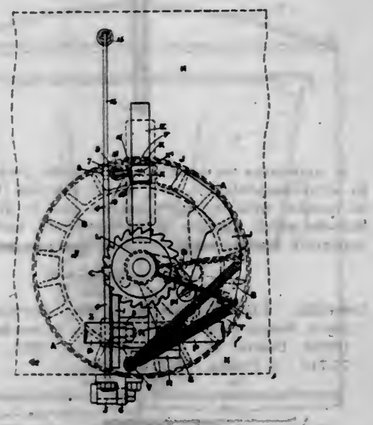
1. In a door mechanism for railway cars, the combination with a hinged door, of a cam member rotatably mounted on said door, a pivoted hook mounted on the car body and adapted to cooperate with said cam member, said hook having a shoulder adapted to be engaged by said cam member to prevent an opening movement of said door, the axis of rotation of said cam member passing between said shoulder and the pivotal center of the hook in all positions assumed by said cam member when the latter is in engagement with said shoulder, and means for preventing an accidental unlocking rotation of said cam, said means including said hook and a member cooperating with said hook for preventing the latter from moving to unlocked position.

1,634,226. NAIL BOX FOR NAILING MACHINES. EMILE ALIBERT, Paris, France. Filed Dec. 12, 1925, Serial No. 75,090, and in France Dec. 12, 1924. 2 Claims. (Cl. 1—5.)



1. A nail box for nailing machines, comprising a body having a recess in one face thereof, a pair of laterally movable nail guiding bars mounted in the recess, said body having a passage therein for feeding nails between the bars, nail engaging dies slidably and yieldably associated with the body for engaging the nails to hold the same in driving position, said dies being interlocked and movable with the bars.

1,634,227. RADIATOR-REPAIR STAND. JOHN R. ALFORD and LUTHER ALEXANDER, Henderson, Tex. Filed Nov. 1, 1926. Serial No. 145,624. 1 Claim. (Cl. 113—111.)

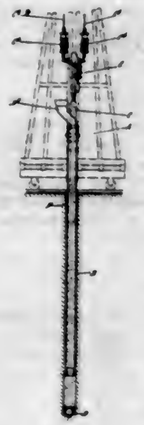


A radiator repair stand comprising a standard, an arm supported for horizontal and vertical adjustment from said standard, and a radiator repair frame swivelly supported from said arm and comprising rear, front and an end bar, said rear and front bars having notches at their front sides, a removable notched end bar adapted to fit into the notches of the front and rear bars, a wooden disc secured to the rear bar on the inside of the frame, an adjustable head mounted opposite said wood disc, and a traveling wood disc carried by said head, said wood discs adapted to clamp upon opposite sides of the radiator.

1,634,228. ASH-HANDLING EQUIPMENT. FRANK B. ALLEN, Lower Merion Township, Montgomery County, Pa., assignor to Frank H. Dunbar, Cleveland, Ohio. Original application filed Mar. 21, 1921, Serial No. 454,321. Divided and this application filed Apr. 9, 1926. Serial No. 100,894. 4 Claims. (Cl. 110—165.)

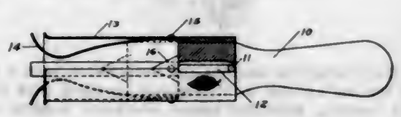
4. In hopper construction, in combination, floor beams, a hopper suspended beneath and supported from the said floor beams, the said hopper comprising spaced ribs secured at their upper ends to the floor beams, a gate frame secured to the lower ends of the said ribs, and metal wall plates disposed within and secured to the said ribs.

1,634,229. WRAPPING MACHINE FOR WRAPPING FOR PARCELING TOFFEE, CHOCOLATE, OR THE LIKE. HARRY BRADWELL, Halifax, England, assignor to John Mackintosh and Sons, Limited, Halifax, England, a British Company. Filed May 19, 1924, Serial No. 714,352, and in Great Britain May 24, 1923. 9 Claims. (Cl. 93—2.)



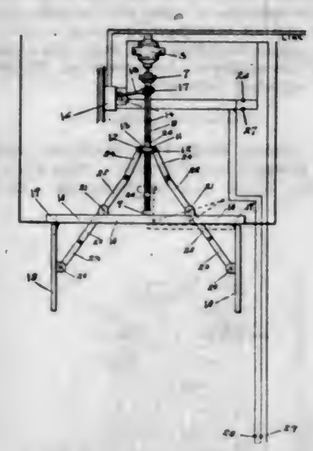
1. In a wrapping machine the combination with a support for the articles to be wrapped provided with a delivery opening, parceling means positioned beneath said opening, and intermittingly acting means for feeding a series of articles on the support to said delivery opening successively, of a platform movable with each movement of the article feeding means to a position between the delivery opening of the support and the parceling means, and means for automatically withdrawing said platform from beneath said opening between the step by step movements of the feeding means.

1,634,230. FASTENER STUD. MOSES F. CARR, Lexington, Mass., assignor to Carr Fastener Company, Cambridge, Mass., a Corporation of Maine. Filed Aug. 25, 1925. Serial No. 52,323. 5 Claims. (Cl. 24—219.)



1. A separable fastener stud comprising, in combination, a body part having a head portion and a threaded portion extending therefrom, and an imperforate cap part conforming with the peripheral wall and top of the head and held in assembled relation with the head by the peculiar shape thereof.

1,634,231. CONSTRUCTION OF CONCRETE PILES OR COLUMNS. ALFRED HILEY, Rickmansworth, England. Filed Jan. 6, 1922, Serial No. 527,389, and in Great Britain Feb. 17, 1921. 10 Claims. (Cl. 61—57.)



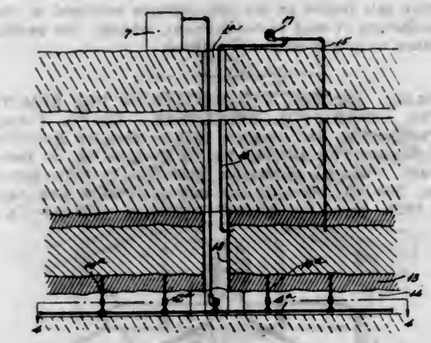
4. Apparatus for constructing concrete piles of columns in situ comprising a tube which contains the concrete in contact with its inner surface and is disposed in a hole in which the pile is to be formed, and means for imparting vertical vibratory movements to said tube.

1,634,232. FIREWORKS HOLDER. RICHARD S. MOUSHON, Peoria Heights, Ill., assignor of one-half to W. G. Hiller, Peoria, Ill. Filed Dec. 16, 1925. Serial No. 75,716. 5 Claims. (Cl. 102—22.)

1. In a fireworks holder, the combination of a cylindrical receiver, a handle therefor, means for holding a piece of fireworks in the receiver including rigid means for holding the fireworks at the closed end of said receiver and resilient means adapted to engage said fireworks near the open end of said receiver.

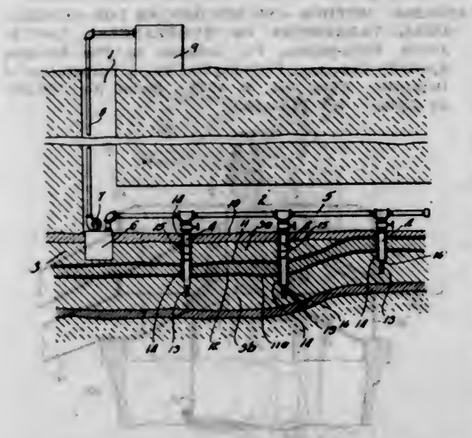
1,634,233. DOOR-OPENING DEVICE. WILLIAM G. PETERSEN, Portland, Oreg., assignor to National Electric Door Company, Portland, Oreg., a Trust Estate of Washington. Filed Nov. 23, 1925. Serial No. 70,822. 1 Claim. (Cl. 268—63.)

In a door opening device; an electric motor; a reversing switch; a lever operating said switch; a threaded shaft rotated by said motor; a rod adjacent and parallel to said shaft; a nut mounted to travel upon said shaft and said rod; tappets upon said rod to coact with said nut at each end of its travel to operate said switch through a connection between said rod and said switch lever; a lever fulcrumed at its central point; a link connecting one end of said lever with said nut; and a link connecting the other end of said lever with the door.



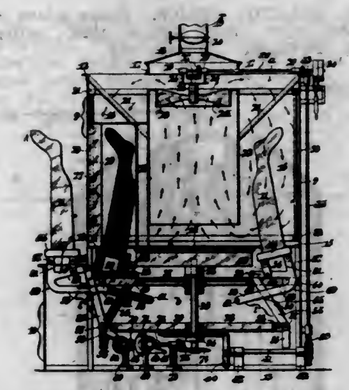
1,634,234. FASTENER STUD. WALTER H. PIERCE, Cambridge, Mass., assignor to Carr Fastener Company, Cambridge, Mass., a Corporation of Maine. Filed July 22, 1925. Serial No. 45,282. 3 Claims. (Cl. 24—219.)

1. A stud for a separable fastener comprising a cap part providing the head and neck of the stud and attaching means for securing said cap part to a support, said attaching means having an enlarged flat disk-like portion having a milled periphery, and said cap part having a flange portion clamped about the margin of said disk-like portion to secure the parts together, said milled periphery preventing relative turning between the parts.



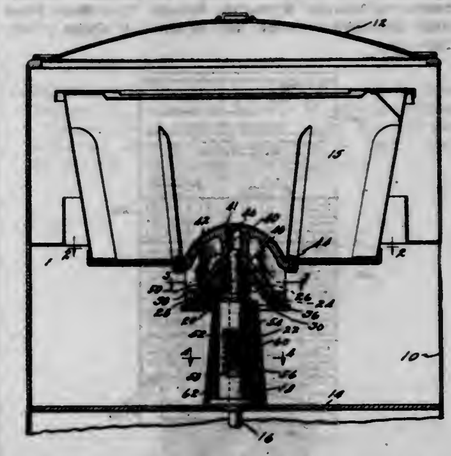
1,634,235. METHOD OF AND APPARATUS FOR RECOVERING OIL. LEO RANNEY, Jacksboro, Tex., assignor to Standard Development Company, a Corporation of Delaware. Filed Dec. 31, 1923. Serial No. 683,703. 4 Claims. (Cl. 262—1.)

1. Process of recovering oil from an oil bearing stratum, and comprising forming a tunnel near the stratum but spaced therefrom by material substantially impervious to fluid, providing a plurality of communications between the oil bearing stratum and a fluid-conducting system in



the tunnel and regulating production by selectively controlling flow through a plurality of the communications, said regulation being effected near the oil bearing stratum.

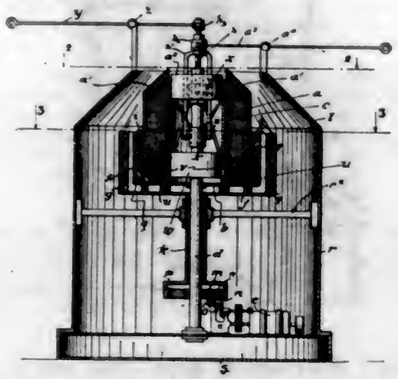
1,634,236. METHOD OF AND APPARATUS FOR RECOVERING OIL. LEO RANNEY, Jacksboro, Tex., assignor to Standard Development Company, a Corporation of Delaware. Filed Mar. 10, 1925. Serial No. 14,448. 17 Claims. (Cl. 262—1.)



1. Apparatus for recovering oil from an oil-bearing stratum to which access is gained by a mine gallery, including an oil-collecting conduit extending from the gallery to the oil-bearing stratum and sealing material interposed between the conduit and the stratum it traverses to prevent communication between the stratum and the gallery, except through the conduit.

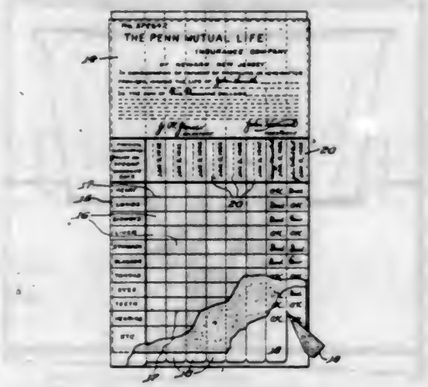
1,634,237. HOSIERY-DRYING MACHINE. WALTER W. SIMSON, Philadelphia, Pa., assignor to The Philadelphia Drying Machinery Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed May 13, 1924. Serial No. 712,965. 17 Claims. (Cl. 34—12.)

1. In a drying machine having a zone open to the atmosphere, superposed spiders conveying forms therethrough in relative stationary disposition, and means functional to radially rock successive forms outwards and inwards with respect to the drying zone for stripping and reclothing.



1,634,238. WASHING MACHINE. CYRIL G. SINCLAIR, Toronto, Ontario, Canada, assignor, by mesne assignments, to Reliance Storage and Warehouse Company, Detroit, Mich., a Corporation of Michigan. Filed Aug. 2, 1924. Serial No. 729,679. 2 Claims. (Cl. 68—18.)

1. In a washing machine, a vat, a rotatable driving shaft extending upwardly through the bottom of the vat, a housing extending upwardly from the bottom of the vat about the shaft and provided with a bearing at its upper end, a cone clutch supported on said bearing coupled with the shaft to rotate therewith while permitting longitudinal movement of the shaft therethrough, a spring encircling the shaft within the housing bearing at one end against a part of the shaft and at the opposite end against a fixed part of the housing to exert a yield-

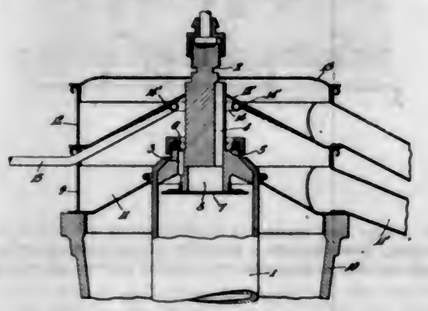


ing pressure upon the shaft endwise thereof, and a tub provided with a co-operating cone clutch member adapted to seat on the first named clutch member to support the tub thereon for rotation by the shaft.

1,634,239. AVIATION DEVICE. ELMER GRANT STILL, Livermore, Calif. Filed Mar. 8, 1924. Serial No. 697,953. 26 Claims. (Cl. 244—18.)

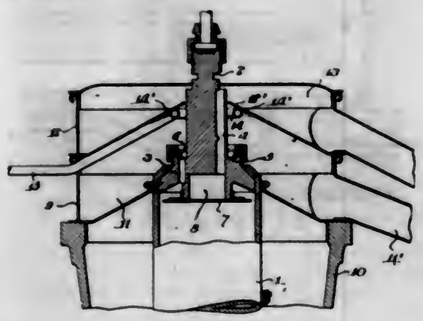
1. In an aviation device, a disc; practically radial vanes mounted on said disc and extending from near the periphery of said disc part of the way to the center of said disc; a large-diameter cylinder mounted centrally on said disc and to which said vanes are attached, and means for revolving said disc with its mountings, so that the incoming air will be thrown outward by centrifugal force, thus creating a partial vacuum close to said disc on its vane-carrying side.

1,634,240. INSURANCE-POLICY FORM. EDWARD BURKE WILFORD, Philadelphia, Pa., assignor of one-fourth to Maurice R. Smith, Kansas City, Mo. Filed Jan. 28, 1926. Serial No. 84,485. 1 Claim. (Cl. 283—54.)



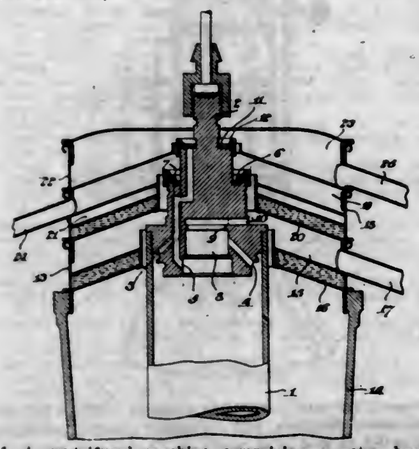
In a sheet having a form of contract constituting an insurance policy printed thereon, the combination with a columnar listing of points of examination, a columnar listing of periodic dates for examinations at right angles to said first named listing, a plurality of lines separating each of the said listings into their components, the intersection of said lines forming spaces for the periodic entry of data in reference to the entire listing of points of examination, of a plurality of detachable strips, each of the said strips registering with the columnar spaces formed by the lines dividing the periodic listing.

1,634,241. ASPHALTIC-PAVING COMPOSITION. CHARLES N. FORREST, Rahway, N. J., assignor to The Barber Asphalt Company, Philadelphia, Pa., a Corporation of West Virginia. Filed Apr. 22, 1925. Serial No. 25,133. 2 Claims. (Cl. 106—31.)



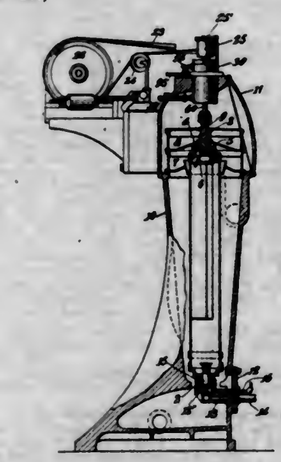
1. An asphaltic paving mixture the asphalt cement of which has combined with it a small percentage of an acetate salt fusible at the temperatures employed in the manufacture of said asphalt cement, whereby the paving mixture is toughened and stabilized.

1,634,242. METHOD AND MECHANISM FOR REMOVING CENTRIFUGE EFFLUENTS. LEO D. JONES, Philadelphia; Pa., assignor to The Sharples Specialty Company, Philadelphia, Pa., a Corporation of Delaware. Original application filed Oct. 7, 1921, Serial No. 506,165. Divided and this application filed Apr. 9, 1927. Serial No. 182,236. 10 Claims. (Cl. 233—14.)



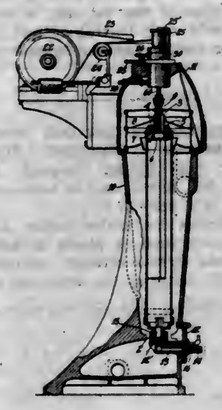
1. The method of separating wax from petroleum which comprises chilling the wax bearing oil to such temperature as will precipitate the wax, centrifugally separating the wax from petroleum and separately discharging the wax and wax-feed oil from the influence of centrifugal force, and discharging a hot fluid into contact with the wax after it leaves the influence of centrifugal force to facilitate removal thereafter of said wax.

1,634,243. METHOD AND MECHANISM FOR CENTRIFUGAL TREATMENT OF SUBSTANCES. LEO D. JONES, Philadelphia, Pa., assignor to The Sharples Specialty Company, Philadelphia, Pa., a Corporation of Delaware. Filed Oct. 7, 1921. Serial No. 506,165. 24 Claims. (Cl. 233—14.)



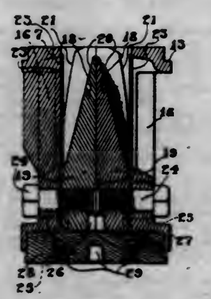
1. In the centrifugal treatment of a substance the process which comprises subjecting the substance to the action of centrifugal force to effect a desired change in the substance and to discharge the substance in dispersed form from the influence of the centrifugal force, and suitably regulating the conditions of the atmosphere within which the substance is so discharged to control the condition of the substance so discharged.

1,634,244. CENTRIFUGAL SEPARATOR. LEO D. JONES, Philadelphia, Pa., assignor to The Sharples Specialty Company, Philadelphia, Pa., a Corporation of Delaware. Filed Oct. 7, 1921. Serial No. 506,166. 10 Claims. (Cl. 233—11.)



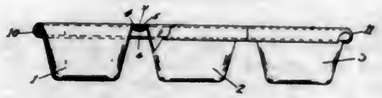
1. A centrifugal machine comprising a rotor having means for separately discharging constituents of different densities of a substance separated in said rotor, an effluent collector with which a constituent makes initial contact on its discharge from said rotor and over which it flows to a discharge point, and means for maintaining a heating fluid in contact with the exterior of said collector over an area substantially equal to the area of the path of flow of said effluent and heating the collector section with which said constituent makes initial contact.

1,634,245. CENTRIFUGAL MACHINE AND PROCESS INVOLVING THE USE OF THE SAME. LEO D. JONES and ARTHUR U. AYRES, Philadelphia, Pa., assignors to The Sharples Specialty Company, Philadelphia, Pa., a Corporation of Delaware. Original application filed May 1, 1924, Serial No. 710,388, and in Canada Apr. 8, 1925. Divided and this application filed Apr. 13, 1927. Serial No. 183,534. 11 Claims. (Cl. 233—13.)



1. In the centrifugal treatment of substances the process which comprises subjecting a substance to the action of centrifugal force and thereby effecting a desired change in the substance and discharging the changed substance in dispersed state, and maintaining sub-atmospheric gas pressure upon the substance while it exists in the dispersed state in which it is centrifugally discharged.

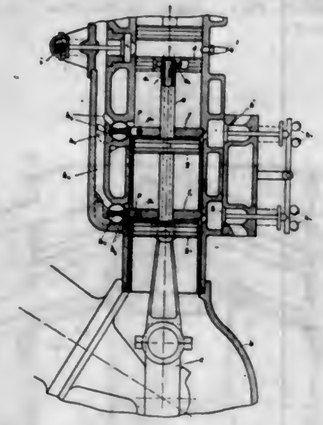
1,634,246. CENTRIFUGAL MACHINE AND PROCESS INVOLVING THE USE OF THE SAME. LEO D. JONES and ARTHUR U. AYRES, Philadelphia, Pa., assignors to The Sharples Specialty Company, Philadelphia, Pa., a Corporation of Delaware. Filed May 1, 1924. Serial No. 710,388. 24 Claims. (Cl. 233—13.)



1. In the centrifugal treatment of substances, the process which comprises centrifugally subsiding and centrifugally discharging the substance in a dispersed state, and suitably regulating the conditions of the atmosphere within which the substance is centrifugally subsided and so discharged to control the condition of the substance during subsidence and during and after discharge thereof.

1,634,247. COMPRESSOR VALVE. HJALMAR T. BLOM, Chicago, Ill., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed July 31, 1917, Serial No. 183,810. Renewed Sept. 9, 1922. Serial No. 587,227. 10 Claims. (Cl. 251—119.)

5. In combination, a valve cage having a longitudinally disposed chamber therein provided with an opening, a plurality of members carried adjacent said chamber having surfaces leading toward said opening, and resilient valves having free ends adjacent said opening and clamped between said members and the walls of said chamber.



1,634,248. REENFORCED BAKING PAN. ARTHUR KATZINGER, Chicago, Ill., assignor to Edward Katzinger Company, Chicago, Ill. Filed Oct. 4, 1926. Serial No. 139,480. 4 Claims. (Cl. 53—6.)

4. In a set of baking pans a strap member arranged to unite the pans of the set into a single unit flange on said pans, said strap butting against the sides of said pans and being entirely inclosed by said pans and flanges except at the corners of the set.

1,634,249. EXPLOSION ENGINE WITH FOUR OR MORE WORKING CYLINDERS. SVEN LINDEQUIST, Wilmersdorf, near Berlin, Germany. Filed Mar. 30, 1925. Serial No. 19,487, and in Germany May 1, 1923. 15 Claims. (Cl. 123—37.)

1. In an internal combustion engine, a working cylinder closed at both ends, a piston in said cylinder, the space at one end of said cylinder serving as combustion chamber and the space at the other end of said cylinder serving as compression chamber, a cross-head in the form of a piston connected wtih said first named piston, a compression cylinder for said crosshead piston, an

inlet port for said combustion chamber, outlets for said compression chambers, and a common conduit connecting said outlet to said inlet port.

June 7, 1927

ALPHABETICAL LIST OF REGISTRANTS OF TRADE-MARKS.

Ackerman, Simon, Clothes, Inc., New York, N. Y. Coats, vests, trousers, and overcoats. 228,713; June 7; Serial No. 240,897; published Mar. 29, 1927.

Acme Brick Company, Fort Worth, Tex. Brick. 228,586; June 7; Serial No. 235,090; published Sept. 21, 1926.

Acme Shear Company, The, Bridgeport, Conn. Scissors and shears. 228,561; June 7; Serial No. 244,340; published Mar. 29, 1927.

All-American Radio Corporation, Chicago, Ill. Batteryless current-supply apparatus for radio receiving sets. 228,794; June 7.

Allsopp Brothers, Newark, N. J. Finger rings made wholly or in part of precious metal or plated therewith. 228,677; June 7; Serial No. 242,162; published Mar. 22, 1927.

CLASSIFIED LIST OF TRADE-MARKS REGISTERED.

CLASS 1.

Batting, Cotton or wool. Lockport Cotton Batting Co. 228,641–2; June 7; Serial Nos. 242,343–4; published Mar. 15, 1927.
Coal. Deringer Fuel Company. 228,639; June 7; Serial No. 242,227; published Mar. 22, 1927.
Coal. Hutchinson Coal Company. 228,645; June 7; Serial No. 243,094; published Mar. 22, 1927.
Coal. Pittsburg and Midway Coal Mining Company. 228,761; June 7; Serial No. 241,902; published Mar. 15, 1927.
Coal, Bituminous. Cameron Coal Company. 228,552; June 7; Serial No. 242,947; published Mar. 22, 1927.
Coal, carbonized fuel, and coke. North American Coal Corporation. 228,500–2; June 7; Serial Nos. 242,491–3; published Mar. 15, 1927.
Leather. Doerr & Reinhart. 228,594; June 7; Serial No. 239,576; published Mar. 15, 1927.
Leather. Tidewater Leather Company. 228,664; June 7; Serial No. 243,026; published Mar. 22, 1927.
Leathers and hides. Société Anonyme Etablissements Reynier. 228 615; June 7; Serial No. 239,629; published Mar. 15, 1927.
Seed corn. Hi-Bred Corn Company. 228,665; June 7; Serial No. 233,003; published Mar. 22, 1927.
Seed, Lawn-grass. Northrup, King & Co. 228,511; June 7; Serial No. 242,689; published Mar. 15, 1927.
Seeds. Hamilton Seed & Coal Co. 228,722; June 7; Serial No. 242,001; published Mar. 15, 1927.

CLASS 2.

Boxes, Automobile license and ownership card. R. O. Sayers. 288,587; June 7; Serial No. 235,656; published Mar. 29, 1927.
Jugs and bottles, Vacuum heat-insulated. My Pal Products. 228,585; June 7; Serial No. 234,624; published Mar. 29, 1927.

CLASS 4.

Cleaner, Window-shade. Red Dot Chemical Company. 228 625; June 7; Serial No. 239,769; published Mar. 29, 1927.
Cleanser and scrubbing compound for floors, etc., Protective. Vestal Chemical Co. 228,523; June 7; Serial No. 243,464; published Mar. 29, 1927.
Hone and strop and a separate razor-blade holder inclosed in a single kit or package, Combination razor. W. M. Tietz. 228,814; June 7.
Shaving stick and soap. Colgate & Company. 228,517; June 7; Serial No. 243,417; published Mar. 29, 1927.
Soap. J. Eavenson & Sons, Inc. 228,690; June 7; Serial No. 241,567; published Mar. 29, 1927.
Soap. J. Eavenson & Sons, Inc. 228,697; June 7; Serial No. 241,707; published Mar. 29, 1927.

CLASS 5.

Adhesive paste. American Crayon Company. 228,688; June 7; Serial No. 241,510; published Mar. 22, 1927.

CLASS 6.

Ammonium carbonate, barium carbonate, etc. Chem. Fabriken Kunheim & Co. A. G. 228,666; June 7; Serial No. 232,868; published Mar. 29, 1927.
Anæsthetic and hypodermic tablets, Local. Parke, Davis & Company. 228,748; June 7; Serial No. 244,103; published Mar. 29, 1927.
Compounds for the fulling and scouring of woolen, worsted, etc. E. F. Houghton & Co. 228,672; June 7; Serial No. 243,810; published Mar. 29, 1927.
Deodorant and antiseptic, Body. H. F. Galow. 228,675; June 7; Serial No. 243,851; published Mar. 29, 1927.
Exterminator, Rodent. Rex Research Corporation. 228,674; June 7; Serial No. 243,830; published Mar. 29, 1927.
Medicated salt brick for livestock. Blackman Stock Remedy Co. 62,467; renewed May 7, 1927.
Medicinal anodyne and sedative tablet. L. C. Wills. 228,590; June 7; Serial No. 242,263; published Mar. 29, 1927.
Medicinal herbs. R. H. T. Kahanowicz. 228,536; June 7; Serial No. 243,706; published Mar. 29, 1927.
Medicinal preparation. S. A. Goldstein. 228,577–8; June 7; Serial Nos. 244,556–7; published Mar. 29, 1927.
Medicinal preparation. Lauber & Lauber Co. 228,579; June 7; Serial No. 244,699; published Mar. 29, 1927.
Medicinal remedies. R. Wilke. 228,698; June 7; Serial No. 206,816; published Mar. 29, 1927.
Medicine for the relief of coughs, colds, etc. Masco Drug Corporation. 228,779; June 7; Serial No. 243,163; published Mar. 29, 1927.
Medicines. W. F. Severa Company. 65,577; renewed Oct. 8, 1927.
Oil emulsion, Castor. E. R. Squibb & Sons. 228,741; June 7; Serial No. 244,114; published Mar. 29, 1927.
Ointment. E. H. Anthony. 228,582; June 7; Serial No. 233,864; published Mar. 29, 1927.
Ointment, Hair and scalp. Pro-Grow Process Co. 228,505; June 7; Serial No. 242,548; published Mar. 29, 1927.
Perfume and toilet water, talcum powder, face powder, etc. R. Hudnut. 228,747; June 7; Serial No. 244,074; published Mar. 29, 1927.
Pills, Iron. Carter Medicine Company. 228,614; June 7; Serial No. 232,450; published Mar. 29, 1927.
Pills, Nervine. Carter Medicine Company. 228,668; June 7; Serial No. 232,451; published Mar. 29, 1927.
Polish, Liquid nail. Northam Warren Corporation. 228,783; June 7.
Powders, creams, and packs, toilet waters, rouges, etc., Face. Biroto, Inc. 228,522; June 7; Serial No. 242,410; published Mar. 29, 1927.
Preparation for the organs and nerves, etc. B. Rottmar. 228,766; June 7; Serial No. 241,961; published Mar. 29, 1927.
Preparation to cure finger sucking and fingernail biting. L. A. House. 228,531; June 7; Serial No. 243,606; published Mar. 29, 1927.
Preparation used in the treatment of tuberculosis. Cardoso, Seabra & Co. 228,627; June 7; Serial No. 239,737; published Mar. 29, 1927.

Shampoo, Hair. Thomas Products Co. 228 826; June 7.
Solutions of nitrocellulose. Waukegan Chemical Company. 228,499; June 7; Serial No. 242,459; published Mar. 29, 1927.
Tonic and dandruff killer, Hair. I. Vedova. 228,655; June 7; Serial No. 240,011; published Mar. 29, 1927.
Tonics, etc., Hair, special hair, restorative. Wellson Specialty Co. 228,693; June 7; Serial No. 241,595; published Mar. 29, 1927.
Tonics, face creams, mouth and eye washes, skin lotions, etc., Hair. J. Cohen. 228,727; June 7; Serial No. 224,858; published Mar. 29, 1927.
Tooth paste. A. R. Munn, Inc. 228,556; June 7; Serial No. 242,843; published Mar. 29, 1927.
Tooth powder. T. Kobayashi. 61,013; renewed Feb. 26, 1927.
Whiting and skin lotion, Face. M. B. Orchard. 228,607; June 7; Serial No. 229 875; published Mar. 29, 1927.

CLASS 9.

Ammunition. Remington Arms Company. 228,815; June 7.
Revolvers. R. F. Sedgley Inc. 228 591; June 7; Serial No. 237,705; published Mar. 29, 1927.
Shotgun shells. Sears, Roebuck and Co. 228,824; June 7.

CLASS 11.

Ink. W. H. Young Corporation. 228,730; June 7; Serial No. 226,271; published Mar. 29, 1927.

CLASS 12.

Brick. Acme Brick Company. 228 586; June 7; Serial No. 235,090; published Sept. 21, 1926.
Brick material, Refractory fire. Wellsville Fire Brick Company. 228,509; June 7; Serial No. 242,641; published Mar. 15, 1927.
Rock, marble, and other materials, Natural cut. Fevre & Cie. 228 768; June 7; Serial No. 242,055; published Mar. 22, 1927.

Roofing, Asbestos shingle. Triangle Building Material Co. 228,637; June 7; Serial No. 242,157; published Mar. 15, 1927.
Roofing, etc. Treman, King & Co. 228,705; June 7; Serial No. 240 226; published Mar. 15, 1927.
Roofing, Felt. Collins Hardware Company. 62,148; renewed Apr. 23, 1927.
Shingles. National Asbestos Shingle Corporation. 228,663; June 7; Serial No. 242,688; published Mar. 15, 1927.
Shingles, ridge tiles, and sheets. A. T. Pattison & Co. 228,757; June 7; Serial No. 241,787; published Mar. 15, 1927.
Slate and lumber, Artificial. Asbestos Shingle, Slate & Sheathing Company. 64,829; renewed Aug. 27, 1927.
Steel, Fabricated structural. Robert W. Hunt Company. 228,550; June 7; Serial No. 242,995; published Mar. 22, 1927.
Tile, Gypsum. Northwestern Gypsum Products Company. 228,777; June 7; Serial No. 243,062; published Mar. 22, 1927.
Tile, Quarry. United States Quarry Tile Company. 227,678; June 7; Serial No. 241,504; published Mar. 15, 1927.
Wallboard. National Gypsum Company. 228,669; June 7; Serial No. 242,389; published Mar. 15, 1927.
Wall or floor coating, Plastic. I. F. Laucks Inc. 228,554; June 7; Serial No. 242,899; published Mar. 22, 1927.
Weather strips. Chamberlin Metal Weatherstrip Company. 228,638; June 7; Serial No. 242,168; published Mar. 15, 1927.

CLASS 13.

Attachments and valves, Safety filling. Midwest Steel & Supply Company. 228,730; June 7; Serial No. 243,617; published Mar. 29, 1927.
Bedpan washers, sterilizers, and racks. Hospital Supply Company and Watters Laboratories, Consolidated. 228,724; June 7; Serial No. 224,023; published Mar. 29, 1927.
Couplings and thermostat receivers, Combined. Hotstream Heater Co. 228,601; June 7; Serial No. 227,839; published Mar. 29, 1927.
Metallic fabrics, Knitted. Metal Textile Corporation. 228,603; June 7; Serial No. 228,719; published Mar. 29, 1927.
Pipes and tubes. British American Metals Company. 228,537; June 7; Serial No. 237,109; published Mar. 29, 1927.

CLASS 15.

Gasoline, fuel and lubricating oils, and lubricating greases. Cream City Oil Company. 228,719; June 7; Serial No. 241,875; published Mar. 22, 1927.
Gasoline, kerosene, burning oils, etc. E. H. Milton and Sons. 228,715; June 7; Serial No. 241,426; published Mar. 22, 1927.
Gasoline, kerosene, lubricating oil, etc. Mayflower Oil Company. 228,735; June 7; Serial No. 226,815; published Mar. 29, 1927.
Oils. Atlantic Refining Company. 228,599; June 7; Serial No. 227,625; published Mar. 29, 1927.
Oils and greases. Blackhawk Petroleum Co. 228,769; June 7; Serial No. 243,524; published Mar. 22, 1927.
Oils and greases, Lubricating. J. F. Price. 228,692; June 7; Serial No. 241,581; published Mar. 29, 1927.
Oils, Fuel. De Bataafsche Petroleum Maatschappij. 228,612; June 7; Serial No. 232,260; published Mar. 22, 1927.
Oils, Lubricating. Atlantic Refining Company. 62,389; renewed May 7, 1927.
Oils, Lubricating. Atlantic Refining Company. 63,160; renewed June 11, 1927.

CLASS 16.

Cementitious powder. Coronite Manufacturing Company. 228,728; June 7; Serial No. 225,075; published Aug. 3, 1926.
Paints, Mixed. Tropical Oil Company. 65,840; renewed Oct. 22, 1927.
Wood filler, Liquid. Glidden Varnish Company. 62,496; renewed May 7, 1927.

CLASS 17.

Tobacco. R. H. Macy & Co. 228,822; June 7.

CLASS 19.

Vehicles, Shock absorbers, rebound restrainers, and springs for. Thompson Spring Corporation. 228,738; June 7; Serial No. 243,674; published Mar. 29, 1927.

CLASS 20.

Rugs and mats. National Cloak & Suit Co. 228,617; June 7; Serial No. 244,713; published Mar. 29, 1927.

CLASS 21.

Battery terminal connecters. Korcherak Siphon Bottle Works. 228,800; June 7.
Batteryless current-supply apparatus for radio receiving sets. All-American Radio Corporation. 228,794; June 7.
Coils for radio apparatus. Camfield Radio Manufacturing Company. 228,734; June 7; Serial No. 226,761; published Mar. 22, 1927.
Conduit, Electrical. Thermwool Products Co. Inc. 228,739; June 7; Serial No. 243,983; published Mar. 29, 1927.
Electric appliances. Dover Manufacturing Co. 228,717; June 7; Serial No. 241,566; published Mar. 22, 1927.
Electric furnaces and electric heating elements therefor. Electric Furnace Company. 228,798; June 7.
Electric-lighting equipment. Sun-Ray Lighting Products, Inc. 228,661; June 7; Serial No. 242,554; published Mar. 22, 1927.
Electrical apparatus. Twinklex Flasher Company. 228,742–3; June 7; Serial Nos. 244,116–7; published Mar. 29, 1927.
Fuse mountings, relays, bus supports, switches, choke coils, etc. Schweitzer and Conrad. 228,718; June 7; Serial No. 241,748; published Mar. 15, 1927.
Insulated wire, Rubber-covered. Diamond Braiding Mills. 228,662; June 7; Serial No. 242,575; published Mar. 29, 1927.
Lamps, Portable electric. Vimco Mfg. Company. 228,646; June 7; Serial No. 243,244; published Mar. 29, 1927.
Lightning arresters and parts thereof. L. S. Brach Manufacturing Company. 228,823; June 7.
Lights, Automobile trouble. Serv-Us-Lite Manufacturing Co. 228,659; June 7; Serial No. 242,444; published Mar. 29, 1927.
Loud speakers and loud-speaker parts. Borkman Radio Corporation. 228,781; June 7.
Molding compounds and mixtures. Bakelite Corporation. 228,714; June 7; Serial No. 240,948; published Mar. 22, 1927.
Outlet boxes, switch boxes, hangers, etc. Chicago Fuse Mfg. Co. 228,602; June 7; Serial No. 228,645; published Mar. 22, 1927.
Radio loud speaker. Orchestron Company. 228,596; June 7; Serial No. 239,892; published Mar. 22, 1927.
Radio receiving sets. J. B. Utt. 228,604; June 7; Serial No. 229,479; published Mar. 22, 1927.
Radio receiving sets, radio transmitting and receiving vacuum tubes, etc. Fleetwood Laboratories, Inc. 228,593; June 7; Serial No. 239,402; published Mar. 15, 1927.
Radio receiving sets, tubes, loud speakers, batteries, etc. L. S. Slagle. 228,701; June 7; Serial No. 217,967; published Mar. 29, 1927.
Signal, Vehicle direction. C. H. Kenney. 228,700; June 7; Serial No. 212,383; published Mar. 29, 1927.
Stoves, plates, and ranges, Electric. Geo. D. Roper Corporation. 228,702; June 7; Serial No. 219,913; published Mar. 22, 1927.
Telephone headsets, loud speakers, cabinet-type loud speakers, etc. Brandes Products Corporation. 228,792; June 7.

CLASS 22.

Coaster wagons and scooters. Lewis-Geer Manufacturing Company. 228,782; June 7.
Dice boxes. J. W. Field. 228,506; June 7; Serial No. 242,582; published Mar. 29, 1927.
Dolls. Geo. Borgfeldt & Co. 65,119; renewed Sept. 10, 1927.
Fire starter, Friction. J. C. Ramsey. 228,503; June 7; Serial No. 242,501; published Mar. 29, 1927.
Kindergarten devices, Educational. A. S. Pope. 228,548; June 7; Serial No. 243,014; published Mar. 29, 1927.
Toy horseshoe games. Walbert Manufacturing Company. 228,749; June 7; Serial No. 244,118; published Mar. 29, 1927.

CLASS 23.

Axes, adzes, and billhooks. A. W. Wills & Son. 64,624–5; renewed Aug. 13, 1927.
Box-forming machines, box-making machines, printing machines, etc. C. S. Andrews. 228,725; June 7; Serial No. 224,443; published Mar. 29, 1927.
Cinder-notch stoppers for blast furnaces, etc. E. E. Brosius. 228,821; June 7.
Cooling and condensing apparatus. Chicago Pneumatic Tool Company. 228,787; June 7.
Engines, electromotors, etc., Apparatus for lubricating internal-combustion. Société Anonyme du Graissage Alcyl. 228,619; June 7; Serial No. 240,041; published Mar. 29, 1927.
Fire extinguishers, Portable. Pyrene Manufacturing Company. 228,524; June 7; Serial No. 243,500; published Mar. 29, 1927.
Hand tools. A. W. Wills & Son. 64,626; renewed Aug. 13, 1927.
Knives, razors, and table cutlery, Pocket. Geo. Borgfeldt & Co. 65,212; renewed Sept. 10, 1927.
Machinery. George S. Harwood & Son. 65,609; renewed Oct 8, 1927.
Machinery. Union Confectionery Machinery Co. 228,679–80; June 7; Serial Nos. 241,502–3; published Mar. 29, 1927.
Mortisers, routers, saws, and planers, Lock. Wappat Gear Works. 28,526; June 7; Serial No. 243,515; published Mar. 29, 1927.

Motor-boat, and aeroplane motors and spare parts thereof, Automobile. Clarke D. Pease Inc. 228,778; June 7; Serial No. 243,108; published Mar. 29, 1927.
Mowers, Lawn. Electric Vacuum Lawn Mower Company. 228,624; June 7; Serial No. 240,770; published Mar. 29, 1927.
Pistons for use in internal-combustion and steam engines, pumps, and compressors. C. R. Butler. 228,622; June 7; Serial No. 238,895; published Mar. 29, 1927.
Reamers. Watervliet Tool Co. 228,816; June 7.
Saw blades, Hack-. West Haven Mfg. Co. 63,402; renewed June 18, 1927.
Scissors and shears. Acme Shear Company. 228,561; June 7; Serial No. 244,340; published Mar. 29, 1927.
Sewing, agricultural, and horticultural machines and parts thereof, etc. Dürkoppwerke Aktiengesellschaft. 228,703; June 7; Serial No. 241,937; published Mar. 29, 1927.

Malt sirup. S. H. Stone. 244,246; June 7.

CLASS 50.

Religious articles. Erhard & Söhne. A. G. 231,797; June 7.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 7TH DAY OF JUNE, 1927.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

A. C. Spark Plug Company. (See Champion, Albert, assignor.)
Aalborg, Christian, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Locomotive headlight. 1,631,112; June 7.
Ach, Ernest M., assignor to The Samuel Ach Company, Cincinnati, Ohio. Lady's trimmed hat. 1,631,945; June 7.
Ach, Samuel, Company, The. (See Ach, Ernest M., assignor.)
Acme Card System Company. (See Clark, William C., assignor.)
Acme Card System Company. (See Johnston, Frank H., assignor.)
Advance-Rumely Company. (See Krenske, John G., assignor.)
Advance-Rumely Company. (See Worthington, Wayne H., assignor.)
Aktiebolaget Ferrolegeringar. (See Berlin, David W., assignor.)
Alden, Herbert W., and G. Hufferd, assignors to The Timken-Detroit Axle Company, Detroit, Mich. Brake for automobiles. 1,631,448; June 7.
Aldrich, Lester K., Sidney, Ohio. Automatic feeder. 1,631,181; June 7.
Aldrin, Leonard, Denver, Colo. Shock absorber. 1,631,569; June 7.
Alexander, Clinton B., Washington, D. C. Casing and making the same. 1,631,611; June 7.
Alexander, Ralph I., Kankakee, assignor to Inland Engineering Company, Chicago, Ill. Mobile machinery. 1,631,184; June 7.
Alexander, Ralph I., Kankakee, and A. H. Exton, Chicago Heights, assignors to Inland Engineering Company, Chicago, Ill. Traction equipment for mobile machinery. 1,631,182; June 7.
Alexander, Ralph I., Kankakee, and A. H. Exton, Chicago Heights, assignors to Inland Engineering Company, Chicago, Ill. Steering mechanism for mobile machinery. 1,631,183; June 7.
Alford, Allen D., Dallas, Tex. Reamer drill bit. 1,631,449; June 7.
Allen, Fred D., Portsmouth, Va. Demountable rim. 1,631,906; June 7.
Allingham, Sidney, London, assignor to Robert Boby Limited, Bury St. Edmunds, England. Machine for harvesting flax and other plants. 1,631,612; June 7.
Allis-Chalmers Manufacturing Company. (See Knight, Earle R., assignor.)
American Can Company. (See Loesel, Nicholas, assignor.)
American Car and Foundry Company. (See Constantine, Alphonse A., assignor.)
American Car and Foundry Company. (See Cooper, W. E., and Willoughby, assignors.)
American Car and Foundry Company. (See Dietrichson, William F., assignor.)
American Car and Foundry Company. (See Elder, Thomas W., jr., assignor.)
American Car and Foundry Company. (See Field, Henry P., assignor.)
American Car and Foundry Company. (See Gibbs, Frederick H., assignor.)
American Car and Foundry Company. (See Johnson, W. V., and McDowell, assignors.)
American Car and Foundry Company. (See Kassler, Adolph, assignor.)
American Car and Foundry Company. (See Ostrander, Allen E., assignor.)
American Car and Foundry Company. (See Rohlfing, John M., assignor.)
American Car and Foundry Company. (See von Dabrowski, Lothar, assignor.)
American Car and Foundry Company. (See Willoughby, Victor, assignor.)
American Cyanamid Company. (See Barsky, George, assignor.)
American Katalite Corporation. (See Sokal, Edward, assignor.)
American Laundry Machinery Company, The. (See Taylor, James H., assignor.)
American Molstening Company. (See Comins, Frank B., assignor.)
American Narrow Fabric Company. (See Hazelton, Carl J., assignor.)
American Separator Company, The. (See Collins, Thomas, jr., assignor.)
American Telephone and Telegraph Company. (See Matthews, E. M., and Carr, assignors.)
American Telephone and Telegraph Company. (See Peterson, George H., assignor.)
American Telephone and Telegraph Company. (See Wilburn, Sidney D., assignor.)
Amet, Edward H., Redondo Beach, Calif. Motion-picture screen. 1,631,240; June 7.
Amet, Edward H., Redondo Beach, Calif. Motion-picture-film feed. 1,631,570; June 7.
Anaconda Sales Company. (See Robinson, Thomas, assignor.)
Anchor Post Fence Company. (See Thomson, Herbert G., assignor.)
Andersen, Lauritz W., Waterbury, Conn. Shade holder. 1,631,613; June 7.
Anderson, Edward, assignor to The A. A. Simonds-Dayton Company, Dayton, Ohio. Bond for elastic grinding wheels and applying the same. 1,631,113; June 7.
Anderson, Graig W., Columbus, Ohio. Hair curler and waver. 1,631,781; June 7.
Anderson, Gustaf B., Minneapolis, Minn. Power-propelled runner attachment for motor vehicles. 1,631,114; June 7.
Anderson, Loris R., Brooklyn, N. Y. Advertising sign. 1,631,782; June 7.
Andreoli, Henry P., Long Beach, N. Y. Transformer. 1,631,393; June 7.
Andrew, Cyrus N., Yucaipa, Calif. Metrical optic and acoustic recording and reproduction. 1,631,450; June 7.
Angelini, Oreste, Rome, Italy. Arrangement for hydraulic internal reaction propulsion. 1,631,783; June 7.
Angell, Fred P., Huntington Park, Calif. Door-operating mechanism. 1,631,907; June 7.
Angell, Robert C., Prince Bay, N. Y., assignor to The S. S. White Dental Manufacturing Company. Base assembly for dental equipment stand. Des. 72,785; June 7.
Anglo-California Trust Company, trustee. (See Miner, Claude G., assignor.)
Anibal, Benjamin H., Pontiac, Mich., assignor to General Motors Corporation, Detroit, Mich. Distributor mounting. 1,631,185; June 7.
Ankeny, Arthur W., Indiana, Pa. Mechanically-operated figure toy. 1,631,451; June 7.
Appel, Daniel, assignor to The Cleveland-Akron Bag Company, Cleveland, Ohio. Machine for making paper bags. 1,631,452; June 7.
Apple, Vincent G., Dayton, Ohio. Building dynamo-electric-machine armatures and windings for same. 1,631,186; June 7.
Archer Rubber Company. (See Emery, Herbert W., assignor.)
Arnstein, Karl, assignor to Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung, Friedrichshafen, Bodensee, Germany. Rigid airships. 1,631,908; June 7.
Arnt, Herald P., Lakewood, Ohio. Sprinkling-hose support. 1,631,849; June 7.
Aspden, Ralph L., Chorley, England. Variable condenser. 1,631,453; June 7.
Atwood, Charles E., Binghamton, N. Y. Ground brake. 1,631,115; June 7.
Atwood, Hart W., Portland, Oreg. Heating device. 1,631,614; June 7.
Auto Pneumatic Action Company. (See La Joie, Hubert J., assignor.)
Automatic Electric Inc. (See Fahrenfeld, Fred W., assignor.)
Automatic Electric Inc. (See Sipe, Clinton R., assignor.)
Automatic Electric Inc. (See Wicks, John, assignor.)
Automatic Recording Safe Company, The. (See Fisher, Charles, assignor.)
Automatic Scale Company, The. (See Blick, Ernest L., assignor.)
Ayers, Charles E., Cleves, Ohio. Blow-out patch for balloon tires. 1,631,354; June 7.
Babcock & Wilcox Company, The. (See Kohler, Anthony M., assignor.)
Badin, Raoul E., Paris, France. Liquid-level indicator. 1,631,909; June 7.
Bain, John, et al. (See Geake, William H. G., assignor.)
Baird, Glen W., and A. Lamb, Drummond, Idaho. Motor-driven toothbrush. 1,631,394; June 7.
Baird, Hasen B., New York, N. Y. Hair-waving apparatus. 1,631,571; June 7.
Baker & Company. (See Colby, E. A., Maculen, and Van Allen, assignors.)

Baker Casing Shoe Company. (See Baker, Reuben C., assignor.)

Baker, Reuben C., Coalinga, Calif., assignor to Baker Casing Shoe Company. Well-drill-pipe float coupling. 1,631,509; June 7.

Baker, Walter R. G., Schenectady, N. Y., assignor to General Electric Company. Electric condenser. 1,631,665; June 7.

Baldwin, Clarence D., Bellingham, Wash. Embroidery-hoop clamp. 1,631,355; June 7.

Ballamos, Elizabeth. (See Reason, Walter M., assignor.)

Ballard Service Corporation. (See Goodridge, George E., assignor.)

Balston, Clyde C., New York, N. Y. Transmitting mechanism. 1,631,572; June 7.

Bambach, John J., and M. W. Collins, Wilkes-Barre, Pa. Liquid-dispensing apparatus. 1,631,454; June 7.

Bambini, Aurelio, Seward, Pa. Aeroplane. 1,631,187; June 7.

Bamford, Cyril J. (See Bamford, Joseph and C. J.)

Bamford, Joseph and C. J., Uttoxeter, England. Tine for haymaking and like machinery. 1,631,455; June 7.

Bankers Savings & Credit System Company, The. (See Moffett, Marcus H., assignor.)

Banning, Thomas A., jr., Wilmette, Ill. Fuel feeding and metering systems and apparatus. 1,631,356; June 7.

Barber Asphalt Company, The. (See Ritter, George, assignor.)

Bardin, Victor, St.-Denis, France. Valved pipe coupling. 1,631,456; June 7.

Barelman, Edward, Guelph, Ontario, Canada. Furnace. 1,631,116; June 7.

Barker, Edwin H., Moylan, assignor to A. H. Wirz, Inc., Chester, Pa. Dispensing bottle stopper. 1,631,784; June 7.

Barker, Walter R., and L. Jensen, assignors to United Autographic Register Company, Chicago, Ill. Autographic-register cash drawer. 1,631,395; June 7.

Barnett, John B., assignor of one-half to W. G. McCann and one-half to A. E. Spellissy, Philadelphia, Pa. Display device. 1,631,785; June 7.

Barrett, Lewis B., Bangor, Me. Wire holder. 1,631,510; June 7.

Barsky, George, assignor to American Cyanamid Company, New York, N. Y. Refrigerant. 1,631,573; June 7.

Barton, Theophilus F., Schenectady, N. Y., assignor to General Electric Company. System of distribution. 1,631,715; June 7.

Basho, Bela K., New York, N. Y. Peanut and potato digger. 1,631,457; June 7.

Bateman, Charles E., Minneapolis, Minn. Window. 1,631,666; June 7.

Battilani, Stefano, New York, N. Y. Shoe tree. 1,631,786; June 7.

Baumberger, William J., Davenport, Iowa, assignor, by mesne assignments, to Micro Machine Company, Bettendorf, Iowa. Grinding machine. 1,631,188; June 7.

Baurelle, Albert C. (See Carroll, John R., assignor.)

Bausch & Lomb Optical Company. (See Patterson, William L., assignor.)

Bausch & Lomb Optical Company. (See Stevenson, Clarence M., assignor.)

Baverey, François, assignor to Societe Du Carburateur Zenith, Lyon, France. Carburetor. 1,631,716; June 7.

Beard, Lawrence O., Lancaster, Pa. Valve-refacing tool. 1,631,850; June 7.

Beaver Machine & Tool Co. (See Slade, Harold E., assignor.)

Beck, Ernest T., assignor to International Silver Co., Meriden, Conn. Spoon or similar article. Des. 72,786; June 7.

Beckmann, Johannes, Charlottenburg, Germany, assignor to General Electric Company. Electric furnace system. 1,631,667; June 7.

Beegle, Raymond E., East St. Louis, Ill., assignor of one-half to W. J. Steinbreder, St. Louis, Mo. Clamping device. 1,631,396; June 7.

Belden, Albert G., assignor to Norton Company, Worcester, Mass. Machine-tool work supporting and driving mechanism. 1,631,458; June 7.

Bell, Jessie M., Tacoma, Wash. Doll. Des. 72,787; June 7.

Bénit, Henri, assignor to l'Eclairage des Vehicules Sur Rail, Paris, France. System of electrical supply. 1,631,574; June 7.

Benner, Raymond C., Bayside, N. Y., assignor to The Prest-O-Lite Company, Inc. Storage battery. 1,631,511; June 7.

Bennett, Arthur, Chilliwack Township, British Columbia, Canada. Shock absorber. 1,631,459; June 7.

Bennett, Charles E., Decatur, Ga. Fuse. 1,631,851; June 7.

Bennett, George L., Cleveland Heights, Ohio. Building wall construction. 1,631,787; June 7.

Bennett, Morris H., assignor to Scovill Manufacturing Company, Waterbury, Conn. Condenser-operating mechanism for variable condensers. 1,631,788; June 7.

Bent, George H., Battle Creek, Mich. Weighing machine. 1,631,117; June 7.

Bergquist, Arthur E., Lindstrom, Minn. Potato-mashing machine. 1,631,910; June 7.

Berlin, David W., Rosunda, near Stockholm, assignor to Aktiebolaget Ferrolegeringar, Stockholm, Sweden. Producing rustless iron and steel. 1,631,512; June 7.

Berry, Clarence C., Valley Park, Mo. Electrical connection. 1,631,575; June 7.

Berry, Fred F., Concord, N. H. Extension leg attachment for ladders. 1,631,513; June 7.

Beveridge, James B., Richmond, Va. Manufacture of paper pulp. 1,631,789; June 7.

Binford, James R., Dallas, Tex. Window-shade guide. 1,631,460; June 7.

Black, Percy S. (See Negly, L. A., and Black.)

Blair, Robert F., and G. Hind, Detroit, Mich. Driver's compartment for vehicles. 1,631,357; June 7.

Blanchard, Frederick C. (See Lea, Charles, assignor.)

Blanding, Joseph E., New London, assignor of one-half to Patrick B. McNamara, Groton, Conn. Internal-combustion engine. 1,631,615; June 7.

Blankenship, Stanley L. (See McLarty, E., sr., and Blankenship.)

Blick, Ernest L., assignor to The Automatic Scale Company, Limited, Altrincham, England. Stay connection for weighing apparatus and the like. 1,631,358; June 7.

Boby, Robert, Limited. (See Allingham, Sidney, assignor.)

Boehringer, John A., Springfield, assignor to Star Chandelier Co., Inc., New York, N. Y. Canopy for electric-lighting fixtures. Des. 72,788; June 7.

Bonsleur, Le, assignor to The General Phonograph Manufacturing Co., Elyria, Ohio. Commutator and making same. 1,631,461; June 7.

Boots, William C., assignor to Guyot Brothers, Attleboro, Mass. Expansible-link bracelet. 1,631,946; June 7.

Botterbusch, William D., Bluffs, Ill. Chicken feeder. 1,631,462; June 7.

Bowers, Claude E., Los Angeles, Calif. Stucco nail. 1,631,397; June 7.

Bowers, Claude E., Los Angeles, Calif. Device for connecting the abutting ends of concrete slabs. 1,631,576; June 7.

Boyer, Clifford F., Webster Groves, Mo. Refrigerator. 1,631,577; June 7.

Braden Steel & Winch Company. (See Schuetz, Thomas J., assignor.)

Bradshaw, Richard, Montreal, Quebec, Canada, assignor to Simmons Company, Kenosha, Wis. Bed-bottom fabric. 1,631,852; June 7.

Brahm, Albert, Dusseldorf-Rath, Germany. Connecting nipple for cast-iron heating-boiler elements. 1,631,911; June 7.

Brahs, George, Paterson, N. J. Shuttle tension. 1,631,305; June 7.

Breyer, Theodore V., New Philadelphia, Ohio. Telephone note rack and pencil holder. 1,631,717; June 7.

Briggs, William N., Pittsfield, Mass., assignor to General Electric Company. Making molded articles. 1,631,668; June 7.

Brislin, John, Brooklyn, N. Y. Fishing reel. 1,631,790; June 7.

Britt, Max, assignor to Swift & Company, Chicago, Ill. Smoking meat. 1,631,463; June 7.

Broadmeyer, Albert, assignor to W. O. Hickok Manufacturing Company, Harrisburg, Pa. Counting and indicating mechanism. 1,631,616; June 7.

Broadmeyer, Albert, assignor to The W. O. Hickok Mfg. Co., Harrisburg, Pa. Sheet-retarding means for sheet-feeding apparatus. 1,631,617; June 7.

Broadmeyer, Albert, assignor to W. O. Hickok Mfg. Company, Harrisburg, Pa. Underlift. 1,631,618; June 7.

Brogden, Joah, Melrose Park, assignor to David Lupton's Sons Company, Philadelphia, Pa. Metallic window. 1,631,949; June 7.

Brooks, Winfred M., West Orange, N. J. Sealing means. 1,631,464; June 7.

Brown, Charles S., Dayton, Ohio. Fitting cooperating bodies. 1,631,359; June 7.

Brown, George R., Bridgeport, Conn., assignor to General Electric Company. Electric fuse. 1,631,669; June 7.

Brown, George W., Marietta, Ohio. Cuff button. 1,631,912; June 7.

Brown Instrument Company, The. (See Brown, Richard P., assignor.)

Brown-Lipe Gear Company. (See Sponable, George W., assignor.)

Brown & Pengilly, Inc. (See Pengilly, Joseph H., assignor.)

Brown, Richard P., assignor to The Brown Instrument Company, Philadelphia, Pa. Recording instrument. 1,631,578; June 7.

Brown, Winifred A., Minneapolis, Minn. Brooms. 1,631,465; June 7.

Brush, Abbott P. (See Brush, Dorothy S. and A. P.)

Brush, Dorothy S., and A. P., Greenwich, Conn. Cigarette lighter. 1,631,514; June 7.

Bruson, Herman A., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Treating rubber. 1,631,947; June 7.

Bryant Electric Company. (See Thomas, George B., assignor.

Brysilka, Limited. (See Schubert, Frederich W., assignor.)

Buchi, Alexandar J., New York, N. Y. Electric hair curler. 1,631,180; June 7.

Buckley, Thomas A., Brooklyn, N. Y. Gum massaging and cleansing device. 1,631,791; June 7.

Buffardi, Pasquale, Irvington, assignor to E. W. Zeh, Newark, N. J. Adjustable eccentric. 1,631,466; June 7.

Bull, William R., Springfield, Mass. Method of and apparatus for cooling gun barrels. 1,631,190; June 7.

Bullard, Edward P., jr., Stratford, assignor to The Bullard Machine Tool Company, Bridgeport, Conn. Tool-slide mechanism. 1,631,579; June 7.

Bullard Machine Tool Company, The. (See Bullard, Edward P., jr., assignor.)

Bullock, Charles A. H., London, England. Typesetting apparatus. 1,631,515; June 7.

Burgoyne, Ernest G. E. (See Ricks, F., and Burgoyne.)

Burkart, William, Denver, Colo. Stake for trucks, wagons, and other vehicles. 1,631,118; June 7.

Burner, William L., Koppel, Pa., and O. E., Kantenwein, Oak Park, Ill., assignors to Koppel Industrial Car and Equipment Company, Pittsburgh, Pa. Supporting mechanism for dump cars. 1,631,241; June 7.

Burnham, George A., Saugus, assignor, by mesne assignments, to Conduit Electrical Manufacturing Corporation, Boston, Mass. Electric switch. 1,631,913; June 7.

Burnley, William B., Long Beach, Calif. Massaging device. 1,631,792; June 7.

Burns, Dawson J. (See Kaegi, Emil, assignor.)

Burton, Frank F., Mount Carmel, assignor to Winchester Repeating Arms Co., New Haven, Conn. Bolt-action firearm. 1,631,242; June 7.

Burton, Ralph B. (See Twyman, B. W. and Burton.)

Busey, Hubert J., Wichita, Kans. Tomb or grave closing device. 1,631,853; June 7.

Buvinger, George A., and C. Warner, assignors to Delco Light Company, Dayton, Ohio. Pumping apparatus. 1,631,619; June 7.

Byers, A. M., Company. (See Hall, J. A., jr., and Tishlarich, assignors.)

Byrnes, Irving F., Schenectady, N. Y., assignor to General Electric Company. High-frequency signaling system. 1,631,670; June 7.

Caillau, Marcel U., Billancourt, France. Electrical connecter. 1,631,914; June 7.

Caldwell, Edwin, New York, N. Y. Smoker's article. 1,631,467; June 7.

Calkins, Addison N., assignor to Electric Wheel Company, Quincy, Ill. Tractor. 1,631,243; June 7.

Calmanson, Saul. (See Meiniker, A., and Calmanson.)

Calvete, Isidoro B., London, England. Clip for hair-waving sachets. 1,631,793; June 7.

Campbell, Charles E., assignor to Campbell Electric Company, Lynn, Mass. Cabinet. 1,631,718; June 7.

Campbell Electric Company. (See Campbell, Charles E., assignor.)

Campbell, Lawrence A., Kansas City, Mo. Display kerchief. 1,631,398; June 7.

Carlucci, Rocco A., West New York, N. J. Stringed instrument. 1,631,794; June 7.

Carnes, Sam, North Powder, Oreg. Vehicle body removing and replacing device. 1,631,915; June 7.

Carpenter, William A. (See Irwin, H. H., and Carpenter.)

Carr, James A. (See Matthews, E. M., and Carr.)

Carrigan, Thomas E., Milwaukee, Wis. Knockdown bed frame for automobiles. 1,631,620; June 7.

Carrigan, Thomas E., Milwaukee, Wis. Knockdown bed frame. 1,631,621; June 7.

Carroll, John R., assignor of one-half to A. C. Baurelle, South Mountain, Pa. Machine for coring and deriding fruit. 1,631,854; June 7.

Carroll, Stewart J., assignor to Eastman Kodak Company, Rochester, N. Y. Cellulose-acetate composition of low inflammability. 1,631,468; June 7.

Carter, Charles E., Pasadena, Calif. Medicine. 1,631,244; June 7.

Caruso, Louis, Irvington, N. J., assignor to The Lionel Corporation, New York, N. Y. Toy electric railway. 1,631,245; June 7.

Cary Manufacturing Co. (See Cary, Spencer C., assignor.)

Cary, Spencer C., Brooklyn, assignor to Cary Manufacturing Co., Brooklyn, N. Y. Shipping package. 1,631,516; June 7.

Cavanaugh, William M., New York, N. Y. Belting. 1,631,580; June 7.

Chambers, James, Pavo, Ga. Tongs. 1,631,916; June 7.

Champion, Albert, assignor to A C Spark Plug Company, Flint, Mich. Terminal connecter for spark plugs. 1,631,191; June 7.

Champion Porcelain Company. (See Jeffery, J. A., and Montgomery, assignors.)

Champion Porcelain Company. (See Riddle, Frank H., assignor.)

Chandler, Franklin F., and R. E. Young, assignors to Ross Gear & Tool Company, La Fayette, Ind. Steering-post control. 1,631,795; June 7.

Chandler, Homer P., assignor to The Ohio Brass Company, Mansfield, Ohio. Connecting device. 1,631,719; June 7.

Chapman, Frank D., Berlin, Wis., assignor of one-half to Electric Household Utilities Corporation, Chicago, Ill. Ironing machine. Re16,647; June 7.

Chase, Eugene P., Altoona, Pa. Heating apparatus for vehicles. 1,631,469; June 7.

Chase, Hamilton C., assignor of one-half to T. Weber, Los Angeles, Calif. Vehicle brake. 1,631,470; June 7.

Cheatham Electric Switching Device Co. (See Robinson, Robert M., assignor.)

Chicago-Cleveland Car Roofing Company. (See Hamilton, Karl M., assignor.)

Christel, William F., Valders, Wis. Grader. 1,631,517; June 7.

Christian, John T., Bremerton, Wash. Automobile signal. 1,631,471; June 7.

Christie, Walter J., Alameda, Calif. Casting machine. 1,631,399; June 7.

Clark, Earle A., Tulsa, Okla. Meter top and index box. 1,631,472; June 7.

Clark, Edward F., North Attleboro, Mass. Bar cuff link. 1,631,246; June 7.

Clark, George H., Brooklyn, N. Y., assignor to Radio Corporation of America. Variable condenser. 1,631,360; June 7.

Clark, Thomas E., assignor to Continuous Train Control Corporation, Detroit, Mich. Conductor for train-control systems. 1,631,361; June 7.

Clark, William C., San Francisco, Calif., assignor, by mesne assignments, to Acme Card System Company, Chicago, Ill. Visible index. 1,631,473; June 7.

Cleaves, William S., Wollaston, assignor to Pneumatic Scale Corporation, Limited, Quincy, Mass. Box-making machine. 1,631,518; June 7.

Cleveland-Akron Bag Company, The. (See Appel, Daniel, assignor.)

Cleveland, George B., Mobile, Ala. Bookcase. 1,631,622; June 7.

Cochran, Albert W., Portland, Oreg. Forming cutting tools. 1,631,623; June 7.

Colby, Edward A., Maplewood, F. Maeulen, East Orange, and G. L. Van Allen, Newark, N. J., assignors to Baker & Company. Muffle furnace. 1,631,747; June 7.

Colliard, Emil C., Arcade, N. Y. Charge-forming device for internal-combustion engines. 1,631,362; June 7.

Collins, George R., administrator. (See Collins, T. B.)

Collins, Harry R., Allentown, Pa., assignor to Fuller-Lehigh Company. Pulverized-fuel feeder. 1,631,119; June 7.

Collins, Martin W. (See Bambach, J. J., and Collins.)

Collins, T. B., also known as T. B. Collins, deceased, Daytona, Fla.; G. R. Collins, administrator, Kansas City, Mo. Boat. 1,631,400; June 7.

Collins, Thomas, jr., assignor to The American Separator Company, Bainbridge, N. Y. Speed indicator. 1,631,796; June 7.

Colonial Fireplace Company. (See Guy, Walter W., assignor.)

Columbia Lighting Fixture Co. Inc. (See Peinlich, Max, assignor.)

Comins, Frank B., Newton, assignor to American Moistening Company, Boston, Mass. Control means for regulating the output of atomizers and the like. 1,631,475; June 7.

Compagnie D'Applications Mecaniques. (See Rouanet, Louis, assignor.)

Condit Electrical Manufacturing Corporation. (See Burnham, George A., assignor.)

Conradson, Conrad M., Green Bay, Wis. Gyratory grinding machine. 1,631,247; June 7.

Conradt, Hermann. (See Sprenger, R., and Conradt.)

Constantine, Alphonse A., Jeffersonville, Ind., assignor to American Car and Foundry Company, New York, N. Y. Operating mechanism for car-vestibule trap doors. 1,631,306; June 7.

Conti, James T. F., and P. H. L. Tiranty, Paris, France. Stamping and registering apparatus. 1,631,624; June 7.

Continuous Train Control Corporation. (See Clark, Thomas E., assignor.)

Cook, A. D., Inc. (See Willers, George E., assignor.)

Cook, Albert E., Evanston, assignor to C. B. Cook, Chicago, Ill. Auto marine vehicle and trailer. 1,631,248; June 7.

Cook, Charles B. (See Cook, Albert E., assignor.)

Cook, Charles C., and G. S. Walker, Saginaw, Mich. Therapeutic oscillator. 1,631,917; June 7.

Cooke, Charles J., Washington, D. C., and J. A. Rennie, New York, assignors to Charles E. Sheppard, Long Island City, N. Y. Repeating attachment for sound-reproducing machines. 1,631,797; June 7.

Coolidge, William D., Schenectady, N. Y., assignor to General Electric Company. Regulating method and apparatus. 1,631,625; June 7.

Coolidge, William D., Schenectady, N. Y., assignor to General Electric Company. Regulator for electrical discharges. 1,631,626; June 7.

Cooper, Warren E., Flushing, N. Y., and V. Willoughby, Ridgewood, N. J., assignors to American Car and Foundry Company, New York, N. Y. Multiple-unit tank car. 1,631,307; June 7.

Copeland, Lucius D., Los Angeles, Calif. Dirigible lamp for automobiles. 1,631,519; June 7.

Coppock, Andrew J., Detroit, Mich. Humidifying device for use with internal-combustion engines. 1,631,808; June 7.

Corfman, Clifford L., Spokane, Wash. Investment composition. 1,631,249; June 7.

Correa, Manuel P., jr., Kalawao, Hawaii. Figure toy. 1,631,918; June 7.
Correct Measure Company. (See MacKenzie, George W., assignor.)
Costelow, John F. (See Sunderland, J. C., and Costelow.)
Creevy, John L., New Orleans, La. Packing. 1,631,520; June 7.
Cristallini, Charles O., assignor to Peck Shoe Company, Worcester, Mass. Shoe and method of manufacture. 1,631,919; June 7.
Crompton & Knowles Loom Works. (See Dacey, Edward J., assignor.)
Crompton and Knowles Loom Works, The. (See Hollingworth, Edward, assignor.)
Cross, Roy, Kansas City, Mo., assignor to Gasoline Products Company, Inc., New York, N. Y. Making motor fuel. 1,631,401; June 7.
Crossland, George, assignor to Mohawk Carpet Mills, Inc., Amsterdam, N. Y. Jack-spool-stripping machine. 1,631,920; June 7.
Crossland, George, assignor to Mohawk Carpet Mills, Inc., Amsterdam, N. Y. Spool support. 1,631,921; June 7.
Crowell, Charles H., White Plains, N. Y. Corrugated-board container and blanks therefor. 1,631,521; June 7.
Culver-Bevan Fruit Jar Company. (See Culver, Lewis O., assignor.)
Culver, Lewis O., West Pittston, assignor to Culver-Bevan Fruit Jar Company, Wilkes-Barre, Pa. Cap-fastening means for preserving jars. 1,631,522; June 7.
Curran, Harry L., New York, N. Y. Automobile radiator shield. 1,631,948; June 7.
Curtis, Timothy H., Westminster, England. Ladder. 1,631,922; June 7.
Curtiss Aeroplane and Motor Company. (See Gilmore, William L., assignor.)
Dacey, Edward J., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Jacquard mechanism for looms. 1,631,523; June 7.
Dalton, Michael P. (See Owen, T. M., and Dalton.)
Daly, Thomas J. M., Memphis, Tenn. Bale-band buckle. 1631,402; June 7.
Daniel, Frederick W., sr., Jacksonville, Fla. Boltless sleeve coupling. 1,631,250; June 7.
Davis, Henry O., Plymouth, Mass. Nailing plate for lasts. 1,631,581; June 7.
Davis, Matthew J., Portland, Oreg. Log raft. 1,631,403; June 7.
Davis, Roy P. M., Mount Union, Pa. Brick-making machine. 1,631,251; June 7.
Davis, Royall O. E., Chapel Hill, N. C., and L. B. Olmstead, Peru, Nebr. Recovering ammonia from gases containing same. 1,631,720; June 7.
Davis, Taube, assignor to Franklin Simon & Co. Inc., New York, N. Y. Shoe. Des. 72,789; June 7.
Davis, Taube, assignor to Franklin Simon & Co., Inc., New York, N. Y. Shoe. Des. 72,790; June 7.
Davis, Taube, assignor to Franklin Simon & Co. Inc., New York, N. Y. Shoe. Des. 72,791; June 7.
Davis, Taube, assignor to Franklin Simon & Co., Inc., New York, N. Y. Dress. Des. 72,792; June 7.
Davol, George H., New York, N. Y. Sanding roller. 1,631,798; June 7.
Day, Fred, Alcester, S. Dak. Carburetor. 1,631,923; June 7.
Day, Wallace H. (See Morgan, E. E., and Day.)
Dayton Steel Foundry Company, The. (See Walther, George, assignor.)
De Boischevalier, Henri, Detroit, Mich., assignor to Societe du Carburateur Zenith, Lyon, France. Hot-air stove. 1,631,721; June 7.
De Brey, Heinrich W. K., The Hague, Netherlands, Sound damper. 1,631,924; June 7.
Decker, Earl B., Cleveland, assignor to B. R. Deming, Cleveland Heights, Ohio. Ironing machine. 1,631,363; June 7.
Decker, Earl B., Cleveland, assignor to B. R. Deming, Cleveland Heights, Ohio. Ironing machine. 1,631,364; June 7.
Delco Light Company. (See Buvinger, G. A., and Warner, assignors.)
Delco Light Company. (See Stock, Anthony T., assignor.)
Demarest, Harry T., Warwick, N. Y. Fruit scrubber and polisher. 1,631,925; June 7.
De Mattia, Barthold, Clifton, assignor to De Mattia Brothers, Inc., Garfield, N. J. Tire-building core. 1,631,855; June 7.
De Mattia Brothers, Inc. (See De Mattia, Barthold, assignor.)
Deming, Barton R. (See Decker, Earl B., assignor.)
Demmel, Paul, Frankfort-on-the-Main-Rodelheim, Germany. Device for milling polygonal holes. 1,631,582; June 7.
De Moos, Charles, Fort Lee, N. J., assignor to Eastman Kodak Company, Rochester, N. Y. Photographic-film-developing machine. 1,631,476; June 7.
Denison, Frederick S., assignor to Minneapolis Heat Regulator Company, Minneapolis, Minn. Centrifugal fluid-fuel burner. 1,631,404; June 7.
Depew, John, assignor to I. Lauter, New York, N. Y. Capacitatively-actuated loud speaker. 1,631,583; June 7.
Diamond Expansion Bolt Company. (See Penney, Harold D., assignor.)
Diamond State Fibre Company. (See McIntosh, James, assignor.)
Dickerson, Walter H., East Orange, N. J., assignor to Industrial Waste Products Corporation, Dover, Del. Product obtained from molasses and preparing same. 1,631,252; June 7.
Dickinson, Albert G. (See Simpson, Ward T., assignor.)
Dickinson, Robert E., jr., Memphis, Tenn. Golf-club shaft. 1,631,926; June 7.
Dietrich, Frank and J., and W. Miner, Chicago, Ill. Direct mixer. 1,631,584; June 7.
Dietrich, John. (See Dietrich, Frank and J., and Miner.)
Dietrich, William S., assignor to Greenville Steel Car Company, Greenville, Pa. Sawing apparatus and method. 1,631,927; June 7.
Dietrichson, William F., Webster Groves, Mo., assignor to American Car and Foundry Company, New York, N. Y. Hatch-cover operating means for refrigerator cars. 1,631,309; June 7.
D'Ollier, William L., and T. Tohlin, Philadelphia, Pa., said Tohlin assignor to said D'Ollier. Screen plate. 1,631,585; June 7.
Donaldson, Alfred S., Newark, N. J., assignor to Du Pont Viscoloid Company, Wilmington, Del. Toilet box. Des. 72,793; June 7.
Doran, Maude M., Spokane, Wash. Counter and heel guard. 1,631,310; June 7.
Dorsey, Edgar O., Montpelier, Ind. Sanitary poultry roost. 1,631,799; June 7.
Dotsch, Fritz, White Plains, N. Y. Hydraulic brake. 1,631,800; June 7.
Doty, John H., Akron, Ohio. Fabric disk wheel. 1,631,928; June 7.
Downing, James Y., Jackson, Miss. Dry-goods-measuring machine. 1,631,405; June 7.
Dray, Robert G., Savannah, Mo. Shirt. 1,631,856; June 7.
Dreher, Gustave F., Schenectady, N. Y., assignor to General Electric Company. Waterproof cementing composition. 1,631,671; June 7.
Dufay, Louis, Versailles, France. Photographic printing in colors. 1,631,524; June 7.
Dunlap, Bernald M., Rockford, Ill., assignor to H. L. Fischer, St. Paul, Minn. Writing pad. 1,631,192; June 7.
Du Pont Viscoloid Company. (See Donaldson, Alfred S., assignor.)
Dupré, Wilfred, Worcester, Mass. Reversible broom. 1,631,253; June 7.
Duro Company, The. (See Eisenhauer, Charles P., assignor.)
Dushman, Saul, Schenectady, N. Y., assignor to General Electric Company. Vacuum discharge apparatus. 1,631,672; June 7.
Dutcher, Frank, Versailles, Pa., assignor to Standard Fuses Corporation, Boston, Mass. Railway signal torpedo. 1,631,857; June 7.
Dyer, Leonard H., New York, N. Y. Internal-combustion engine. 1,631,120; June 7.
Eastman Kodak Company. (See Carroll, Stewart J., assignor.)
Eastman Kodak Company. (See de Moos, Charles, assignor.)
Eastman Kodak Company. (See Favour, Paul, assignor.)
Eastman Kodak Company. (See Folmer, William F., assignor.)
Eastman Kodak Company. (See Jones, Loyd A., assignor.)
Eastman Kodak Company. (See Marler, Harry I., assignor.)
Eaton, John, Schenectady, N. Y., assignor to General Electric Company. Motor-control system. 1,631,673; June 7.
Eberhard Faber Pencil Co. (See Kappes, Carl H., assignor.)
Eckl, Edward, Los Angeles, Calif. Insect destroyer. 1,631,121; June 7.
Edmunds & Jones Corporation. (See Godley, Charles E., assignor.)
Egholm, James P., Chicago, Ill. Dumping truck. 1,631,627; June 7.
Eldmann, Frank L., North Bergen, assignor to H. S. Germond, jr., Bayonne, N. J. Collapsible handle for portable elevators. 1,631,477; June 7.
Eisenhauer, Charles P., assignor to The Duro Company, Dayton, Ohio. Valve. 1,631,406; June 7.
Elder, Thomas W., jr., Brooklyn, assignor to American Car and Foundry Company, New York, N. Y. Cane car. 1,631,311; June 7.
Elder, Thomas W., jr., Brooklyn, assignor to American Car and Foundry Company, New York, N. Y. Car-door lock. 1,631,312; June 7.
Electric Household Utilities Corporation. (See Chapman, Frank D., assignor.)
Electric Wheel Company. (See Calkins, Addison N., assignor.)
Electrical Engineers Equipment Company. (See Jacobs, Ernest H., assignor.)
Electrolock Manufacturing Company, The. (See Hemingway, Wilson, jr., assignor.)
Electron Relay Company, The. (See Laise, Clemens A., assignor.)
Ellis, Carleton. (See Meigs, Joseph V., assignor.)
Ellis Drier & Elevator Company. (See Ellis, Norman C. and H. C., assignors.)

Ellis, Hubert C. (See Ellis, Norman C. and H. C.)
Ellis, Norman C. and H. C., Evanston, Ill., assignors to Ellis Drier & Elevator Company, Chicago, Ill. Tilting trap. 1,631,407; June 7.
Emery, Herbert W., Holliston, assignor to Archer Rubber Company, Milford, Mass. Surface-finishing rubber goods and product of same. 1,631,722; June 7.
Engiand, Harry J., Iowa Falls, Iowa. Lever control for clutch pedals. 1,631,929; June 7.
Epitaux, Albert, Paris, France. Electromagnetic device producing a constant moving force. 1,631,801; June 7.
Estaugh, William, Wanstead, England. Means of and apparatus for transmitting messages through submarine and other like cables. 1,631,254; June 7.
Etzel Company, The. (See Sheedy, J. M., and Myers, assignors.)
Eustis, Warner, Newton, Mass. Mirror mounting. 1,631,193; June 7.
Evert, Frank, Chicago, Ill. Flowerpot. 1,631,802; June 7.
Exton, Alfred H. (See Alexander, R. I., and Exton.)
Fahrenfeld, Fred W., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Hinge. 1,631,365; June 7.
Fahrney, Emery H., Chicago, Ill. Cream separator. 1,631,194; June 7.
Farber, Simon W., Inc. (See Farber, Simon W., assignor.)
Farber, Simon W., assignor to Simon W. Farber, Inc., Brooklyn, N. Y. Holder for glasses and bottle. Des. 72,794; June 7.
Faust, Levin, assignor to Rockford Steel Furniture Company, Rockford, Ill. Ironing board. 1,631,255; June 7.
Favour, Paul, assignor to Eastman Kodak Company, Rochester, N. Y. Motion-picture film strip. 1,631,478; June 7.
Favre, Pierre A., Crosne, France. Machine for working cylindrical members of fusible material. 1,631,674; June 7.
Fay, Thomas J., Brooklyn, N. Y. Vehicle. 1,631,803; June 7.
Feather, George, Halifax, England. Radial drilling machine. 1,631,256; June 7.
Federal Glass Company, The. (See Hanford, Orin A., assignor.)
Feister, George F., Maricopa, Calif. Meat saw. 1,631,366; June 7.
Ferngren, Enoch T., assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio. Method and apparatus for producing sheet glass. 1,631,804; June 7.
Ferngren, Enoch T., assignor to The Libbey-Owens Glass Company, Toledo, Ohio. Drawing sheet glass. 1,631,805; June 7.
Ferriter, John P., Oceanport, and W. T. Guest, Eatontown, N. J. Alternating-current telegraph repeater. 1,631,675; June 7.
Ferriter, John P., Oceanport, and W. T. Guest, Eatontown, N. J. Alternating-current telegraph system. 1,631,676; June 7.
Fetcher, Theophil J., Norwalk, Wis. Tractor brake. 1,631,122; June 7.
Fetty, Charlie C., El Dorado, Kans. Counterbalancing means for well-pumping apparatus. 1,631,408; June 7.
Field, Henry P., Berwick, Pa., assignor to American Car and Foundry Company, New York, N. Y. Mine car. 1,631,313; June 7.
Field, Henry P., Berwick, Pa., assignor to American Car and Foundry Company, New York, N. Y. Mine car. 1,631,314; June 7.
Finn, John C., Los Angeles, Calif. Wooden pot for plants. 1,631,409; June 7.
Firestone Tire and Rubber Company. (See Shepard, N. A., and Krall, assignors.)
Fischer, Howard L. (See Dunlap, Bernald M., assignor.)
Fisher, Charles, Chicago, Ill., assignor to The Automatic Recording Safe Company, Chicago, Ill. Savings bank. 1,631,315; June 7.
Fisher, Harry C., Cincinnati, assignor to The Richardson Company, Lockland, Ohio. Coloring granulated mineral, particularly slate. 1,631,628; June 7.
Fisher, Julia, Bolckow, Mo. Generating power plant. 1,631,257; June 7.
Fitzgerald, Richard. (See McLaughlin, James, assignor.)
Flintkote Company, The. (See Kirschbraun, L., and Rahr, assignors.)
Flowers Mausoleum Company, The. (See Zengerle, Joseph W., assignor.)
Folberth, Frederick G. and W. M., Cleveland, Ohio, assignors to Trico Products Corporation, Buffalo, N. Y. Windshield cleaner. 1,631,629; June 7.
Folberth, William M. (See Folberth, Frederick G. and W. M.)
Folmer, William F., assignor to Eastman Kodak Company, Rochester, N. Y. Cut-film holder. 1,631,479; June 7.
Forbes, John S., assignor, by mesne assignments, to Kerotest Manufacturing Company, Pittsburgh, Pa. Valve. 1,631,586; June 7.
Ford, Fred A., New York, assignor to J. W. Gillis Co., Rochester, N. Y. Telephone stand. 1,631,195; June 7.
Ford, Henry, Dearborn, Mich. Pump. 1,631,316; June 7.
Fornaca, Guido, Turin, Italy. Valve mechanism for internal-combustion engines. 1,631,410; June 7.
Fourness, Wilfred. (See Marcus, H. C., and Fourness.)
Fowler, Samuel. (See Goldfain, E., and Fowler.)
Fox, William H., Minneapolis, Minn. Baseball center and producing the same. 1,631,317; June 7.
Franklin, Simon, & Co. Inc. (See Davis, Taube, assignor.)
Freeman, Arthur J., Alameda, Calif. Sheet conveyer. 1,631,367; June 7.
Freund, Erwin O., assignor to Visking Corporation, Chicago, Ill. Preparing wiener sausages. 1,631,723; June 7.
Freund, Robert R., Denver, Colo. Dirigible light mounting. 1,631,480; June 7.
Fried. Krupp Aktiengesellschaft. (See Lorenz, Rudolf, assignor.)
Fritz, Roy D., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Vulcanizing apparatus. 1,631,806; June 7.
Froesch, Charles, assignor to International Motor Company, New York, N. Y. Flexible coupling. 1,631,196; June 7.
Frost, Walter E., assignor of one-eighth to M. E. Hunt and three-eighths to W. E. Thurlow, Auburn, Me. Police signal system. 1,631,368; June 7.
Frostilla Company, The. (See Richmond, Francis A., assignor.)
Fulcher Pulp Bottle Company. (See Lundgren, Harry, assignor.)
Fuller-Lehigh Company. (See Collins, Harry R., assignor.)
Fur Guide Machine Corporation. (See Ross, Harry, assignor.)
Fuss, Vincenz, assignor to Vereinigte Aluminium-Werke A. G., Lautawerk, Germany. Improving aluminum alloys. 1,631,930; June 7.
Galion Iron Works & Mfg. Co., The. (See Keeler, Raymond W., assignor.)
Gallett, Delbert L., Aberdeen, S. Dak. Cap for paste tubes. 1,631,525; June 7.
Garrett, Berton A., Ballston Spa, N. Y., assignor to General Electric Company. Locomotive or car body. 1,631,677; June 7.
Gartin, Elmer G., Claremont, N. H., assignor to Sullivan Machinery Company. Braking mechanism. 1,631,369; June 7.
Gasoline Products Company. (See Cross, Roy, assignor.)
Gates, Ernest W., Needham, Mass. Puzzle or game. 1,631,587; June 7.
Gay, Henry G., Mankins, Tex. Double adjustable drive-chain idler. 1,631,258; June 7.
Geake, William H. G., Killara, near Sydney, New South Wales, Australia, assignor to W. Rutherford, London, England, and J. Bain, Ottawa, Canada. Dispensing container for plastic substances. 1,631,931; June 7.
Gelfand, Simon, Baltimore, Md. Preparing a food product and the product resulting therefrom. 1,631,858; June 7.
General American Tank Car Corporation. (See Klemoff, Paul, assignor.)
General Electric Company. (See Baker, Walter R. G., assignor.)
General Electric Company. (See Barton, Theophilus F., assignor.)
General Electric Company. (See Beckmann, Johannes, assignor.)
General Electric Company. (See Briggs, William N., assignor.)
General Electric Company. (See Brown, George R., assignor.)
General Electric Company. (See Byrnes, Irving F., assignor.)
General Electric Company. (See Coolidge, William D., assignor.)
General Electric Company. (See Dreher, Gustave F., assignor.)
General Electric Company. (See Dushman, Saul, assignor.)
General Electric Company. (See Eaton, John, assignor.)
General Electric Company. (See Garrett, Berton A., assignor.)
General Electric Company. (See Hall, Chester I., assignor.)
General Electric Company. (See Halvorson, Cromwell A. B., jr., assignor.)
General Electric Company. (See Hastings, H. C., and Sarjeant, assignors.)
General Electric Company. (See Hilliard, John D., assignor.)
General Electric Company. (See Langley, Ralph H., assignor.)
General Electric Company. (See Loebe, W. W., and Grossmann, assignors.)
General Electric Company. (See Martin, Carl, assignor.)
General Electric Company. (See Maurer, Louis A., assignor.)
General Electric Company. (See Merrill, Wilbur L., assignor.)
General Electric Company. (See Rice, Chester W., assignor.)
General Electric Company. (See Skoglund, Charles, assignor.)
General Electric Company. (See Sprenger, R., and Conradt, assignors.)
General Electric Company. (See Treanor, Edward D., assignor.)
General Electric Company. (See Warren, Glenn B., assignor.)
General Electric Company. (See Williamson, James L., assignor.)

General Motors Corporation. (See Anibal, Benjamin H., assignor.)
General Motors Corporation. (See Hunt, Ormond E., assignor.)
General Motors Corporation. (See Jerome, Benjamin, assignor.)
General Motors Research Corporation. (See Short, Charles R., assignor.)
General Phonograph Manufacturing Co. (See Bonsieur, Le, assignor.)
General Phonograph Manufacturing Company, The. (See Mizer, Fred N., assignor.)
Gensley, Frank J., Victor, Iowa. Washing machine. 1,631,630; June 7.
Gerlinger, Gertrude, Montebello, Calif. Table decoration. 1,631,631; June 7.
Germond, Henry S., jr. (See Eidmann, Frank L., assignor.)
Gershon, Victor P. (See Grosvenor, W. M., and Gershon.)
Gertloff, Richard. (See Günther, A., and Gertloff.)
Gesellschaft für Drahtlose Telegraphie m. b. H. (See Leib, August, assignor.)
Gfeller, Frederick, Alhambra, Calif. Water-shut-off valve. 1,631,481; June 7.
Gfeller, Frederick, Alhambra, assignor to Joshua Hendy Iron Works, Sunnyvale, Calif. Water-discharge valve. 1,631,482; June 7.
Gibbs, Frederick H., Brooklyn, assignor to American Car and Foundry Company, New York, N. Y. Antifriction bearing application. 1,631,318; June 7.
Giddings & Lewis Machine Tool Company. (See Kempton, Herbert E., assignor.)
Gillette, Maude M., New York, N. Y. Frame. 1,631,807; June 7.
Gillette, Walter H., Long Beach, Calif. Sash fastener. 1,631,370; June 7.
Gillis, J. W., Co. (See Ford, Fred A., assignor.)
Gilmore, William L., Port Washington, assignor, by mesne assignments, to Curtiss Aeroplane and Motor Company, Inc., Garden City, N. Y. Variable lift—variable resistance aerofoil. 1,631,259; June 7.
Gilpin, Garth G., Riverside, Ill., assignor to P. H. Murphy Company, New Kensington, Pa. Metal roof for freight cars. 1,631,260; June 7.
Gilson, Robert M., Pittsburgh, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,631,808; June 7.
Glowacki, Charles, Philadelphia, Pa. Garter. 1,631,261; June 7.
Godley, Charles E., Detroit, Mich., assignor, by mesne assignments, to C. M. Hall Lamp Company. Combination rear light for vehicles. 1,631,678; June 7.
Godley, Charles E., Ypsilanti, assignor to Edmunds & Jones Corporation, Detroit, Mich. Focusing lamp. 1,631,724; June 7.
Going, George G., Middletown, Conn., assignor to Remington-Noiseless Typewriter Corporation, New York, N. Y. Typewriting machine. 1,631,197; June 7.
Goldfain, Ephraim, and S. Fowler, Oklahoma City, Okla. Electric fan. 1,631,411; June 7.
Goodrich, B. F., Company, The. (See Fritz, Roy D., assignor.)
Goodrich, B. F., Company, The. (See Martin, Frederick H., assignor.)
Goodrich, B. F., Company, The. (See Tew, James D., assignor.)
Goolridge, George E., Reading, assignor to Ballard Service Corporation, Boston, Mass. Liquid-fuel-burning apparatus. 1,631,859; June 7.
Goodyear Tire & Rubber Company, The. (See Bruson, Herman A., assignor.)
Goodyear Tire & Rubber Company, The. (See Kelly, William J., assignor.)
Goodyear Tire & Rubber Company, The. (See Straits, Joseph A., assignor.)
Goodyear Tire & Rubber Company, The. (See Urquhart, W. R., Post, Humphrey, and Van Arsdale, assignors.)
Gough, Joseph, Newark, N. J., assignor to Gough Stemming Machine Corporation. Leaf separator. 1,631,198; June 7.
Gough Stemming Machine Corporation. (See Gough, Joseph, assignor.)
Gourdou, Charles E. P., St. Mande, France. Variable-pressure-operated expansion device. 1,631,262; June 7.
Grasselli Dyestuff Corporation. (See Herz, Richard, assignor.)
Grating Company of America, The. (See Nagin, Harry, assignor.)
Green, William A. (See Luxton, W. J., and Green.)
Greenhouse, Samuel, Akron, Ohio. Pressure-operable valve. 1,631,263; June 7.
Greenlee, Fred, Gallia, Ohio. Dirigible headlight construction for automobiles. 1,631,412; June 7.
Greenville Steel Car Company. (See Dietrich, William S., assignor.)
Greenwald, Leslie J., Chicago, Ill. Vanity case. 1,631,588; June 7.
Gregorius, Joseph S. (See Koupal, W. G., and Gregorius.)
Gregorius, Joseph S., Mount Vernon, Ohio, assignor to Pittsburgh Plate Glass Company. Apparatus for drawing sheet glass. 1,631,319; June 7.
Greubel, Michael J., North Plainfield, N. J. Case. 1,631,371; June 7.
Griffin, Charles, Ypsilanti, Mich. Combined coffee and tea pot. 1,631,932; June 7.
Griffin, John F. (See St. John, H. A., and Griffin.)
Griscom-Russell Company, The. (See Sebald, Leslie E., assignor.)
Groff, James O. (See Seymour, W., jr., Groff, and Schaaf.)
Grossman, Samuel, assignor to K. Klebanoff and Grossman, New York, N. Y. Finger ring. Des. 72,795; June 7.
Grossman, Samuel, assignor to K. Klebanoff and Grossman, New York, N. Y. Finger ring. Des. 72,796; June 7.
Grossmann, Max. (See Loebe, W., and Grossmann.)
Grosvenor, William M., and V. P. Gershon, New York, N. Y.; said Gershon assignor to said Grosvenor. Anthraquinone paste and making the same. 1,631,589; June 7.
Gruenewald, Eugene J., and D. E. Ross, assignors to Ross Gear & Tool Company, La Fayette, Ind. Steering-post control-lever assembly. 1,631,809; June 7.
Gruver, Perry F., Amarillo, Tex. Bearing for grain separators. 1,631,810; June 7.
Guenther, Emil, Philadelphia, Pa. Convertible chair. 1,631,811; June 7.
Guest, Wesley T. (See Ferriter, J. P., and Guest.)
Günther, Albert, and R. Gertloff, Schmiedefeld in Thuringen, Germany. Heat-insulating bottle. 1,631,413; June 7.
Guy, Walter W., Oak Park, assignor to Colonial Fireplace Company, Chicago, Ill. Fireplace. 1,631,123; June 7.
Guyot Brothers. (See Boots, William C., assignor.)
Haldeman, Harry M., Los Angeles, Calif. Orifice-meter connection. 1,631,264; June 7.
Hall, C. M., Lamp Company. (See Godley, Charles E., assignor.)
Hall, Chester I., Fort Wayne, Ind., assignor to General Electric Company. Thermal relay. 1,631,679; June 7.
Hall, Joseph A., jr., and O. M. Tishlarich, assignors to A. M. Byers Company, Pittsburgh, Pa. Method and apparatus for marking articles. 1,631,680; June 7.
Hall, Samuel W. (See Struble, C. H., and Hall.)
Hall, Westley F., Matawan, assignor to The Hanson & Van Winkle Company, Newark, N. J. Conveyer. 1,631,124; June 7.
Hall, Wesley F., Matawan, assignor to The Hanson & Van Winkle Company, Newark, N. J. Electroplating machine. 1,631,199; June 7.
Halvorsen, Axel I. S., assignor to McCormick Brothers Company, Albany, Ind. Rack for tea, coffee, and spice containers. 1,631,725; June 7.
Halvorson, Cromwell A. B., jr., Lynn, Mass., assignor to General Electric Company. Lighting unit. 1,631,632; June 7.
Hamilton, Karl M., assignor, by mesne assignments, to Chicago-Cleveland Car Roofing Company, Chicago, Ill. Car-roof construction. 1,631,860; June 7.
Hanford, Orin A., assignor to The Federal Glass Company, Columbus, Ohio. Glass-forming apparatus. 1,631,633; June 7.
Hanschke, Adelheid, née Sachs, Berlin, Germany. Flying machine. 1,631,861; June 7.
Hansell, Walter, Brooklyn, N. Y. Musical instrument. 1,631,862; June 7.
Hanson & Van Winkle Company, The. (See Hall, Wesley F., assignor.)
Hanson, & Van Winkle Company, The. (See King, Willis R., assignor.)
Happel, Albert W., Toledo, Ohio, assignor, by mesne assignments, to The Uline Ice-Scoring Machine Company, Wilmington, Del. Reciprocating feeder. 1,631,125; June 7.
Harrington, Alfred L., Rossiyn Farms, Pa., assignor to Pittsburgh Plate Glass Company. Plate-glass surfacing car. 1,631,126; June 7.
Harris Calorific Company, The. (See Harris, John, assignor.)
Harris, John, assignor to The Harris Calorific Company, Cleveland, Ohio. Valve for tanks. 1,631,372; June 7.
Harris, John J., Chicago, Ill. Adhesive. 1,631,265; June 7.
Harris, Robert I., Punta Gorda, Fla. Check protector. 1,631,863; June 7.
Hartman, William W., Los Angeles, Calif. Molding cutter. 1,631,526; June 7.
Hartmann Trunk Company. (See Rasmussen, Martin, assignor.)
Hasseltine, Stacy B., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Door-operating mechanism. 1,631,127; June 7.
Hasha, William C., Long Beach, Calif. Washing machine. 1,631,266; June 7.
Hastings, Hammond C., and C. J. Sarjeant Rugby, England, assignors to General Electric Company. Protective device for dynamo-electric machines. 1,631,726; June 7.
Hazelton, Carl J., assignor to American Narrow Fabric Company, Worcester, Mass. Hose-supporter structure. 1,631,813; June 7.
Hawkins, Robert D., Wilmington, N. C. End structure for railway cars. 1,631,812; June 7.
Head, Francis, New York, N. Y. Drying apparatus. 1,631,483; June 7.
Hehemann, Frederick H., assignor to The Lunkenheimer Company, Cincinnati, Ohio. Valve. 1,631,414; June 7.
Heine Boiler Company. (See Pahmeyer, Frederick O., assignor.)

Heine Boiler Company. (See Siegerist, Walter, assignor.)
Heins, John L. C., Chicago, Ill. Hinge with automatic lifting and locking means. 1,631,527; June 7.
Hemingway, Wilson, jr., Melrose, Pa., assignor to The Electrolock Manufacturing Company, Vicksburg, Miss. Automobile locking means. 1,631,267; June 7.
Henderson, William, New York, N. Y. Came machine. 1,631,814; June 7.
Henderson, Wylie E., Lanett, Ala. Top clearer for roving frames. 1,631,727; June 7.
Hendrickson, Norton T., and C. Roholt, Hoople, N. Dak. Fly swatter. 1,631,864; June 7.
Hendry, William F., Ossining, assignor, by mesne assignments, to National Carbon Company, Inc., New York, N. Y. Dry cell. 1,631,200; June 7.
Hendry, William F., Ossining, assignor, by mesne assignments, to National Carbon Company, Inc., New York, N. Y. Dry cell. 1,631,528; June 7.
Hendy, Joshua, Iron Works. (See Gfeller, Frederick, assignor.)
Herald Electric Company, The. (See Kurman, Nathan A., assignor.)
Herz, Richard, Frankfort-on-the-Main, Germany, assignor to Grasselli Dyestuff Corporation, New York, N. Y. Violet vat dyestuff of the 2-thionaphthene-2-indolindigo series. 1,631,865; June 7.
Heurung, Anton, Munich, Germany. Apparatus for producing and projecting cinematographic pictures. 1,631,866; June 7.
Hewitt, Edward R., Midvale, N. J., and A. H. Leipert, College Point, N. Y., assignors to International Motor Company, New York, N. Y. Casing for transmissions and the like. 1,631,201; June 7.
Hewlett, James M., Lawrence, N. Y. Partition wall. 1,631,373; June 7.
Heyda, James C., Pittsfield, Wis. Transmission mechanism. 1,631,590; June 7.
Hickok, W. O., Manufacturing Company. (See Broadmeyer, Albert, assignor.)
Hildebrand, Wilhelm, Lichterfelde, Berlin, Germany. Brake accelerator for single-chamber compressed-air brakes. 1,631,815; June 7.
Hill Compressor & Pump Company, The. (See Hill, Ebenezer, assignor.)
Hill, Ebenezer, South Norwalk, Conn., assignor to The Hill Compressor & Pump Company, New York, N. Y. Combined liquid and air pump. 1,631,591; June 7.
Hill, Ebenezer, North Stamford, Conn., assignor to The Hill Compressor & Pump Company, New York, N. Y. Rotary pumping machine. 1,631,592; June 7.
Hill, Roger M., Washington, D. C. Illuminating device for projection purposes. 1,631,529; June 7.
Hilliard, John D., Schenectady, N. Y., assignor to General Electric Company. Electric switch. 1,631,681; June 7.
Hilson, Harry J., et al. (See Sprague, Earl V., assignor.)
Hind, George. (See Blair, R. F., and Hind.)
Hinson, Winslow E., Fort Smith, Ark. Cabinet. 1,631,202; June 7.
Hinze, Charles G., Evanston, Ill. Hand guard. 1,631,128; June 7.
Hiscox, Charles I. (See Hiscox, Elmer E., and C. I.)
Hiscox, Elmer E., Chicago, Ill., and C. I. Hiscox, La Crosse, Wis. Automobile oil-drain device. 1,631,129; June 7.
Hitchcock, Halbert K., Pittsburgh, Pa., assignor to Pittsburgh Plate Glass Company. Plate-glass transfer and laying apparatus. 1,631,203; June 7.
Hitchcock, Halbert K., Pittsburgh, Pa., assignor to Pittsburgh Plate Glass Company. Process and apparatus for melting glass. 1,631,204; June 7.
Hoefler, Carl P., Syracuse, N. Y. Shield for automobile headlights. 1,631,130; June 7.
Hoeldtke, Albert, Detroit, Mich. Vehicle body. 1,631,131; June 7.
Hoffman, Albert F., Newark, N. J. Bottling machine. 1,631,530; June 7.
Hofstetter, George O., Fidelity, Ill. Measuring device. 1,631,682; June 7.
Hollingworth, Edward, Dobcross, England, assignor to The Crompton and Knowles Loom Works, Worcester, Mass. Loom for weaving chenille Axminster and like carpets, blankets, and other fabrics. 1,631,531; June 7.
Holmes, Edward C., Cincinnati, Ohio. Holder for drilling mechanism. 1,631,683; June 7.
Hopkins, Arthur C., Niles, Mich. Braiding carrier. 1,631,634; June 7.
Hopkins, James L., trustee. (See Peebles, Frank W. L., assignor.)
Horner, Marie L. and M. M., New Orleans, La. Favor. 1,631,205; June 7.
Horner, Marie M. (See Horner, Marie L. and M. M.)
Hosking, Richard T., Wilmette, assignor, by mesne assignments, to Shakeproof Lock Washer Company, Incorporated, Chicago, Ill. Lock washer. 1,631,415; June 7.
Hoskins, William, Chicago, Ill. Treating wood. 1,631,728; June 7.
Houseman, Harold E., assignor to Standard-Trump Brothers Machine Company, Wilmington, Del. Circular-knitting machine. 1,631,816; June 7.
Houseman, Harold E., assignor to Standard-Trump Brothers Machine Company, Wilmington, Del. Circular-knitting machine. 1,631,817; June 7.
Howard, Ernest E., Kansas City, Mo. Traffic gate. 1,631,416; June 7.
Howerton, Andrew G., Memphis, Tenn. Apparatus for treating piles. 1,631,532; June 7.
Hoyle, John L., New Orleans, La. Electric-meter cover. 1,631,684; June 7.
Hudson Heating Systems, Inc. (See Hudson, Walter E., assignor.)
Hudson, Walter E., Amagansett, assignor to Hudson Heating Systems, Inc., New York, N. Y. Electric heater. 1,631,484; June 7.
Hudson, Walter E., Amagansett, assignor to Hudson Heating Systems, Inc., New York, N. Y. Electric heating system. 1,631,485; June 7.
Hufferd, George. (See Alden, H. W., and Hufferd.)
Humboldt, Elie S., Oakland, assignor to The Pacific Lumber Company, San Francisco, Calif. Wooden battery separator. 1,631,867; June 7.
Humphrey, Dwight E. (See Urquhart, W. R., Post, Humphrey, and Van Arsdale.)
Hunt, Mountfort E., et al. (See Frost, Walter E., assignor.)
Hunt, Ormond E., assignor to General Motors Corporation, Detroit, Mich. Vehicle. 1,631,206; June 7.
Hutt, Albert E., Ardmore, Pa. Semi-inclosed, collapsible, upper deck roof. 1,631,818; June 7.
Hyde, Leon W., Hillsboro, Oreg. Coffeepot. 1,631,486; June 7.
I. G. Farbenindustrie Aktiengesellschaft. (See Jannek, Josef, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Loböfer, Wilhelm, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Weise, Paul, assignor.)
Industrial Waste Products Corporation. (See Dickerson, Walter H., assignor.)
Inglis, Bruce K., assignor of one-half to C. W. Inglis, Milwaukee, Wis. Oil burner. 1,631,374; June 7.
Inglis, Clement W. (See Inglis, Bruce K., assignor.)
Inland Empire Paper Company. (See Rosebush, Waldo E., assignor.)
Inland Engineering Company. (See Alexander, Ralph I., assignor.)
Inland Engineering Company. (See Alexander, R. I., and Exton, assignors.)
International Motor Company. (See Froesch, Charles, assignor.)
International Motor Company. (See Hewitt, E. R., and Leipert, assignors.)
International Motor Company. (See Leipert, August H., assignor.)
International Motor Company. (See Matthews, Philip E., assignor.)
International Motor Company. (See Wirrer, Gottfried, assignor.)
International Silver Co. (See Beck, Ernest T., assignor.)
International Silver Company. (See Zeitung, Alpeck L., assignor.)
Irvin, Walter. (See Murray, John F., assignor.)
Irwin, Henry H., and W. A. Carpenter, Greenville, S. C. Fender attachment for automobiles. 1,631,417; June 7.
Ivory, James W., Philadelphia, Pa. Nut lock or fastener washer. 1,631,819; June 7.
Jackson, Charles K., Columbus, Ohio. Fencepost. 1,631,820; June 7.
Jackson, Charles K., Columbus, Ohio. Wire connection. 1,631,821; June 7.
Jackson, Philip T., Toronto, Ontario, Canada. Cooking apparatus. 1,631,418; June 7.
Jacobs, Ernest E., assignor to Lyons' California Glacé Fruit Company, San Francisco, Calif. Making glacé fruit. 1,631,487; June 7.
Jacobs, Ernest H., assignor to Electrical Engineers Equipment Company, Chicago, Ill. Electrical switch. 1,631,268; June 7.
Jacobson, Sidney D., New York, N. Y. Antiskidding device. 1,631,207; June 7.
Jahn, Frederick L., assignor to Watson & McDaniel Co., Philadelphia, Pa. Screen. 1,631,822; June 7.
Jannek, Josef, Ludwigshafen-on-the-Rhine, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Purifying gases. 1,631,823; June 7.
Jaray, Paul, Friedrichshafen, Germany. Motor car. 1,631,269; June 7.
Jeffery, Joseph A., and E. T. Montgomery, assignors, by mesne assignments, to Champion Porcelain Company, Detroit, Mich. Ceramic insulating material. 1,631,729; June 7.
Jeffery, Joseph A., and E. T. Montgomery, assignors, by mesne assignments, to Champion Porcelain Company, Detroit, Mich. Ceramic material. 1,631,730; June 7.
Jensen, Louis. (See Barker, W. R., and Jensen.)
Jerome, Benjamin, Pontiac, Mich., assignor to General Motors Corporation, Detroit, Mich. Internal-combustion engine. 1,631,208; June 7.
Jewell, Charles E., Seneca Falls, N. Y. Adjustable hanger or support. 1,631,209; June 7.
Johannesmeyer, Charles G., Glendale, assignor to The Liberty Machine Tool Company, Hamilton, Ohio. Metal-planing machine. 1,631,132; June 7.
Johanson, Adolph T., assignor of one-half to H. V. Tutton, Benton Harbor, Mich. Water heater. 1,631,533; June 7.

Johnson, Agnar, Rockford, Ill. Headwear. 1,631,210; June 7.
Johnson, Axel, Oakland, Calif. Saw set. 1,631,534; June 7.
Johnson, Earl R., Chicago, Ill. Ruler. 1,631,731; June 7.
Johnson, Harley S., Erwin, Tenn. Safety device for locomotives. 1,631,868; June 7.
Johnson, Warren V., Bloomsburg, Pa., and J. L. McDowell, Jersey City, N. J., assignors to American Car and Foundry Company, New York, N. Y. Mine car. 1,631,320; June 7.
Johnston, Frank H., assignor, by mesne assignments, to Acme Card System Company, Chicago, Ill. Visible card system. 1,631,732; June 7.
Jones, Eleanor H., Boston, Mass. Golf tee. 1,631,270; June 7.
Jones, Erwin J., St. Paul, Minn. Mouth cleaning and massaging device. 1,631,133; June 7.
Jones, Loyd A., assignor to Eastman Kodak Company, Rochester, N. Y. Illuminating apparatus. 1,631,488; June 7.
Jones, Percival W., Warwick, assignor to Louis Stern Company, Providence, R. I. Safety catch. 1,631,824; June 7.
Jones, Thomas M., Garden City, Kans. Concrete form. 1,631,825; June 7.
Jorgensen, Bernhardt, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Tack-supplying mechanism. 1,631,134; June 7.
Josepho, Anatol M., assignor to Photomaton Inc., New York, N. Y. Photographic apparatus. 1,631,593; June 7.
Judd, Irving H., Detroit, assignor to Whitehead and Kales, Inc., River Rouge, Mich. Landing and raising gear for semitrailers. 1,631,135; June 7.
Jurey, Wesley F., Norcatur, Kans. Meat tenderer. 1,631,869; June 7.
Kaegi, Emil, Detroit, Mich., assignor to D. J. Burns, Bronxville, N. Y. Oil filter. 1,631,594; June 7.
Kalman Steel Company. (See White, William E., assignor.)
Kantenwein, Oscar E. (See Burner, W. L., and Kantenwein.)
Kappes, Carl H., New York, assignor to Eberhard Faber Pencil Co., Brooklyn, N. Y. Paper box. 1,631,595; June 7.
Karnes, James C., Buffalo, N. Y. Mechanism for setting fuses within guns. 1,631,211; June 7.
Kasdan, Nathan, Bronx, N. Y. Vanity case. 1,631,136; June 7.
Kassler, Adolph, assignor to American Car and Foundry Company, New York, N. Y. Lock for car-door-operating mechanism. 1,631,321; June 7.
Kast, Morgan D., Pendleton, Oreg. Weeder. 1,631,733; June 7.
Katz, Samuel, Greenville, S. C. Changeable sign or advertising device. 1,631,870; June 7.
Katzinger, Arthur, assignor to Edward Katzinger Company, Chicago, Ill. Covered baking pan. 1,631,734; June 7.
Katzinger, Edward, Company. (See Katzinger, Arthur, assignor.)
Kauch, Robert, Dayton, Ohio. Pendulum-controlled sight. 1,631,635; June 7.
Kautzsch, Alma, Philadelphia, Pa. Corset clasp. 1,631,535; June 7.
Keeler, Raymond W., assignor to The Gallon Iron Works & Mfg. Co., Gallon, Ohio. Roller tractor. 1,631,271; June 7.
Keller, William H., Inc. (See Shaff, Ernest H., assignor.)
Kelly, William J., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Manufacturing mercapto-benzo-thiazole. 1,631,871; June 7.
Kempton, Herbert E., assignor to Giddings & Lewis Machine Tool Company, Fond du Lac, Wis. Wheel-dressing mechanism. 1,631,596; June 7.
Kendall, Allen B., Niagara Falls, and B. W. Meisel, Crestwood, assignors to The Regan Safety Devices Company, Inc., New York, N. Y. Train-control system. 1,631,597; June 7.
Kennedy, Bert. (See Kennedy, Philip and B.)
Kennedy, Philip and B., Gloversville, N. Y. Baseball glove. 1,631,735; June 7.
Kenyon, Oliver C., Geneva, Ill. Lawn rake. 1,631,375; June 7.
Kernes, James, assignor to Kernes Manufacturing Company, Chicago, Ill. Clock case. Des. 72,797; June 7.
Kernes Manufacturing Company. (See Kernes, James, assignor.)
Kerotest Manufacturing Company. (See Forbes, John S., assignor.)
Kielar, Stanislaw, Milwaukee, Wis. Toy top. 1,631,272; June 7.
Kiewicz, John, assignor to The Reece Button Hole Machine Company, Boston, Mass. Tool for inserting or removing screws. 1,631,489; June 7.
Kimura, Eigiro, San Pedro, Calif. Vehicle traffic signal. 1,631,273; June 7.
Kincade, Forrest J., New York, N. Y., assignor, by mesne assignments, to C. I. Link, Denver, Colo. Film-feeding apparatus. 1,631,137; June 7.
King, Willis R., assignor to The Hanson & Van Winkle Company, Newark, N. J. File. 1,631,212; June 7.
Kinley, Myron M., Tulsa, Okla. Apparatus for plugging wells. 1,631,419; June 7.
Kirner, Josef, Stuttgart, Germany. Bearing for spinning spindles. 1,631,736; June 7.
Kirschbraun, Lester, Chicago, Ill., and C. E. Rahr, assignors to The Flintkote Company, Boston, Mass. Apparatus for saturating materials. 1,631,826; June 7.
Kitchin, Frank G., Anne Arundel County, Md. Window operator. 1,631,400; June 7.
Klebanoff, Kel, and Grossman. (See Grossman, Samuel, assignor.)
Klein, George S., Granger, Wash. Knife-grinding attachment for meat-grinding machines. 1,631,491; June 7.
Klemoff, Paul, assignor to General American Tank Car Corporation, Chicago, Ill. Car underframe. 1,631,685; June 7.
Kloss, Alex, Aachen-Rothe Erde, Germany. Mud guard for vehicles. 1,631,420; June 7.
Klumb, Arthur H. (See Quade, A., and Klumb.)
Knapp, Edward L., assignor to The National Brass Company, Grand Rapids, Mich. Drawer pull. Des. 72,708; June 7.
Knight, Earle R., Norwood, Ohio, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Dynamo-electric machine. 1,631,737; June 7.
Knight, Henry J., Vancouver, British Columbia, Canada. Gear puller. 1,631,872; June 7.
Knight, Ira, Midland, Mich. Wheel runner. 1,631,873; June 7.
Koch, Frederick, Newark, N. J., assignor to U. S. Tool Company, Inc. Vernier condenser. 1,631,738; June 7.
Kohler, Anthony M., East Liverpool, Ohio, assignor to The Babcock & Wilcox Company, Bayonne, N. J. Monolithic structure and making the same. 1,631,322; June 7.
Kohnle, Frederick, assignor to The Monarch Marking System Company, Dayton, Ohio. Tag price-marking machine. 1,631,933; June 7.
Koppel Industrial Car and Equipment Company. (See Burner, W. L., and Kantenwein, assignors.)
Koppers Development Corporation, The. (See Koppers, Heinrich, assignor.)
Koppers, Heinrich, Essen-Ruhr, Germany, assignor to The Koppers Development Corporation, Pittsburgh, Pa. Apparatus and process for burning ceramics and the like. 1,631,536; June 7.
Korsmo, Torbjorn C., assignor to Madison-Kipp Corporation, Madison, Wis. Die-casting machine. 1,631,686; June 7.
Koupal, Walter G., and J. S. Gregorius, Mount Vernon, Ohio, assignors to Pittsburgh Plate Glass Company. Glass-drawing apparatus. 1,631,138; June 7.
Krall, Stanley. (See Shepard, N. A., and Krall.)
Krause, Arthur J., Cleveland, Ohio. Speed-reduction mechanism. 1,631,739; June 7.
Krenzke, John G., assignor to Advance-Rumely Company, La Porte, Ind. Lubricating system for train of gears. 1,631,537; June 7.
Kurman, Nathan A., assignor to The Herald Electric Company, New York, N. Y. Loud Speaker. Des. 72,799; June 7.
Labombarde, Elie W., Nashua, N. H. Appliance for making set-up boxes. 1,631,492; June 7.
Laise, Clemens A., assignor to The Electron Relay Company, Toledo, Ohio. Refractory metal product and making same. 1,631,493; June 7.
La Joie, Hubert J., assignor to Auto Pneumatic Action Company, New York, N. Y. Pneumatic pump construction. 1,631,274; June 7.
Lamb, Arthur. (See Baird, G. W., and Lamb.)
Landis Machine Company. (See Shearer, Harry T., assignor.)
Lane, William E., St. Louis, Mo., assignor to Underwood Typewriter Company, New York, N. Y. Scale plate for typewriting machines. 1,631,494; June 7.
Langdon, Frank E., Vancouver, Wash. Winding shaft. 1,631,538; June 7.
Langerak, Meyer. (See Langerak, Wiggert, assignor.)
Langerak, Wiggert, assignor of one-half to M. Langerak, Pella, Iowa. Grain weigher. 1,631,376; June 7.
Langley, Ralph H., Schenectady, N. Y., assignor to General Electric Company. Dial. 1,631,687; June 7.
Lantagne, Joseph, Centerdale, R. I. Meat jack. 1,631,827; June 7.
Larc, Frank W., Panuco, Mexico. Boiler-tube-cutting device. 1,631,495; June 7.
Larison, Eldon L., Anaconda, Mont. Manufacture of sulphuric acid. 1,631,139; June 7.
Larrair, George M., Indianapolis, Ind. Whirligig. 1,631,539; June 7.
Lasher, Daniel, and A. S. Plank, Port Huron, Mich. Nozzle holder. 1,631,874; June 7.
Latour Corporation. (See Latour, Marius, assignor.)
Latour, Marius, Paris, France, assignor to Latour Corporation, Jersey City, N. J. Electrical system. 1,631,213; June 7.
Lauter, Ignatz. (See Depew, John, assignor.)
Lawrence, George L., Jr., Melrose, Mass. Game-ball bladder. 1,631,740; June 7.
Lawson, F. H., Company, The. (See Sharwood, Sydney E., assignor.)
Lazzari, Leone, and D. Saudino, New York, N. Y. Heel for shoes. 1,631,741; June 7.

Lea, Charles, Boston, assignor, by mesne assignments, to F. C. Blanchard, Dorchester, Mass. Lubricator. 1,631,742; June 7.
Leake, Arthur G., Bridgeport, Conn. Collapsible-tube holder. 1,631,275; June 7.
L'Eclairage des Vehicules Sur Rail. (See Bénit, Henri, assignor.)
Leffert, Charles B., assignor to United States Tent & Awning Company, Chicago, Ill. Combination awning and side-wall panel for summer or outing houses or cottages. 1,631,214; June 7.
Leffert, Charles B., assignor to United States Tent & Awning Company, Chicago, Ill. Tent. 1,631,215; June 7.
Lehr, John F., sr., Baltimore, Md. Jar lifter. 1,631,598; June 7.
Leib, August, assignor to Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Variable condenser. 1,631,599; June 7.
Leipert, August H. (See Hewitt, E. R., and Leipert.)
Leipert, August H., assignor to International Motor Company, New York, N. Y. Nonmetallic centering device for shafting. 1,631,216; June 7.
Lemex, John D., Tulsa, Okla. Casing wagon. 1,631,276; June 7.
Le Munyon, Ethan C., and H. N. Moore, assignors, by mesne assignments, to Rocky Mountain Steel Products, Inc., Los Angeles, Calif. Brake. 1,631,540; June 7.
Less Carloads Lots Company, The. (See Smith, Alfred H., assignor.)
Lewis, Earle B., Waterbury, Conn. Variable condenser. 1,631,636; June 7.
Libbey-Owens Sheet Glass Company, The. (See Ferngren, Enoch T., assignor.)
Libbey-Owens Sheet Glass Company, The. (See Rhoades, W. A., and McKinley, assignors.)
Liberty Machine Tool Company, The. (See Johannesmeyer, Charles G., assignor.)
Link, Charles I. (See Kincade, Forrest J., assignor.)
Lionel Corporation, The. (See Caruso, Louis, assignor.)
Lipscomb, William B., Washington, D. C. Steam engine. 1,631,743; June 7.
Lock, John E., Lowell, Mass. Traffic signal for vehicles. 1,631,140; June 7.
Loebe, Walther-Wilfried, and M. Grossmann, Berlin, Germany, assignors to General Electric Company. Sealing-off device. 1,631,377; June 7.
Loesel, Nicholas, Richmond Hill, assignor to American Can Company, New York, N. Y. Stripper device for perforating punches. 1,631,323; June 7.
Lohöfer, Wilhelm, Leipsic, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Photographic film. 1,631,421; June 7.
Loken, Webster, Windom, Minn. Attrition mill. 1,631,422; June 7.
Long, Elmer C., Quincy, Ill., assignor, by mesne assignments, to Security Trust Company, Detroit, Mich. Piston. 1,631,952; June 7.
Long, George F., New York, assignor, by mesne assignments, to Steiner Electric Corporation, Long Island City, N. Y. Dashboard control. 1,631,277; June 7.
Lookabaugh, Harry C., Jacksonville, Fla. Safety guard for dangerous highways and the like. Re16,649; June 7.
Loranger, Hubert R. (See Loranger, Ubald R. and H. R.)
Loranger, Ubald R. and H. R., Detroit, Mich. Refrigerating system. 1,631,278; June 7.
Lorenz, Rudolf, Essen, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Surface condenser. 1,631,141; June 7.
Loughrey, Carl T., Los Angeles, Calif. Distilling oil shale. 1,631,637; June 7.
Lowe, James K., Baltimore, Md. Propeller for ships or the like. 1,631,744; June 7.
Lucas, Anton, Kansas City, Mo. Purifying iron scale. 1,631,423; June 7.
Lucas, Jonathan, assignor to Lucas-Lamborn Loom Corporation, New York, N. Y. Bobbin-feeding mechanism for looms. 1,631,828; June 7.
Lucas-Lamborn Loom Corporation. (See Lucas, Jonathan, assignor.)
Luciblello, Andrew, New Haven, Conn. Rope grip. 1,631,745; June 7.
Luckey, George P., Dayton, Ohio. Flow meter. 1,631,746; June 7.
Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung. (See Arnstein, Karl, assignor.)
Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung. (See Siller, Karl, assignor.)
Lundgren, Harry, assignor to Fulcher Pulp Bottle Company, Oakland, Calif. Method and apparatus for forming hollow ware. 1,631,496; June 7.
Lunkenheimer Company, The. (See Hehemann, Frederick H., assignor.)
Lupton's, David, Sons Company. (See Brogden, Joah, assignor.)
Lüscher, Emil, assignor to the Society Elektrizitatswerk Lonza, Gampel and Basel, Switzerland. Manufacture of stabilized metaldehyde. 1,631,875; June 7.
Luxton, William J., and W. A. Green, London, England. Can-soldering machine. 1,631,424; June 7.
Lyons' California Glacé Fruit Company. (See Jacobs, Ernest E., assignor.)

Maby, Frederick W., assignor to Royalty Holding Corporation, New York, N. Y. Starter for internal-combustion engines. 1,631,747; June 7.
Macaulay, Herman C., Rumford, Me. Steam trap. 1,631,876; June 7.
MacKenzie, George W., Beaver, assignor to Correct Measure Company, Rochester, Pa. Liquid-measuring tank. 1,631,541; June 7.
Madison-Kipp Corporation. (See Korsmo, Torbjorn C., assignor.)
Maeulen, Frederick. (See Colby, E. A., Maeulen, and Van Allen.)
Mandy, James, assignor of thirty-five per cent to L. Mandy, New York, N. Y. Life-saving device. 1,631,279; June 7.
Mandy, Louis. (See Mandy, James, assignor.)
Manuel, Thomas D., Bellville, South Africa. Fuel filler for tanks. 1,631,542; June 7.
Marcus, Henry C., San Francisco, and W. Fourness, Oakland, Calif. Compressor. 1,631,425; June 7.
Marler, Harry I., New York, assignor to Eastman Kodak Company, Rochester, N. Y. Dental X-ray-film package. 1,631,497; June 7.
Marsac, Gerald. (See Schilz, John, assignor.)
Martin, Carl, Kearny, N. J., assignor to General Electric Company. Sealing-off device. 1,631,378; June 7.
Martin, Charles E., Paulsboro, N. J., assignor to Vacuum Oil Company, New York, N. Y. Sealing machine for containers or the like. 1,631,748; June 7.
Martin, Frederick H., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Overshoe. 1,631,749; June 7.
Massey, Orren I., assignor of one-half to S. Williams, Elk City, Okla. Clothing and package carrier. 1,631,543; June 7.
Masters, John H., assignor to The Valle-Kimes Company, Dayton, Ohio. Water-supply system and valve therefor. 1,631,142; June 7.
Matthews, Edgar M., Jamaica, N. Y., and J. A. Carr, East Orange, N. J., assignors to American Telephone and Telegraph Company. Deflection dynamometer. 1,631,143; June 7.
Matthews, Philip E., Plainfield, N. J., assignor to International Motor Company, New York, N. Y. Oiling system for bearings. 1,631,217; June 7.
Maurer, D. W. (See Parrish, Benjamin E., assignor.)
Maurer, Louis A., Irvington, N. J., assignor to General Electric Company. Sealing-off torch. 1,631,379; June 7.
McAnsh, Byron A., Chicago, Ill. Collapsible spout. 1,631,951; June 7.
McCann, William G., et al. (See Barnett, John B., assignor.)
McClaferty, E. A., Los Angeles, Calif. Adjustable washboard support. 1,631,638; June 7.
McClintock, Herbert R. (See Russell, James M., assignor.)
McCormick Brothers Company. (See Halvorsen, Axel I. S., assignor.)
McDonald, William H., Overton, Nev. Ditching machine. 1,631,639; June 7.
McDowell, John L. (See Johnson, W. V., and McDowell.)
McGowen, William R., McKees Rocks, assignor to United States Chain & Forging Company, Pittsburgh, Pa. Automobile bumper. 1,631,640; June 7.
McIntosh, James, Norristown, Pa., assignor to Diamond State Fibre Company, Bridgeport, Pa. Paper product and making same. 1,631,750; June 7.
McKinley, Thomas C. (See Rhoades, W. A., and McKinley.)
McLarty, Edward, sr., and S. L. Blankenship, Los Angeles, Calif. Universal radio and direct-service system. 1,631,690; June 7.
McLauchlin, James, Dolton, assignor to Richard Fitzgerald, Chicago, Ill. Baking brick. 1,631,144; June 7.
McMyler Interstate Company, The. (See Wright, James F., assignor.)
McNamara, Patrick B. (See Blanding, Joseph E., assignor.)
McNeill, John W., and J. Michelsen, Wistaria, British Columbia, Canada. Calk attachment for boots. 1,631,877; June 7.
Meigs, Joseph V., assignor, by mesne assignments, to C. Ellis, Montclair, N. J. Manufacture of products from aromatic amines and sulphur chloride. 1,631,280; June 7.
Meisel, Benjamin W. (See Kendall, A. B., and Meisel.)
Melniker, Abraham, and S. Calmanson, Brooklyn, N. Y. Collapsible baby carriage. 1,631,498; June 7.
Melton, Frank J., Clayton, N. Mex. Gravity dump body for trucks or wagons. 1,631,751; June 7.
Mercer, Henry H., Claremont, N. H., assignor to Sullivan Machinery Company. Oil-burning device. 1,631,688; June 7.
Merrill, Wilbur L., Schenectady, N. Y., assignor to General Electric Company. Automatic load equalization. 1,631,752; June 7.
Michelsen, John. (See McNeill, J. W., and Michelsen.)
Micro Machine Company. (See Baumberger, William J., assignor.)
Midulla, Benjamin, Wilkinsburg, Pa. Electric heater. 1,631,753; June 7.

Milbrath, Arthur F., Milwaukee, Wis. Mounting for valve tappets. 1,631,218; June 7.
Miller, Otto, Cincinnati, Ohio. Automatic take-up bolt. 1,631,878; June 7.
Miller, William L., St. Paul, Minn. Radio tuning device. 1,631,380; June 7.
Miner, Claude G., Berkeley, assignor, by mesne assignments, to Anglo-California Trust Company, trustee, San Francisco, Calif. Production of metallic magnesium and fixed nitrogen. 1,631,544; June 7.
Miner, Edward G. (See Smith, A. H., and Miner.)
Miner, W. H., Inc. (See Haseltine, Stacy B., assignor.)
Miner, W. H., Inc. (See O'Connor, John F., assignor.)
Miner, William E. (See Dietrich, Frank and J., and Miner.)
Minneapolis Heat Regulator Company. (See Denison, Frederick S., assignor.)
Mizer, Fred N., assignor to The General Phonograph Manufacturing Company, Elyria, Ohio. Low-speed governor for spring motors and the like. 1,631,324; June 7.
Moening, Frank H., Coe Township, Isabella County, Mich. Huller. 1,631,426; June 7.
Moffett, Marcus H., Lakewood, assignor to The Bankers Savings & Credit System Company, Cleveland, Ohio. Money receptacle. 1,631,934; June 7.
Mohawk Carpet Mills, Inc. (See Crossland, George, assignor.)
Mohawk Rubber Company, The. (See Moore, Howard P., assignor.)
Molins, Walter E., London, England. Machine for automatically cutting moving webs of paper or other materials into sheets. 1,631,879; June 7.
Monarch Marking System Company, The. (See Kohnle, Frederick, assignor.)
Monich, Alex., Forestville, Conn. Curtain supporter. 1,631,219; June 7.
Montgomery, Earl T. (See Jeffery, J. A., and Montgomery.)
Montstream, John H., Hartford, Conn. Cutting tool. 1,631,641; June 7.
Moore, Ernest R., Gadsden, Ala. Revolving grate. 1,631,427; June 7.
Moore, Henry N. (See Le Munyon, E. C., and Moore.)
Moore, Howard P., Cuyahoga Falls, assignor to The Mohawk Rubber Company, Akron, Ohio. Machine for removing air bags from tires. 1,631,281; June 7.
Morgal, John F., Springfield, Ohio. Chuck. 1,631,499; June 7.
Morgan, Arthur L., Montreal, Quebec, Canada. Chain grate for furnaces. 1,631,282; June 7.
Morgan, Emerson E., Yonkers, and W. H. Day, New Rochelle, N. Y. Lip stick. 1,631,283; June 7.
Morrison, Theodore S., Chicago, Ill. Davenport bed. 1,631,600; June 7.
Morton, Thomas, Moseley, England. Stud-and-socket-type fastening. 1,631,880; June 7.
Moser, Felix, Holland, Mich. Wrench for screw-top jars. 1,631,689; June 7.
Mueller, John G., Dayton, Ohio. Rail brace. 1,631,325; June 7.
Muller, Franklyn R., Lake Bluff, assignor to Franklyn R. Muller, Inc., Waukegan, Ill. Manufacturing mastic tile and the like. 1,631,284; June 7.
Muller, Franklyn R., Inc. (See Muller, Franklyn R., assignor.)
Murphy, P. H., Company. (See Gilpin, Garth G., assignor).
Murphy, William, St. Louis Park, Minn. Tire Chain. 1,631,754; June 7.
Murray, John F., assignor of one-half to W. Irvin, Otterbein, Ind. Straw press. 1,631,881; June 7.
Musselman, Stanley B., Sarnia, Ontario, Canada. Indicator for setting steam-engine valves. 1,631,285; June 7.
Myers, Wesley. (See Sheely, J. M., and Myers.)
Nagin, Harry, Brooklyn, N. Y., assignor to the Grating Company of America, Pittsburgh, Pa. Connected bar structure. 1,631,691; June 7.
National Automatic Tool Co., The. (See Peters, Frebert J., assignor.)
National Brass Company, The. (See Knapp, Edward L., assignor.)
National Carbon Company. (See Hendry, William F., assignor.)
National Carbon Company. (See Roberg, Philip, assignor.)
National Carbon Company. (See Yngve, Victor, assignor.)
National Fire Proofing Company. (See Wallace, Robert G., assignor.)
Negly, Laurel A., and P. S. Black, Forth Worth, Tex. Cereal beverage compound. 1,631,829; June 7.
Negly, Laurel A., and P. S. Black, Forth Worth, Tex. Preparing cereal beverage compounds. 1,631,830; June 7.
Nell, William, assignor to William Nell & Company, Chicago, Ill. Container. 1,631,935; June 7.
Nell, William, & Company. (See Nell, William, assignor.)
Nelles, Russell E., assignor to Reading Chain & Block Corporation, Reading, Pa. Adjustable end truck. 1,631,545; June 7.
Nelson, Lewen R., Peoria, Ill. Sprinkler. 1,631,381; June 7.
Newman, Jesse F., Los Angeles, Calif. Making a rice product. 1,631,145; June 7.
Newmark, Aaron S., Brooklyn, N. Y. Power-transmission device. 1,631,500; June 7.
Newton, Albert E. (See Tewksbury, D. S., and Newton.)
Nicholson, Joseph B., Steubenville, Ohio. Apparatus for scarifying plastic clay columns. 1,631,220; June 7.
Niles, Harry F., Chicago, Ill. Package. 1,631,755; June 7.
Nistler, Sebastian, Buffalo, N. Y. Infant's conveyance. 1,631,546; June 7.
Nordan, Monte E., West Frankfort, Ill. File. 1,631,882; June 7.
Nordlund, Ludvig B., San Francisco, Calif. Change returning device. 1,631,326; June 7.
Norton Company. (See Belden, Albert G., assignor.)
Novadel Process Corporation. (See Van der Lande, Johannes A. L., assignor.)
Novick, Abraham, Brooklyn, assignor to F. L. Smithe Machine Company, Incorporated, New York, N. Y. Envelope machine. 1,631,146; June 7.
O'Connor, John F., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Shock-absorbing mechanism. 1,631,147; June 7.
O'Connor, John F., assignor to W. H. Miner, Inc., Chicago, Ill. Friction shock-absorbing mechanism. 1,631,148; June 7.
O'Connor, John F., assignor to W. H. Miner, Inc., Chicago, Ill. Friction shock-absorbing mechanism. 1,631,149; June 7.
Ohio Brass Company, The. (See Chandler, Homer P., assignor.)
Olin, Franklin W., Alton, assignor to Western Cartridge Company, East Alton, Ill. Detonator package. 1,631,756; June 7.
Olmstead, Lewis B. (See Davis, R. O. E., and Olmstead.)
Olson, Martin E., Minneapolis, Minn. Bench clamp. 1,631,428; June 7.
Olvis, James E., Los Angeles, Calif. Vending machine. 1,631,547; June 7.
Oppenheim, René, assignor to Société Anonyme Le Carbone, Levallois-Perret, France. Positive electrode for electric batteries. 1,631,642; June 7.
Orlow, Ernest M., assignor of one-half to A. J. Schmitt, Milwaukee, Wis. Reenforced fabric for garment construction. 1,631,601; June 7.
Ostrander, Allen E., Bronxville, assignor to American Car and Foundry Company, New York, N. Y. Car-end construction. 1,631,327; June 7.
Ottenheimer Bros. Inc. (See Ottenheimer, Jacob B., assignor.)
Ottenheimer, Jacob B., assignor to Ottenheimer Bros., Inc., Baltimore, Md. Refrigerator. 1,631,883; June 7.
Owen, Tom M., Wallace, and M. P. Dalton, Mullan, Idaho. Flotation apparatus. 1631,382; June 7.
Owen, William, Pittsburgh, Pa., assignor to Pittsburgh Plate Glass Company. Blank-feeding device. 1,631,150; June 7.
Owens Bottle Company, The. (See Soubier, Leonard D., assignor.)
Pacific Lumber Company, The. (See Humboldt, Elle S., assignor.)
Packard Motor Car Company. (See Woolson, Lionel M., assignor.)
Pahmeyer, Frederick O., assignor to Heine Boiler Company, St. Louis, Mo. Boiler. 1,631,328; June 7.
Palka, Andrew, Detroit, Mich. Radiator. Des. 72,800; June 7.
Palmer-Jones, Daniel, assignor of one-half to Scaffolding (Great Britain) Limited, Stockwell, London, England. Coupling or clamping device for scaffolding and other framework structures. 1,631,831; June 7.
Parkinson, Joseph C., Tarentum, Pa., assignor to Pittsburgh Plate Glass Company. Control apparatus for leers. 1,631,151; June 7.
Parks, Paul B. (See Russell, E. A., and Parks.)
Parrish, Benjamin E., Honeygrove, assignor of one-half to D. W. Maurer, Dallas, Tex. Plug for oil wells. 1,631,152; June 7.
Parsons, Albert R., assignor of one-half to P. Woods, Bonaporte, Iowa. Telescoping tire rim. 1,631,429; June 7.
Patent Button Company, The. (See Ross, Frederick N., assignor.)
Patnaude, William E., Stoughton, Mass. Dispensing faucet. 1,631,548; June 7.
Patterson, William L., assignor to Bausch & Lomb Optical Company, Rochester, N. Y. Optical instrument. 1,631,329; June 7.
Paulson, Victor E., Esmond, S. Dak. Adjustable wrench. 1,631 884; June 7.
Pavia, Luigi, Allentown, Pa. Tension device and the like. 1,631,330; June 7.
Pawling, George F., Philadelphia, Pa. Screed support. 1,631,502; June 7.
Payzant, Henry H., Everett, Wash. Floor-laying machine. 1,631 501; June 7.
Pease, F. F., Inc. (See Pease, Fred F., assignor.)
Pease Fred F., East Braintree, assignor to F. F. Pease Inc., Boston, Mass. Vacuum cleaner. 1,631,549; June 7.
Peck, Charles B., Suffern, N. Y. Washing paper. 1,631,757; June 7.
Peck Shoe Company. (See Cristallini, Charles O., assignor.)

Peebles, Frank W. L., assignor to J. L. Hopkins, trustee, St. Louis, Mo. Vacuum packing apparatus. 1,631,885; June 7.
Peinlich, Max, White Plains, assignor to Columbia Lighting Fixture Co. Inc., New York, N. Y. Arm for a lighting fixture or the like. Des. 72,801; June 7.
Pengilly, Joseph H., assignor to Brown & Pengilly, Inc., Los Angeles, Calif. Quick-break switch. 1,631,503; June 7.
Penney, Harold D., Pelham, N. Y., assignor to Diamond Expansion Bolt Company. Sound amplifier. 1,631,221; June 7.
Pennsylvania Stamping Corporation. (See Swett, Lewis E., assignor.)
Penrod, Melvin A., assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,631,832; June 7.
Pepper, Sam, Nottingham, England. Lace fabric and producing same. 1,631,886; June 7.
Perogio, Elio A., Montelupone, Italy. Felted fabric and the manufacture thereof. 1,631,692; June 7.
Peters, Frebert J., assignor to The National Automatic Tool Co., Richmond, Ind. Drill holder. 1,631,286; June 7.
Peterson, George H., East Orange, N. J., assignor to American Telephone and Telegraph Company. Trunk circuits. 1,631,153; June 7.
Peterson, Julius C., Elgin, Ill. Snap fastener. 1,631,602; June 7.
Pfaudler Company. (See Smith, A. H., and Miner, assignors.)
Photomaton Inc. (See Josepho, Anatol M., assignor.)
Pieper, Alphonse F., Rochester, N. Y. Universal joint. Des. 72,802; June 7.
Pieper, Alphonse F. Rochester, N. Y. Valve. 1,631,643; June 7.
Pinto, Angelo, Brooklyn, N. Y. Carrousel. 1,631,331; June 7.
Pittsburgh Plate Glass Company. (See Gregorius, Joseph S., assignor.)
Pittsburgh Plate Glass Company. (See Harrington, Alfred L., assignor.)
Pittsburgh Plate Glass Company. (See Hitchcock, Halbert K., assignor.)
Pittsburgh Plate Glass Company. (See Koupal, W. G., and Gregorius, assignors.)
Pittsburgh Plate Glass Company. (See Owen, William, assignor.)
Pittsburgh Plate Glass Company. (See Parkinson, Joseph C., assignor.)
Plank, Alvin S. (See Lasher, D., and Plank.)
Plank, Walter E., San Francisco, Calif. Steering-mechanism stabilizer for trailers. 1,631,332; June 7.
Pneumatic Scale Corporation, Limited. (See Cleaves, William S., assignor.)
Poetz, John C., Leonia, Idaho. Molding core. 1,631,154; June 7.
Pope, Joseph H., Hamilton, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Heeling shoes. 1,631,155; June 7.
Post, Clifford W. (See Urquhart, W. R., Post, Humphrey, and Van Arsdale.)
Posternak, Swigel, Chene-Bougeries, near Geneva, assignor to Society of Chemical Industry in Basle, Basel, Switzerland. Phosphorus containing nuclear substance of milk casein in a chemically-pure form and making the same. 1,631,887; June 7.
Potmaker, Vitus, San Francisco, Calif. Pie-filling compound. 1,631,287; June 7.
Potter, Earl F., Glencoe, assignor of one-half to G. W. Rodormer, Park Ridge, Ill. Ground-clamp connecter. 1,631,288; June 7.
Pow, Joseph C., Hays, N. C. Hospital bed. 1,631,888; June 7.
Pressed Steel Car Company. (See Streib, John F., assignor.)
Prest-O-Lite Company, The. (See Benner, Raymond C., assignor.)
Priebe, Herman C., Blue Island, Ill. Truck frame. 1,631,335; June 7.
Privat, Bernard, Stockton, Calif. Garden wheelbarrow. 1,631,333; June 7.
Proctor, Albert E., Bellingham, Wash. Band-saw-tooth roller. 1,631,336; June 7.
Quade, Alfred and A. H. Klumb, assignors to West Bend Equipment Corporation, West Bend, Wis. Stall and stanchion. 1,631,337; June 7.
Quiroz, Francisco A., New York, N. Y. Centrifugal apparatus for separating purposes. 1,631,383; June 7.
Qvarnstrom, Ernest J., Attleboro, Mass. Receptacle. 1,631,334; June 7.
Rackham, George J., assignor to Yellow Coach Manufacturing Co., Chicago, Ill. Change-speed transmission. 1,631,338; June 7.
Radio Corporation of America. (See Clark, George H., assignor.)
Rahr, Chester E. (See Kirschbraun, L., and Rahr.)
Ranney, Clark E., Tulsa, Okla. Derrick. 1,631,156; June 7.
Rappley, William J., Billings, Mont. Drive-shaft puller. 1,631,889; June 7.
Rappold, Hermann, Duren, Germany, assignor to Zimmermann & Jansen, Gesellschaft mit beschrankter Haftung, Duren, Rheinland, Germany. Working blast heaters used in connection with blast furnaces. 1,631,950; June 7.
Rasmussen, Martin, assignor to Hartmann Trunk Company, Racine, Wis. Latching device. 1,631,758; June 7.
Rauch, George F., Pukawana, S. Dak. Time-operated circuit closer. 1,631,644; June 7.
Raynolds, Laurence, New York, N. Y. Aeroplane. 1,631,603; June 7.
Reading Chain & Block Corporation. (See Nelles, Russell E., assignor.)
Reardon, Robert E., Columbia, Pa. Bottle-capping utensil. 1,631,289; June 7.
Reason, Walter M., assignor to E. Ballamos, Pontiac, Mich. Transmission lock. 1,631,157; June 7.
Redick, Frank, Parkerton, Wyo. Hydraulic swivel hook. 1,631,890; June 7.
Redman, Charles H., East Orange, N. J. Golf club. 1,631,504; June 7.
Reece Button Hole Machine Company, The. (See Kiewicz, John, assignor.)
Reece Shoe Machinery Company. (See Zaleski, Frank, assignor.)
Regan Safety Devices Company. (See Kendall, A. B., and Meisel, assignors.)
Rekar, Jay J., Los Angeles, Calif. Illuminating and heating device. 1,631,645; June 7.
Remington-Noiseless Typewriter Corporation. (See Going, George G., assignor.)
Rennie, John A. (See Cooke, C. J., and Rennie.)
Rhoades, James W., Harris, Mo. Grease cup. 1,631,158; June 7.
Rhoades, Warren A., Shreveport, La., and T. C. McKinley, Charleston, W. Va., assignors to The Libbey-Owens Sheet Glass Company, Toledo, Ohio. Skimming glass. 1,631,759; June 7.
Rice, Chester W., Schenectady, N. Y., assignor to General Electric Company. Sound-reproducing apparatus. 1,631,646; June 7.
Richards, Ernest J., Mineral Point, Wis. Headlight reflector. 1,631,159; June 7.
Richardson Company, The. (See Fisher, Harry C., assignor.)
Richardson Company, The. (See Trefzger, Herbert, assignor.)
Richey, George H., Boston, Mass., assignor to Sullivan Machinery Company. Broaching tool. 1,631,693; June 7.
Richmond, Francis A., assignor to The Frostilla Company, Elmira, N. Y. Lotion. 1,631,384; June 7.
Rick, George A., Woodhaven, assignor to A. G. Spalding & Bros., New York, N. Y. Shoulder pad. 1,631,694; June 7.
Ricks, Fred, and E. G. E. Burgoyne, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J. Sewing machine. 1,631,385; June 7.
Riddle, Frank H., assignor to Champion Porcelain Company, Detroit, Mich. Porcelain. 1,631,695; June 7.
Rinker, Charles A., Galesburg, Ill. Bunch former. 1,631,760; June 7.
Risley, Elton, Ventnor, N. J. Suction pipe. 1,631,761; June 7.
Ritter, George, Woodbridge, N. J., assignor to The Barber Asphalt Company, Philadelphia, Pa. Flexible shingle. 1,631,936; June 7.
Roberg, Philip, Elmhurst, assignor, by mesne assignments, to National Carbon Company, Inc., New York, N. Y. Electrical connection. 1,631,550; June 7.
Robertson, Neil, Vancouver, British Columbia, Canada. Domestic fireplace structure. 1,631,696; June 7.
Robinson, Harvey W., New Orleans, La. Current motor. 1,631,647; June 7.
Robinson, Joseph, New York, N. Y. Automatic train-pipe connecter. 1,631,551; June 7.
Robinson, Joseph, New York, N. Y. Automatic train-pipe connecter. 1,631,552; June 7.
Robinson, Robert M., assignor to Cheatham Electric Switching Device Co., Inc., Louisville, Ky. Switch and signal system. 1,631,648; June 7.
Robinson, Thomas, Babylon, N. Y., assignor to Anaconda Sales Company. Roofing element. 1,631,604; June 7.
Rockford Steel Furniture Company. (See Faust, Levin, assignor.)
Rocky Mountain Steel Products, Inc. (See Le Munyon, E. C., and Moore, assignors.)
Roderick, Charles E., Battle Creek, Mich. Blood-testing device. 1,631,553; June 7.
Rodgers, Ellis B. (See Seward, E. A., and Rodgers.)
Rodormer, George W. (See Potter, Earl F., assignor.)
Rohlfing, John M., Plainfield, N. J., assignor to American Car and Foundry Company, New York, N. Y. Ladle elevator. 1,631,339; June 7.
Rohlfing, John M., Plainfield, N. J., assignor to American Car and Foundry Company, New York, N. Y. Brake for elevators. 1,631,340; June 7.
Roholt, Charles. (See Hendrickson, N. T., and Roholt.)
Root, Arthur J., Springfield, Ohio. Shock absorber. 1,631,222; June 7.
Rosebush, Waldo E., Millwood, Wash. Exhaust system for paper-machine driers. 1,631,833; June 7.
Rosebush, Waldo E., assignor to Inland Empire Paper Company, Millwood, Wash. Method and apparatus for mixing pulp. 1,631,762; June 7.
Rosen, Abraham W., New York, N. Y. Combined ash receiver and match box. Des. 72,803; June 7.

Rosenthal China Corporation. (See Wesp, George, assignor.)
Ross, David E. (See Gruenewald, E. J., and Ross.)
Ross, Frederick N., Detroit, Mich., assignor to The Patent Button Company, Waterbury, Conn. Hopper construction. 1,631,160; June 7.
Ross Gear & Tool Company. (See Chandler, F. F., and Young, assignors.)
Ross Gear & Tool Company. (See Gruenewald, E. J., and Ross., assignors.)
Ross, Harry, assignor to Fur Guide Machine Corporation, New York, N. Y. Needle plate for fur-sewing machines. 1,631,605; June 7.
Rothermund, Werner F., Brooklyn, N. Y., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,631,223; June 7.
Rouanet, Louis, Ivry-Port, France, assignor to Compagnie d'Applications Mecaniques, Paris, France. Bearing with rolling members. 1,631,763; June 7.
Royalty Holding Corporation. (See Maby, Frederick W., assignor.)
Ruben, Samuel, New York, N. Y. Electrostatic relay device. 1,631,764; June 7.
Rüdenberg, Reinhold, Berlin-Charlottenburg, assignor to Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung, Siemensstadt, near Berlin, Germany. Cooling electric machinery. 1,631,765; June 7.
Russell, Edward A., Chicago, and P. B. Parks, Oak Park, assignors to Vapor Car Heating Company, Inc., Chicago, Ill. Limit switch for valve-operating mechanism. 1,631,161; June 7.
Russell, James M., assignor to H. R. McClintock, San Diego, Calif. Parachute. 1,631,766; June 7.
Russell, James M., assignor to H. R. McClintock, San Diego, Calif. Parachute pack. 1,631,767; June 7.
Russell, James M., assignor to H. R. McClintock, San Diego, Calif. Parachute harness. 1,631,768; June 7.
Rutherford, Walter, et al. (See Geake, William H. G., assignor.)
Ryerson, Joseph T., & Son, Inc. (See Seymour, W., jr., Groff, and Schaaf, assignors.)
St. John, Henry A., and J. F. Griffin, Utica, N. Y. Callpers. 1,631,896; June 7.
Salo, Nels, Watton, Mich. Antikick auto crank. 1,631,649; June 7.
Salsich, Neil E., Bethlehem, Pa. Gauge rod. 1,631,769; June 7.
Samis, Ivalou B., Los Angeles, Calif. Educational game. 1,631,505; June 7.
Sander, Mart, Hapsal, Esthonia. Surveying instrument with drawing device. 1,631,891; June 7.
Saoutchik, Jacques, Neuilly-sur-Seine, France. Window opening and closing mechanism. 1,631,892; June 7.
Sarjeant, Cyril J. (See Hastings, H. C., and Sarjeant.)
Saudino, Dominic. (See Lazzari, L., and Saudino.)
Scaffolding (Great Britain) Limited. (See Palmer-Jones, Daniel, assignor.)
Schaaf, Albert. (See Seymour, W., jr., Groff, and Schaaf.)
Schaper, Harry C., assignor to The Weightograph Company, St. Louis, Mo. Personal weighing scale. 1,631,341; June 7.
Schenck, John F., sr., Lawndale, N. C. Skein-winding machine. 1,631,893; June 7.
Scherdel, Karl, Fitchburg, Mass. Frankfurter-roll-forming machine. 1,631,697; June 7.
Schick, Adolph M., Wheeling, W. Va. Vehicle signaling apparatus. 1,631,698; June 7.
Schliz, John, assignor of one-third to G. Marsac, Los Angeles, Calif. Electrical-conduit-crossover system. 1,631,224; June 7.
Schinscholl, Erich, Cincinnati, Ohio. Egg carton. 1,631,554; June 7.
Schlaepfer, Edouard, Lausanne, Switzerland. Spray nozzle. 1,631,894; June 7.
Schleicher, Frank J., St. Louis, Mo. Paper box. 1,631,225; June 7.
Schmitt, Arthur J. (See Orlow, Ernest M., assignor.)
Schnell, Ernst O., Chicago, Ill. Pad for hair waving. 1,631,342; June 7.
Schorger, Arlie W., Madison, Wis., assignor, by mesne assignments, to Wood Conversion Company, Cloquet, Minn. Gelatinizing wood. 1,631,834; June 7.
Schreiber, Sigmond, Pittsburgh, Pa. Dispensing apparatus. 1,631,430; June 7.
Schremp, Edward J., Rochester, N. Y. Pressing machine for garments and the like. 1,631,770; June 7.
Schroder, Edward J., Lowell, Ind. Variable condenser. 1,631,226; June 7.
Schubert, Friedrich W., assignor to Brysilka, Limited, Apperley Bridge, near Bradford, England. Collapsible reel for winding filaments, yarns, threads, silks, and the like. 1,631,431; June 7.
Schubert, Friedrich W., assignor to Brysilka, Limited, Apperley Bridge, near Bradford, England. Manufacture of artificial silk. 1,631,835; June 7.
Schuetz, Thomas J., assignor to Braden Steel & Winch Company, Tulsa, Okla. Take-up reel. 1,631,432; June 7.
Scott-Ullman Company, The. (See Wing, Clarence G., assignor.)
Scott, Walter M., Lakewood, and R. E. Tresise, Cleveland, Ohio. Casing for electrical measuring instruments. 1,631,606; June 7.
Scovill Manufacturing Company. (See Bennett, Morris H., assignor.)
Sebald, Leslie E., Ridgewood, N. J., assignor to The Griscom-Russell Company, New York, N. Y. Vertical film-type evaporator. 1,631,162; June 7.
Security Trust Company. (See Long, Elmer C., assignor.)
See, Edward E., Omaha, Nebr. Staff base. 1,631,227; June 7.
Segelhorst, August L., Whittier, Calif. Packing device. 1,631,343; June 7.
Selmer, Fredrik, Christiania, Norway. Sand-heating apparatus for building purposes. 1,631,699; June 7.
Seward, Edward A., and E. B. Rodgers, Columbus, Ga. Terminal protective apparatus. 1,631,555; June 7.
Seymour, William, jr., J. O. Groff, and A. Schaaf, assignors to Joseph T. Ryerson & Son, Inc., Chicago, Ill. Metal-bending machine. 1,631,386; June 7.
Shaff, Ernest H., assignor to William H. Keller, Inc., Grand Haven, Mich. Fluid-pressure-actuated tool. 1,631,163; June 7.
Shakeproof Lock Washer Company. (See Hosking, Richard T., assignor.)
Sharwood, Sydney E., Lakeland, Fla., assignor to The F. H. Lawson Company, Cincinnati, Ohio. Bathroom wall fixture. Des. 72,804; June 7.
Shearer, Harry T., assignor to Landis Machine Company, Waynesboro, Pa. Die head. 1,631,556; June 7.
Sheather, Albert, Elizabeth, N. J. Oil burner. 1,631,771; June 7.
Sheedy, J. M., Richmond Hill, N. Y., and W. Myers, Bethlehem, Pa., assignors to The Etzel Company, Inc., New York, N. Y. Method of and apparatus for obtaining disruptive effects. 1,631,290; June 7.
Shelton, Robert H., Durant, Okla. Window-sash holder. 1,631,772; June 7.
Shepard, Norman A., Akron, Ohio, and S. Krall, Longmeadow, Mass., assignors to The Firestone Tire and Rubber Company, Akron, Ohio. Vulcanizing rubber and compound resulting therefrom. Re16,648; June 7.
Sheppard, Charles E. (See Cooke, C. J., and Rennie, assignors.)
Shiman, Abraham, Newark, N. J. Finger ring. Des. 72,805; June 7.
Shiman, Abraham, Newark, N. J. Finger ring. Des. 72,806; June 7.
Shiman, Abraham, Newark, N. J. Finger ring. Des. 72,807; June 7.
Shiman, Abraham, Newark, N. J. Finger ring. Des. 72,808; June 7.
Short, Charles R., assignor to General Motors Research Corporation, Dayton, Ohio. Resilient connecter. 1,631,228; June 7.
Shuter, Alfred D. (See Smith, W. S., and Shuter.)
Siegerist, Walter, assignor to Heine Boiler Company, St. Louis, Mo. Steam boiler. 1,631,344; June 7.
Siemens & Halske Aktiengesellschaft Wernerwerk. (See Soldan, Otto, assignor.)
Siemens-Schuckertwerke Gesellschaft mit beschrankter Haftung. (See Rüdenberg, Reinhold, assignor.)
Siller, Karl, assignor to Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Gas cell of rigid airships. 1,631,895; June 7.
Silverstein, William I., Brooklyn, N. Y. Machine for making ventilators for wearing apparel. 1,631,773; June 7.
Simmons Company. (See Bradshaw, Richard, assignor.)
Simms, Frederick R., London, England. Yielding rotary driving mechanism. 1,631,433; June 7.
Simonds-Dayton, A. A., Company, The. (See Anderson, Edward, assignor.)
Simpson, Franklin S., Alton, Ill. Machine for grinding valves. 1,631,700; June 7.
Simpson, John M., assignor to Warner Gear Company, Muncie, Ind. Transmission gearing. 1,631,937; June 7.
Simpson, John M., assignor to Warner Gear Company, Muncie, Ind. Automobile transmission. 1,631,938; June 7.
Simpson, John M., assignor to Warner Gear Company, Muncie, Ind. Speed-varying transmission. 1,631,939; June 7.
Simpson, Ward T., Ann Arbor, assignor, by mesne assignments, to A. G. Dickinson, Grand Rapids, Mich. Carburetor. 1,631,701; June 7.
Sinner, Emil, Milwaukee, Wis. Timer. 1,631,291; June 7.
Sipe, Clinton R., assignor, by mesne assignments, to Automatic Electric Inc. Chicago, Ill. Automatic switch. 1,631,506; June 7.
Sipp, Grant, Paterson, N. J. Winding machine. 1,631,292; June 7.
Six, Dale M., Los Angeles, Calif. Lubricating means for automobile chassis. 1,631,650; June 7.
Skoglund, Charles, Lynn, Mass., assignor to General Electric Company. Making tubing. 1,631,651; June 7.
Slade, Harold E., assignor to Beaver Machine & Tool Co., Inc., Newark, N. J. Outlet receptacle. 1,631,507; June 7.
Slingerland, Henry H., River Forest, Ill. Banjo. 1,631,293; June 7.
Small, Arthur E., Oak Park, assignor to Union Metal Products Company, Chicago, Ill. Device for operating car couplers. 1,631,294; June 7.

Small, Arthur E., Oak Park, assignor to Union Metal Products Company, Chicago, Ill. Centering device for car couplers. 1,631,295; June 7.
Smith, Alfred H., deceased, Chappaqua, N. Y.; M. E. Smith and E. H. Smith, executors, assignors to The Less Carload Lots Company, Wilmington, Del. Sectional railroad car. 1,631,164; June 7.
Smith, Alfred H., Chappaqua, and E. G. Miner, Rochester; said Miner assignor to Pfaudler Company, Rochester, N. Y. Sectional refrigerator car. 1,631,165; June 7.
Smith, Charles E., Azusa, Calif. Amalgamating machine. 1,631,434; June 7.
Smith, Emery H., et al., executors. (See Smith, Alfred H.)
Smith, Frank A., Union City, Conn. Tire chain. 1,631,296; June 7.
Smith, Harry B., New York, N. Y. Method and mechanism for covering cloth boards, etc. 1,631,940; June 7.
Smith, Maude E., et al., executors. (See Smith, Alfred H.)
Smith, Raymond C. (See Springfield, Garland P., assignor.)
Smith, Richmond W., Walpole, Mass. Shutter control for cameras. 1,631,435; June 7.
Smith, Willoughby S., Newton Poppleford, and A. D. Shuter, Harrow-on-the-Hill, England. Manufacture of telegraph and telephone cables. 1,631,774; June 7.
Smithe, F. L., Machine Company. (See Novick, Abraham, assignor.)
Société Anonyme le Carbone. (See Oppenheim, René, assignor.)
Societe du Carburateur Zenith. (See Baverey, François, assignor.)
Societe du Carburateur Zenith. (See de Boischevalier, Henri, assignor.)
Society Elektrizitätswerk Lonza. (See Lüscher, Emil, assignor.)
Society of Chemical Industry in Basle. (See Posternak, Swigel, assignor.)
Sokal, Edward, assignor to American Katalite Corporation, Brooklyn, N. Y. Internal-combustion engine. 1,631,702; June 7.
Sokal, Edward, assignor to American Katalite Corporation, Brooklyn, N. Y. Internal-combustion engine. 1,631,703; June 7.
Sokal, Edward, New York, assignor to American Katalite Corporation Brooklyn, N. Y. Internal-combustion engine. 1,631,704; June 7.
Sokal, Edward, New York, assignor to American Katalite Corporation, Brooklyn, N. Y. Internal-combustion engine. 1,631,705; June 7.
Sokal, Edward, New York, assignor to American Katalite Corporation, Brooklyn, N. Y. Internal-combustion engine. 1,631,706; June 7.
Soldan, Otto, Berlin-Siemensstadt, assignor to Siemens & Halske Aktiengesellschaft Wernerwerk, Siemensstadt, near Berlin, Germany. Hand telephone. 1,631,607; June 7.
Solomon, Emil. (See Zubrow, H., and Solomon.)
Soubier, Leonard D., assignor to The Owens Bottle Company, Toledo, Ohio. Glass feeder. 1,631,230; June 7.
Spalding, A. G., & Bros. (See Rick, George A., assignor.)
Spellissy, Arthur E., et al. (See Barnett, John B., assignor.)
Sponable, George W., assignor to Brown-Lipe Gear Company, Syracuse, N. Y. External bearing-adjusting means. 1,631,557; June 7.
Sprague, Earl V., assignor of one-third to E. C. Wilson and one-third to H. J. Hilson, Davenport, Iowa. Self-closing stopcock. 1,631,166; June 7.
Spray, Lester E., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Thermo-sensitive relay. 1,631,836; June 7.
Sprenger, Richard, and H. Conradt, Hennigsdorf, Germany, assignors to General Electric Company. Suction device for mica-coating machines. 1,631,652; June 7.
Springfield, Garland P., Evansville, Ind., assignor of one-half to R. C. Smith, Vandenburg County, Ind. Railway-crossing safety device. 1,631,387; June 7.
Stahl, Frederick W., Philadelphia, Pa. One-way pull latch. 1,631,229; June 7.
Standard Railway Fusee Corporation. (See Dutcher, Frank, assignor.)
Standard-Trump Brothers Machine Company. (See Houseman, Harold E., assignor.)
Star Chandelier Co. (See Boehringer, John A., assignor.)
Steinbreder, William J. (See Beegle, Raymond E., assignor.)
Steiner Electric Corporation. (See Long, George F., assignor.)
Stern, Louis, Company. (See Jones, Percival W., assignor.)
Stevens, Alfred J., London, Ontario, Canada. Game apparatus. 1,631,558; June 7.
Stevenson, Clarence M., Los Angeles, Calif., assignor to Bausch & Lomb Optical Company, Rochester, N. Y. Ophthalmic test-lens frame. 1,631,559; June 7.
Stewart, Franklin W., Chicago, Ill. Steering-wheel lock for automobiles. 1,631,436; June 7.
Stock, Anthony T., assignor to Delco-Light Company, Dayton, Ohio. Refrigerating apparatus. 1,631,345; June 7.
Stoffel, Oskar, Baden, Germany. Packing ring. 1,631,654; June 7.
Stokes, Oscar E., Streator, Ill. Bumper. 1,631,653; June 7.
Stoll, Berry V., Louisville, Ky. Rotary toothbrush. 1,631,897; June 7.
Stone, George M., Griswold, Iowa. Power-transmission mechanism for motor vehicles. 1,631,837; June 7.
Stout, Edward E. (See Weydell, Jarl M., assignor.)
Strachan, James M., North Acton, London, England. Sliding window of motor and other vehicles. 1,631,775; June 7.
Straits, Joseph A., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Tire-regrooving tool. 1,631,941; June 7.
Streib, John F., Avalon, assignor to Pressed Steel Car Company, Pittsburgh, Pa. Car construction. 1,631,437; June 7.
Struble, Clarence H., and S. W. Hall, Chicago, Ill. Brush. 1,631,560; June 7.
Stukart, Hendrik, assignor to U. S. Slicing Machine Company, La Porte, Ind. Bread slicer. 1,631,231; June 7.
Sullivan Machinery Company. (See Gartin, Elmer G., assignor.)
Sullivan Machinery Company. (See Mercer, Henry H., assignor.)
Sullivan Machinery Company. (See Richey, George H., assignor.)
Sullivan, Maurice, Brooklyn, N. Y. Valve shield. 1,631,438; June 7.
Sunday, Irvin R., Reading Pa. Paper-cutting cabinet. 1,631,776; June 7.
Sunderland, James C., and J. F. Costelow, Kansas City, Mo. Broiling apparatus. 1,631,655; June 7.
Swan, Harold A., Coronado, Calif. Portable belt sander. 1,631,898; June 7.
Sweeney, Heloise, Richmond, Va. Combined mattress and bedpan. 1,631,656; June 7.
Swett, Lewis E., assignor to Pennsylvania Stamping Corporation, York, Pa. Making saws. 1,631,657; June 7.
Swift & Company. (See Britt, Max, assignor.)
Swoope, Samuel F., Cincinnati, Ohio. Repair link. 1,631,346; June 7.
Symmes, Charles D., Cygnet, Ohio. Agricultural instrument. 1,631,561; June 7.
Szigethy, Stephen, New York, N. Y. Candelabrum. 1,631,232; June 7.
Taljan, Stefan A., East St. Louis, Ill. Drum or pulley attachment. 1,631,899; June 7.
Taylor, James H., New York, N. Y., assignor to The American Laundry Machinery Company, Cincinnati, Ohio. Flat-work ironer. 1,631,347; June 7.
Taylor, Samuel G. (See Westmoreland, E. E., and Taylor.)
Temperley, Joseph, London, England. Propelling wheeled vehicles. 1,631,900; June 7.
Tercau, Russell, St. Paul, Minn. Nozzle. 1,631,167; June 7.
Terry, Charles H., Cincinnati, Ohio. Collapsible core. 1,631,838; June 7.
Terry, Charles H., Cincinnati, Ohio. Mold for forming hollow panels. 1,631,839; June 7.
Terry, Frederick P., Alameda, Calif. Furnace igniter. 1,631,348; June 7.
Tescher, Samuel, Denver, Colo. Unit for crushing and distributing powdered stone in coal mines. 1,631,233; June 7.
Tew, James D., Hudson, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Vulcanizing method and apparatus. 1,631,707; June 7.
Tewksbury, Dana S., and A. E. Newton, Kankakee, Ill. Furnace-door mounting. 1,631,840; June 7.
Thomas, George B., assignor to The Bryant Electric Company, Bridgeport, Conn. Electric switch. 1,631,841; June 7.
Thompson, Howard A., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,631,842; June 7.
Thompson, John M. and W. H., Buffalo, N. Y. Pine-line-cleaning device. 1,631,562; June 7.
Thompson, William H. (See Thompson, John M. and W. H.)
Thomson, Herbert G., New York, N. Y., assignor to Anchor Post Fence Company, Garwood, N. J. Fence-fastening device. 1,631,942; June 7.
Thornton, William, Salt Lake City, Utah. Flexible wheel. 1,631,349; June 7.
Thortvedt, Goodwin, Glyndon, Minn. Tractor potato digger. 1,631,234; June 7.
Threadgill, William A., Miami, Fla. Concrete block mold. 1,631,901; June 7.
Thurlow, William E., et al. (See Frost, Walter E., assignor.)
Till, Steven L., Chicago, Ill. Boiler feed trap. 1,631,708; June 7.
Timeus, Andrew, Sidney, Ohio. Locking mechanism for shock ropes. 1,631,439; June 7.
Timken-Detroit Axle Company, The. (See Alden, H. W., and Hufferd, assignors.)
Tiranty, Phillippe H. L. (See Conti, J. T. F., and Tiranty.)
Tishlarich, Ottmar M. (See Hall, J. A., jr., and Tishlarich.)

Titus, John E., Chicago, Ill. Automatic adjuster for push rods. 1,631,563; June 7.
Tohlin, Theodor. (See D'Olier, W. L., and Tohlin.)
Toulmin, Harry A., jr., Dayton, assignor to The Vulcan Last Company, Portsmouth, Ohio. Last. 1,631,709; June 7.
Tranides, Elias, New York, N. Y. Detachable heel. 1,631,710; June 7.
Treanor, Edward D., Pittsfield, Mass., assignor to General Electric Company. Radiator tank. 1,631,711; June 7.
Trefzger, Herbert, Melrose Park, Ill., assignor to The Richardson Company, Lockland, Ohio. Loading battery boxes. 1,631,658; June 7.
Tresise, Raleigh E. (See Scott, W. M., and Tresise.)
Trico Products Corporation. (See Folberth, Frederick G. and W. M., assignors.)
Trumble, John T., Detroit, Mich. Clutch. 1,631,235; June 7.
Turner, David E., London, England. Tip-up and like chair. 1,631,440; June 7.
Tutton, Harry V. (See Johanson, Adolph T., assignor.)
Twyman, B. Wickliffe, Columbus, Ohio, and R. B. Burton, Indianapolis, Ind. Automatic brake for vehicles. 1,631,902; June 7.
Uffert, Walter B., Lynbrook, N. Y. Automatic shaft lock for automobiles. 1,631,843; June 7.
Uline Ice-Scoring Machine Company, The. (See Happel, Albert W., assignor.)
Underwood Typewriter Company. (See Lane, William E., assignor.)
Underwood Typewriter Company. (See Rothermund, Werner F., assignor.)
Underwood Typewriter Company. (See Waldheim, John, assignor.)
Union Metal Products Company. (See Small, Arthur E., assignor.)
Union Switch & Signal Company, The. (See Gilson, Robert M., assignor.)
Union Switch & Signal Company, The. (See Penrod, Melvin A., assignor.)
Union Switch & Signal Company, The. (See Spray, Lester E., assignor.)
Union Switch & Signal Company, The. (See Thompson, Howard A., assignor.)
United Autographic Register Company. (See Barker, W. R., and Jensen, assignors.)
United Shoe Machinery Corporation. (See Jorgensen, Bernhardt, assignor.)
United Shoe Machinery Corporation. (See Pope, Joseph H., assignor.)
United Shoe Machinery Corporation. (See Ricks, F., and Burgoyne, assignors.)
United States Chain & Forging Company. (See McGowen, William R., assignor.)
U. S. Slicing Machine Company. (See Stukart, Hendrik, assignor.)
United States Tent & Awning Company. (See Leffert, Charles B., assignor.)
U. S. Tool Company. (See Koch, Frederick, assignor.)
Urquhart, William R., Los Angeles, Calif., C. W. Post, Chicago, Ill., D. E. Humphrey, Cuyahoga Falls, and C. C. Van Arsdale, assignors to The Goodyear Tire & Rubber Company, Akron, Ohio. Treating rubber articles. 1,631,943; June 7.
Vacuum Oil Company. (See Martin, Charles E., assignor.)
Valle-Kimes Company, The. (See Masters, John H., assignor.)
Van Allen, George L. (See Colby, E. A., Maeulen, and Van Allen.)
Van Arsdale, Clarence C. (See Urquhart, W. R., Post, Humphrey, and Van Arsdale.)
Van der Lande, Johannes A. L., Devanter, Netherlands, assignor, by mesne assignments, to Novadel Process Corporation, Buffalo, N. Y. Stable peroxidized composition and making same. 1,631,903; June 7.
Van Raalte, Diederik L. H., Vlissingen, Netherlands. Valve for making connection between underground main piping and underground branch piping. 1,631,564; June 7.
Vapor Car Heating Company. (See Russell, E. A., and Parks, assignors.)
Vereinigte Aluminium-Werke A. G. (See Fuss, Vincenz, assignor.)
Vicars, Edward L., Earlestown, England. Biscuit-making and the like machine. 1,631,441; June 7.
Vinz, Edward W., Minneapolis, Minn. Storm window. 1,631,777; June 7.
Visking Corporation. (See Freund, Erwin O., assignor.)
Von Dabrowski, Lothar, Chicago, Ill., assignor to American Car and Foundry Company, New York, N. Y. Refrigerator car. 1,631,297; June 7.
Vulcan Last Company, The. (See Toulmin, Harry A., jr., assignor.)
Wagich, Peter, Connaught, British Columbia, Canada. Smoke-extracting device for tunnels. 1,631,442; June 7.
Wagner, Richard, Flint, Mich. Automobile hood latch. 1,631,508; June 7.
Waldheim, John, Elizabeth, N. J., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,631,565; June 7.
Walker, George S. (See Cook, C. C., and Walker.)
Wallace, Charles F., Westfield, assignor to Wallace & Tierman Products, Belleville, N. J. Stand for posters. 1,631,608; June 7.
Wallace, Robert G., Ben Avon, assignor to National Fire Proofing Company, Pittsburgh, Pa. Wall construction. 1,631,659; June 7.
Wallace & Tierman Products. (See Wallace, Charles F., assignor.)
Waller, Alfred E., Bronxville, N. Y., assignor to Ward Leonard Electric Company. Rheostat. 1,631,168; June 7.
Wallis, George L., Bromley, England. Motor cycle. 1,631,443; June 7.
Walsh, Robert C., St. Louis, Mo. Merchandise cabinet. 1,631,844; June 7.
Walter, Frank, Los Angeles, Calif. Telephone and cap therefor. 1,631,350; June 7.
Walther, George, assignor to The Dayton Steel Foundry Company, Dayton, Ohio. Producing of cast-metal wheels. 1,631,712; June 7.
Walton, Robert T., Philadelphia, Pa. Rotatable flag support. 1,631,566; June 7.
Walton, Robert T., Philadelphia, Pa. Flag support and actuating device therefor. 1,631,567; June 7.
Ward Leonard Electric Company. (See Waller, Alfred E., assignor.)
Warmack, John, Fort Smith, Ark. Mail-box support. 1,631,904; June 7.
Warner, Clarence. (See Buvinger, G. A., and Warner.)
Warner Gear Company. (See Simpson, John M., assignor.)
Warren Clock Company. (See Warren, Henry E., assignor.)
Warren, Coleman B., Norfolk, Va. Shouldering attachment. 1,631,444; June 7.
Warren, Glenn B., Schenectady, N. Y., assignor to General Electric Company. Elastic-fluid turbine. 1,631,660; June 7.
Warren, Glenn B., Schenectady, N. Y., assignor to General Electric Company. Locomotive. 1,631,661; June 7.
Warren, Henry E., assignor to Warren Clock Company, Ashland, Mass. Mercury-tube switch. 1,631,713; June 7.
Washington, George, Brooklyn, N. Y. Collapsible camera. 1,631,298; June 7.
Washington, George, Brooklyn, N. Y. Focusing device for cameras. 1,631,299; June 7.
Washington, George, Brooklyn, N. Y. Shutter mechanism for cameras. 1,631,300; June 7.
Washington, George, Brooklyn, N. Y. Photographic camera. 1,631,301; June 7.
Washington, George, Mendham, N. Y. Film-winding spool for cameras. 1,631,302; June 7.
Washington, George, Mendham, N. J. Finding and focusing device for cameras. 1,631,303; June 7.
Watson & McDaniel Co. (See Jahn, Frederick L., assignor.)
Weber, Tobias. (See Chase, Hamilton C., assignor.)
Weightograph Company, The. (See Schaper, Harry C., assignor.)
Weise, Paul, Wiesdorf, near Cologne-on-the-Rhine, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Manufacture of chromium compounds. 1,631,170; June 7.
Weiss, Adolph, Brooklyn, N. Y. Rotary intaglio-printing machine. 1,631,169; June 7.
Weiss, Howard F., Madison, Wis., assignor, by mesne assignments, to Wood Conversion Company, Cloquet, Minn. Utilizing wood waste. 1,631,171; June 7.
Weiss, Howard F., Madison, Wis., assignor, by mesne assignments, to Wood Conversion Company, Cloquet, Minn. Utilizing wood waste. 1,631,172; June 7.
Weiss, Howard F., Madison, Wis., assignor, by mesne assignments, to Wood Conversion Company, Cloquet, Minn. Wall board and making the same. 1,631,173; June 7.
Wellman, William W., Las Vegas, Nev. Locomotive feed-pump gauge. 1,631,714; June 7.
Wensley, Richard, Denver, Colo. Drum trap. 1,631,445; June 7.
Werbner, Simon, Linton, Ind. Apparatus for casting curved sterotype plates. 1,631,944; June 7.
Werner, Ralph M., Brooklyn, N. Y. Detachable shaft. 1,631,236; June 7.
Weschke, Alexander, Berlin-Schoneberg, Germany. Gymnastic implement. 1,631,388; June 7.
Wesp, George, assignor to Rosenthal China Corporation, New York, N. Y. Plate or similar article. Des. 72,809; June 7.
West Bend Equipment Corporation. (See Quade, A., and Klumb, assignors.)
West, Mary J., Nelson, England. Manufacture of caps. 1,631,389; June 7.
Western Cartridge Company. (See Olin, Franklin W., assignor.)
Westinghouse Electric & Manufacturing Company. (See Aalborg, Christian, assignor.)
Westmoreland, Earl E., and S. G. Taylor, Oil City, La. Sucker-rod elevator. 1,631,845; June 7.
Weydell, Jarl M., assignor of one-half to E. B. Stout, Indianapolis, Ind. Oil burner. 1,631,662; June 7.
White, S. S., Dental Manufacturing Company, The. (See Angell, Robert C., assignor.)

White, William E., assignor to Kalman Steel Company, Chicago, Ill. Gauge and support for bars. 1,631,609; June 7.
Whitehead and Kales, Inc. (See Judd, Irving H., assignor.)
Wicks, John, Oak Park, assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Automatic telephone system. 1,631,351; June 7.
Wilburn, Sidney D., Englewood, N. J., assignor to American Telephone and Telegraph Company. Telegraph signaling system. 1,631,174; June 7.
Wilhelm, Charles, Bayville, N. J. Motor-vehicle hood cover. 1,631,663; June 7.
Willers, George E., assignor to A. D. Cook, Inc., Lawrenceburg, Ind. Deep-well-pump-connecting device. 1,631,390; June 7.
Williams, Edom, Louisville, Ky. Poultry feeder. 1,631,778; June 7.
Williams, John W., Buffalo, N. Y. Muffler. 1,631,391; June 7.
Williams, Samuel. (See Massey, Orren I., assignor.)
Williamson, James L., Schenectady, N. Y., assignor to General Electric Company. Pinion puller. 1,631,664; June 7.
Willoughby, Victor. (See Cooper, W. E., and Willoughby.)
Willoughby Victor, Ridgewood, N. J., assignor to American Car and Foundry Company, New York, N. Y. Tank car. 1,631,304; June 7.
Wilmot Engineering Company. (See Wilmot, George W., assignor.)
Wilmot, George W., assignor to Wilmot Engineering Company, Hazleton, Pa. Drive chain. 1,631,237; June 7.
Wilson, Everett C., et al. (See Sprague, Earl V., assignor.)
Wilson, Harvey B., Athens, Ill. Radiator guard. 1,631,846; June 7.
Winchester Repeating Arm Co. (See Burton, Frank F., assignor.)
Wing, Clarence G., Lakewood, Ohio, assignor to The Scott-Ullman Company, Cleveland, Ohio. Arm for lighting fixtures or similar articles. Des. 72,810; June 7.
Winkler, Charles E., New York, N. Y. Stiletto. 1,631,175; June 7.
Winn, Sidney B., Lapeer, Mich. Tractor trailer coupler. 1,631,847; June 7.
Wintrop, Jacob M., Philadelphia, Pa. Electric iron. 1,631,779; June 7.
Wirrer, Gottfried, Plainfield, N. J., assignor to International Motor Company, New York, N. Y. Apparatus for vaporizing hydrocarbon fuel. 1,631,176; June 7.
Wirz, A. H., Inc. (See Barker, Edwin H., assignor.)
Wood Conversion Company. (See Schorger, Arlie W., assignor.)
Wood Conversion Company. (See Weiss, Howard F., assignor.)
Wood, William H., South Euclid, Ohio. Lamp. 1,631,610; June 7.
Woodman, George, Chicago, Ill. Journal-box lid. 1,631,352; June 7.
Woodman, George A., assignor to Woodman Railway Supply Company, Chicago, Ill. Journal-box lid. 1,631,353; June 7.
Woodman Railway Supply Company. (See Woodman, George A., assignor.)
Woods, Paul. (See Parsons, Albert R., assignor.)
Woolson, Lionel M., assignor to Packard Motor Car Company, Detroit, Mich. Hydrocarbon motor. 1,631,177; June 7.
Workman, Harold, Glasgow, Scotland. Projection lamp. 1,631,905; June 7.
Worthington, Wayne H., Battle Creek, Mich., assignor to Advance-Rumely Company, La Porte, Ind. Huller. 1,631,446; June 7.
Wright, Henry A., Halls, Tenn. Railway-mail-delivery apparatus. 1,631,238; June 7.
Wright, James F., Cleveland, assignor to The McMyler Interstate Company, Bedford, Ohio. Clutch-operating mechanism. 1,631,392; June 7.
Wurdack, William, St. Louis, Mo. Combination socket-seating and fuse-testing block. 1,631,178; June 7.
Yager, Harvey J., Seattle, Wash. Portable scaffold. 1,631,848; June 7.
Yellow Coach Manufacturing Co. (See Rackham, George J., assignor.)
Yermak, William, Danbury, Conn. Beet puller. 1,631,180; June 7.
Yngve, Victor, South Orange, N. J., assignor, by mesne assignments, to National Carbon Company, Inc., New York, N. Y. Dry battery. 1,631,568; June 7.
Young, Raymond E. (See Chandler, F. F., and Young.)
Zaleski, Frank, assignor to Reece Shoe Machinery Company, Boston, Mass. Sewing machine. 1,631,179; June 7.
Zeh, Edmund W. (See Buffardi, Pasquale, assignor.)
Zeltung, Aipeck L., assignor to International Silver Company, Meriden, Conn. Display chest for silverware. 1,631,780; June 7.
Zengerle, Joseph W., Mount Pleasant, Mich., assignor to The Flowers Mausoleum Company, Toledo, Ohio. Mausoleum. 1,631,239; June 7.
Zimmermann & Jansen, Gesellschaft mit beschränkter Haftung. (See Rappold, Hermann, assignor.)
Zubrow, Hedwig, and E. Solomon, Philadelphia, Pa. Cushioning unit for vehicle tires. 1,631,447; June 7.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 7TH DAY OF JUNE, 1927.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Acid, Manufacture of sulphuric. E. L. Larison. 1,631,139; June 7.
Adhesives. J. J. Harris. 1,631,265; June 7.
Adjustable wrench. V. E. Paulson. 1,631,884; June 7.
Aerofoil, Variable lift-variable resistance. W. L. Gilmore. 1,631,259; June 7.
Aeroplane. A. Bambini. 1,631,187; June 7.
Aeroplane. L. Raynolds. 1,631,603; June 7.
Agricultural instrument. C. D. Symmes. 1,631,561; June 7.
Airship, Rigid. K. Arnstein. 1,631,908; June 7.
Airships, Gas cell of rigid. K. Siller. 1,631,895; June 7.
Alloys, Improving aluminum. V. Fuss. 1,631,930; June 7.
Amalgamating machine. C. E. Smith. 1,631,434; June 7.
Ammonia from gases containing same, Recovering. R. O. E. Davis and L. B. Olmstead. 1,631,720; June 7.
Anthraquinone paste and making the same. W. M. Grosvenor and V. P. Gershon. 1,631,589; June 7.
Antiskidding device. S. D. Jacobson. 1,631,207; June 7.
Ash receiver and match box, Combined. A. W. Rosen. Des. 72,803; June 7.
Atomizers and the like, Control means for regulating the output of. F. B. Comins. 1,631,475; June 7.
Attrition mill. W. Loken. 1,631,422; June 7.
Auto crank, Antikick. N. Saio. 1,631,649; June 7.
Automatic switch. C. R. Sipe. 1,631,506; June 7.
Automobile chassis, Lubricating means for. E. M. Six. 1,631,650; June 7.
Automobile locking means. W. Hemingway, jr. 1,631,267; June 7.
Automobile oil-drain device. E. E. and C. I. Hiscox. 1,631,129; June 7.
Automobile radiator shield. H. L. Curran. 1,631,948; June 7.
Automobile signal. J. T. Christian. 1,631,471; June 7.
Automobile transmission. J. M. Simpson. 1,631,938; June 7.
Automobiles, Automatic shaft lock for. W. B. Uffert. 1,631,843; June 7.
Automobiles, Brake for. H. W. Alden and G. Hufferd. 1,631,448; June 7.
Automobiles, Fender attachment for. H. H. Irwin and W. A. Carpenter. 1,631,417; June 7.
Automobiles, Knockdown bed frame for. T. E. Carrigan. 1,631,620; June 7.
Awning and side wall panel for summer or outing houses or cottages, Combination. C. B. Leffert. 1,631,214; June 7.
Bags, Machine for making paper. D. Appel. 1,631,452; June 7.
Baking pan, Covered. A. Katzinger. 1,631,734; June 7.
Ball bladder, Game. G. L. Lawrence, jr. 1,631,740; June 7.
Banjo. H. H. Slingerland. 1,631,293; June 7.
Bar cuff link. E. F. Clark. 1,631,246; June 7.
Bar structure, Connected. H. Nagin. 1,631,691; June 7.
Bars, Gauge and support for. W. E. White. 1,631,609; June 7.
Baseball center and producing the same. W. H. Fox. 1,631,317; June 7.
Bathroom wall fixture. S. E. Sharwood. Des. 72,804; June 7.
Batteries, Postive elctrode for electric. R. Oppenheim. 1,631,642; June 7.
Battery: *See*—
  Dry battery. Storage battery.
Battery boxes, Loading. H. Trefzger. 1,631,658; June 7.
Battery separator, Wooden. E. S. Humboldt. 1,631,867; June 7.
Bearing-adjusting means, External. G. W. Sponable. 1,631,557; June 7.
Bearing application, Antifriction. F. H. Gibbs. 1,631,318; June 7.
Bearing for grain separators. P. F. Gruver. 1,631,810; June 7.
Bearing with rolling memoers. L. Rouanet. 1,631,763; June 7.
Bearings, Oiling system for. P. E. Matthews. 1,631,217; June 7.
Bed-bottom fabric. R. Bradshaw. 1,631,852; June 7.
Bed, Davenport. T. S. Morrison. 1,631,600; June 7.
Bed frame, Knockdown. T. E. Carrigan. 1,631,621; June 7.
Bed, Hospital. J. C. Pow. 1,631,888; June 7.
Beet puller. W. Yermak. 1,631,180; June 7.
Belt sander, Portable. H. A. Swan. 1,631,898; June 7.
Belting. W. M. Cavanaugh. 1,631,580; June 7.
Bench clamp. M. E. Olson. 1,631,428; June 7.
Biscuit-making and the like machine. E. L. Vicars. 1,631,441; June 7.
Bit: *See*—
  Drill bit.
Blank-feeding device. W. Owen. 1,631,150; June 7.
Block: *See*—
  Socket-seating and fuse-testing block.
Blood-testing device. C. E. Roderick. 1,631,553; June 7.
Board: *See*—
  Ironing board.
Boat. T. B. Collins. 1,631,400; June 7.
Boiler: *See*—
  Steam boiler.
Boiler. F. O. Pahmeyer. 1,631,328; June 7.
Boiler elements, Connecting nipple for cast-iron heating-. A. Brahm. 1,631,911; June 7.
Boiler feed trap. S. L. Till. 1,631,708; June 7.
Boiler-tube-cutting device. F. W. Larc. 1,631,495; June 7.
Bolt: *See*—
  Take-up bolt.
Bookcase. G. B. Cleveland. 1,631,622; June 7.
Boots, Calk attachment for. J. W. McNeill and J. Michelsen. 1,631,877; June 7.
Bottle-capping utensil. R. E. Reardon. 1,631,289; June 7.
Bottle, Heat-insulating. A. Günther and R. Gertioff. 1,631,413; June 7.
Bottle stopper, Dispensing. E. H. Barker. 1,631,784; June 7.
Bottling machine. A. F. Hoffman. 1,631,530; June 7.
Box: *See*—
  Journal box. Paper box.
Box-making machine. W. S. Cleaves. 1,631,518; June 7.
Boxes, Appliances for making set-up. E. W. Labombarde. 1,631,492; June 7.
Brace: *See*—
  Rail brace.
Braiding carrier. A. C. Hopkins. 1,631,634; June 7.
Brake: *See*—
  Ground brake. Tractor brake.
  Hydraulic brake. Vehicle brake.
Brake. E. C. Le Munyon and H. N. Moore. 1,631,540; June 7.
Brake accelerator for single-chamber compressed-air brakes. W. Hildebrand. 1,631,815; June 7.
Braking mechanism. E. C. Gartin. 1,631,369; June 7.
Brick, Baking. J. D. McLauchlin. 1,631,144; June 7.
Brick-making machine. R. P. M. Davis. 1,631,251; June 7.
Broaching tool. G. H. Richey. 1,631,693; June 7.
Broiling apparatus. J. C. Sunderland and J. F. Costelow. 1,631,655; June 7.
Broom. W. A. Brown. 1,631,465; June 7.
Broom, Reversible. W. Dupré. 1,631,253; June 7.
Brush. C. H. Struble and S. W. Hall. 1,631,560; June 7.
Buckle, Bale-band. T. J. M. Daly. 1,631,402; June 7.
Bumper. O. E. Stokes. 1,631,653; June 7.
Bumper, Automobile. W. R. McGowen. 1,631,640; June 7.
Bunch former. C. A. Rinker. 1,631,760; June 7.
Burner: *See*—
  Fuel burner. Oil burner.
Button, Cuff. G. W. Brown. 1,631,912; June 7.
Cabinet. C. E. Campbell. 1,631,718; June 7.
Cabinet. W. E. Hinson. 1,631,202; June 7.
Cabinet, Merchandise. R. C. Walsh. 1,631,844; June 7.
Cabinet, Paper-cutting. I. R. Sunday. 1,631,776; June 7.
Callpers. H. A. St. John and J. F. Griffin. 1,631,896; June 7.
Came machine. W. Henderson. 1,631,814; June 7.
Camera, Collapsible. G. Washington. 1,631,298; June 7.
Cameras, Film-winding spool for. G. Washington. 1,631,302; June 7.
Cameras, Finding and focusing device for. G. Washington. 1,631,303; June 7.
Cameras, Focusing device for. G. Washington. 1,631,299; June 7.
Cameras, Photographic. G. Washington. 1,631,301; June 7.
Cameras, Shutter control for. R. W. Smith. 1,631,435; June 7.
Cameras, Shutter mechanism for. G. Washington. 1,631,300; June 7.

Candelabrum. S. Szigethy. 1,631,232; June 7.
Caps, Manufacture of. M. J. West. 1,631,389; June 7.
Car, Cane. T. W. Elder, jr. 1,631,311; June 7.
Car construction. J. F. Streib. 1,631,437; June 7.
Car couplers, Centering device for. A. E. Small. 1,631,295; June 7.
Car couplers, Device for operating. A. E. Small. 1,631,294; June 7.
Car-end construction. A. E. Ostrander. 1,631,827; June 7.
Car, Mine. H. P. Field. 1,631,313–14; June 7.
Car, Mine. W. V. Johnson and J. L. McDowell. 1,631,320; June 7.
Car, Motor. P. Jaray. 1,631,269; June 7.
Car, Multiple-unit tank. W. E. Cooper and V. Willoughby. 1,631,307; June 7.
Car, Plate-glass-surfacing. A. L. Harrington. 1,631,126; June 7.
Car, Refrigerator. L. von Dabrowski. 1,631,297; June 7.
Car-roof construction. K. M. Hamilton. 1,631,860; June 7.
Car, Sectional railway. A. H. Smith. 1,631,164; June 7.
Car, Sectional refrigerator. A. H. Smith and E. G. Miner. 1,631,165; June 7.
Car, Tank. V. Willoughby. 1,631,304; June 7.
Car underframe. P. Klemoff. 1,631,685; June 7.
Cars, End structure for railway. R. D. Hawkins. 1,631,812; June 7.
Cars, Hatch-cover-operating means for refrigerator. W. F. Dietrichson. 1,631,309; June 7.
Cars, Metal roof for freight. G. G. Gilpin. 1,631,260; June 7.
Cars, Supporting mechanism for dump. W. L. Burner and O. E. Kantenwein. 1,631,241; June 7.
Carburetor. F. Baverey. 1,631,716; June 7.
Carburetor. F. Day. 1,631,923; June 7.
Carburetor. W. T. Simpson. 1,631,701; June 7.
Card system, Visible. F. H. Johnston. 1,631,732; June 7.
Carriage, Collapsible baby. A. Meiniker and S. Calmanson. 1,631,408; June 7.
Carrier: *See*—
  Braiding carrier. Clothing and package carrier.
Carrousel. A. Pinto. 1,631,331; June 7.
Carton, Egg. E. Schinscholl. 1,631,554; June 7.
Case. M. J. Greubel. 1,631,371; June 7.
Case: *See*—
  Vanity case.
Casing and making the same. C. B. Alexander. 1,631,611; June 7.
Cash drawer, Autographic-register. W. R. Barker and L. Jensen. 1,631,395; June 7.
Casting machine. W. J. Christie. 1,631,399; June 7.
Cellulose-acetate composition of low inflammability. S. J. Carroll. 1,631,468; June 7.
Cementing composition, Waterproof. G. F. Dreher. 1,631,671; June 7.
Ceramic material. J. A. Jeffery and E. T. Montgomery. 1,631,730; June 7.
Ceramics and the like, Apparatus and process for burning. H. Koppers. 1,631,536; June 7.
Cereal beverage compound. L. A. Negly and P. S. Black. 1,631,829; June 7.
Cereal beverage compounds, Preparing. L. A. Negly and P. S. Black. 1,631,830; June 7.
Chain, Drive. G. W. Wilmot. 1,631,237; June 7.
Chain idler, Double adjustable drive-. H. G. Gay. 1,631,258; June 7.
Chair: *See*—
  Convertible chair. Tip-up and like chair.
Change-returning device. L. B. Nordlund. 1,631,326; June 7.
Check protector. R. I. Harris. 1,631,863; June 7.
Chromium compounds, Manufacture of. P. Weise. 1,631,170; June 7.
Chuck. J. F. Morgal. 1,631,499; June 7.
Cigarette lighter. D. S. and A. P. Brush. 1,631,514; June 7.
Circuit closer, Time-operated. G. F. Rauch. 1,631,644; June 7.
Circuits, Trunk. G. H. Peterson. 1,631,153; June 7.
Clamp: *See*—
  Bench clamp. Embroidery hook clamp.
Clamp connecter, Ground-. E. F. Potter. 1,631,288; June 7.
Clamping device. R. E. Beegle. 1,631,396; June 7.
Clasp: *See*—
  Corset clasp.
Clay columns, Apparatus for scarifying plastic. J. B. Nicholson. 1,631,220; June 7.
Cleaner: *See*—
  Vacuum cleaner. Windshield cleaner.
Clip for hair-waving sachets. I. B. Calvete. 1,631,793; June 7.
Clock case. J. Kernes. Des. 72,797; June 7.
Cloth boards, etc., Method and mechanism for covering. H. B. Smith. 1,631,940; June 7.
Clothing and package carrier. O. I. Massey. 1,631,543; June 7.
Clutch. J. T. Trumble. 1,631,235; June 7.
Clutch-operating mechanism. J. F. Wright. 1,631,392; June 7.
Clutch pedals, Lever control for. H. J. England. 1,631,929; June 7.
Coffee and tea pot, Combined. C. Griffin. 1,631,932; June 7.
Coffeepot. L. W. Hyde. 1,631,486; June 7.
Commutator and making same. L. Bonsieur. 1,631,461; June 7.
Compressor. H. C. Marcus and W. Fourness. 1,631,425; June 7.
Concrete-block mold. W. A. Threadgill. 1,631,901; June 7.
Concrete form. T. M. Jones. 1,631,825; June 7.
Concrete slabs, Device for connecting the abutting ends of. C. E. Bowers. 1,631,576; June 7.
Condenser, Electric. W. R. G. Baker. 1,631,665; June 7.
Condenser, Surface. R. Lorenz. 1,631,141; June 7.
Condenser, Variable. R. L. Aspden. 1,631,453; June 7.
Condenser, Variable. G. H. Clark. 1,631,360; June 7.
Condenser, Variable. A. Leib. 1,631,599; June 7.
Condenser, Variable. E. B. Lewis. 1,631,636; June 7.
Condenser, Variable. E. J. Schroder. 1,631,226; June 7.
Condenser, Vernier. F. Koch. 1,631,738; June 7.
Condensers, Condenser-operating mechanism for variable. M. H. Bennett. 1,631,788; June 7.
Connector, Resilient. C. R. Short. 1,631,228; June 7.
Connecting device. H. P. Chandler. 1,631,719; June 7.
Container. W. Nell. 1,631,935; June 7.
Container and blanks therefor, Corrugated-board. C. H. Crowell. 1,631,521; June 7.
Convertible chair. E. Guenther. 1,631,811; June 7.
Conveyer. W. F. Hall. 1,631,124; June 7.
Cooking apparatus. P. T. Jackson. 1,631,418; June 7.
Core, Collapsible. C. H. Terry. 1,631,838; June 7.
Corset clasp. A. Kautzsch. 1,631,535; June 7.
Counter and heel guard. M. M. Doran. 1,631,310; June 7.
Counting and indicating mechanism. A. Broadmeyer. 1,631,616; June 7.
Coupling: *See*—
  Flexible coupling. Pipe float coupling.
  Pipe coupling. Sleeve coupling.
Cream separator. E. H. Fahrney. 1,631,194; June 7.
Cup: *See*—
  Grease cup.
Current motor. H. W. Robinson. 1,631,647; June 7.
Curtain supporter. A. Monich. 1,631,219; June 7.
Cutter: *See*—
  Molding cutter.
Cutting tool. J. H. Montstream. 1,631,641; June 7.
Cutting tools, Forming. A. W. Cochran. 1,631,623; June 7.
Dashboard control. G. F. Long. 1,631,277; June 7.
Decoration, Table. G. Gerlinger. 1,631,631; June 7.
Demountable rim. F. D. Allen. 1,631,906; June 7.
Dental equipment stand, Base assembly for. R. C. Angell. Des. 72,785; June 7.
Dental X-ray-film package. H. I. Marler. 1,631,497; June 7.
Derrick. C. E. Ranney. 1,631,156; June 7.
Detonator package. F. W. Olin. 1,631,756; June 7.
Dial. R. H. Langley. 1,631,687; June 7.
Die-casting machine. T. C. Korsmo. 1,631,686; June 7.
Die head. H. T. Shearer. 1,631,556; June 7.
Digger: *See*—
  Peanut and potato digger. Potato digger.
Direct mixer. F. and J. Dietrich and W. E. Miner. 1,631,584; June 7.
Dirigible-light mounting. R. R. Freund. 1,631,480; June 7.
Disk wheel, Fabric. J. H. Doty. 1,631,928; June 7.
Dispensing apparatus. S. Schreiber. 1,631,430; June 7.
Display chest for silverware. A. L. Zietung. 1,631,780; June 7.
Display device. J. B. Barnett. 1,631,785; June 7.
Disruptive effects, Method of and apparatus for obtaining. J. M. Sheedy and W. Myers. 1,631,290; June 7.
Distribution, System of. T. F. Barton. 1,631,715; June 7.
Distributor mounting. B. H. Anibal. 1,631,185; June 7.
Ditching machine. W. H. McDonald. 1,631,639; June 7.
Doll. J. M. Bell. Des. 72,787; June 7.
Door lock, Car-. T. W. Elder, jr. 1,631,312; June 7.
Door mounting, Furnace-. D. S. Tewksbury and E. Newton. 1,631,840; June 7.
Door-operating mechanism. F. P. Angell. 1,631,907; June 7.
Door-operating mechanism. S. B. Haseltine. 1,631,127; June 7.
Door-operating mechanism, Lock for car-. A. Kassler. 1,631,321; June 7.
Drawer pull. E. L. Knapp. Des. 72,798; June 7.
Dress. T. Davis. 72,792; June 7.
Drill bit, Reamer. A. D. Alford. 1,631,449; June 7.
Drill holder. F. J. Peters. 1,631,286; June 7.
Drilling machine, Radial. G. Feather. 1,631,256; June 7.
Drilling mechanism, Holder for. E. C. Holmes. 1,631,683; June 7.
Drive-shaft puller. W. J. Rappley. 1,631,889; June 7.
Driving mechanism, Yielding rotary. F. R. Simms. 1,631,433; June 7.
Drum or pulley attachment. S. A. Taljan. 1,631,899; June 7.
Drum trap. R. Wensley. 1,631,445; June 7.
Dry battery. V. Yngve. 1,631,568; June 7.

Radio tuning device. W. L. Miller. 1,631,380; June 7.
Raft, Log. M. J. Davis. 1,631,403; June 7.
Rail brace. J. G. Mueller. 1,631,325; June 7.
Railway-crossing safety device. G. P. Springfield. 1,631,387; June 7.
Railway-mail-delivery apparatus. H. A. Wright. 1,631,238; June 7.
Railway-traffic-controlling apparatus. R. M. Gilson. 1,631,808; June 7.
Railway-traffic-controlling apparatus. M. A. Penrod. 1,631,832; June 7.
Railway-traffic-controlling apparatus. H. A. Thompson. 1,631,842; June 7.
Rake: *See*—
Lawn rake.
Receptacle. E. J. Qvarnstrom. 1,631,334; June 7.
Receptacle, Money. M. H. Moffett. 1,631,934; June 7.
Receptacle, Outlet. H. E. Slade. 1,631,507; June 7.
Reciprocating feeder. A. W. Happel. 1,631,125; June 7.
Recording instrument. R. F. Brown. 1,631,578; June 7.
Reel: *See*—
Fishing reel. Take-up reel.
Reel for winding filaments, yarns, threads, silks, and the like, Collapsible. F. W. Schubert. 1,631,431; June 7.
Refrigerant. G. Barsky. 1,631,573; June 7.
Refrigerating apparatus. A. T. Stock. 1,631,345; June 7.
Refrigerating system. U. R. Loranger and H. R. Loranger. 1,631,278; June 7.
Refrigerator. C. F. Boyer. 1,631,577; June 7.
Refrigerator. J. B. Ottenheimer. 1,631,883; June 7.
Regulating method and apparatus. W. D. Coolidge. 1,631,625; June 7.
Rheostat. A. E. Waller. 1,631,168; June 7.
Rice product, Making. J. F. Newman. 1,631,145; June 7.
Ring: *See*—
Packing ring.
Rod: *See*—
Gauge rod.
Rods, Automatic adjuster for push. J. E. Titus. 1,631,563; June 7.
Roller: *See*—
Sanding roller. Saw-tooth roller.
Roof, Semi-inclosed, Collapsible upperdeck. A. E. Hutt. 1,631,818; June 7.
Roofing element. T. Robinson. 1,631,604; June 7.
Roost, Sanitary poultry. E. O. Dorsey. 1,631,799; June 7.
Rope grip. A. Lucibello. 1,631,745; June 7.
Ropes, Locking mechanism for shock. A. Timeus. 1,631,439; June 7.
Roving frames, Top clearer for. W. E. Henderson. 1,631,727; June 7.
Rubber and compound resulting therefrom, Vulcanizing. N. A. Shepard and S. Krall. Re16,648; June 7.
Rubber articles, Treating. W. R. Urquhart, C. W. Post, D. E. Humphrey, and C. C. Van Arsdale. 1,631,943; June 7.
Rubber goods and product of same, Surface-finishing. H. W. Emery. 1,631,722; June 7.
Rubber, Treating. H. A. Bruson. 1,631,947; June 7.
Ruler. E. R. Johnson. 1,631,731; June 7.
Safety catch. P. W. Jones. 1,631,824; June 7.

Safety guard for dangerous highways and the like. H. C. Lookabaugh. Re16,649; June 7.
Sand-heating apparatus for building purposes. F. Selmer. 1,631,699; June 7.
Sanding roller. G. H. Davol. 1,631,798; June 7.
Sash fastener. W. H. Gillette. 1,631,370; June 7.
Sash holder, Window. R. H. Shelton. 1,631,772; June 7.
Saturating materials, Apparatus for. L. Kirschbraun and C. E. Rahr. 1,631,826; June 7.
Sausages, Preparing wiener. E. O. Freund. 1,631,723; June 7.
Savings bank. C. Fisher. 1,631,315; June 7.
Saw, Meat. G. F. Feister. 1,631,366; June 7.
Saw set. A. Johnson. 1,631,534; June 7.
Saw-tooth roller, Band-. A. E. Proctor. 1,631,336; June 7.
Sawing apparatus and method. W. S. Dietrich. 1,631,927; June 7.
Saws, Making. L. E. Swett. 1,631,657; June 7.
Scaffold, Portable. H. J. Yager. 1,631,848; June 7.
Scaffolding and other framework structures, Coupling or clamping device for. D. Palmer-Jones. 1,631,831; June 7.
Scale, Personal weighing. H. C. Schaper. 1,631,341; June 7.
Screed support. G. F. Pawling. 1,631,502; June 7.
Screen: *See*—
Picture screen.
Screen. F. L. Jahn. 1,631,822; June 7.
Screen plate. W. L. D'Olier and T. Tohlin. 1,631,585; June 7.
Sealing machine for containers or the like. C. E. Martin. 1,631,748; June 7.
Sealing means. W. M. Brooks. 1,631,464; June 7.
Sealing-off device. Winfried W. Loebe and M. Grossmann. 1,631,377; June 7.
Sealing-off device. C. Martin. 1,631,378; June 7.
Sealing-off torch. L. A. Maurer. 1,631,379; June 7.
Semitrailers, Landing and raising gear for. I. H. Judd. 1,631,135; June 7.
Separating purposes, Centrifugal apparatus for. F. A. Quiroz. 1,631,383; June 7.
Separator: *See*—
Battery separator. Leaf separator.
Cream separator.
Sewing machine. F. Ricks and E. G. E. Burgoyne. 1,631,385; June 7.
Sewing machine. F. Zaleski. 1,631,179; June 7.
Shade guide, Window-. J. R. Binford. 1,631,460; June 7.
Shade holder. L. W. Anderson. 1,631,613; June 7.
Shaft, Detachable. R. M. Werner. 1,631,236; June 7.
Shafting, Nonmetallic centering device for. A. H. Leipert. 1,631,216; June 7.
Sheet conveyer. A. J. Freeman. 1,631,367; June 7.
Sheet-feeding apparatus, Sheet-retarding means for. A. Broadmeyer. 1,631,617; June 7.
Shingle, Flexible. G. Ritter. 1,631,936; June 7.
Shipping package. S. C. Cary. 1,631,516; June 7.
Ships or the like, Propeller for. J. K. Lowe. 1,631,744; June 7.
Shirt. R. G. Dray. 1,631,856; June 7.
Shock absorber. L. Aldrin. 1,631,569; June 7.
Shock absorber. A. Bennett. 1,631,459; June 7.
Shock absorber. A. J. Root. 1,631,222; June 7.
Shock-absorbing mechanism. J. F. O'Connor. 1,631,147; June 7.
Shock-absorbing mechanism, Friction. J. F. O'Connor. 1,631,148; June 7.
Shock-absorbing mechanism, Friction. J. F. O'Connor. 1,631,149; June 7.
Shoe. T. Davis. Des. 72,789–91; June 7.
Shoe and manufacture. C. O. Cristallini. 1,631,919; June 7.
Shoe-tree. S. Battilani. 1,631,780; June 7.
Shoes, Heel for. L. Lazzarri and D. Saudino. 1,631,741; June 7.
Shoes, Heeling. J. H. Pope. 1,631,155; June 7.
Shoulder pad. G. A. Rick. 1,631,694; June 7.
Shouldering attachment. C. B. Warren. 1,631,444; June 7.
Shuttle tension. G. Brahs. 1,631,305; June 7.
Sign, Advertising. L. R. Anderson. 1,631,782; June 7.
Sign or advertising device, Changeable. S. Katz. 1,631,870; June 7.
Signal: *See*—
Automobile signal. Traffic signal.
Signal system, Police. W. E. Frost. 1,631,368; June 7.
Signaling apparatus, Vehicle. A. M. Schick. 1,631,698; June 7.
Signaling system, High-frequency. I. F. Byrnes. 1,631,670; June 7.
Silk, Manufacture of artificial. F. W. Schubert. 1,631,835; June 7.
Skein-winding machine. J. F. Schenck, sr. 1,631,893; June 7.
Sleeve coupling, Boltless. F. W. Daniel, sr. 1,631,250; June 7.
Slicer, Bread. H. Stukart. 1,631,231; June 7.
Smoker's article. E. Caldwell. 1,631,467; June 7.
Smoking meat. M. Britt. 1,631,463; June 7.
Snap fastener. J. C. Peterson. 1,631,602; June 7.
Socket-seating and fuse-testing block, Combination. W. Wurdack. 1,631,178; June 7.
Soldering machine, Can-. W. J. Luxton and W. A. Green. 1,631,424; June 7.
Sound amplifier. H. D. Penney. 1,631,221; June 7.
Sound damper. H. W. K. De Brey. 1,631,924; June 7.
Sound-reproducing apparatus. C. W. Rice. 1,631,646; June 7.
Sound-reproducing machines, Repeating attachment for. C. J. Cooke and J. A. Rennie. 1,631,797; June 7.
Spark plugs, Terminal connecter for. A. Champion. 1,631,191; June 7.
Speed indicator. T. Collins, jr. 1,631,796; June 7.
Speed-reduction mechanism. A. J. Krause. 1,631,739; June 7.
Speed transmission, Change-. G. J. Rackham. 1,631,338; June 7.
Spinning spindles, Bearing for. J. Kirner. 1,631,736; June 7.
Spool-stripping machine, Jack-. G. Crossland. 1,631,920; June 7.
Spool support. G. Crossland. 1,631,921; June 7.
Spoon or similar article. E. T. Beck. Des. 72,786; June 7.
Spout, Collapsible. B. A. McAnsh. 1,631,951; June 7.
Sprinkler. L. R. Nelson. 1,631,381; June 7.
Stable peroxidized composition and making same. J. A. L. Van der Lande. 1,631,903; June 7.
Staff base. E. E. See. 1,631,227; June 7.
Stall and stanchion. A. Quade and A. H. Klumb. 1,631,337; June 7.
Stamping and registering apparatus. J. T. F. Conti and P. H. L. Tiranty. 1,631,624; June 7.
Stand: *See*—
Telephone stand.
Steam boiler. W. Siegerist. 1,631,344; June 7.
Steam engine. W. B. Lipscomb. 1,631,743; June 7.
Steam trap. H. C. Macaulay. 1,631,876; June 7.
Steering-mechanism stabilizer for trailers. W. E. Plank. 1,631,332; June 7.
Steering-post control. F. F. Chandler and R. E. Young. 1,631,795; June 7.
Steering-post control-lever assembly. E. J. Gruenewald and D. E. Ross. 1,631,809; June 7.
Stereotype plates, Apparatus for casting curved. S. Werbner. 1,631,944; June 7.
Stiletto. C. E. Winkler. 1,631,175; June 7.
Stone in coal mines, Unit for crushing and distributing powdered. S. Teacher. 1,631,233; June 7.
Stopcock, Self-closing. E. V. Sprague. 1,631,166; June 7.
Storage battery. R. C. Benner. 1,631,511; June 7.
Stove, Hot-air. H. de Boischevalier. 1,631,721; June 7.
Straw press. J. F. Murray. 1,631,881; June 7.
Stringed instrument. R. A. Carlucci. 1,631,794; June 7.
Stud-and-socket-type fastening. T. Morton. 1,631,880; June 7.
Sucker-rod elevator. E. E. Westmoreland and S. G. Taylor. 1,631,845; June 7.
Suction pipe. E. Risley. 1,631,761; June 7.
Surveying instrument with drawing device. M. Sander. 1,631,891; June 7.
Swatter, Fly. N. T. Hendrickson and C. Roholt 1,631,864; June 7.
Switch: *See*—
Automatic switch. Mercury-tube switch.
Electric switch. Quick-break switch.
Electrical switch.
Switch and signal system. R. M. Robinson. 1,631,648; June 7.
Swivel hook, Hydraulic. F. Redick. 1,631,890; June 7.
Tack-supplying mechanism. B. Jorgensen. 1,631,134; June 7.
Tag price-marking machine. F. Kohnle. 1,631,933; June 7.
Take-up bolt, Automatic. O. Miller. 1,631,878; June 7.
Take-up reel. T. J. Schuetz. 1,631,432; June 7.
Tank: *See*—
Liquid-measuring tank. Radiator tank.
Tanks, Fuel filler for. T. D. Manuel. 1,631,542; June 7.
Telegraph and telephone cables, Manufacture of. W. S. Smith and A. D. Shuter. 1,631,774; June 7.
Telegraph repeater, Alternating-current. J. P. Ferriter and W. T. Guest. 1,631,675; June 7.
Telegraph signaling system. S. D. Wilburn. 1,631,174; June 7.
Telegraph system, Alternating-current. J. P. Ferriter and W. T. Guest. 1,631,676; June 7.
Telephone and cap therefor. F. Walter. 1,631,350; June 7.
Telephone, Hand. O. Soldan. 1,631,607; June 7.
Telephone stand. F. A. Ford. 1,631,195; June 7.
Telephone system, Automatic. J. Wicks. 1,631,351; June 7.
Tension device and the like. L. Pavia. 1,631,330; June 7.
Tent. C. B. Leffert. 1,631,215; June 7.
Terminal protective apparatus. E. A. Seward and E. B. Rodgers. 1,631,555; June 7.
Thermal relay. C. I. Hall. 1,631,679; June 7.
Thermosensitive relay. L. E. Spray. 1,631,836; June 7.
Tile and the like, Manufacturing mastic. F. R. Muller. 1,631,284; June 7.
Tilting trap. N. C. and H. C. Ellis. 1,631,407; June 7.
Timer. E. Sinner. 1,631,291; June 7.
Tine for haymaking and like machinery. J. and C. J. Bamford. 1,631,455; June 7.

Tip-up and like chair. D. E. Turner. 1,631,440; June 7.
Tire-building core. B. De Mattia. 1,631,855; June 7.
Tire chain. W. Murphy. 1,631,754; June 7.
Tire chain. F. A. Smith. 1,631,296; June 7.
Tire rim, Telescoping. A. R. Parsons. 1,631,429; June 7.
Tires, Blow-out patch for balloon. C. E. Ayers. 1,631,354; June 7.
Tires, Cushioning unit for vehicle. H. Zubrow and E. Solomon. 1,631,447; June 7.
Toilet box. A. S. Donaldson. Des. 72,793; June 7.
Tomb or grave closing device. H. J. Busey. 1,631,853; June 7.
Tongs. J. Chambers. 1,631,916; June 7.
Tool, Fluid-pressure-actuated. E. H. Shaff. 1,631,163; June 7.
Tool for inserting or removing screws. J. Klewicz. 1,631,489; June 7.
Tool-slide mechanism. E. P. Bullard, jr. 1,631,579; June 7.
Tool, Tire-regrooving. J. A. Straits. 1,631,941; June 7.
Toothbrush, Motor-driven. G. W. Baird and A. Lamb. 1,631,394; June 7.
Toothbrush, Rotary. B. V. Stoll. 1,631,897; June 7.
Torpedo, Railway signal. F. Dutcher. 1,631,857; June 7.
Toy electric railway. L. Caruso. 1,631,245; June 7.
Toy, Figure. M. P. Correa, jr. 1,631,918; June 7.
Toy, Mechanically-operated figure. A. W. Ankeny. 1,631,451; June 7.
Toy top. S. Kielar. 1,631,272; June 7.
Tractor. A. N. Calkins. 1,631,243; June 7.
Tractor brake. T. J. Fetcher. 1,631,122; June 7.
Tractor, Roller. R. W. Keeler. 1,631,271; June 7.
Tractor trailer coupler. S. B. Winn. 1,631,847; June 7.
Traffic gate. E. E. Howard. 1,631,416; June 7.
Traffic signal for vehicles. J. E. Lock. 1,631,140; June 7.
Traffic signal, Vehicle. E. Kimura. 1,631,273; June 7.
Train-control system. A. B. Kendall and B. W. Meisel. 1,631,597; June 7.
Train-control systems, Conductor for. T. E. Clark. 1,631,361; June 7.
Train-pipe connecter, Automatic. J. Robinson. 1,631,551–2; June 7.
Transformer. H. P. Andreoli. 1,631,393; June 7.
Transmission lock. W. M. Reason. 1,631,157; June 7.
Transmission mechanism. J. C. Heyda. 1,631,590; June 7.
Transmission, Speed-varying. J. M. Simpson. 1,631,939; June 7.
Transmissions and the like, Casing for. E. R. Hewitt and A. H. Leipert. 1,631,201; June 7.
Transmitting mechanism. C. C. Balston. 1,631,572; June 7.
Trap: *See*—
Boiler-feed trap. Steam trap.
Drum trap. Tilting trap.
Trapdoors, Operating mechanism for car-vestibule. A. A. Constantine. 1,631,307; June 7.
Tree: *See*—
Shoe-tree.
Truck, Adjustable end. R. E. Nelles. 1,631,545; June 7.
Truck, Dumping. J. P. Egholm. 1,631,627; June 7.
Truck frame. H. C. Priebe. 1,631,335; June 7.
Trucks or wagons, Gravity-dump body for. F. J. Melton. 1,631,751; June 7.
Trucks, wagons, and other vehicles, Stake for. W. Burkart. 1,631,118; June 7.
Tube holder, Collapsible. A. G. Leake. 1,631,275; June 7.
Tubes, Cap for paste. D. L. Gallett. 1,631,525; June 7.
Tubing, Making. C. Skoglund. 1,631,651; June 7.
Tunnels, Smoke-extracting device for. P. Wagich. 1,631,442; June 7.
Turbine, Elastic-fluid. G. B. Warren. 1,631,660; June 7.
Typesetting apparatus. C. A. H. Bullock. 1,631,515; June 7.
Typewriting machine. G. G. Going. 1,631,197; June 7.
Typewriting machine. W. F. Rothermund. 1,631,223; June 7.
Typewriting machine. J. Waldheim. 1,631,565; June 7.
Typewriting machines, Scale plate for. W. E. Lane. 1,631,494; June 7.
Underlift. A. Broadmeyer. 1,631,618; June 7.
Universal joint. A. F. Pieper. Des. 72,802; June 7.
Vacuum cleaner. F. F. Pease. 1,631,549; June 7.
Vacuum discharge apparatus. S. Dushman. 1,631,672; June 7.
Vacuum packing apparatus. F. W. L. Peebles. 1,631,885; June 7.
Valve. C. P. Eisenhauer. 1,631,406; June 7.
Valve. J. S. Forbes. 1,631,586; June 7.
Valve. F. H. Hehemann. 1,631,414; June 7.
Valve. A. F. Pieper. 1,631,643; June 7.
Valve for making connection between underground main piping and underground branch piping. D. L. H. Van Raalte. 1,631,564; June 7.
Valve for tanks. J. Harris. 1,631,372; June 7.
Valve-operating mechanism, Limit switch for. E. A. Russell and P. B. Parks. 1,631,161; June 7.
Valve, Pressure-operable. S. Greenhouse. 1,631,263; June 7.
Valve-refacing tool. L. O. Beard. 1,631,850; June 7.
Valve shield. M. Sullivan. 1,631,438; June 7.
Valve tappets, Mounting for. A. F. Milbrath. 1,631,218; June 7.
Valve, Water-discharge. F. Gfeller. 1,631,482; June 7.
Valve, Water-shut-off. F. Gfeller. 1,631,481; June 7.
Valves, Indicator for setting steam-engine. S. B. Musselman. 1,631,285; June 7.
Valves, Machine for grinding. F. S. Simpson. 1,631,700; June 7.
Vanity case. L. J. Greenwald. 1,631,588; June 7.
Vanity case. N. Kasdan. 1,631,136; June 7.
Vehicle. T. J. Fay. 1,631,803; June 7.
Vehicle. O. E. Hunt. 1,631,206; June 7.
Vehicle and trailer, Auto marine. A. E. Cook. 1,631,248; June 7.
Vehicle body. A. Hoeldtke. 1,631,131; June 7.
Vehicle body removing and replacing device. S. Carnes. 1,631,915; June 7.
Vehicle brake. H. C. Chase. 1,631,470; June 7.
Vehicle hood cover, Motor-. C. Wilhelm. 1,631,663; June 7.
Vehicles, Automatic brake for. B. W. Twyman and R. B. Burton. 1,631,902; June 7.
Vehicles, Combination rear light for. C. E. Godley. 1,631,678; June 7.
Vehicles, Driver's compartment for. R. F. Blair and G. Hind. 1,631,357; June 7.
Vehicles, Heating apparatus for. E. P. Chase. 1,631,469; June 7.
Vehicles, Mud guard for. A. Kloss. 1,631,420; June 7.
Vehicles, Power-propelled runner attachment for motor. G. B. Anderson. 1,631,114; June 7.
Vehicles, Power-transmission mechanism for motor. G. M. Stone. 1,631,837; June 7.
Vehicles, Propelling wheeled. J. Temperly. 1,631,900; June 7.
Vending machine. J. E. Olivis. 1,631,547; June 7.
Ventilators for wearing apparel, Machine for making. W. I. Silverateln. 1,631,773; June 7.
Vulcanizing apparatus. R. D. Fritz. 1,631,806; June 7.
Vulcanizing method and apparatus. J. D. Tew. 1,631,707; June 7.
Wagon, Casing, J. D. Lemex. 1,631,276; June 7.
Wall board and making the same. H. F. Weiss. 1,631,173; June 7.
Wall construction. R. G. Wallace. 1,631,659; June 7.
Wall construction, Building. G. L. Bennett. 1,631,787; June 7.
Wall, Partition. J. M. Hewlett. 1,631,373; June 7.
Washboard support, Adjustable. E. A. McClaferty. 1,631,638; June 7.
Washer: *See*—
Lock washer. Nut lock or fastener washer.
Washing machine. F. J. Gensley. 1,631,630; June 7.
Washing machine. W. C. Hasha. 1,631,266; June 7.
Water heater. A. T. Johanson. 1,631,533; June 7.
Water-supply system and valve therefor. J. H. Masters. 1,631,142; June 7.
Weeder. M. D. Kast. 1,631,733; June 7.
Weighing apparatus and the like, Stay connection for. E. L. Blick. 1,631,358; June 7.
Weighing machine. G. H. Bent. 1,631,117; June 7.
Wells, Apparatus for plugging. M. M. Kinley. 1,631,419; June 7.
Wheel: *See*—
Disk wheel. Flexible wheel.
Wheel-dressing mechanism. H. E. Kempton. 1,631,596; June 7.
Wheel runner. I. Knight. 1,631,873; June 7.
Wheels, Producing of cast-metal. G. Walther. 1,631,712; June 7.
Wheelbarrow, Garden. B. Privat. 1,631,333; June 7.
Whirligig. G. M. Larrair. 1,631,539; June 7.
Winding machine. G. Sipp. 1,631,292; June 7.
Winding shaft. F. E. Langdon. 1,631,538; June 7.
Window. C. E. Bateman. 1,631,666; June 7.
Window, Metallic. J. Brogden. 1,631,949; June 7.
Window of motor and other vehicles, Sliding. J. M. Strachan. 1,631,775; June 7.
Window opening and closing mechanism. J. Saoutchik. 1,631,892; June 7.
Window operator. F. G. Kitchin. 1,631,490; June 7.
Window, Storm. E. W. Vinz. 1,631,777; June 7.
Windshield cleaner. F. G. and W. M. Folberth. 1,631,629; June 7.
Wire connection. C. K. Jackson. 1,631,821; June 7.
Wire holder. L. B. Barrett. 1,631,510; June 7.
Wood, Gelatinizing. A. W. Schorger. 1,631,834; June 7.
Wood, Treating. W. Hoskins. 1,631,728; June 7.
Wood waste, Utilizing. H. F. Weiss. 1,631,171–2; June 7.
Wrench: *See*—
Adjustable wrench.
Wrench for screw-top jars. F. Moser. 1,631,689; June 7.
Writing pad. B. M. Dunlap. 1,631,192; June 7.

CLASSIFICATION OF PATENTS

ISSUED JUNE 7, 1927.

NOTE.—First number=class, second number=subclass, third number=patent number.

1— 6: 1,631,134
46: 1,631,501
2— 3: 1,631,694
12: 1,631,210
19: 1,631,735
20: 1,631,128
97: 1,631,601
116: 1,631,856
195: 1,631,389
197: 1,631,945

Table pad. O. Winter. 246,796–7; June 14.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 14TH DAY OF JUNE, 1927.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

A. B. See Elevator Company. (See Jackson, Joseph R., jr., assignor.)

Abendroth, Wilhelm, Berlin-Charlottenburg, assignor to Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung, Berlin-Siemensstadt, Germany. Arrangement or system for the generation of steam. 1,632,575; June 14.

Accessories Manufacturing Company. (See Bramming, Carl, assignor.)

Adams & Westlake Company, The. (See Holt, Thomas W., assignor.)

Aikman, Burton S., assignor to National Brake & Electric Company, Milwaukee, Wis. Fluid compressor. 1,632,262; June 14.

Air-Scale Company, The. (See Morley, Earl M., assignor.)

Airship Guarantee Company Limited. (See Burney, Charles D., assignor.)

Aktiebolaget Atlas Diesel. (See Danielsson, Axel U. S., assignor.)

Aktiebolaget Knappfabriken. (See Bladh, Johan A., assignor.)

Aktiebolaget Ljungströms Angturbin. (See Ljungström, Fredrik, assignor.)

Aktiengesellschaft Brown, Boveri & Cie. (See Roebel, Ludwig, assignor.)

Alexander, Harry V., Bonne Terre, Mo. Aeroplane. 1,632,158; June 14.

Alfisi, Raffaele, Brooklyn, N. Y. Lock for automobiles. 1,632,576; June 14.

Allahverdian, Wagna, Utica, N. Y. Lineman's climbing iron. 1,632,688; June 14.

Allen, Chester B., assignor of one-half to W. H. Russe, Memphis, Tenn. Vehicle wheel. 1,632,427; June 14.

Alliance Machine Company, The. (See Yanney, George W., assignor.)

Allied Metal Industries, Inc. (See Finch, Harry, assignor.)

Allred, Daniel M. (See Foerster, Herman, assignor.)

American Bottle Company, The. (See Stewart, Gayle D., assignor.)

American Foundry Equipment Company, The. (See Minich, Verne E., assignor.)

American Gas Construction Company. (See Tenney, C. L., and Thayer, assignors.)

American Kron Scale Company. (See Holm, John, assignor.)

American Motor Body Corporation, The. (See Hansen, Conrad T., assignor.)

American Optical Company. (See Baker, Nelson M., assignor.)

American Safety Razor Corporation. (See Knufman, Joseph, assignor.)

American Telephone and Telegraph Company. (See Dustin, George E., assignor.)

American Telephone and Telegraph Company. (See Martin, William H., assignor.)

American Telephone and Telegraph Company. (See Toomey, John F., assignor.)

American Tobacco Company, The. (See Dalton, J. T., and Corson, assignors.)

Amsterdam Cutlery Company. (See Wilkes, C. H., and Calhoun, assignors.)

Amundsen, Ivar, Oslo, Norway. Refrigerating machine of the absorption type. 1,632,387; June 14.

Anderson, Claude M., Guys Hill, Jamaica, British West Indies. Lantern. 1,632,577; June 14.

Anderson, Edgar, Wakefield, Nebr. Vehicle signal. 1,632,689; June 14.

Anderson, Ernst G. K., Chicago, Ill., assignor to Appleton Electric Company. Controlling switch for spotlights and the like. 1,632,754; June 14.

Anderson, Evald, Alhambra, assignor to International Precipitation Company, Los Angeles, Calif. Gas scrubber. 1,632,325; June 14.

Anderson, Horace C., Amarillo, Tex. Gas-outlet fixture. 1,631,953; June 14.

Anderson, William A., Kanorado, Kans. Device for expanding wheel rims. 1,632,263; June 14.

Andrews, John S., Los Angeles, Calif. Wall furnace. Re16,657; June 14.

Appleton Electric Company. (See Anderson, Ernst G. K., assignor.)

Armistead, Hubert M., San Francisco, Calif., assignor to Manifold Impressions Corporation, Carson City, Nev. Variable-spacing platen clutch for typewriters. 1,632,361; June 14.

Armistead, Hubert M., San Francisco, Calif., assignor to Manifold Impressions Corporation, Carson City, Nev. Manifolding attachment for typewriters. 1,632,362; June 14.

Armstrong, Lyman P., San Jose, Calif. Clamping device. 1,632,108; June 14.

Aronson, Louis V., Newark, N. J. Clock casing. Des. 72,811; June 14.

Aronson, Louis V., Newark, N. J. Clock casing. Des. 72,812; June 14.

Arrow Electric Company, The. (See Nero, Arvid H., assignor.)

Ashton, Richard A., assignor to Seneca Falls Machine Co., Seneca Falls, N. Y. Work-driving device. 1,632,018; June 14.

Askania-Werke Aktiengesellschaft vormals Centralwerkstatt Dessau und Carl Bamberg-Friedenau. (See von Schubert, Erich, assignor.)

Atchison, Arlo G., Santa Barbara, Calif. Camera attachment. 1,623,690; June 14.

Autan Corporation. (See Gaisman, H. J., and Schumacher, assignors.)

Auto Research Corporation. (See Bijur, Joseph, assignor.)

Auto Research Corporation. (See Bloom, Edgar J., assignor.)

Automatic Electric Inc. (See Lomax, Clarence E., assignor.)

Avis, August, Malang, Java, Dutch East Indies. Engine-starting device. 1,632,264; June 14.

Axberg, Edward, Spokane, Wash. Ticket cabinet. 1,632,265; June 14.

Babcock & Wilcox Company, The. (See Lewis, Nathan E., assignor.)

Baer, Frances R., Kansas City, Mo. Game. 1,632,640; June 14.

Bahlke, William H. (See Wilson, R. E., and Bahlke.)

Bahr, Fritz, Charlottenburg, Germany, assignor to General Electric Company. Arc lamp of the sealed type. 1,632,578; June 14.

Baker, Nelson M., assignor to American Optical Company, Southbridge, Mass. Ophthalmic-rim stretcher. 1,632,266; June 14.

Baker-Vawter Company. (See Steenrod, William J., assignor.)

Baldwin, James L., Chicago, Ill. Clutch. 1,632,159; June 14.

Baldwin Locomotive Works, The. (See Shannon, Ellwood M., assignor.)

Baldwin, Ralph S., and W. A. Johnston, Spokane, Wash. Mineral separator. 1,632,210; June 14.

Baltzley, Louis E., Glen Ridge, N. J. Traffic signal. 1,632,211; June 14.

Baltzley, Louis E., Glen Ridge, N. J. Adjusting device. 1,632,212; June 14.

Barbieri, Ceasare, New York, N. Y., assignor to The Vortex Mfg. Co., Chicago, Ill. Receptacle and blank therefor. 1,632,019; June 14.

Barger, William R., and L. A. Hawkins, Washington, D. C., and C. P. Blatz, Pasadena, Calif., assignors, by mesne assignments, to the people of the United States. Treatment of fruit in the preparation of fruit for market. 1,632,579; June 14.

Barlow, Lester P., Stamford, Conn. Vapor-cooling system. 1,632,580; June 14.

Barlow, Lester P., Stamford, Conn. Engine-cooling system. 1,632,581; June 14.

Barlow, Lester P., Detroit, Mich. Engine-cooling system. 1,632,582; June 14.

Barlow, Lester P., Detroit, Mich. Engine-cooling system. 1,632,583; June 14.

Barlow, Lester P., Detroit, Mich. Engine-cooling system. 1,632,584; June 14.

Barlow, Lester P., Stamford, Conn. Vapor-cooling system for internal-combustion engines. 1,632,585; June 14.

Barlow, Lester P., Stamford, Conn. Vapor-cooling system for internal-combustion engines. 1,632,586; June 14.

Barnes, William G., Kansas City, Mo. Body adjuster for deceased persons. 1,632,160; June 14.

Barnett, Arthur J., New York, N. Y., assignor to The Worcester Knitting Co., Worcester, Mass. Buttonless bathing suit. 1,632,723; June 14.

Bartels, Edward E. assignor to Standard Oil Company, Whiting, Ind. Liquid and mechanical seal. 1,632,213; June 14.

Bassett, Preston R., assignor to The Sperry Gyroscope Company, Brooklyn, N. Y. Arc lamp. 1,632,161; June 14.

Bassick Manufacturing Company. (See Houghton, Herbert H., assignor.)

Bauer, Frank, Williamsville, N. Y. Rigid aircraft. 1,632,641; June 14.

Bauer, William J., Syracuse, N. Y. Anchor. 1,632,529; June 14.

Beall, Charles R., Edgewood Borough, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,632,162; June 14.

Beaston, Greek P., assignor to J. McCracken, Coin, Iowa. Circuit closer. 1,632,530; June 14.

Beaulac, Charles E., Bartlettville, Alberta, Canada. Movable headlight. 1,632,691; June 14.

Beaumont, R. H., Co. (See Birch, Herbert E., assignor.)

Bechstein, Carl A., et al. (See Jones, Ira M., assignor.)

Beem, John C., Sawtelle, Calif. Drafting instrument. 1,632,267; June 14.

Behrman, Marcus B., New York, assignor to The Lox Seal Corporation, Brooklyn, N. Y. Ticket and securing means therefor. 1,631,954; June 14.

Belin, Edouard, Ruell, France. Optical receiver for teletype machines. 1,632,163; June 14.

Bell, John E., Brooklyn, N. Y., assignor to Combustion Engineering Corporation. Grinding and drying apparatus. 1,632,109; June 14.

Bell, Samuel J., West Springfield, Mass. Cooking utensil. 1,632,326; June 14.

Bell Telephone Laboratories. (See Haddock, Arthur, assignor.)

Bell Telephone Laboratories, Incorporated. (See Whiting, Donald F., assignor.)

Bell Telephone Laboratories, Incorporated. (See Whitney, Wiley, assignor.)

Bendix Brake Company. (See Dodge, Adiel Y., assignor.)

Bendix Brake Company. (See McConkey, Montgomery W., assignor.)

Bendix Brake Company. (See Thomas, George J., assignor.)

Benenati, Nicholas, New York, N. Y. Mounted gas heater. 1,632,587; June 14.

Benham, William T., Norwood, and J. E. Dwyer, assignors to The Hall's Safe Company, Cincinnati, Ohio. Safe-locking mechanism. 1,632,428; June 14.

Benham, William T., Norwood, and J. E. Dwyer, assignors to The Hall's Safe Company, Cincinnati, Ohio. Time-lock mechanism. 1,632,429; June 14.

Benjamin, Bert R., Oak Park, and W. Webber, La Grange, assignors to International Harvester Company, Chicago, Ill. Adjustable self-aligning bushing. 1,632,164; June 14.

Benjamin Electric Manufacturing Company. (See Benjamin, Reuben B., assignor.)

Benjamin Electric Manufacturing Company. (See Warner, Charles E., assignor.)

Benjamin, Reuben B., assignor to Benjamin Electric Manufacturing Company, Chicago, Ill. Electric-fixture support and connecter. 1,631,997; June 14.

Berger, Matthew R., Philadelphia, Pa. Manner of making sickle hooks. 1,632,327; June 14.

Bergman, Carl, Bergenfield, N. J. Transformer. 1,631,955; June 14.

Bergmann, Christian N., Pittsburgh, Pa., E. Z. Taylor, Newark, N. J., and C. Taylor, Hartford, Conn., assignors to Bergmann Packaging Machine Company, Pittsburgh, Pa. Measuring device for plastic material. 1,632,165; June 14.

Bergmann Packaging Machine Company. (See Bergmann, C. N., and Taylor, assignors.)

Berry, Charles F., Boston, Mass. Combined door and table. 1,632,268; June 14.

Bertels, Arnold S., Tenafly, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Testing device. 1,632,053; June 14.

Beugler, Edwin F., assignor to E. & B. Holmes Machinery Co., Buffalo, N. Y. Barrel-reversing mechanism. 1,632,110; June 14.

Bevilacqua, Guilio, Clifton, N. J. Safety gas-stove lock. 1,632,111; June 14.

Bijur, Joseph, New York, N. Y., assignor to Auto Research Corporation. Lubricating installation. 1,632,771; June 14.

Bijur, Joseph, New York, N. Y., assignor to Auto Research Corporation. Flow-control fitting. 1,632,772; June 14.

Bijur, Joseph, New York, N. Y., assignor to Auto Research Corporation. Supply installation for central chassis lubrication. 1,632,773; June 14.

Bijur, Joseph, New York, N. Y., assignor to Auto Research Corporation. Element of lubricant supply installations. 1,632,774; June 14.

Bijur, Joseph, New York, N. Y., assignor to Auto Research Corporation. Lubricating installation. 1,632,775; June 14.

Bijur, Joseph, New York, N. Y., assignor to Auto Research Corporation. Supply installation for central chassis lubrication. 1,632,776; June 14.

Bingham, Jeremiah, assignor to The Bingham Stamping & Tool Company, Toledo, Ohio. Wheel-hub construction. 1,632,214; June 14.

Bingham Stamping & Tool Company, The. (See Bingham, Jeremiah, assignor.)

Birch, Herbert E., assignor to R. H. Beaumont Co., Philadelphia, Pa. Fastening hoisting rope to skip buckets and counterweights. 1,632,755; June 14.

Blackburn, Robert, Chorley, assignor to Parent Caterpillar Company, Limited, London, England. Roundabout and like amusement apparatus. 1,632,692; June 14.

Bladh, Johan A., assignor to Aktiebolaget Knappfabriken, Askersund, Sweden. Machine for the manufacturing of buttons. 1,632,642; June 14.

Blair, Bert R. (See Van de Water, J. W., and Blair.)

Blake, C. C., Incorporated. (See Fernald, Mark E., assignor.)

Blake, Ell J. (See Bouché, W. F., and Blake.)

Bland, Leonard N., North Sydney, assignor to Bland Magnetic Valves Limited, Sydney, New South Wales, Australia. Electromechanical valve-operating means for internal-combustion engines. 1,632,531; June 14.

Bland Magnetic Valves Limited. (See Bland, Leonard N., assignor.)

Blatz, Clarence P. (See Barger, W. R., Hawkins, and Blatz.)

Bloom, Edgar J., Tiffin, Ohio, assignor, by mesne assignments, to Auto Research Corporation. Terminal construction for central lubricating installations. 1,632,724; June 14.

Bloom, Edgar J., Tiffin, Ohio, assignor, by mesne assignments to Auto Research Corporation. Chassis lubrication. 1,632,767; June 14.

Bloss, Eugene, et al. (See Pecker, Joseph S., assignor.)

Blow-Knox Company. (See Venable, William M., assignor.)

Blue, Louis V., Pittsburgh, assignor of one-fourth to W. A. Falson, Chester, Pa. Automatic closer for windows and the like. 1,632,532; June 14.

Boehringer, John A., Springfield, assignor to Star Chandelier Co., Inc., New York, N. Y. Ceiling plate for lighting fixtures. Des. 72,813; June 14.

Boehringer, John A., Springfield, assignor to Star Chandelier Co., Inc., New York, N. Y. Loop for lighting fixtures. Des. 72,814; June 14.

Boehringer, John A., Springfield, assignor to Star Chandelier Co., Inc., New York, N. Y. Loop for lighting fixtures. Des. 72,815; June 14.

Bolzonetti, Decio, Pittsburgh, Pa. Combined letter box and milk-bottle holder. 1,632,020; June 14.

Borbeck, Robert E., and G. C. Truman, Los Angeles, Calif. Oil-level regulator. 1,632 215; June 14.

Boston Woven Hose & Rubber Co. (See Fellows, John W., assignor.)

Bottome, Edgar M., assignor to Fostoria Glass Co., Moundsville, W. Va. Plate. Des. 72,816; June 14.

Bottome, Edgar M., assignor to Fostoria Glass Co., Moundsville, W. Va. Goblet. Des. 72,817; June 14.

Bouché, William F., Lancaster, and E. J. Blake, Buffalo, assignors, by mesne assignments, to Gould Car Lighting Corporation, Rochester, N. Y. Exhaust muffler. 1,632,328; June 14.

Bourcier, Charles D., Grafton, Mass. Ignition-testing device for internal-combustion engines. 1,632,166; June 14.

Bourne, Stephen. (See Rypinski, M. C., Staunton, and Bourne.)

Bouwers, Albert. (See Holst, G., and Bouwers:)

Bradford, Zerbe C., assignor to Delco-Remy Corporation, Dayton, Ohio. Ignition timer. 1,632,167; June 14.

Bradley, Harry T., and F. Jacobi, Newark, N. J. Collapsible hamper. 1,632,269; June 14.

Bradley, Harry T., and F. Jacobi, Newark, N. J. Adjustable bottom for hampers. 1,632,270; June 14.

Bradley, William, Thrift, Tex. Traveling valve for oil-well pumps. 1,632,216; June 14.

Bramming, Carl, Chicago, Ill., assignor to Acessories Manufacturing Company. Connector member. 1,632,112; June 14.

Brandes Laboratories, Inc. (See Rypinski, M. C., Staunton, and Bourne, assignors.)

Branchler, Charles A., Canton, Ohio. Forging gear blanks. 1,632,533; June 14.

Braun, Carl, Canastota, N. Y. Receptacle sterilizer. 1,632,588; June 14.

Breaux, Aline O., New Iberia, La. Bedpan. 1,632,021; June 14.

Bree, Heller O., Auckland, New Zealand. Switching and starter apparatus of electric motors. 1,632,534; June 14.

Breeden, Paul L. (See Breeden, Sam G. and P. L.)

Breeden, Sam G. and P. L., Memphis, Tenn. Battery and connecter. 1,632,535; June 14.

Bren, George T., New Rochelle, assignor to Herring-Hall-Marvin Safe Company, New York, N. Y. Chute. 1,632,536; June 14.

Breene, Harry H., Tulsa, Okla. Well-sealing device. 1,632,271; June 14.

Brent, James A., Kalispell, Mont. Automobile body. Des. 72,818; June 14.

Brigel, Charles E., Cincinnati, Ohio. Price tag and tag holder. 1,632,537; June 14.

Brill, J. G., Company, The. (See Leonhauser, Henry A., assignor.)

Bristol, John S., Danbury, Conn. Driving bit. 1,632,589; June 14.

Brockel, Thomas W., and P. F. Ebling, Milwaukee, Wis. Child's shoe. 1,632,430; June 14.

Brogden, Joab, Melrose Park, Pa. Vise. 1,632,538; June 14.

Brown, Arthur L., Wilkinsburg, Pa., assignor to Westinghouse Electric and Manufacturing Company. Phenolic condensation product. 1,632,113; June 14.

Brown, Charles W., et al. (See Molony, S. B., and Nikaido, assignors.)

Brown, Jackson W., assignor of forty-five per cent to F. E. Farris, De Quincy, La. Railway crossing. 1,632,725; June 14.

Brown, John H., Jersey City, N. J. Warehouse-truck brake. 1,632,217; June 14.

Brown, John T. L., New Brighton, assignor to Western Electric Company, Incorporated, New York N. Y. Oscillation generator. 1,632,054; June 14.

Brown, Robert M., Chicago, Ill., assignor of forty-five one-hundredths to A. Pow, Glencoe, Ill. Wall panel. 1,632,431; June 14.

Brown, William E., Los Angeles, Calif. Folding cot. 1,632,114; June 14.

Brune, Herbert M., et al., trustees. (See Charles, Carl L., assignor.)

Buckman, Harold W., and H. Prentice, assignors to Vance Engineering Company, Pittsburgh, Pa. Control valve for fluid-perssure devices. 1,632,168; June 14.

Bull, William C., Brooklyn, N. Y. Shock-resisting glass. 1,632,363; June 14.

Burhans, William G., Kingston, N. Y. Oil filter. 1,632,461; June 14.

Burney, Charles D., assignor to Airship Guarantee Company Limited, Westminster, London, England. Lighter-than-air aircraft. 1,632,169; June 14.

Burrichter, John A., St. Paul, Minn. Greasless-doughnut machine. 1,632,115; June 14.

Burt, F. N., Company. (See Royal, Joseph N., assignor.)

Buss, Otto W. L., Minneapolis, Minn. Hinge. 1,632,116; June 14.

Buttigieg, John, Elgin, Ill. Spring motor. 1,632,693; June 14.

Caldwell, Truman S., assignor to Racine Horseshoe Tire Company, Racine, Wis. Tire. Des. 72,819; June 14.

Calhoun, George E. (See Wilkes, C. H., and Calhoun.)

Caloroll Burner Corporation. (See Grant, Albert E., assignor.)

Campbell, Charles A., Watertown, N. Y., assignor to The New York Air Brake Company. Triple valve. 1,632,756; June 14.

Campbell, Charles A., Watertown, N. Y., assignor to The New York Air Brake Company. Triple valve. 1,632,757; June 14.

Campbell, Lorn, jr., Minneapolis, Minn., assignor, by mesne assignments, to The Harris Calorific Company, Cleveland, Ohio. Regulator. 1,632,055; June 14.

Cameron, Edward, New York, N. Y. Oil-gas apparatus. 1,632,432; June 14.

Candee, Zenas P., assignor to The Waterbury Farrel Foundry and Machine Company, Waterbury, Conn. Power press. 1,632,462; June 14.

Capstaff, James A. (See Fletcher, A., jr., and Capstaff.)

Carpenter, Campbell C., assignor to U. S. Light & Heat Corporation, Niagara Falls, N. Y. Battery cell. 1,632,364; June 14.

Carpenter, Warren W., Queens, assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. 1,632,056; June 14.

Carman, Edwin S., East Cleveland, and E. E. Curtis, Lakewood, assignors to The Osborn Manufacturing Company, Cleveland, Ohio. Rotary brush. 1,631,998; June 14.

Carver, George W., Tuskegee, Ala. Producing paints and stains. 1,632,365; June 14.

Cascade Manufacturing Company. (See Kehoe, Michael J., assignor.)

Cascade Manufacturing Company. (See Kehoe, Thomas J. and M. J., assignors.)

Case, J. I., Threshing Machine Company. (See MacGregor, Wallace F., assignor.)

Castles, Thomas R., Portland, Oreg. Burglar alarm. 1,632,170; June 14.

Celite Company, The. (See Thatcher, Harry S., assignor.)

Centlivere, John L., Laramie, Wyo. Movable feature figure toy. 1,632,272; June 14.

Central Scientific Company. (See Klopsteg, P. E., and Sachse, assignors.)

Chaffin, Howard A., and F. C. Holmes, assignors to Enoz Chemical Company, Chicago, Ill. Sprayer. 1,632,218; June 14.

Chandler, Edwin M. S., Taunton, Mass. Storing drying oils. 1,631,999; June 14.

Chapman, John A., et al., trustees. (See Sommer, William H., assignor.)

Charles, Carl L., assignor, by mesne assignments, to H. M. Brune, C. E. Scarlett, and J. Fisher, trustees, Baltimore, Md. Railway-car truck. 1,632,117; June 14.

Chenowith, William H., and G. C. Schimpf, Curtis Bay, assignors to H. D. Harvey, Baltimore, Md. Melting furnace. 1,632,366; June 14.

Chesebrough, John L., et al. (See Midgley, Joseph, assignor.)

Chicago Pneumatic Tool Company. (See Davenport, Ransom W., assignor.)

Chicago Railway Equipment Company. (See Ekholm, Herbert W., assignor.)

Chilton, Roland, Keyport, N. J., assignor to Healey-Aeromarine Bus Company, Inc. Load-limiting clutch. 1,632,539; June 14.

Chinn, Howard T., Atascadero, Calif. Doll. 1,632,171; June 14.

Christiansen, Hans A., and L. E. Merrick, Agar, S. Dak. 1,632,367; June 14.

Christman, Peter J., jr., Green Bay, Wis. Machine for superimposing paper sheets. 1,632,433; June 14.

Cincinnati Shaper Company, The. (See Hazelton, Robert T., assignor.)

Clarinda Manufacturing Company. (See Criner, Harry J., assignor.)

Clark, George H., Washington, D. C., assignor, by mesne assignments, to Radio Corporation of America. Adjustment of wave lengths. Re. 16,651; June 14.

Clark, Henry R., Tarrant, Ala. Fertilizer distributor. 1,632,540; June 14.

Clark, William E., Mount Hood, Oreg. Retainer. 1,632,761; June 4.

Clause, William L., et al. (See Molony, S. B., and Nikaido, assignors.)

Cleveland Trust Company, trustee, The. (See Kaehni, Frank J. and W. L., assignors.)

Cleveland Trust Company, trustee, The. (See Pearson, Carl E., assignor.)

Clifford, Wiley C., Rochester, N. Y. Tool container. 1,632,172; June 14.

Clleson, Albert B., assignor, by mesne assignments, to The Prosperity Company, Inc., Syracuse, N. Y. Triple tandem-pressing-machine mechanism. 1,632,463; June 14.

Cloer, Walter J., Young Harris, Ga., assignor of one-half to W. M. Fain, Murphy, N. C. Plow. 1,632,388; June 14.

Clouse, H. S. (See Fenner, Miner E., assignor.)

Cobb, Chrystal, and C. C. Marshall, Akron, Ohio. Speed and direction indicator. 1,632,643; June 14.

Coe Manufacturing Company, The. (See Vance, Arthur J., assignor.)

Cohen, Irving H., assignor of one-half to I. D. Groak, Chicago, Ill. Lighting device. 1,632,173; June 14.

Coleman Automatic Transmission Company. (See Coleman, George B., assignor.)

Coleman, George B., Dayton, Ohio, assignor to Coleman Automatic Transmission Company, San Francisco, Calif. Automatic transmission. 1,632,694; June 14.

Coleman, George B., Dayton, Ohio, assignor to Coleman Automatic Transmission Company, San Francisco, Calif. Automatic transmission. 1,632,695; June 14.

Coleman, George B., Philadelphia, Pa., assignor to Coleman Automatic Transmission Company. Transmission. 1,632,696; June 14.

Colton, Stanley J., Binford, N. Dak. Trace carrier. 1,632,368; June 14.

Combustion Engineering Corporation. (See Bell, John E., assignor.)

Conger, Claude M., assignor to Irving Pitt Manufacturing Company, Kansas City, Mo. Loose-leaf-binder cover. 1,632,434; June 14.

Conklin, Roscoe G., Omaha, Nebr. Flagstaff. 1,632,726; June 14.

Conklin, William F., Tarentum, Pa. Electric socket switch. 1,632,174; June 14.

Conturier Company. (See Lemm, Frederick L., assignor.)

Cook, John T., Howell, assignor of one-half to F. J. Finch, Jackson, Mich. Window screen. 1,632,022; June 14.

Coon, Leslie E., Chatham, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Signaling system. 1,632,057; June 14.

Cooper, John W. (See Taylor, R., and Cooper.)

Cooper, William D., White Bear, assignor of forty-nine two-hundredths to H. Wellier and forty-nine two-hundredths to R. C. Sweet, St. Paul, Minn. Telegraph transmitting instrument. 1,632,273; June 14.

Coram, Roy E., Newark, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Secret signaling. 1,632,058; June 14.

Corson, Blake W. (See Dalton, J. T., and Corson.)

Cortes, Augusto J. D., New York, N. Y. Douche nozzle. 1,632,541; June 14.

Coultas, Wilbur J., assignor to Deere & Company, Moline, Ill. Clevis. 1,632,175; June 14.

Crain, John, Painesville, Ohio. Stove. 1,632,176; June 14.

Crannell, Orlo G., Lynn, Mass. Coupling means for chains. 1,632,697; June 14.

Craver, John E. (See Joerger, J. N., and Craver.)

Craveroller Company of America. (See Joerger, J. N., and Craver, assignors.)

Crawford, Henry B., et al. (See Lemon, Frank R., assignor.)

Crawford, Lulu L., et al. (See Lemon, Frank R., assignor.)

Crawford, Marquis L., Osceola, Ark. Automatic traffic signal for street crossings. 1,632,698; June 14.

Creed, Frederick G., Croydon, England. Electric transmitter for use in automatic telegraphy. 1,632,274; June 14.

Criner, Harry J., assignor to Clarinda Manufacturing Company, Clarinda, Iowa. Eccentric driving mechanism for power washing machines. 1,632,118; June 14.

Crompton, Francis M. (See Smith, Charles M., assignor.)
Crompton & Knowles Loom Works. (See Gordon, Albert A., assignor.)
Crompton & Knowles Loom Works. (See Ryon, Eppa H., assignor.)
Cross, John H., assignor to The Waterman-Waterbury Company, Minneapolis, Minn. Crescent radiator. 1,632,000; June 14.
Crossley Alfred, Washington, D. C., assignor to Wired Radio, Inc., New York, N. Y. Radio signaling system. 1,632,369; June 14.
Crowell, Emerson, Dalzell, S. Dak. Antiskid chain tightening device. 1,632,644; June 14.
Cruncleton, Fred L. (See Cruncleton, Lawrence and F. L.)
Cruncleton, Lawrence, and F. L., Pharr, Tex. Combined grating and spray for refrigerator cars. 1,632,370; June 14.
Cryder, Ray E. (See Holderman, S. J., and Cryder.)
Culver, Edward. (See Watson, F. B., and Culver.)
Curran, Stanley T. (See Mueller, E. C., jr., and Curran.)
Curtis, Austen M., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Alarm system. 1,632,059; June 14.
Curtis, Austen M., East Orange, N. J., assignor, by mesne assignments, to Western Electric Company, Incorporated. Signaling system. 1,632,275; June 14.
Curtis, Austen M., East Orange, N. J., assignor to Western Electric Company, Incorporated. Oscillation generating and supply system. 1,632,389; June 14.
Curtis, Edward E. (See Carman, E. S., and Curtis.)
Cushman, Frederick B., assignor to H. T. Cushman Mfg. Co., North Bennington, Vt. Combined smoker's stand and magazine rack. Des. 72,820; June 14.
Cushman, H. T., Mfg. Co. (See Cushman, Frederick B., assignor.)
Dahlman, Alfred, Ripple, Oreg. Undercutting-saw support. 1,632,727; June 14.
Dalton, John T., Durham, N. C., and B. W. Corson, Richmond, Va., assignors to The American Tobacco Company, New York, N. Y. Tobacco-stripping machine. 1,632,177; June 14.
Dalton, William, Glenville, N. Y., assignor to General Electric Company. Block flooring. 1,632,590; June 14.
Damon, Fred A., et al. (See Kurz, Robert F., assignor.)
Danielsson, Axel U. S., Ulfsunda, assignor to Aktiebolaget Atlas Diesel, Stockholm, Sweden. Compressed air starting device of internal-combustion engines. 1,632,023; June 14.
Darnell Walter R., Long Beach, Calif. Swivel caster with brake and lock. 1,632,435; June 14.
Davenport, Ransom W., Detroit, Mich., assignor to Chicago Pneumatic Tool Company, New York, N. Y. Cylinder lubrication. 1,632,119; June 14.
Davis, David C., Chester, Pa., assignor to Westinghouse Electric & Manufacturing Company. Demand meter. 1,632,120; June 14.
Davis, Dwight F., Secretary of War. (See Ragsdale, Earl J. W., assignor.)
Davis, Willard A., Cranston, assignor to S. & R. Lederer Co., Providence, R. I. Connecter for wrist-watch straps. 1,632,178; June 14.
De Causse, Frank, New York, assignor to H. H. Franklin Manufacturing Company, Syracuse, N. Y. Automobile radiator or the like. Des. 72,821; June 14.
Deere & Company. (See Coultas, Wilbur J., assignor.)
De la Torriente, Calixto, Habana, Cuba. Apparatus for catching flies. 1,632,276; June 14.
Delco-Remy Corporation. (See Bradford, Zerbe C., assignor.)
Deller, George E., Covington, Ky. Fire shutter. 1,632,219; June 14.
De Luna, Arturo, Buffalo, N. Y. Sanitary bedpan. 1,632,645; June 14.
Demarest, Thomas W., Pittsburgh, Pa., assignor to The Okadee Company, Chicago, Ill. Valve. 1,632,220; June 14.
Dempster Mill Manufacturing Co. (See Loeber, Herman M., assignor.)
Denney, Milo, Tipton, Mich. Strainer and dirt collector. 1,632,699; June 14.
Dennis, Calvin L., Glen Ridge, N. J. Fabric-testing machine. 1,632,591; June 14.
Dennison, Robert L., New York, N. Y. Fluid-pressure regulator. 1,632,024; June 14.
De Nordiske Fabriker, De-No-Fa A/S. (See Holmboe, Carl F., assignor.)
Deppe, William P. (See Parsons, C. E., and Stevenson, assignors.)
Desontter, Charles, London, England. Beading and the like. 1,632,277; June 14.
Detroit Hoist and Machine Company. (See Watson, Archibald S., assignor.)
De Voe, Albert H., Westfield, assignor to The Singer Manufacturing Company, Elizabeth, N. J. Hemmer. 1,631,956; June 14.
Dietz, Joseph M., Ridgway, Pa. Arctic. 1,632,390; June 14.
Dillon, James E. P., South Bend, Ind. Trash receptacle. 1,632,542; June 14.
Dinesen, Laurits, Minneapolis, Minn. Reciprocating pump. 1,632,436; June 14.
Doane, Leroy C., Meriden, assignor to The Miller Company, Meriden, Conn. Shade holder. 1,632,391; June 14.
Dodge, Adiel Y., South Bend, Ind., assignor to Bendix Brake Company, Chicago, Ill. Universal joint. 1,632,121; June 14.
Dougherty, John W., and W. E. Townley, Owensboro, Ky. Toilet article. 1,632,392; June 14.
Douglas, George, San Francisco, Calif. Nonwarping stove top. 1,632,060; June 14.
Douglass, Leon F., Menlo Park, Calif. Method and apparatus for producing variable image effects in photography. 1,632,221; June 14.
Douglass, Leon F., San Rafael, Calif. Producing colored photographic films. 1,632,278; June 14.
Dow, Alva M. (See Haskins, Arthur G., assignor.)
Drennan, James B., Portland, Oreg. Automobile body spring control apparatus. 1,632,728; June 14.
Duplex Transmission Company. (See Stumpenhorst, John A., assignor.)
Durchin, Andro, Kelayres, Pa. Direction indicator. 1,632,437; June 14.
Dustin, George E., Woodcliff, N. J., assignor to American Telephone and Telegraph Company. Automatic telephone system. 1,632,025; June 14.
Dutchess Tool Company. (See Van Houten, Frank H., assignor.)
Dvilnsky, Abraham, Brockton, Mass. Welted shoe and welt therefor. 1,632,768; June 14.
Dwyer, John E. (See Benham, W. T., and Dwyer.)
Dwyer, William C., and J. I. Mitchell, Auburn, N. Y., assignors to International Harvester Company, Chicago, Ill. Tractor harrow. 1,632,122; June 14.
Easter, John W., San Jose, Calif. Car coupling. 1,632,222; June 14.
Eastman, Ivan L., assignor to L. E. Eastman, Toledo, Ohio. Oil purifier. 1,632,001; June 14.
Eastman, Le Roy E. (See Eastman, Ivan L., assignor.)
Ebling, Paul F. (See Brockel, T. W., and Ebling.)
Eckles, Noble, San Diego, assignor of three-fourths to L. W. Rhode, Los Angeles, and one-fourth to C. Spreckels, San Diego, Calif. Carburetor. 1,632,279; June 14.
Edelson, Samuel, New York, N. Y. Door lock. Des. 72,822; June 14.
Edison Electric Appliance Company. (See Simmons, Albert H., assignor.)
Edmands, John W., Newton, Mass. Railway signal torpedo. 1,632,464; June 14.
Elna Brass Manufacturing Company, The. (See Grantland, John W., assignor.)
Egry Register Company, The. (See Jackson, Philip A., assignor.)
Ekholm, Herbert W., assignor to Chicago Railway Equipment Company, Chicago, Ill. Brake-beam guide. 1,632,061; June 14.
Electric Auto-Lite Company, The. (See Sippel, E. H., and Wright, assignors.)
Electric Refrigeration Corporation. (See Fiske, Jonathan P. B., assignor.)
Electro Metallurgical Company. (See Jacobs, Charles B., assignor.)
Elkin, Catherine H., et al. (See Threefoot, L., and Elkin, assignors.)
Elkin, George W. (See Threefoot, L., and Elkin.)
Elkin, George W., et al. (See Threefoot, L., and Elkin, assignors.)
Elkin, Mary, et al. (See Threefoot, L., and Elkin, assignors.)
Elliott Addressing Machine Company. (See Gray, Elmer E., assignor.)
Elliott, Frank W. (See Evins, Dossa D., assignor.)
Else, Harry D., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Reduction-gear transmission. 1,632,123; June 14.
Emory, Francis F., Leominster, Mass. Steam separator. 1,632,280; June 14.
Engel, Albert W., Chicago, Ill. Album. 1,632,002; June 14.
Enoz Chemical Company. (See Chaffin, H. A., and Holmes, assignors.)
Esau, George W., Milwaukee, Wis. Desk calendar. 1,632,393; June 14.
Eskholme, John W., East Orange, N. J., assignor to Red Star Appliances, Inc., New York, N. Y. Stamp-canceling machine. 1,632,281; June 14.
Ev-Air-Tight Calking Co. (See Pedrick, Howard A., assignor.)
Evins, Dossa D., assignor to F. W. Elliott, Davenport, Iowa. Attachment for chiropractic tables. Re16,653; June 14.
Ewing, William B., Chicago, Ill. Steam generator. 1,632,438; June 14.
Fairchild, Walter L., New York, N. Y. Apparatus for producing pneumatic tubes. 1,632,394; June 14.
Fairley, William, Oakland, Calif. Window construction. 1,632,700; June 14.
Faison, William A. (See Blue, Louis V., assignor.)
Farmer, George W., Oakland, Calif. Station indicator. 1,632,465; June 14.
Farmer, Percy L. (See Triay, E. J., jr., and Farmer.)
Farrington, John F., Flushing, assignor to Western Electric Company, Incorporated, New York, N. Y. Two-way wave transmission system. 1,632,282; June 14.
Farris, Farris E. (See Brown, Jackson W., assignor.)
Feagans, John E., Dresden, Ohio. Railroad tie truss. 1,632,466; June 14.

Fellows, John W., Arlington, assignor to Boston Woven Hose & Rubber Co., Cambridge, Mass. Resilient wearing surface. 1,632,395; June 14.
Fenner, Miner E., assignor of one-half to H. S. Clouse, Sumner, Nebr. Haystacker. 1,632,743; June 14.
Ferguson, John G., Brooklyn, assignor to Western Electric Company, Incorporated, New York, N. Y. Regulator. 1,632,062; June 14.
Fernald, Mark E., Southboro, Mass., assignor to C. C. Blake, Incorporated, Boston, Mass. Cutting leaders, gears, or racks. 1,632,396; June 14.
Fey, Howard M., San Antonio, Tex. Cam-shaft control. 1,632,223; June 14.
Field, Herbert D. (See McCrystal, Robert C., assignor.)
Finch, Frank J. (See Cook, John T., assignor.)
Finch, Harry, Inglewood, Calif., assignor to Allied Metal Industries, Inc. Chandelier. Des. 72,823; June 14.
Finch, Harry, Inglewood, Calif., assignor to Allied Metal Industries, Inc. Lighting-fixture bracket. Des. 72,824; June 14.
Firestone Tire and Rubber Company, The. (See Jones, Robert R., assignor.)
Fish, Frederick K., jr., San Francisco, Calif. Process and apparatus for making pulp from fibrous material. 1,632,407; June 14.
Fisher, Janon, et al, trustees. (See Charles, Carl L., assignor.)
Fisk Rubber Company, The. (See Pratt, Benjamin H., assignor.)
Fiske, Jonathan P. B., assignor, by mesne assignments, to Electric Refrigeration Corporation, Detroit, Mich. Cooling unit. 1,632,283; June 14.
Fitzsimmons, James W., Oakland, Calif. Matrix scorcher. 1,632,646; June 14.
Fletcher, Andrew, jr., Morristown, and J. A. Capstaff, Grantwood, N. J. Steampship-driving mechanism. 1,632,543; June 14.
Fletcher, Squire F., and H. J. Smith, Lowell, Ind. Dirigible headlight construction for automobiles. 1,632,224; June 14.
Fliederbaum, Solomon. (See Sachs, M., and Fliederbaum.)
Fluor Construction Co. (See Fluor, John S., assignor.)
Fluor, John S., assignor to Flour Construction Co., Los Angeles, Calif. Cooling tower. 1,632,397; June 14.
Flournoy, Josiah. (See Treadwell, A. P., and Flournoy.)
Foans, Andrew B., New York, N. Y. Football-playing device. 1,632,439; June 14.
Foerster, Herman, assignor of one-half to D. M. Allred Indianapolis, Ind. Detonating toy. 1,632,179; June 14.
Follett, James M., and L. Lehner, Bay City, Mich. Clean-out router bit. 1,632,440; June 14.
Fonda, Gorton R., Schenectady, N. Y., assignor to General Electric Company. Incandescent lamp. 1,632,647; June 14.
Fondevila, Antonio, Chicago, Ill. Drive gearing. 1,632,468; June 14.
Foote, Edward B., and F. W. Stalker, assignors to Taylor Instrument Companies, Rochester, N. Y. Hygrometric apparatus. 1,632,720; June 14.
Forchheimer, Julius, Newark, N. J. Toy set. 1,632,441; June 14.
Forged Steel Wheel Company. (See Naugle, H. M., and Townsend, assignors.)
Forrest, Andrew, and G. M. Smith, Chicago, Ill. Metal-casting apparatus. 1,632,469; June 14.
Forrest, Thomas W. W., assignors to Sun-Maid Raisin Growers of California, Fresno, Calif. Apparatus for drying berries. 1,632,180; June 14.
Fortier, James J., Grand Rapids, Mich. Automatic liquid-weighing machine. 1,631,957; June 14.
Foster, Theodore W., & Brother Company. (See Noble, Arthur H., assignor.)
Fostoria Glass Co. (See Bottome, Edgar M., assignor.)
Fostoria Glass Co. (See Greenan, Frank D., assignor.)
Fostoria Glass Company. (See Magee, William H., assignor.)
Fowler, Clarence B., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone system. 1,632,063; June 14.
Fox, Richard W., Birmingham, Ala. Tire-repair scraper. 1,632,544; June 14.
Francis, Jacob R. (See Redmond, Albert G., assignor.)
Franklin, H. H., Manufacturing Company. (See De Causse, Frank, assignor.)
Franklin Pottery. (See Schweiker, Roy W., assignor.)
Franklin Railway Supply Company. (See Zouck, George H., assignor.)
Franks, Clem H., La Grange, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Producing tubular articles from pulpous material. 1,632,398; June 14.
Freiberg, Theodore, Prescott, Ariz. Ore crusher. 1,632,124; June 14.
Froman, John W., South Carlton, Australia. Furnace. 1,632,730; June 14.
French, Charles A., and L. E. Golt, assignors to International Harvester Company, Chicago, Ill. Boiler regulator. 1,632,125; June 14.
French, Henry G., Schenectady, N. Y., assignor to General Electric Company. Electric switch. 1,632,592; June 14.
Fryn, Brassert & Company. (See Willcox, Frederick H., assignor.)
Froesch, Charles. (See Masury, A. F., and Froesch.)
Fulweiler, Walter H., Wallingford, and C. W. Jordan, Norwood, assignors to The U. G. I. Contracting Company, Philadelphia, Pa. Purifying gas. 1,632,758; June 14.
Fusion Welding Corporation. (See Green, J. Birchard, assignor.)
Gain, William M. (See Cloer, Walter J., assignor.)
Gal-man, Henry J., New York, and C. Schumacher, Lynnbrook, N. Y., assignors to Autan Corporation, Dover, Del. Blade-backing machine. 1,632,593; June 14.
Gammeter, John R., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Fastening device for shoes and the like. 1,632,064; June 14.
Gardiner, Arthur, Midland Junction, Western Australia, Australia. Shears. 1,632,284; June 14.
Gardner, Kenneth C., assignor to The Greenville Steel Car Company, Greenville, Pa. Crosstie for railway cars. 1,632,181; June 14.
Gatchell, Frederick D., New York, N. Y. Grease can or cartridge. 1,632,594; June 14.
Gaynor, Joseph, Jersey City, N. J. Finger grip for violin bows. 1,632,003; June 14.
Geiger, Ulysses S., North English, Iowa. Starting device. 1,632,399; June 14.
Gellenbeck, Benjamin G. (See Gellenbeck, Henry F., E. J., and D. G.)
Gellenbeck, Edward J. (See Gellenbeck, Henry F., E. J., and B. G.)
Gellenbeck, Henry F., E. J., and B. G., Tacoma, Wash. Intermittent absorption refrigerating system. 1,632,701; June 14.
General Electric Company. (See Bahr, Fritz, assignor.)
General Electric Company. (See Dalton, William, assignor.)
General Electric Company. (See Fonda, Gorton, R., assignor.)
General Electric Company. (See French, Henry G., assignor.)
General Electric Company. (See Hobart, Henry M., assignor.)
General Electric Company. (See Jackson, James A., assignor.)
General Electric Company. (See Jones, Benjamin W., assignor.)
General Electric Company. (See Mitchell, L. E., and White, assignors.)
General Electric Company. (See Prince, David C., assignor.)
General Electric Company. (See Rich, Theodore A., assignor.)
General Electric Company. (See Rogivue, Carl, assignor.)
General Electric Company. (See Schombourger, Lucien, assignor.)
General Electric Company. (See Schrage, Hilde K., assignor.)
General Electric Company. (See Selz, Walter, assignor.)
General Electric Company. (See Severin, Carl, assignor.)
General Electric Company. (See Willhelm, Raoul, assignor.)
General Fuel Briquette Corp., The. (See Zwoyer, Ellsworth B. A., assignor.)
Gent, Edgar W., Morristown, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Pneumatic relay. 1,631,958; June 14.
Georgi, John J., West Orange, N. J. Gas generator. 1,632,285; June 14.
Gerlach, Fred, et al., trustees. (See Graham, William S., assignor.)
Gershovitz, Barnett, Canton, Ohio. Combined mop and wringer. 1,632,470; June 14.
Gherassimoff, Nicolas, Le Vesinet, France. Wheel tire. 1,632,731; June 14.
Gibbons, Willis A. (See Hopkinson, E. and Gibbons.)
Giddings, Lawson H., Pasadena, Calif. Electric furnace. 1,632,126; June 14.
Gilborn, Ernest, Newark, N. J. Rupture or hernia truss. 1,632,065; June 14.
Gillam, Wallace R., Tallmadge, assignor to Lambert Tire & Rubber Co., Barberton, Ohio. Tire. Des. 72,825; June 14.
Gillam, Wallace R., Tallmadge, assignor to Lambert Tire & Rubber Co., Barberton, Ohio. Tire. Des. 72,826; June 14.
Gillen, William H., Milwaukee, Wis. Water barrier. 1,632,545; June 14.
Gillette Rubber Company. (See Hutchens, H. O., and Krause, assignors.)
Gilman, George H., Belmont, Mass. Drilling machine. 1,632,400; June 14.
Gilman, George W., Attleboro, Mass., assignor, by mesne assignments, to The Parker Pen Company, Janesville, Wis. Pencil. 1,632,371; June 14.
Girardier, Wilton A., and B. B. Hibbard, St. Clair, Mo. Governor for gas engines. 1,632,471; June 14.
Glass, Clifton A., Kansas City, Mo. Oil tank. 1,631,959; June 14.
Golt, Laurance E. (See French, C. A., and Golt.)
Goodman, Harry, Britton, Okla. Dirigible headlight for motor vehicles. 1,632,026; June 14.
Goodrich, B. F., Company, The. (See Gammeter, John R., assignor.)
Goodrich, B. F., Company, The. (See Work, B. G., and Slade, assignors.)

Goodroe, James W., Experiment, Ga. Machine for opening and preparing cotton. 1,632,372; June 14.
Goodstein, William L., Waynesburg, Pa. Motor-vehicle lamp. 1,632,127; June 14.
Goodyear Tire & Rubber Company, The. (See Steere, Samuel A., assignor.)
Gordon, Albert A., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Warp-end holder for warp beams. 1,632,472; June 14.
Gordon, Max, Paterson, N. J. Weigher for coal and similar material. 1,632,595; June 14.
Gordon, Robert R. (See Jones, C. W., and Gordon.)
Gorham Mfg. Co. (See Magnussen, Erik, assignor.)
Gould Car Lighting Corporation. (See Bouche, W. F., and Blake, assignors.)
Gragg, Robert L. (See Stripling, Luke S., assignor.)
Graham, William S. Canton, assignor, by mesne assignments, to F. Gerlach and A. B. Keller, trustees, Chicago, Ill. Depth adjuster for plows. 1,632,128; June 14.
Graham, Willie, Houston, Tex. Concrete-molding machine. 1,632,286; June 14.
Grahame, Dallas F., Toronto, Ontario, Canada, assignor, by mesne assignments, to Riley Stoker Corporation, Worcester, Mass. Stoker-ram drive. 1,632,401; June 14.
Grant, Albert E., New York, N. Y., assignor to Caloroil Burner Corporation. Oil burner. 1,632,402; June 14.
Grantler, Leslie V., assignor to McCord Radiator & Mfg. Co., Detroit, Mich. Vapor-cooling system. 1,632,596; June 14.
Grantland, John W., assignor to The Edna Brass Manufacturing Company, Cincinnati, Ohio. Gauge cock. 1,632,403; June 14.
Grasselli Dyestuff Corporation. (See Kränzlein, G., and Voss, assignors.)
Grasselli Dyestuff Corporation. (See Thiess, K. Müller, Runne, and Schaeffer, assignors.)
Grassmann, Peter, Berlin, Germany. Loud speaker for wireless telephony and other purposes. 1,632,287; June 14.
Gray, Elmer E., Lynn, Mass., assignor, by mesne assignments, to Elliott Addressing Machine Company. Envelope-sealing device. 1,632,648; June 14.
Green, J. Birchard, assignor to Fusion Welding Corporation, Chicago, Ill. Welding rod. 1,632,546; June 14.
Green, Jack, Norfolk, Va. Lawn-edge trimmer. 1,632,129; June 14.
Green, Jack, Norfolk, Va. Clamp for containers. 1,632,732; June 14.
Greenan, Frank D., assignor to Fostoria Glass Co., Moundsville, W. Va. Goblet. Des. 72,827; June 14.
Greenland, Walter R., Los Angeles, Calif. Ink dispenser. 1,632,473; June 14.
Greenville Steel Car Company, The. (See Gardner, Kenneth C., assignor.)
Griffin, James T., Oak Park, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Cementing material. 1,632,404; June 14.
Grigsby-Grunow-Hinds Co. (See Grigsby, Owen E., assignor.)
Grigsby, Owen E., Park Ridge, assignor to Grigsby-Grunow-Hinds Co., Chicago, Ill. Automobile windshield visor. 1,632,474; June 14.
Groak, Irwin D. (See Cohen, Irving H., assignor.)
Grosvenor, Graham B., Chicago, Ill., assignor to Otis Elevator Company, Jersey City, N. J. Electric elevator system. 1,632,225; June 14.
Grosvenor, Graham B., Chicago, Ill., assignor to Otis Elevator Company, Jersey City, N. J. Electric elevator system. 1,632,226; June 14.
Grubb, Willard T., Springfield, Ill. Golf bag. 1,632,442; June 14.
Guinzburg, Victor, assignor to I. B. Kleinert Rubber Company, New York, N. Y. Combined brassière and dress shield. 1,632,547; June 14.
"H H" Manufactures, Inc. (See Hawkins, Roe C., assignor.)
H-R Manufacturing Company. (See Hill, G. S., and Saxton, assignors.)
Haddock, Arthur, East Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Condenser. 1,632,130; June 14.
Hague, Alfred E., Brooklyn, assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone system. 1,632,066; June 14.
Hahn, Edgar. (See Lubberger, F., and Hahn.)
Hake, Frank W., Philadelphia, Pa. Derrick crane. 1,632,329; June 14.
Hall, Theodore, assignor to The Sperry Gyroscope Company, Brooklyn, N. Y. Searchlight. 1,632,131; June 14.
Hall, Thomas F., Omaha, Nebr. Berry harvester. 1,632,597; June 14.
Hall, Zachariah A., Hespeler, Ontario, Canada. Hockey stick. 1,631,960; June 14.
Hall's Safe Company, The. (See Benham, W. T., and Dwyer, assignors.)
Halsey, Charles W., Evansville, Ind. Resilient grip for implement handles. 1,632,227; June 14.
Hammer, Samuel, Brooklyn, assignor to United Metal Box Company, Inc., Long Island City, N. Y. Metal receptacle. 1,632,702; June 14.
Hammer, Samuel, Brooklyn, assignor to United Metal Box Co. Inc., Long Island City, N. Y. Metal receptacle. 1,632,733; June 14.
Hammer, Samuel, Brooklyn, assignor to United Metal Box Co. Inc., New York, N. Y. Metal receptacle. 1,632,734; June 14.
Hammer, Samuel, Brooklyn, N. Y., assignor to United Metal Box Co., Inc., Long Island City, N. Y. Metal receptacle. 1,632,762; June 14.
Hampton, Leon N., assignor to Western Electric Company, Incorporated, New York, N. Y. Cutting device. 1,632,004; June 14.
Hampton, Leon N., assignor to Western Electric Company, Incorporated, New York, N. Y. Clearance gauge. 1,632,067; June 14.
Hansen, Charles C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Steel retainer. 1,632,373; June 14.
Hansen, Conrad T., Detroit, Mich., assignor to The American Motor Body Corporation, Philadelphia, Pa. Window stop. 1,632,132; June 14.
Harding, Charles D., Beloit, Wis. Device for controlling both the ignition circuit and the supply of gas to the carburetor. 1,632,133; June 14.
Harris Calorific Company, The. (See Campbell, Lorn, jr., assignor.)
Harrison, Arthur W., assignor of one-half to J. E. Osborne, Los Angeles, Calif. Vehicle. 1,632,405; June 14.
Harrison, Henry C., Port Washington, assignor to Western Electric Company, Incorporated, New York, N. Y. Phonic diaphragm. 1,632,068; June 14.
Harrison, Henry C., Port Washington, assignor to Western Electric Company, Incorporated, New York, N. Y. Electromagnetic device. 1,632,134; June 14.
Hart, David M., New York, N. Y. Hat protector. 1,632,598; June 14.
Hartley, Ralph V. L., South Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Wave transmission system. 1,632,069; June 14.
Hartman Electrical Manufacturing Company. (See Hartman, Frank O., assignor.)
Hartman, Frank O., assignor to Hartman Electrical Manufacturing Company, Mansfield, Ohio. Variable condenser. 1,632,649; June 14.
Hartman, Frank O., assignor to Hartman Electrical Manufacturing Company, Mansfield, Ohio. Variable condenser. 1,632,650; June 14.
Hartman, Louis H., assignor to The Valve Bag Company of America, Toledo, Ohio. Affixing reenforcing tape. 1,632,005; June 14.
Hartmann Trunk Company. (See Rasmussen, Martin, assignor.)
Harvey, Harry D. (See Chenowith, W. H., and Schimpf, assignors.)
Haskins, Arthur G., Weymouth, assignor to A. M. Dow, Braintree, Mass. Dishwashing machine. 1,632,182; June 14.
Haughton Elevator & Machine Co., The. (See Thurston, Ernest B., assignor.)
Havener, Arthur R., Wayland, assignor to Judson L. Thomson Manufacturing Co., Waltham, Mass. Fastener-setting mechanism. 1,632,374; June 14.
Hawes, Harold B., Fairfield, Conn. Glass structure. 1,632,330; June 14.
Hawkins, Lon A. (See Barger, W. R., Hawkins, and Blatz.)
Hawkins, Roe C., assignor to "H H" Manufactures, Inc., Long Beach, Calif. Drawbar attachment for tractors. 1,632,070; June 14.
Hayes, Harvey C., Washington, D. C. Submarine sound receiver. 1,632,331; June 14.
Hayes, Harvey C., Washington, D. C. Electromagnetic sound reproducer. 1,632,332; June 14.
Hayes Wheel Company. (See Jacobi, Emil R., assignor.)
Hayes Wheel Company. (See Peterson, Emil J., assignor.)
Hays, Clinton, and W. M. Thomas, Denver, Colo. Valve-spring compressor. 1,632,288; June 14.
Hayward, George A., Watertown, Conn. Snap plug. 1,632,599; June 14.
Hazelton, Robert T., assignor to The Cincinnati Shaper Company, Cincinnati, Ohio. Shaper. 1,632,375; June 14.
Healey-Aeromarine Bus Company. (See Chilton, Roland, assignor.)
Healy, Edward C., Muscatine, Iowa. Window structure. 1,632,333; June 14.
Hedden, Viner J., East Orange, N. J. Operating device for bookkeeping machines and the like. 1,632,228; June 14.
Heiney, John W., Allentown, Pa., assignor to International Motor Company, New York, N. Y. Radiator mount. 1,631,961; June 14.
Heitmann, Moritz J., Freital-Potschappel, near Dresden, Germany. Emulsified solid grease. 1,632,027; June 14.
Hemleb, Martin, assignor to The Singer Manufacturing Company, Elizabeth, N. J. Shaft bearing. 1,631,962; June 14.
Hendry, William F., assignor to Western Electric Company, Incorporated, New York, N. Y. Electrode structure for electron-discharge devices. 1,632,135; June 14.
Henry, James N., Providence, R. I. Curtain-rod bracket. 1,632,071; June 14.
Henwood, Lloyd S., assignor to The National Store Specialty Co., Lancaster, Pa. Liquid-dispensing tank. 1,632,289; June 14.

Herrick, Ernest A., and T. L. MacBean, New York, N. Y. Bracing block. 1,632,072; June 14.
Herring-Hall-Marvin Safe Company. (See Breen, George T., assignor.)
Heydecker, William C., jr., New York, N. Y. Pressure-regulating valve. 1,632,406; June 14.
Heymer, Paul, Berlin-Reinickendorf-Ost, assignor to Hans Kollmorgen, Berlin-Charlottenberg, Germany. Instrument for the inspection of pipes, canals, and cavities of the human or animal body. 1,632,290; June 14.
Hibbard, Benjamin B. (See Girardier, W. A., and Hibbard.)
Hiering, William C., assignor to J. E. Mergott Co., Newark, N. J. Bag-frame hinges. 1,632,334; June 14.
Hiering, William C., assignor to J. E. Mergott Co., Newark, N. J. Articulated case for smokers' requisites. 1,632,335; June 14.
Hiering, William C., assignor to J. E. Mergott Co., Newark, N. J. Card container and desk tray. 1,632,336; June 14.
Hiering, William C., assignor to J. E. Mergott Co., Newark, N. J. Purse and like receptacle. 1,632,337; June 14.
Hight, Eugene S., Peoria, Ill., assignor to Power Specialty Company, New York, N. Y. Economizer boiler. 1,632,291; June 14.
Hill, George S., and A. C. Saxton, assignor to H-R Manufacturing Company, Chicago, Ill. Lock. 1,632,073; June 14.
Hines, James H., Hobart, Okla. Hair clipper. 1,632,183; June 14.
Hitt, Oscar, Weehawken, N. J. Toy automobile. Des. 72,828; June 14.
Hoagland, Frank O., Bridgeport, Conn., assignor, by mesne assignments, to Pratt & Whitney Company, New York, N. Y. Internal-grinding machine. 1,632,600; June 14.
Hobart, Henry M., Schenectady, N. Y., assignor to General Electric Company. Induction motor. 1,632,601; June 14.
Hoefler, Frederick W., Phoenix, N. Y. Display card for toilet-paper rolls. 1,632,475; June 14.
Hoffer, Fred A., Frankfort, N. Y. Holder for washing machines. 1,632,735; June 14.
Holderman, Samuel J., and R. E. Cryder, Morris, Ill. Student's portable desk. 1,632,476; June 14.
Holland, Louis E., Kansas City, Mo. Rotary sprinkler. 1,632,229; June 14.
Holm, John, Brooklyn, assignor to American Kron Scale Company, New York, N. Y. Recording weighing mechanism. 1,632,006; June 14.
Holmboe, Carl F., assignor of one-half to De Nordiske Fabriker, De-No-Fa A/S., Oslo, Norway. Cooling arrangement for electrolytic cells. 1,632,184; June 14.
Holmes, E. & B., Machinery Co. (See Beugler, Edwin F., assignor.)
Holmes, Frank C. (See Chaffin, H. A., and Holmes.)
Holst, Gilles, and A. Bouwers, assignors to N. V. Philips' Gloeilampenfabrieken, Eindhoven, Netherlands. X-ray tube. 1,632,230; June 14.
Holt, Thomas W., Elkhart, Ind., assignor, by mesne assignments, to The Adams & Westlake Company, Chicago, Ill. Sash guide. 1,632,548; June 14.
Holt, Thomas W., Elkhart, Ind., assignor, by mesne assignments, to The Adams & Westlake Company, Chicago, Ill. Sash guide. 1,632,549; June 14.
Holtz, William M., Shelton, Nebr. Fence. 1,632,231; June 14.
Honkanen, Oney A., Portland, Oreg. Propeller. 1,632,292; June 14.
Hopfield, Lewis D., Natoma, Calif., assignor to Taylor-Wharton Iron & Steel Company, High Bridge, N. J. Dredge tumbler. 1,632,602; June 14.
Hopkinson, Ernest, New York, and W. A. Gibbins, Little Neck, N. Y., said Gibbons assignor to The Naugatuck Chemical Company, Naugatuck, Conn. Treating rubber latex. 1,632,759; June 14.
Horn, Pleasant W. (See Patrick, N. M., and Horn.)
Horton, Edwin, Brooklyn, N. Y. Pin fastener. 1,632,338; June 14.
Houghton, Herbert H., Los Angeles, Calif., assignor, by mesne assignments, to The Bassick Manufacturing Company, Chicago, Ill. Valved coupling for lubricators. Re16,650; June 14.
House, Herman, Vancouver, British Columbia, Canada. Phonograph repeater. 1,632,477; June 14.
Housekeeper, William G., assignor to Western Electric Company, Incorporated, New York, N. Y. Control apparatus. 1,632,074; June 14.
Housekeeper, William G., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Winding machine. 1,632,075; June 14.
Hubbard, Elmer A., Flagstaff, Ariz. Flexible spotter for repairing tire casings. 1,632,651; June 14.
Hubbard, Francis A., Wyoming, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Determining inequalities in wall thickness of tubes. 1,632,076; June 14.
Hubbell, Alfred W., assignor of one-half to Phillips Petroleum Company, Bartlesville, Okla. Internal-combustion engine. 1,632,478; June 14.
Huberty, August, Canton, Ohio. Lawn trimmer. 1,632,479; June 14.
Humphris, Frank, Parkstone, assignor of one-half to K. A. Roberts, London, England. Machine for manufacturing nails, brads, or the like from wire, rod, or the like. 1,632,703; June 14.
Hunt, Harry L. and L. A., Bigelow, Mo. Pitman boxing. 1,632,480; June 14.
Hunt, Lincoln A. (See Hunt, Harry L. and L. A.)
Hutchens, Howard O., and A. R. Krause, assignors to Gillette Rubber Company, Eau Claire, Wis. Tire-tread-applying machine. 1,632,652; June 14.
I. G. Farbenindustrie Aktiengesellschaft. (See Miller, Alfred, assignor.)
Ikeda, Iwao, Sendai, Japan. Measuring maximum current. 1,632,136; June 14.
Independent Pneumatic Tool Company. (See Norling, Reinhold A., assignor.)
Ingersoll-Rand Company. (See Hansen, Charles C., assignor.)
Ingersoll-Rand Company. (See Peters, Arthur E., assignor.)
Ingersoll-Rand Company et al. (See Rathbun, Edward, assignor.)
International Harvester Company. (See Benjamin, B. R., and Webber, assignors.)
International Harvester Company. (See Dwyer, W. C., and Mitchell, assignors.)
International Harvester Company. (See French, C. A., and Golt, assignors.)
International Harvester Company. (See Pearson, Charles, assignor.)
International Harvester Company. (See Raney, Clemma R., assignor.)
International Motor Company. (See Heiney, John W., assignor.)
International Motor Company. (See Masury, A. F., and Froesch, assignors.)
International Motor Company. (See Wirrer, Gottfried, assignor.)
International Precipitations Company. (See Anderson, Evald, assignor.)
Irving-Pitt Manufacturing Company. (See Van Valkenburgh, Richard M., assignor.)
Ives, Herbert E., Montclair, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Transmission of pictures by electricity. 1,631,963; June 14.
Jablow, Charles, East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Guiding truck. 1,632,077; June 14.
Jacobi, Emil R., assignor to Hayes Wheel Company, Jackson, Mich. Joint for split rims and making the same. 1,632,550; June 14.
Jacobi, Frank. (See Bradley, H. T., and Jacobi.)
Jacobs, Charles B., Wilmington, Del., assignor to Electro Metallurgical Company. Casting having chromium alloy surface. 1,632,704; June 14.
Jackson, James A., Schenectady, N. Y., assignor to General Electric Company. Electric-railway system. 1,632,653; June 14.
Jackson, James E., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Stock-fitting machine. 1,632,232; June 14.
Jackson, Joseph R., jr., Boston, Mass., assignor to A. B. See Elevator Company, Inc., New York, N. Y. Elevator system. 1,632,376; June 14.
Jackson, Minnesota B., Guthrie, Okla. Body garment. 1,632,137; June 14.
Jackson, Philip A., assignor to The Egry Register Company, Dayton, Ohio. Autographic register. 1,632,443; June 14.
Jameson, Percy R., assignor to Taylor Instrument Companies, Rochester, N. Y. Barometer-setting means. 1,632,736; June 14.
Jammer, Jacob S., assignor to Western Electric Company, Incorporated, New York, N. Y. Signaling system. 1,632,078; June 14.
Jarrett, Brooke L. (See Stuart, Wallace A., assignor.)
Jellinek, Charles, et al. (See Pecker, Joseph S., assignor.)
Jenkins, George M. O., London, England, assignor to Western Electric Company, Incorporated, New York, N. Y. Pneumatic valve. 1,632,079; June 14.
Jenks, John S., Pittsburgh, Pa. Washing machine. 1,632,407; June 14.
Jenner, George O., assignor to Oxford Press Incorporated, Los Angeles, Calif. Mailing card. 1,632,185; June 14.
Jensen, Peter L. (See Pridham, E. S., and Jensen.)
Joerger, John N., and J. E. Craver, Atlantic City, N. J., assignors to Craveroiler Company of American, Philadelphia, Pa. Lubricating system for internal-combustion engines. 1,632,654; June 14.
Johnson Automobile Lock Co. (See Johnson, Colvin L., assignor.)
Johnson, Colvin L., Chicago, Ill., assignor to Johnson Automobile Lock Co. Automobile lock. 1,632,655; June 14.
Johnson, Colvin L., assignor to Johnson Automobile Lock Co., St. Louis, Mo. Transmission-housing cover-locking means. 1,632,656; June 14.
Johnson, Ernest G., Boston, assignor, by mesne assignments, to The Palmer Electric and Manufacturing Company, Cambridge, Mass. Relay. 1,632,186; June 14.
Johnson, Herman M., Portland, Oreg. Coin-controlled optical instrument. 1,632,377; June 14.
Johnson, James T., Birmingham, Ala. Picture frame. 1,632,138; June 14.

Johnson, John B., Elmhurst, assignor to Western Electric Company, Incorporated, New York, N. Y. Electric discharge device. 1,632,080; June 14.

Johnson, John G., Tacoma, Wash. Stuffing box. 1,632,293; June 14.

Johnson, Theodore G., Kansas City, Mo. Convertible seat for motor vehicles. 1,632,233; June 14.

Johnston, William A. (See Baldwin, R. S., and Johnston.)

Jones, Benjamin W., Schenectady, N. Y., assignor to General Electric Company. Motor control. 1,632,603; June 14.

Jones, Charles W., Richmond, and R. R. Gordon, Glenallen, Va. Railroad spike. 1,632,294; June 14.

Jones, Ira M., assignor to C. A. Bechstein and E. E. Kornitz, Milwaukee, Wis. Apparatus for stretching skins and leather. 1,632,551; June 14.

Jones & Laughlin Steel Corporation. (See Jones, Wm. L., assignor.)

Jones, Robert R., assignor to The Firestone Tire and Rubber Company, Akron, Ohio. Apparatus for coating and drying fabric or the like. 1,632,760; June 14.

Jones, Sheldon L., Brooklyn, N. Y. Signaling device for automobiles. 1,632,081; June 14.

Jones, Wm. L., Pittsburgh, Pa., assignor to Jones & Laughlin Steel Corporation, Pittsburgh, Pa. Continuous mill and rolling structural shapes. 1,632,295; June 14.

Jopson, William G., Wellesley, Mass., assignor, by mesne assignments, to C. A. Reed Company, Williamsport, Pa. Shipping tag. 1,632,082; June 14.

Jordan, Claude W. (See Fulweiler, W. H., and Jordan.)

Judge, Joseph S., Brooklyn, N. Y. Waxer and polisher. 1,632,481; June 14.

Kaehni, Frank J. and W. L., assignors to The Cleveland Trust Company, trustee, Cleveland, Ohio. Sound-producing device. 1,632,408; June 14.

Kaehni, William L. (See Kaehni, Frank J. and W. L.)

Kalvig, Lewis J., Kanawha, Iowa. Poultry roost. 1,632,234; June 14.

Kasden, Natban, New York, and D. Pollack, Brooklyn, assignors to Majestic Metal Specialties, Inc., New York, N. Y. Vanity case. 1,631,964; June 14.

Katzander, Morris, et al. (See Pecker, Joseph S., assignor.)

Kaufman, Joseph, assignor to American Safety Razor Corporation, New York, N. Y. Container. 1,631,965; June 14.

Kaufman, Joseph, assignor to American Safety Razor Corporation, New York, N. Y. Container. 1,631,966; June 14.

Kaufman, Joseph, Bronxville, assignor to American Safety Razor Corporation, New York, N. Y. Container. 1,631,967; June 14.

Kauffman, Paul C., Seattle, Wash. Marine compass bracket. Des. 72,829; June 14.

Keall, Frank B., Leicester, England, assignor to United Shoe Machinery Corporation, Paterson, N. J. Press. 1,632,235; June 14.

Kehl, Robert J., Newark, N. J., assignor to Oxweld Acetylene Company. Pressure-regulator casing. Des. 72,830; June 14.

Kehoe, Michael J. (See Kehoe, Thomas J. and M. J.)

Kehoe, Michael J., London, Ohio, assignor, by mesne assignments, to Cascade Manufacturing Company. Dishwashing machine. 1,632,007; June 14.

Kehoe, Thomas J., Toledo, and M. J. Kehoe, London, Ohio, assignors, by mesne assignments, to Cascade Manufacturing Company. Dishwashing machine. 1,631,968; June 14.

Keisling, Ira F., Kokomo, Ind. Door operator. 1,632,028; June 14.

Keith, Henry M., West Frankfort, Ill. Brushing machine. 1,632,705; June 14.

Keller, Arnold B., et al., trustees. (See Graham, William S., assignor.)

Keller Mechanical Engineering Corporation. (See Shaw, John C., assignor.)

Kemp, Paul, and T. Kittl, Vienna, Austria. Bearing metal. 1,632,604; June 14.

Kern, Noah D., New Albany, Ohio. Cultivator. 1,632,706; June 14.

Klander, Anna M., executrix. (See Klander, Lawrence A.)

Klander, Lawrence A., deceased, New York, N. Y.; A. M. Klander, executrix. Bridge work. 1,632,744; June 14.

Kleckhefer, Edwin F., Milwaukee, Wis. Cable equalizer. 1,632,083; June 14.

Kiefer, Kenneth H., Baltimore, Md. Extinguishing fires. 1,632,339; June 14.

Klen, Stanislaus, Rochester, N. Y. Securing means for rails. 1,632,605; June 14.

King, Chandler, Chattanooga, Tenn. Bottle. 72,831; June 14.

King, Ernest V., Topeka, Kans. Photographer's light-distributing means. 1,632,606; June 14.

Kinsey, Edmond E., San Angelo, Tex. Pump jack. 1,632,296; June 14.

Kipper, Herman B., Muskegon, Mich. Apparatus for speeding reactions. 1,632,340; June 14.

Kirk-Schneider, Hugo H., New York, N. Y. Mirror. 1,632,236; June 14.

Kittl, Theodor. (See Kemp, P., and Kittl.)

Klein, Max, Brooklyn, assignor to Shapiro & Aronson, Inc., New York, N. Y. Chandelier. Des. 72,832; June 14.

Klein, Max, Brooklyn, assignor to Shapiro & Aronson, Inc., New York, N. Y. Arm for lighting fixtures. 72,833; June 14.

Klein, Max, Brooklyn, assignor to Shapiro & Aronson, Inc., New York, N. Y. Canopy for lighting fixtures. 72,834; June 14.

Klein, Max, Brooklyn, assignor to Shapiro & Aronson, Inc., New York, N. Y. Wall bracket. 72,835; June 14.

Klein, Max, Brooklyn, assignor to Shapiro & Aronson, Inc., New York, N. Y. Bracket back for lighting fixtures. 72,836; June 14.

Klein, Max, Brooklyn, assignor to Shapiro & Aronson, Inc., New York, N. Y. Wall bracket. 72,837; June 14.

Klein, Max, Brooklyn, assignor to Shapiro & Aronson, Inc., New York, N. Y. Bracket back for lighting fixtures. 72,838; June 14.

Klein, Max, Brooklyn, assignor to Shapiro & Aronson, Inc., New York, N. Y. Lighting fixture. 72,839; June 14.

Klein, Max, Brooklyn, assignor to Shapiro & Aronson, Inc., New York, N. Y. Wall bracket. 72,840; June 14.

Klein, Max, Brooklyn, assignor to Shapiro & Aronson, Inc., New York, N. Y. Bracket back for lighting fixtures. 72,841; June 14.

Klein, Max, Brooklyn, assignor to Shapiro & Aronson, Inc., New York, N. Y. Bracket back for lighting fixtures. Des. 72,842; June 14.

Klein, Max, Brooklyn, assignor to Shapiro & Aronson, Inc., New York, N. Y. Lighting fixture. Des. 72,843; June 14.

Klein, Max, Brooklyn, assignor to Shapiro & Aronson, Inc., New York, N. Y. Arm for lighting fixtures. Des. 72,844; June 14.

Klein, Max, Brooklyn, assignor to Shapiro & Aronson, Inc., New York, N. Y. Plate for lighting fixtures. Des. 72,845; June 14.

Klein, Max, Brooklyn, assignor to Shapiro & Aronson, Inc., New York, N. Y. Wall bracket. Des. 72,846; June 14.

Klein, Max, Brooklyn, assignor to Shapiro & Aronson, Inc., New York, N. Y. Bracket back for lighting fixtures. Des. 72,847; June 14.

Klein, Max, Brooklyn, assignor to Shapiro & Aronson, Inc., New York, N. Y. Wall bracket. Des. 72,848; June 14.

Klein, Max, Brooklyn, assignor to Shapiro & Aronson, Inc., New York, N. Y. Bracket back for lighting fixtures. Des. 72,849; June 14.

Klein, Max, Brooklyn, assignor to Shapiro & Aronson, Inc., New York, N. Y. Wall bracket. Des. 72,850; June 14.

Klein, Max, Brooklyn, assignor to Shapiro & Aronson, Inc., New York, N. Y. Wall bracket. Des. 72,851; June 14.

Klein, Max, Brooklyn, assignor to Shapiro & Aronson, Inc., New York, N. Y. Ceiling light. Des. 72,852; June 14.

Klein, Max, Brooklyn, assignor to Shapiro & Aronson, Inc., New York, N. Y. Ceiling light. Des. 72,853; June 14.

Klein, Max, Brooklyn, assignor to Shapiro & Aronson, Inc., New York, N. Y. Lighting fixture. Des. 72,854; June 14.

Klein, Max, Brooklyn, assignor to Shapiro & Aronson, Inc., New York, N. Y. Lighting fixture. Des. 72,855; June 14.

Kleinert, I. B., Rubber Company. (See Guinzburg, Victor, assignor.)

Kleinschmidt, Edward E., Brooklyn, N. Y., assignor, by mesne assignments, to Morkrum-Kleinschmidt Corporation, Chicago, Ill. Printing telegraphy. 1,632,297; June 14.

Kleinschmidt, Edward E., Brooklyn, N. Y., assignor, by mesne assignments, to Morkrum-Kleinschmidt Corporation, Chicago, Ill. Signaling transmitter. 1,632,298; June 14.

Kloehs, Gustav H., Philadelphia, Pa. Cipherless device for pipe organs. 1,632,657; June 14.

Klopsteg, Paul E., and H. P. Sachse, assignors to Central Scientific Compay, Chicago, Ill. Mercurial barometer. 1,632,084; June 14.

Knauber, Albert P., Milwaukee, Wis. Rowboat motor. 1,632,444; June 14.

Koch, John, Eustis, Nebr. Feed grinder. 1,632,341; June 14.

Koch, Lydia B., assignor to Reinforced Paper Bottle Corporation, New York, N. Y. Bottle. 1,632,187; June 14.

Koenig, Alphonso L., Chicago, Ill., assignor to The Koenig Carbonators, (Inc.). Carbonator. 1,632,409; June 14.

Koenig Carbonators, (Inc.), The. (See Koenig, Alphonso L., assignor.)

Koenig, Remus, assignor to Metal Ware Corporation, Two Rivers, Wis. Toy electric range. 1,632,445; June 14.

Kogge, Arthur H., Jersey City, N. J. Display device. 1,632,607; June 14.

Kollmorgen, Hans. (See Heymer, Paul, assignor.)

Kornitz, Ewald E., et al. (See Jones, Ira M., assignor.)

Kränzlein, Georg, and A. Voss, Hochst-on-the-Main, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y. Preparation of magnesium chromates. 1,632,299; June 14.

Krause, Arnold R. (See Hutchens, H. O., and Krause.)

Krause, Arthur R., Woodhaven, and F. W. Mathieu, New York, N. Y. Lamp shade or analogous article of manufacture. Des. 72,856; June 14.

Krause, Arthur R., Woodhaven, and F. W. Mathieu, New York, N. Y. Lamp shade or analogous article of manufacture. Des. 72,857; June 14.

Krause, Arthur R., Woodhaven, and F. W. Mathieu, New York, N. Y. Lamp shade or analogous article of manufacture. Des. 72,858; June 14.

Krause, Arthur R., Woodhaven, and F. W. Mathieu, New York, N. Y. Lamp shade or analogous article of manufacture. Des. 72,859; June 14.

Krenzler, Emil, Barmen, Germany. Braiding machine. 1,632,608; June 14.

Kroells, Eugene O., Paso Robles, Calif. Sleeve puller for automobiles. 1,632,482; June 14.

Krueger, Herman W., assignor to Northern Corrugating Co., Green Bay, Wis. Dispensing cabinet. 1,632,446; June 14.

Kuehner, Arthur T., St. Augustine, Fla. Journal box. 1,632,552; June 14.

Kurscheidt, Peter J., Woodhaven, and H. E. Norwood, Brooklyn, assignors, by mesne assignments, to Perfect Window Regulator Corporation, Long Island City, N. Y. Clutch. 1,632,763; June 14.

Kurz, Robert F., New Haven, Conn., assignor of two-thirds to F. A. Damon and one-third to F. Starita, New Haven, Conn. Box-nailing machine. 1,632,085; June 14.

Kuxmann & Co. Komm.-Akt.-Ges. (See Schnath, Heinrich, assignor.)

Lambert, Cecil R., Company, The. (See Moon, Charles L., asignor.)

Lambert Tire & Rubber Co. (See Gillam, Wallace R., assignor.)

Lambert, Victor, Brooklyn, assignor to A. M. Sloss, New York, N. Y. Coffeepot. 1,632,342; June 14.

Landers, Frary & Clark. (See Smart, Joseph F., assignor.)

Landers, Frary & Clark. (See Warner, Alonzo A., assignor.)

Lane, Charles, Jefferson, Wis. Disappearing headrest. 1,632,737; June 14.

Lane, Moses R., Ardmore, Pa. Apparatus for supporting lawn-tennis nets and the like. 1,632,553; June 14.

Larson, Swan, assignor to Geo. D. Roper Corporation, Rockford, Ill. Pump. 1,632,029; June 14.

Lawson, Lindley S., Pittsburgh, Pa. Radiant heater. Des. 72,860; June 14.

Lederer, S. & B., Co. (See Davis, Willard A., assignor.)

Lee, Nixon, Brooklyn, N. Y. Closure. 1,632,086; June 14.

Lee, Thomas L., assignor to North East Electric Company, Rochester, N. Y. Electrical instrument. 1,632,609; June 14.

Leedy Manufacturing Company. (See Winterhoff, Herman E., assignor.)

Le Fever, Talmage H., New Bloomfield, Mo. Cranking device for automobiles. 1,632,300; June 14.

Lehner, Louis. (See Follett, J. M., and Lehner.)

Lemm, Frederick L., assignor to Conturier Company, La Porte, Ind. Key device for saxophones. 1,632,008; June 14.

Lemoine, Louis, assignor to Société Anonyme d'Applications des Gaz Liquéfiés, Paris, France. Device for closing compressed or liquid gas cylindera. 1,632,447; June 14.

Lemon, Frank R., Vicksburg, Mich., assignor of one-third to H. B. and L. L. Crawford. Door-operating mechanism. 1,632,237; June 14.

Leonhauser, Henry A., Baltimore, Md., assignor to The J. G. Brill Company, Philadelphia, Pa. Automatic slack adjuster. 1,631,969; June 14.

Leprestre, Rene. (See Miolati, Arturo, assignor.)

Lerner, Friedrich, Vienna, Austria. Paper-cutting machine. 1,632,378; June 14.

Lewerenz, Arthur, Berlin, assignor to the Firm Scherbius & Ritter, Wannsee, near Berlin, Germany. Instantaneous switch. Re16,654; June 14.

Lewis, Nathan R., Plainfield, assignor to The Babcock & Wilcox Company, Bayonne, N. J. Steam-boiler feed. 1,632,301; June 14.

Lewis, Richard J., Mohawk, assignor to Remington Typewriter Company, Ilion, N. Y. Typewriting machine. 1,631,970; June 14.

Lichtenstein, Henry E., New York, N. Y. Demonstrating device. 1,632,302; June 14.

Lilliford, Henry, New York, N. Y. Tooth-paste holder. 1,632,087; June 14.

Lindeman, Jesse G., Yakima, Wash. Ditching machine. 1,632,303; June 14.

Lindhard, Povl T., Brooklyn, assignor to F. L. Smidth & Co., New York, N. Y. Liner for tube mills, etc. 1,631,971; June 14.

Lindhard, Povl T., Brooklyn, assignor to F. L. Smidth & Co., New York, N. Y. Liner for tube mills. 1,631,972; June 14.

Lindsay, Lynn G., Minneapolis, Minn. Control mechanism for water softeners. 1,632,610; June 14.

Lister, Herbert, Montreal, Quebec, Canada. Hair comb. 1,632,288; June 14.

Ljungström, Fredrik, Lidingo-Brevik, assignor to Aktiebolaget Ljungströms Angturbin, Stockholm, Sweden. Turbin-driven locomotive and similar vehicle. 1,632,707; June 14.

Lloyd, Richard H., Hastings, W. Va. Combined frost-preventing and irrigating device. 1,632,611; June 14.

Loeber, Herman M., assignor to Dempster Mill Manufacturing Co., Beatrice, Nebr. Windmill construction. 1,632,186; June 14.

Loeck, Gunther, assignor to Firm of Georg Wolf G. m. b. H., Berlin, Germany. Gastroscope. 1,632,612; June 14.

Lomax, Clarence E., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Automatic telephone system. 1,632,009; June 14.

Lopez, David C., Chicago, Ill. Engineer's protractor. 1,632,613; June 14.

Lord, Fred W., assignor to The Oakes Manufacturing Company, Tipton, Ind. Poultry feeder. 1,632,738; June 14.

Lorenz, C., Aktiengesellschaft. (See Schmidt, Karl, assignor.)

Losel, Franz, Brunn, Czechoslovakia. Stationary guide-nozzle construction and assembly for turbines. 1,632,448; June 14.

Lox Seal Corporation, The. (See Behrman, Marcus B., assignor.)

Lubberger, Fritz, Berlin-Schmargendorf, assignor to Siemens & Halske Aktiengesellschaft, Wernerwerk, Berlin, Germany. Automatic telephone system. 1,632,010; June 14.

Lubberger, Fritz, Berlin-Schmargendorf, and E. Hahn, Charlottenburg, assignors to Siemens & Halske Aktiengesellschaft, Wernerwerk, Siemensstadt, near Berlin, Germany. Automatic telephone system. 1,632,343; June 14.

Lucey, Patrick J., South Bend, Ind., assignor to Lucey Slicing Machine Company, Chicago, Ill. Sharpening device for slicing-machine knives. 1,632,088; June 14.

Lucey Slicing Machine Company. (See Lucey, Patrick J., assignor.)

Lueth, Paul F., assignor to Sumner Iron Works, Everett, Wash. Sawmill carriage. 1,632,708; June 14.

Lutz, Hans, Elmira, N. Y., assignor to The Willys-Overland Company, Toledo, Ohio. Grinding machine. 1,632,379; June 14.

Lyhne, Anker S., Bridgeport, Conn. Vanity box. 1,632,410; June 14.

MacBean, Thomas L. (See Herrick, Ernest A., and MacBean.)

MacFarlane, George F., Wilkes-Barre, Pa. Lubricating and protecting means for spinning mechanisms. 1,631,973; June 14.

MacGregor, Wallace F., Racine, Wis., assignor to J. I. Case Threshing Machine Company, Racine, Wis. Combination harvester thrasher. 1,632,745; June 14.

MacKay, John F., Lancaster, Pa. Egg tray for incubators. 1,632,239; June 14.

MacMullen, William, jr. (See McDonald, I. P., and MacMullen, jr.)

MacMullin, Robert B., Niagara Falls, assignor to The Mathieson Alkali Works, New York, N. Y. Manufacture of hypochlorites. 1,632,483; June 14.

MacMullin, Robert B., Niagara Falls, assignor to The Mathieson Alkali Works, New York, N. Y. Manufacture of hypochlorites 1,632,484; June 14.

MacMullin, Robert B., Niagara Falls, assignor to The Mathieson Alkali Works, New York, N. Y. Manufacture of hypochlorites. 1,632,485; June 14.

Magee, William H., assignor to Fostoria Glass Company, Moundsville, W. Va. Bowl. Des. 72,861; June 14.

Magee, William H., assignor to Fostoria Glass Company, Moundsville, W. Va. Comport. Des. 72,862; June 14.

Magnavox Company, The. (See Pridham, E. S., and Jensen, assignors.)

Magnussen, Erik, assignor to Gorham Mfg. Co., Providence, R. I. Loving cup. Des. 72,863; June 14.

Malwurm, Paul, San Diego, Calif. Beverage dispenser. 1,632,486; June 14.

Majestic Metal Specialties, Inc. (See Kasdan, N., and Pollack, assignors.)

Malmgren, Edward A., Duluth, Minn. Plant service car. 1,632,240; June 14.

Malott, George H., Leamington, Ontario, Canada. Growing tobacco. 1,632,241; June 14.

Manifold Impressions Corporation. (See Armistead, Hubert M., assignor.)

Manassero, Giuseppe, Bronx, N. Y. Antifreezing water heater for internal-comtustion motors. 1,632,658; June 14.

Manson, Ray H., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y. Variable condenser. 1,632,487; June 14.

Manson, Ray H., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y. Variable condenser. 1,632,488; June 14.

Marbury, Ralph E., Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company. Grid leak for radio apparatus. 1,632,089; June 14.

Marcus, Charles L., New York, N. Y. Lip-stick holder. Des. 72,864; June 14.

Marcus, Hascal, Brooklyn, N. Y. Bird cage. 1,632,380; June 14.

Marden, William L., Elmhurst, assignor to Neptune Meter Company, New York, N. Y. Water meter. 1,632,554; June 14.

Marshall, Charles C. (See Cobb, C., and Marshall.)

Martin, William C., Chicago, Ill. Tire. 1,632,489; June 14.

Martin, William C., Milwaukee, Wis. Manufacturing cushion tires. 1,632,490; June 14.
Martin, William F., Harrisburg, Pa. Coal screen and washer. 1,632,739; June 14.
Martin, William H., Chappaqua, N. Y., assignor to American Telephone and Telegraph Compay. Identification of electrical cables. 1,632,030; June 14.
Masury, Alfred F., and C. Froesch, assignors to International Motor Company, New York, N. Y. Multiwheel drive for vehicles. 1,631,975; June 14.
Mathes, Robert C., Wyoming, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Signaling. 1,631,976; June 14.
Mathieson Alkali Works, The. (See MacMullin, Robert B., assignor.)
Mathieu, Frederick W. (See Krause, A. R., and Mathieu.)
Matthiessen, Paul, and A. D. Möller, Hamburg, Germany. Floating dry dock. 1,632,491; June 14.
Mattice, Royal, Bethlehem, Pa. Welding tool. 1,632,411; June 14.
Mattison, Hans S., La Crosse, Wis., assignor to New Era Products Company, Minneapolis, Minn. Heating system for intake manifolds and circuits for same. 1,632,139; June 14.
Mauch, Wilhelm, Los Angeles, Calif. Powder feeder. 1,632,659; June 14.
Maurer, Johann A., Breslau, assignor to Maurer-Textil-Maschinen G. m. b. H., Konstantin-Schnierstrasse, Breslau-Carlowitz, Prussia, Germany. Pump for viscous liquids. 1,632,304; June 14.
Maurer-Textil-Maschinen G. m. b. H. (See Maurer, Johann A., assignor.)
Mauser, Alfons, Cologne-Marienburg, Germany. Closure for vessels. 1,632,031; June 14.
Mayer, Sally, and H. Nahrstedt, St. Louis, Mo. Humidifier for ovens. 1,632,492; June 14.
McArdle, Michael W., Chicago, Ill. Drying rack. 1,632,032; June 14.
McBridge, Christopher G. (See Selden, S., and McBride.)
McCann, Ronald A., assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,632,189; June 14.
McConkey, Montgomery W., assignor to Bendix Brake Company, Chicago, Ill. Brake control. 1,632,140; June 14.
McCord Radiator & Mfg. Co. (See Grantier, Leslie V., assignor.)
McCracken, Joanna. (See Beaston, Greek P., assignor.)
McCrystal, Robert C., assignor of one-half to H. D. Field, Los Angeles, Calif. Dispensing carton. 1,632,412; June 14.
McDonald, Isabelle P., and W. MacMullen, jr., assignors to F. A. Patrick & Co., Duluth, Minn. Garment. 1,632,190; June 14.
McDonald, John L., St. Joseph, Mo. Combination safety and pencil pocket. 1,632,060; June 14.
McEvoy, Joseph H., jr., Houston, Tex. Making strainer plugs. 1,632,090; June 14.
McFarland, Floyd J., West Point, N. Y. Coin-controlled vending device. 1,632,493; June 14.
McFarland, Joseph E., assignor of one-third to C. G. Somers, Burlington, N. C. Form-holding yoke. 1,632,141; June 14.
McGrevy, Jeremiah, Richmond Hill, N. Y., assignor to Solidarity Watch Case Company, New York, N. Y. Production of stamped figures. 1,632,305; June 14.
McKesson, Elmer I., Toledo, Ohio. Mask. 1,632,449; June 14.
McLaughlin, Celia B., administratrix of the estate. (See McLaughlin, Wharton B.)
McLaughlin, Wharton B., deceased, New York, N. Y.; C. B. McLaughlin, administratrix. Preserving fruits. 1,631,974; June 14.
Mechling, Fidelis M., Wichita, Kans. Safety cap for oil wells. 1,632,661; June 14.
Mergenthaler Linotype Company. (See Remas, Isidore T., assignor.)
Mergott, J. E., Co. (See Hiering, William C., assignor.)
Merrick, Leslie E. (See Christiansen, H. A., and Merrick.)
Merrill, Frank W., Fort Wayne, Ind., assignor to Western Electric Company, Incorporated, New York, N. Y. Electric motor. 1,631,977; June 14.
Messinger, George E., New York, N. Y. Composition of matter. 1,632,555; June 14.
Metal Ware Corporation. (See Koenig, Remus, assignor.)
Meyer, Henry W., Indianapolis, Ind. Vegetable cleaner. 1,632,142; June 14.
Michalek, George, Monarch, Wyo. Rail support. 1,632,662; June 14.
Mickelson, Eric H., and E. K. Skonberg, Brooklyn, N. Y. Liquid-dispensing device. 1,632,614; June 14.
Midgley, Joseph, Brainerd, assignor of one-third to J. L. Chesebrough, Duluth, Minn., and one-third to T. L. R. Chesebrough, Chicago, Ill. Shackle bolt. 1,632,663; June 14.
Millar, Garrett V., Fort Worth, Tex. Milk cooler. 1,632,494; June 14.
Miller, Alfred, Dessau in Anhalt, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Making photographic copies by reversal. 1,632,740; June 14.
Miller Company, The. (See Doane, Leroy C., assignor.)
Miller, George L., assignor to The Timken Roller Bearing Company, Canton, Ohio. Antifriction bearing drive and hanger box. 1,632,495; June 14.
Miller, Jonas M., Plain City, Ohio. Fruit-jar lifter. 1,632,664; June 14.
Miller, Kinney I., Lancaster, Mo. Feeder shipping box for chicks, etc. 1,632,033; June 14.
Miller Rubber Company, The. (See Steele, Charles W., assignor.)
Miller Rubber Company, The. (See Weimer, Roy B., assignor.)
Miller, Samuel L., Chicago, Ill. Contact device. 1,632,709; June 14.
Miller, Turner, Fayetteville, Ark. Oiling device. 1,632,741; June 14.
Minard, Ernest E., Detroit, Mich. Shade guide. 1,632,742; June 14.
Minerals Separation North American Corporation. (See Simpson, Tudor R., assignor.)
Minich, Verne E., assignor to The American Foundry Equipment Company, New York, N. Y. Apparatus for cutting and mixing sand. 1,632,746; June 14.
Minnich, Walter, Montreux, assignor to Society of Chemical Industry in Basle, Basel, Switzerland. Preparation of solutions of compounds insoluble or sparingly soluble in water. 1,632,306; June 14.
Minunno, Saverio, New York, N. Y. Hand fan. 1,632,556; June 14.
Miolati, Arturo, Padova, assignor to Rene Leprestre, Rome, Italy. Peroxide of lead, zinc, and sulphuric-acid accumulators. 1,632,307; June 14.
Misch, Gustav. (See Newsham, A. S., Viersen, and Misch.)
Mitchell, G. F., & Son. (See Mitchell, Harry W., assignor.)
Mitchell, Harry W., assignor to G. F. Mitchell & Son, Cleveland, Ohio. Washer drive mechanism. 1,632,091; June 14.
Mitchell, Joseph I. (See Dwyer, W. C., and Mitchell.)
Mitchell, Loris E., and A. J. White, East Cleveland, Ohio, assignors to General Electric Company. Vacuum tube. 1,632,615; June 14.
Mitchell, Walter E., Seattle, Wash. Short-turn device for motor vehicles. 1,632,665; June 14.
Modlin, Clarence A., et al. (See Modlin, Frank E., assignor.)
Modlin, Frank E., assignor of one-eighth to F. E. Modlin, jr., Glendale, Calif., one-eighth to C. A. Modlin, Kansas City, Mo., and three-eighths to D. L. Walker, Oklahoma City, Okla. Wrapping machine. 1,632,344; June 14.
Modlin, Frank E., jr., et al. (See Modlin, Frank E., assignor.)
Moffitt, Roy M., Manmee, Ohio. Electrical heating device. 1,632,034; June 14.
Molique, George J. A., Roxana, Ill. Clothesline holder. 1,632,616; June 14.
Möller, Adolf D. (See Matthiessen, P., and Möller.)
Molloy, David J., Company, The. (See Persons, Ernest L., assignor.)
Molony, Stuart B., Conshohocken, Pa., and Y. Nikaido, Bay City, Mich., assignors, by mesne assignments, to C. W. Brown, W. L. Clause, and E. Pitcairn, Pittsburgh, Pa. Rubber vulcanization and products thereof. 1,632,617; June 14.
Molony, Stuart B., Wellesley Hills, Mass., and Y. Nikaido, Bay City, Mich., assignors, by mesne assignments, to C. W. Brown, W. L. Clause, and E. Pitcairn, Pittsburgh, Pa. Rubber vulcanization and product thereof. 1,632,666; June 14.
Molony, Stuart B., Wellesley Hills, Mass., and Y. Nikaido, Bay City, Mich., assignors, by mesne assignments, to C. W. Brown, W. L. Clause, and E. Pitcairn, Pittsburgh, Pa. Rubber vulcanization and product thereof. 1,632,667; June 14.
Moon, Charles L., assignor to The Cecil R. Lambert Company, Detroit, Mich. Trolley switch. 1,632,557; June 14.
Moon, Charles L., assignor to The Cecil R. Lambert Company, Detroit, Mich. Rotary crossover switch. 1,632,558; June 14.
Moore, George L., Chicago, Ill. Lubricating system. Re16,655; June 14.
Moore, Theodore A., Davenport, Iowa. Floor-strip clip-setting device. 1,632,242; June 14.
Morkrum-Kleinschmidt Corporation. (See Kleinschmidt, Edward E., assignor.)
Morley, Earl M., Delta, Ohio, assignor to The Air-Scale Company, Toledo, Ohio. Air-pressure regulator. 1,632,618; June 14.
Morley, Earl M., Delta, Ohio, assignor to The Air-Scale Company, Toledo, Ohio. Tire-inflation mechanism. 1,632,619; June 14.
Morrill, William V. (See Morrill, William W., and W. V.)
Morrill, William W., and W. V., Spokane, Wash. Velocipede. 1,632,092; June 14.
Morris, George E. (See Morris, George J., assignor.)
Morris, George J., Omaha, Nebr., assignor to G. E. Morris, Los Angeles, Calif. Mixing valve. 1,632,450; June 14.
Morris, Percival S., Brooklyn, N. Y. Fountain pen and pencil. 1,632,710; June 14.
Morse, Albert W., Long Island City, N. Y. Oil-fired kiln. 1,632,143; June 14.

Morton, Charles A., assignor to Western Electric Company, Incorporated, New York, N. Y. Automatic telephone system. 1,632,035; June 14.
Mosier, Arthur R., New York, N. Y. Spark timer. 1,632,413; June 14.
Mourer, Sarah M., Philadelphia, Pa. Toy vehicle. 1,632,308; June 14.
Muehlhause, Gerhart F., Bartlett, Tex. Plow. 1,632,345; June 14.
Mueller, Emil C., jr., Elizabeth, and S. T. Curran, Mountain Lakes, N. J., assignors to Western Electric Company, Incorporated, New York, N. Y. Call indicator. 1,632,093; June 14.
Mullen, Charles P., Conshohocken, Pa. Eaves-trough support. 1,632,036; June 14.
Müller, Carl J. (See Thiess, K., Müller, Runne, and Schaeffer.)
Mullineaux, Richard H., Los Angeles, Calif. Interliner for pneumatic tires. 1,632,496; June 14.
Murphy, John F., assignor to J. M. Robinson, Louisville, Ky. Portable bathroom. 1,632,668; June 14.
Myers, Don D., assignor to The Sozonian Burial Vault Company, Toledo, Ohio. Automatic latching device for burial vaults. 1,632,243; June 14.
Myers, William S., St. Petersburg, Fla. Line-chalking device. 1,632,711; June 14.
Nahrstedt, Hermann. (See Mayer, S., and Nahrstedt.)
Nanfeldt, Ernest F., New Haven, Conn. Cleaning asbestos. 1,632,620; June 14.
Nash, Ronald E., and H. Von Spreecken, Montgomery, Iowa; said Nash assignor to said Von Spreecken. End gate. 1,632,747; June 14.
National Brake & Electric Company. (See Aikman, Burton S., assignor.)
National Store Specialty Co., The. (See Henwood, Lloyd S., assignor.)
Naugatuck Chemical Company, The. (See Hopkinson, E., and Gibbons, assignors.)
Naugle, Albert E., Pitman, N. J. Envelope and making same. 1,632,669; June 14.
Naugle, Harry M., and A. J. Townsend, Canton, Ohio, assignors, to Forged Steel Wheel Company, Pittsburgh, Pa. Making strip sheets. Re16,652; June 14.
Nelson, Edward L. (See Oswald, A. A., and Nelson.)
Němec, Josef, Metisov, Czechoslovakia. Thermostatic apparatus. 1,632,144; June 14.
Neptune Manufacturing Company. (See Wright, Oliver S., assignor.)
Neptune Meter Company. (See Marden, William L., assignor.)
Nero, Arvid H., New Britain, assignor to The Arrow Electric Company, Hartford, Conn. Electric switch. 1,632,670; June 14.
New Era Products Company. (See Mattison, Hans S., assignor.)
Newhall, Henry B. (See Pleister, Henry W., assignor.)
Newsham, Arthur S., P. A. Viersen, Chicago, Ill., and G. Misch, assignors of one-third to H. O. Swoboda, Inc., Pittsburgh, Pa., and two-thirds to Westinghouse Electric & Manufacturing Company. Ironing machine. 1,632,094; June 14.
Newton, Edwin E., Montreal, Quebec, Canada, assignor to Western Electric Company, Incorporated, New York, N. Y. Grid-winding machine. 1,632,095; June 14.
Newton, Rex H., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Insulating washer for brush-holder bracket arms. 1,632,096; June 14.
New York Air Brake Company. (See Campbell, Charles A., assignor.)
Nicholson, Frank H., Edgewood, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,632,037; June 14.
Nikaido, Yasujuro. (See Molony, S. B., and Nikaido.)
Nissen, John P., Philadelphia, Pa. Sweater. 1,632,346; June 14.
Nitardy, Ferdinand W., Brooklyn, assignor to E. R. Squibb and Sons, New York, N. Y. Preservation of ether. 1,632,309; June 14.
Noble, Arthur H., Pawtucket, assignor to Theodore W. Foster & Brother Company, Providence, R. I. Lip-stick holder. 1,632,764; June 14.
Noble, Arthur H., Pawtucket, assignor to Theodore W. Foster & Brother Company, Providence, R. I. Lip-stick holder. 1,632,765; June 14.
Noël, Ernest A., Paris, France. Wooden mosaic work. 1,632,497; June 14.
Nordberg, Bruno V., deceased, Milwaukee, Wis.; H. C. Nordberg, executrix. Variable-capacity air compressor. 1,632,498; June 14.
Nordberg, Helena C., executrix. (See Nordberg, Bruno V.)
Nordenswan, Robert, assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone receiver. 1,631,978; June 14.
Norling, Reinhold A., Aurora, assignor to Independent Pneumatic Tool Company, Chicago, Ill. Reversing mechanism for electric drills. 1,632,671; June 14.
Norrc, Charles. (See Roline, Carl G., and Norre.)
Norris, Almon E., Brookline, Mass. Mechanical movement. 1,632,038; June 14.
North East Electric Company. (See Lee, Thomas L., assignor.)
Northern Corrugating Co. (See Krueger, Herman W., assignor.)
Norwood, Harry E. (See Kurscheidt, P. J., and Norwood.)
Nosan, Anton, Cleveland, Ohio. Bomb dropper for aeroplanes. 1,632,414; June 14.
Nunn, Frederick W., assignor to Nunnday Proprietary Limited, Melbourne, Victoria, Australia. Casting of dentures in metal. 1,632,712; June 14.
Nunnday Proprietary Limited. (See Nunn, Frederick W., assignor.)
Oakes Manufacturing Company, The. (See Lord, Fred W., assignor.)
Obergfell, Gustav, and E. Patzwahl, Bronx, N. Y. Convertible automobile body. 1,632,672; June 14.
Oehmig, William G. (See Wallace, Frank W.)
Okadee Company, The. (See Demarest, Thomas W., assignor.)
Olabarria, Pete, Elko, Nev. Rim tool. 1,632,191; June 14.
Osborn Manufacturing Company, The. (See Carman, E. S., and Curtis, assignors.)
Osborne, John E. (See Harrison, Arthur W., assignor.)
Ostermann, Henry, Chicago, Ill. Toaster. 1,632,192; June 14.
Oswald, Arthur A., and E. L. Nelson, East Orange, N. J., assignors to Western Electric Company, Incorporated, New York, N. Y. Antenna structure. 1,632,039; June 14.
Otis Elevator Company. (See Grosvenor, Graham B., assignor.)
Owens Bottle Company, The. (See Soubier, Leonard D., assignor.)
Oxford Press Incorporated. (See Jenner, George O., assignor.)
Oxweld Acetylene Company. (See Kehl, Robert J., assignor.)
Pal Radio Company. (See Wacker, George W., assignor.)
Palmer Electric and Manufacturing Company, The. (See Johnson, Ernest G., assignor.)
Panhandle Refining Company. (See Turner, Samuel E., assignor.)
Pappadakis, Andru G., Detroit, Mich. Alarm mechanism. 1,632,499; June 14.
Parent Caterpillar Company. (See Blackburn, Robert, assignor.)
Parish, Winnifred B. (See Schwartz, Morris, assignor.)
Parker Pen Company, The. (See Gilman, George W., assignor.)
Parsons, Charles E., Engelwood, N. J., and R. Stevenson, assignors to W. P. Deppe, New York, N. Y. Method and apparatus for determining equilibrium vaporization end point. 1,632,748; June 14.
Parsons, Stuart W., assignor to The Stanley Works, New Britain, Conn. Olive-knuckle hinge. 1,632,415; June 14.
Partridge, John H., town of Trail, British Columbia, Canada. Automobile wheel. 1,632,500; June 14.
Patrick, F. A., & Co. (See McDonald, I. P., and MacMullen, assignors.)
Patrick, Noble M., and P. W. Horn, Charlotte, N. C. Valve mechanism for dispensing fluids. 1,632,501; June 14.
Patterson, Irene, Trinidad, Colo. Stocking. Des. 72,865; June 14.
Patzwahl, Erich. (See Obergfell, G., and Patzwahl.)
Paulus, Rudolph, and P. Tirik, New York, N. Y. Article of merchandise. 1,632,673; June 14.
Paynter Corporation. (See Paynter, John C., assignor.)
Paynter, John C., assignor to Paynter Corporation, Philadelphia, Pa. Tire mold. 1,632,310; June 14.
Pearson, Carl E., Cleveland, Ohio, assignor to The Cleveland Trust Company, trustee. Adjusting means for sound-reproducing machanism. 1,632,416; June 14.
Pearson, Charles, assignor to International Harvester Company, Chicago, Ill. Hitch. 1,632,145; June 14.
Pearson, Chester L., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Last-scouring wheel. 1,632,244; June 14.
Pearson, Erick, Minneapolis, Minn. Trend-belt tractor. 1,632,674; June 14.
Peck, Hannaford & Peck Company, The. (See Peck, Robert E., assignor.)
Peck, Robert E., assignor to The Peck, Hannaford & Peck Company, Cincinnati, Ohio. Ventilator canopy. 1,632,881; June 14.
Pecker, Joseph S., assignor of one-third to M. Katzander, one-third to E. Bloss, and one-third to C. Jellinek, Philadelphia, Pa. Folding chair. 1,632,146; June 14.
Peckham, Frank J., Troy, Ohio. Fishing float. 1,632,502; June 14.
Pedrick, Howard A., Bala, assignor to Ev-Air-Tight Calking Co., Philadelphia, Pa. Calking machine. 1,632,559; June 14.
Pellegrino, Vincenzo, Rye, N. Y. Evaporator for carburetors. 1,632,675; June 14.
People of the United States, The. (See Barger, W. R., Hawkins, and Blatz, assignors.)
Perfect Window Regulator Corporation. (See Kurscheidt, P. J., and Norwood, assignors.)
Persons, Ernest L., Chicago, Ill., assignor to The David J. Molloy Company. Book cover. 1,632,193; June 14.
Peters, Arthur E., Littleton, Colo., assignor to Ingersoll-Rand Company, Jersey City, N. J. Drill sharpener. 1,632,621; June 14.

Peters, John F., Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company. Transformer winding. 1,632,097; June 14.
Peterson, Emil J., assignor to Hayes Wheel Company, Jackson, Mich. Rim-rolling machine. 1,632,560; June 14.
Peyton, Ephraim G., U. S. Army, Washington, D. C. Circuit closer. 1,632,676; June 14.
Pfister, William A. (See Price, E., and Pfister.)
Phelps, Lowell S., Laramie, Wyo. Attachment for tractors. 1,632,311; June 14.
Philips', N. V., Gloeilampenfabrieken. (See Holst, G., and Bouwers, assignors.)
Phillips Petroleum Company. (See Hubbell, Alfred W., assignor.)
Photo Plating Company, The. (See Sundbeck, Adolph, assignor.)
Piccirilli, Pasquale J., New York, N. Y. Door brace. 1,631,979; June 14.
Piccirilli, Pasquale J., New York, N. Y. Door brace. 1,631,980; June 14.
Pipkin, James A., Waco, Tex. Bottle protector. 1,632,347; June 14.
Pitcairn, Edward, et al. (See Molony, S. B., and Nikaido, assignors.)
Pitcher, Elmer, assignor to Pitcher Quack Grass Digger Co., Minneapolis, Minn. Quack-grass digger. 1,632,451; June 14.
Pitcher Quack Grass Digger Co. (See Pitcher, Elmer, assignor.)
Pitt, Irving, Manufacturing Company. (See Conger, Claude M., assignor.)
Pleister, Henry W., Westfield, N. J., assignor, to H. B. Newhall. Sound amplifier. 1,632,040; June 14.
Ply-Rite Contracting Company, The. (See Wootton, Joseph H., assignor.)
Pockmire, Warren, Charleston, W. Va. Dust cap. 1,632,503; June 14.
Pollack, Daniel. (See Kasdan, N., and Pollack.)
Pomeroy, James W. (See Todd, W. C., and Pomeroy.)
Porter, Leslie F., Passaic, N. J., assignors to Western Electric Company, Incorporated, New York, N. Y. Telephone system. 1,631,981; June 14.
Possehl, Henry C., Baker, Minn. Fish and fowl dressing device. 1,632,194; June 14.
Potts, Louis M., Highwood, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Control mechanism. 1,631,982; June 14.
Poudrier, Armand L., Los Angeles, Calif. Hydraulic snubber. 1,632,041; June 14.
Pow, Alexander. (See Brown, Robert M., assignor.)
Power Specialty Company. (See Hight, Eugene S., assignor.)
Powers, Thomas E., New York, N. Y. Wheeled toy. Des. 72,866; June 14.
Powers, Thomas E., New York, N. Y. Wheeled toy. Des. 72,867; June 14.
Pratt, Benjamin H., Milwaukee, Wis., assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Tire. Des. 72,868; June 14.
Pratt & Whitney Company. (See Hoagland, Frank O., assignor.)
Prentice, Hugh. (See Buckman, H. W., and Prentice.)
Preston, Clarence E., Oklahoma City, Okla. Display device. 1,632,504; June 14.
Price, Edwin G. (See Weber, V., and Price.)
Price, Emil, and W. A. Pfister, Los Angeles, Calif. Adjustable union. 1,632,042; June 14.
Pridham, Edwin S., and P. L. Jensen, assignors to The Magnavox Company, Oakland, Calif. Cabinet for radio receiving apparatus. Des. 72,869; June 14.
Prince, David C., Schenectady, N. Y., assignor to General Electric Company. Control system. 1,632,622; June 14.
Prior, Ethel M., Hartford, Conn. Cover for flatiron stands. 1,632,348; June 14.
Prosperity Company, The. (See Clisson, Albert B., assignor.)
Quigley, John T., Los Angeles, Calif. Device for filing cards and the like. 1,631,983; June 14.
Rachlin, Eva, Brooklyn, N. Y. Gutter hanger. 1,632,561; June 14.
Racine Horseshoe Tire Company. (See Caldwell, Truman S., assignor.)
Radeeff, Andrew, New York, N. Y. Perfumer for electric fans. 1,632,245; June 14.
Radio Corporation of America. (See Clark, George H., assignor.)
Raeth, Frederick C., Milwaukee, Wis. Converting chemical fertilizers to yeast and other organic substances. 1,632,312; June 14.
Ragsdale, Earl J. W., Norristown, Pa., assignor to Secretary of War, Dwight F. Davis. Dummy bomb. 1,632,147; June 14.
Railway Signal Company Limited, The. (See Roberts, Walter S., assignor.)
Raney, Clemma R., assignor to International Harvester Company, Chicago, Ill. Grain shocker. 1,632,148; June 14.
Rasmussen, Martin, assignor to Hartmann Trunk Company, Racine, Wis. Trunk lock. 1,632,195; June 14.
Rathbun, Edward, Toledo, Ohio, assignor to Ingersoll-Rand Company, Jersey City, N. J., and The Rathbun-Jones Engineering Company, Toledo, Ohio. Governor regulator. 1,632,349; June 14.
Rathbun-Jones Engineering Company, The, et al. (See Rathbun, Edward, assignor.)
Rawlings, Ernest J., assignor to Rawlings Manufacturing Company Limited, London, England. Latching and braking device for adjustable windows. 1,632,677; June 14.
Rawlings Manufacturing Company Limited. (See Rawlings, Ernest J., assignor.)
Red Star Appliances, Inc. (See Eskholme, John W., assignor.)
Redick, Frank, Parkerton, Wyo. Sand-reel bearing. 1,632,678; June 14.
Redmond, Albert G., Indianapolis, Ind., assignor to J. R. Francis, Flint, Mich. Fuel-feeding system for internal-combustion engines. 1,631,984; June 14.
Reed, C. A., Company. (See Jopson, William G., assignor.)
Reed, Earl A., Okemah, Okla. Rotary well-drilling apparatus. 1,632,713; June 14.
Reinforced Paper Bottle Corporation. (See Koch, Lydia B., assignor.)
Remus, Isidor T., Woodhaven, N. Y., assignor to Mergenthaler Linotype Company. Line-casting machine. 1,632,350; June 14.
Remington Typewriter Company. (See Lewis, Richard J., assignor.)
Rhoads, Harry E., Toledo, Ohio, assignor to The Willys-Overland Company, Toledo, Ohio. Intake nozzle. 1,632,196; June 14.
Rhode, Lewis W., et al. (See Eckles, Noble, assignor.)
Rhodes, Fay R., Iola, Kans. Windshield attachment. 1,632,679; June 14.
Rich, Theodore A., East Lynn, Mass., assignor to General Electric Company. Electric measuring instrument. 1,632,623; June 14.
Richardson, James A., Halkirk, Alberta, Canada. Shocker. 1,632,043; June 14.
Richmond, Roy B., Chicago, Ill. Musical instrument. 1,632,197; June 14.
Riley Stoker Corporation. (See Grahame, Dallas F., assignor.)
Ritow, Herman, Chicago, Ill. Slide rule. 1,632,505; June 14.
Ritter, George F., assignor to The Tillotson Manufacturing Company, Toledo, Ohio. Carburetor. 1,632,198; June 14.
Roberts, Kenneth A. (See Humphris, Frank, assignor.)
Roberts, Odin, Boston, Mass. Collar and cuff. 1,631,985; June 14.
Roberts, Walter S., Ormskirk, assignor of one-half to The Railway Signal Company Limited, London, England. Token system. 1,632,240; June 14.
Robeson-Rochester Corporation. (See Schott, Howard H., assignor.)
Robinson, James M. (See Murphy, John F., assignor.)
Robinson, Joseph, Morristown, N. J. Automatic train-pipe coupling. 1,632,714; June 14.
Robinson, Thomas E., Philadelphia, Pa. Gate or door operating mechanism. 1,632,506; June 14.
Rodgers, Daniel C., Canton, Ohio. Shock absorber. 1,632,715; June 14.
Rodriguez, Roberto, Detroit, Mich. Cold-air-supplying apparatus. 1,632,680; June 14.
Roebel, Ludwig, Mannheim, Germany, assignor to Aktiengesellschaft Brown, Boveri & Cie., Baden, Switzerland. Machine-control apparatus. 1,632,417; June 14.
Rogers, Harold A., Cardiff, Wales. Gramophone record. 1,632,313; June 14.
Rogivue, Carl, Togel, Germany, assignor to General Electric Company. Condenser plant for locomotives. 1,632,624; June 14.
Rolaff, Walter G. E., St. Louis, Mo. Compressor. 1,632,562; June 14.
Roline, Carl G., and C. Norre, Chicago, Ill. Machine for folding the corners of book covers. 1,632,452; June 14.
Roper, Geo. D., Corporation. (See Larson, Swan, assignor.)
Rosales, Mariano, San Antonio, Tex. Float-operated circuit closer. 1,632,098; June 14.
Ross, Harry H., Toledo, Ohio. Card game. 1,632,681; June 14.
Rowan, Thomas, Brooklyn, assignor to Structural Gypsum Corporation, New York, N. Y. Building construction. 1,632,453; June 14.
Royal, Joseph N., Buffalo, N. Y., assignor to F. N. Burt Company, Limited, Toronto, Canada. Box or similar container. Des. 72,870; June 14.
Rudqvist, Carl A., Staket, Sweden. Ignition plug for internal-combustion motors. 1,632,314; June 14.
Ruegg, Leonard, Los Angeles, Calif. Faucet. 1,632,418; June 14.
Runne, Ernst. (See Thiess, K. Müller, Runne, and Schaeffer.)
Rusche, Harold, New York, N. Y. Diagram holder. 1,631,986; June 14.
Russe, William H. (See Allen, Chester B., assignor.)
Ryon, Eppa H., Waltham, assignor to Crompton & Knowles Loom Works, Worcester, Mass. Stop motion for winders. 1,632,507; June 14.
Rypinski, Maurice C., Yonkers, L. W. Staunton, Jackson Heights, and S. Bourne, New York, N. Y., assignors to Brandes Laboratories, Inc., Newark, N. J. Cone speaker. 72,871; June 14.
Sachs, Morris, and S. Fliederbaum, New York, N. Y. Moving sign. 1,632,315; June 14.

Sachse, Herman P. (See Klopsteg, P. E., and Sachse.)
Sacre, Anton T., San Antonio, Tex. Automobile wheel. 1,632,382; June 14.
Sager, J. H., Company. (See Sager, James H., assignor.)
Sager, James H., assignor to J. H. Sager Company, Rochester, N. Y. Bumper. 1,632,563; June 14.
Sahlberg, Carl A., Chicago, Ill. Canning meats. 1,632,454; June 14.
Sanford, Hugh W., Knoxville, Tenn. Grease-gun connection. 1,632,149; June 14.
Sasser, Otis, Clovis, N. Mex. Carbonated-water-cut-off valve for soda fountain. 1,632,625; June 14.
Savoy, Philip A., Fullerton, Calif. Renewable fuse. 1,632,316; June 14.
Saxton, Augustus C. (See Hill, G. S., and Saxton.)
Sayers, Charles A., San Diego, Calif. Side windshield for vehicles. 1,632,564; June 14.
Scarlett, Charles E., et al., trustees. (See Charles, Carl L., assignor.)
Schaeffer, Albert. (See Thiess, K., Müller, Runne, and Schaeffer.)
Schantz, Carl, Freiburg, Germany. Preserving wood and the like. 1,632,508; June 14.
Schelleng, John C., Millburn, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Secret signaling. 1,632,099; June 14.
Scherbius & Ritter. (See Lewerenz, Arthur, assignor.)
Schimpf, George C. (See Chenowith, W. H., and Schimpf.)
Schlegel, Heinrich, Duisburg-Ruhrort, Germany. Production of building blocks. 1,632,317; June 14.
Schmidt, Karl, Lichtenrade, near Berlin, assignor to C. Lorenz Aktiengesellschaft, Berlin-Tempelhof, Germany. Speed regulator. 1,632,565; June 14.
Schmidt, Karl, Berlin-Sudende, assignor to C. Lorenz Aktiengesclischaft, Berlin-Tempelhof, Germany. Frequency-multiplication system. 1,632,626; June 14.
Schnath, Heinrich, assignor to the Firm Kuxmann & Co., Komm.-Akt.-Ges., Bielefeld, Germany. Machine for spreading artificial manure. 1,632,199; June 14.
Schneider, Carl F., Chicago, Ill. Fishing apparatus. 1,632,566; June 14.
Schnitger, William E., Garden Grove, Calif. Tractor hitch. 1,632,509; June 14.
Schonbourger, Lucien, Paris, France, assignor to General Electric Company. Speed-control system. 1,632,627; June 14.
Schoshusen, Arthur, West Somerville, Mass. Boot or shoe form. 1,632,044; June 14.
Schott, Howard H., assignor to Robeson-Rochester Corporation, Rochester, N. Y. Urn. Des. 72,872; June 14.
Senrage, Hilde K., Paris, France, assignor to General Electric Company. Dynamo-electric machine. 1,632,628; June 14.
Schumacher, Conrad. (See Gaisman, H. J., and Schumacher.)
Schwartz, Morris, assignor of one-half to W. B. Parish, Chicago, Ill. Die mechanism. Re16,659; June 14.
Schweigert, Otto, Pforzheim, Germany. Shoulder strap for ladies' underwear. 1,632,716; June 14.
Schweiker, Roy W., assignor to Franklin Pottery, Lansdale, Pa. Attaching bracket for lighting fixtures. 1,632,510; June 14.
Šedivá, Jarmila, Pribram, Czechoslovakia. Device for separating and straining liquids. 1,632,511; June 14.
Seiden, Samuel, Bronx, and C. G. McBride, New York, N. Y. Leveling device. 1,632,383; June 14.
Selier, George J., Danville, Ill. Wall-building device. 1,632,514; June 14.
Seiz, Walter, Baden, Switzerland, assignor to General Electric Company. Speed-control system. 1,632,682; June 14.
Seneca Falls Machine Co. (See Ashton, Richard A., assignor.)
Serva, Adam A., assignor to The United Electric Company, Canton, Ohio. Pulley. 1,632,512; June 14.
Severin, Carl, Cleveland Heights, Ohio, assignor to General Electric Company. Filament for incandescent lamps or similar articles. 1,632,769; June 14.
Shannon, Ellwood M., Bala, assignor to The Baldwin Locomotive Works, Philadelphia, Pa. Cylindrical valve for locomotives. 1,632,629; June 14.
Shannon, William J., East Cleveland, Ohio. Ballast-cleaning machine. 1,632,045; June 14.
Shapiro & Aronson, Inc. (See Klein, Max, assignor.)
Sharp, Joseph W., Philadelphia, Pa. Gas burner. 1,632,513; June 14.
Shaw, John C., assignor to Keller Mechanical Engineering Corporation, Brooklyn, N. Y. Bourdon-tube spring. 1,632,749; June 14.
Showers, Ernest S., Champion, Mich. Steering mechanism for coaster wagons. 1,632,384; June 14.
Siemens & Halske Aktiengesellschaft. (See Lubberger, Fritz, assignor.)
Siemens & Halske Aktiengesellschaft. (See Lubberger, F., and Hahn, assignors.)
Siemens-Schuckerwerke Gesellschaft mit beschränkter Haftung. (See Abendroth, Wilhelm, assignor.)
Simmons, Albert H., Oak Park, assignor to Edison Electric Appliance Company, Incorporated, Chicago, Ill. Waffle iron. 1,632,630; June 14.
Simms, Frank C., East Palestine, Ohio. Electric heating unit. 1,632,318; June 14.
Simms, Frank C., East Palestine, Ohio. Making ceramic members. 1,632,319; June 14.
Simpson, Frederick G., Seattle, Wash. Speed and course indicator for conveyances. 1,632,567; June 14.
Simpson, Tudor R., Johannesburg, Transvaal, South Africa, assignor to Minerals Separation North American Corporation, New York, N. Y. Concentration of metalliferous ores. 1,632,419; June 14.
Singer Manufacturing Company, The. (See De Voe, Albert H., assignor.)
Singer Manufacturing Company, The. (See Hemleb, Martin, assignor.)
Sippel, Ernest H., and N. J. Wright, assignors, by mesne assignments, to The Electric Auto-Lite Company, Toledo, Ohio. Insulation-severing device. 1,632,320; June 14.
Skonberg, Eric K. (See Mickelson, E. H., and Skonberg.)
Skylepal, Edward A., New York, N. Y. Oil burner. 1,632,046; June 14.
Slade, Louisa N. (See Work, B. G., and Slade.)
Sloane, Harrison G., San Diego, Calif. Hat and parcel carrier. 1,632,568; June 14.
Sloss, Aaron M. (See Lambert, Victor, assignor.)
Smart, Joseph F., assignor to Landers, Frary & Clark, New Britain, Conn. Thermal circuit breaker. 1,632,420; June 14.
Smidth, F. L., & Co. (See Lindhard, Povl T., assignor.)
Smith, Charles M., assignor of 51 per cent to F. M. Compton, Waco, Tex. Valve guide for flushing tanks. 1,632,631; June 14.
Smith, Daniel W., Malone, Tex. Spraying machine. 1,632,047; June 14.
Smith, Edward A., Valdosta, Ga. Rosin dipper. 1,632,247; June 14.
Smith, George M. (See Forrest, A., and Smith.)
Smith, Harry J. (See Fletcher, S. F., and Smith.)
Smith, William M., Bemidji, Minn. Sprayer. 1,632,515; June 14.
Societa Industria Globelte. (See Sternberg, Alfred, assignor.)
Société Anonyme d'Applications des Gaz Liquéfiés. (See Lemoine, Louis, assignor.)
Society of Chemical Industry in Basle. (See Minnich, Walter, assignor.)
Solidarity Watch Case Company. (See McGrevy, Jeremiah, assignor.)
Somers, Claude G. (See McFarland, Joseph E., assignor.)
Sommer, William H., Peoria, Ill., assignor, by mesne assignments, to The Union Trust Company, Cleveland, Ohio, and J. A. Chapman, Chicago, Ill., trustees. Attachment for electric-current demand meters. 1,631,987; June 14.
Sorensen, Peter, Brooklyn, N. Y. Cut-out. 1,631,988; June 14.
Soubier, Leonard D., assignor to The Owens Bottle Company, Toledo, Ohio. Glass-forming machine. 1,632,632; June 14.
Sozonian Burial Vault Company, The. (See Myers, Don D., assignor.
Sparkes, Harry P., Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company. Radio recorder. 1,632,150; June 14.
Sparling, Archbald E., et al. (See Sparling, Frank K., assignor.)
Sparling Bros. Machine Company. (See Sparling, Frank K.)
Sparling, Frank K., assignor to F. K., A. E., W. D., jr., and T. Sparling, a copartnership doing business under the name of Sparling Bros. Machine Company, New Bedford, Mass. Loom temple. 1,632,351; June 14.
Sparling, Frank K., et al. (See Sparling, Frank K., assignor.)
Sparling, Thomas, et al. (See Sparling, Frank K., assignor.)
Sparling, William D., jr., et al. (See Sparling, Frank K., assignor.)
Sperry Gyroscope Company, The. (See Bassett, Preston R., assignor.)
Sperry Gyroscope Company, The. (See Hall Theodore, assignor.)
Spreckels, Claus, et al. (See Eckles, Noble, assignor.)
Spurr, Foster M., Mattapan, Mass. Automatic valve for use in fish stalls and like places. 1,632,516; June 14.
Squibb, E. R., and Sons. (See Nitardy, Ferdinand W., assignor.)
Stafford, Henry L., Long Beach, Calif. Machine to decapitate and clean fish. 1,932,200; June 14.
Stalker Frederick W. (See Foote, E. B., and Stalker.)
Standard Oil Company. (See Bartels, Edward E., assignor.)
Standard Oil Company. (See Wilson, R. E., and Bahlke, assignors.)
Stanley Works, The. (See Parsons, Stuart W., assignor.)
Star Chandelier Co. (See Boehringer, John A., assignor.)
Starita, Frank, et al. (See Kurz, Robert F., assignor.)
Starke, Ernest F., Red Cloud, Nebr. Rim tool. 1,632,248; June 14.
Staunton, Le Roy W. (See Rypinski, M. C., Staunton, and Bourne.)
Steele, Charles W., assignor to The Miller Rubber Company, Akron, Ohio. Strip-applying attachments for tire-building machines. 1,632,151; June 14.
Steele, Edwin G. (See Sutton, H. M., Steele, and Steele.)
Steele, Walter L. (See Sutton, H. M., Steele, and Steele.)

Steenrod, William J., assignor to Baker-Vawter Company, Benton Harbor, Mich. Lock for loose-leaf binders. 1,632,249; June 14.

Steere, Samuel A., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Pneumatic tire. 1,632,201; June 14.

Stelzer, William, Chicago, Ill. Sanitary toilet cover. 1,632,455; June 14.

Sternberg, Alfred, Berlin-Grunewald, Germany, assignor to Societa Industria Globelite, Milan, Italy. Blood-treating process. 1,632,321; June 14.

Stevenson, George, Toronto, Ontario, Canada. House construction. 1,632,421; June 14.

Stevenson, Reston. (See Parsons, C. E., and Stevenson.)

Stewart, Gayle D., assignor to The American Bottle Company, Toledo, Ohio. Bottle. Des. 72,873; June 14.

Stewart, John M., Clarendon, Va. Electrical condenser. 1,632,352; June 14.

Stickney, Burnham C., Rutherford, N. J. Internal-combustion engine. 1,632,517; June 14.

Stoll, Charles A., Kane, Pa. Warm-air generator. 1,632,250; June 14.

Stone, Thomas W., assignor to Western Gas Construction Company, Fort Wayne, Ind. Gas-purifying apparatus. 1,632,251; June 14.

Stralt, Hosea H., Overland, Mo. Quoin. 1,632,422; June 14.

Strayer, Lawrence H., Kent, Ohio. Sounding-toy film burster. 1,632,518; June 14.

Streit, Frank J., Cincinnati, Ohio. Can opening and closing device. 1,632,519; June 14.

Stripling, Luke S., assignor of one-half to R. L. Gragg, Burkburnett, Tex. Windmill. 1,632,322; June 14.

Stromberg-Carlson Telephone Manufacturing Company, The. (See Manson, Ray H., assignor.)

Strong, Arthur P., Chicago, Ill. Forced-draft stoker. 1,632,423; June 14.

Structural Gypsum Corporation. (See Rowan, Thomas, assignor.)

Stryke, Mark H., Brooklyn, N. Y. Garment. 1,632,424; June 14.

Stuart, Wallace A., Cleveland, Ohio, assignor of one-half to B. L. Jarrett, Sewickley, Pa. Lining for blast furnaces and the like. 1,632 633; June 14.

Stumpenhorst, John A., Wilkinsburg, Pa., assignor to Duplex Transmission Company. Motor-vehicle transmission mechanism. 1,632,634; June 14.

Stumpf, Otto, Mannheim, Germany. Pocket stand. 1,632,717; June 14.

Sulzer Frères Société Anonyme. (See Zbinden, Eugen, assignor.)

Sumner Iron Works. (See Lueth, Paul F., assignor.)

Sundbeck, Adolph, assignor to The Photo Plating Company, Minneapolis, Minn. Rocking toy. Des. 72,874; June 14.

Sundbeck, Adolph, assignor to The Photo Plating Company, Minneapolis, Minn. Rocking toy. Des. 72,875; June 14.

Sun-Maid Raisin Growers of California. (See Forrest, Thomas W. W., assignor.)

Sutton, Henry M., and W. L. and E. G. Steele, Dallas, Tex. Process of and apparatus for separating, cleaning, and grading all kinds of nuts, cereals, and legumes. 1,632,520; June 14.

Swan, Charles, Long Beach, Calif. Forming paving compositions. 1,632,456; June 14.

Swartwout, Everett W., White Plains, N. Y. Smoking pipe. 1,632,100; June 14.

Sweet, Robert C., et al. (See Cooper, William D., assignor.)

Swoboda, H. O., Inc., et al. (See Newsham, A. S., Viersen, and Misch, assignors.)

Tabb, Warner T., Mahwah, N. J. Hair curler. 1,631,989; June 14.

Tabb, Warner T., Mahwah, N. J. Hair curler. 1,631,990; June 14.

Tabb, Warner T., Mahwah, N. J. Clamp. 1,631,991; June 14.

Tannenholz, Melville, Brooklyn, N. Y. Decorate luncheon mat for hot plates. Des. 72,876; June 14.

Tate, Kenneth L., assignor to Taylor Instrument Companies, Rochester, N. Y. High-temperature vapor-pressure recorder and regulator. 1,632,152; June 14.

Taylor, Cyrus. (See Bergmann, C. N., and Taylor.)

Taylor, Elmer Z. (See Bergmann, C. N., and Taylor.)

Taylor, Herman E., Detroit, Mich. Transportation system. 1,632,569; June 14.

Taylor Instrument Companies. (See Foote, E. B. and Stalker, assignors.)

Taylor Instrument Companies. (See Jameson, Percy R., assignors.)

Taylor Instrument Companies. (See Tate, Kenneth L., assignor.)

Taylor, Raolo, and J. W. Cooper. Flytrap. 1,632,635; June 14.

Taylor-Wharton Iron & Steel Company. (See Hopfield, Lewis D., assignor.)

Taylor, William L., Cincinnati, Ohio. Multiplex bag and making it. 1,632,521; June 14.

Terney, Charles L., Ames, Iowa, and P. W. Thayer, Minneapolis, Minn., said Thayer assignor to American Gas Construction Company, Newton, Iowa. Gas-purifying apparatus. 1,632,457; June 14.

Texas Company, The. (See Walker, George D., assignor.)

Thatcher, Harry S., assignor to The Celite Company, Los Angeles, Calif. Filter aid and making same. 1,632,458; June 14.

Thayer, Cecil A., Gary, Ind. Fishing reel. 1,632,522; June 14.

Thayer, Paul W. (See Tenney, Charles L., and Thayer.)

Thiess, Karl, C. J. Müller, and E. Runne, Hochst-on-the-Main, and A. Schneffer, Marxheim-on-the-Taunus, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y. Thioindigo vat dyestuffs and making same. 1,632,252; June 14.

Thomas, George J., South Bend, Ind., assignor to Bendix Brake Company. Universal joint. 1,632,202; June 14.

Thomas, Wellington M. (See Hays, C., and Thomas.)

Thomas, Judson L., Manufacturing Co. (See Havener, Arthur R., assignor.)

Thordarson, Chester H., Chicago, Ill. Amplifying transformer. 1,632,101; June 14.

Thoresen, Einar, Pittsburgh, Pa. Apparatus for sky-writing. 1,632,153; June 14.

Threefoot, Frederick M., et al. (See Threefoot, L., and Elkin, assignors.)

Threefoot, Gladys L., et al. (See Threefoot, L., and Elkin, assignors.)

Threefoot, Henry M., et al. (See Threefoot, L., and Elkin, assignors.)

Threefoot, Louis, and G. W. Elkin, Meridian, Miss., assignors of one-tenth to L. Threefoot, one-tenth to G. L. Threefoot, one-tenth to F. M. Threefoot, one-tenth to G. L. Threefoot, one-tenth to H. M. Threefoot, one-sixth to G. W. Elkin, one-sixth to C. H. Elkin, and one-sixth to M. Elkin. Conveyer system. 1,632,203; June 14.

Threefoot, Louis, and G. W. Elkin, Meridian, Miss., assignors of one-tenth to L. Threefoot, one-tenth to G. L. Threefoot, one-tenth to F. M. Threefoot, one-tenth to G. L. Threefoot, one-tenth to H. M. Threefoot, one-sixth to G. W. Elkin, one-sixth to C. H. Elkin, and one-sixth to M. Elkin. Conveyer system. 1,632,204; June 14.

Threefoot, Louis, et al. (See Threefoot, L., and Elkin, assignors.)

Thurston, Ernest B., assignor to The Houghton Elevator & Machine Co., Toledo, Ohio. Control mechanism. Re16,658; June 14.

Tiirik, Peter. (See Paulus, R., and Tiirik.)

Tillotson Manufacturing Company, The. (See Ritter, George F., assignor.)

Timken Roller Bearing Company, The. (See Miller, George L.)

Tinker, Frank, Sutton Coldfield, England. Production of petrol. 1,632,011; June 14.

Todd, John S., Hawley, Pa. Let-off means for looms. 1,632,205; June 14.

Todd, William C., and J. W. Pomeroy, Victoria, British Columbia, Canada. Traveling sprinkler. 1,632,353; June 14.

Tolman, Edgar B., jr., assignor to United Conveyor Corporation, Chicago, Ill. Conveying apparatus. 1,632,206; June 14.

Toomey, John F., New York, N. Y., assignor to American Telephone and Telegraph Company. Program-selecting circuits. 1,632,012; June 14.

Torpin, Richard, Superior, Mont. Machine or device for labeling X-ray dental films. 1,632,154; June 14.

Townley, Wheeler E. (Se Dougherty, J. W., and Townley.)

Townsend, Arthur J. (See Naugle, H. M., and Townsend.)

Tracy, George L., St. Louis, Mo. Automatic entrance protector. 1,632,683; June 14.

Trauger, Guy A., Livermore, Iowa. Binder hitch. 1,632,013; June 14.

Treadwell, Albert P., and J. Flournoy, Columbus, Ga. Check valve. 1,632,636; June 14.

Triay, Edward J., jr., Jacksonville, Fla., and P. L. Farmer, Richmond, Me. Apparatus for loading and unloading freight. 1,632,253; June 14.

Tripp, Valentine W., Blue Hill, Nebr. Gauge. 1,632,637; June 14.

Truman, George C. (See Borbeck, R. E., and Truman.)

Trumbull, Frank S., Providence, R. I. Spoon or similar article. Des. 72,877; June 14.

Tuckfield, Charles, East Molesey, England. Internal-combustion engine. 1,632,684; June 14.

Turner, Claude A. P., Minneapolis, Minn., assignor to W. M. Turner. Truss for bridges and the like. 1,632,014; June 14.

Turner, Samuel E., assignor to Panhandle Refining Company, Wichita Falls, Tex. Metal transom cushion-block container. 1,632,523; June 14.

Turner, William M. (See Turner, Claude A. P., assignor.)

Tweedie, Charles, Jefferson City, Mo. Footwear. 1,632,370; June 14.

Tyden, Emil, Evanston, Ill. Valve-seat cutter. 1,632,354; June 14.

U. G. I. Contracting Company, The. (See Fulweiler, W. H., and Jordan, assignors.)

Union Switch & Signal Company, The. (See Beall, Charles R., assignor.)

Union Switch & Signal Company, The. (See McCann, Ronald A., assignor.)

Union Switch & Signal Company, The. (See Nicholson, Frank H., assignor.)

Union Trust Company, et al., trustees, The. (See Sommer, William H., assignor.)

United Conveyor Corporation. (See Tolman, Edgar B., jr., assignor.)

United Electric Company, The. (See Serva, Adam A., assignor.)

United Kingdom Optical Company, Limited. (See Watson, F. B., and Culver, assignors.)

United Metal Box Co. Inc. (See Hammer, Samuel, assignor.)

United Shoe Machinery Corporation. (See Jackson, James E., assignor.)

United Shoe Machinery Corporation. (See Keall, Frank B., assignor.)

United Shoe Machinery Corporation. (See Pearson, Chester L., assignor.)

U. S. Light & Heat Corporation. (See Carpenter, Campbell C., assignor.)

Upp:rcu, Inglis M. (See Williams, Thomas F., assignor.)

Valve Bag Company of America, The. (See Hartman, Louis H., assignor.)

Vance, Arthur J., assignor to The Coe Manufacturing Company, Painesville, Ohio. Drier for sheet material. 1,632,750; June 14.

Vance Engineering Company. (See Buckman, H. W., and Prentice, assignors.)

Van de Water, John W., Hastings-on-the-Hudson, and B. R. Blair, Jackson Heights, assignors to Western Electric Company, Incorporated, New York, N. Y. Testing system. 1,632,048; June 14.

Van Houten, Frank H., assignor to Dutchess Tool Company, Beacon, N. Y. Dough molder. 1,631,992; June 14.

Van Toff, Ernest, Chicago, Ill. Air-cooled engine. 1,632,207; June 14.

Van Valkenburgh, Richard M., assignor to Irving-Pitt Manufacturing Company, Kansas City, Mo. Loose-leaf holder. 1,632,459; June 14.

Vatcher, William H., Los Angeles, Calif. Toothbrush. 1,632,102; June 14.

Venable, William M., Pittsburgh, Pa., assignor to Blow-Knox Company. Bin. 1,632,103; June 14.

Ventresca, Ercole, Houston, Tex. Well-casing cutter. 1,632,015; June 14.

Venzie, Frederick M., Philadelphia, Pa. Plaster block and partition construction formed thereof. 1,632,323; June 14.

Versare Corporation. (See Warhus, Oliver F., assignor.)

Viersen, Paul A. (See Newsham, A. S., Viersen, and Misch.)

Vinogradov, Eugene, New York, N. Y. Window-lighting system. 1,632,254; June 14.

Vollmann, Carl W., Montreal, Quebec, Canada. Gas compressor. 1,632,155; June 14.

Vollmann, Carl W., Montreal, Quebec, Canada. Compressor. 1,632,385; June 14.

Von Schubert, Erich, Berlin, Germany, assignor to Askania-Werke Aktiengesellschaft vormals Centralwerkstatt Dessau und Carl Bamberg-Friedenau, Berlin, Friedenau, Germany. Device for taking photographs. 1,632,770; June 14.

Von Spreecken, Harry. (See Nash, R. E., and Von Spreecken.)

Von Uffel, Herman, Philadelphia, Pa. Luminous phosphorescent and waterproof composition. 1,632,766; June 14.

Vortex Mfg. Co., The. (See Barbieri, Cesare, assignor.)

Voss, Arthur. (See Kränzlein, G., and Voss.)

Wacker, George W., assignor to Pal Radio Company, North Bergen, N. J. Radio receiving apparatus. 1,631,993; June 14.

Wagner, Georges E., St.-Etienne, France. Rotary percussion implement. 1,632,255; June 14.

Walker, David L., et al. (See Modlin, Frank E., assignor.)

Walker, George D., Morgan City, La., assignor to The Texas Company, New York, N. Y. Bundle-tying machine. 1,632,324; June 14.

Walker, James W., Memphis, Tenn. Cultivator. 1,632,638; June 14.

Wallace, Frank W., assignor of one-half to W. G. Oehmig, Chattanooga, Tenn. Vibratory mixer. 1,632,718; June 14.

Walter, Arthur L., Chicago, Ill., assignor to Whiting Corporation, Harvey, Ill. Drop pit. 1,632,256; June 14.

Warhus, Oliver F., Albany, N. Y., assignor to Versare Corporation. Steering mechanism for vehicles. 1,632,460; June 14.

Warner, Alonzo A., assignor to Landers, Frary & Clark, New Britain, Conn. Electrical connection. 1,631,994; June 14.

Warner, Chester E., Berwyn, assignor to Benjamin Electric Manufacturing Company, Chicago, Ill. Plural plug. 1,631,995; June 14.

Waterbury Farrel Foundry and Machine Company, The. (See Candee, Zenas P., assignor.)

Waterman-Waterbury Company, The. (See Cross, John H., assignor.)

Waters, George A., New Kirk, Okla. Pin. 1,632,386; June 14.

Watson, Archibald S., assignor to Detroit Hoist and Machine Company, Detroit, Mich. Hoist. 1,632,571; June 14.

Watson, Frank B., and E. Culver, assignors to United Kingdom Optical Company, Limited, London, England. Lens. 1,632,208; June 14.

Webber, William. (See Benjamin, B. R., and Webber.)

Weber, Valentine, and E. G. Price, Newark, N. J. Thermostatic control mechanism. 1,632,355; June 14.

Webster, Arvin C., Detroit, Mich. Connection for pistons and connecting rods. 1,632,049; June 14.

Weiller, Henry, et al. (See Cooper, William D., assignor.)

Weimer, Roy B., assignor to The Miller Rubber Company, Akron, Ohio. Inflatable toy. 1,632,356; June 14.

Weise, Alfred, New York, N. Y. Pocket umbrella. 1,632,639; June 14.

Weisman, Adolph, Brooklyn, N. Y. Manufacturing metal beds. 1,632,524; June 14.

Welsh, James H., Monmouth, Ill. Road maintainer and grader. 1,632,685; June 14.

Wennemer, Gerard P., assignor to Western Electric Company, Incorporated, New York, N. Y. Protective device. 1,632,050; June 14.

Western Electric Company. (See Bertels, Arnold S., assignor.)

Western Electric Company. (See Brown, John T. L., assignor.)

Western Electric Company. (See Carpenter, Warren W., assignor.)

Western Electric Company. (See Coon, Leslie E., assignor.)

Western Electric Company. (See Coram, Roy E., assignor.)

Western Electric Company. (See Curtis, Austen M., assignor.)

Western Electric Company. (See Farrington, John F., assignor.)

Western Electric Company. (See Ferguson, John G., assignor.)

Western Electric Company. (See Fowler, Clarence B., assignor.)

Western Electric Company. (See Franks, Clem H., assignor.)

Western Electric Company. (See Gent, Edgar W., assignor.)

Western Electric Company. (See Griffin, James T., assignor.)

Western Electric Company. (See Hague, Alfred E., assignor.)

Western Electric Company. (See Hampton, Leon N., assignor.)

Western Electric Company. (See Harrison, Henry C., assignor.)

Western Electric Company. (See Hartley, Ralph V. L., assignor.)

Western Electric Company. (See Hendry, William F., assignor.)

Western Electric Company. (See Housekeeper, William G., assignor.)

Western Electric Company. (See Hubbard, Francis A., assignor.)

Western Electric Company. (See Ives, Herbert E., assignor.)

Western Electric Company. (See Jammer, Jacob S., assignor.)

Western Electric Company. (See Jenkins, George M. O., assignor.)

Western Electric Company. (See Johnson, John B., assignor.)

Western Electric Company. (See Mathes, Robert C., assignor.)

Western Electric Company. (See Merrill, Frank W., assignor.)

Western Electric Company. (See Morton, Charles A., assignor.)

Western Electric Company. (See Mueller, E. C., jr., and Curran, assignors.)

Western Electric Company. (See Newton, Edwin E., assignor.)

Western Electric Company. (See Nordenswan, Robert, assignor.)

Western Electric Company. (See Oswald, A. A., and Nelson, assignors.)

Western Electric Company. (See Porter, Leslie F., assignor.)

Western Electric Company. (See Potts, Louis M., assignor.)

Western Electric Company. (See Schelleng, John C., assignor.)

Western Electric Company. (See Van de Water, J. W., and Blair, assignors.)

Western Electric Company. (See Wennemer, Gerard P., assignor.)

Western Electric Company. (See Zickrick, Lyall, assignor.)

Western Electric Company. (See Zogbaum, Ferdinand, assignor.)

Western Gas Construction Company. (See Stone, Thomas W., assignor.)

Westinghouse Electric and Manufacturing Company. (See Brown, Arthur L., assignor.)

Westinghouse Electric & Manufacturing Company. (See Davis, David C., assignor.)

Westinghouse Electric & Manufacturing Company. (See Else, Harry D., assignor.)

Westinghouse Electric & Manufacturing Company. (See Jablow, Charles, assignor.)

Westinghouse Electric & Manufacturing Company. (See Marbury, Ralph E., assignor.)
Westinghouse Electric & Manufacturing Company. (See Newton, Rex H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Peters, John F., assignor.)
Westinghouse Electric & Manufacturing Company. (See Sparkes, Harry P., assignor.)
Westinghouse Electric & Manufacturing Company, et al. (See Newsham, A. S., Viersen, and Misch, assignors.)
White, Arthur J. (See Mitchell, L. E., and White.)
White, Harold M., Detroit, Mich. Oven door. 1,632,719; June 14.
White, Harry, Kenmore, Ohio. Pump or impeller. 1,632,357; June 14.
Whiting Corporation. (See Walter, Arthur L., assignor.)
Whiting, Donald F., Port Washington, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Transmission circuits. 1,632,104; June 14.
Whitney, Wiley, East Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Telephone system. 1,632,051; June 14.
Whittingham, George H., Baltimore, Md. Terminal for rheostats. 1,632,358; June 14.
Wiley, Samuel, Metuchen, N. J. Universal system of identification markings for projectiles. 1,632,150; June 14.
Wilkes, Clarence H., and G. E. Calhoun, assignors to Amsterdam Cutlery Company, Incorporated, Amsterdam, N. Y. Shears. 1,632,525; June 14.
Willcox, Frederick H., assignor to Freyn, Brassert & Company, Chicago, Ill. Gas-washing system. 1,632,572; June 14.
Willgoos, Andrew V. D., Upper Montclair, N. J., assignor to Wright Aeronautical Corporation. Clutch. 1,632,526; June 14.
Willheim, Raoul, Vienna, Austria, assignor to General Electric Company. Protective system. 1,632,573; June 14.
Williams, Orval L., Kenmore, Ohio. Rail joint. 1,632,359; June 14.
Williams, Thomas F., Fairhaven, N. J., assignor to Inglis M. Uppercu, Deal, N. J. Spring governor. 1,632,257; June 14.
Willys-Overland Company, The. (See Lutz, Hans, assignor.)
Willys-Overland Company, The. (See Rhoads, Harry E., assignor.)
Wilson, Calvin H., McCracken, Kans. Armored truck for transporting valuables. 1,632,360; June 14.
Wilson, John F., St. Louis, Mo. Cutter guard for dado woodworking machines. 1,632,258; June 14.
Wilson, Robert E., Chicago, Ill., and W. H. Bahlke, assignors to Standard Oil Company, Whiting, Ind. Testing device. 1,632,259; June 14.
Winterhoff, Herman E., assignor to Leedy Manufacturing Company, Indianapolis, Ind. Musical bar. 1,632,731; June 14.
Winters, Edwin C., Detroit, Mich. Vehicle wheel. 1,632,527; June 14.
Wired Radio, Inc. (See Crossley, Alfred, assignor.)
Wirrer, Gottfried, Plainfield, N. J., assignor to International Motor Company, New York, N. Y. Final drive for vehicles. 1,631,996; June 14.
Withycombe, Robert M., Sydney, New South Wales, Australia. Withdrawing small quantities of medicaments from receptacles or containers and applying them to the body. 1,632,686; June 14.
Wolf, Charles D., Paris, Ill. Combined ironing board and step ladder. 1,632,721; June 14.
Wolf, Georg, G. m. b. H. (See Loeck, Gunther, assignor.)
Wondra, Franz, Schenectady, N. Y. Internal-combustion turbine. 1,632,157; June 14.
Woodall, John H., Woodland, Ga. Pad for fruit containers. 1,632,722; June 14.
Woodall, Robert B., Malvern, Ark. Garden tool. 1,632,260; June 14.
Woodrow, Oliver B., Newton, Iowa. Adjustable support for electric motors. 1,632,261; June 14.
Woodyard, Laurel C., Lacona, Iowa. Wire stretcher. 1,632,016; June 14.
Wootton, Joseph H., Washington, D. C., assignor to The Ply-Rite Contracting Company, Baltimore, Md. Coating structural surfaces. 1,632,752; June 14.
Worcester Knitting Co., The. (See Barnett, Arthur J., assignor.)
Work, Bertram G., and L. N. Slade, assignors to The B. F. Goodrich Company, New York, N. Y. Reducing garment. 1,632,017; June 14.
Worster, Harold B., Keokuk, Iowa. Bushing tool. 1,632,720; June 14.
Wright Aeronautical Corporation. (See Willgoos, Andrew V. D., assignor.)
Wright, Norman J. (See Sipnel, E. H., and Wright.)
Wright, Oliver S., assignor to Neptune Manufacturing Company, Masontown, Pa. Hair-waving device. 1,632,753; June 14.
Xippas, Socrates, A., Pittsburgh, Pa. Ventilating fan. Re16,656; June 14.
Yanney, George W., assignor to The Alliance Machine Company, Alliance, Ohio. Beet-handling apparatus. 1,632,574; June 14.
Yeary, Don E. (See Yeary, Fred R. and D. E.)
Yeary, Fred R. and D. E., Santa Ana, Calif. Oil friction brake. 1,632,425; June 14.
Young, Samuel C., St. Joseph, La. Carburetor lock. 1,632,687; June 14.
Zbinden, Eugen, assignor to the Firm Sulzer Frères Société Anouyme, Winterthur, Switzerland. Locomotive having combined internal-combustion and electric propulsion system. 1,632,209; June 14.
Zeidler, Hugo, Brooklyn, N. Y. Circular [illegible]. 1,632,528; June 14.
Zickrick, Lyall, Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. [illegible] netic material and producing it. 1,632,105; June 14.
Zisch, George J., West Orange, N. J. Loud-speaking telephone receiver. 1,632,426; June 14.
Zogbaum, Ferdinand, assignor to Western Electric Company, Incorporated, New York, N. Y. Signaling system. 1,632,106; June 14.
Zouck, George H., Orange, N. J., assignor to Franklin Railway Supply Company. Exhaust and separator system for locomotives. 1,632,107; June 14.
Zwoyer, Ellsworth B. A., Perth Amboy, N. J., assignor to The General Fuel Briquette Corp., New York, N. Y. Carbonizing fuel briquettes. 1,632,052; June 14.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 14TH DAY OF JUNE, 1927.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Acid accumulators, Peroxide of lead, zinc, and sulphuric. A. Miolati. 1,632,307; June 14.
Adjusting device. L. E. Baltzley. 1,632,212; June 14.
Aeroplane. H. V. Alexander. 1,632,158; June 14.
Aeroplanes, Bomb dropper for. A. Noan. 1,632,414; June 14.
Air-cooled engine. E. Van Toff. 1,632,207; June 14.
Aircraft, Lighter-than-air. C. D. Burney. 1,632,169; June 14.
Aircraft, Rigid. F. Bauer. 1,632,641; June 14.
Air-pressure regulator. E. M. Morley. 1,632,618; June 14.
Air-supplying apparatus, Cold-. R. Rodriguez. 1,632,680; June 14.
Alarm: *See*—
Burglar alarm.
Alarm mechanism. A. G. Pappadakis. 1,632,499; June 14.
Alarm system. A. M. Curtis. 1,632,059; June 14.
Album. A. W. Engel. 1,632,002; June 14.
Amplifier, Sound. H. W. Pielster. 1,632,040; June 14.
Anchor. W. J. Bauer. 1,632,529; June 14.
Antenna structure. A. A. Oswald and E. L. Nelson. 1,632,039; June 14.
Arc lamps of the sealed type. F. Bahr. 1,632,578; June 14.
Arctic. J. M. Dieta. 1,632,390; June 14.
Asbestos, Cleaning. E. F. Nanfeldt. 1,632,620; June 14.
Autographic register. P. A. Jackson. 1,632,443; June 14.
Automobile body. J. A. Brent. Des. 72,818; June 14.
Automobile body, Convertible. G. Obergfell and E. Patzwahl. 1,632,672; June 14.
Automobile body spring control apparatus. J. B. Drennan. 1,632,728; June 14.
Automobile lock. C. L. Johnson. 1,632,655; June 14.
Automobile radiator or the like. F. de Causse. Des. 72,821; June 14.
Automobile wheel. J. H. Partridge. 1,632,500; June 14.
Automobile wheel. A. T. Sacre. 1,632,382; June 14.
Automobiles, Cranking device for. T. H. LeFever. 1,632,300; June 14.
Automobiles, Lock for. R. Alfisi. 1,632,576; June 14.
Automobiles, Signaling device for. S. L. Jones. 1,632,081; June 14.
Automobiles, Sleeve puller for. E. O. Kroells. 1,632,482; June 14.
Bag: *See*—
Golf bag.
Bag and making it, Multiplex. W. L. Taylor. 1,632,521; June 14.
Ballast-cleaning machine. W. J. Shannon. 1,632,045; June 14.
Bar: *See*—
Musical bar.
Barometer, Mercurial. P. E. Klopsteg and H. P. Sachse. 1,632,084; June 14.
Barometer-setting means. P. R. Jameson. 1,632,736; June 14.
Barrel-reversing mechanism. E. F. Beugler. 1,632,110; June 14.
Bathing suit, Buttonless. A. J. Barnett. 1,632,723; June 14.
Bathroom, Portable. J. F. Murphy. 1,632,668; June 14.
Battery and connecter. S. G. and P. L. Breeden. 1,632,535; June 14.
Battery cell. C. C. Carpenter. 1,632,364; June 14.
Bending and the like. C. Desoutter. 1,632,277; June 14.
Bearing drive and hanger box, Antifriction. G. L. Miller. 1,632,495; June 14.
Bearing metal. P. Kemp and T. Kittl. 1,632,604; June 14.
Bearing, Sand-reel. F. Redick. 1,632,678; June 14.
Bearing shaft. M. Hemleb. 1,631,962; June 14.
Bedpan. A. O. Breaux. 1,632,021; June 14.
Bedpan, Sanitary. A. de Luna. 1,632,645; June 14.
Beds, Manufacturing metal. A. Weisman. 1,632,524; June 14.
Beet-handling apparatus. G. W. Yanney. 1,632,574; June 14.
Beverage dispenser. P. Maiwurm. 1,632,486; June 14.
Bin. W. M. Venable. 1,632,103; June 14.
Binder cover, Loose-leaf. C. M. Conger. 1,632,484; June 14.
Binder hitch. G. A. Trauger. 1,632,013; June 14.
Binders, Lock for loose-leaf. W. J. Steenrod. 1,632,249; June 14.
Birdcage. H. Marcus. 1,632,380; June 14.
Bit: *See*—
Driving bit. Router bit.
Blade-backing machine. H. J. Gaisman and C. Schumacher. 1,632,593; June 14.
Block: *See*—
Bracing block.
Blood-treating process. A. Sternberg. 1,632,321; June 14.
Body adjuster for deceased persons. W. G. Barnes. 1,632,160; June 14.
Boiler: *See*—
Economizer boiler.
Boiler regulator. C. A. French and L. E. Golt. 1,632,125; June 14.
Bolt: *See*—
Shackle bolt.
Bomb, Dummy. E. J. W. Ragsdale. 1,632,147; June 14.
Book cover. E. L. Persons. 1,632,193; June 14.
Book covers, Machine for folding the corners of. C. G. Rolline and C. Norre. 1,632,452; June 14.
Bookkeeping machines and the like, Operating device for. V. J. Hedden. 1,632,228; June 14.
Boot or shoe form. A. Schoshusen. 1,632,044; June 14.
Bottle. C. King. Des. 72,831; June 14.
Bottle. L. B. Koch. 1,632,187; June 14.
Bottle. G. D. Stewart. Des. 72,873; June 14.
Bottle protector. J. A. Pipkin. 1,632,347; June 14.
Bowl. W. H. Magee. Des. 72,861; June 14.
Box: *See*—
Journal box. Vanity box.
Stuffing box.
Box or similar container. J. N. Royal. Des. 72,870; June 14.
Brace: *See*—
Door brace.
Bracing block. E. A. Herrick and T. L. MacBean. 1,632,072; June 14.
Bracket: *See*—
Curtain-rod bracket.
Bracket arms, Insulating washer for brush-holder. R. H. Newton. 1,632,096; June 14.
Braiding machine. E. Krenzler. 1,632,608; June 14.
Brake-beam guide. H. W. Ekholm. 1,632,061; June 14.
Brake: *See*—
Oil friction brake. Truck brake.
Brake control. M. W. McConkey. 1,632,140; June 14.
Brassière and dress shield, Combined. V. Guinzburg. 1,632,547; June 14.
Bridge work. L. A. Klander. 1,632,744; June 14.
Bridges and the like, Truss for. C. A. P. Turner. 1,632,014; June 14.
Brooder. H. A. Christiansen and L. E. Merrick. 1,632,367; June 14.
Brush, Rotary. E. S. Carman and E. E. Curtis. 1,631,998; June 14.
Brushing machine. H. M. Keith. 1,632,705; June 14.
Building blocks, Production of. H. Schlegel. 1,632,317; June 14.
Building construction. T. Rowan. 1,632,453; June 14.
Bumper. J. H. Sager. 1,632,563; June 14.
Bundle-tying machine. G. D. Walker. 1,632,324; June 14.
Burglar alarm. T. R. Castles. 1,632,170; June 14.
Burial vaults, Automatic latching device for. D. D. Myers. 1,632,243; June 14.
Burner: *See*—
Gas burner. Oil burner.
Bushing, Adjustable self-aligning. B. R. Benjamin and W. Webber. 1,632,164; June 14.
Bushing tool. H. B. Worster. 1,632,720; June 14.
Buttons, Machine for the manufacturing of. J. A. Bladh. 1,632,642; June 14.
Cabinet, Dispensing. H. W. Krueger. 1,632,446; June 14.
Cabinet for radio receiving apparatus. E. S. Pridham and P. L. Jensen. Des. 72,869; June 14.
Cabinet, Ticket. E. Axberg. 1,632,265; June 14.
Cable equalizer. E. F. Kleckhefer. 1,632,083; June 14.
Calendar, Desk. G. W. Esau. 1,632,393; June 14.
Calking machine. H. A. Pedrick. 1,632,559; June 14.
Call indicator. E. C. Mueller, jr., and S. T. Curran. 1,632,093; June 14.

Camera attachment. A. G. Atchison. 1,632,690; June 14.
Cam-shaft control. H. M. Fey. 1,632,223; June 14.
Can opening and closing device. F. J. Streit. 1,632,519; June 14.
Can or cartridge, Grease. F. D. Gatchell. 1,632,594; June 14.
Cap, Dust. W. Pockmire. 1,632,503; June 14.
Car coupling. J. W. Easter. 1,632,222; June 14.
Car, Plant service. E. A. Malmgren. 1,632,240; June 14.
Car truck, Railway-. C. L. Charles. 1,632,117; June 14.
Cars, Combined grating and spray for refrigerator. L. and F. L. Cruncleton. 1,632,370; June 14.
Cars, Cross tie for railway. K. C. Gardner. 1,632,181; June 14.
Carbonator. A. L. Koenig. 1,632,409; June 14.
Carburetor. N. Eckles. 1,632,279; June 14.
Carburetor. G. F. Ritter. 1,632,198; June 14.
Carburetor lock. S. C. Young. 1,632,687; June 14.
Carburetors, Evaporator for. V. Pellegrino. 1,632,675; June 14.
Card container and desk tray. W. C. Hlering. 1,632,336; June 14.
Card, Mailing. G. O. Jenner. 1,632,185; June 14.
Carrier: *See*—

Smoking pipe. E. W. Swartwout. 1,632,100; June 14.
Snubber, Hydraulic. A. L. Poudrier. 1,632,041; June 14.
Sound-producing device. F. J. and W. L. Kaehni. 1,632,408; June 14.
Sound reproducer, Electromagnetic. H. C. Hayes. 1,632,332; June 14.
Sound-reproducing mechanism, Adjusting means for. C. E. Pearson. 1,632,416; June 14.
Speed and direction indicator. C. Cobb and C. C. Marshall. 1,632,643; June 14.
Speed-control system. L. Schombourger. 1,632,627; June 14.
Speed-control system. W. Seiz. 1,632,682; June 14.
Speed regulator. K. Schmidt. 1,632,565; June 14.
Speeding reactions, Apparatus for. H. B. Kipper. 1,632,340; June 14.
Spike, Railway. C. W. Jones and R. R. Gordon. 1,632,294; June 14.
Spinning mechanisms, Lubricating and protecting means for. G. F. MacFarlane. 1,631,973; June 14.
Spoon or similar article. F. S. Trumbull. Des. 72,877; June 14.
Spotlights and the like, Controlling switch for. E. G. K. Anderson. 1,632,754; June 14.
Sprayer. H. A. Chaffin and F. C. Holmes. 1,632,218; June 14.
Sprayer. W. M. Smith. 1,632,515; June 14.
Spraying machine. D. W. Smith. 1,632,047; June 14.
Spring: *See*—
Tube spring.
Spring governor. T. F. Williams. 1,632,257; June 14.
Spring motor. J. Buttigieg. 1,632,693; June 14.
Sprinkler: *See*—
Rotary sprinkler. Traveling sprinkler.
Stamp-canceling machine. J. W. Eskholme. 1,632,281; June 14.
Stamped figures, Production of. J. McGreevy. 1,632,305; June 14.
Stand: *See*—
Pocket stand.
Starting device. U. S. Geiger. 1,632,399; June 14.
Station indicator. G. W. Farmer. 1,632,465; June 14.
Steam, Arrangement or system for the generation of. W. Abendroth. 1,632,575; June 14.
Steam-boiler feed. N. E. Lewis. 1,632,301; June 14.
Steam generator. W. B. Ewing. 1,632,438; June 14.
Steam separator. F. F. Emory. 1,632,280; June 14.
Steamship-driving mechanism. A. Fletcher, jr., and J. A. Capstaff. 1,632,543; June 14.
Steel retainer. C. C. Hansen. 1,632,373; June 14.
Sterilizer, Receptacle. C. Braun. 1,632,588; June 14.
Stock-fitting machine. J. E. Jackson. 1,632,232; June 14.
Stocking. I. Patterson. Des. 72,805; June 14.
Stoker, Forced-draft. A. P. Strong. 1,632,423; June 14.
Stoker-ram drive. D. F. Grahame. 1,632,401; June 14.
Storing drying oils. E. M. S. Chandler. 1,631,999; June 14.
Stove. J. Crain. 1,632,176; June 14.
Stove lock, Safety gas. G. Bevilacqua. 1,632,111; June 14.
Stove top, Nonwarping. G. Douglas. 1,632,060; June 14.
Strainer and dirt collector. M. Denney. 1,632,699; June 14.
Strip sheets, Making. H. M. Naugle and A. J. Townsend. Re16,652; June 14.
Structural surfaces, Coating. J. H. Wootton. 1,632,752; June 14.
Stuffing box. J. G. Johnson. 1,632,293; June 14.
Submarine sound receiver. H. C. Hayes. 1,632,331; June 14.
Sweater. J. P. Nissen. 1,632,346; June 14.
Switch: *See*—
Electric switch. Rotary crossover switch.
Electric socket switch. Trolley switch.
Instantaneous switch.
Tables, Attachment for chiropractic. D. D. Evins. Re16,653; June 14.
Tag and tag holder, Price. C. E. Brigel. 1,632,537; June 14.
Tank: *See*—
Liquid-dispensing tank. Oil tank.
Tanks, Valve guide for flushing. C. M. Smith. 1,632,631; June 14.
Tape, Affixing reenforcing. L. H. Hartman. 1,632,005; June 14.
Telegraph transmitting instrument. W. D. Cooper. 1,632,273; June 14.
Telegraphy, Electric transmitter for use in automatic. F. G. Creed. 1,632,274; June 14.
Telegraphy, Printing. E. E. Kleinschmidt. 1,632,297; June 14.
Telephone-exchange system. W. W. Carpenter. 1,632,056; June 14.
Telephone receiver. R. Nordenswan. 1,631,978; June 14.
Telephone receiver, Loud-speaking-. G. J. Zisch. 1,632,426; June 14.
Telephone system. C. B. Fowler. 1,632,063; June 14.
Telephone system. A. E. Hague. 1,632,066; June 14.
Telephone system. L. F. Porter. 1,631,981; June 14.
Telephone system. W. Whitney. 1,632,051; June 14.
Telephone system, Automatic. G. E. Dustin. 1,632,025; June 14.
Telephone system, Automatic. C. E. Lomax. 1,632,009; June 14.
Telephone system, Automatic. F. Lubberger. 1,632,010; June 14.
Telephone system, Automatic. F. Lubberger and E. Hahn. 1,632,343; June 14.
Telephone system, Automatic. C. A. Morton. 1,632,035; June 14.
Teletype machines, Optical receiver for. B. Belin. 1,632,163; June 14.
Tennis nets and the like, Apparatus for supporting lawn-. M. R. Lane. 1,632,553; June 14.
Testing device. A. S. Bertels. 1,632,053; June 14.
Testing device. R. E. Wilson. 1,632,259; June 14.
Testing system. J. W. Van de Water and B. R. Blair. 1,632,048; June 14.
Thermostatic apparatus. J. Němec. 1,632,144; June 14.
Thermostatic control mechanism. V. Weber and E. G. Price. 1,632,355; June 14.
Ticket and securing means therefor. M. B. Behrman. 1,631,954; June 14.
Time-lock mechanism. W. T. Benham and J. E. Dwyer. 1,632,429; June 14.
Timer, Spark. A. R. Mosier. 1,632,413; June 14.
Tire. T. S. Caldwell. Des. 72,819; June 14.
Tire. W. R. Gilliam. Des. 72,825–6; June 14.
Tire. W. C. Martin. 1,632,489; June 14.
Tire. B. H. Pratt. Des. 72,868; June 14.
Tire-building machines, Strip-applying attachment for. C. W. Steele. 1,632,151; June 14.
Tire casings, Flexible spotter for repairing. E. A. Hubbard. 1,632,651; June 14.
Tire-inflation mechanism. E. M. Morley. 1,632,619; June 14.
Tire mold. J. C. Paynter. 1,632,310; June 14.
Tire, Pneumatic. S. A. Steere. 1,632,201; June 14.
Tire-repair scraper. R. W. Fox. 1,632,544; June 14.
Tire-tread-applying machine. H. O. Hutchens and A. R. Krause. 1,632,652; June 14.
Tire, Wheel. N. Gherassimoff. 1,632,731; June 14.
Tires, Interliner for pneumatic. R. H. Mullineaux. 1,632,496; June 14.

Tires, Manufacturing cushion. W. C. Martin. 1,632,490; June 14.
Toaster. H. Ostermann. 1,632,192; June 14.
Tobacco, Growing. G. H. Malott. 1,632,241; June 14.
Tobacco-stripping machine. J. T. Dalton and B. W. Corson. 1,632,177; June 14.
Toilet article. J. W. Dougherty and W. E. Townley. 1,632,392; June 14.
Toilet cover, Sanitary. W. Stelzer. 1,632,455; June 14.
Token system. W. S. Roberts. 1,632,246; June 14.
Tool, Circular forming. H. Zeidler. 1,632,528; June 14.
Tool container. W. C. Clifford. 1,632,172; June 14.
Tool, Garden. R. B. Woodall. 1,632,260; June 14.
Tool, Rim. P. Olabarria. 1,632,191; June 14.
Tool, Rim. E. F. Starke. 1,632,248; June 14.
Tool, Welding. R. Mattice. 1,632,411; June 14.
Tooth-paste holder. H. Lilliford. 1,632,087; June 14.
Toothbrush. W. H. Vatcher. 1,632,102; June 14.
Toy automobile. O. Hiltt. Des. 72,828; June 14.
Toy, Detonating. H. Foerster. 1,632,179; June 14.
Toy electric range. R. Kjenig. 1,632,445; June 14.
Toy film burster, Sounding-. L. H. Strayer. 1,632,518; June 14.
Toy, Inflatable. R. B. Weimer. 1,632,356; June 14.
Toy, Movable feature figure. J. L. Centlivere. 1,632,272; June 14.
Toy, Rocking. A. Sundbeck. Des. 72,874–5; June 14.
Toy set. J. Forchheimer. 1,632,441; June 14.
Toy vehicle. S. M. Mourer. 1,632,308; June 14.
Toy, Wheeled. T. E. Powers. Des. 72,866–7; June 14.
Trace carrier. S. J. Colton. 1,632,368; June 14.
Tractor hitch. W. E. Schultger. 1,632,509; June 14.
Tractor, Tread-belt. E. Pearson. 1,632,674; June 14.
Tractors, Attachment for. L. S. Phelps. 1,632,311; June 14.
Tractors, Drawbar attachment for. R. C. Hawkins. 1,632,070; June 14.
Traffic-controlling apparatus, Railway-. C. R. Beall. 1,632,162; June 14.
Traffic-controlling apparatus, Railway-. R. A. McCann. 1,632,189; June 14.
Traffic signal. L. E. Baltzley. 1,632,211; June 14.
Traffic signal for street crossings, Automatic. M. L. Crawford. 1,632,698; June 14.
Train-pipe coupling, Automatic. J. Robinson. 1,632,714; June 14.
Transformer. C. Bergman. 1,631,955; June 14.
Transformer, Amplifying. C. H. Thordarson. 1,632,101; June 14.
Transformer winding. J. F. Peters. 1,632,097; June 14.
Transmission. G. B. Coleman. 1,632,696; June 14.
Transmission, Automatic. G. B. Coleman. 1,632,694–5; June 14.
Transmission circuits. D. F. Whiting. 1,632,104; June 14.
Transmission-housing cover-locking means. C. L. Johnson. 1,632,656; June 14.
Transmission mechanism, Motor-vehicle. J. A. Stumpenhorst. 1,632,634; June 14.
Transportation system. H. E. Taylor. 1,632,569; June 14.
Traveling sprinkler. W. C. Todd and J. W. Pomeroy. 1,632,353; June 14.
Trimmer: *See*—
Lawn trimmer. Lawn-edge trimmer.
Trolley switch. C. L. Moon. 1,632,557; June 14.
Truck brake, Warehouse-. J. H. Brown. 1,632,217; June 14.
Truck for transporting valuables, Armored. C. H. Wilson. 1,632,360; June 14.
Truck, Guiding. C. Jablow. 1,632,077; June 14.
Trunk lock. M. Rasmussen. 1,632,195; June 14.
Truss, Rupture or hernia. E. Giffhorn. 1,632,065; June 14.
Tube: *See*—
Vacuum tube. X-Ray tube.
Tube mills, etc., Liner for. P. T. Lindbard. 1,631,971; June 14.
Tube mills, Liner for. P. T. Lindbard. 1,631,972; June 14.
Tube spring, Bourdon-. J. C. Shaw. 1,632,749; June 14.
Tubes, Apparatus for producing pneumatic. W. L. Fairchild. 1,632,394; June 14.
Tubes, Determining inequalities in wall thickness of. F. A. Hubbard. 1,632,076; June 14.
Tubular articles from pulpous material, Producing. C. H. Franks. 1,632,398; June 14.
Turbine, Internal-combustion. F. Wondra. 1,632,157; June 14.
Turbines, Stationary guide-nozzle construction and assembly for. F. Lösel. 1,632,448; June 14.
Typewriting machine. R. J. Lewis. 1,631,970; June 14.
Typewriters, Manifolding attachment for. H. M. Armistead. 1,632,362; June 14.
Typewriters, Variable-spacing platen clutch for. H. M. Armistead. 1,632,361; June 14.
Umbrella, Pocket. A. Weise. 1,632,639; June 14.
Underwear, Shoulder strap for ladies'. O. Schweigert. 1,632,716; June 14.
Union, Adjustable. E. Price and W. A. Pfister. 1,632,042; June 14.
Universal joint. A. Y. Dodge. 1,632,121; June 21.
Universal joint. G. J. Thomas. 1,632,202; June 14.
Urn. H. H. Schott. Des. 72,872; June 14.
Vacuum tube. L. E. Mitchell and A. J. White. 1,632,615; June 14.
Valve. T. W. Demarest. 1,632,220; June 14.
Valve, Check. A. P. Treadwell and J. Flournoy. 1,632,636; June 14.
Valve for locomotives, cylindrical. E. M. Shannon. 1,632,629; June 14.
Valve for soda fountains. Carbonated-water cut-off. O. Sasser. 1,632,625; June 14.
Valve for use in fish stalls and like places, Automatic. F. M. Spurr. 1,632,516; June 14.
Valve mechanism for dispensing fluids. N. M. Patrick and P. W. Horn. 1,632,501; June 14.
Valve, Mixing. G. J. Morris. 1,632,450; June 14.
Valve, Pneumatic. G. M. O. Jenkins. 1,632,079; June 14.
Valve, Pressure-regulating. W. C. Heydecker, jr. 1,632,406; June 14.
Valve-seat cutter. E. Tyden. 1,632,354; June 14.
Valve-spring compressor. C. Haya and W. M. Thomas. 1,632,288; June 14.
Valve, Triple. C. A. Campbell. 1,632,756–7; June 14.
Vanity box. A. S. Lybne. 1,632,410; June 14.
Vanity case. N. Kasdan and D. Pollack. 1,631,964; June 14.
Vapor cooling system. L. P. Barlow. 1,632,580; June 14.
Vapor cooling system. L. V. Grantier. 1,632,596; June 14.
Vaporization end point, Method and apparatus for determining equilibrium. C. E. Parsons and R. Stevenson. 1,632,748; June 14.
Vegetable cleaner. H. W. Meyer. 1,632,142; June 14.
Vehicle. A. W. Harrison. 1,632,405; June 14.
Vehicle signal. E. Anderson. 1,632,689; June 14.
Vehicle wheel. C. B. Allen. 1,632,427; June 14.
Vehicle wheel. E. C. Winters. 1,632,527; June 14.
Vehicles, Convertible seat for motor. T. G. Johnson. 1,632,233; June 14.
Vehicles, Final drive for. G. Wirrer. 1,631,996; June 14.
Vehicles, Multiwheel drive for. A. F. Masury and C. Froesch. 1,631,975; June 14.
Vehicles, Short-turn device for motor. W. E. Mitchell. 1,632,665; June 14.
Vehicles, Side windshield for. C. A. Sayers. 1,632,564; June 14.
Vehicles, Steering mechanism for. O. F. Warhus. 1,632,460; June 14.
Velocipede. W. W. and W. V. Morrill. 1,632,092; June 14.
Ventilator canopy. R. E. Peck. 1,632,381; June 14.
Vessels, Closure for. A. Mauser. 1,632,031; June 14.
Vibratory mixer. F. W. Wallace. 1,632,718; June 14.
Violin bows, Finger grip for. J. Gaynor. 1,632,003; June 14.
Vise. J. Brogden. 1,632,538; June 14.
Visor, Automobile windshield. O. E. Grigsby. 1,632,474; June 14.
Waffle iron. A. H. Simmons. 1,632,630; June 14.
Wagons, Steering mechanism for coaster. E. S. Showers. 1,632,384; June 14.
Wall bracket. M. Klein. Des. 72,835; June 14.
Wall bracket. M. Klein. Des. 72,837; June 14.
Wall bracket. M. Klein. Des. 72,840; June 14.
Wall bracket. M. Klein. Des. 72,846; June 14.
Wall bracket. M. Klein. Des. 72,848; June 14.
Wall bracket. M. Klein. Des. 72,850–1; June 14.
Wall-building device. G. J. Seller. 1,632,514; June 14.
Wall furnace. J. S. Andrews. Re16,657; June 14.
Wall panel. R. M. Brown. 1,632,431; June 14.
Warm-air generator. C. A. Stoll. 1,632,250; June 14.
Warp beams, Warp-end holder for. A. A. Gordon. 1,632,472; June 14.
Washer-drive mechanism. H. W. Mitchell. 1,632,091; June 14.
Washing machine. J. S. Jenks. 1,632,407; June 14.
Washing machines, Eccentric driving mechanism for power. H. J. Criner. 1,632,118; June 14.
Washing machines, Holder for. F. A. Hoffer. 1,632,735; June 14.
Watch straps, Connecter for wrist-. W. A. Davis. 1,632,178; June 14.
Water barrier. W. H. Gillen. 1,632,545; June 14.
Water meter. W. L. Marden. 1,632,554; June 14.
Water softeners, Control mechanism for. L. G. Lindsay. 1,632,610; June 14.
Wave lengths, Adjustment of. G. H. Clark. Re16,651; June 14.
Wave-transmission system. R. V. L. Hartley. 1,632,069; June 14.
Wave transmission system, Two-way. J. F. Farrington. 1,632,282; June 14.
Waxer and polisher. J. S. Judge. 1,632,481; June 14.
Weighing machine, Automatic liquid-. J. J. Fortier. 1,631,957; June 14.
Weighing mechanism, Recording. J. Holm. 1,632,006; June 14.
Welding rod. J. B. Green. 1,632,546; June 14.
Well-casing cutter. E. Ventresca. 1,632,015; June 14.
Well-drilling apparatus, Rotary. E. A. Reed. 1,632,713; June 14.
Well-sealing device. H. H. Breene. 1,632,271; June 14.
Wheel: *See*—
Automobile wheel. Vehicle wheel.
Last-scouring wheel.

Wheel-hub construction. J. Bingham. 1,632,214; June 14.
Wheel rims, Device for expanding. W. A. Anderson. 1,632,263; June 14.
Winders, Stop motion for. E. H. Ryon. 1,632,507; June 14.
Winding machine. W. G. Houskeeper. 1,632,075; June 14.
Windmill. L. S. Stripling. 1,632,322; June 14.
Windmill construction. H. M. Loeber. 1,632,188; June 14.
Window construction. W. Fairley. 1,632,700; June 14.
Window-lighting system. E. Vinogradov. 1,632,254; June 14.
Window screen. J. T. Cook. 1,632,022; June 14.
Window stop. C. T. Hansen. 1,632,132; June 14.
Window structure. E. C. Healy. 1,632,333; June 14.
Windows and the like, Automatic closer for. L. V. Blue. 1,632,532; June 14.
Windshield attachment. F. R. Rhodes. 1,632,679; June 14.
Wireless telephony and other purposes, Loud speaker for. P. Grassmann. 1,632,287; June 14.
Wire stretcher. L. C. Woodyard. 1,632,016; June 14.
Wood and the like, Preserving. C. Schantz. 1,632,508; June 14.
Woodworking machine, Cutter guard for dado. J. F. Wilson. 1,632,258; June 14.
Work-driving device. R. A. Ashton. 1,632,018; June 14.
Wrapping machine. F. E. Modlin. 1,632,344; June 14.
X-ray dental films, Machine or device for labeling. R. Torpin. 1,632,154; June 14.
X-ray tube. G. Holst and A. Bouwers. 1,632,230; June 14.

CLASSIFICATION OF PATENTS

ISSUED JUNE 14, 1927.

NOTE.—First number=class, second number=subclass, third number=patent number.

1— 3: 1,632,374
10: 1,632,085
2— 29: 1,632,017
54: 1,632,547
67: 1,632,723
73: 1,632,137
79: 1,632,100
90: 1,632,346
131: 1,631,985
187: 1,632,598
198: 1,632,503
253: 1,632,660
3— 9: 1,632,277
4— 56: 1,632,631
112: 1,632,021
1,632,645
176: 1,632,668
247: 1,632,455
5— 112: 1,632,114
320: 1,632,108
10— 43: 1,632,703
137: 1,632,671
12— 27: 1,632,232
128.2: 1,632,044
14— 3: 1,632,014
15— 7: 1,632,705
114: 1,632,481
120: 1,632,470
167: 1,632,102
181: 1,631,998
16— 33: 1,632,435
86: 1,632,132
128: 1,632,415
171: 1,632,116
17— 3: 1,632,200
8: 1,632,194
18— 18: 1,632,651
3.5: 1,632,559
38: 1,632,394
42: 1,632,310
50: 1,632,759
53: 1,632,617
1,632,666
1,632,667

Coal. W. G. Block Company. 229,248; June 21; Serial No. 241,861; published Mar. 29, 1927.

Coal. Central Pocahontas Coal Company. 229,095; June 21; Serial No. 242,226; published Mar. 29, 1927.

Coal. Dexter-Carpenter Coal Company. 229,251; June 21; Serial No. 244,058; published Apr. 5, 1927.

Coal. Dexter-Carpenter Coal Company. 229,252; June 21; Serial No. 244,062; published Apr. 5, 1927.

Cryolite. Pennsylvania Salt Manufacturing Company. 229,256; June 21; Serial No. 244,105; published Apr. 5, 1927.

Furs and skins. Nathan L. Weill, Inc. 229,138; June 21; Serial No. 243,734; published Apr. 5, 1927.

Leather. Barnet Leather Co. 229,278; June 21; Serial No. 243,919; published Apr. 5, 1927.

Rubber. Naamlooze Vennootschap Rubber Cultuur Maatschappij Amsterdam. 229,237; June 21; Serial No. 241,428; published Mar. 29, 1927.

Seeds, Flower, garden, and field. Forrest Seed Co. Inc. 229,236; June 21; Serial No. 241,334; published Apr. 5, 1927.

Seeds, Lawn-grass. Albert Dickinson Company. 229,188; June 21; Serial No. 243,186; published Mar. 29, 1927.

Soapstone, uncured sheet rubber, uncured camel-back rubber, etc. Fisk Rubber Company. 229,186; June 21; Serial No. 243,146; published Mar. 29, 1927.

Tar, pitch, etc. Tar Products Corporation. 229,083; June 21; Serial No. 229,416; published Mar. 29, 1927.

CLASS 2.

Cases, Mailing. Improved Mailing Case Co. 30,474; renewed Aug. 3, 1927.

Compacts, Dental. Denti-Kompak Company. 229,089; June 21; Serial No. 232,995; published Aug. 17, 1926.

Metal goods. Kelley-How-Thomson Co. 63,499; renewed June 25, 1927.

Stationery, Miscellaneous. Tiffany & Company. 30,599; renewed Oct. 5, 1927.

CLASS 4.

Ink remover for type. W. H. Young Corporation. 229,176; June 21; Serial No. 226,324; published Mar. 29, 1927.

Polish, Stove. H. C. Bomhard. 62,495; renewed May 7, 1927.

Soap. James S. Kirk & Company. 229,232; June 21; Serial No. 240,981; published Feb. 15, 1927.

Soap. Robinson Bros. & Company Incorporated. 65,760; renewed Oct. 22, 1927.

CLASS 6.

Antifreeze mixture for use in the radiators of motor vehicles. G. P. Keesee. 229,055; June 21; Serial No. 243,315; published Apr. 12, 1927.

Antiseptic compound. Voigt & Co. 65,745; renewed Oct. 22, 1927.

Carbonic-acid gas, Compressed. Aerator's Limited. 30,214; renewed June 15, 1927.

Chemical compounds, preparations, and powders. Lovis' Cove Gift Shop, Inc. 229,090; June 21; Serial No. 244,455; published Apr. 12, 1927.

Chemical preservatives for meats, meat products, sausage, etc. Preservaline Manufacturing Company. 229,065; June 21; Serial No. 242,498; published Apr. 12, 1927.

Coal-tar-colors including artificial indigo. Farbwerke vorm. Meister Lucius & Brüning. 63,778; renewed July 9, 1927.

Corn cure. A. Giuliani. 229,317; June 21.

Cough sirup. S. L. Fuller. 229,294; June 21; Serial No. 244,296; published Apr. 12, 1927.

Cream, Dental. Colgate & Company. 229,287; June 21; Serial No. 244,001; published Apr. 12, 1927.

Cream, Face. San-I-Sal Laboratories, Inc. 229,181; June 21; Serial No. 243,117; published Apr. 12, 1927.

Creams, lotions, rouges, powders, etc. H. E. Zutz. 229,139; June 21; Serial No. 243,737; published Apr. 12, 1927.

Deodorant, Toilet, Viking Laboratories, Incorporated. 229,268; June 21; Serial No. 244,254; published Apr. 12, 1927.

Fumigants intended for use as an exterminator of bugs, larva, etc. Isco Chemical Company. 229,338; June 21.

Hairdressing, tooth wash, etc. Joseph Burnett Company. 229,309; June 21; Serial No. 242,706; published Apr. 12, 1927.

Herb extracts for medicinal beverages. Egon Braun Aktiengesellschaft. 229,072; June 21; Serial No. 235,946; published Apr. 12, 1927.

Insecticide or powder. Fly. I. Silverman. 229,034; June 21; Serial No. 243,288; published Apr. 12, 1927.

Insecticides, meat-curing preparations and compounds, food colors, chemical preparations, etc. B. Heller & Company. 229,125; June 21; Serial No. 243,491; published Apr. 12, 1927.

Laxative. W. D. Carlin. 229,314; June 21.

Lime, Hydrated. Chemical Lime Company. 229,225; June 21; Serial No. 242,983; published Apr. 12, 1927.

Lime, Hydrated. Chemical Lime Company. 229,226; June 21; Serial No. 242,895; published Apr. 12, 1927.

Lip stick, depilatory, astringent lotion, almond cream, etc. A. H. Arit. 229,148; June 21; Serial No. 245,316; published Apr. 12, 1927.

Lotion, Skin. Viking Laboratories, Incorporated. 229,269; June 21; Serial No. 244,255; published Apr. 12, 1927.

Medicated wines. H. S. Wellcome. 64,465; renewed Aug. 6, 1927.

Medicinal plasters. N. C. Becker. 30,595; renewed Sept. 28, 1927.

Medicine. B. A. Hardy. 229,042; June 21; Serial No. 245,093; published Apr. 12, 1927.

Medicine. M. Kono. 229,035; June 21; Serial No. 243,372; published Apr. 12, 1927.

Mineral substances. W. R. Ewing. 229,334; June 21.

Mouth wash. Duborel Corporation. 229,318; June 21.

Oils. Technische Chemikalien-Compagnie G. m. b. H. 229,061; June 21; Serial No. 242,555; published Apr. 12, 1927.

Ointment. Good Samaritan Ointment Company. 55,682; renewed Aug. 21, 1927.

Perfumes. H. H. Erwin Co. 229,293; June 21; Serial No. 244,350; published Apr. 12, 1927.

Poison-ivy extract. H. K. Mulford Company. 229,039; June 21; Serial No. 243,449; published Apr. 12, 1927.

Polish, Nail. I. Selkow. 229,341; June 21.

Powder for photographic use, Flash. I. C. Newman Co. Inc. 229,274; June 21; Serial No. 243,821; published Apr. 12, 1927.
Powder, Skin. G. S. Heyer. 229,062; June 21; Serial No. 242,538; published Apr. 12, 1927.
Preparation for chemically blackening red stove lids. A. H. Paradis. 229,044; June 21; Serial No. 245,159; published Apr. 12, 1927.
Preparation for the treatment of chills, fever, etc. F. G. Usry. 229,046; June 21; Serial No. 245,170; published Apr. 12, 1927.
Preparations for protecting animal substances. I. G. Farbenindustrie Aktiengesellschaft. 229,096; June 21; Serial No. 242,170; published Apr. 12, 1927.
Preparations for soldering and coating metals. Küpper's Metallwerke Gesellschaft mit beschränkter Haftung. 63,910; renewed July 16, 1927.
Preparations for treating the hair and skin, hair tonic, tonic brilliantine, vanishing and scalp cream, etc. A. C. Smith. 229,223; June 21; Serial No. 242,860; published Apr. 12, 1927.
Preparations or medicines for pains and aches of nervous or organic origin, etc. Bayer Company. 229,153; June 21; Serial No. 244,738; published Apr. 12, 1927.
Product used in the treatment of arthritis and psoriasis. Harrower Laboratory, Inc. 229,119; June 21; Serial No. 244,613; published Apr. 12, 1927.
Product used in the treatment of status calciprivia, etc. Harrower Laboratory, Inc. 229,118; June 21; Serial No. 244,612; published Apr. 12, 1927.
Purgative, effervescent. R. L. Irizarry. 229,289; June 21; Serial No. 244,013; published Apr. 12, 1927.
Remedies, Cough. E. J. Sormani. 65,005; renewed Nov. 5, 1927.
Remedies for diseases of women. H. and H. E. Law. 63,595; renewed June 25, 1927.
Remedy for catarrh. Hakka Chemical Company. 65,554; renewed Oct. 8, 1927.
Rouge, lip sticks, face powder, talcum powder, etc. Palmolive Company. 229,076; June 21; Serial No. 245,027; published Apr. 12, 1927.
Salt. International Salt Company. 229,297; June 21; Serial No. 239,177; published Dec. 7, 1926.
Salves. Bickmore Gall Cure Company. 30,113; renewed June 1, 1927.
Salves. H. E. Bucklen & Company. 64,460; renewed Aug. 6, 1927.
Serum for the prevention of hay fever, Curative. Serum Laboratorium Ruete Enoch. 63,650; renewed July 2, 1927.
Starch tablets. J. L. Prescott Company. 229,045; June 21; Serial No. 245,161; published Apr. 12, 1927.
Sulphate of copper, iron sulphate, and copper carbonate. Mountain Copper Co. 229,146; June 21; Serial No. 245,284; published Apr. 12, 1927.
Tonic, Hair. J. N. Hanna. 229,075; June 21; Serial No. 245,010; published Apr. 12, 1927.
Tonic, Hair. A. P. Rudy. 229,041; June 21; Serial No. 245,031; published Apr. 12, 1927.

CLASS 7.

Rope, cord, twine, or other cordage. Columbia Rope Company. 229,319; June 21.

CLASS 8.

Pipes, Smoking. Benjamin Pipe Company. 229,142; June 21; Serial No. 243,797; published Apr. 12, 1927.

CLASS 11.

Typewriter ribbons and carbon paper. Monarch Typewriter Company. 66,084; renewed Nov. 5, 1927.

CLASS 12.

Asphalt compound. Pioneer Paper Company. 229,283; June 21; Serial No. 243,965; published Apr. 5, 1927.
Asphalt emulsion. Sterling Products Company. 229,127; June 21; Serial No. 243,509; published Apr. 5, 1927.
Board and lumber, Composite. MacAndrews & Forbes Company. 229,304; June 21; Serial No. 237,376; published Mar. 29, 1927.
Building blocks, tile, etc. Atlantic Gypsum Products Company. 229,132; June 21; Serial No. 243,639; published Apr. 5, 1927.
Building insulation, calcined gypsum, etc., Powdered heat and cold. United States Gypsum Company. 229,086; June 21; Serial No. 231,574; published Mar. 29, 1927.
Cement. Standard Fuel Engineering Company. 229,052; June 21; Serial No. 243,566; published Apr. 5, 1927.
Cement. West Penn Cement Company. 229,241; June 21; Serial No. 241,552; published Apr. 5, 1927.
Flooring. Kerry & Hanson Flooring Co. 229,085; June 21; Serial No. 231,048; published Mar. 29, 1927.
Ganister. Thomas E. Gray & Co. Ltd. 229,302; June 21; Serial No. 237,805; published Mar. 29, 1927.
Lime plaster. Marblehead Lime Company. 229,342; June 21.
Lumber. Darling-Singer Lumber Co. 229,135; June 21; Serial No. 243,689; published Apr. 5, 1927.
Lumber. W. L. Kann. 229,222; June 21; Serial No. 242,786; published Apr. 5, 1927.
Lumber and planing-mill products. Weyerhaeuser Forest Products. 229,103; June 21; Serial No. 242,073; published Apr. 5, 1927.
Lumber, Aromatic cedar. Chickamauga Cedar Company. 210,644; Dec. 22, 1925.
Lumber, Rough and dressed. J. M. Card Lumber Co. 65,887; renewed Oct. 29, 1927.
Lumber, woodwork, and lath. Western Pine Manufacturers Association. 229,057; June 21; Serial No. 243,333; published Mar. 29, 1927.
Partition structures, Collapsible. H. W. Maurer. 229,215; June 21; Serial No. 239,888; published Mar. 29, 1927.
Plastic material. Sterling Products Company. 229,126; June 21; Serial No. 243,508; published Apr. 5, 1927.
Roofing and shingles, Asphalt. Hyjo Co. (Not Inc.). 229,305; June 21; Serial No. 237,076; published Mar. 29, 1927.
Structural-steel members. American Finance & Commerce Company. 229,134; June 21; Serial No. 243,680; published Apr. 5, 1927.

CLASS 13.

Casters, Ball-bearing. Acme Ball-Bearing Company. 63,387; renewed June 18, 1927.
Valves. Ashton Valve Company. 65,468; renewed Oct. 8, 1927.

CLASS 14.

Cast steel, castings, and forgings. Thos. Firth & Sons, Limited. 229,200; June 21; Serial No. 233,367; published Mar. 29, 1927.
Iron and tool steels, machinery steels, and alloy and other steels. Wheelock, Lovejoy & Company. 229,182–3; June 21; Serial Nos. 243,123–4; published Mar. 29, 1927.
Lead, roof flanges, solder, etc., Pig. Eagle-Picher Lead Company. 229,243–5; June 21; Serial Nos. 241,704–6; published Apr. 5, 1927.

CLASS 15.

Candles. M. K. Baker. 229,336; June 21.
Candles. Smith & Nichols, Incorporated. 229,111; June 21; Serial No. 244,575; published Apr. 5, 1927.
Candles. Smith & Nichols, Incorporated. 229,112; June 21; Serial No. 244,576; published Apr. 12, 1927.
Candles. Smith & Nichols, Incorporated. 229,113; June 21; Serial No. 244,577; published Apr. 5, 1927.
Gasoline. Trinidad Oil Company. 229,207; June 21; Serial No. 235,537; published Apr. 12, 1927.
Gasoline, illuminating and lubricating oils and greases. S. M. Willock. 64,424; renewed May 7, 1927.
Gasoline, kerosene, lubricating oil, etc. Mayflower Oil Company. 229,179; June 21; Serial No. 226,816; published Apr. 5, 1927.
Greases, gear lubricants, and motor oils, Gear. Phoenix Oil Co. 229,301; June 21; Serial No. 237,919; published Nov. 23, 1926.
Oils and greases, Lubricating. W. L. Hagenbaugh. 229,196; June 21; Serial No. 200,554; published Oct. 14, 1924.
Oils and greases, Lubricating. W. L. Hagenbaugh. 229,197; June 21; Serial No. 200,556; published Oct. 14, 1924.
Oils, Cutting. E. F. Houghton & Co. 229,291; June 21; Serial No. 244,401; published Apr. 5, 1927.
Oils, Illuminating. S. M. Willock. 62,426; renewed May 7, 1927.
Oils, Lubricating. Pierce Petroleum Corporation. 229,339; June 21.
Oils, Lubricating. S. M. Willock. 62,425; renewed May 7, 1927.
Petroleum products. Midwest Oil Company. 229,327; June 21.

CLASS 16.

Colors, poster paints, and powdered colors sized, Water. E. C. Barker. 229,242; June 21; Serial No. 241,557; published Mar. 29, 1927.
Lacquers. Arco Company. 229,122; June 21; Serial No. 243,073; published Mar. 29, 1927.
Oil, Prepared linseed. Glidden Varnish Company. 63,874; renewed July 9, 1927.
Paint. Victor Engineering Corporation. 229,290; June 21; Serial No. 244,037; published Apr. 5, 1927.
Paint, Insulating. Toch Brothers. 65,691; renewed Oct. 15, 1927.
Paint pigments. Aluminum Company of America. 229,295–6; June 21; Serial Nos. 244,268–9; published Mar. 29, 1927.
Paint, Ready-mixed. Ledgerwood Brothers. 229,343; June 21.
Paint, Semigloss enamel-finish. Wadsworth-Howland Company. 229,066; June 21; Serial No. 242,401; published Apr. 5, 1927.
Paints and paint thinner, etc., Textile. G. Reis & Bro., Inc. 229,266; June 21; Serial No. 244,242; published Apr. 5, 1927.
Paints and painters' materials. Lowe Brothers Company. 64,985; renewed Sept. 3, 1927.
Paints and varnishes. Calhon Company. 229,329; June 21.
Paints and varnishes, Floor, house, and barn. Kelley-How-Thomson Co. 65,200; renewed Sept. 10, 1927.
Paints, enamels, etc., Dry, paste, and ready-mixed. W. E. Greene. 229,136; June 21; Serial No. 243,699; published Mar. 29, 1927.

Paints, paint enamels, lacquers, paint oils. V. C. Wogoman. 229,164; June 21; Serial No. 244,906; published Apr. 5, 1927.
Paints, varnishes, stains, and paint enamels. Roberts, Glazebrook & Co. Ltd. 229,204; June 21; Serial No. 234,872; published Apr. 5, 1927.
Polishing fluid for floors. Hillyard Chemical Company. 229,264; June 21; Serial No. 244,229; published Mar. 29, 1927.

CLASS 17.

Cigarettes. La Berberian. 229,168; June 21; Serial No. 244,975; published Apr. 12, 1927.
Cigarettes. S. S. Pierce Co. 229,043; June 21; Serial No. 245,106; published Apr. 12, 1927.
Stogies. C. J. Cheney. 229,124; June 21; Serial No. 244,742; published Apr. 12, 1927.
Tobacco and cigarettes, Smoking. Christian Peper Tobacco Co. 229,324; June 21.
Tobacco, cigars, cigarettes, and snuff, Smoking. New Firm De Erven de Wed. J. van Nelle. 65,877; renewed Oct. 29, 1927.
Tobacco, Smoking and chewing. Penn Tobacco Company. 66,143; renewed Nov. 12, 1927.

CLASS 19.

Lubricants from axle housings of automobiles, Devices for preventing leakage of. R. E. Fulton. 229,828; June 21.

CLASS 21.

Batteries, battery chargers, and parts thereof, Storage. Automotive Battery Corp. 229,078; June 21; Serial No. 236,190; published Apr. 5, 1927.
Batteries, Dry. Manhattan Electrical Supply Company. 62,907–8; renewed May 28, 1927.
Battery eliminator. Kellogg Switchboard and Supply Co. 229,198; June 21; Serial No. 208,522; published Apr. 12, 1927.
Battery terminals, plugs, screws, and bushings, Storage. Imperial Brass Manufacturing Company. 229,206; June 21; Serial No. 235,303; published Apr. 5, 1927.
Cables. National Metal Molding Company. 229,349; June 21.
Cables with nonmetallic protective covering. American Circular Loom Company. 229,088; June 21; Serial No. 232,240; published Apr. 12, 1927.
Connecters. Electric Outlet Company. 229,352; June 21.
Electric fire alarms, Automatic. M. C. Kroeger. 229,246; June 21; Serial No. 241,730; published Apr. 12, 1927.
Electric motors. United States Electrical Manufacturing Company. 229,120; June 21; Serial No. 244,638; published May 3, 1927.
Electrical cabinets, switches, switch boxes, etc. Square D. Company. 229,192; June 21; Serial No. 172,616; published Apr. 12, 1927.
Electrical equipment. Hub-Way Manufacturing Company. 229,059; June 21; Serial No. 242,588; published Apr. 12, 1927.
Electrical fittings. Erie Malleable Iron Company. 229,177; June 21; Serial No. 226,481; published Apr. 5, 1927.
Electrical transformers and equipment therefor. Westinghouse Electric & Manufacturing Company. 229,199; June 21; Serial No. 233,841; published Apr. 5, 1927.
Fans, Electric. Hunter Fan & Motor Co. 229,258; June 21; Serial No. 244,158; published Apr. 12, 1927.
Fans, Electrical. Piqua Electric Service Co. 229,238; June 21; Serial No. 241,436; published Apr. 12, 1927.
Insulated electric wire and cables. John A. Roeblings Sons Company. 63,853; renewed July 9, 1927.
Insulating material and rubber substitute. W. T. Glover & Co. 29,989; renewed May 11, 1927.
Irons, soldering irons, sandwich machines, and steam tables, Electric pressing. All Rite Company. 229,335; June 21.
Lamps, lanterns, toggle switches, fuse plugs, etc., Electric. Perkins Marine Lamp Corporation. 229,175; June 21; Serial No. 225,965; published June 22, 1926.
Wire terminals and cables. K-E-M Manufacturing & Sales Co. 229,272; June 21; Serial No. 243,812; published Apr. 12, 1927.

CLASS 22.

Baits, Artificial. James Heddon's Sons. 229,100; June 21; Serial No. 242,125; published Apr. 12, 1927.
Balls, gloves, golf bags, etc. P. Goldsmith Sons Company. 229,344; June 21.
Dolls. A. A. Gerling. 229,145; June 21; Serial No. 245,263; published Apr. 12, 1927.
Tennis rackets, baseball bats, skis, and golf clubs. H. W. Hall. 229,067; June 21; Serial No. 242,373; published Apr. 12, 1927.

CLASS 23.

Axes. Kelly Axe Manufacturing Co. 80,835; renewed Nov. 9, 1927.
Carbonators, special soda fountains, and fountain equipment. Kompact Products Corporation. 229,348; June 21.
Cutlery and edge tools. Kelley-How-Thomson Co. 63,395; renewed June 18, 1927.
Hammers, screw drivers, and shovels. Kelley-How-Thomson Co. 63,396; renewed June 18, 1927.
Machinery and fixtures therefor, Experimental. Peco Manufacturing Company. 229,265; June 21; Serial No. 244,240; published Apr. 12, 1927.
Machinery, Rubber-mill. Birmingham Iron Foundry. 65,936; renewed Oct. 29, 1927.
Mowers, Lawn. Kelley-How-Thomson Co. 63,500; renewed June 25, 1927.
Plows, cultivators, and stock parts or shapes therefor. Star Manufacturing Company. 62,597; renewed May 14, 1927.
Saw blades. J. F. Gleason. 229,124; June 21; Serial No. 243,488; published Apr. 12, 1927.
Sewing machines. Kelley-How-Thomson Co. 63,398; renewed June 18, 1927.

CLASS 24.

Drying and dry-cleaning machines. American Laundry Machinery Co. 229,275; June 21; Serial No. 243,839; published Apr. 12, 1927.

Signals for automobiles, Mechanically-operated direction. J. L. McGrane. 247,338; June 21.
Tools and equipment, Machine. Cox Cylinder Works. 247,675; June 21.
Water-softening apparatus. Dayton Pump & Manufacturing Company. 248,093; June 21.

CLASS 24.

Wringers, Clothes. Comfeld Washer Co. 246,466; June 21.

CLASS 26.

Patterns, Shoe. L. J. Ewing. 247,682; June 21.
Synchronized apparatus and parts of such apparatus. Vitaphone Corporation. 235,441; June 21.

CLASS 29.

Mops and unimpregnated dust cloths, Dust. C. J. Evans. 242,828; June 21.
Powder puffs. Western Bottle Manufacturing Company. 247,836; June 21.
Powder puffs. Western Bottle Manufacturing Company. 248,069; June 21.

CLASS 31.

Refrigerating apparatus. Gas Refrigeration Corporation. 248,680; June 21.

CLASS 32.

Beds. American Parlor Furniture Company. 230,815; June 21.
Easels, Educational. G. L. Brown. 247,518; June 21.
Furniture. Porcelain Enamel and Manufacturing Company of Baltimore. 246,707; June 21.
Mirrors, pillows, bassinets, mattresses, etc. Best & Co. 242,467; June 21.

CLASS 33.

Glass articles. Witting Bros. Limited. 244,339; June 21.
Glass, Laminated. Triplex Safety Glass Company of North America. 246,183; June 21.

CLASS 34.

Device intended to maintain the freshness of bakery products by means of a heated medium. Waters-Genter Company. 246,725; June 21.
Heaters, water heaters, ovens, etc., Fluid-fuel-burning space. Sandage Company. 244,723; June 21.
Radiators and parts thereof. Winchester Repeating Arms Company. 247,920; June 21.
Ventilating systems, Air-conditioning apparatus and. Arctic Nu-Air Corporation. 242,271; June 21.

CLASS 35.

Belting. Quaker City Rubber Company. 247,446; June 21.
Piston packing rings, Metallic. Westinghouse Air Brake Company. 244,261–4; June 21.

CLASS 37.

Albums. Art Book Binding Co. 247,986; June 21.
Bristol board. Graham Paper Company. 248,633; June 21.
Crayons. American Crayon Company. 246,459; June 21.
Crayons, Dustless. Weber Costello Co. 229,994; June 21.
Envelopes, letterheads, billheads, etc. P. C. Hofmann. 237,414; June 21.
Mailing sheet. J. A. Holden. 248,103; June 21.
Paper or cloth tape, Gummed. McLaurin-Jones Co. 247,623–4; June 21.
Paper, Toilet. Victoria Paper Mills Company. 248,602; June 21.
Pens. Parker Pen Company. 247,702; June 21.
Sales books. Cosby-Wirth Manifold Book Company. 247,127; June 21.

CLASS 38.

Magazine. Frank A. Munsey Company. 246,109; June 21.
Magazines. Chicagoan Publishing Company. 247,778; June 21.
Magazines. Kenfield-Davis Publishing Company. 245,563; June 21.
Newspaper articles, Heading for. Bulletin Company. 246,885; June 21.
Newspapers. El Paso Times Company. 232,723; June 21.
Photographs. Rexgold Manufacturing Company. 245,369; June 21.
Publication. Home Builders Catalog Co. 245,486; June 21.
Publication. Readers' Publishing Corp. 245,921; June 21.
Publication. Ziv Steel & Wire Company. 247,303; June 21.
Publications of advertisements and advertising prints. L. Chanin. 248,817; June 21.
Title for a column of news. Oregonian Publishing Company. 247,340; June 21.

Coffee. American Company of Arkansas. 245,133; June 21.
Coffee. Johnson Coffee Co. 248,301; June 21.
Extracts, Food-flavoring. Premier Color Works. 231,631; June 21.
Fish, Cured. Gorton-Pew Fisheries Company. 247,998; June 21.
Flavors for frozen confections, etc. Citrus Products Company. 212,173; June 21.
Flour, Corn. B. Martinez Sons Co. 247,553; June 21.
Flour, Wheat. Harlan Milling Company. 248,772; June 21.
Flour, Wheat. Hauck Milling Company. 203,815; June 21.
Food, Dog. Old Trusty Dog Food Company. 244,090; June 21.
Fruits, Citrous. East Highlands Citrus Assn. 249,046; June 21.
Fruits, grapes, vegetables, and melons. S. K. Thomas. 238,561; June 21.
Grapes. Richland Fruit Co. 246,633; June 21.
Jams, jellies, and marmalades. Ladd Hoffmann Producta Co. 245,149; June 21.
Lard. Otto Stahl, Inc. 247,563; June 21.
Mayonnaise. S. B. Drucker. 247,603–4; June 21.
Oil, Olive. A. Cassatly & Co. 247,409; June 21.
Potatoes. H. B. McNeal. 247,478; June 21.
Potatoes. Red Mill Packing Co. Inc. 247,818; June 21.
Sugar. J. D. and A. B. Spreckels Securities Company. 216,294; June 21.
Tomato paste. A. Glorioso. 233,986; June 21.
Vegetable shortening. Texas Vegetable Oil Co. 248,022; June 21.
Vegetables and fresh deciduous and citrous fruits, Fresh. G. A. Weitz. 244,899; June 21.

CLASS 48.

Malt and hops compound. Reed Bird Malt and Hops Company. 247,819; June 21.
Malt sirup. J. F. Denend. 247,264; June 21.
Malt sirup. P. J. Gloeckner. 247,182; June 21.

CLASS 49.

Alcohol, Pure ethyl. Pennsylvania Sugar Company. 248,193; June 21.

CLASS 50.

Awnings. R. S. Campbell. 240,127; June 21.
Book-repair kits. Gaylord Brothers, Incorporated. 247,903; June 21.
Bottle caps. Eastern Advertising Company. 247,418; June 21.
Paint sets. L. Dreifuss. 245,699; June 21.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 21ST DAY OF JUNE, 1927.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Abel, Harry S., McLean, Va. Game. 1,632,941; June 21.
Abington Textile Machinery Works. (See Clark, Ernest, assignor.)
Abolin, Harry T., Woodridge, assignor to Lincrusta-Walton Company, Inc., Hackensack, N. J. Wall paper or similar article. Des. 72,878; June 21.
Abolin, Harry T., Woodridge, assignor to Lincrusta-Walton Company, Inc., Hackensack, N. J. Wall paper or similar article. Des. 72,879; June 21.
Acme Wire Co., The. (See Dale, Oswald, assignor.)
Adam, Harry C., St. Louis, Mo. Crystal detector. 1,633,059; June 21.
Adams, Edward T., Beloit, Wis., assignor to Fairbanks, Morse & Co., Chicago, Ill. Internal-combustion engine and operating the same. 1,632,988; June 21.
Adams, Nena M., Chicago, Ill. Hair wrapper. 1,633,507; June 21.
Adler, Joseph, et al. (See Clay, Frank, assignor.)
Aero Toy & Manufacturing Co. (See Lunz, Franz, assignor.)
Affel, Herman A., Maplewood, N. J., assignor to American Telephone and Telegraph Company. Distribution of intelligence. 1,632,777; June 21.
Air-Scale Company, The. (See Morley, Earl M., assignor.)
Albertine, Herman, East Rutherford, N. J., assignor to Charles P. Rogers and Company (Inc.). Force-feed lubricating apparatus. 1,633,356; June 21.
Albertine, Herman, East Rutherford, N. J., assignor to Charles P. Rogers and Company (Inc.). Force-feed lubricating apparatus. 1,633,357; June 21.
Alemite Die-Casting & Mfg. Co. (See Gullborg, John S., assignor.)
Alexander, Don M., Denver, Colo. Road sign. Des. 72,880; June 21.
Allen, Carlton H., assignor of one-half to Great Northern Paper Company, Millinocket, Me. Apparatus for treating pulp. 1,633,553; June 21.
Allen, Carlton H., Glens Falls, N. Y., assignor to Great Northern Paper Company, Millinocket, Me. Apparatus for cooking pulp. 1,632,779; June 21.
Allen, Carlton H., Dayton, Ohio, assignor of one-half to Great Northern Paper Company, Millinocket, Me. Flow-controlling apparatus. 1,632,780; June 21.
Allen, Carlton H., Dayton, Ohio, assignor of one-half to Great Northern Paper Company, Millinocket, Me. Pulp-cooking apparatus. 1,633,554; June 21.
Allen, Charles B., Atlanta, Ga. Carburetor. 1,633,429; June 21.
Allen, Joseph H., assignor to Inland Glass Company, Chicago, Ill. Dispensing apparatus for liquid hydrocarbons. 1,632,815; June 21.
Allert, Cornelius. (See Williams, Sylvester J., assignor.)
Allied Packers, Inc. (See Appleton, Joseph H., assignor.)
Allis-Chalmers Manufacturing Company. (See Davis, Rae W., assignor.)
Alma, Carl E. (See Alma, Maximilian and C. E.)
Alma, Maximilian, and C. E., Vienna, Austria. Repositioning device for swinging coupling heads on railroad vehicles. 1,632,942; June 21.
Altorfer, Alpheus W., Peoria, Ill. Washing machine. 1,632,866; June 21.
Aluminum Company of America. (See Norton, Allen B., assignor.)
Ambler, Robert R., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Method and machine for covering flexible strips. 1,632,816; June 21.
American Coating Mills. (See Colbert, C. C., and Preston, assignors.)
American Flange & Manufacturing Company. (See Burgess, Francis R., assignor.)
American Safety Razor Corporation. (See Kaufman, Joseph, assignor.)
American Telephone and Telegraph Company. (See Affel, Herman A., assignor.)
American Telephone and Telegraph Company. (See Bascom, Henry M., assignor.)
American Telephone and Telegraph Company. (See Eagon, Lloyd L., assignor.)
American Telephone and Telegraph Company. (See Espenschied, Lloyd, assignor.)
American Telephone and Telegraph Company. (See Zinn, Manvel K., assignor.)
Anderson, Noah D., Brainerd, Minn. Razor. 1,632,778; June 21.
Anderson, Rufus L., Orlando, Fla. Headlight-deflecting attachment. 1,633,509; June 21.
Antunes, Alberto, assignor to V. Gonsalves, Boston, Mass. Combined engine stop motion, visual alarm, and condenser for motor-driven vehicles. 1,633,156; June 21.
Appleton, Joseph H., Oshkosh, Wis., assignor to Allied Packers, Inc., Chicago, Ill. Apparatus for reshaping hams. 1,633,157; June 21.
Archaouloff, Vadime, Boulogne-sur-Seine, France. Cylinder head of internal-combustion engines combined with fuel injectors. 1,633,158; June 21.
Arkell & Smiths. (See Tooker, J. N., and Harley, assignors.)
Art Metal Construction Company. (See Bush, Ellis C., assignor.)
Artizan Factories, Inc. (See Maerten, Christian, jr., assignor.)
Asman, Lionel. (See Karcher, L. C., and Asman.)
Atchley, William T., Delta, Colo. Mulcher attachment for cultivators. 1,633,469; June 21.
Atlas Powder Company. (See Shipley, Stanley D., assignor.)
Atwood, Harry N., Monson, assignor to Rubwood, Inc., Lawrence, Mass. Vehicle body. 1,633,159; June 21.
Auerbach, Karl, Saalfeld-Saale, Germany, assignor to H. F. Hoevel, New York, N. Y. Upsetting machine. 1,633,430; June 21.
Austin Machinery Corporation. (See Loken, Truls, assignor.)
Autocall Company, The. (See Richmond, Louis E., assignor.)
Automatic Electric Inc. (See Lomax, Clarence E., assignor.)
Automatic Electric Inc. (See McElyea, Harley B., assignor.)
Automatic Electric Inc. (See Ray, Arthur J., assignor.)
Automatic Electric Inc. (See Wicks, John, assignor.)
Automotive Corporation, The. (See Mowbray, James W., assignor.)
Automotive Valves Co., The. (See Burtnett, Everett R., assignor.)
Ayling, George W., Springfield, Ill. Kite. 1,633,510; June 21.
Bagamery, Alexander, South River, N. J. Safety cigar holder. 1,633,431; June 21.
Baker Perkins Company. (See Harber, Laurence S., assignor.)
Baldwin, Raymond J., Wissinoming, Pa. Combination radiator connection. 1,633,511; June 21.
Baldwin, William C. P., London, Ontario, Canada. Direction indicator. 1,633,303; June 21.
Ball, Charles M., jr., Denver, Colo. Drink mixer. 1,633,470; June 21.
Bangser, William, New York, N. Y., assignor to Maimin Speed Control Corporation. Mounting for sewing-machine motors. 1,632,781; June 21.
Barbieri, Cesare, New York, N. Y., assignor to The Vortex Mfg. Co., Chicago, Ill. Folding paper cup. 1,632,867; June 21.
Barbieri, Cesare, New York, N. Y., assignor to The Vortex Mfg. Co., Chicago, Ill. Paper cup and blank for making the same. 1,632,868; June 21.
Barbieri, Cesare, New York, N. Y., assignor to The Vortex Mfg. Co. Paper cup. 1,632,869; June 21.
Barks, Frank S., St. Louis, Mo. Lubricating apparatus. 1,633,304; June 21.
Barnard, Dudley J., Barking, England. Grab. 1,633,305; June 21.
Baron, John, Long Island City, assignor, by mesne assignments, to L. Laxer and C. Young, New York, N. Y. Closure lock. 1,633,508; June 21.
Barrett, Arthur M., Winnetka, Ill. Lifting truck. 1,633,390; June 21.
Barry-Wehmiller Machinery Company. (See Dawson, J. W., and Herold, assignors.)
Bartlett, Albert C., Watford, and R. Le Rossignol, Harrow, assignors to The General Electric Company Limited, London, England. Thermionic valve. 1,632,870; June 21.
Bartlett Hayward Company, The. (See Kennedy, James S., assignor.)
Bartlett, John N., Winnipeg, Manitoba, Canada. Amusement device. 1,633,204; June 21.
Bartling, Howard G., assignor to Peerless Pneumatic Systems, Inc., Chicago, Ill. Spraying cabinet and apparatus. 1,633,306; June 21.
Bascom, Henry M., Brooklyn, N. Y., assignor to American Telephone and Telegraph Company. Transmission system. 1,632,817; June 21.
Baskin, Maurice, et al. (See Watter, Michael, assignor.)

Bassett, Fred H., Washington, D. C. Dirigible balloon. 1,633,238; June 21.

Bassick Manufacturing Company, The. (See Zerk, Oscar U., assignor.)

Bates, Franklin S., Mount Vernon, N. Y. Straw hat. 1,633,358; June 21.

Bateson, Donald M., Marshalltown, Iowa. Snubber hook and quick-fastener link. 1,633,512; June 21.

Baumann, Karl, Urmston, England, assignor, by mesne assignments, to Westinghouse Gear and Dynamometer Company. Reduction gearing. 1,632,989. June 21.

Baumberger, William J., Davenport, assignor to Micro Machine Company, Bettendorf, Iowa. Grinding machine. 1,633,060; June 21.

Baumgartner, Werner, Elgin, Ill. Valve. 1,633,061; June 21.

Bayles, Lewis C., and F. M. Slater, Easton, Pa., assignors to Ingersoll-Rand Company, Jersey City, N. J. Disk valve for rock drills. 1,633,471; June 21.

Beach, Edward F., assignor to H. H. Robertson Company, Pittsburgh, Pa. Ventilator. 1,632,871; June 21.

Beaumont, R. H., Company. (See Warner, Arthur, assignor.)

Beck, Ernest T., assignor to International Silver Co., Meriden, Conn. Side panel for metal dishes or similar articles. Des. 72,881; June 21.

Beck, Ernest T., assignor to International Silver Co., Meriden, Conn. Side panel for metal dishes or similar articles. Des. 72,882; June 21.

Beck, Ernest T., assignor to International Silver Co., Meriden, Conn. Base for metal bowls or similar articles. Des. 72,883; June 21.

Beck, Ernest T., assignor to International Silver Co., Meriden, Conn. Border panel for metal dishes or similar articles. Des. 72,884; June 21.

Beck, Ernest T., assignor to International Silver Co., Meriden, Conn. Base for a fountain pen holder. Des. 72,885; June 21.

Beck, Ernest T., assignor to International Silver Co., Meriden, Conn. Base for a fountain pen holder. Des. 72,886; June 21.

Becker, Frederick W., East Rutherford, N. Y. Welding and cutting apparatus. 1,633,359; June 21.

Beebe, Eugene F., Minneapolis, Minn. Resilient mounting for washing-machine plungers. 1,632,943; June 21.

Bell & Howell Company, The. (See Howell, Albert S., assignor.)

Bell Telephone Laboratories, Incorporated. (See Johnson, Herbert B., assignor.)

Belle City Manufacturing Company. (See Johnson, Alfred C., assignor.)

Bendix Brake Company. (See Bendix, V., and La Brie, assignors.)

Bendix Brake Company. (See La Brie, Ludger E., assignor.)

Bendix, Vincent, Chicago, Ill., and L. E. La Brie, South Bend, Ind., assignors to Bendix Brake Company, Chicago, Ill. Brake shoe. 1,632,782; June 21.

Bennett, John C., et al. (See Haubert, Leo, assignor.)

Bennett, Joseph, North Adams, Mass., assignor to Consolidated Textile Corporation, New York, N. Y. Finished fabric and making same. 1,633,160; June 21.

Bens, Samuel J., New York, N. Y. Fuel tank. 1,633,062; June 21.

Bergmann, Carl G., Chicago, Ill. Arch support. 1,633,513; June 21.

Bernarducci, Louis, Bronx, N. Y. Hair-cutting machine. 1,633,063; June 21.

Berry, Christopher H., Newark, N. J. Automatic grease cup. 1,632,872; June 21.

Beskin, Irving, Jersey City, N. J. Automatic toasting and buttering machine. 1,633,391; June 21.

Bettendorf Company, The. (See Reck, Peter W., assignor.)

Bilbo, Sedgie K., Tylertown, Miss. Fan support. 1,633,514; June 21.

Bird, Walter J., Flushing, N. Y. Menu holder. 1,632,783; June 21.

Black & Decker Manufacturing Company, The. (See Stumpf, Walter, assignor.)

Black, Frank J., Crafton, Pa. Ring gear and making the same. 1,632,818; June 21.

Blackburn, Joseph T. (See Van Ausdal, J. H., and Blackburn.)

Blackwell, Waldo R. (See Van Derbeck, S. G., and Bortolin, assignors.)

Blair, Robert S., Sound Beach, Conn. Heat-conducting apparatus. 1,632,784; June 21.

Blair, Robert S., Sound Beach, Conn. Pocket article and the like. 1,632,785; June 21.

Blake, C. C., Incorporated. (See Blake, Charles C., assignor.)

Blake, Charles C., Brookline, assignor to C. C. Blake, Incorporated, Boston, Mass. Making shoes. 1,632,944; June 21.

Blidsoe, Hugo, New York, N. Y. Tool holder. 1,633,239; June 21.

Blidsoe, Hugo, New York, N. Y. Pipe and cigar holder for the purpose of eliminating the nicotine. 1,633,240; June 21.

Bliss, Anna M. H., Long Beach, Calif. Apron. 1,632,873; June 21.

Blount, Harry, Oak Park, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Lubricating bearing surfaces. 1,632,874; June 21.

Bodin, George, assignor to Goodman Manufacturing Company, Chicago, Ill. Mining machine. 1,632,990; June 21.

Boedecker, Friedrich, Berlin-Dahlem, Germany. Sedative and hypnotic ureides. 1,633,392; June 21.

Bohacek, Bruno P., assignor to Maschinenfabrik Moenus Aktien-Gesellschaft Frankfort-on-the-Main, Germany. Pegging machine. 1,633,307; June 21.

Boice, Harry. (See Haon, H. J., and Boice.)

Bolton, Archer L., North Andover, Mass. Spiral bar. 1,633,308; June 21.

Boomer, George A., assignor to The Plume & Atwood Mfg. Co., Waterbury, Conn. Electric-lighting fixture. 1,633,309; June 21.

Booth, William N., Detroit, Mich. Nut. 1,632,991; June 21.

Borsky, Harry. (See Freedman, H., and Borsky.)

Bortolin, Joseph. (See Van Derbeck, S. G., and Bortolin.)

Boston Auto Gage Company, The. (See Gregory, George P., assignor.)

Boucher, Adélard, Winchendon, Mass. Door hinge. 1,633,432; June 21.

Bouvier, George A., Oak Park, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Strand-handling apparatus. 1,632,875; June 21.

Bouvier, George A., Oak Park, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Strand-tensioning device. 1,632,876; June 21.

Bowlin, John E. (See Carmichael, T., and Bowlin.)

Boyer, Henry, Jersey City, N. J., and M. Klevins, Brooklyn, N. Y. Fountain pen. 1,633,433; June 21.

Boynton, Alexander, San Antonio, Tex. Polished-rod rotor. 1,633,064; June 21.

Bozarth, William H., Vineland, N. J. Bathtub seat. 1,633,310; June 21.

Bragg, Caleb S., Palm Beach, Fla., and V. W. Kliesrath, Port Washington, assignors to Bragg-Kliesrath Corporation, Long Island, N. Y. Throttle-control apparatus for brake-applying mechanism. 1,633,360; June 21.

Bragg-Kliesrath Corporation. (See Bragg, C. S., and Kliesrath, assignors.)

Bragg, Thomas A., assignor to The Owens Bottle Company, Toledo, Ohio. Cooling molds. 1,632,992; June 21.

Braggiotti, Isidore. (See Serchi, Enrico, assignor.)

Braren, Lorenz K., Munich, Germany, assignor to the Firm: Friedrich Deckel, Präcisionsmechanik und Maschinenbau, Munich, Bavaria, Germany. Internal-combustion engine. 1,633,541; June 21.

Braswell, Fred E., and S. T. Ray, Gadsden, Ariz. Trench-cleaning device. 1,633,311; June 21.

Bray-Hurd Process Company. (See Hurd, Earl, assignor.)

Breceinski, Karl, Mauston, Wis. Clevis. 1,632,877; June 21.

Breese, James L., jr., assignor to Oil Devices Corporation, Chicago, Ill. Heating device. 1,633,065; June 21.

Breese, James L., jr., assignor to Oil Devices Corporation, Chicago, Ill. Oil-burning furnace and thermostatic control therefor. 1,633,066; June 21.

Bremer, Harry A., Chicago, Ill. Radio condenser coupling. 1,632,878; June 21.

Brewster, Ruby T., New York, N. Y. Atomizer. Des. 72,887; June 21.

Brewster, Ruby T., New York, N. Y. Atomizer. Des. 72,888; June 21.

Brewster, Ruby T., New York, N. Y. Bottle or similar container. Des. 72,889; June 21.

Brick, Perry A., assignor to The National Grave Vault Co., Galion, Ohio. Self-dumping truck. 1,633,515; June 21.

Briggs Manufacturing Company. (See Malse, Herman C., assignor.)

Broadmeyer, Albert, assignor to The W. O. Hickok Mfg. Co., Harrisburg, Pa. Sheet-feeding apparatus. 1,632,945; June 21.

Brock & Weymouth, Incorporated. (See Holst, Lodewyk J. R., assignor.)

Broderick-Son-Raymond Co. (See Raymond, Lambert L., assignor.)

Broughton, Arthur E., Minneapolis, Minn. Apparatus for removing air from steam condensing systems. 72,890; June 21.

Brower, William M., Palo Alto, assignor to Federal Telegraph Company, San Francisco, Calif. Multiple variable condenser. 1,633,516; June 21.

Brown, Amos E., Damascus, Ark. Train-controlled railway-crossing gate. 1,633,517; June 21.

Brown, Arthur C., Newark, N. J. Jewelry clasp. Des. 72,890; June 21.

Brown Company. (See Richter, George A., assignor.)

Brown, Haydn, London, England. Measuring respired air in testing the lungs. 1,633,393; June 21.

Bruner, Martin R., Buckland, Ohio. Tractor plow. 1,633,205; June 21.

Brünig, Victor, Berlin-Grunewald, Germany. Production of canals. 1,632,946; June 21.

Brush, Alanson P., Detroit, Mich. Vehicle spring. 1,632,993; June 21.

Bryan, William J., Jersey City, N. J. Chain link. 1,633,434; June 21.

Bryant, Niles, Battle Creek, Mich. Cord-actuated burglar alarm. 1,633,361; June 21.

Burgess, Francis R., assignor to American Flange & Manufacturing Company, Chicago, Ill. Container and sealing means therefor. 1,633,555; June 21.

Burgess, Francis R., assignor to American Flange & Manufacturing Company, Chicago, Ill. Container and sealing means therefor. 1,633,556; June 21.

Burgess, Herbert S., Kellogg, Idaho. Cooling system for automobiles. 1,632,994; June 21.

Burke, Charles E., assignor, by mesne assignments, to Du Pont Viscoloid Company, Wilmington, Del. Fireproofed product and the production thereof. 1,633,067; June 21.

Burlew, Gilderoy O., New York, N. Y. Artificial tooth. 1,633,241; June 21.

Burns, Edward L., assignor, by mesne assignments, to S. D. Williams, Los Angeles, Calif. Fire extinguisher. 1,633,312; June 21.

Burtnett, Everett R., assignor to The Automotive Valves Co., Los Angeles, Calif. Internal-combustion engine. 1,632,879; June 21.

Burtnett, Everett R., assignor to The Automotive Valves Co., Los Angeles, Calif. Inlet manifold for internal-combustion engines. 1,632,880; June 21.

Burtnett, Everett R., assignor to The Automotive Valves Co., Los Angeles, Calif. Internal-combustion engine. 1,632,881; June 21.

Burton, Charles W., jr., Ocean Park, Calif. Pneumatic gear-shifting device. 1,632,947; June 21.

Burton, Robert N. (See Dahl, Conrad, assignor.)

Bush, Ellis C., assignor to Art Metal Construction Company, Jamestown, N. Y. Guiding or controlling mechanism for trucks or the like. 1,633,473; June 21.

Busha, Leon, assignor to W. E. Nelson, Minneapolis, Minn. Strip shingle. 1,633,474; June 21.

Caldwell, Paul A., Tell, Tex. Attachment for cultivators. 1,633,394; June 21.

Cárdenas, Francisco, Piedras Negras, Mexico. Water pump. 1,632,948; June 21.

Carkey, George M., Los Angeles, Calif. Combined weed cutter and cultivator. 1,632,883; June 21.

Carlson, Charles G., Chicago, Ill. Curtain-stretcher clamp. 1,632,995; June 21.

Carlson, Martin O., Chicago, Ill. Push sled. 1,633,362; June 21.

Carlson, Martin O., Chicago, Ill. Push-sled brake. 1,633,363; June 21.

Carlsson, Svante A., Lethbridge, Ontario, Canada. Irrigation door. 1,633,395; June 21.

Carmichael, Thomas, and J. E. Bowlin, Fort Bragg, Calif. Sawmill setwork. 1,633,206; June 21.

Carriol, Louis. (See Muller, A., and Carriol.)

Carter, Herbert F., Cicero, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Serving machine. 1,632,884; June 21.

Carter, Orin E. (See Carter, S. W. and O. E.)

Carter, Sanford W. and O. E., assignors of one-third to E. P. Peers and one-third to G. B. Winfrey, Los Angeles, Calif. Automaton advertising device. 1,633,313; June 21.

Cartoning Machinery Corporation. (See Evans, H. L., and Hobi, assignors.)

Carvalho, Louis da C., New Orleans, La. Dumping vehicle. 1,633,364; June 21.

Carver, Thomas A. B., London, England. Pattern-controlled shedding mechanism. 1,633,475; June 21.

Capaldo, Louis A., New York, N. Y. Parasol. 1,632,882; June 21.

Cavenagh, Frank, Seneca Falls, N. Y. Revolving disk valve. 1,633,161; June 21.

Chambless, Ersyl F., Chicago, Ill. Hat cover. 1,632,786; June 21.

Chandler, A. R. (See Osborne, William L., assignor.)

Chapman, Byron V., et al. (See Owen, John H., assignor.)

Chastain, William E., Wichita, Kans. Seat-actuating means for sanitary closets. 1,632,819; June 21.

Cheda, J. B. (See Little, Harry C., assignor.)

Chesnut, William C., assignor to Hartmann Trunk Company, Racine, Wis. Trunk cushion and retainer. 1,632,996; June 21.

Chicago Pneumatic Tool Company. (See Penberthy, Ernest, assignor.)

Chicago Telephone Supply Company. (See Diener, Riley M., assignor.)

Christianson, Andrew, Butler, assignor to Standard Steel Car Company, Pittsburgh, Pa. Railway-car construction. 1,633,162; June 21.

Christofferson, Christian A., St. Paul, Minn. Automatic storm-window regulator. 1,632,949; June 21.

Chritton, George A., trustee. (See Eckart, George F., assignor.)

Clarin, David X., assignor to Oskite Products, Inc., New York, N. Y. Dishwashing machine. 1,633,396; June 21.

Clark, Ernest, Abington, assignor to Abington Textile Machinery Works, Boston, Mass. Pneumatic stripper attachment for carding engines. 1,633,542; June 21.

Clark, Omar E., Denver, Colo. Hoist. 1,633,543; June 21.

Clay, Frank, assignor of five-sixths to J. Adler and one-sixth to E. C. Rodenmeyer, St. Louis, Mo. Mop wringer. 1,633,518; June 21.

Clifton, Francis R., Omaha, Nebr. Awning-rod clamp. 1,633,436; June 21.

Climax Engineering Co. (See Wishart, Harold W. and W., assignors.)

Coe, Harrison S., Lawrence, Kans. Classifier. 1,633,371; June 21.

Cofar, Lemel, Milwaukee, Wis. Display stand. 1,632,820; June 21.

Coghlin, B. J., Company Limited. (See Picard, Georges, assignor.)

Colbert, Charles C., and G. E. Preston, assignors to American Coating Mills, Elkhart, Ind. Web-coating apparatus. 1,632,885; June 21.

Cole, Lorne A., Brantford, Ontario, Canada. Coil-forming machine. 1,633,068; June 21.

Coleman, William C., Wichita, Kans. Centrifugal separator and amalgamator. 1,632,950; June 21.

Collette Manufacturing Company, The. (See Ross, Charles E., assignor.)

Collier, Vincent, Worcester Park, England. Support for seats and the like. 1,633,476; June 21.

Columbia Lighting Fixture Co. (See Peinlich, Max, assignor.)

Connelly, Frank B. (See Gall, W. W., and Connelly.)

Connolly, Thomas J., assignor to The Hiker Manufacturing Company, Toledo, Ohio. Wheel skate. 1,632,997; June 21.

Consolidated Textile Corporation. (See Bennett, Joseph, assignor.)

Continental Can Company. (See Prahl, Frederick A., assignor.)

Cooney, Frank, Detroit, Mich. Shade-roller bracket. 1,633,069; June 21.

Copeman Laboratories Company. (See Copeman, Lloyd G., assignor.)

Copeman, Lloyd G., assignor to Copeman Laboratories Company, Flint, Mich. Flash water cooler. 1,633,372; June 21.

Coppock, Andrew J., Detroit, Mich. Fuel vaporizer. 1,632,951; June 21.

Cornwell, Arthur L., and L. R. Grames, Wellsville, N. Y. Wheel puller. 1,633,314; June 21.

Cote, Alfred, Montreal, Quebec, Canada. Electric water heater. 1,632,321; June 21.

Coughlin, William G., Philadelphia, Pa. Rail-joint support. 1,632,998; June 21.

Council, John G., assignor to McCallum Hosiery Co., Northampton, Mass. Run-stop course for knitted fabrics. 1,632,999; June 21.

Cox, Louis T., Brooklyn, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y. Testing system. 1,632,886; June 21.

Crane, Daniel, Saginaw, Mich., assignor of one-half to J. G. Crane, Kendaia, N. Y. Table. Des. 72,891; June 21.

Crane, James G. (See Crane, Daniel, assignor.)

Crawford, Frank E., York, Nebr. Differential. 1,632,787; June 21.

Crawford, James B., Bismarck, N. Dak. Stop and brake for twine machines. 1,633,477; June 21.

Crawford, John H., A. W. Helmholtz, and D. Ferrell, assignors to Safety Pressure Mining & Equipment Company, Harrisburg, Ill. Blasting cartridge. 1,632,887; June 21.

Cregier, Nathaniel B., Chicago, Ill. Photographic camera. 1,633,378; June 21.

Crocker, Thomas N., et al. (See Owen, John H., assignor.)

Crouse, Stedman P., West Somerville, Mass. Drafting implement. 1,633,163; June 21.

Crowell, Clarence F., assignor to Rochester Germicide Company Inc., Rochester, N. Y. Liquid-dispensing apparatus. 1,633,519; June 21.

Cruickshank, Warburton K., Regina, Saskatchewan, Canada. Pulverizing machine. 1,633,164; June 21.

Crump, Frank H., Los Angeles, Calif. Temporary binder. 1,633,070; June 21.

Culver, Guy L., Scranton, Pa. Street barrier. 1,632,000; June 21.

Cumner, Matthew S. (See Geissenhainer, F. W., and Cumner.)

Cunningham, T. S., et al. (See Hansen, John, assignor.)

Cuppett, Charles J., Uniontown, Pa. Vehicle brake. 1,633,001; June 21.

Curtiss Aeroplane and Motor Company. (See Nutt, Arthur, assignor.)

Cutler, Frank W., assignor to Cutler Manufacturing Company, Portland, Oreg. Fruit grader. 1,633,002; June 21.

Cutler Manufacturing Company. (See Cutler, Frank W., assignor.)

Cylinder Top Oilers, Limited. (See Heywood, James H., assignor.)

Dahl, Conrad, Springfield, Ohio, assignor to R. N. Burton, Chicago, Ill. Self-balancing kite. 1,632,822; June 21.

Daisy Manufacturing Company. (See Lefever, Charles F., assignor.)

Dale, Oswald, assignor to The Acme Wire Co., New Haven, Conn. Translucent screen for projected pictures. 1,633,315; June 21.

Dales, Lewis J., Mount Vernon, N. Y. Producing carbon black. 1,633,071; June 21.

Daniels, Cecil C., assignor of one-fourth to F. W. Stephens and one-fourth to L. Hughes, Wesinco, Tex. Vegetable-washing machine. 1,633,437; June 21.

Darling, James G., Norwood, Ohio. Cutting-blade attachment. 1,632,823; June 21.
Daughs, Charles W., Alameda, Calif., assignor to Daughs Ship Crane Company. Method and apparatus for handling lumber. 1,632,952; June 21.
Daughs Ship Crane Company. (See Daughs, Charles W., assignor.)
David Crystal, Inc. (See Worth, Jean C., assignor.)
Davidson, Daniel W., Big Spring, Tex. Sash-pulley marker. 1,632,824; June 21.
Davis, Alex B., Cincinnati, Ohio, assignor to A. B. Dick, Chicago, Ill. Stencil sheet. 1,633,072; June 21.
Davis, Clifton I., et al. (See Thietten, Frank, assignor.)
Davis, Howard C., Elizabeth, N. J. Steam trap. 1,633,165; June 21.
Davis, Lewis F., Huntington Beach, Calif. Oil saver and antisplasher. 1,632,880; June 21.
Davis, Lewis F., and L. W. Schnepp, Huntington Beach, Calif. Water heater. 1,632,888; June 21.
Davis, Lewis W., Seattle, Wash. Driving mechanism for motor vehicles. 1,633,316; June 21.
Davis, Rae W., West Allis, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Power installation. 1,633,166; June 21.
Davis, Rae W., West Allis, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Power installation. 1,633,167; June 21.
Dawson, Joseph W., and J. L. Herold, assignors to Barry-Wehmiller Machinery Company, St. Louis, Mo. Bottle cover. 1,633,073; June 21.
De Alcocer, Eugenio N. and F. O., Mexico, Mexico. Spark plug. 1,633,435; June 21.
De Alcocer, Francisco O. (See De Alcocer, Eugenio N. and F. O.)
Deatwood, Joseph, Sault Ste. Marie, Mich. Cabinet ironing board. 1,633,003; June 21.
De Boer, Rudolph, assignor to Grand Rapids Metalcraft Corporation, Grand Rapids, Mich. Wall pocket or similar article. Des. 72,892; June 21.
Deckel, Friedrich, Präcisionsmechanik und Maschinenbau. (See Braren, Lorenz K., assignor.)
Deere & Company. (See Silver, Walter H., assignor.)
Degener, Gustave O., Hartford, Conn., assignor to Royal Typewriter Company, Inc., New York, N. Y. Adding attachment for typewriting machines. 1,633,242; June 21.
Delacommune, Charles E. E., Paris, France. Device for regulating the advance of a band with reference to a cinematographic apparatus controlling said band. 1,633,478; June 21.
De Laski & Thropp Circular Woven Tire Company, The. (See Moreland, Lester A., assignor.)
Del Monte, Joseph L., et al. (See Hedrickson, Henry P., assignor.)
Demers, Arrestid, Sherbrooke, Quebec, Canada. Billiard cue, rod, and like article, rack hanger and locker. 1,633,004; June 21.
De Mott, Richard H., Tenafly, N. J. Surgical device. 1,633,074; June 21.
Denser, Charles, New Brighton, Pa. Audible alarm. 1,633,374; June 21.
Denver Ice & Cold Storage Company. (See Kofford, Earl J., assignor.)
Denver Rock Drill Manufacturing Company, The. (See Nell, Gustave M., assignor.)
De Pamphilis, Gennaro, New York, N. Y. Wrist paste container and distributor. 1,632,890; June 21.
De Pew, Herman E., Alameda, Calif. Antproof shelf bracket. 1,633,438; June 21.
De Rosa, Steve, Brooklyn, N. Y. Window-cleaning device. 1,633,479; June 21.
Derry, Jasper, Medford, assignor to A. Terkelsen, Boston, Mass. Toggle press. 1,633,317; June 21.
Despard, Victor R., assignor to McGill Manufacturing Company, Valparaiso, Ind. Insulated mounting for electrical contacts. 1,633,005; June 21.
De Witt, William J., Auburn, N. Y. Hollow shoe form. 1,632,953; June 21.
De Witt, William J., Auburn, N. Y. Shoe form. 1,632,955; June 21.
De Witt, William J., assignor to The Shoe Form Co., Inc., Auburn, N. Y. Shoe form. 1,632,954; June 21.
De Witt, William J., assignor to The Shoe Form Co., Inc., Auburn, N. Y. Preparing footwear. 1,633,075; June 21.
Diamond, Charles L. A., Newburgh, N. Y. Amusement device. 1,633,397; June 21.
Dick, A. B. (See Davis, Alex B., assignor.)
Dickerman, John A., Bridgeport, Conn., assignor to Remington Arms Company, Inc. Mushrooming bullet. 1,633,168; June 21.
Diebold, Charles J., Winnipeg, Manitoba, Canada. Whistling ball. 1,632,825; June 21.
Diener, Riley M., assignor, by mesne assignments to Chicago Telephone Supply Company, Elkhart, Ind. Jack box. 1,632,788; June 21.
Dion, Alfred J., Indian Orchard, Mass. Automatic signal indicator for creeling frames. 1,633,439; June 21.
Domscheit, Frederick E., Brooklyn, N. Y. Window. 1,632,789; June 21.
Donald, William, Glasgow, Scotland. Steam-boiler and evaporator. 1,633,398; June 21.
Dorsey, Farnum F., Rochester, N. Y. Duster. 1,633,076; June 21.
Dorsey, Herbert G. (See Lapp, Claude J., assignor.)
Drake, Warren C. (See Priebe, E. B., and Miner, assignors.)
Dreesen, Jerome J. B., Jefferson, Tex. Tool. 1,633,077; June 21.
Drenning, Percy R. (See Symington, T. H., and Drenning.)
Drew, Thomas, West Springfield, Mass. Dirt-ejecting vacuum cleaner. 1,633,561; June 21.
Drish, Frank W., Hollywood, Calif. Garden implement. 1,633,318; June 21.
Dudley, James G., New York, N. Y. Awning casement window. 1,633,375; June 21.
Dundas, James W., Detroit, Mich. Auxiliary lifting arrangement for aeroplanes. 1,633,006; June 21.
Du Pont, E. I., de Nemours & Company. (See Haon, H. J., and Bolce, assignors.)
Du Pont Viscoloid Company. (See Burke, Charles E., assignor.)
Durnell, Harold G., Bartlesville, Okla. Roller box. 1,633,520; June 21.
Eagon, Lloyd L., New York, N. Y., assignor to American Telephone and Telegraph Company. Trunk signaling system. 1,632,826; June 21.
Ebmeier, Harry E., Bertrand, Nebr. Seed-corn sheller. 1,633,365; June 21.
Eckart, George F., South Bend, Ind., assignor to G. A. Chritton, trustee. Flexible coupling. 1,633,243; June 21.
Eckert, Grandon E., assignor to The R. Thomas & Sons Co., East Liverpool, Ohio. Insulator fitting. 1,633,399; June 21.
Economides, Michael J., Brooklyn, N. Y. Hinge. 1,633,480; June 21.
Edwards, William, Rock Springs, Wyo. Automatic switch. 1,633,521; June 21.
Egry Register Company, The. (See Jackson, Philip A., assignor.)
Ehinger, Fred C., Palmyra, Mich. Maul. 1,633,007; June 21.
Elfe, James M., assignor to White Mop Wringer Company, Fultonville, N. Y. Mop wringer. 1,633,008; June 21.
Elsey, William. (See Schlueter, Henry C., assignor.)
Ely, Raymond G., Trexlertown, Pa. Electric switch. 1,632,956; June 21.
Endless Belt Corporation, Inc. (See Grupe, William F., assignor.)
Engle, Andrew, Newton, assignor of one-half to J. Maine, Des Moines, Iowa. Disposing of waste material and utilizing components thereof. 1,633,078; June 21.
Engle, Andrew, Newton, assignor of one-half to J. Maine, Des Moines, Iowa. Disposing of waste material and utilizing components thereof. 1,633,079; June 21.
Engle, Andrew, Newton, assignor of one-half to J. Maine, Des Moines, Iowa. Disposing of waste products and utilizing components thereof. 1,633,080; June 21.
Engle, Andrew, Newton, assignor of one-half to J. Maine, Des Moines, Iowa. Disposing of waste material and utilizing components thereof. 1,633,081; June 21.
Epperson, Charles B., assignor of one-third to J. H. Tucker, Petersburg, and one-third to J. L. Rawlings, Sutherland, Va. Preventing chattering in transmissions. 1,633,440; June 21.
Ernst, Charles K., Buffalo, N. Y. Closure for area ways. 1,632,827; June 21.
Ernst, William, assignor to Hamilton Beach Mfg. Co., Racine, Wis. Motor bracket. 1,633,009; June 21.
Eskholme, John W., Glen Ridge, N. J., assignor to Red Star Appliances, Inc., New York, N. Y. Envelope-sealing machine. 1,633,244; June 21.
Eskholme, John W., East Orange, N. J., assignor to Red Star Appliances, Inc., New York, N. Y. Stamp-canceling machine. 1,633,245; June 21.
Eskholme, John W., East Orange, N. J., assignor to Red Star Appliances, Inc., Stamford, Conn. Stamp-canceling machine. 1,633,246; June 21.
Espenschied, Lloyd, Queens, N. Y., assignor to American Telephone and Telegraph Company. Distribution of intelligence. 1,633,082; June 21.
Estwing, Ernest O., assignor to Estwing Manufacturing Company, Inc., Rockford, Ill. Axe sheath. 1,633,319; June 21.
Estwing Manufacturing Company. (See Estwing, Ernest O., assignor.)
Evans, Charles B., Chicago, Ill. Resilient wheel. 1,633,522; June 21.
Evans, Harry L., and G. I. Hohl, assignors to Cartoning Machinery Corporation, Newport, R. I. Mechanism for lining cartons. 1,633,247; June 21.
Fagan, Thomas J., Arlington, Mass. Watch-chain swivel. 1,632,828; June 21.
Fairbanks, Morse & Co. (See Adams, Edward T., assignor.)
Fallou, Jean G., assignor to L'Union Generale d'Electricite, Paris, France. Frequency reducing arrangement. 1,633,481; June 21.
Farny, Cyril, assignor to Wurlitzer Grand Piano Company, De Kalb, Ill. Grand-piano case. Des. 72,893; June 21.
Farny, Cyril, assignor to Wurlitzer Grand Piano Company, De Kalb, Ill. Grand-piano case. Des. 72,894; June 21.
Federal Glass Company, The. (See Hanford, Orin A., assignor.)
Federal Telegraph Company. (See Brower, William M., assignor.)

Fegley, Thomas J., and G. O. Leopold, assignors to North Bro's M'f'g Co., Philadelphia, Pa. Breast drill. 1,633,400; June 21.
Feinauer, Josef, New York, N. Y. Swimming shoe. 1,633,169; June 21.
Ferrell, Dent. (See Crawford, J. H., Helmholtz, and Ferrell.)
Findora, John A., assignor to Fort Pitt Bedding Company, Pittsburgh, Pa. Machine for shortening springs. 1,633,010; June 21.
Firestone Tire and Rubber Company, The. (See Jones, Robert R., assignor.)
Firth, Alfred T., New York, N. Y. Shears or scissors and the like. 1,633,441; June 21.
Fischer, Hermann, New York, N. Y., assignor to Tower Manufacturing Corporation, Boston, Mass. Electrical sound transmitting and receiving apparatus. 1,633,170; June 21.
Fischer, Hermann, assignor to Tower Manufacturing Corporation, Baston, Mass. Sound amplifier. 1,633,366; June 21.
Fisher, Jacob, Wabash, Ind. Tool for wrapping wire. 1,633,401; June 21.
Fisk Rubber Company, The. (See Hennessy, Daniel E., assignor.)
Fisk Rubber Company, The. (See Midgley, Thomas, assignor.)
Fite, John E., jr., Philadelphia, Pa. Bottle holder. 1,633,083; June 21.
Fitzgerald Mfg. Company, The. (See Fitzgerald, Maurice F., assignor.)
Fitzgerald, Maurice F., assignor to The Fitzgerald Mfg. Company, Winsted, Conn. Curling iron. 1,633,171; June 21.
Flanigan, John J., Oak Park, Ill. Spindle. 1,633,084; June 21.
Fleissner, Hans, Leoben, Austria. Drying coal and the like. 1,632,829; June 21.
Forshaw, Richard, Weaste, near Manchester, England. Knife-sharpening machine. 1,633,085; June 21.
Fort Pitt Bedding Company. (See Findora, John A., assignor.)
Foster, Samuel P., assignor to R. C. Lynn, Chattanooga, Tenn. Dirigible headlight. 1,633,442; June 21.
Foster, William E., Detroit, Mich. Polishing wheel and treating same. 1,633,523; June 21.
Fox, Werner J., New Orleans, La. Motor cycle trailer attachment. 1,633,086; June 21.
Fraim, Samuel R., Lancaster, Pa. Locking device. 1,633,172; June 21.
Franchetti, Alessandro, Florence, Italy. Injector for mineral oil motors. 1,633,320; June 21.
Frangedakis, Emmanuel J., Philadelphia, Pa. Coloscope. 1,633,443; June 21.
Frank, M. C., et al. (See Hendrickson, Henry P., assignor.)
Franke, Hermann, Hanover, Germany, assignor to Schmidt'sche Heissdampf-Gesellschaft m. b. H., Cassel-Wilhelmshohe, Germany. Closure means for manhole openings in steam boilers. 1,632,957; June 21.
Frasier, Bert, Pittsburgh, Pa. Concealed stairway. 1,633,321; June 21.
Fredriksson, John F., Brooklyn, assignor to The Kalbfleisch Corporation, New York, N. Y. Preparing satin white. 1,632,891; June 21.
Freedman, Hyman, and H. Borsky, New York, N. Y. Lock. 1,633,173; June 21.
Freeman, John R., Providence, R. I. Lantern slide. 1,633,376; June 21.
Fricburg, Alfred L., Gibson City, Ill. Cultivator blade. 1,632,958; June 21.
Fritsch, Jules, Paris, France. Landing gear. 1,633,174; June 21.
Frost, Harry W., Detroit, Mich. Spring suspension for railway cars. 1,633,011; June 21.
Fruitema, Henry A., assignor to The Wolf Company, Chambersburg, Pa. Advertising or sample package. 1,633,444; June 21.
Fryer, John W., St. Louis, Mo. Combination furniture. 1,632,790; June 21.
Fullenlove, McClellan C., assignor of one-half to P. Jacob, Toledo, Ohio. Lock mechanism. 1,633,087; June 21.
Fullilove, John A., Market Harborough, England. Machine for casting boxes and other hollow metal articles. 1,633,088; June 21.
Furber, James B., Linden, N. J., and K. L. Rankin, New York, N. Y. Plotting device. 1,633,402; June 21.
Gail, William W., and F. B. Connelly, Billings, Mont. Game apparatus. 1,633,445; June 21.
Galt, Perce R., Philadelphia, Pa. Sanitary heating pack. 1,633,482; June 21.
Gammeter, John R., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Molding and vulcanizing apparatus. 1,632,830; June 21.
Garland, James A., Portsmouth, N. H. Tire-chain fastener. 1,633,524; June 21.
Gärtner, Richard H., Hamburg, Germany. Removing tetranitromethane from trinitrotoluene. 1,632,959; June 21.
Gay, Horace C. (See Jeffers, Bailey L., assignor.)
Geisenhainer, Frederick W., Freehold, N. J., and M. S. Cummer, Brooklyn, assignors to Nestor Manufacturing Company, Inc., New York, N. Y. Bus-bar bender. 1,633,248; June 21.
General Electric Company Limited, The. (See Bartlett, A. C., and Le Rossignol, assignors.)
General Fire Extinguisher Company. (See Knight, Ira W., assignor.)
Gercich, Frederick A., Oakland, Calif. Splasher back for stoves. 1,633,089; June 21.
Gesellschaft für Drahtlose Telegraphie m. b. H. (See Meissner, Alexander, assignor.)
Giese, Otto E., Brooklyn, N. Y. Filter. 1,632,960; June 21.
Gieseke, Henry J., Elizabeth, N. J., assignor to Mrs. K. Goodyear, New York, N. Y. Hydrocarbon burner. 1,633,175; June 21.
Giest, John W., Ely, Mo. Operating table for animals. 1,632,831; June 21.
Gilman, Charles D., Oakland, Calif. Clamping band for tree limbs. 1,633,090; June 21.
Girard, Fritz, Hanau-on-the-Maine, Germany. Reflector for quartz lamps. 1,633,525; June 21.
Glans, Jöns E. (See Glans, Karl J. and J. E.)
Glans, Karl J. and J. E., Stockholm, Sweden. Firearm. 1,632,892; June 21.
Glans, Marie, Union City, N. J. Door alarm. 1,632,893; June 21.
Glover, Fred, Caulfield, Victoria, Australia. Jet and spray nozzle. 1,633,012; June 21.
Gluyas, Edwin L., Maricopa, Calif. Sucker rod and plunger rotator. 1,633,013; June 21.
Goeller, Edward F., New York, N. Y. Battery-terminal connecter. 1,633,176; June 21.
Gold, Samuel, Los Angeles, Calif. Spring surface bolt. 1,632,832; June 21.
Goldsmith, Bertram J. (See Koeb, Emil, and Goldsmith.)
Goldsmith, Bertram J., New York, assignor, by mesne assignments, to Perfect Window Regulator Corporation, Long Island City, N. Y. Door handle. 1,633,177; June 21.
Gonsalves, Vincente. (See Antunes, Alberto, assignor.)
Goodman Manufacturing Company. (See Bodin, George, assignor.)
Goodman Manufacturing Company. (See Pearce, James W., assignor.)
Goodman Manufacturing Company. (See Vodoz, Frederick W., assignor.)
Goodwin, Nathan R., Trenton, N. J. Attachment for calenders. 1,633,249; June 21.
Goodrich, B. F., Company, The. (See Ambler, Robert R., assignor.)
Goodrich, B. F., Company, The. (See Gammeter, John R., assignor.)
Goodyear, Mrs. Katherine. (See Giesecke, Henry J., assignor.)
Gordon, Israel. (See Miller, W. R., and Gordon.)
Gorman, Frank D., New York, N. Y. Ironing board. 1,633,403; June 21.
Gottlob, Harry R., Maplewood, Mo. Advertising billboard. Des. 72,895; June 21.
Gould Storage Battery Company. (See Snyder, Almond H., assignor.)
Graham Glass Company, The. (See Miller, Frank R., assignor.)
Graham, Ota T., Richmond, Va. Gasoline-dispensing system. 1,633,483; June 21.
Grames, Lawrence R. (See Cornwell, A. L., and Grames.)
Grand Rapids Metalcraft Corporation. (See De Boer, Rudolph, assignor.)
Grand Rapids Store Equipment Corporation. (See Morris, Edmund, assignor.)
Gravell, James H., Elkins Park, Pa. Metal pickling. 1,632,833; June 21.
Great Northern Paper Company. (See Allen, Carlton H., assignor.)
Green, Thomas W., Westmont, N. J., assignor to Thomas Wilbraham Green Engineering Co., Philadephia, Pa. Suction cleaner. 1,633,367; June 21.
Green, Thomas Wilbraham, Engineering Co. (See Green, Thomas W., assignor.)
Greenawalt, William E., Denver, Colo. Metallurgical process. 1,633,091; June 21.
Greene, Tweed & Co. (See McGuirk, Edward J., assignor.)
Greene, Whitney E., and A. E. Morong, Brookline, Mass. Valve-lifting device. 1,632,834; June 21.
Greenfield Tap and Die Corporation. (See Morgan, Ralph L., assignor.)
Gregory, George P., assignor to The Boston Auto Gage Company, Pittsfield, Mass. Float gauge. 1,633,322; June 21.
Gribble, Elmer T., assignor of one-half to R. E. Richard, Conlinga, Calif. Sucker-rod turner. 1,633,092; June 21.
Gross, Benjamin, assignor to Benjamin & Edward J. Gross Co., Inc., New York, N. Y. Finger ring or article of similar nature. Des. 72,896; June 21.
Gross, Benjamin & Edward J., Co. Inc. (See Gross, Benjamin, assignor.)
Grupe, William F., Hudson Heights, N. J., assignor to Endless Belt Corporation, Inc. Delivery-control device for cigarette-making machines. 1,633,377; June 21.
Guenther, Henry L., Los Angeles, Calif. Can-capping machine. 1,633,250; June 21.
Guett, Monroe, assignor to Hart & Hegeman Manufacturing Company, Hartford, Conn. Tube socket. 1,633,404; June 21.

Guett, Monroe, assignor to Hart & Hegeman Manufacturing Company, Hartford, Conn. Switch. 1,633,405; June 21.
Guidotti, Otto, Buffalo, N. Y. Buoy. 1,633,484; June 21.
Guilborg, John S., assignor, by mesne assignments, to Alemite Die-Casting & Mfg. Co., Chicago, Ill. Press. 1,633,559; June 21.
Gurney, Erving R., Beechhurst, assignor to International Motor Company, New York, N. Y. Vehicle dash. 1,633,093; June 21.
Guth, Edwin F. Company, The. (See Moore, James S., assignor.)
Haag, Gustavus, assignor to International Motor Company, New York, N. Y. Brake mechanism. 1,632,961; June 21.
Habault, Sylvain R., Neuilly-sur-Seine, assignor to Societe d'Hygiene Pratique, Paris, France. Ventilation of water-closet pans. 1,632,791; June 21.
Haberkamp, Jessie M., assignor to The Charles H. Scott Company, Chicago, Ill. Nursing brassière. 1,632,894; June 21.
Haberle, Michael, Richmond Hill, N. Y. Window. 1,632,835; June 21.
Haddon, Walter, London, England. Electric accumulator casing. Electric accumulator casing. 1,633,094; June 21.
Hadley, Charles R., Company. (See Jones, J. M., and Webb, assignors.)
Hagelthorn, Thomas, Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Cleaner. 1,632,895; June 21.
Hagstrum, William A., Columbus, Ohio. Cast-iron steam heating furnace. 1,633,406; June 21.
Hainke, Edward. (See Hughes, Hugh T., assignor.)
Hainline Motors Corporation. (See Hainline, Theodore W., assignor.)
Hainline, Theodore W., assignor to Hainline Motors Corporation, Portland, Oreg. Internal-combustion engine. 1,633,323; June 21.
Halikman, Abraham, New York, N. Y. Antisplash device for storage batteries. 1,633,407; June 21.
Halmi, Steve, Yonkers, N. Y. Music-sheet turner. 1,633,408; June 21.
Hamilton Beach Mfg. Co. (See Ernst, William, assignor.)
Hammond, John H., jr., Gloucester, Mass. Pedal lock. 1,633,178; June 21.
Hammond, William P., East Orange, N. J. Wind deflector. 1,633,368; June 21.
Hanauer, Darwin, La Grange, Ill., assignor to Kinney Rome Company. Anchoring means between cushioning springs and a surrounding frame. 1,633,544; June 21.
Hanauer, Darwin, La Grange, Ill., assignor to Kinney Rome Company. Spring structure. 1,633,545; June 21.
Handelan, Daniel, Minneapolis, Minn. Air-moistening apparatus for hot-air furnaces. 1,632,836; June 21.
Handy, Ralph H., Berkeley, Calif. Wood preservative. 1,633,095; June 21.
Hanford, Orin A., deceased; A. J. Schlereth, administrator, assignor to The Federal Glass Company, Columbus, Ohio. Cooling molds. 1,632,962; June 21.
Hanford, Orin A., deceased; A. J. Schlereth, administrator, assignor to The Federal Glass Company, Columbus, Ohio. Glass-forming apparatus. 1,632,963; June 21.
Hansen, Charles C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Rotation mechanism for rock drills. 1,633,526; June 21.
Hansen, Charles C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Steel retainer. 1,632,837; June 21.
Hansen, John, Bettendorf, assignor of four twenty-fifths to W. H. Martin, ten twenty-fifths to T. S. Cunningham, and one twenty-fifth to T. McQuarrie, Davenport, Iowa. Mechanical golf instructor and exerciser. 1,633,327; June 21.
Hanson, Sigvort, Racine, Wis. Dispensing machine. 1,633,207; June 21.
Haon, Harry J., and H. Boice, Newburgh, N. Y., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Rolling machine. 1,633,096; June 21.
Harber, Laurence S., assignor, by mesne assignments, to Baker Perkins Company, Inc., Saginaw, Mich. Panfilling machine. 1,633,014; June 21.
Harding, Dana E., Arlington, assignor to Wright-Harding Company, East Boston, Mass. Glazing machine. 1,633,546; June 21.
Harley, John F. (See Tooker, J. N., and Harley.)
Harris, Albert W., Glens Falls, N. Y. Seam for woven wire fabrics. 1,632,964; June 21.
Harris, Joseph D., assignor, by mesne assignments, to McCord Radiator & Mfg. Co., Detroit, Mich. Fluxing and cleaning apparatus. 1,633,015; June 21.
Harrison, John H. (See Rutledge, John J., assignor.)
Hart, George H., West Hartford, Conn. Switch mounting for electric ranges. 1,633,097; June 21.
Hart & Hegeman Manufacturing Company. (See Guett, Monroe, assignor.)
Hartley, Ralph V. L., South Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Electric-wave-modulating system. 1,633,016; June 21.
Hartmann Trunk Company. (See Chesnut, William C., assignor.)
Hartung, Leonard F., Los Angeles, Calif. Detachable cushion heel. 1,633,324; June 21.
Haubert, Leo, assignor of one-third to J. C. Bennett and one-third to J. A. Wolfe, Tulsa, Okla. Power-delivering attachment for automobile trucks or tractors. 1,633,208; June 21.
Hauswirth, Wilbur R., Long Beach, Calif. Oil-flowing device for wells. 1,633,325; June 21.
Hays, Harvey G., Columbus, Ohio. Staff support. 1,632,965; June 21.
Hebbard Manufacturing Company. (See Shackelford, Edward H., jr., assignor.)
Heese, Henry, Jersey City, N. J. Lightning-arrester system. 1,633,098; June 21.
Hellmann, Carl, Skelskor, Denmark. Machine adapted to catch and destroy bugs and similar noxious vermin on plants and bushes. 1,633,099; June 21.
Helmer, Granville A., Nazareth, Pa. Game apparatus. 1,632,792; June 21.
Heinz, Elizabeth S., administratrix. (See Heiz, Nicholas L., assignor.)
Heinz, Nicholas L., deceased, Walworth, Wis., E. S. Heinz, administratrix. Internal-combustion engine. 1,633,251; June 21.
Heinze, Paul, Detroit, Mich. Lettering device. 1,632,966; June 21.
Heising, Raymond A., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Plural channel signaling. 1,633,100; June 21.
Heller, John W., Arlington, Kans. Headlight-door remover and replacer. 1,633,528; June 21.
Hellman-Hupfel, Inc. (See Hupfel, A. G., jr., and Rector, assignors.)
Helmholtz, Arthur W. (See Crawford, J. H., Helmholtz, and Ferrell.)
Henderson, William, New York, N. Y. Came machine. 1,632,793; June 21.
Hendrickson, Henry P., Santa Rita, assignor of forty per cent to J. L. Del Monte and ten per cent to M. C. Frank, Oakland, Calif. Bunch rake. 1,633,017; June 21.
Hennessy, Daniel E., Milwaukee, Wis., assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Stitching. 1,633,326; June 21.
Henninger, Albert B., Berlin, Germany. Steering gear for automobile vehicles. 1,633,209; June 21.
Herbison, Ira, Plessis, N. Y. Game apparatus. 1,633,210; June 21.
Herold, James L. (See Dawson, J. W., and Herold.)
Herr, Herbert T., Merion, Pa., assignor to Westingnouse Electric and Manufacturing Company. Exhaust device for engines. 1,632,896; June 21.
Herrdegen, Kurt, Ludwigshafen-on-the-Rhine, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Purifying alkali metal cyanide solutions containing sulphides. 1,633,485; June 21.
Herthel, Eugene C., Chicago, Ill., assignor to Sinclair Refining Company, New York, N. Y. Producing light hydrocarbon liquids. 1,632,967; June 21.
Hess, Edward T., Irondequoit, N. Y. Automatic gasoline vending machine. 1,633,327; June 21.
Heywood, James H., Radcliffe, assignor to Cylinder Top Oilers Limited, Leeds, England. Lubricating means for internal-combustion engines. 1,633,378; June 21.
Heywood-Wakefield Company. (See Lloyd, Marshall B., assignor.)
Hickok, W. O., Mfg. Co., The. (See Broadmeyer, Albert, assignor.)
Higgins, George F., Melrose, Mass. Coin-controlled apparatus. 1,632,838; June 21.
Hiker Manufacturing Company, The. (See Connolly, Thomas J., assignor.)
Hill, Guy. (See Mauborgne, J. O., and Hill.)
Hinton, William, San Bernardino, Calif. Mold for plastic materials. 1,633,328; June 21.
Hipps, Marvin F., Electra, Tex. Automatic cut-off. 1,632,968; June 21.
Hird, John B., assignor to Ideal Brake Reliner Company, Seattle, Wash. Machine for lining brakes and clutches. 1,633,018; June 21.
Hoevel, Herman F. (See Auerbach, Karl, assignor.)
Hoffman, Charles C., New York, N. Y. Magazine pencil. 1,633,529; June 21.
Hoge, Smith A., Rices Landing, Pa. Signaling apparatus for motor vehicles. 1,633,252; June 21.
Hohl, George I. (See Evans, H. L., and Hohl.)
Holmes, Arthur S., Oshkosh, Wis. Thread-cutting machine. 1,632,897; June 21.
Hollar, William H., jr., Drexel Hill, Pa. Envelope. 1,633,369; June 21.
Holst, Lodewyk J. B., Brookline, assignor to Brock & Weymouth, Incorporated, Philadelphia, Pa. Projection-tracing table. 1,633,253; June 21.
Holt, Lafayette. (See Horner, E. B., and Holt.)
Hoover, Edward A., Bradley, and W. C. Kirchner, Kankakee, Ill. Miter box. 1,633,409; June 21.
Horner, Earl B., and L. Holt, Burlington, N. C. Machine for treating road-building material. 1,632,969; June 21.
Houghton, George F. C., Flushing, N. Y. Loud-speaker unit. 1,633,179; June 21.
Houts, John R., McLean, Va. Scraper-edge turner. 1,633,329; June 21.

Howell, Albert S., assignor to The Bell & Howell Company, Chicago, Ill. Panoraming device for photographic cameras. 1,633,101; June 21.
Hubbard, Moses G., Chatham, N. J. Thermostatic valve. 1,633,410; June 21.
Huff, William H., Hamlet, N. C. Adjustable tie plate. 1,632,970; June 21.
Hughes, Hugh T., Cleveland, Ohio, assignor, by mesne assignments, to E. Hainke, Grand Rapids, Minn. Plug-inserting tool. 1,633,330; June 21.
Hughes, Luther, et al. (See Daniels, Cecil C., assignor.)
Hughson, John A., New York, N. Y. Fastener for shirts, coats, and the like. 1,632,898; June 21.
Hunter, Samuel, Bellevue, Pa., assignor to Wappat Gear Works. Door-lock-mortising machine. 1,633,370; June 21.
Hupfel, Adolph G., jr., and T. M. Rector, assignor to Hellman-Hupfel, Inc., New York, N. Y. Mushroom paste. 1,633,379; June 21.
Hurd, Earl, assignor to Bray-Hurd Process Company, Inc., New York, N. Y. Apparatus for producing animated drawings. 1,633,547; June 21.
Hutchins, Colin, Leamington, Ontario, Canada. Collapsible mold core. 1,632,899; June 21.
Huth, Walter H., Chicago, Ill. Electrical condenser. 1,633,019; June 21.
Ideal Brake Reliner Company. (See Hird, John B., assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Herrdegen, Kurt, assignor.)
Ingersoll-Rand Company. (See Bayles, L. C., and Slater, assignors.)
Ingersoll-Rand Company. (See Hansen, Charles C., assignor.)
Ingersoll-Rand Company. (See Le Valley, John, assignor.)
Ingram, Floyd M., Sioux Rapids, Iowa. Cow hopple. 1,633,020; June 21.
Inland Glass Company. (See Allen, Joseph H., assignor.)
Inskeep, William D., and E. B. Parsons, San Francisco, Calif. Automatic releasing clutch. 1,632,839; June 21.
International Fire Equipment Corporation. (See Johnston, Charles O., assignor.)
International Motor Company. (See Gurney, Erving R., assignor.)
International Motor Company. (See Haag, Gustavus, assignor.)
International Motor Company. (See Shields, Henry B., assignor.)
International Silver Co. (See Beck, Ernest T., assignor.)
International Silver Co. (See Kintz, Robert R., assignor.)
Irving Engineering Sales Co. (See Irving, Frank J., assignor.)
Irving, Frank J., assignor to Irving Engineering Sales Co., Inc., Buffalo, N. Y. Operating mechanism for radiator shutters. 1,633,021; June 21.
Irwin, Lawrence C., assignor to Charles J. Tagliabue Mfg. Co., Brooklyn, N. Y. Compensating means for recording and indicating instruments. 1,633,380; June 21.
Jacob, Peritz. (See Fullenlove, McClellan C., assignor.)
Jacobs, Lillian, Cincinnati, Ohio. Carrier for buckets and the like. 1,633,022; June 21.
Jackson, Albert H., London, England. Electric motor-control system. 1,633,102; June 21.
Jackson, Philip A., assignor to The Egry Register Company, Dayton, Ohio. Autographic register. 1,633,103; June 21.
Jackson, Thomas, London, assignor to G. B. Ramsay, Folkestone, England. Governing device. 1,633,180; June 21.
James, Albert E., Natches, Miss. Oil-burning stove. 1,632,971; June 21.
Jammer, Jacob S., Cumberland, Md., assignor to Western Electric Company, Incorporated, New York, N. Y. Repeater circuit for multiplex systems. 1,632,900; June 21.
Jardine, Robert, assignor to Rich Tool Company, Chicago, Ill. Roller tapper for poppet valves and making the same. 1,633,331; June 21.
Jeffers, Bailey L., assignor of one-half to H. C. Gay, Spokane, Wash. Pan holder. 1,632,972; June 21.
Jenks, Edwin A., Alderpoint, Calif. Roadway embankment. 1,633,211; June 21.
Jespersen, Helgo W., Western Springs, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Mechanism for working pulpous material. 1,633,181; June 21.
Johannegt, Jan C., The Hague, Netherlands. Advertising device. 1,632,973; June 21.
Johnson, Albert, et al. (See Sopher, Ted L., assignor.)
Johnson, Alfred C., assignor to Belle City Manufacturing Company, Racine, Wis. Tractor. 1,633,212; June 21.
Johnson, Allington H., Tacoma, Wash. Dirigible headlight for automobiles. 1,633,332; June 21.
Johnson, Herbert B., Brooklyn, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Trunking system. 1,632,901; June 21.
Johnson, Lewis H., Madison, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Testing system. 1,632,902; June 21.
Johnson, Melvin, Danville, Ill. Dump truck. 1,633,104; June 21.
Johnson, William, et al. (See Sopher, Ted L., assignor.)
Johnston, Charles O., assignor, by mesne assignments, to International Fire Equipment Corporation, New York, N. Y. Fire extinguisher. 1,633,254; June 21.
Jones, Jesse M., and R. R. Webb, assignors to Charles R. Hadley Company, Los Angeles, Calif. Tray binder. 1,633,023; June 21.
Jones, Robert R., assignor to The Firestone Tire and Rubber Company, Akron, Ohio. Seal for driers, heaters, or the like. 1,633,548; June 21.
Jorgensen, Hans G., Erie, Pa. Antirattle joint strip. 1,632,903; June 21.
Jorgensen, Lewis, Sioux City, Iowa. Current retarder. 1,633,530; June 21.
Judelson, Julius, New York, N. Y. Load supporting and carrying device. 1,632,904; June 21.
Kalbfleisch Corporation, The. (See Fredriksson, John F., assignor.)
Kaptuller, Alexander F., Chicago, Ill. Universal joint. 1,633,333; June 21.
Karcher, Lawrence C., and L. Asman, Evansville, Ind. Automobile heater. 1,632,974; June 21.
Karwath, Alonzo H., Davenport, Iowa. Container for powdered substances. 1,633,105; June 21.
Kasdan, Nathan, New York, and D. Pollack, Brooklyn, N. Y. Article-containing case. 1,633,255; June 21.
Kassler, Frederick W., St. Louis, Mo. Coin-controlled lock. 1,633,411; June 21.
Kaufman, Joseph, assignor to American Safety Razor Corporation, New York, N. Y. Combined case and razor blades. Des. 72,897; June 21.
Kaufman, Joseph, assignor to American Safety Razor Corporation, New York, N. Y. Combined case and razor holder. 1,632,840; June 21.
Kautz, Charles W., jr., Lancaster, Pa., assignor to Westinghouse Electric & Manufacturing Company. Circuit-restoring relay. Re16,661; June 21.
Kayline Co., The. (See Maerz, Frederick K.)
Kelleher, Thomas J., Chicago, Ill. Eye and face shield for grinding wheels. 1,633,412; June 21.
Keller, Andrew P., Tiffin, Ohio. Spray disk and method and apparatus for making the same. 1,633,531; June 21.
Keller, William H., Inc. (See Shaff, Ernest H., assignor.)
Kelly, Charles B., Seattle, Wash. Paint improving composition and size. 1,633,106; June 21.
Kel-Plastic Corporation. (See Meehan, G. F., and Kennedy, assignors.)
Kempter, Fritz, Stuttgart, Germany. Kneading and mixing machine. 1,632,975; May 21.
Kennedy, Arthur L. (See Meehan, G. F., and Kennedy.)
Kennedy, James S., Yonkers, N. Y., assignor to The Bartlett Hayward Company. System for automatic valve control. 1,632,905; June 21.
Kent, Walter G., London, England. Liquid meter. 1,633,532; June 21.
Kern, Albert L., Aurora, Ill. Brad driving and extracting tool. 1,633,533; June 21.
Kestenman Bros. Mfg. Co. (See Kestenman, Charles H., assignor.)
Kestenman, Charles H., assignor to Kestenman Bros. Mfg. Co., Providence, R. I. Fastening device for wrist-watch straps and bracelets. 1,633,381; June 21.
King, Joseph F., Brooklyn, assignor to H. A. Metz, New York, N. Y. Chemical composition. 1,633,213; June 21.
Kinney Rome Company. (See Hanauer, Darwin, assignor.)
Kintz, Robert R., assignor to International Silver Co., Meriden, Conn. Dish or similar article. Des. 72,898; June 21.
Kintz, Robert R., assignor to International Silver Co., Meriden, Conn. Tray or similar article. Des. 72,899; June 21.
Kintz, Robert R., assignor to International Silver Co., Meridian, Conn. Bowl or similar article. Des. 72,900; June 21.
Kintz, Robert R., assignor to International Silver Co., Meriden, Conn. Cup or similar article. Des. 72,901; June 21.
Kirchner, William C. (See Hoover, E. A., and Kirchner.)
Klein, Benjamin F. (See Maerz, Frederick K., assignor.)
Kleinhans, Arthur B., Easton, Pa. Building construction. 1,633,446; June 21.
Klevins, Maurice. (See Boyer, H., and Klevins.)
Kliesrath, Victor W. (See Bragg, C. S., and Kliesrath.)
Knapp, Charles P., New York, assignor of one-half to W. H. Mack, Johnson City, N. Y. Smoker's stand or the like. Des. 72,902; June 21.
Knight, Ira W., Cranston, assignor to General Fire Extinguisher Company, Providence, R. I. Testing device for booster-pump dry-pipe systems. 1,633,107; June 21.
Knight, Ira W., Cranston, assignor to General Fire Extinguisher Company, Providence, R. I. Valve apparatus. 1,633,108; June 21.
Knight, Ira W., Cranston, assignor to General Fire Extinguisher Company, Providence, R. I. Valve apparatus. 1,633,109; June 21.
Knoll, Anton, New Bedford, Mass. Hair net. 1,633,182; June 21.
Knotwell, Glenn R., assignor of one-half to E. W. Skelton, Wauneta, Nebr. Tractor guide. 1,633,334; June 21.
Kodel Radio Corporation, The. (See Ogden, Clarence E., assignor.)
Koeb, Emil, and B. J. Goldsmith, assignors to Perfect Window Regulator Corporation, New York, N. Y. Mounting construction. 1,633,182; June 21.

Koester, Henry, Irvington, N. J. Clothesline cleaner. 1,633,382; June 21.
Kofford, Earl J., assignor to Denver Ice & Cold Storage Company, Denver, Colo. Elevating platform for trucks. 1,633,024; June 21.
Koons, John F., Alexis, Ill. Valve-pin replacer. 1,633,110; June 21.
Kottmann, August, Sommerda, assignor to the Frm: Rheinische Metallwaaren- und Maschinenfabrik, Dusseldorf-Derendorf, Germany. Key mechanism for calculating and adding machines. 1,633,256; June 21.
Kourtzman, Per A., Vartan, near Stockholm, Sweden. Speed-indicating apparatus. 1,632,976; June 21.
Kovács, Theodor, Berlin, Germany. Reservoir pen. 1,633,111; June 21.
Kranz, Michael, assignor of one-fourth to W. H. Nelles, Chicago, Ill. Swivel plug. 1,633,025; June 21.
Krattli, Michael, Kansas City, Mo. Curtain fixture. 1,633,026; June 21.
Kreissig, Ernst, Uerdingen, Germany. Spring-supporting means and the like. 1,633,027; June 21.
Kruckenberg, Franz, Heidelberg, Germany. Overcoming great differences of height with high-speed passenger traffic. 1,633,214; June 21.
Kubierschky, Konrad, Eisenach, and W. Schultze, Halle-on-the-Saale, Germany. Fire-extinguishing liquid. 1,633,383; June 21.
Kulbeck, Niels, Oslo, Norway. Scaffold. 1,633,112; June 21.
La Brie, Ludger E. (See Bendix, V., and La Brie.)
La Brie, Ludger E., South Bend, Ind., assignor to Bendix Brake Company, Chicago, Ill. Operating device. 1,632,794; June 21.
La Croix, Louis E., Baltimore, Md. Vending machine. 1,633,215; June 21.
La France, Richard, assignor to The Owens Bottle Company, Toledo, Ohio. Cooling molds. 1,633,028; June 21.
Laney, Frank T., Akron, Ohio. Storage battery. 1,633,257; June 21.
Laise, Clemens A., Haworth, N. J. Refractory metal alloy of high density and high melting point and making the same. 1,633,258; June 21.
Lake, Clyde A., Detroit, Mich. Liquid-level indicator. 1,633,113; June 21.
Lakeman, William R., Rochester, N. Y. Machine for cleaning electrotype plates. 1,633,216; June 21.
La Marca, Stefano, Brooklyn, N. Y. Adjustable shoe. 1,633,413; June 21.
Lammers, Bert C. (See Nelson, P. D., and Lammers.)
Lampe, Frederick, executor. (See Van Derbeck, S. G., and Bortolin.)
Langenfeld, Adolph L.; New Holstein, Wis. Propulsion link for endless traction belts. 1,633,259; June 21.
Lapp, Claude J., Iowa City, Iowa, assignor to H. G. Dorsey, Washington, D. C. Means and apparatus for recording sound waves. 1,633,335; June 21.
Larson, Winford P., Minneapolis, Minn. Dentifrice. 1,633,336; June 21.
Laurency, Guillaume C., Twickenham, assignor of sixty per cent to G. McLean, London, England. Apparatus for drawing textile fibers. 1,633,029; June 21.
Lauter, Felix, Philadelphia, Pa., assignor to Rohm & Haas Company. Resinous reaction product of urea and formaldehyde. 1,633,337; June 21.
Lavagnino, Joseph I., Angels Camp, Calif. Fruit-picking apparatus. 1,632,977; June 21.
Lawrence, Charles L., New York, N. Y. Tool kit. 1,633,030; June 21.
Laxer, Louis, et al. (See Baron, John, assignor.)
Ledbetter, James C., Brooklyn, assignor, by mesne assignments, to The Prosperity Company, Inc., Syracuse, N. Y. Press. 1,633,260; June 21.
Lefever, Charles F., assignor to Daisy Manufacturing Company, Plymouth, Mich. Popgun. 1,633,031; June 21.
Lefèvre, Jules, Paris, France. Lens-clamping bracket for use with pince-nez glasses and spectacles. 1,632,906; June 21.
Legendre, Henri, Paris, France. Signal device for motor vehicles. 1,632,978; June 21.
Lengel, Albert L., Bakersfield, Calif. Automatic inking fountain for printing presses. 1,633,338; June 21.
Leopold, George O. (See Fegley, T. J., and Leopold.)
Le Rossignol, Robert. (See Bartlett, A. C., and Le Rossignol.)
Le Valley, John, Painted Post, N. Y., assignor to Ingersoll-Rand Company, Jersey City, N. J. Unloading valve. 1,632,841; June 21.
Lewis, Hannah, New York, N. Y. Smock. 1,633,447; June 21.
Lewis, William G., Chicago, Ill. Fountain-pen holder. Des. 72,903; June 21.
Liening, Henry A., Detroit, Mich. Combined drinking fountain and animal trough. 1,632,842; June 21.
Lincrusta-Walton Company. (See Abolin, Harry T., assignor.)
Little, Harry C., Larkspur, assignor to J. B. Cheda, San Rafael, Calif. Liquid-fuel burner. 1,633,549; June 21.
Littlefield, Edgar E., Los Angeles, Calif. Valve. 1,633,217; June 21.
Lloyd, Marshall B., Menominee, Mich., assignor to Heywood-Wakefield Company, Boston, Mass. Reed-braid-making machine. 1,633,261; June 21.
Lockwood & Lockwood. (See Shultz, Charles A., assignor.)
Loftus, Joseph. (See McLaughlin, B. F., and Loftus.)
Logan, James W., Newark, N. J., assignor to J. M. Page, New York, N. Y. Liquid-fuel burner. 1,633,560; June 21.
Loken, Truls, Kenosha, Wis., assignor to Austin Machinery Corporation, Chicago, Ill. Trenching machine. 1,633,115; June 21.
Lolli, Guido, Chicago, Ill. Extensible fender. 1,632,979; June 21.
Lolli, Guido, Chicago, Ill. Extensible vehicle fender. 1,632,980; June 21.
Lomax, Clarence E., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Telephone system. 1,633,116; June 21.
Long, Bernard, Paris, France, assignor to Société Anonyme des Manufactures des Glaces & Produits Chimiques de Saint-Gobain, Chauny & Cirey, Paris, France. Glass and making the same. 1,633,534; June 21.
Loose, Clyde E., Baltimore, Md. Safety check device. 1,633,114; June 21.
Lorenz, Adolph G., Little Rock, Ark. Combined license-plate and identification-card holder. 1,633,414; June 21.
Lösel, Franz, Brunn, Czechoslovakia. High-pressure steam turbine and utilizing high-pressure steam therein. 1,632,907; June 21.
Lucke, Charles E., assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Internal-combustion engine. 1,633,384; June 21.
Ludlow, Thomas H., Rochester, N. Y. Conduit bushing adapter. 1,632,843; June 21.
Luipersbek, Frank, Boundbrook, N. J. Moisture feeder for flowerpots. 1,633,184; June 21.
Lundegaard, Anders, M. P., Copenhagen, Denmark. Steam turbine gland with more than one pipe connection. 1,632,981; June 21.
Lundell, Alben E., assignor to Western Electric Company, Incorporated, New York, N. Y. Register-controlling system. 1,632,908; June 21.
L'Union Generale d'Electricite. (See Fallou, Jean G., assignor.)
Lunz, Franz, New York, N. Y., assignor to Aero Toy & Manufacturing Co., Inc., New York, N. Y. Spinning toy. 1,633,486; June 21.
Lurcott, Winfred N., Elizabeth, N. J., assignor to Moore Bros. Co., New York, N. Y. Liquid-soap dispenser. 1,633,448; June 21.
Lusk, Charles S., Alfred Station, N. Y. Combined track level and gauge. 1,633,535; June 21.
Lynn, Robert C. (See Foster, Samuel P., assignor.)
Lyon Metallic Manufacturing Company. (See O'Connor, John B., assignor.)
Mack, William H. (See Knapp, Charles P., assignor.)
Mackay, Lurline E., Burlington, Iowa. Stair cleaner. 1,633,119; June 21.
Madden, James P., Bethlehem, Pa. Entrainment gearing. 1,633,185; June 21.
Maerten, Christian, jr., assignor to Artizan Factories, Inc., North Tonawanda, N. Y. Automatic musical instrument. 1,633,487; June 21.
Maerz, Frederick K., assignor to B. F. Klein, doing business as The Kayline Co., Cleveland, Ohio. Lamp shade. Des. 72,904; June 21.
Maerz, Frederick K., assignor to B. F. Klein, doing business as The Kayline Co., Cleveland, Ohio. Lamp shade. Des. 72,905; June 21.
Malmin, Hyman, New York, N. Y., assignor to Malmin Speed Control Corporation. Mounting for sewing-machine motors. 1,632,795; June 21.
Malmin Speed Control Corporation. (See Bangster, William, assignor.)
Malmin Speed Control Corporation. (See Malmin, Hyman, assignor.)
Malne, James. (See Engle, Andrew, assignor.)
Malse, Herman C., assignor to Briggs Manufacturing Company, Detroit, Mich. Cowl ventilator. 1,632,796; June 21.
Mammen, Lawrence W., Chicago, Ill. Laundry machine. 1,632,797; June 21.
Marksman, Frederick L. (See Ryan, E. A., and Marksman.)
Martin, George C., Los Angeles, Calif. Forming pipe. 1,633,219; June 21.
Martin, William H., et al. (See Hansen, John, assignor.)
Maschinenfabrik Augsburg-Nuernberg Aktiengesellschaft. (See Riehm, Wilhelm, assignor.)
Maschinenfabrik Moenus Aktien-Gesellschaft. (See Bohacek, Bruno P., assignor.)
Mason, Sumner R., Wilmette, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Buffing and cleaning of metal parts. 1,632,909; June 21.
Mather, Alonzo C., Chicago, Ill. Uncoupling link for railroad cars. 1,633,339; June 21.
Mauborgne, Joseph O., and G. Hill, Washington, D. C. Wave meter. 1,632,982; June 21.
Maxmoor Corporation. (See Moore, Arlington, assignor.)
Mayorowitz, Maurice, New York, N. Y. Detachable-heel construction. 1,633,440; June 21.
McCallum Hosiery Co. (See Council, John G., assignor.)
McCord Radiator & Mfg. Co. (See Harris, Joseph D., assignor.)
McDanal, Michael R., Denver, Colo. Method of and apparatus for producing bifocal lenses. 1,633,117; June 21.

McDonald, Charles D., assignor to McDonald Machine Co., Chicago, Ill. Automatic die press. 1,633,340; June 21.
McDonald, Frank A., and F. G. Welke, San Francisco, Calif. Closure-cap lock. 1,633,218; June 21.
McDonald, Hugh, Clinton, Iowa. Coal chute. 1,633,341; June 21.
McDonald Machine Co. (See McDonald, Charles D., assignor.)
McElyea, Harley B., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Bank and trunk cable multipling system. 1,633,118; June 21.
McGill Manufacturing Company. (See Despard, Victor R., assignor.)
McGinn, Patrick J., New York, N. Y. Valve. 1,633,488; June 21.
McGinness, Joseph E., Pittsburgh, Pa. Golf-ball marker. 1,633,536; June 21.
McGregor, Alexander G., Warren, Ariz. Reverberatory-furnace waste-heat boiler. 1,632,844; June 21.
McGuirk, Edward J., Newark, N. J., assignor to Greene, Tweed & Co. Ash tray. Des. 72,906; June 21.
McKee, Benjamin F., Arma, Kans. Engine valve. 1,633,450; June 21.
McKinney, Edward H., Salina, Kans. Fluid-power transmission. 1,633,550; June 21.
McKissick, William H., Tulsa, Okla. Safety block. 1,633,489; June 21.
McKissick, William H., Tulsa, Okla. Safety sheave block. 1,633,537; June 21.
McLaughlin, Bernard F., and J. Loftus, Brooklyn, N. Y. Heating roll for printing presses. 1,633,451; June 21.
McLean, Grant. (See Laurency, Guillaume C., assignor.)
McLemore, Henry G., Columbus, Ga. Check attachment for looms. 1,633,452; June 21.
McMyler Insterstate Company, The. (See Wright, James F., assignor.)
McQuarrie, Thomas, et al. (See Hansen, John, assignor.)
Meder, Arthur, Carlstadt, N. J., assignor to Norma-Hoffmann Bearings Corporation, New York, N. Y. Textile spindle. 1,632,798; June 21.
Meehan, George F., Far Rockaway, and A. L. Kennedy, assignors, by mesne assignments, to Kel-Plastic Corporation, New York, N. Y. Vegetable sea-growth derivative and preparation thereof. 1,633,262; June 21.
Meier, Milton, Newark, N. J., assignor to Meyer & Gross. Finger ring. Des. 72,907; June 21.
Meissner, Alexander, assignor to Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Arrangement for converting acoustic energy into electrical energy. 1,633,186; June 21.
Melzer, Otto. (See Wahl, J., and Melzer.)
Mendel, William, Beverly, assignor to S. A. Neidich, Edgewater Park, N. J. Dyeing filaments and films formed from viscose. 1,633,220; June 21.
Mendel, William, Beverly, assignor to S. A. Neidich, Edgewater Park, N. J. Dyeing filaments and films formed from viscose. 1,633,221; June 21.
Mensing, Karl, assignor to the Firm: Quarzlampen-Gesellschaft m. b. H., Hanau, Germany. Lamp support. 1,633,538; June 21.
Metz, Herman A. (See King, Joseph F., assignor.)
Meyer & Gross. (See Meier, Milton, assignor.)
Meyer, John F. (See Smith, Percy C., assignor.)
Micro Machine Company. (See Baumberger, William J., assignor.)
Middlecoff, Edward T., St. Louis, Mo. Safety-razor-blade holder. 1,632,910; June 21.
Midgley, Thomas, Hampden, assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Pulley-band-tire construction. 1,633,342; June 21.
Miles, James C. (See Seelbach, Kurt L., assignor.)
Miller Beauty Mirror Company. (See Miller, William E., assignor.)
Miller, Charles E., Detroit, Mich. Sugar gauge. 1,633,343; June 21.
Miller, Frank R., assignor to The Graham Glass Company, Evansville, Ind. Bottle. Des. 72,908; June 21.
Miller, John W., El Dorado, Ark. Pulling device for gears and the like. 1,633,453; June 21.
Miller, William E., Mullan, Idaho, assignor to Miller Beauty Mirror Company. Adjustable mirror. 1,633,120; June 21.
Miller, William R., Medford, and I. Gordon, Malden, Mass. Connecting link. 1,633,539; June 21.
Mills, Chester B., assignor to The Sperry Gyroscope Company, Brooklyn, N. Y. Electromagnetic power-transmitting means. 1,633,454; June 21.
Milton, George R. (See Turner, C. E., and Milton.)
Miner, Daniel P. (See Priebe, E. B., and Miner.)
Miner, W. H., Inc. (See O'Connor, John F., assignor.)
Minton, Ogden, Greenwich, Conn. Vacuum seal and apparatus. 1,633,121; June 21.
Minton, Richard C., East Boldon, assignor to A. Reyrolle & Company Limited, Hebburn-on-Tyne, England. Switching arrangement for electric substations. 1,633,490; June 21.
Moline, Carl H., Waterloo, Iowa. Adjustable marking guide. 1,633,122; June 21.
Monks, Charles H., Ridgewood, N. J. Mouthpiece attachment for telephones. 1,633,491; June 21.
Moore, Arlington, New York, N. Y., assignor, by mesne assignments, to Maxmoor Corporation. Progressive-impulse internal-combustion engine. 1,633,385; June 21.
Moore Bros. Co. (See Lurcott, Winfred N., assignor.)
Moore, James S., assignor to The Edwin F. Guth Company, St. Louis, Mo. Lighting fixture. Des. 72,909; June 21.
Moore, Robert, Montclair, N. J. Marking tape for tennis courts. 1,632,799; June 21.
Moran, Lawrence, Chicago, Ill. Adjustable droplight-cord holder. 1,633,344; June 21.
Moreland, Lester A., assignor to The de Laski & Thropp Circular Woven Tire Company, Trenton, N. J. Collapsible core and chuck. 1,633,263; June 21.
Morgan, Ralph L., Worcester, assignor, by mesne assignments, to Greenfield Tap and Die Corporation, Greenfield, Mass. Fluid-pressure operating mechanism for reciprocating members. 1,633,557; June 21.
Morgan, Ralph L., Worcester, assignor to Greenfield Tap and Die Corporation, Greenfield, Mass. Grinding machine. 1,633,558; June 21.
Morley, Earl M., Delta, assignor to The Air-Scale Company, Toledo, Ohio. Pneumatic-tire-charging equipment. 1,633,492; June 21.
Morong, Alton E. (See Greene, W. E., and Morong.)
Morris, Alexander, and V. L. Morris, San Francisco, Calif. Set-shift parallel ruler. 1,633,493; June 21.
Morris, Edmund, assignor to Grand Rapids Store Equipment Corporation, Grand Rapids, Mich. Furniture Construction. 1,633,345; June 21.
Morris, George T., Missoula, Mont. Pet-cock and priming-cup cleaner. 1,633,264; June 21.
Morris, Victoria L. (See Morris, Alexander and V. L.)
Morrison, George A., Park Ridge, assignor to Torchweld Equipment Co., Chicago, Ill. Torch. 1,633,265; June 21.
Mossberg, Frank, Providence, R. I., assignor to Mossberg Pressed Steel Corporation, Attleboro, Mass. Carrier for braiding machines. 1,633,346; June 21.
Mossberg Pressed Steel Corporation. (See Mossberg, Frank, assignor.)
Mowbray, James W., Windsor, Ontario, Canada, assignor, by mesne assignments, to The Automotive Corporation, Fort Wayne, Ind. Line-control tractor. 1,632,911; June 21.
Mullor, Alvaro, Sceaux, France, and L. Carriol, Ghent, Belgium. Weft-feeding device for weaving looms. 1,632,912; June 21.
Murphy, Ralph L., assignor of one-half to I. L. Robinson, Miera, New Mex. Wrench. 1,633,455; June 21.
National Aniline & Chemical Company. (See Nelson, Ralph A., assignor.)
National Cash Register Company, The. (See Shipley, Bernis M., assignor.)
National Grave Vault Co., The. (See Brick, Perry A., assignor.)
Neidich, Samuel A. (See Mendel, William, assignor.)
Neilsen, Emil J., assignor to Phenolic Products Corporation, Rockford, Ill. Toilet-seat-hinge mounting. 1,633,281; June 21.
Nell, Gustave M., assignor to The Denver Rock Drill Manufacturing Company, Denver, Colo. Rock drill. 1,633,551; June 21.
Nelles, Winand H. (See Krans, Michael, assignor.)
Nelson, John, Chicago, Ill. Power equalizer for power presses. 1,633,266; June 21.
Nelson, John, Chicago, Ill. Cushioning means for power presses. 1,633,267; June 21.
Nelson, Paul D., and B. C. Lammers, Venango, Nebr. Halter. 1,633,268; June 21.
Nelson, Ralph A., Buffalo, assignor to National Aniline & Chemical Company, Inc., New York, N. Y. Production of benzidine and derivatives. 1,633,123; June 21.
Nelson, William E. (See Busha, Leon, assignor.)
Nestor Manufacturing Company. (See Geissenhainer, F. W., and Cumner, assignors.)
Neumann, Ewald, Brunswick, Germany. Cooking utensil with hinged and removable lid. 1,633,494; June 21.
Nicholson, Jacob P., Chicago, Ill. Vehicle washing pit. 1,633,280; June 21.
Nobile, Giuseppe. (See Silvestrin, Giovanni, assignor.)
Noble, Esther M., Boise, Idaho. Auxiliary toilet seat 1,633,222; June 21.
Noe, Roy H., Memphis, Tenn. Exercising apparatus. 1,633,124; June 21.
Norberg, Hugo W., Flint, Mich. Figure toy. 1,633,456; June 21.
Nordling, Fridolf M., Denver, Colo. Baseboard radiator for the rooms of buildings. 1,633,032; June 21.
Norma-Hoffmann Bearings Corporation. (See Meder, Arthur, assignor.)
North Bro's. M'f'g. Co. (See Fegley, T. J., and Leopold, assignors.)
Norton, Allen B., Cleveland, Ohio, assignor to Aluminum Company of America, Pittsburgh, Pa. Hollow metal article and producing the same. 1,633,187; June 21.
Nutt, Arthur, Buffalo, assignor to Curtiss Aeroplane and Motor Company, Inc., Garden City, Long Island, N. Y. Propeller mounting. 1,632,913; June 21.
Oakite Products, Inc. (See Clarin, David X., assignor.)
Oberle, Alfred, Oak Park, Ill. Carbonaceous material and making the same. 1,632,845; June 21.
O'Brien, William J., Baltimore, Md. Refining barytes. 1,633,347; June 21.
O'Connor, John B., assignor to Lyon Metallic Manufacturing Company, Aurora, Ill. Coat hook. 1,633,495; June 21.
O'Connor, John F., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Friction shock-absorbing mechanism. 1,632,914; June 21.

O'Connor, John F., assignor to W. H. Miner, Inc., Chicago, Ill. Friction shock-absorbing mechanism. 1,632,915; June 21.
O'Connor, John F., assignor to W. H. Miner, Inc., Chicago, Ill. Friction shock-absorbing mechanism. 1,632,916; June 21.
O'Connor, John F., assignor to W. H. Miner, Inc., Chicago, Ill. Friction shock-absorbing mechanism. 1,632,917; June 21.
O'Connor, John F., assignor to W. H. Miner, Inc., Chicago, Ill. Friction shock-absorbing mechanism. 1,633,033; June 21.
O'Connor, John F., assignor to W. H. Miner, Inc., Chicago, Ill. Friction shock-absorbing mechanism. 1,633,034; June 21.
O'Connor, John F., assignor to W. H. Miner, Inc., Chicago, Ill. Friction shock-absorbing mechanism. 1,633,269; June 21.
Ogden, Clarence E., Cincinnati, Ohio, assignor to The Kodel Radio Corporation. Storage battery. 1,633,224; June 21.
Oil Devices Corporation. (See Breese, James L., jr., assignor.)
Olshei, John R., Buffalo, N. Y. Rear view mirror. 1,633,282; June 21.
Oliver, Immanuel A., assignor to The Pomona Manufacturing Company, Pomona, Calif. Pump bearing. 1,633,188; June 21.
Olsen, Einar E. (See Sausen, B. R., and Olsen.)
Olsen, Oswald A., Bridgeport, Conn. Compression pump. 1,633,270; June 21.
Olson, George H., Bridgeport, Conn. Cement-form holder. 1,632,918; June 21.
Osborne, William L., assignor of one-half to A. R. Chandler, Los Angeles, Calif. Apparatus for cleaning crank cases. 1,633,283; June 21.
Overdick, William, Brooklyn, N. Y. Steering gear. 1,633,415; June 21.
Overstrom, George. (See Overstrom, Gustave A. and G.)
Overstrom, Gustave A., Los Angeles, and G. Overstrom, Taft, Calif. Gas and oil separator. 1,632,919; June 21.
Owen, John H., assignor of one-third to T. N. Crocker and one-third to B. V. Chapman, Newberry, S. C. Stop motion for roving machines. 1,633,284; June 21.
Owens Bottle Company, The. (See Bragg, Thomas A., assignor.)
Owens Bottle Company, The. (See La France, Richard, assignor.)
Owens Bottle Company, The. (See Soubier, Leonard D., assignor.)
Packard Motor Car Company. (See Vincent, Jesse G., assignor.)
Page, Jenny M. (See Logan, James W., assignor.)
Page, Larrance, Berkeley, Calif. Shutter-release holder. 1,633,125; June 21.
Palmenberg, Emil T., assignor to J. R. Palmenberg's Sons, Inc., New York, N. Y. Pedestal or the like. Des. 72,910; June 21.
Palmenberg's J. R., Sons, Inc. (See Palmenberg, Emil T., assignor.)
Paragon Can & Cap Company. (See Russell, Robert A., assignor.)
Parsons, Edward B. (See Inskeep, W. D., and Parsons.)
Patten, William F., Washington, D. C. Toilet novelty. 1,632,920; June 21.
Pauly, Charles, Fort Washington, Wis. Vat. 1,633,271; June 21.
Paynter, Albert J., Osborne, Kans. Rotary sieve. 1,633,126; June 21.
Pearce, James W., assignor to Goodman Manufacturing Company, Chicago, Ill. System for mining. 1,632,800; June 21.
Peerless Pneumatic Systems, Inc. (See Bartling, Howard G., assignor.)
Peerless Pneumatic Systems Inc. (See Sausen, B. R., and Olsen, assignors.)
Peers, E. P., et al. (See Carter, S. W. and O. E., assignors.)
Peinlich, Max, White Plains, assignor to Columbia Lighting Fixture Co., Inc., New York, N. Y. Backplate for a lighting fixture or the like. Des. 72,911; June 21.
Peinlich, Max, White Plains, assignor to Columbia Lighting Fixture Co., Inc., New York, N. Y. Arm for a lighting fixture or the like. Des. 72,912; June 21.
Penberthy, Ernest, Detroit, Mich., assignor to Chicago Pneumatic Tool Company, New York, N. Y. Front head for percussive drills. 1,632,921; June 21.
Penote, Augustus J., Cleveland, Ohio. Sectional form. 1,632,846; June 21.
Pepe, Vincent, Brooklyn, N. Y. Coin holder. 1,633,127; June 21.
Peraira, Joseph A., and F. Roberts, Yuba City, Calif. Machine for making hook supports. 1,633,416; June 21.
Perfect Window Regulator Corporation. (See Goldsmith, Bertram J., assignor.)
Perfect Window Regulator Corporation. (See Koeb, E., and Goldsmith, assignors.)
Perfection Package Sealer Company. (See Utts, William A., sr., assignor.)
Perry, Dyer W., Keene, N. H. Eyeglass-case holding and protecting device. 1,633,417; June 21.
Perry, Harry H., San Jose, Calif. Scooter. Des. 72,913; June 21.
Petsch, Everett C., Pleasant Dale, Nebr. Stay-put parking brake. 1,633,348; June 21.
Phenolic Products Corporation. (See Nielsen, Emil J., assignor.)
Phister, Albert B., Fort Thomas, Ky., assignor to The Phister Manufacturing Company, Cincinnati, Ohio. Chemical fire extinguisher. Re16,662; June 21.
Phister Manufacturing Company. (See Phister, Albert B., assignor.)
Picard, Georges, assignor to B. J. Coghlin Company Limited, Montreal, Canada. Rail anchor. 1,632,847; June 21.
Pierce, Leon, New York, N. Y. Rolling mill. 1,633,349; June 21.
Plume & Atwood Mfg. Co., The. (See Boomer, George A., assignor.)
Poirier, Ernest, assignor of forty-nine one-hundredths to J. W. Stobie, Waterville, Me. Paper-making machine. 1,633,189; June 21.
Pollack, Daniel. (See Kasdan, N., and Pollack.)
Pomona Manufacturing Company, The. (See Oliver, Immanuel A., assignor.)
Pony Fruit Corporation, The. (See Rosenthal, Sam, assignor.)
Prahl, Frederick A., Chicago, Ill., assignor to Continental Can Company, Inc., New York, N. Y. Sheet-metal container. 1,632,848; June 21.
Preston, George E. (See Colbert, C. C., and Preston.)
Pribil, Alexis R., Saginaw, Mich. Coaster wagon. 1,633,272; June 21.
Priebe, Ernest B., Inwood, N. Y., and D. P. Miner, Providence, R. I.; said Miner assignor of his undivided one-half interest to W. C. Drake, Inwood, N. Y. Furnace grate. 1,633,418; June 21.
Procter, Joseph H., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Automatic circuit interrupter. 1,632,983; June 21.
Proctor, John A., Lexington, assignor to Wireless Specialty Apparatus Company, Boston, Mass. High-potential electrical condenser. 1,633,285; June 21.
Prosperity Company. (See Ledbetter, James C., assignor.)
Pryor, Joseph E., Summit, N. J. Golf-tee anchor. 1,632,801; June 21.
Quarzlampen-Gesellschaft m. b. H. (See Mensing, Karl, assignor.)
Rader, Marion A., Walla Walla, Wash. Glare shield. 1,633,190; June 21.
Raimer, Joseph B. (See Raimer, Philip and J. B., and Rolfs.)
Raimer, Philip and J. B., and E. A. Rolfs, Maple Heights, Ohio. Power take-off device for tractors. 1,633,273; June 21.
Ramsay, Glendora B. (See Jackson, Thomas, assignor.)
Rankin, Karl L. (See Furber, J. B., and Rankin.)
Rasmesen, George, jr., Winnetka, Ill. Wire brush. 1,633,274; June 21.
Rau, Edward F., Brooklyn, N. Y. Collapsible and adjustable crate for furniture. 1,633,354; June 21.
Rawlings, J. L., et al. (See Epperson, Charles B., assignor.)
Ray, Arthur J., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Substation telephone circuits. 1,633,286; June 21.
Ray, Samiel T. (See Braswell, F. E., and Ray.)
Ray, William H., Monroe, Mich. Internal-combustion-engine radiator. 1,632,803; June 21.
Raymond, Lambert L., assignor to Broderick-Son-Raymond Co., Minneapolis, Minn. Lamp socket with leads on side. 1,632,849; June 21.
Raymond, Lambert L., assignor to Broderick-Son-Raymond Co., Minneapolis, Minn. Christmas-tree reflector and lamp. 1,632,850; June 21.
Reagan, George D., Oklahoma City, Okla. Hollow building unit. 1,633,191; June 21.
Reagan, George D., Oklahoma City, Okla. Reenforced hollow fracturable building unit. 1,633,192; June 21.
Reagan, George D., Oklahoma City, Okla. Hollow building unit. 1,633,193; June 21.
Reaves, William P., Greensboro, N. C. Operating headlight. 1,632,851; June 21.
Reck, Peter W., assignor to The Bettendorf Company, Bettendorf, Iowa. Pump loading and unloading mechanism. 1,633,035; June 21.
Rector, Thomas M. (See Hupfel, A. G., jr., and Rector.)
Red Jacket Manufacturing Co. (See Stebbins, Timothy J., assignor.)
Red Star Appliances, Inc. (See Eskholme, John W., assignor.)
Reed, Charles M., Kabletown, W. Va. Artificial-minnow fishhook. 1,633,419; June 21.
Reiter, Daniel L., New York, N. Y. Fastening device. Re16,660; June 21.
Rembrandt Lamp Corporation. (See Rothbart, Max, assignor.)
Remington Arms Company. (See Dickerman, John A., assignor.)
Renault, Louis. (See Salves, Léon, assignor.)
Reuther, Howard J. (See Reuther, John and H. J.)
Reuther, John and H. J., East Aurora, N. Y. Dispensing apparatus. 1,633,287; June 21.
Reynolds, De Elbert A., Yonkers, N. Y. Telephone receiver. 1,633,194; June 21.
Reynolds Spring Company. (See Van Hove, Desire H., assignor.)
Reyrolle, A., & Company Limited. (See Minton, Richard C., assignor.)

Rheinische Metallwaaren- und Maschinenfabrik. (See Kottmann, August, assignor.)
Rhonde, Max, et al. (See Watter, Michael, assignor.)
Rich Tool Company. (See Jardine, Robert, assignor.)
Richard, Robert E. (See Gribble, Elmer T., assignor.)
Richards, Ralph W., Atchison, Kans. Awning for windows. 1,633,275; June 21.
Richardson, Carrie E., Simpsonville, S. C. Toy. 1,633,496; June 21.
Richman, John W., Gilroy, Calif. Power driven brush. 1,633,128; June 21.
Richmond, Louis E., Cleveland, assignor, by mesne assignments, to The Autocall Company, Shelby, Ohio. Electric bell. 1,633,288; June 21.
Richter, George A., assignor to Brown Company, Berlin, N. H. Process of and apparatus for treating fiber. 1,632,802; June 21.
Richter, John W., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Feeding device. 1,632,852; June 21.
Riehm, Wilhelm, assignor to the Firm: Maschinenfabrik Augsburg-Nuernberg Aktiengesellschaft, Augsburg, Germany. Double-acting two-stroke internal-combustion engine. 1,632,984; June 21.
Riek, Rudolph A., Rhinelander, Wis. Refrigerator. 1,633,225; June 21.
Roberts, Fredrick. (See Peraira, J. A., and Roberts.)
Robertson, H. H., Company. (See Beach, Edward F., assignor.)
Robinson, Ira L. (See Murphy, Ralph L., assignor.)
Robinson, James K., jr., Altoona, Pa. Multicell battery box mold. 1,633,036; June 21.
Robinson, Joseph, New York, N. Y. Automatic train pipe connecter. 1,633,226; June 21.
Robinson, Joseph, New York, N. Y. Connecter head. 1,633,227; June 21.
Robinson, William W., Kansas City, Mo. Condenser. 1,633,289; June 21.
Rochester Germicide Company Inc. (See Crowell, Clarence P., assignor.)
Rock, George L., Cicero, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Insulating cores. 1,632,853; June 21.
Rodenmeyer, Elmer C., et al. (See Clay, Frank, assignor.)
Rogers, Almerin E., Placentia, Calif. Nursing nipple. 1,632,854; June 21.
Rogers, Charles P., and Company (Inc.). (See Albertine, Herman, assignor.)
Rogers, Elwood C., Indianapolis, Ind. Photographic enlarger. 1,633,228; June 21.
Rohm & Haas Company. (See Lauter, Felix, assignor.)
Rolfs, Edward A. (See Raimer, Philip and J. B., and Rolfs.)
Rood, Hazel B., Ames, Iowa. Thumb-sucking preventive for babies. 1,633,037; June 21.
Rosenfeld, Hyman L., Bronx, N. Y. Self-adjusted cap. 1,633,457; June 21.
Rosenthal, Sam, assignor to The Pony Fruit Corporation, New York, N. Y. Paper box and making the same. 1,633,229; June 21.
Ross, Charles E., assignor to The Collette Manufacturing Company, Amsterdam, N. Y. Nut-tapping machine. 1,632,855; June 21.
Rothbart, Max, assignor to Rembrandt Lamp Corporation, Chicago, Ill. Lamp bracket. Des. 72,914; June 21.
Royal Typewriter Company. (See Degener, Gustave O., assignor.)
Rubwood, Inc. (See Atwood, Harry N., assignor.)
Rudd, Albert V., East St. Louis, Ill. Railway-tie mechanism. 1,633,130; June 21.
Runnels, Paul P. (See Williamson, F., and Runnels.)
Running, Albert O., Dallas, Wis. Map holder. 1,632,856; June 21.
Russ, George F., Jersey City, N. J., assignor to Russ Inserting Machine Co., Inc., Dover, Del. Envelope-filling machine. 1,633,350; June 21.
Russ Inserting Machine Co. (See Russ, George F., assignor.)
Russell, Robert A., Ridgewood, assignor to Paragon Can & Cap Company, Inc., Paterson, N. J. Receptacle closure. 1,633,276; June 21.
Rutledge, John J., assignor of one-half to J. H. Harrison, Joliet, Ill. Engine-stopping device. 1,633,386; June 21.
Ryan, Edward A., and F. L. Marksman, Milwaukee, Wis. Tire chain. 1,633,277; June 21.
Sacerdote, Secondo, Milan, Italy. Cooking stove with thermoelectric storage. 1,633,290; June 21.
Safety Pressure Mining & Equipment Company. (See Crawford, J. H., Helmholtz, and Ferrell, assignors.)
Sagar, Charles, Seattle, Wash. Towing and hauling device. 1,632,922; June 21.
St. Clair, John C., Butte, Mont. Combined coal stoker and burner. 1,633,465; June 21.
St. James, Robert T., Chicago, Ill. Transformer. 1,633,047; June 21.
Salves, Léon, assignor to L. Renault, Billancourt, France. Valve tappet. 1,633,038; June 21.
Sander, William E. C., Hollis, N. Y. Typographic numbering apparatus. 1,633,278; June 21.
Sanford, Alfred F., Knoxville, Tenn. Mechanism for converting motion. 1,632,923; June 21.
Sausen, Bert R., and E. E. Olsen, assignors to Peerless Pneumatic Systems Inc., Chicago, Ill. Spray gun. 1,633,291; June 21.
Scala, Angelo, Brooklyn, N. Y. Vehicle. 1,633,279; June 21.
Schell, Joseph E., Cleveland Heights, Ohio. Heating element for motor radiators. 1,632,857; June 21.
Schenck, Le Roy C., assignor to Troy Laundry Machinery Co., Ltd., East Moline, Ill. Safety switch for centrifugal machines. 1,633,039; June 21.
Schlayer, Fred. (See Schlayer, Walter, assignor.)
Schlayer, Walter, Jamaica, New York, N. Y., assignor to F. Schlayer, Woodhaven, Long Island, N. Y. Cap for containers. 1,633,420; June 21.
Schlereth, Andrew J., administrator. (See Hanford, Orin A.)
Schlueter, Henry C., Cleveland, Ohio, assignor to W. Elsey, Detroit, Mich. Rotary brush. 1,633,230; June 21.
Schmidt, Henry, Detroit, Mich. Door closer. 1,632,924; June 21.
Schmidt'sche Heissdampf-Gesellschaft m. b. H. (See Franke, Hermann, assignor.)
Schmidt'sche Heissdampf-Gesellschaft m. b. H. (See Schmidt, Wilhelm, assignor.)
Schmidt, Wilhelm, assignor to Schmidt'sche Heissdampf-Gesellschaft m. b. H., Cassel-Wilhelmshohe, Germany. Power plant for warships. 1,632,925; June 21.
Schnepp, Louis W. (See Davis, L. F., and Schnepp.)
Schock, Clarence, Mount Joy, Pa. Gasoline-dispensing system. 1,633,458; June 21.
Schock, Clarence, Mount Joy, Pa. System for dispensing gasoline from underground storage tanks. 1,633,459; June 21.
Schoelerman, Ferdinand H., Keystone, Iowa. Luggage carrier. 1,633,497; June 21.
Schoen, Karl, Wuerzburg, Germany. Knockdown cofferdam. 1,633,131; June 21.
Schoenhoefer, Robert, Brunswick, Germany. Preparing a material for the manufacture of artificial stone and other stone or rock products. 1,633,132; June 21.
Schott, Henry, Longmeadow, Mass. Refrigerator. 1,633,231; June 21.
Schrader's, A., Son, Inc. (See Wahl, J., and Meizer, assignors.)
Schuffenhauer, Arthur E., Chicago, Ill. Radiotube-holding device. 1,633,041; June 21.
Schultze, Willi. (See Kubierschky, K., and Schultze.)
Schurch, Adolph E., Los Angeles, Calif. Football-game apparatus. 1,633,040; June 21.
Schwab, Maurice M. and S. S., Toledo, Ohio. Scrubber for dry-cleaning systems. 1,633,195; June 21.
Schwab, Samuel S. (See Schwab, Maurice M. and S. S.)
Scott, Charles H., Company, The. (See Haberkamp, Jessie M., assignor.)
Scott, Donald, Glasgow, Scotland. Supplying liquid fuel to internal-combustion engines. 1,632,926; June 21.
Scovill Manufacturing Company. (See Villaret, Gustave E., assignor.)
Scranton Button Company, The. (See Wells, Cyrus B., assignor.)
Seelbach, Kurt L., assignor to J. C. Miles, Cleveland, Ohio. Temperature-controlling appliance. 1,633,498; June 21.
Selden, James M., Pittsburgh, Pa. Poultry-trussing device. 1,633,499; June 21.
Serchi, Enrico, Siena, Italy, assignor to Isidore Braggiotti, Brookline, Mass. Puncture-sealing composition for pneumatic tires. 1,633,500; June 21.
Seymour, Benjamin F., Washington, D. C. Combined resilient transmission and bearing. 1,633,133; June 21.
Shackelford, Edward H., jr., assignor to Hebbard Manufacturing Company, Joplin, Mo. Screen-vibrating mechanism. 1,632,927; June 21.
Shaff, Ernest H., assignor to William H. Keller, Inc., Grand Haven, Mich. Impact tool. 1,633,501; June 21.
Shaw, Belle H. (See Shaw, James, assignor.)
Shaw, James, San Francisco, assignor to B. H. Shaw, Lodi, Calif. Manufacture of paper-pulp bottles and the like. 1,632,928; June 21.
Sheldon, Waldo, Greenwich, Conn. Well drilling. 1,633,134; June 21.
Sheley, George T., Indianapolis, Ind. Pencil clip and eraser holder combined. 1,633,135; June 21.
Shields, Henry B., Freeport, assignor to International Motor Company, New York, N. Y. Brake. 1,633,136; June 21.
Shipley, Bernis M., assignor, by mesne assignments, to The National Cash Register Company, Dayton, Ohio. Cash register. 1,633,042; June 21.
Shipley, Stanley D., Stamford, Conn., assignor to Atlas Powder Company, Wilmington, Del. Reducing the viscosity of nitrocellulose and other cellulose esters. 1,633,292; June 21.
Shippey, Roland H., and H. D. Van Leunen, Wichita, Kans. Headlight. 1,633,387; June 21.
Shoe Form Co., The. (See De Witt, William J., assignor.)
Shoup, James T., assignor to M. R. Shoup, Chicago, Ill. Vehicle. 1,632,804; June 21.
Shoup, Mettie R. (See Shoup, James T., assignor.)
Shultz, Charles A., Monticello, assignor to Lockwood & Lockwood, Indianapolis, Ind. Cereal cleaner and separator. 1,632,929; June 21.
Siarkowski, John, Buffalo, N. Y. Machine for cutting buttonholes. 1,633,196; June 21.
Siedentopf, Henry, assignor to Firm of Carl Zeiss, Jena, Germany. Additional device for binocular microscopes with one objective. 1,632,930; June 21.
Sievers, August D., Somers, Wis. Cultivator blade. 1,633,232; June 21.

Silberman, David, New York, N. Y. Stitchless eye tape. 1,632,803; June 21.
Silver, Walter H., assignor to Deere & Company, Moline, Ill. Lister and planter. 1,633,388; June 21.
Silvestrin, Giovanni, Port Arthur, Ontario, Canada, assignor of one-half to G. Nobile. Wind-power-generating device. 1,633,460; June 21.
Sinclair Refining Company. (See Herthel, Eugene C., assignor.)
Skelton, Earl W. (See Knotwell, Glenn R., assignor.)
Slater, Fred M. (See Bayles, L. C., and Slater.)
Slauson, Harold W., New York, N. Y. Electrical signaling means. 1,633,043; June 21.
Smid, Joseph E., Fowler, Kans. Tractor guide. 1,632,858; June 21.
Smiley, Orvall, Indianapolis, Ind. Medicine cartridge and applicator therefor. 1,633,293; June 21.
Smith, Calvin, Somerville, N. J. Lock for gas-stove valves and other valves. 1,633,233; June 21.
Smith, Henry C., St. Marys, Ohio. Device for supplying soapy water. 1,632,806; June 21.
Smith, Percy C., assignor to J. F. Meyer, Chicago, Ill. Coin chute. 1,633,234; June 21.
Snapp, John P., Limestone, Tenn. Pole clamp. 1,633,129; June 21.
Snyder, Almond H., Lancaster, assignor, by mesne assignments, to Gould Storage Battery Company, Inc., New York, N. Y. Apparatus for ventilating rectifiers, batteries, and the like. 1,633,137; June 21.
Snyder, William J., Newark, N. J. Closure for receptacles. 1,633,197; June 21.
Société Anonyme des Manufactures des Glaces & Produits Chimiques de Saint Gobain, Chauny & Cirey. (See Long, Bernard, assignor.)
Societe d'Hygiene Pratique. (See Habault, Sylvain R., assignor.)
Somersalo, George A., New York, N. Y. Preventing retroactive effects in audion amplifier circuits. 1,633,421; June 21.
Sonnenthal, Irving, New York, N. Y. Dust guard for watches. 1,633,351; June 21.
Sopher, Ted L., assignor of one-half to W. Johnson and A. Johnson, Abilene, Kans. Display case. 1,633,461; June 21.
Sortwell, Harold H., assignor to The Star Porcelain Company, Trenton, N. J. Ceramic insulating material. 1,633,462; June 21.
Soubier, Leonard D., assignor to The Owens Bottle Company, Toledo, Ohio. Apparatus for feeding molten glass. 1,633,044; June 21.
Sparkes, Robert W. B., Bolton, England. Opening, mixing, and blending cotton and other fibrous materials. 1,632,931; June 21.
Sparks, Robert E. L., Pemberton, W. Va. Grass cutter. 1,633,138; June 21.
Sperry, Elmer A., jr., assignor to The Sperry Gyroscope Company, Brooklyn, N. Y. Telemotor system. 1,633,463; June 21.
Sperry Gyroscope Company, The. (See Mills, Chester B., assignor.)
Sperry Gyroscope Company, The. (See Sperry, Elmer A., jr., assignor.)
Spreyer, George S., Fallon, Nev. Tailboard scraper. 1,633,464; June 21.
Staats-Oels, Rudolph C. G., Brooklyn, N. Y. Safety razor. 1,633,139; June 21.
Staley, Allen C., La Fayette, Ind. Control system for liquid fuel burners. 1,633,502; June 21.
Standard Compositor Aktiengesellschaft. (See Stern, Otto, assignor.)
Standard Steel Car Company. (See Christianson, Andrew, assignor.)
Star Porcelain Company, The. (See Sortwell, Harold H., assignor.)
Starr, Howard D., Long Beach, Calif. Maintaining a reserve supply of fuel in fuel tanks. 1,633,046; June 21.
Stebbins, Albert H., Los Angeles, Calif. Operating means. 1,633,198.
Stebbins, Albert H., Los Angeles, Calif. Concentrator table. 1,633,199; June 21.
Stebbins, Timothy J., assignor to Red Jacket Manufacturing Co., Davenport, Iowa. Pump jack. 1,633,045; June 21.
Steelsmith, F. R., trustee. (See Stocking, Bert A., assignor.)
Steinberger, Irwin E., New York, N. Y. Glove. Des. 72,915; June 21.
Stephens, F. W., et al. (See Daniels, Cecil C., assignor.)
Stern, Otto, assignor to the Firm: Standard Compositor Aktiengesellschaft, Berlin, Germany. Matrix-setting and line-casting machine. 1,633,422; June 21.
Stillesen, Job M. A., Niagara Falls, N. Y. Treatment of lime nitrogen. 1,633,200; June 21.
Stobie, John W. (See Poirier, Ernest, assignor.)
Stocking, Bert A., Audubon, assignor to F. R. Steelsmith, trustee, Des Moines, Iowa. Washing machine. 1,633,140; June 21.
Stokes, Oscar E. (See Williamson, Fred H., assignor.)
Stokes, Oscar E. (See Williamson, F., and Runnels, assignors.)
Straehly, Boyden E., Chicago, Ill. Toothbrush. 1,632,859; June 21.
Straub, Frank, Los Angeles, Calif. Thermostat. 1,632,932; June 21.
Strauss, Joseph B., assignor of one-half to C. Weinfeld, Chicago, Ill. Concrete vehicle body. 1,633,141; June 21.
Stubenberg, Arthur F., Maunawai, Hawaii. Spraying machine. 1,633,294; June 21.
Stumpf, Walter, Baltimore, assignor to The Black & Decker Manufacturing Company, Towson, Md. Electric tool. 1,633,389; June 21.
Sutherland, Holton M. (See Sutherland, J. H., H. J., and H. M.)
Sutherland, John H., H. J., and H. M., Swampscott, Mass. Template holder for pattern-grading machines. 1,633,295; June 21.
Sweet, Donald H., Evanston, Ill. Lubricating system. 1,632,807; June 21.
Sweet, Lyman R., Boston, Mass. Heating drum. 1,633,201; June 21.
Symington, T. H., and Son, Inc. (See Symington, T. H., and Drenning, assignors.)
Symington, Thomas H., and P. R. Drenning, assignors, by mesne assignments, to T. H. Symington and Son, Inc., Baltimore, Md. Truck bolster with absorption mechanism. 1,633,503; June 21.
Sztogryn, John, Jersey City, N. J. Bag holder. 1,632,808; June 21.
Tagliabue, Charles J., Mfg. Co. (See Irwin, Lawrence C., assignor.)
Talbot, Evariste E., Fall River, Mass. Take-up motion for looms. 1,633,142; June 21.
Talbott, Harry G., Baltimore, Md. Wall furniture. 1,633,423; June 21.
Tate, Kenneth L., assignor to Taylor Instrument Companies, Rochester, N. Y. Gas-analysis apparatus. 1,633,352; June 21.
Taylor Instrument Companies. (See Tate, Kenneth L., assignor.)
Terkelsen, Andrew. (See Derry, Jasper, assignor.)
Terry, George A., Buffalo, N. Y. Dental handpiece wrist-joint guard. 1,632,860; June 21.
Themak, Edward, New York, N. Y. Liquid applicator. 1,633,424; June 21.
Thietten, Frank, assignor of one-third to C. I. Davis and one-third to W. S. Thietten, Twin Falls, Idaho. Attachment for seed planters. 1,632,861; June 21.
Thietten, William S., et al. (See Thietten, Frank, assignor.)
Thrixton, William D., Belmar, N. J. Portable collapsible crate. 1,633,425; June 21.
Thoen, Lowell H., Stockton, assignor, by mesne assignments, to Western Harvester Co., San Francisco, Calif. Feeder mechanism and housing for combined harvesters. 1,633,235; June 21.
Thomas, R., & Sons Co., The. (See Eckert, Grandon E., assignor.)
Thomson, Ronald F., Chicago, Ill. Bottle-filling device. 1,633,048; June 21.
Thompson, Howard A., Edgewood Borough, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,633,049; June 21.
Thorley, Raymond M., Cleveland, Ohio. Wick for oil stoves. 1,633,353; June 21.
Thornton, Elizabeth, Detroit, Mich. Mixing device for internal-combustion engines. 1,633,050; June 21.
Thornton, Roy A., North Weymouth, Mass. Combined pump and can opener. 1,632,933; June 21.
Tooker, John N., and J. F. Harley, assignors to Arkell & Smiths, Canajoharie, N. Y. Multi-ply bag. 1,633,296; June 21.
Torchweld Equipment Co. (See Morrison, George A., assignor.)
Tower Manufacturing Corporation. (See Fischer, Hermann, assignor.)
Townsend, John R., South Bend, Ind., assignor to Westinghouse Electric & Manufacturing Company. Beacon-light casing. Des. 72,916; June 21.
Trautner, Nicholas W., St. Paul, Minn. Grease cup. 1,632,934; June 21.
Traver, George W., Chicago, Ill. Ice-cream-cone server. Des. 72,917; June 21.
Traxl, Walther, Vienna, Austria. Preparing stable colloidal solutions of silver. 1,633,466; June 21.
Trbojevich, Nikola, Detroit, Mich. Generating gears. 1,633,051; June 21.
Troiel, Arthur E., Berkeley, Calif. Baking oven. 1,633,236; June 21.
Troy Laundry Machinery Co. (See Schenck, Le Roy C., assignor.)
Tucker, J. H., et al. (See Epperson, Charles B., assignor.)
Turner, Charles E., and G. R. Milton, Covington, Okla. Oil-well utility gin pole. 1,632,935; June 21.
Turner, Frank A., New York, N. Y. Resilient wheel. 1,632,809; June 21.
Udale, Stanley M., Detroit, Mich. Supercharger for internal-combustion engines. 1,633,148; June 21.
Uhl, Robert L., Chino, Calif. Safety gas device or cock. 1,633,504; June 21.
Union Switch & Signal Company, The. (See Thompson, Howard A., assignor.)
Union Switch & Signal Company, The. (See Wyant, Leroy, assignor.)
United States Finishing Company, The. (See Witte, William, assignor.)
Uttz, William A., sr., Fort Worth, Tex., assignor, by mesne assignments, to Perfection Package Sealer Company. Gummed-tape-serving machine. 1,633,144; June 21.
Van Ausdal, James H., and J. T. Blackburn, Vinita, Okla. Governor. 1,633,505; June 21.

Van Derbeck, Stephen G., Hackensack, N. J., and J. Bortolin, assignors of one-third to W. R. Blackwell, deceased, Brooklyn, N. Y.; F. Lampe, executor. Aerial illuminating device. 1,633,540; June 21.
Van Hove, Desire H., assignor to Reynolds Spring Company, Jackson, Mich. Spring structure. 1,632,936; June 21.
Van Leunen, Harry D. (See Shippey, R. H., and Van Leunen.)
Venon, Jules H., New York, N. Y. Goblet or similar article. Des. 72,918; June 21.
Vibber, Wheeler H., New London, Conn. Conduit-bushing wrench. 1,633,297; June 21.
Villaret, Gustave E., Leonia, N. J., assignor to Scovill Manufacturing Company, Waterbury, Conn. Bracket back for lighting fixtures. Des. 72,919; June 21.
Vincent, Jesse G., assignor to Packard Motor Car Company, Detroit, Mich. Airplane. 1,632,862; June 21.
Vodoz, Frederick W., Wilmette, assignor to Goodman Manufacturing Company, Chicago, Ill. Mining machine. 1,632,810; June 21.
Vortex Mfg. Co., The. (See Barbieri, Cesare, assignor.)
Wagner, Georges E., St.-Etienne, France. Balanced rotary percussion implement. 1,632,937; June 21.
Wahl, John, Rosedale, and O. Melzer, Hollis, assignors to A. Schrader's Son, Inc., Brooklyn, N. Y. Gauge. 1,633,145; June 21.
Wallace, R., & Sons Mfg. Co. (See Warren, William S., assignor.)
Walworth, Edwin, Lincoln, Nebr. Road grader. 1,633,426; June 21.
Wannamaker, Seth, Ramsey, N. J. Insulating and indicating covering for containers. 1,633,298; June 21.
Wappat Gear Works. (See Hunter, Samuel, assignor.)
Warner, Arthur, Haverford, assignor to R. H. Beaumont Company, Philadelphia, Pa. Skip-hoist and tram-car equipment. 1,633,299; June 21.
Warren, William S., Meriden, Conn., assignor to R. Wallace & Sons Mfg. Co., Wallingford, Conn. Spoon or similar article. Des. 72,920; June 21.
Watter, Michael, New York, N. Y., assignor of one-fourth to M. Baskin and one-fourth to M. Rhoade, Washington, D. C. Apparatus for flying. 1,632,811; June 21.
Watts, John S., Los Angeles, Calif. Reducing gear and transmission control. 1,633,052; June 21.
Webb, Robert R. (See Jones, J. M., and Webb.)
Weber, Albert, Providence, R. I. Fastening member for vanity cases. 1,632,863; June 21.
Weber, Albert, Providence, R. I. Vanity case. 1,632,864; June 21.
Weinfeld, Charles. (See Strauss, Joseph B., assignor.)
Welke, Ferdinand G. (See McDonald, F. A., and Welke.)
Wells, Cyrus B., Auburn, N. Y., assignor to The Scranton Button Company, Scranton, Pa. Machine for trimming the edges of molded disks. 1,633,552; June 21.
Western Electric Company. (See Blount, Harry, assignor.)
Western Electric Company. (See Bouvier, George A., assignor.)
Western Electric Company. (See Carter, Herbert F., assignor.)
Western Electric Company. (See Cox, Louis T., assignor.)
Western Electric Company. (See Jammer, Jacob S., assignor.)
Western Electric Company. (See Jespersen, Helgo W., assignor.)
Western Electric Company. (See Johnson, Lewis H., assignor.)
Western Electric Company. (See Hagelthorn, Thomas, assignor.)
Western Electric Company. (See Hartley, Ralph V. L., assignor.)
Western Electric Company. (See Heising, Raymond A., assignor.)
Western Electric Company. (See Lundell, Alben E., assignor.)
Western Electric Company. (See Mason, Sumner R., assignor.)
Western Electric Company. (See Richter, John W., assignor.)
Western Electric Company. (See Rock, George L., assignor.)
Western Harvester Co. (See Thoen, Lowell H., assignor.)
Westinghouse Gear and Dynamometer Company. (See Baumann, Karl, assignor.)
Westinghouse Electric and Manufacturing Company. (See Herr, Herbert T., assignor.)
Westinghouse Electric & Manufacturing Company. (See Kautz, Charles W., jr., assignor.)
Westinghouse Electric & Manufacturing Company. (See Procter, Joseph H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Townsend, John R., assignor.)
Wetzstein, George A., Mandan, N. Dak. Mitten. 1,633,300; June 21.
Whelan, Augustin J., Jersey City, N. J. Clothesline pulley. 1,633,506; June 21.
White Mop Wringer Company. (See Eiffe, James M., assignor.)
White, Robert L., Lisbon, Tex. Antisubstitute liquid-dispensing pump. 1,633,355; June 21.
Whitehead, William A., Terre Haute, Ind. Window awning. 1,633,467; June 21.
Whiteside, Arthur L., Bayshore, N. Y. Waddle walking toy. 1,633,146; June 21.
Whiteside, Arthur L., Bayshore, N. Y. Walking toy. 1,633,147; June 21.
Whitlow, James G., Cornelius, N. C. Valve-pin extractor. 1,633,237; June 21.
Whitsett, Cameron A., Chicago, Ill. Spotlight. 1,633,148; June 21.
Wicks, John, Oak Park, assignor, by mesne assignments, to Automatic Electric Co., Inc., Chicago, Ill. Automatic telephone system. 1,633,149; June 21.
Wieben, Henry, Reinbeck, Iowa. Watering trough. 1,633,150; June 21.
Wiese, Paul, Waterbury, Conn. Armrest. 1,633,427; June 21.
Wilcox, Paul W., Troy, Kans. Water-supply attachment for concrete mixers. 1,632,938; June 21.
Wilhelm, Frank J., Cincinnati, Ohio. Radiator-cap ornament for automobiles. 72,921; June 21.
Williams, Leland W., San Antonio, Tex. Door holder. 1,633,202; June 21.
Williams, Percy Q., Cincinnati, Ohio. Conveying mechanism. 1,633,053; June 21.
Williams, Roy E., Ringtown, Pa. Automobile license-card holder. 1,632,812; June 21.
Williams, S. D. (See Burns, Edward L., assignor.)
Williams, Sylvester J., assignor to C. Allert, Ritzville, Wash. Method and apparatus for treating seed grain. 1,633,301; June 21.
Williams, Walter L., South Richmond, Va. Ironing-board cabinet. 1,632,939; June 21.
Williamson, Fred, Chicago, Ill., and P. P. Runnels, Indianapolis, Ind.; said Runnels assignor to O. E. Stokes, Streator, Ill. Automobile bumper. 1,633,054; June 21.
Williamson, Fred H., Chicago, assignor to O. E. Stokes, Streator, Ill. Automobile bumper. 1,633,055; June 21.
Wilson, Stanton D., St. Louis, Mo. Light shade or similar article. Des. 72,922; June 21.
Winfrey, George B., et al. (See Carter, S. W. and O. E., assignors.)
Winsor, Roy J., Bucyrus, Ohio. Leaning wheel. 1,633,151; June 21.
Wireless Specialty Apparatus Company. (See Proctor, John A., assignor.)
Wishart, Harold W., Hollywood, Calif., and W. Wishart, Clinton, Iowa, assignors to Climax Engineering Co. Rotary-compressor refrigerating machine. 1,633,056; June 21.
Wishart, William. (See Wishart, Harold W. and W.)
Witte, William, Providence, R. I., assignor to The United States Finishing Company, New York, N. Y. Finishing fabrics and to the fabric and composition. 1,633,152; June 21.
Wittemeier, Hans, Berlin, Germany. Filter for purifying the air. 1,632,813; June 21.
Wold, Carl O., Minneapolis, Minn. Cutting section for road-scraper blades. 1,633,057; June 21.
Wolf Company, The. (See Fruitema, Henry A., assignor.)
Wolfe, John A., et al. (See Haubert, Leo, assignor.)
Worth, Jean C., Paris, France, assignor to David Crystal, Inc., New York, N. Y. Dress. Des. 72,923; June 21.
Worthington Pump and Machinery Corporation. (See Lucke, Charles E., assignor.)
Wray, Charles S., Atlantic Highland, N. J. Belt conveyer. 1,633,153; June 21.
Wright, Edward A., Fresno, Calif. Control pedal. 1,632,940; June 21.
Wright-Harding Company. (See Harding, Dana E., assignor.)
Wright, James F., Cleveland, assignor to The McMyler Interstate Company, Bedford, Ohio. Clutch-operating mechanism. 1,632,865; June 21.
Wurlitzer Grand Piano Company. (See Farny, Cyril, assignor.)
Wyant, Leroy, Chicago, Ill., assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway signaling. 1,633,302; June 21.
Yamakishi, Tomoji, Bellevue, Wash. Nail magazine. 1,633,154; June 21.
Yeager, John E., Poyntelle, Ky. Gearing for rear axles of autos. 1,633,203; June 21.
Yendruch, John, Waterloo, Ontario, Canada. Burglar alarm. 1,633,468; June 21.
Young, Charles, et al. (See Baron, John, assignor.)
Zabel, Charles, Coraopolis, Pa., assignor, by mesne assignments, to T. Zabel, Feura Bush, N. Y. Toy pile driver. 1,633,155; June 21.
Zabel, Tosca. (See Zabel, Charles, assignor.)
Zeiss, Firm of Carl. (See Siedentopf, Henry, assignor.)
Zerk, Oscar U., Cleveland, Ohio, assignor, by mesne assignments, to The Bassick Manufacturing Company. Lubricating apparatus. 1,632,985; June 21.
Zerk, Oscar U., Cleveland, Ohio, assignor, by mesne assignments, to The Bassick Manufacturing Company. Lubricating apparatus. 1,632,986; June 21.
Zerk, Oscar U., Cleveland, Ohio, assignor, by mesne assignments, to The Bassick Manufacturing Company. Lubricating apparatus. 1,632,987; June 21.
Zgliczynski, Stefan, Baltimore, Md. Automatic wind motor. 1,633,428; June 21.
Zinn, Manvel K., Brooklyn, N. Y., assignor to American Telephone and Telegraph Company. Filter for periodic electric currents. 1,632,814; June 21.
Zublin, John A., Los Angeles, Calif. Pump plunger. 1,633,058; June 21.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 21ST DAY OF JUNE, 1927.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Acoustic energy into electrical energy, Arrangement for converting. A. Melsaner. 1,633,186; June 21.
Advertising device. J. C. Johanknegt. 1,632,973; June 21.
Advertising device, Automaton. S. W. and O. E. Carter. 1,633,313; June 21.
Aerial illuminating device. S. G. Van Derbeck and J. Bartolin. 1,633,540; June 21.
Aeroplanes, Auxiliary lifting arrangement for. J. W. Dundas. 1,633,006; June 21.
Air, Filter for purifying the. H. Wittemeier. 1,632,813; June 21.
Air from steam-condensing systems, Apparatus for removing. A. E. Broughton. 1,633,472; June 21.
Airplane. J. G. Vincent. 1,632,862; June 21.
Alarm: *See*—
  Audible alarm. Door alarm.
  Burglar alarm.
Alkali-metal cyanide solutions containing sulphides, Purifying. K. Herrdegen. 1,633,485; June 21.
Amusement device. J. N. Bartlett. 1,633,204; June 21.
Amusement device. C. L. A. Diamond. 1,633,397; June 21.
Anchoring means between cushioning springs and a surrounding frame. D. Hanauer. 1,633,544; June 21.
Antproof shelf bracket. H. E. De Pew. 1,633,438; June 21.
Applicator, Liquid. E. Themak. 1,633,424; June 21.
Apron. A. M. H. Bliss. 1,632,873; June 21.
Arch support. C. G. Bergmann. 1,633,513; June 21.
Area ways, Closure for. C. K. Ernst. 1,632,827; June 21.
Armrest. P. Wiese. 1,633,427; June 21.
Ash tray. E. J. McGuirk. Des. 72,906; June 21.
Atomizer. R. T. Brewster. Des. 72,887–8; June 21.
Audible alarm. C. Denser. 1,633,374; June 21.
Audion amplifier circuits, Preventing retroactive effects in. G. A. Somersalo. 1,633,421; June 21.
Autographic register. P. A. Jackson. 1,633,103; June 21.
Automatic switch. W. Edwards. 1,633,521; June 21.
Automobile heater. L. C. Karcher and L. Asman. 1,632,974; June 21.
Automobile trucks or tractors, Power-delivering attachment for. L. Haubert. 1,633,208; June 21.
Automobiles, Cooling system for. H. S. Burgess 1,632,994; June 21.
Awning for windows. R. W. Richards. 1,633,275; June 21.
Awning, Window. W. A. Whitehead. 1,633,467; June 21.
Ax sheath. E. O. Estwing. 1,633,319; June 21.
Bag: *See*—
  Multiply bag.
Bag holder. J. Sztogryn. 1,632,808; June 21.
Ball: *See*—
  Whistling ball.
Bar: *See*—
  Spiral bar.
Bathtub seat. W. H. Bozarth. 1,633,310; June 21.
Batteries, Antisplash device for storage. A. Halikman. 1,633,407; June 21.
Battery: *See*—
  Storage battery.
Battery-box mold, Multicell. J. K. Robinson, jr. 1,633,036; June 21.
Battery-terminal connecter. E. F. Goeller. 1,633,176; June 21.
Barytes, Refining. W. J. O'Brien. 1,633,347; June 21.
Beacon-light casing. J. R. Townsend. Des. 72,916; June 21.
Bearing, Pump. I. A. Oliver. 1,633,188; June 21.
Bell, Electric. L. E. Richmond. 1,633,288; June 21.
Belt conveyer. C. S. Wray. 1,633,153; June 21.
Belts, Propulsion link for endless traction. A. L. Langenfeld. 1,633,259; June 21.
Bender, Bus-bar. F. W. Gelasenhainer and M. S. Cumner. 1,633,248; June 21.
Benzidine and derivatives, Production of. R. A. Nelson. 1,633,123; June 21.
Billboard, Advertising. H. R. Gottlob. Des. 72,895; June 21.
Billiard-cue, rod, and like article rack hanger and locker. A. Demers. 1,633,004; June 21.
Binder, Temporary. F. H. Crump. 1,633,070; June 21.
Binder, Tray. J. M. Jones and R. R. Webb. 1,633,023; June 21.
Blade attachment, Cutting. J. G. Darling. 1,632,823; June 21.
Blade, Cultivator. A. D. Sievers. 1,633,232; June 21.

Block: *See*—
  Safety block. Safety sheave block.
Board: *See*—
  Ironing board.
Boiler and evaporator, Steam. W. Donald. 1,633,398; June 21.
Boilers, Closure means for manhole openings in steam. H. Franke. 1,632,957; June 21.
Bolt: *See*—
  Spring surface bolt.
Bottle. F. R. Miller. Des. 72,908; June 21.
Bottle cover. J. W. Dawson and J. L. Herold. 1,633,073; June 21.
Bottle-filling device. R. F. Thomson. 1,633,048; June 21.
Bottle holder. J. E. Fite, jr. 1,633,083; June 21.
Bottle or similar container. R. T. Brewster. Des. 72,889; June 21.
Bottles and the like, Manufacture of paper pulp. J. Shaw. 1,632,928; June 21.
Bowl or similar article. R. R. Kintz. Des. 72,900; June 21.
Bowls or similar articles, Base for metal. E. T. Beck. Des. 72,883; June 21.
Box: *See*—
  Jack box. Roller box.
  Miter box.
Boxes and other hollow metal articles, Machine for casting. J. A. Fullilove. 1,633,088; June 21.
Bracket: *See*—
  Antproof shelf bracket. Shade-roller bracket.
  Motor bracket.
Braid-making machine, Reed. M. B. Lloyd. 1,633,261; June 21.
Braiding machine, Carrier for. F. Mossberg. 1,633,346; June 21.
Brake: *See*—
  Push-sled brake. Vehicle brake.
  Stay-put parking brake.
Brake. H. B. Shields. 1,633,136; June 21.
Brake-applying mechanism, Throttle-control apparatus for. C. S. Bragg and V. W. Kliesrath. 1,633,360; June 21.
Brake mechanism. G. Haag. 1,632,961; June 21.
Brake shoe. V. Bendix and L. E. La Brie. 1,632,782; June 21.
Brassière, Nursing. J. M. Haberkamp. 1,632,894; June 21.
Breast drill. T. J. Fegley and G. O. Leopold. 1,633,400; June 21.
Brush, Power-driven. J. W. Richman. 1,633,128; June 21.
Brush, Rotary. H. C. Schlueter. 1,633,230; June 21.
Brush, Wire. G. Rasmesen, jr. 1,633,274; June 21.
Buckets and the like, Carrier for. L. Jacobs. 1,633,022; June 21.
Building construction. A. B. Kleinhans. 1,633,446; June 21.
Building unit, Hollow. G. D. Reagan. 1,633,191; June 21.
Building unit, Hollow. G. D. Reagan. 1,633,193; June 21.
Building unit, Reenforced hollow fracturable. G. D. Reagan. 1,633,192; June 21.
Bullet, Mushrooming. J. A. Dickerman. 1,633,168; June 21.
Bumper, Automobile. F. H. Williamson. 1,633,055; June 21.
Bumper, Automobile. F. Williamson and P. P. Runnels. 1,633,054; June 21.
Bunch rake. H. P. Hendrickson. 1,633,017; June 21.
Buoy. O. Guidotti. 1,633,484; June 21.
Burglar alarm. J. Yendruch. 1,633,468; June 21.
Burglar alarm, Cord-actuated. N. Bryant. 1,633,361; June 21.
Burner: *See*—
  Hydrocarbon burner. Liquid-fuel burner.
Burners, Control system for liquid-fuel. A. C. Staley. 1,633,502; June 21.
Buttonholes, Machine for cutting. J. Siarkowski. 1,633,196; June 21.
Cabinet, Ironing-board. W. L. Williams. 1,632,939; June 21.
Cable multiplying system, Bank and trunk. H. B. McElyea. 1,633,118; June 21.
Calculating and adding machines, Key mechanism for. A. Kottmann. 1,633,256; June 21.
Calenders, Attachment for. N. R. Goodwin. 1,633,249; June 21.
Came machine. W. Henderson. 1,632,798; June 21.

Camera, Photographic. N. B. Cregier. 1,633,373; June 21.
Cameras, Panoraming device for photographic. A. S. Howell. 1,633,101; June 21.
Can-capping machine. H. L. Guenther. 1,633,250; June 21.
Canals, production of. V. Brünig. 1,632,946; June 21.
Cap, Self-adjusted. H. L. Rosenfeld. 1,633,457; June 21.
Car construction, Railway. A. Christianson. 1,633,162; June 21.
Cars, Spring suspension for railway. H. W. Frost. 1,633,011; June 21.
Cars, Uncoupling link for railway. A. C. Mather. 1,633,339; June 21.
Carbon black, Producing. L. J. Dales. 1,633,071; June 21.
Carbonaceous material and making the same. A. Oberle. 1,632,845; June 21.
Carburetor. C. B. Allen. 1,633,429; June 21.
Carrier: *See*—
  Luggage carrier.
Cartons, Mechanism for lining. H. L. Evans and G. I. Hohl. 1,633,247; June 21.
Cartridge, Blasting. J. H. Crawford, A. W. Helmholtz, and D. Ferrell. 1,632,887; June 21.
Case: *See*—
  Display case. Vanity case.
Case and razor holder, Combined. J. Kaufman. 1,632,840; June 21.
Cases, Article-containing. N. Kasdan and D. Pollack. 1,633,255; June 21.
Cash register. B. M. Shipley. 1,633,042; June 21.
Cement-form holder. G. H. Olson. 1,632,918; June 21.
Centrifugal machines, Safety switch for. L. C. Schenck. 1,633,039; June 21.
Ceramic insulating material. H. H. Sortwell. 1,633,462; June 21.
Cereal cleaner and separator. C. A. Shultz. 1,632,929; June 21.
Chain link. W. J. Bryan. 1,633,434; June 21.
Channel signaling, Plural. R. A. Heising. 1,633,100; June 21.
Check device, Safety. C. E. Loose. 1,633,114; June 21.
Chemical composition. J. F. King. 1,633,213; June 21.
Christmas-tree reflector and lamp. L. L. Raymond. 1,632,850; June 21.
Chute, Coal. H. McDonald. 1,633,341; June 21.
Chute, Coin. P. C. Smith. 1,633,234; June 21.
Cigar holder, Safety. A. Bagamery. 1,633,431; June 21.
Cigarette-making machines, Delivery-control device for. W. F. Grupe. 1,633,377; June 21.
Circuit interrupter, Automatic. J. H. Procter. 1,632,983; June 21.
Circuit-restoring relay. C. W. Kautz, jr. Re16,661; June 21.
Circuits for multiplex systems, Repeater. J. S. Jammer. 1,632,900; June 21.
Clamp: *See*—
  Curtain-stretcher clamp. Rod clamp.
  Pole clamp.
Classifier. H. S. Coe. 1,633,371; June 21.
Cleaner: *See*—
  Clothesline cleaner. Suction cleaner.
  Stair cleaner. Vacuum cleaner.
Cleaner. T. Hagelthorn. 1,632,895; June 21.
Clevis. K. Breccinski. 1,632,877; June 21.
Closure-cap lock. F. A. McDonald and F. G. Welke 1,633,218; June 21.
Closure lock. J. Baron. 1,633,508; June 21.
Clothesline cleaner. H. Koester. 1,633,382; June 21.
Clutch, Automatic releasing. W. D. Inskeep and E. B. Parsons. 1,632,839; June 21.
Clutch-operating mechanism. J. F. Wright. 1,632,865; June 21.
Coal and the like, Drying. H. Fleissner. 1,632,829; June 21.
Coal stoker and burner, Combined. J. C. St. Clair. 1,633,465; June 21.
Coat hook. J. B. O'Connor. 1,633,495; June 21.
Cofferdam, Knockdown. K. Schoen. 1,633,131; June 21.

Strand-handling apparatus. G. A. Bouvier. 1,632,875; June 21.
Strand-tensioning device. G. A. Bouvier. 1,632,876; June 21.
Street barrier. G. L. Culver, 1,633,000; June 21.
Strip shingle. L. Busha. 1,633,474; June 21.
Sucker-rod and plunger rotator. E. L. Gluyas. 1,633,013; June 21.
Sucker-rod turner. E. T. Gribble. 1,633,092; June 21.
Suction cleaner. T. W. Green. 1,633,367; June 21.
Sugar gauge. C. E. Miller. 1,633,343; June 21.
Surgical device. R. H. De Mott. 1,633,074; June 21.
Switch: *See*—
Automatic switch. Electric switch.
Switch. M. Guett. 1,633,405; June 21.
Table: *See*—
Concentrator table. Tracing table.
Table. D. Crane. Des. 72,891; June 21.
Table for animals, Operating. J. W. Giest. 1,632,831; June 21.
Tailboard scraper. G. S. Spreyer. 1,633,464; June 21.
Tank: *See*—
Fuel tank.
Tape-serving machine, Gummed-. W. A. Uttz, sr. 1,633,144; June 21.
Telemotor system. E. A. Sperry, jr. 1,633,463; June 21.
Telephone circuits, Substation. A. J. Ray. 1,633,286; June 21.
Telephone receiver. D. A. Reynolds. 1,633,194; June 21.
Telephone system. C. E. Lomax. 1,633,116; June 21.
Telephone system, Automatic. J. Wicks. 1,633,149; June 21.
Telephones, Mouthpiece attachment for. C. H. Monks. 1,633,491; June 21.
Temperature-controlling appliance. K. L. Seelbach. 1,633,498; June 21.
Tennis courts, Marking tape for. R. Moore. 1,632,799; June 21.
Testing system. L. T. Cox. 1,632,886; June 21.
Testing system. L. H. Johnson. 1,632,902; June 21.
Tetranitromethane from trinitrotoluene, Removing. R. H. Gärtner. 1,632,950; June 21.
Textile fibers, Apparatus for drawing. G. C. Laurency. 1,633,029; June 21.
Textile spindle. A. Meder. 1,632,798; June 21.
Thermostat. F. Straub. 1,632,932; June 21.
Thread-cutting machine. A. S. Holmes. 1,632,897; June 21.
Thumb-sucking preventive for babies. H. B. Rood. 1,633,037; June 21.
Tie plate, Adjustable. W. H. Huff. 1,632,970; June 21.
Tire chain. E. A. Ryan and F. L. Marksman. 1,633,277; June 21.
Tire-chain fastener. J. A. Garland. 1,633,524; June 21.
Tire-charging equipment, Pneumatic-. E. M. Morley. 1,633,402; June 21.
Tire construction, Pulley-band-. T. Midgley. 1,633,342; June 21.
Tires, Puncture-sealing composition for pneumatic. E. Serchi. 1,633,500; June 21.
Toasting and buttering machine, Automatic. I. Beskin. 1,633,391; June 21.
Toggle press. J. Derry. 1,633,317; June 21.
Toilet novelty. W. F. Patten. 1,632,920; June 21.
Toilet seat, Auxiliary. E. M. Noble. 1,633,222; June 21.
Tool. J. J. B. Dreesen. 1,633,077; June 21.
Tool, Brad driving and extracting. A. L. Kern. 1,633,533; June 21.
Tool, Electric. W. Stumpf. 1,633,389; June 21.
Tool for wrapping wire. J. Fisher. 1,633,401; June 21.
Tool holder. H. Blidsoe. 1,633,239; June 21.
Tool, Impact. E. H. Shaff. 1,633,501; June 21.
Tool, Plug-inserting. H. T. Hughes. 1,633,330; June 21.
Tooth, Artificial. G. O. Burlew. 1,633,241; June 21.
Toothbrush. R. E. Straehly. 1,632,859; June 21.
Torch. G. A. Morrison. 1,633,265; June 21.
Towing and hauling device. C. Sagar. 1,632,922; June 21.
Toy. C. E. Richardson. 1,633,496; June 21.
Toy, Figure. H. W. Norberg. 1,633,456; June 21.
Toy pile driver. C. Zabel. 1,633,155; June 21.
Toy, Spinning. F. Lunz. 1,633,486; June 21.
Toy, Waddle walking. A. L. Whiteside. 1,633,146; June 21.
Toy, Walking. A. L. Whiteside. 1,633,147; June 21.
Tracing table, Projection. L. J. R. Holst. 1,633,253; June 21.
Tractor. A. C. Johnson. 1,633,212; June 21.

Tractor guide. G. R. Knotwell. 1,633,334; June 21.
Tractor guide. J. E. Smid. 1,632,858; June 21.
Tractor, Line-control. J. W. Mowbray. 1,632,911; June 21.
Tractors, Power take-off device for. P. Raimer, J. B. Raimer, and A. Rolfs. 1,633,273; June 21.
Traffic, Overcoming great differences of height with high-speed passenger. F. Kruckenberg. 1,633,214; June 21.
Train-pipe connecter, Automatic. J. Robinson. 1,633,226; June 21.
Transformer. R. T. St. James. 1,633,047; June 21.
Transmission and bearing, Combined resilient. B. F. Seymour. 1,633,133; June 21.
Transmission system. H. M. Bascom. 1,632,817; June 21.
Transmissions, Preventing chattering in. C. B. Epperson. 1,633,440; June 21.
Trap: *See*— Steam trap.
Tray or similar article. R. R. Kintz. Des. 72,899; June 21.
Tree limbs, Clamping band for. C. D. Gilman. 1,633,090; June 21.
Trench-cleaning device. F. E. Braswell and S. T. Ray. 1,633,311; June 21.
Trenching machine. T. Loken. 1,633,115; June 21.
Trough, Watering. H. Wieben. 1,633,150; June 21.
Truck bolster with absorption mechanism. T. H. Symington and P. R. Drenning. 1,633,503; June 21.
Truck, Dump. M. Johnson. 1,633,104; June 21.
Truck, Lifting. A. M. Barrett. 1,633,390; June 21.
Truck, Self-dumping. P. A. Brick. 1,633,515; June 21.
Trucks or the like, Guiding or controlling mechanism for. E. C. Bush. 1,633,473; June 21.
Trunk cushion and retainer. W. C. Chesnut. 1,632,996; June 21.
Trunking system. H. B. Johnson. 1,632,901; June 21.
Tube socket. M. Guett. 1,633,404; June 21.
Turbine and utilizing high-pressure steam therein, High-pressure steam. F. Losel. 1,632,907; June 21.
Turbine gland with more than one pipe connection, Steam-. A. M. P. Lundegaard. 1,632,981; June 21.
Twine machines, Stop and brake for. J. B. Crawford. 1,633,477; June 21.
Typewriting machines, Adding attachment for. G. O. Degener. 1,633,242; June 21.
Typographic numbering apparatus. W. E. C. Sander. 1,633,278; June 21.
Universal joint. A. F. Kaptuller. 1,633,333; June 21.
Upsetting machine. K. Auerbach. 1,633,430; June 21.
Ureides, Sedative and hypnotic. F. Boedecker. 1,633,392; June 21.
Vacuum cleaner, Dirt-ejecting. T. Drew. 1,633,561; June 21.
Vacuum seal and apparatus. O. Minton. 1,633,121; June 21.
Valve. W. Baumgartner. 1,633,061; June 21.
Valve. E. E. Littlefield. 1,633,217; June 21.
Valve. P. J. McGinn. 1,633,488; June 21.
Valve apparatus. I. W. Knight. 1,633,108–9; June 21.
Valve control, System for automatic. J. S. Kennedy. 1,632,905; June 21.
Valve, Engine. B. F. McKee. 1,633,450; June 21.
Valve for rock drills, Disk. L. C. Bayles and F. M. Slater. 1,633,471; June 21.
Valve-lifting device. W. E. Greene and A. E. Morong. 1,632,834; June 21.
Valve-pin extractor. J. G. Whitlow. 1,633,237; June 21.
Valve-pin replacer. J. F. Koons. 1,633,110; June 21.
Valve, Revolving-disk. F. Cavenagh. 1,633,161; June 21.
Valve tappet. L. Salves. 1,633,038; June 21.
Valve, Thermionic. A. C. Bartlett and R. Le Rossignol. 1,632,870; June 21.
Valve, Thermostatic. M. G. Hubbard. 1,633,410; June 21.
Valve, Unloading. J. Le Valley. 1,632,841; June 21.
Valves and making the same, Roller tappet for poppet. R. Jardine. 1,633,331; June 21.
Valves, and other valves, Lock for gas-stove. C. Smith. 1,633,233; June 21.
Vanity case. A. Weber. 1,632,864; June 21.
Vanity cases, Fastening member for. A. Weber. 1,632,863; June 21.
Vat. C. Pauly. 1,633,271; June 21.
Vegetable sea-growth derivative and a method for the preparation thereof. G. F. Meehan and A. L. Kennedy. 1,633,262; June 21.
Vehicle. A. Scala. 1,633,279; June 21.
Vehicle. J. T. Shoup. 1,632,804; June 21.
Vehicle body. H. N. Atwood. 1,633,159; June 21.
Vehicle body, Concrete. J. B. Strauss. 1,633,141; June 21.
Vehicle brake. C. J. Cuppett. 1,633,001; June 21.
Vehicle dash. E. R. Curney. 1,633,093; June 21.
Vehicle, Dumping. L. da C. Carvalho. 1,633,364; June 21.
Vehicle fender, Extensible. G. Lolli. 1,632,980; June 21.
Vehicle spring. A. P. Brush. 1,632,993; June 21.
Vehicle washing pit. J. P. Nicholson. 1,633,280; June 21.
Vehicles, Combined engine stop motion, visual alarm, and condenser for motor-driven. A. Antunes. 1,633,156; June 21.
Vehicles, Driving mechanism for motor. L. W. Davis. 1,633,316; June 21.
Vehicles, Signal device for motor. H. Legendre. 1,632,978; June 21.
Vehicles, Signaling apparatus for motor. S. A. Hoge. 1,633,252; June 21.
Vending machine. L. E. La Croix. 1,633,215; June 21.
Vending machine, Automatic gasoline-. E. T. Hess. 1,633,327; June 21.
Ventilator: *See*— Cowl ventilator.
Ventilator. E. F. Beach. 1,632,871; June 21.
Wagon, Coaster. A. R. Pribil. 1,633,272; June 21.
Wall paper or similar article. H. T. Abolin. Des. 72,878–79; June 21.
Wall pocket or similar article. R. De Boer. Des. 72,892; June 21.
Warships, Power plant for. W. Schmidt. 1,632,925; June 21.
Washing machine. A. W. Altorfer. 1,632,866; June 21
Washing machine. B. A. Stocking. 1,633,140; June 21.
Washing-machine plungers, Resilient mounting for. E. F. Beebe. 1,632,943; June 21.
Washing machine, Vegetable-. C. C. Daniels. 1,633,437; June 21.
Waste material and utilizing components thereof, Disposing of. A. Engle. 1,633,078–81; June 21.
Watch-chain swivel. T. J. Fagan. 1,632,828; June 21.
Watch straps and bracelets, Fastening device for wrist-. C. H. Kestenman. 1,633,381; June 21.
Watches, Dust guard for. I. Sonnenthal. 1,633,351; June 21.
Water-closet pans, Ventilation of. S. R. Habault. 1,632,791; June 21.
Water heater. L. F. Davis and L. W. Schnepp. 1,632,888; June 21.
Water heater, Electric. A. Cote. 1,632,821; June 21.
Wave meter. J. O. Mauborgne and G. Hill. 1,632,982; June 21.
Web-coating apparatus. C. C. Colbert and G. E. Preston. 1,632,885; June 21.
Weed cutter and cultivator, Combined. G. M. Carkey. 1,632,883; June 21.
Welding and cutting apparatus. F. W. Becker. 1,633,359; June 21.
Well drilling. W. Sheldon. 1,633,134; June 21.
Wells, Oil-flowing device for. W. R. Hauswirth. 1,633,325; June 21.
Wheel: *See*— Leaning wheel. Resilient wheel.
Wheel puller. A. L. Cornwell and L. R. Grames. 1,633,314; June 21.
Whistling ball. C. J. Diebold. 1,632,825; June 21.
Wind deflector. W. P. Hammond. 1,633,368; June 21.
Wind motor, Automatic. S. Zglickynski. 1,633,428; June 21.
Window. F. E. Domschelt. 1,632,780; June 21.
Window. M. Haberle. 1,632,835; June 21.
Window, Awning casement. J. G. Dudley. 1,633,375; June 21.
Window-cleaning device. S. De Rosa. 1,633,479; June 21.
Window regulator, Automatic storm-. C. A. Christofferson. 1,632,949; June 21.
Wire fabrics, Seam for woven. A. W. Harris. 1,632,904; June 21.
Wood preservative. R. H. Handy. 1,633,095; June 21.
Wrench: *See*— Conduit-bushing wrench.
Wrench. R. L. Murphy. 1,633,455; June 21.
Wringer: *See*— Mop wringer.
Wrist paste container and distributor. G. De Pamphilis. 1,632,890; June 21.

CLASSIFICATION OF PATENTS

ISSUED JUNE 21, 1927.

NOTE.—First number=class, second number=subclass, third number=patent number.

1— 23: 1,633,307
49. 6: 1,633,154
2— 42: 1,632,894
48: 1,632,873
74: 1,633,447
128: 1,632,898
158: 1,633,300
187: 1,632,786
193: 1,633,358
197: 1,633,457
265: 1,632,805
4— 72: 1,632,791
85: 1,633,310
230: 1,633,222
248: 1,633,281
251: 1,632,810
5— 3: 1,632,790
252: 1,632,936
260: 1,633,544
260: 1,633,545
7— 8: 1,633,533
8— 8: 1,632,823
2: 1,633,213
5: 1,633,220
1,633,221
9— 8: 1,633,484
21: 1,633,169
10— 139: 1,632,855
1,632,897
12— 128: 1,632,953
1,632,954
1,632,955
142: 1,633,075
145: 1,632,944
15— 18: 1,633,367
23: 1,633,128
77: 1,633,216

[Act of Feb. 20, 1905, Sec. 6, as amended Mar. 2, 1907.]

CLASS 1.

Coal. Old Ben Coal Corporation. 248,424; June 28.
Fabric impregnated with a stiffening substance. Celastic Corporation. 230,085; June 28.
Plants for transplanting. Southern Plant Growers' Association. 230,130; June 28.
Splined box ends for shipping boxes, crates, etc. Daniels & Schuck, Inc. 247,933; June 28.

CLASS 2.

Boxes for shipping, Chick. Anderson Box Company. 238,243; June 28.

CLASS 4.

Dry cleaner. G. H. Reimers. 232,944; June 28.
Dry-cleaning fluid. H. D. Kampf, Inc. 242,134; June 28.
Metal polish. Magnetic Polish Company. 246,694; June 28.
Soap, household, laundry, and hand cleanser. Western Soap & Chemical Co. 244,901; June 28.

CLASS 6.

Chemical for preserving silk hosiery, etc. R. B. Twyman. 246,242; June 28.
Compounds for processing pure silk. E. F. Houghton & Co. 248,571; June 28.
Cream, vanishing cream, scalp balm, oil and cream shampoo, hair tonic, etc., Cold. A. C. Manganiello. 247,621; June 28.
Dental pad or poultice. Capsi-Pad Co. 248,345; June 28.
Deodorant, Perspiration. J. G. Purple. 249,438; June 28.
Disinfectants and insecticides. Baird & McGuire, Inc. 249,147; June 28.
Disinfectants, deodorants, etc. A. Brick. 243,747; June 28.
Dyes and dyestuffs, etc. Chemische Fabrik Stockhausen & Cie. 228,174; June 28.
Laxative chewing gum. E-Z Health Laboratories. 236,677; June 28.
Liquid preparation. C. A. Benford. 247,308; June 28.
Liquid preparation. J. J. Stroasell. 247,500; June 28.
Lubricant and dye penetrant for all kinds of textile materials. H. & B. Textile Chemical Corporation. 249,167; June 28.
Medicinal compound. J. Svehla. 246,939; June 28.
Medicinal preparation. Radium Research Foundation. 247,963; June 28.
Medicine. Bishop and Bishop. 242,703; June 28.
Medicine. A. L. Breeding. 243,528; June 28.
Medicine for diarrhea. J. C. Smalley. 246,004; June 28.
Medicine or a pharmaceutical preparation. Eli Lilly and Company. 249,279; June 28.
Oil. Peppermint. Western Mint Company. 246,942; June 28.
Perfume, toilet water, hair tonic, etc. Karlsruher Parfumerie- und Toilettenseifen-Fabric F. Wolff & Sohn Gesellschaft mit beschränkter Haftung. 220,721; June 28.
Perfumes. A. Martory. 248,110; June 28.
Preparation in powdered form used as a disinfectant and deodorant. Lactein Company. 248,305; June 28.
Salve for cuts, burns, boils, etc., Healing. M. J. Lynch. 248,851; June 28.
Salves. P. Frisbie. 246,399; June 28.
Spray for agricultural purposes. Pacific Guano & Fertilizer Company. 247,204; June 28.
Tablets and powders, Headache. Nox-An-Ake Co. 247,813; June 28.
Toilet preparations. Clarks Products Inc. 246,740; June 28.
Toilet preparations, Various. Otella Wesley, Inc. 245,821; June 28.
Toilet water, perfumes, bay rum, alcohol rub, hair tonics, etc. Cheatham Chemical Company. 248,220; June 28.
Tonic and laxative. B. S. Warren. 248,944; June 28.

CLASS 8.

Ash tray, cigarette holder, and match holder, Combination. S. T. Jessop Co. 249,427; June 28.

CLASS 9.

Firecrackers. American Finance and Commerce Co. 249,400–2; June 28.

CLASS 11.

Inks, Printing. Queen City Printing Ink Company. 246,568; June 28.

CLASS 12.

Brick, floor tile, and roof tile. F. H. Ruppel. 248,325; June 28.
Cement-controlling chemical preparations, Oil-field. Master Builders Company. 238,447; June 28.
Paving material, Asphaltic. West Process Pavement Company. 248,382; June 28.

Tile, Glass. Boyd and Hutter Tile Company. 246,461; June 28.

CLASS 13.

Attachment to be secured to the bottoms of doors to prevent drafts. B. N. Reyes. 247,908; June 28.
Fixtures, Bathroom. Utility Manufacturing Company Inc. 243,568; June 28.
Governors, gate gas valves, etc., Street. Isbell-Porter Co. 224,409; June 28.
Metal pipe. A. M. Byers Company. 204,496; June 28.
Pipes of nonferrous metal. Mueller Brass Co. 237,276; June 28.

CLASS 14.

Die-casting metal and die castings. Doehler Die-Casting Co. 248,399; June 28.

CLASS 15.

Gasoline. Bear State Oil Co. 244,973; June 28.
Gasoline, engine and motor oil, gear oil and grease. C. W. Epley. 229,671; June 28.
Lubricants. Keystone Lubricating Company. 247,133; June 28.
Oils and greases, Motor. Sunset Petroleum Corporation. 248,205; June 28.
Oils, Lubricating. Pierce Petroleum Corporation. 248,321; June 28.

CLASS 16.

Carbon black. Binney & Smith Company. 238,036; June 28.
Lacquers, varnishes, and paint enamels. Jones-Dabney Company. 247,480; June 28.
Paints, paste, varnish, lacquer, and paint enamels. F. I. Siegel & Son. 245,109; June 28.
Polish, Automobile, furniture, and woodwork. Shelby Oil Products Company. 245,662; June 28.
Polish for furniture and automobiles. Flato's Inc. 248,403; June 28.

CLASS 19.

Automobile trucks and removable bodies therefor. Motor Terminals Company. 240,428; June 28.
Automotive vehicles. Pierce-Arrow Motor Car Company. 248,440; June 28.
Car brakes, Mechanism for manual operation of railway. Ajax Hand Brake Company. 230,270; June 28.
Trucks, Motor. International Motor Company. 247,860; June 28.

CLASS 20.

Oiled cloth. Columbus-Union Oil Cloth Co. 213,891–2; June 28.

CLASS 21.

Aerials. Scott and Fetzer Company. 212,832; June 28.
Batteries and parts thereof, etc., Storage. Willard Storage Battery Company. 245,386; June 28.
Cigar lighters and trouble lamps, Electric. Connecticut Automotive Specialties Company. 246,597; June 28.
Electric motors. Knapp Electric Corporation. 245,058; June 28.
Electric switches, Electrically-actuated control for. Federal Gauge Company. 246,894; June 28.
Radio apparatus. Precision Electric Mfg. Corp. 244,885; June 28.

CLASS 22.

Dolls. Averill Manufacturing Corp. 246,948; June 28.
Golf balls. Wilson-Western Sporting Goods Company. 249,455; June 28.
Tennis rackets, Gut string for. National Gut String Mfg. Co. 247,557; June 28.

CLASS 23.

Bearings and parts thereof, Antifriction. New Departure Manufacturing Company. 249,234; June 28.
Equipment for sealing leaks in metal containers. Furmanite Corporation. 247,180; June 28.
Feeds, card breasts, cloth washers, etc., Automatic. James Hunter Machine Company. 245,990; June 28.
Metal advertising device. J. Kuhn. 244,504; June 28.
Molds for making concrete burial vaults. Norwalk Vault Company. 248,187; June 28.
Oil-well drives and counterweighted disks on the drive. Link-Belt Company. 249,076; June 28.
Plows, Cast-iron parts of. M. Cail. 244,981; June 28.
Protectors, and certifiers, Mechanical check. Hedman Manufacturing Company. 248,040; June 28.
Pump, Hydraulic lift and force. F. W. Hoffman & Company. 245,211; June 28.
Pumps. Dayton Pump & Manufacturing Company. 247,934; June 28.
Razor blades, Safety-. Apex Razor Blade Corporation. 249,035; June 28.
Sprayers, spray pumps, and powder dusters. D. B. Smith & Company. 249,242–3; June 28.

Water-softening apparatus. Dayton Pump & Manufacturing Company. 248,092; June 28.
Water-softening apparatus. Dayton Pump & Manufacturing Company. 248,395; June 28.

CLASS 24.

Pressing machines and parts thereof, Garment-. Pantex Pressing Machine, Inc. 248,244; June 28.

CLASS 26.

Hydrometers. W. T. Grant Company. 249,002; June 28.
Measures, measuring cups, etc., Dry and liquid. Republic Metalware Co. 246,776; June 28.
Measuring and delivering devices for granular or liquid products. Saver Manufacturing Company. 249,099; June 28.
Photographic apparatus. Ed. Kanitz & Co., Aktiengesellschaft, Wien. 239,371; June 28.

CLASS 28.

Fraternity pins, badges, charms, finger rings, etc. Acacia Fraternity. 244,734; June 28.
Fraternity pins, badges, lapel buttons, cuff links, charms, etc. Kappa Alpha Order. 245,056; June 28.
Rings, bar pins, bracelets, brooches, etc., Finger. Katz & Ogush, Inc. 244,079; June 28.
Watch chains, key chains, buckles and belts, bracelets, etc. Whiting and Davis Chain Company. 240,937; June 28.

CLASS 29.

Mops, Floor. Delphos Mop Company. 249,216; June 28.

CLASS 30.

China dishes and crockery. Albert Pick & Company. 248,439; June 28.

CLASS 31.

Refrigerating systems, Radiators and condensers for. Winchester Repeating Arms Company. 247,921; June 28.

CLASS 32.

Mattresses, pillows, and cushions. M. O. Kingstone. 245,644; June 28.

CLASS 33.

Glass tumblers, jugs, ice tubs, etc. Federal Glass Company. 231,851; June 28.

CLASS 34.

Burners, Combination naturhl-gas and fuel-oil. Nimrod, Limited. 246,703; June 28.
Lighters, Portable and pocket cigar and cigarette. Alfred Dunhill of London, Inc. 248,459; June 28.
Ranges, plates, heaters, air and gas mixers, etc., Gas. Geo. D. Roper Corporation. 244,888; June 28.

CLASS 35.

Jar rings, Fruit-. Kroger Grocery & Baking Co. 249,128; June 28.
Tires and inner tubes, Pneumatic. Belknap Hardware & Manufacturing Company. 248,989–90; June 28.
Tires, Pneumatic vehicle. Goodyear Tire & Rubber Company. 239,618; June 28.

CLASS 36.

Pianos, player pianos, and piano players, Grand and upright. Wurlitzer Grand Piano Company. 248,077; June 28.
Trumpets, clarinets, flutes, alto horns, etc. M. Meyers. 244,564; June 28.

CLASS 37.

Bookkeeping supplies. Flach & Benedict, Inc. 244,067; June 28.
Books, Professional-appointment. Professional Press, Incorporated. 249,095; June 28.
Diaries. Springfield Leather Products Company. 248,332; June 28.
Paper, Writing. Swartwood-Nelson Paper Co. 231,022; June 28.
Pencils. A. W. Faber, Inc. 241,993; June 28.
Pens, Metallic. D. Leonardt and Company. 242,235; June 28.
Rubber bands, pencils, and penholders. American Lead Pencil Company. 248,460; June 28.
Tape, labels, and the like strip material, Devices for moistening and/or serving adhesive or gummed. Nashua Package Sealing Co. Inc. 245,866; June 28.

CLASS 38.

Books and coupons, Coupon. Publix Theatres Corporation. 248,927; June 28.
Books and coupons, Coupon. Publix Theatres Corporation. 248,929; June 28.
Magazine. Marion Steam Shovel Company. 248,964; June 28.
Magazine. Prep School Publications, Inc. 248,925; June 28.
Magazines. Certified Milk Producers' Association of America, Inc. 248,988; June 28.
Magazines. Experimenter Publishing Company. 247,530; June 28.
Periodical. Radio Manufacturers' Publishing Company. 249,193; June 28.
Pictures, illustrations, display cards, greeting cards, and booklets. Meriden Gravure Company. 248,008; June 28.
Publication. Keystone Publishing Co. 247,274; June 28.
Publication. Natamsa Publishing Company. 249,233; June 28.
Publication. Russell's Commercial News, Inc. 249,299; June 28.
Publications. Dictaphone Sales Corporation. 206,113; June 28.

CLASS 39.

Arctics. Beacon Falls Rubber Shoe Co. 248,952; June 28.
Coats, vests, trousers, etc. J. Schoeneman, Incorporated. 248,131; June 28.
Dresses and aprons, House. S. L. Hoffman. 248,000; June 28.
Dresses, bloomers, ladies' dresses, boys' suits, etc., Children's Isbell-Kent-Oakes Dry Goods Company. 242,483; June 28.
Hosiery, Women's. David Jacobs Corporation. 248,478; June 28.
Leggings. M. F. Pollard. 243,560; June 28.
Shirts, Dress, negligee, and work. David H. Posner Inc. 248,924; June 28.
Shoes. Field Bros. & Gross Co. 247,732; June 28.
Shoes. S. Kann Sons Company. 247,694; June 28.
Shoes, Children's. Truitt Brothers Incorporated. 208,495; June 28.
Suits, overcoats, and topcoats, Men's. Barron-Anderson Company. 248,389; June 28.
Suits, overcoats, and topcoats, Men's. H. Weinstein. 246,868; June 28.
Suits, overcoats, waistcoats, and trousers, Men's. M. Wile & Company. 245,131; June 28.
Ties. I. Isaac. 246,556; June 28.
Underwear for men and boys. Piqua Hosiery Company. 244,957; June 28.
Underwear, ties, scarfs, and mufflers. Clarion Knitting Mills, Inc. 248,391; June 28.

CLASS 42.

Cotton piece goods. M. C. D. Borden & Sons, Inc. 248,278; June 28.
Handkerchiefs. Bloch Freres, Inc. 247,925; June 28.
Lining, Shoe. D. B. Purbeck & Co. 248,195; June 28.
Piece goods. Bendix, Inc. 249,148–9; June 28.
Silk piece goods. Wager & Hirsch, Inc. 243,073; June 28.
Tablecloths, napkins, sheets, and pillowcases, etc., Linen-damask. Dundee Linen Shop. 234,504; June 28.
Textile fabrics. Reliable Silk Manufacturing Co. 241,670; June 28.
Textile fabrics. Reliable Silk Manufacturing Co. 243,169; June 28.
Textile fabrics of wool and cotton. William Whitman Company. 248,605; June 28.
Textile of cotton and rayon mixture. Lorraine Manufacturing Company. 248,505; June 28.
Towels. Carson Pirie Scott & Co. 231,526; June 28.
Woolen, worsted, cotton piece goods. Woolen Corporation of America. 248,660. June 28, 1927.

CLASS 43.

Cotton, thread, and sewing cotton, Spool. American Thread Company. 248,614; June 28.

CLASS 44.

Bandages, Plaster-of-Paris. G. C. Deane. 248,396; June 28.
Catamenial protectors. J. Perlzweig. 242,853; June 28.
Sanitary belts. Olmstead Corporation. 247,562; June 28.
Therapeutic lamps. Fitzgerald Manufacturing Company. 248,355; June 28.

CLASS 45.

Beverages. S. Hartford. 246,093; June 28.
Beverages, sirups, concentrates, and compounds for making the same. A. S. Monty. 248,509; June 28.
Ginger ale. Henry Gebring Company. 229,791; June 26.

CLASS 46.

Bacon and meat luncheon loaf. Swift and Company. 249,245; June 28.
Bread. W. B. Fink. 210,227; June 28.
Bread. B. Westergaard & Co. 245,308; June 28.
Buttermilk, Bulgarian. A. M. Deutsch. 233,672; June 28.
Cake icing. Mrs. John J. Ratty. 247,907. June 28.
Candies, chocolate, dried and stuffed fruits. Schwartz's Nut Stores, Inc. 245,809; June 28.
Candy. Ireland Candy Company. 247,021; June 28.
Candy bars. G. E. Curme. 232,258; June 28.

PUBLISHED FOR OPPOSITION.

[Act of Feb. 20, 1905, Sec. 6, as amended Mar. 2, 1907.]

Canned, dried, and fresh fruits, candied nuts, etc. H. Hicks & Son, Inc. 230,997; June 28.
Canned fruits. Greco Canning Company. 235,209–10; June 28.
Canned fruits. Greco Canning Company. 235,212; June 28.
Canned fruits and vegetables. Winorr Canning Company. 248,606; June 28.

Seasonings for food. J. A. Abadie. 247,588; June 28.
Sirup, Table. W. B. Roddenbery. 248,198; June 28.
Sirups and extracts for foods, Flavoring. Captain Kidd Products, Inc. 245,892; June 28.
Vegetables, Fresh. Cochran-Turney-Crispo, Inc. 248,555; June 28.

CLASS 48.

Malt sirup for food purposes. Val Blatz Brewing Company. 247,719; June 28.

CLASS 50.

Bottle caps. Davol Rubber Company. 246,820; June 28.
Corks and stoppers, Tapered. Cork Import Corporation. 247,360; June 28.
Felt blankets and papermakers' jackets. Appleton Woolen Mills. 246,727; June 28.
Stair-tread mats. J. P. Wettach. 239,211; June 28.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 28TH DAY OF JUNE, 1927.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Aalborg, Christian, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Circuit breaker. 1,633,969; June 28.
Abbott, Charles M., Watertown, assignor to Samuel Cabot, Inc., Boston, Mass. Shingle-abrading machine. 1,633,563; June 28.
Adams, Reed, Detroit, Mich. Printing press. 1,633,564; June 28.
Adams, Thomas C., H. A. Noyes, and E. G. Lawrence, Minneapolis, Minn., assignors to O. B. McClintock Co. Time-lock indicator. 1,633,657; June 28.
Aerovox Wireless Corporation. (See Siegel, Samuel, assignor.)
Ahlm, Charles E. F., Cleveland, Ohio. Transmission gearing. 1,634,063; June 28.
Ahlm, Charles E. F., Cleveland, Ohio. Transmission gearing. 1,634,168; June 28.
Ahlquist, Eugene F., Minneapolis, Minn., assignor to Gaw-O'Hara Envelope Company, Chicago, Ill. File wallet. 1,634,064; June 28.
Ahlrichs, Harm, Sherman, Ill. Poultry feeder. 1,633,880; June 28.
Aikman, Burton S., Milwaukee, Wis., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Fluid-pressure-brake system. 1,633,756; June 28.
Aktiebolaget Vaporackumulator. (See Ruths, Johannes, assignor.)
Aldendorff, Fritz, Wilmersdorf, near Berlin, Germany, assignor of one-fourth to P. Kollsch, New York, N. Y. Automatic switching system. 1,634,007; June 28.
Alderfer, Sterling W., Akron, Ohio. Manufacture of tire beads. 1,633,620; June 28.
Alford, John R., and L. Alexander, Henderson, Tex. Radiator-repair stand. 1,634,227; June 28.
Alexander, Frederick, East St. Louis, Ill. Clothesline fastener. 1,633,722; June 28.
Alexander, Luther. (See Alford, J. R., and Alexander.)
Alibert, Emile, Paris, France. Nail box for nailing machines. 1,634,226; June 28.
Allen, Frank B., Cynwyd, Pa., assignor, by mesne assignments, to F. H. Dunbar, Cleveland, Ohio. Hopper construction. 1,633,562; June 28.
Allen, Frank B., Lower Merion Township, Montgomery County, Pa., assignor to F. H. Dunbar, Cleveland, Ohio. Ash-handling equipment. 1,634,228; June 28.
Alliance Vitrified China Company. (See Hashagen, August, assignor.)
All-Metal Products Company, The. (See Schmidt, William F., assignor.)
Allsopp Bros. (See Steller, Arthur, assignor.)
Alsberg, Julius, New York, N. Y., and P. J. Ralph, Trenton, N. J.; said Ralph assignor to said Alsberg. Apparatus for analyzing gases. 1,633,881; June 28.
American Hoist & Derrick Co. (See Sederholm, John E., assignor.)
American Lakes Paper Company. (See Kress, Otto, assignor.)
American Laundry Machinery Company, The. (See Carroll, Emil J., assignor.)
American Radiator Company. (See Howell, Frank B., assignor.)
American Rubber Company. (See Teague, Merwyn C., assignor.)
American Telephone and Telegraph Company. (See Espenschied, Lloyd, assignor.)
American Telephone and Telegraph Company. (See Shanck, Roy B., assignor.)
American Telephone and Telegraph Company. (See Silent, Harold C., assignor.)
American Window Company. (See Lewis, Claude A., assignor.)
American Wire Cord Tire Company, The. (See Weigel, Daniel M., assignor.)
Anderson, David E., assignor to General Motors Corporation, Detroit, Mich. Vehicle having four-wheel brakes. 1,634,131; June 28.
Anderson, Harry T., Butler, Pa. Railway car. 1,634,008; June 28.
Andrew, Harold, Princeton, Ill. Device for detecting and measuring the unevenness of a surface. 1,633,841; June 28.
"Ansaldo" Societa Anonima. (See Soliani, Nabor, assignor.)
Apex Electrical Manufacturing Company, The. (See McClatchie, Stanley, assignor.)
Arndt, Ernest A., Sioux City, Iowa. Automobile trunk. Re16,665; June 28.
Arnot, John M., Bury, England. Steam-heated cylinder and the like and draining the same. 1,633,723; June 28.
Ash, Louis R., H. C. Tammen, and H. G. Hunter, Kansas City, Mo. Bascule bridge. 1,633,565; June 28.
Automatic Appliance Company. (See Mapel, Lewis A., assignor.)
Automatic Electric Inc. (See Engsberg, Ralph W., assignor.)
Automatic Electric Inc. (See Ray, Arthur J., assignor.)
Automatic Electric Inc. (See Sengebusch, Hans, assignor.)
Automotive Valves Co., The. (See Burtnett, Everett R., assignor.)
Ayres, Arthur U. (See Jones, L. D., and Ayres.)
Badenhop, Hermann C., Wauseon, Ohio. Chicken feeder. 1,633,917; June 28.
Bagnani, Giuseppe, San Francisco, Calif. Endless drier for macaroni. 1,634,009; June 28.
Ball, Samuel S., Bethlehem, Pa. Apparatus for compressing ingots. 1,633,970; June 28.
Ballin, Frederick A., Los Angeles, Calif. Dishwashing machine. 1,633,803; June 28.
Ballot, Ernest M., Paris, France. Valve-operating mechanism. 1,633,882; June 28.
Banner, Otto A., assignor to The Falk Corporation, Milwaukee, Wis. Oil engine. 1,634,132; June 28.
Barany, Edmund R., Brooklyn, N. Y. Connecter for electrical conductors. 1,634,065; June 28.
Barbee, Henry D., Greensboro, N. C. Fire door. 1,633,757; June 28.
Barber Asphalt Company, The. (See Forrest, Charles N., assignor.)
Barkschat, Henry, assignor to Marbelite Corporation of America, Los Angeles, Calif. Post. Des. 72,924; June 28.
Bartlett, C. O., & Snow Company, The. (See First, Mahlon E., assignor.)
Bartlett Hayward Company. (See Kuehn, Paul M., assignor.)
Bartling, Friedrich. (See Honigmann, L., and Bartling.)
Bates, Adelmer M., assignor to Bates Valve Bag Company, Chicago, Ill. Treating tubing and apparatus therefor. 1,634,066; June 28.
Bates, Adelmer M., assignor to Bates Valve Bag Company, Chicago, Ill. Process and apparatus for forming tubes. 1,634,067; June 28.
Bates Valve Bag Company. (See Bates, Adelmer M., assignor.)
Bauman, Harry A., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Hot-water bottle. Des. 72,925; June 28.
Bauman, Harry A., and R. M. Pierson, Akron, Ohio, assignors to The B. F. Goodrich Company, New York, N. Y. Bathing cap. Des. 72,926; June 28.
Baxter, Harold G., Baldwin, N. Y., assignor to Westinghouse Electric & Manufacturing Company. Fuse mechanism. 1,633,971; June 28.
Bear, Montague M., Atlanta, Ga. Garter. 1,634,169; June 28.
Beasley, Edwin W., Durham, N. C. Cotton chopper and weeder. 1,634,010; June 28.
Beattie, George W., Highland, Calif. Irrigating and mining water meter. 1,634,011; June 28.
Beaver Machine and Tool Company. (See Chadwick, Francis C., assignor.)
Beedle, Edwin W., San Francisco, Calif. Galley type clamp. 1,633,918; June 28.
Beisser, Harry, Detroit, Mich. Key machine. 1,634,133; June 28.
Benham, Roy E., and H. B. Ross, Richmond, Ind. Miniature electric advertising sign. 1,633,883; June 28.
Bennett, Raymond A., Roxbury, and A. M. Boothby, Watertown, assignors to Boothby Fibre Can Company, Boston, Mass. Paper can. 1,633,884; June 28.
Berg, Olav, Paterson, and M. Imhoff, Clifton, N. J. Weighting fibers. 1,634,012; June 28.
Berger, Knute, Seattle, Wash. Brake mechanism. 1,633,919; June 28.
Berry, Althea T., Wolfeboro, N. H. Union undergarment. 1,633,972; June 28.
Bethlehem Steel Company. (See Faunce, B. F., and Dorris, assignors.)

Bethune, John, J. G. Van Roo, deceased; E. F. Van Roo, executrix, Rochester, assignors to Twin High Transmission Company, Syracuse, N. Y. Variable-speed gear for motor vehicles. 1,634,091; June 28.

Bill, Earl M., Schenectady, N. Y., assignor to General Electric Company. System of electrical distribution. 1,633,804; June 28.

Biron, Wilfred. (See Gervais, M., and Biron.)

Birtch, Fred W., assignor to Birtch Laboratories Inc., Buffalo, N. Y. Liquid heater. 1,633,758; June 28.

Birtch Laboratories Inc. (See Birtch, Fred W., assignor.)

Bishop, Garrie R., Runnells, Iowa. Wind motor. 1,633,842; June 28.

Blom, Hjalmar T., Chicago, Ill., assignor to Sullivan Machinery Company. Compressor valve. 1,634,247; June 28.

Blumenberg, Henry, jr., assignor to Stockholders Syndicate, Los Angeles, Calif. Sulphur burner. 1,634,092; June 28.

Blumenfeld, Joseph, London, England. Filtration of solutions and the like. 1,633,621; June 28.

Bocklus, Walter A., Park Ridge, Ill. Electrical condenser. 1,633,566; June 28.

Boehringer, John A., Springfield, N. Y., assignor to Star Chandelier Co., Inc., New York, N. Y. Chandelier. Des. 72,927; June 28.

Boehringer, John A., Springfield, N. Y., assignor to Star Chandelier Co., Inc., New York, N. Y. Electric-socket cover. Des. 72,928; June 28.

Boehringer, John A., Springfield, N. Y., assignor to Star Chandelier Co., Inc., New York, N. Y. Arm for a chandelier body. Des. 72,929; June 28.

Boehringer, John A., Springfield, N. Y., assignor to Star Chandelier Co., Inc., New York, N. Y. Electric wall-bracket plate. Des. 72,930; June 28.

Boehringer, John A., Springfield, N. Y., assignor to Star Chandelier Co., Inc., New York, N. Y. Electric candle cup. Des. 72,931; June 28.

Boehringer, John A., Springfield, N. Y., assignor to Star Chandelier Co., Inc., New York, N. Y. Electric wall-bracket plate. Des. 72,932; June 28.

Bogardus, Charles C., Los Angeles, Calif. Upper-cylinder oiler. 1,634,134; June 28.

Bolognini, Giovanni. (See Parenti, A., and Bolognini.)

Boothby, Albion M. (See Bennett, R. A., and Boothby.)

Boothby Fibre Can Company. (See Bennett, R. A., and Boothby, assignors.)

Borden, Perry A., Toronto, Ontario, Canada. Remote metering system. 1,633,973; June 28.

Borer, Josef, Breitenbach, near Basel, Switzerland. Apparatus for transferring mica onto a fibrous web. 1,633,622; June 28.

Borgwardt, Erich. (See Feldt, A., Schoeller, and Borgwardt.)

Bostic, Ralph R., Los Angeles, Calif. Snap-on sucker-rod guide. 1,633,843; June 28.

Boston Match Company. (See Clark, George F., assignor.)

Boucek, Charles F., assignor to Ruda Manufacturing Company, Chicago, Ill. Latch mechanism. 1,634,013; June 28.

Boulogne, Baltus, Pasoerocan, Java. Automatic weighing apparatus with tare weighing. 1,633,623; June 28.

Boyer, Joseph, Detroit, Mich., assignor to Burroughs Adding Machine Company. Carrying mechanism for accounting machines. 1,634,068; June 28.

Bradford, Early T., Three Notch, Ala. Sawmill carriage. 1,633,920; June 28.

Bradley, Ovie E. (See McCarty, E. E., Dicus, and Langkop, assignors.)

Bradwell, Harry, assignor to John Mackintosh and Sons, Limited, Halifax, England. Wrapping machine for wrapping or parceling toffee, chocolate, or the like. 1,634,229; June 28.

Brafman, Samuel L., New York, N. Y. Motor-vehicle signal. 1,634,014; June 28.

Bray, Norris E., Kimball, S. Dak. Grain door for freight cars. 1,634,015; June 28.

Breese, James L., jr., assignor to Oil Devices Corporation, Chicago, Ill. Oil-burning furnace and ignition means therefor. 1,633,567; June 28.

Breese, James L., jr., assignor to Oil Devices Corporation, Chicago, Ill. Thermostatic control for domestic and hot-water heaters. 1,633,759; June 28.

Breisch, Edgar W., Edgewood, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electrical connecter. 1,633,974; June 28.

Brewer, Charles A., Noroton Heights, Conn., assignor to Cannon Engineering Co., Brooklyn, N. Y. Generating and impregnating steam with a chemical constituent. 1,633,568; June 28.

Brewin, Thomas, Fife, Scotland. Sound-reproducing instrument. 1,633,760; June 28.

Briscoe, G. C. (See Byrns, Emett L., assignor.)

Broadwood, Hilda, Mobile, Ala. Hearth broom. Des. 72,933; June 28.

Broido, Benjamin, assignor to The Superheater Company, New York, N. Y. Superheater baffle. 1,633,975; June 28.

Brophy, Gerald R., Schenectady, N. Y., assignor to General Electric Company. Heat-resisting alloy. 1,633,805; June 28.

Brown, Archibald M., Akron, Ohio. Nursing-bottle nipple. 1,634,170; June 28.

Brown, Arthur L., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Flexible composite article and forming the same. 1,633,976; June 28.

Brown, Earl J., Chicago, Ill. Eye-testing device. 1,633,658; June 28.

Brown, Edwin O., West Croydon, England. Apparatus for playing a table game of hockey. 1,634,016; June 28.

Brown, Phelps, Springfield, Mass. Ignition apparatus. 1,634,135; June 28.

Brown, Theodore P., assignor, by mesne assignments, to Simplex Player Action Co., Worcester, Mass. Pneumatic player mechanism for musical instruments. 1,634,171; June 28.

Brueshaber, Martin W., Chicago, Ill., assignor to Goss Printing Press Company, Chicago, Ill. Printing press. 1,633,691; June 28.

Buckeye Blower Company, The. (See Harnett, Lewis D., assignor.)

Buckwalter, Jacob S., assignor to The Enterprise Manufacturing Company of Pennsylvania, Philadelphia, Pa. Release clutch for grinding mills. 1,633,844; June 28.

Burris, Carl, Clayton, Mo. Maintenance record. 1,633,724; June 28.

Burroughs Adding Machine Company. (See Boyer, Joseph, assignor.)

Burson Knitting Company. (See Parker, William S., assignor.)

Burtnett, Everett R., assignor to The Automotive Valves Co., Los Angeles, Calif. Internal-combustion engine. 1,633,921; June 28.

Burton, George E., Philadelphia, Pa. Grinder for the cutters of pencil sharpeners. 1,633,845; June 28.

Byrde, Edwin A., Nagpur, Central India. Railway or tramway rail joint. 1,633,977; June 28.

Byrns, Emett L., assignor to G. C. Briscoe, Mineral Wells, Tex. Combination truck and weigher. 1,633,761; June 28.

Cabot, Samuel, Inc. (See Abbott, Charles M., assignor.)

Caldwell, Thomas F., et al. (See Rylander, William P., assignor.)

Calmels, Pierre L. M. V., Tours, France. Apparatus for the cut of the mustache. 1,633,978; June 28.

Cammack, William J., Los Angeles, Calif. Siren. 1,633,509; June 28.

Campbell, Argyle, and A. E. Zimmer, assignor to Enterprise Railway Equipment Company, Chicago, Ill. Car-door-locking mechanism. 1,633,762; June 28.

Campbell, Charles A., Watertown, N. Y., assignor to The New York Air Brake Company. Lubricator. 1,633,763; June 28.

Cannon Engineering Co. (See Brewer, Charles A., assignor.)

Capital Manufacturing Co. (See Forth, Charles, assignor.)

Cappa, Giulio C., Turin, Italy. Internal-combustion engine with inclined cylinders. 1,634,017; June 28.

Car Fastener Company. (See Pierce, Walter H., assignor.)

Carbide & Carbon Chemicals Corporation. (See Davidson, Joseph G., assignor.)

Carnes Artificial Limb Company. (See Carnes, William T., assignor.)

Carnes, William T., assignor to Carnes Artificial Limb Company, Kansas City, Mo. Phonograph tone arm and resonator. 1,633,624; June 28.

Carr Fastener Company. (See Carr, Moses F., assignor.)

Carr, Moses F., Lexington, assignor to Carr Fastener Company, Cambridge, Mass. Fastener stud. 1,634,230; June 28.

Carrick, Franklin K., Rapid City, Manitoba, Canada. Weed eradicator. 1,634,172; June 28.

Carroll, Emil J., Norwood, assignor to The American Laundry Machinery Company, Cincinnati, Ohio. Dump-bottom extractor. 1,633,570; June 28.

Carter, John J., Lansing, Mich., assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio. Manufacture of commutators. 1,633,922; June 28.

Casey, John W., assignor to Minnie E. Casey, Oklahoma City, Okla. Automatic weight opening valve. 1,633,923; June 28.

Casey, Minnie E. (See Casey, John W., assignor.)

Castillo, Miguel, Mexico City, Mexico, assignor of one-half to S. W. Fisher, Chicago, Ill. Portable grinder. 1,633,885; June 28.

Carver, C. R., Company. (See Fellows, Walter C., assignor.)

Cerny, Frank, Berwyn, Ill. Steel railing. 1,633,659; June 28.

Chadwick, Francis C., assignor to Beaver Machine and Tool Company, Newark, N. J. Socket terminal. 1,634,173; June 28.

Chance Brothers and Co. (See Gell, P. V. W., Gould, Hampton, and Martin, assignors.)

Chemical Works. (See Tagliani, Giovanni, assignor.)

Chemische Fabrik auf Actien (vorm. E. Schering). (See Feldt, A., Schoeller, and Borgwardt, assignors.)

Chemische Werke vormals Auergesellschaft m. b. H., Kommanditgesellschaft. (See Mayer, M., Flockh, and Koref, assignors.)

Chéron-Duvnl, André, Hollywood, Calif. Ornament for radiator caps. Des. 72,934; June 28.

Cherry-Bassett Company. (See Rosenfeld, Louis, assignor.)

Chester, Howard F., Brooklyn Heights Village, Ohio. Legging. 1,633,924; June 28.

Chipps, Henry D., Corinth, Miss. Artificial tooth and bridgework. 1,633,660; June 28.

Christensen, Niels A., Milwaukee, Wis. Automotive compressor. 1,633,764; June 28.

Christensen, Niels A., Milwaukee, Wis. Compressor mounting. 1,633,765; June 28.

Christensen, Niels A., Milwaukee, Wis. Engine-driven compressor. 1,633,766; June 28.

Christensen, Niels A., Cleveland, Ohio. Direct-drive compressor. 1,633,767; June 28.

Christensen, Niels A., Cleveland, Ohio. Automotive engine compressor. 1,633,768; June 28.

Christensen, Niels A., Cleveland, Ohio. Multicylinder automotive compressor. 1,633,769; June 28.

Christensen, Niels A., Cleveland, Ohio. Automotive engine compressor. 1,633,770; June 28.

Christensen, Niels A., Cleveland, Ohio. Front end, compressor. 1,633,771; June 28.

Chryst, William A., assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio. Engine-starting apparatus. 1,633,925; June 28.

Cincinnati Bickford Tool Company, The. (See Klausmeyer, David C., assignor.)

Clapp, Lewis J., Claremont, N. H., assignor to Sullivan Machinery Company. Valve mechanism. 1,633,692; June 28.

Clapp, Lewis J., Claremont, N. H., assignor to Sullivan Machinery Company. Valve mechanism. 1,633,772; June 28.

Clark, George F., Boston, Mass., assignor to Boston Match Company. Match book. 1,634,136; June 28.

Clark Paper & Manufacturing Co. (See Clark, Raymond P., assignor.)

Clark, Raymond P., assignor to Clark Paper & Manufacturing Co., Rochester, N. Y. Fruit packer. 1,633,571; June 28.

Clark, Victor E., Grand Rapids, Mich. Air compressor. 1,634,093; June 28.

Clarke, George I. (See Davis, C. C., and Clarke.)

Cleveland, George C., Cleveland, Ohio. Track detector. 1,633,572; June 28.

Clutts, Joshua K., Detroit, Mich. Cupola-charging car. 1,633,093; June 28.

Cohen, Joseph H., Bridgeport, Conn. Cigar lighter. Des. 72,935; June 28.

Colchester, Arthur E., Dorchester, Mass. Engine valve. 1,633,694; June 28.

Coleman, Harry S., Dayton, Pa. Hay fork. 1,634,1[illegible]; June 28.

Coleman, John A. (See Cook, G. C., and Coleman.)

Colley, George F., assignor to H. H. Weedon, Richmond, Va. Steering-gear-centering device. 1,633,695; June 28.

Collins, William S. (See Robinson, Douglas, G., assignor.)

Color Cinema Productions, Inc. (See Waddingham, Arthur G., assignor.)

Concrete Engineering Company. (See Meyer, Charles L., assignor.)

Contact Filtration Company. (See Prutzman, Paul W., assignor.

Container Corporation of America. (See Walter, Harrison B., assignor.)

Cook, Charles L., Louisville, Ky. Piston packing. 1,634,018; June 28.

Cook, George C., Millington, N. J., and J. A. Coleman, Woodhaven, N. Y. Tube-cleaning projectile. 1,634,094; June 28.

Cordray, Lee R., San Diego, Calif. Vehicle speed-limit indicating and control means. 1,634,069; June 28.

Cornett, Sherman, Reece, Kans. Display sign and producing the same. 1,634,174; June 28.

Correct Measure Company. (See Foster, J. R., and Woodruff, assignors.)

Cosin, Joseph J., Brooklyn, N. Y. Powder puff. 1,634,175; June 28.

Coullery, Henri, La Chaux de Fonds, Switzerland. Caliper. 1,634,019; June 28.

Cox, Oscar. (See Willis, O. C., and Cox.)

Cox, William G., Cleveland, Ohio. Shock-absorber for spring vehicles. 1,634,095; June 28.

Crabbs, Herbert J., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Disconnecting switch. 1,633,979; June 28.

Craig, Burnie J., Los Angeles, Calif. Baseball glove. 1,633,926; June 28.

Craig, John F., Edgewood, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Vehicle brake mechanism. 1,633,773; June 28.

Craig, Robert, Maplewood, N. J. Transfer turntable. 1,633,980; June 28.

Crawford, Ralph F., Salina, Kans. Self-oiling hub for radiator fans. 1,633,806; June 28.

Crawford, Ralph F., Salina, Kans. Power hoist for dump trucks. 1,633,846; June 28.

Crawford, Ralph F., Salina, Kans. Power take-off mechanism for motor vehicles. 1,633,847; June 28.

Creamery Package Mfg. Company, The. (See Larsen, Olaf, assignor.)

Crompton & Knowles Loom Works. (See Gordon, Albert A., assignor.)

Crompton & Knowles Loom Works. (See Holmes, Elbridge R., assignor.)

Crompton & Knowles Loom Works. (See McGuiness, Benjamin F., assignor.)

Crompton & Knowles Loom Works. (See Payne, Oscar V., assignor.)

Crompton & Knowles Loom Works. (See Ryon, Eppa H., assignor.)

Crompton & Knowles Loom Works. (See Unwin, Kenneth J., assignor.)

Crompton & Knowles Loom Works. (See Wakefield, Walter H., assignor.)

Crowell, Charles W., Salisbury, N. C. Steam boiler. 1,634,020; June 28.

Cunliffe, Wilfred, Stamford, Conn. Indicator. 1,634,176; June 28.

Cunningham, T. S., et al. (See Hansen, John, assignor.)

Curran, Eugene, Cardiff, and J. J. Hickey, Llanishen, near Cardiff, Wales. Vehicle. 1,634,021; June 28.

Cushman Chuck Company, The. (See Sloan, Harry E., assignor.)

Cushman, Joseph W. (See Groves, H. T., and Cushman.)

Cutler-Hammer Mfg. Co., The. (See Horter, Bayard M., assignor.)

Dahlberg & Company. (See Lathrop, E. C., and Munroe, assignors.)

Dallimore, George W., Oakland, Calif. Variable-speed transmission mechanism. 1,634,138; June 28.

Dalton Adding Machine Company, The. (See Landsiedel, Harry, assignor.)

Dalton, Harry, Sr., Philadelphia, Pa. Combined tank and carburetor. 1,634,022; June 28.

Dam, Henry M. R., Brooklyn, N. Y., assignor to Noma Electric Corporation, New York, N. Y. Christmas decorative lighting fixture. Des. 72,937; June 28.

Dam, Henry M. R., Brooklyn, N. Y., assignor to Noma Electric Corporation, New York, N. Y. Christmas decorative lighting fixture. Des. 72,938; June 28.

Dam, Henry M. R., Brooklyn, N. Y., assignor to Noma Electric Corporation, New York, N. Y. Christmas decorative lighting fixture. Des. 72,939; June 28.

Dames, John P. (See Harmon, C. N., and Dames.)

Dandridge, Lizzie, Wichita, Kans. Window barrier. 1,633,848; June 28.

Daniel, Aubrey W., New Orleans, La. Electric heater. 1,633,573; June 28.

Danielson, Edna, Berkeley, Calif. Butterfly ornament for garments. Des. 72,940; June 28.

Darlington, Philip J., Brookline, Mass. Internal micrometer caliper. 1,633,807; June 28.

Dario Company. (See Loomis, Ormond E., assignor.)

Dart, Luke M., and G. G. Harris, Engle Lake, Me. Trap-chain ring. 1,634,177; June 28.

Davidson, Joseph G., Yonkers, N. Y., assignor to Carbide & Carbon Chemicals Corporation. Ether of polyolefin glycol and making the same. 1,633,927; June 28.

Davis, Alex B., Cincinnati, Ohio, assignor to A. B. Dick Company, Chicago, Ill. Stencil sheet. 1,633,696; June 28.

Davis, Cecil C., and G. I. Clarke, West Palm Beach, Fla. Cushioning means for tiltable automobile seats. 1,633,697; June 28.

Davis, Dwight C., Monterey Park, Calif. Envelope sealer. 1,633,698; June 28.

Davis, Roger Q., Akron, Ohio. Fluid-pressure control for power transmissions. 1,633,981; June 28.

Davis, Timon, Mauston, Wis. Rat-poison holder. 1,633,982; June 28.

Davison, Clarence M., assignor to Poole Engineering & Machine Company, Baltimore, Md. Pump. 1,634,023; June 28.

Davison, David. (See Hosford, L. V., and Davison.)

Dawson, Cecil F., East Orange, and E. G. Wessman, Boonton, N. J., assignors by mesne assignments, to Individual Drinking Cup Co. Inc., Easton, Pa. Dispensing cup carton. 1,633,983; June 28.

Day, James C., South Orange, assignor to The Whitehead & Hoag Company, Newark, N. J. Button receptacle. 1,633,725; June 28.

De Botelho, Martin C., New York, N. Y. Vanity case. Des. 72,941; June 28.

Delco-Remy Corporation. (See Carter, John J., assignor.)

Delco-Remy Corporation. (See Chryst, William A., assignor.)

Delco-Remy Corporation. (See Haas, Nelson R., assignor.)

Dewey, Clarence L., Elkhart, Ind. String instrument. 1,633,574; June 28.

Dick, A. B., Company. (See Davis, Alex B., assignor.)

Dicus, Clarence C. (See McCarty, E. E., Dicus, and Langkop.)

Diel Watch Case Company. (See Dinstman, Isidor, assignor.)

Dietzgen, Eugene, Co. (See Langsner, Adolph, assignor.)

Dinstman, Isidor, New York, N. Y., assignor to Diel Watch Case Company. Making watchcases. 1,633,661; June 28.

Dixon, Walter L., assignor to Reece Folding Machine Company, Boston, Mass. Folding method and product. 1,633,849; June 28.

Doherty, Robert E., Scotia, N. Y., assignor to General Electric Company. Regulating system for dynamo-electric machines. 1,633,808; June 28.
Donald, Forrest V., assignor, by mesne assignments, to New Beeman Tractor Company, Minneapolis, Minn. Four-wheeled tractor. 1,633,850; June 28.
Donnelly, Richard O., Victoria, British Columbia, Canada. Fuel-regulation device for internal-combustion engines. 1,633,928; June 28.
Dorris, Henry C. (See Faunce, B. F., and Dorris.)
Doscher, George, Mount Vernon, N. Y. Envelope container for toothpicks. 1,634,096; June 28.
Duffin, James R., Louisville, Ky. Self-serving store. 1,633,886; June 28.
Duisberg, Walter, Leverkusen, near Cologne, W. Hentrich, L. Zeh, and J. Hulsmann, Wiesdorf, near Cologne, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y. Omega-aminoalkyl-aminonaphthalenes. 1,633,929; June 28.
Duley, Harley H., Chicago, Ill. Detectormeter. 1,633,930; June 28.
Dunbar, Frank H. (See Allen, Frank B., assignor.)
Du Pont, E. I., de Nemours & Company. (See Schwartz, George L., assignor.)
Durr, Fritz, Munich, Germany. Internal-combustion engine. 1,633,851; June 28.
Dziuk, Edmund, Detroit, Mich. Needle. 1,633,726; June 28.
Early, Reese B., Riverside, Calif. Loom lock. 1,633,727; June 28.
Ebarle, Patricio L., San Francisco, Calif. Container for table service. Des. 72,936; June 28.
Eclipse Machine Company. (See Lansing, Raymond P., assignor.)
Economy Glass Company. (See Schrader, Ernest C., assignor.)
Edmondson, John H., Pine Bluff, Ark. Carpenter's gauge. 1,634,178; June 28.
Edwards, Albert V., Hackettstown, N. J. Mortising machine. 1,634,097; June 28.
Ekelund, John A., Minneapolis, Minn. Figure wheeled toy. 1,633,809; June 28.
Eklund, Alexander, Attleboro, Mass., assignor to General Chain Company, Providence, R. I. Bracelet. 1,633,575; June 28.
Electrograph Company, The. (See Murphy, Robert S., assignor.)
Electrolytic Zinc Company of Australasia Limited. (See Gepp, H. W., Hey, Rigg, Stevens, and Williams, assignors.)
Ellis, Humphrey A., Philadelphia, Pa. Grate bar for fine fuel. 1,633,931; June 28.
Eminger, Don, et al. (See Lindsey, George C., assignor.)
Endicott, George F., and G. H. Goodell, St. Paul, Minn. Bearing for railway-axle journals. 1,633,852; June 28.
Engl, Josef. (See Massolle, J., Engl, and Vogt.)
Engsberg, Ralph W., Lake Mills, Wis., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Automatic telephone system. 1,633,774; June 28.
Enterprise Manufacturing Company of Pennsylvania, The. (See Buckwalter, Jacob S., assignor.)
Enterprise Railway Equipment Company. (See Campbell, A., and Zimmer, assignors.)
Erickson, Frederic W., Larchmont, N. Y. Electric meter and the mounting thereof. 1,634,098; June 28.
Erie City Iron Works. (See Johnson, Theodore, assignor.)
Esau, Abraham, Jena, Germany. Antenna arrangement for short-wave apparatus. 1,633,775; June 28.
Espenschied, Lloyd, Queens, N. Y., assignor to American Telephone and Telegraph Company. Secrecy system. 1,633,625; June 28.
Espitallier, Louis, Jennings, La. Game. 1,633,887; June 28.
Evans Case Company. (See Reilly, Alfred F., assignor.)
Evans, George S., Middle Brighton, Victoria, Australia. Piston. 1,634,024; June 28.
Fabriques des Montres Zenith, successeur de Fabriques des Montres Zenith Georges Fabre-Tacot & Co. (See Rosat, Charles, assignor.)
Fageol, Rollie B. (See Fageol, William B., assignor.)
Fageol, William B., assignor to R. B. Fageol, Oakland, Calif. Automobile brake. 1,633,776; June 28.
Falk Corporation, The. (See Banner, Otto A., assignor.)
Falknor, Frank B., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Wireless receiving system. 1,633,932; June 28.
Farmer, Clyde C., Pittsburgh, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Feed-valve device. 1,633,728; June 28.
Farmer, Clyde C., Pittsburgh, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Retarded release-valve device. 1,633,777; June 28.
Farmer, Clyde C., Pittsburgh, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Compressor-controlling device. 1,633,778; June 28.
Farnsworth, Frank S., London, England. Spring suspension of vehicles. 1,633,933; June 28.
Farrell, Rupert L., Montreal, Quebec, Canada. Automatic gate. 1,634,025; June 28.
Faunce, Benjamin F., Westmont, and H. C. Dorris, Johnstown, Pa., assignors to Bethlehem Steel Company. Striking plate for cars. 1,633,934; June 28.
Fauser, George, assignor, by mesne assignments, to General Motors Corporation, Detroit, Mich. Automobile body construction. 1,633,729; June 28.
Federal Glass Company, The. (See Hanford, Orin A., assignor.)
Feichter, Ulrich, Chicago, Ill. Switch. 1,634,179; June 28.
Feldt, Adolf, Berlin-Wilmersdorf, W. Schoeller, Berlin-Westend, and E. Borgwardt, assignors to Chemische Fabrik auf Actien (vorm. E. Schering), Berlin, Germany. Heavy metal mercapto sulphonic compounds. 1,633,626; June 28.
Fellows, Walter C., Philadelphia, Pa., assignor to C. R. Carver Company. Plate holder for printing presses. 1,633,810; June 28.
Felton, Walter A., Newburgh, N. Y. Game apparatus. 1,634,180; June 28.
Ferris, William D., assignor to Frantz Manufacturing Co., Sterling, Ill. Door latch. 1,633,888; June 28.
Figlietti, Germano, San Francisco, Calif. Airplane. 1,633,889; June 28.
Finckh, Karl. (See Mayer, M., Finckh, and Koref.)
First, Mahlon E., Lakewood, assignor to The C. O. Bartlett & Snow Company, Cleveland, Ohio. Mechanism for handling material. 1,633,627; June 28.
First National Bank & Trust Co. (See Hardison, Edwin A., assignor.)
First National Bank of Anaheim, trustee. (See Schnepp, Louis W., assignor.)
Fish, Frederick K., jr., San Francisco, Calif. Apparatus and making paper pulp. 1,633,730; June 28.
Fish, Frederick K., jr., San Francisco, Calif. Treating plant material. 1,633,731; June 28.
Fish, Frederick K., jr., San Francisco, Calif. Process and apparatus for making pulp from fibrous materials. 1,633,732; June 28.
Fish, Frederick K., jr., San Francisco, Calif. Process and apparatus for manufacturing ground-wood pulp. 1,633,733; June 28.
Fish, Frederick K., jr., San Francisco, Calif. Process and apparatus for digesting or cooking fibrous material. 1,633,734; June 28.
Fish, Frederick K., jr., San Francisco, Calif. Process and apparatus for making pulp from fibrous material. 1,633,735; June 28.
Fish, Frederick K., jr., San Francisco, Calif. Preparing paper pulp. 1,633,736; June 28.
Fish, Frederick K., jr., San Francisco, Calif. Liquid for treating plant material and producing the same. 1,633,737; June 28.
Fish, Frederick K., jr., San Francisco, Calif. Pulp fiber. 1,633,738; June 28.
Fisher, Frederick George, Quincy, Mass. Display package. 1,633,779; June 28.
Fisher, S. W. (See Castillo, Miguel, assignor.)
Fitzsimmons, John T., assignor to General Motors Research Corporation, Dayton, Ohio. Electrical generating system. 1,633,780; June 28.
Flagg, Ernest, New York, N. Y. Hinge. 1,634,181; June 28.
Fletcher, George H., Sheffield, and H. Rusby, Stocksbridge, England, assignors to Westinghouse Electric & Manufacturing Company. Coupling. 1,633,935; June 28.
Ford, Eugene A., Scarsdale, assignor to The Tabulating Machine Company, Endicott, N. Y. Card-feeding apparatus. 1,633,937; June 28.
Ford, Eugene A., West Newton, Mass., assignor to The Tabulating Machine Company, Endicott, N. Y. Perforation-reading device for sorting machines and the like. 1,633,936; June 28.
Ford, Henry, Dearborn, Mich. Steering-gear reduction. 1,633,890; June 28.
Fornaca, Guido, Turin, Italy. Brake of the expanding-shoe type. 1,633,984; June 28.
Forrest, Charles N., Rahway, N. J., assignor to The Barber Asphalt Company, Philadelphia, Pa. Asphaltic paving composition. 1,634,241; June 28.
Fort, Frank, Glen Ridge, N. J. Combined bathtub and shower casing. Des. 72,942; June 28.
Fort William Paper Co. (See Larbalester, Ernest, assignor.)
Forth, Charles, assignor to Capital Manufacturing Co., Detroit, Mich. Exhaust gas heater. 1,633,853; June 28.
Fortin, Joseph O., Ottawa, Ontario, Canada. Drafting device. 1,633,628; June 28.
Fortin, Joseph O., Ottawa, Ontario, Canada. Drafting machine. 1,633,629; June 28.
Foster, John R., and F. Woodruff, assignors to Correct Measure Company, Rochester, Pa. Liquid-dispensing apparatus. 1,633,985; June 28.
Frank, Harrison J. L., assignor to Mutual Electric and Machine Company, Detroit, Mich. Electric switch. 1,633,578; June 28.
Frank, John M., and A. G. Sutcliffe, assignors to Ilg Electric Ventilating Company, Chicago, Ill. Ventilating apparatus. 1,633,579; June 28.
Franklin, Edward J., Salt Lake City, Utah. Water-tube bridge-wall baffle for steam boilers. 1,634,130; June 28.
Franks, Clem H., La Grange, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Protective coating. 1,633,576; June 28.
Franks, Clem H., La Grange, Ill., assignor to Western Electric Company Incorporated New York, N. Y. Electrical coil. 1,633,577; June 28.

Frantz, Grover C., assignor to Modern Utilities Company, Harrisburg, Pa. Grade-measuring device. 1,633,85.; June 28.
Frantz Manufacturing Co. (See Ferris, William D., assignor.)
Frasca, Alfred F., Sandy Ridge, Pa. Oil-pump mechanism. 1,633,781; June 28.
Friedman, Bernhardt, New Orleans, La. Novelty box. Des. 72,943; June 28.
Fritz, William E., Indianola, Nebr. Feed cutter and grinder. 1,634,026; June 28.
Froesch, Charles, assignor to International Motor Company, New York, N. Y. Bearing. 1,633,580; June 28.
Fronrath, Stephen, Detroit, Mich. Door-holding device. 1,634,070; June 28.
Frye, Robert P., Marlboro, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for removing surplus material from boots and shoes. 1,633,855; June 28.
Fuhrer, Frieda E., Richmond, Va. Ornamented fabric. 1,633,630; June 28.
Fuller, Richard B. (See Hewlett, J. M., and Fuller.)
Fulton, Loyd R., Los Angeles, Calif. Auto lock. 1,634,099; June 28.
Fynn, Valére A., St. Louis, Mo. Nonsynchronous motor. 1,633,891; June 28.
G. & C. Oil Separator Corporation. (See Groves, H. T., and Cushman, assignors.)
Gahau, Albert T., Stockton, Calif. Container for fruit-canning apparatus. 1,633,856; June 28.
Gaisman, Henry J., New York, N. Y. Safety razor. 1,633,739; June 28.
Garlick, Fred G., assignor to General American Tank Car Corporation, Chicago, Ill. Tank car. 1,633,811; June 28.
Garner, Martin D., Tulsa, Okla. Telephone equipment. 1,633,892; June 28.
Gaw-O'Hara Envelope Company. (See Ahlquist, Eugene F., assignor.)
Gaw-O'Hara Envelope Co. (See Olgay, Albert, assignor.)
Geanopulos, George C., Evanston, Ill. Bumper. 1,633,782; June 28.
Gell, Philip V. W., C. E. Gould, W. M. Hampton, and H. S. Martin, assignors to Chance Brothers and Co., Limited, Smethwick, England. Colorless Crookes glass. 1,634,182; June 28.
General American Tank Car Corporation. (See Garlick, Fred G., assignor.)
General Chain Company. (See Eklund, Alexander, assignor.)
General Electric Company. (See Bill, Earl M., assignor.)
General Electric Company. (See Brophy, Gerald R., assignor.)
General Electric Company. (See Doherty, Robert E., assignor.)
General Electric Company. (See Goff, Robert W., assignor.)
General Electric Company. (See Herkloiz, Max, assignor.)
General Electric Company. (See Kelley, Floyd C., assignor.)
General Electric Company. (See Minorsky, Nicolas, assignor.)
General Electric Company. (See Prescott, Arthur C., assignor.)
General Electric Company. (See Ruder, William E., assignor.)
General Electric Company. (See Thompson, Louis W., assignor.)
General Electric Company. (See Tournier, Julius C., assignor.)
General Electric Company. (See Townsend, George R., assignor.)
General Electric Company. (See Youtz, Jesse P., assignor.)
General Motors Corporation. (See Anderson, David E., assignor.)
General Motors Corporation. (See Fauser, George, assignor.)
General Motors Corporation. (See Lannon, J. D., and Todd, assignors.)
General Motors Corporation. (See Taub, Alex., assignor.)
General Motors Research Corporation. (See Fitzsimmons, John T., assignor.)
General Motors Research Corporation. (See Lee, C. L., and Van Degrift, assignors.)
General Norit Company. (See Lourens, Cornelis, assignor.)
Gepp, Herbert W., H. Hey, and G. Rigg, Melbourne, Victoria, and R. H. Stevens and R. T. D. Williams, Risdon, Hobart, Tasmania, assignors to Electrolytic Zinc Company of Australasia Limited, Melbourne, Victoria, Australia. Treatment of zinc-bearing ores and metallurgical products. 1,634,100; June 28.
Gervais, Maurille, and W. Biron, New Bedford, Mass. Pipette. 1,634,183; June 28.
Gilbert, Joseph N., Grand Island, Nebr. Apparatus for imparting oscillating motions to rotating fans. 1,634,140; June 28.
Giles, David J., assignor to Latrobe Electric Steel Company, Latrobe, Pa. Cutlery article. 1,633,783; Gilmore, Lou, S., assignor, by mesne assignments, to Tourist Supply Company, Los Angeles, Calif. Tourist's kitchenette or cabinet. Re16,664; June 28.
Goff, Robert W., Schenectady, N. Y., assignor to General Electric Company. Electromagnetic operating means and motor controller employing the same. 1,633,812; June 28.
Goldberg, David D. (See Gordon, C. J., and Goldberg.)
Goldstein, Jacob, West Hazleton, Pa. Ventilator. 1,634,184; June 28.
Gonzalez, Daniel, Gallup, N. Mex. Animal and bird trap. 1,633,857; June 28.
Goodell, George H. (See Endicott, G. F., and Goodell.)
Goodrich, B. F., Company, The. (See Bauman, Harry A., assignor.)
Goodrich, B. F., Company, The. (See Bauman, H. A., and Pierson, assignors.)
Goodwin, Walter C., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Synchronous-motor starter. 1,633,938; June 28.
Gordon, Albert A., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Stop for weights of multiple-needle detectors. 1,633,631; June 28.
Gordon, Albert A., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Weft-detecting mechanism for drop-box looms. 1,633,632; June 28.
Gordon, Cyril J., and D. D. Goldberg, Chicago, Ill. Safety faucet. 1,633,581; June 28.
Goss Printing Press Company. (See Brueshaber, Martin W., assignor.)
Gouge, Arthur. (See Short, Albert E. and H. O., and Gouge.)
Gould, Charles E. (See Gell, P. V. W., Gould, Hampton, and Martin.)
Gould, Charles T. E., Toronto, Ontario, Canada. Bathtub. 1,633,582; June 28.
Gould & Eberhardt. (See Zimmermann, William F., assignor.)
Gozzo, Michael, et al. (See Lindsey, George C., assignor.)
Grace, George G., assignor of one-half to R. E. Kline, Los Angeles, Calif. Belt connecter. 1,633,939; June 28.
Grasselli Dyestuff Corporation. (See Duisberg, W., Hentrich, Zeh, and Hulsmann, assignors.)
Greiner, Richard, Berlin, Germany. Artificial eye. 1,633,986; June 28.
Grey, Robert B., London, England. Machinery foundation. 1,633,940; June 28.
Groene, William F., assignor to The R. K. Leblond Machine Tool Company, Cincinnati, Ohio. Crank-shaft lathe. 1,633,633; June 28.
Groves, Howard T., and J. W. Cushman, assignors to G. & C. Oil Separator Corporation, Parsons, Kans. Apparatus for separating fluids. 1,633,858; June 28.
Guett, Monroe, assignor to Hart & Hegeman Manufacturing Company, Hartford, Conn. Double-throw switch. 1,634,185; June 28.
Guinzburg, Edwin A. (See Henry, Beulah L., assignor.)
Haas, Nelson R., assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio. Dynamo brush. 1,633,740; June 28.
Hachita, Maximilian S., Wilkes-Barre, Pa. Pulsating gig. 1,634,101; June 28.
Haefely, Emil, Basel, Switzerland. Machine for tightening the insulation applied on winding bars of electric machines and apparatus. 1,633,741; June 28.
Halleck, Frank A., Michigan City, Ind., assignor to Sullivan Machinery Company. Compressor or pumping mechanism. 1,633,690; June 28.
Hallot, Paul, Paris, France. Braking of motor and other vehicles. 1,634,186; June 28.
Halvorsen, Halbert B., Michigan City, Ind., assignor to Sullivan Machinery Company. Forging machine. 1,633,742; June 28.
Hamilton, William R., Dewey, Okla. Pump valve. 1,634,141; June 28.
Hammerstrom, Karl R. (See Vold, L. H., and Hammerstrom.)
Hammond, Robert O., assignor to S. S. Jenkins, Buffalo, N. Y. Apparatus for toasting food articles. 1,634,142; June 28.
Hampton, Wilfred M. (See Gell, P. V. W., Gould, Hampton, and Martin.)
Hanford, Orin A., assignor to The Federal Glass Company, Columbus, Ohio. Glass-forming machine and process. 1,633,634; June 28.
Hannah, Thomas. (See Smily, W. E., Hannah, and Winans.)
Hansen, John, Bettendorf, assignor of four twenty-fifths to W. H. Martin, ten twenty-fifths to T. S. Cunningham, and one twenty-fifth to T. McQuarrie, Davenport, Iowa. Mechanical golf instructor and exerciser. 1,634,102; June 28.
Hansen, John, Bettendorf, assignor of four twenty-fifths to W. H. Martin, ten twenty-fifths to T. S. Cunningham, and one twenty-fifth to T. McQuarrie, Davenport, Iowa. Mechanical golf instructor and execiser. 1,634,103; June 28.
Hanson, Nils K. F., Stockholm, Sweden. Boiling fibrous matters. 1,634,143; June 28.
Hardie, Joseph H., Morecambe, England. Apparatus for washing glasses and like vessels. 1,633,662; June 28.
Hardinge Brothers, Inc. (See Porst, Frederic, assignor.)
Hardison, Edwin A., Los Angeles, assignor to First National Bank & Trust Co., Santa Paula, Calif. High-pressure steam boiler. 1,633,663; June 28.

Hargrave, Fred M., Cedar Rapids, Iowa. Planing or scarifying mechanism. 1,634,144; June 28.
Harmon, Charles N., and J. P. Dames, Ann Arbor, Mich. Advertising device. 1,633,635; June 28.
Harnett, Lewis D., assignor to The Buckeye Blower Company, Columbus, Ohio. Radiator. 1,633,664; June 28.
Harris, George G. (See Dart, L. M., and Harris.)
Harrison, Joseph, Tunstall, Stoke-on-Trent, England. Vegetable dish or similar article. Des. 72,944; June 28.
Hart, Carl D., La Grange, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Method of and apparatus for vulcanizing material. 1,633,592; June 28.
Hart & Hegeman Manufacturing Company. (See Guett, Monroe, assignor.)
Hartvikson, Henry, Rugby, N. Dak. Platform canvas-adjusting mechanism for grain binders. 1,634,187; June 28.
Harvey, Harry D. (See Schimpf, George C., assignor.)
Harvey, Vernon L., San Francisco, Calif. Fastening device. 1,633,859; June 28.
Hashagen, August, New York, N. Y., assignor to The Alliance Vitrified China Company, Alliance, Ohio. Plate or similar article. Des. 72,945; June 28.
Hathaway, Edgar F., Wellesley, Mass. Making laminated belts. 1,634,145; June 28.
Hawkins, Charlotte B., Parkdale, Ark. Grater. 1,633,700; June 28.
Hawley, Ted B., Kevin, Mont. Oil-well-controlled fire extinguisher. 1,633,813; June 28.
Haynes, Elbert J., Cleveland, Ohio. Sounding line. 1,633,701; June 28.
Head, Clarence, Birch Coulee Township, Renville County, Minn. Admission ticket. 1,634,188; June 28.
Hecht, Else, née Heimann, administratrix. (See Heimann, Georg.)
Heimann, Georg, deceased; E. Hecht, née Heimann, administratrix, Charlottenburg, Germany. Semiautomatic or automatic graded-service telephone system. 1,633,987; June 28.
Heitland, Wilmot E., Noroton Heights, Conn., assignor to W. H. & A. E. Margerison & Co., Philadelphia, Pa. Des. 72,946; June 28.
Hendrick, Victor P., et al. (See Lindsey, George C., assignor.)
Hendry, William F., Ossining, assignor to Manhattan Electrical Supply Company, Incorporated, New York, N. Y. Electric bell. 1,633,583; June 28.
Henry, Beulah L., New York, N. Y. Play-ball covering. 1,634,146; June 28.
Henry, Beulah L., assignor of one-half to E. A. Guinzburg, New York, N. Y. Poodle-dog doll. 1,634,189; June 28.
Hentrich, Winfrid. (See Duisberg, W., Hentrich, Zeh, and Huismann.)
Hepner, William, Los Angeles, Calif. Hair structure. 1,634,190; June 28.
Herklotz, Max, Berlin, Germany, assignor to General Electric Company. System of distribution. 1,633,860; June 28.
Herrick, Ernest A., and T. L. MacBean, New York, N. Y. Timbering or bracing system. 1,634,104; June 28.
Hertzberg, William, Brooklyn, N. Y. Wet mop. 1,633,584; June 28.
Hewlett, James M., and R. B. Fuller, Lawrence, N. Y., assignors to Stockade Building System, Inc. Building structure. 1,633,702; June 28.
Hey, Harry. (See Gepp, H. W., Hey, Rigg, Stevens, and Williams.)
Hey, Harry, Dewsbury, England. Removing suspended matters from oils and organic solvents. 1,633,941; June 28.
Hey, Harry, Dewsbury, England. Removing suspended matters from oils and organic solvents. 1,633,942; June 28.
Hickey, John J. (See Curran, E., and Hickey.)
Hiley, Alfred, Rickmansworth, England. Construction of concrete piles or columns. 1,634,231; June 28.
Hilgert, John, Chicago, Ill. Typewriter. 1,633,665; June 28.
Hiller, W. G. (See Moushon, Richard S., assignor.)
Hindahl, David. (See Hoscelt, W. J., and Hindahl.)
Hindshaw Engineering & Development Company. (See Hindshaw, Henry H., assignor.)
Hindshaw, Henry H., assignor to Hindshaw Engineering & Development Company, Minneapolis, Minn. Apparatus for utilizing low-grade iron ore. 1,633,839; June 28.
Hobe, William W., New York, N. Y. Appliqué trimming. Des. 72,947; June 28.
Hobe, William W., New York, N. Y. Appliqué trimming. Des. 72,948; June 28.
Hobe, William W., New York, N. Y. Appliqué trimming. Des. 72,949; June 28.
Hoeft, Adolph R., Chicago, Ill. Trap-nest door for poultry. 1,634,147; June 28.
Hoffman, John E., Casper, Wyo. Wrecking tool. 1,634,191; June 28.
Hoffman, Sten E., Gary, Ind. Check protector. 1,634,105; June 28.
Hojnowski, Jakob, Nekoosa, Wis. Device for holding the movable jaws of couplers open. 1,633,784; June 28.
Holmes, Elbridge R., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Weft detector for looms. 1,633,636; June 28.
Holmes, Elbridge R., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Stop for weights of multiple-needle detectors. 1,633,637; June 28.
Honigmann, Ludwig, B. Tolz, and F. Bartling, Munich, Germany. Furnace for the heat treatment of pulverulent granular or pulpy material. 1,634,027; June 28.
Hopkinson, Ernest, New York, N. Y. Vulcanizing mold. 1,634,106; June 28.
Horter, Bayard M., Kingston, Pa., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Controller for power-driven pumps. 1,633,786; June 28.
Hoscelt, William J., and D. Hindahl, assignors to Rodger Ballast Car Company, Chicago, Ill. Railway dump car. 1,634,107; June 28.
Hosford, Leonard V., and D. Davison, Portland, Oreg., assignors, by mesne assignments, to Hosford Motor Construction Co. Two-cycle internal-combustion engine. 1,633,585; June 28.
Hosford Motor Construction Co. (See Hosford, L. V., and Davison, assignors.)
Hotchner, Joseph, San Francisco, Calif. Illuminated sign. 1,633,785; June 28.
Hovda, Oliver H., Billings, Mont. Nail-sorting device. 1,634,192; June 28.
Howell, Frank B., Buffalo, N. Y., assignor to American Radiator Company, Chicago, Ill. Boiler. 1,633,666; June 28.
Howell, Frank B., Buffalo, N. Y., assignor to American Radiator Company, Chicago, Ill. Boiler. 1,633,667; June 28.
Hubbell, Harvey C., Cincinnati, Ohio. Tractor. 1,633,743; June 28.
Huber, William, assignor of one-half to O. W. Meyer, Bentley, N. Dak. Whipping or prodding device. 1,634,193; June 28.
Hughes, George, Southampton, England. Apparatus for flanging and bending metal plates. 1,633,744; June 28.
Huismann, Johann. (See Duisberg, W., Hentrich, Zeh, and Huismann.)
Hunter, Harry G. (See Ash, L. R., Tammen, and Hunter.)
Hunter, William A., West Orange, N. J. Sudatory receptor pad. 1,633,586; June 28.
Hymer, Ralph N., New Berg, Oreg. Comb. 1,633,893; June 28.
I. G. Farbenindustrie Aktiengesellschaft. (See Lüttringhaus, A., Nerresheimer, and Wolff, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Nawiasky, P., Zahn, and Saurwein, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Zitscher, A., and Schmitt, assignors.)
Ile, William, assignor to Reynolds Spring Company, Jackson, Mich. Duplex receptacle. 1,633,868; June 28.
Ilg Electric Ventilating Company. (See Frank, J. M., and Sutcliffe, assignors.)
Imhoff, Max. (See Berg, O., and Imhoff.)
Individual Drinking Cup Co. Inc. (See Dawson, C. F., and Wessman, assignors.)
Ingman, Andrew, Marshfield, Oreg. Adjustable window-sash-fastening device. 1,633,861; June 28.
International Motor Company. (See Froesch, Charles, assignor.)
International Patents Fiscal Corporation. (See Slate, Thomas B., assignor.)
Ireland, George B., and R. T. Soule, assignors to Taylor Instrument Companies, Rochester, N. Y. Receptacle or case for thermometers. 1,634,028; June 28.
Irvin, Russe J., assignor to R. C. Mitchell, Mount Vernon, N. Y. Dishwashing machine. 1,633,669; June 28.
Jacobs, Joseph H., Paxton, Mont. Educational toy. 1,634,194; June 28.
Jacobsohn, Isaak, Spandau, assignor to B. Muller, Gorlitz, Germany. Talking machine. 1,633,745; June 28.
Jaret, Joseph T., Brooklyn, N. Y., assignor to Sun-Ray Lighting Products Co., Inc., New York, N. Y. Lamp. Des. 72,950; June 28.
Jarvis, Frank J. (See Jarvis, Nelson L. and F. J.)
Jarvis, Nelson L. and F. J., Palmer, Mass. Caster. 1,633,638; June 28.
Jenkins, Stanley S. (See Hammond, Robert O., assignor.)
Jerczsek, Viktor, Weissensee, near Berlin, assignor to Stock Motorpflug Aktiengesellschaft, Berlin, Germany. Chain wheel for chain-track drives. 1,633,746; June 28.
Johns, Emory R., Dallas, Tex. Nut encasement. 1,633,639; June 28.
Johnson, Arthur H., Woburn, Mass. Bottle. Des. 72,951; June 28.
Johnson, Carl E., Detroit, Mich. Electric heating apparatus. 1,633,747; June 28.
Johnson, Clarence A., Larimer, Pa., assignor to Westinghouse Electric & Manufacturing Company. Motor-starting system. 1,633,943; June 28.
Johnson, James W. (See Showalter, A. E., and Johnson.)
Johnson, Logan, Centerville, Iowa. Loading machine. 1,634,148; June 28.
Johnson, Theodore, Erie, Pa., assignor, by mesne assignments, to Erie City Iron Works. Furnace-fuel-feeding apparatus. 1,633,640; June 28.

Johnston, Benjamin W., Rosedale, Alberta, Canada, assignor of one-half to Berton A. McEwen, Brumheller, Canada. Latch. 1,634,195; June 28.
Johnston, Dryden & Co. (See Smart, Russel S., assignor.)
Jones, George, Flushing, N. Y. Protector for glass and metal door knobs and automobile handles. 1,633,988; June 28.
Jones, Leo D., assignor to The Sharples Specialty Company, Philadelphia, Pa. Method and mechanism for removing centrifuge effluents. 1,634,242; June 28.
Jones, Leo D., assignor to The Sharples Specialty Company, Philadelphia, Pa. Method and mechanism for centrifugal treatment of substances. 1,634,243; June 28.
Jones, Leo D., assignor to The Sharples Specialty Company, Philadelphia, Pa. Centrifugal separator. 1,634,244; June 28.
Jones, Leo D., and A. U. Ayres, assignors to The Sharples Specialty Company, Philadelphia, Pa. Centrifugal machine and process involving the use of the same. 1,634,245; June 28.
Jones, Leo D., and A. U. Ayres, assignors to The Sharples Specialty Company, Philadelphia, Pa. Centrifugal machine and process involving the use of the same. 1,634,246; June 28.
Jones, Lewis, New York, N. Y. Sheet plier. 1,634,196; June 28.
Jones, Richard G., Hynes, Calif. Transmission. 1,633,989; June 28.
Jones, Richard G., Hynes, Calif. Dephlegmator. 1,633,990; June 28.
Jones, Thomas A., Walla Walla, Wash. Power take-off. 1,633,814; June 28.
Kadel, Byers, W., Baltimore, Md., assignor, by mesne assignments, to The Symington Company. Manufacturing draft yokes. 1,633,670; June 28.
Kaji, Jiro, Vancouver, British Columbia, Canada. Sign-making device. 1,633,703; June 28.
Kalix Cup Company. (See Prudden, Theodore M., assignor.)
Kasch, Frederick C., Akron, Ohio. Roof construction. 1,633,641; June 28.
Katzinger, Arthur, assignor to Edward Katzinger Company, Chicago, Ill. Reenforced baking pan. 1,634,248; June 28.
Katzinger, Edward, Company. (See Katzinger, Arthur, assignor.)
Keith, Floyd. (See Miller, G. F., and Keith.)
Kelley, Floyd C., Schenectady, N. Y., assignor to General Electric Company. Electric terminal. 1,633,815; June 28.
Kellogg, Frank W., Reedsport, Oreg. Hairbrush. 1,633,894; June 28.
Kellogg Switchboard and Supply Company. (See Potter, Earl F., assignor.)
Kellogg Switchboard and Supply Company. (See Yanochowski, George A., assignor.)
Kelly, Sherman L., and L. E. Koos, Toledo, Ohio. Engine starter. 1,633,862; June 28.
Kelly, Sherman L., and L. E. Koos, Toledo, Ohio. Engine-starter drive. 1,633,863; June 28.
Kent, George, North Chatham, Mass. Clock-dial game. 1,634,197; June 28.
Kerr, John B., and J. R. Young, Albuquerque, N. Mex. Pneumatic cushion wheel. 1,633,748; June 28.
Keyes Fibre Company. (See Williamson, Bert R., assignor.)
Khetah Corporation. (See Sartakoff, Jack D., assignor.)
Kienzle, Albert E., Cairo, Egypt. Working sugar cane. 1,633,895; June 28.
Kilborn, Karl B., and W. S. Wolfe, assignors to Seiberling Rubber Company, Akron, Ohio. Tire-vulcanizing device. 1,633,587; June 28.
Kinkaid, Charles R., and E. T. Shreve, Rotan, Tex. Valve-actuating mechanism. 1,634,198; June 28.
Kinkead, Charles B., Huntington, W. Va. Device for use with telephones. 1,633,816; June 28.
Klages, Frank E. P., assignor to The Powers Regulator Company, Chicago, Ill. Method of and apparatus for controlling the moisture content of paper. 1,633,817; June 28.
Klausmeyer, David C., Cincinnati, assignor to The Cincinnati Bickford Tool Company, Oakley, Cincinnati, Ohio. Brake mechanism for drill spindles. 1,634,149; June 28.
Kline, Richard E. (See Grace, George G., assignor.)
Klinenberg, Edward, Chicago, Ill. Ice-cream cabinet. 1,633,588; June 28.
Klingelsmith, Stuart L., Alhambra, and F. J. Koepke, Los Angeles, Calif. Collapsible baby carriage. 1,633,864; June 28.
Knocke, Louis T., Waukesha, Wis. Continuous centrifugal casting machine. 1,634,150; June 28.
Koepke, Frederick J. (See Klingelsmith, S. L., and Koepke.)
Kogstrom, Alex W., Upper Darby, assignor of one-half to A. F. H. Scott, Philadelphia, Pa. Filter. 1,633,818; June 28.
Kollsch, Paul. (See Aldendorff, Fritz, assignor.)
Koos, Lawrence E. (See Kelly, S. L., and Koos.)
Koppers Company, The. (See Van Ackeren, Joseph, assignor.)
Koref, Fritz. (See Mayer, M., Finckh, and Koref.)

Korkames, Joe, Temple, Tex. Food container. 1,634,029; June 28.
Korkames, Joe, Temple, Tex. Fishing line. 1,634,030; June 28.
Kovács, Theodor, Meran, Italy. Fountain pen. 1,633,896; June 28.
Kramer, Andrew A., Kansas City, Mo. Tank for dispensing liquids. 1,633,642; June 28.
Kramer, Eugene, Astoria, N. Y. Box. Des. 72,952; June 28.
Kress, Otto, Appleton, Wis., assignor to American Lakes Paper Company, Chicago, Ill. Oil and grease proof paper and container made therefrom. 1,633,787; June 28.
Kuehn, Paul M., assignor to The Bartlett Hayward Company, Baltimore, Md. Centrifugal contact apparatus. 1,634,199; June 28.
Kutzin, Philip, New York, N. Y. Removable stocking supporter for ladies garments. 1,634,071; June 28.
Kyler, Albert H., Westminster, Md. Machine for boxing or casing cans. 1,634,031; June 28.
La Bombard, Leon E., and M. H. Sidebotham, assignors to Specialty Automatic Machine Company, Chelsea, Mass. Flat-feed mechanism. 1,634,072; June 28.
Labombarde, Elie W., Nashua, N. H. Reenforced and leak-tight paper box. 1,634,073; June 28.
Labombarde, Harold S., Nashua, N. H. Feeder for sheet material. 1,634,074; June 28.
Lamont, Lewis H., Chicago, Ill. Thermostatically-controlled heating element. 1,633,589; June 28.
Lamplough, Leslie F., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Method of and apparatus for vulcanizing rubber. 1,633,590; June 28.
Lamplough, Leslie F., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Method of and apparatus for vulcanizing material. 1,633,591; June 28.
Landsiedel, Harry, assignor to The Dalton Adding Machine Company, Cincinnati, Ohio. Nonprint mechanism for adding machines. 1,633,788; June 28.
Langkop, Theodore F. (See McCarty, E. E., Dicus, and Langkop.)
Langsner, Adolph, assignor to Eugene Dietzgen Co., Chicago, Ill. Surveying instrument. 1,633,749; June 28.
Langston, Samuel M., Company. (See Sieg, Karl, assignor.)
Lannon, John D., and R. R. Todd, Pontiac, assignors to General Motors Corporation, Detroit, Mich. Piston. 1,634,151; June 28.
Lansing, Raymond P., Montclair, N. J., assignor to Eclipse Machine Company, Elmira, N. Y. Ignition apparatus. 1,633,704; June 28.
Larbalester, Ernest, assignor to Fort William Paper Co., Limited, Fort William, Ontario, Canada. Core-tip-removing machine. 1,633,593; June 28.
Larrowe Construction Company. (See Tressler, Donald K., assignor.)
Larsen, Olaf, Fort Atkinson, Wis., assignor to The Creamery Package Mfg. Company, Chicago, Ill. Valve. 1,634,075; June 28.
Larson, Oscar H. (See Peterson, William J., assignor.)
La Société d'Etudes, Constructions et Applications Mecaniques. (See Lievens, Léon L., assignor.)
Lathrop, Elbert C., Philadelphia, Pa., and T. B. Munroe, Forest Glen, Md., assignors to Dahlberg & Company, Inc., Chicago, Ill. Retted bagasse fiber and producing same. 1,633,594; June 28.
Latrobe Electric Steel Company. (See Giles, David J., assignor.)
Laucks, I. F., Inc. (See Rippey, Hugh F., assignor.)
Lawrence, Edward G. (See Adams, T. C., Noyes, and Lawrence.)
Leblond, R. K., Machine Tool Company, The. (See Groene, William F., assignor.)
Lee, Charles L., and T. C. Van Degrift, assignors to General Motors Research Corporation, Dayton, Ohio. Malt-casting apparatus. 1,634,152; June 28.
Lee, Charles W., Lock Haven, Pa. Rail-fastening means for railway ties. 1,634,200; June 28.
Leece, Bennett M., assignor to The Leece-Neville Company, Cleveland, Ohio. Generator regulation. 1,633,671; June 28.
Leece-Neville Company. (See Leece, Bennett M., assignor.)
Leoni, Hugo, assignor to Super-Rubber Lining Corporation, New York, N. Y. Necktie and lining therefor. 1,634,032; June 28.
Leppert, Robert C., Chicago, Ill. Concertina or accordion. 1,634,108; June 28.
Lévy, Marcel. (See Terrisse, H., and Levy.)
Lewellen, Darcy, E., Columbus, Ind. Belt splicer. 1,634,033; June 28.
Lewellen, Darcy E., Columbus, Ind. Belt fastener. 1,634,034; June 28.
Lewers & Cooke, Ltd. (See Morris, Raymond L., assignor.)
Lewetzki, Ootto, Detroit, Mich. Boat-propelling device. 1,633,897; June 28.
Lewis, Claude A., assignor to American Window Company, Houston, Tex. Combined sliding and swinging window. 1,633,789; June 28.
Liebeck, Harry, Swarthmore, Pa., assignor to Scott Paper Company. Device for making rolls of paper. 1,633,595; June 28.

Lifton, Samuel H., Brooklyn, N. Y. Brief case. 1,633,991; June 28.
Lievens, Léon L., Nanterre, assignor to La Société d'Etudes, Constructions et Applications Mecaniques, Paris, France. Adjustable-delivery ink container for rotary duplicators. 1,633,596; June 28.
Lindemann, A. J., & Hoverson Company. (See Rutenber, Edwin A., assignor.)
Lindequist, Sven, Wilmersdorf, near Berlin, Germany. Explosion engine with four or more working cylinders. 1,634,249; June 28.
Lindsey, George C., Los Angeles, Calif., assignor of seven thirty-seconds to M. Gozzo, one-eighth to D. Eminger, six thirty-seconds to V. P. Hendrick, and nine thirty-seconds to R. Turner. Sounding board for radio receiving sets and phonographs. 1,633,944; June 28.
Lindstrom, Robert S., Chicago, Ill. Cement composition. 1,633,790; June 28.
Lisi, Frank A., Philadelphia, Pa. Combined brush and polisher. 1,633,898; June 28.
Little, Arthur D., Inc. (See Stevenson, Earl P., assignor.)
Locomotive Terminal Improvement Company, The. (See Otis, Spencer, assignor.)
Long, George C., Brooklyn, N. Y. Coupling. 1,634,153; June 28.
Long, Henry N., Roanoke, Va., assignor to W. K. Queen, Needham Heights, Mass. Ratchet flange setter. 1,633,819; June 28.
Long, Thomas J., and J. L. Tuttle, Wellington, Kans. Adjustable trunk-rack camping outfit. 1,633,820; June 28.
Long, William R., St. Louis, Mo. Glue. 1,633,840; June 28.
Loomis, Ormond E., Belmont, assignor to Darlo Company, Boston, Mass. Brush attachment for hose. 1,633,643; June 28.
Loose Seat Valve Company. (See Wilson, Wylie G., assignor.)
Lorenz, C., Aktiengesellschaft. (See Vopel, Johannes, assignor.)
Lorenz, William A., assignor to The Otaka Fabric Company, Hartford, Conn. Dispenser box. 1,633,865; June 28.
Lourens, Cornelis, assignor to Naamlooze Vennootschap Algemeene Norit Maatschappij, known as General Norit Company, Limited, Amsterdam, Netherlands. Treating liquids. 1,634,154; June 28.
Luening, Eugene G., Chicago, Ill. Liquefaction of air and separation into oxygen and nitrogen. 1,634,076; June 28.
Lüttringhaus, Arthur, Mannheim, H. Neresheimer, Ludwigshafen-on-the-Rhine, and H. Wolff, Mannheim, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Manufacture of condensation products and dyestuffs of the benzanthrone series. 1,633,866; June 28.
MacBean, Thomas L. (See Herrick, E. A., and MacBean.)
MacClatchie, John W., Compton, Calif. Well-drilling apparatus. 1,633,945; June 28.
MacIndoe, John F., East Falls, Philadelphia, Pa. Lubricator. 1,634,109; June 28.
Mackintosh, John, and Sons, Limited. (See Bradwell, Harry, assignor.)
Madden, Bernard J., Duluth, Minn. Box for pouring steel ingots. 1,633,992; June 28.
Mader, Joseph, assignor, by mesne assignments, to New Beeman Tractor Company, Minneapolis, Minn. Traction-machine hitch for seeders. 1,633,821; June 28.
Mahan, Edward D., and J. I. Mahan, Pittsburgh, Pa. Metallic keg. 1,634,035; June 28.
Mahan, James I. (See Mahan, Edward D., and J. I.)
Manhattan Electrical Supply Company. (See Hendry, William F., assignor.)
Manni, Rudolf, Karlsbad, Czechoslovakia. X-ray screen for taking sklagrams. 1,633,706; June 28.
Mapel, Lewis A., assignor to The Automatic Appliance Company, St. Louis, Mo. Indicating instrument. 1,633,672; June 28.
Mapel, Lewis A., assignor to The Automatic Appliance Company, St. Louis, Mo. Liquid-level gauge. 1,633,673; June 28.
Marbelite Corporation of America. (See Barkschat, Henry, assignor.)
Margerison, W. H. & A. E., & Co. (See Heitland, Wilmot E., assignor.)
Marsh, Howard E., Lompoc, Calif. Windshield wiper. 1,633,597; June 28.
Martinez, Joe M., Detroit, Mich. Cigarette holder. Des. 72,953; June 28.
Martin, Harold S. (See Gell, P. V. W., Gould, Hampton, and Martin.)
Martin, William H., et al. (See Hansen, John, assignor.)
Mas, George N., Washington, D. C. Bottle. Des. 72,954; June 28.
Mas, George N., Washington, D. C. Bottle. Des. 72,955; June 28.
Mas, George N., Washington, D. C. Bottle. Des. 72,956; June 28.
Mas, George N., Washington, D. C. Bottle. Des. 72,957; June 28.
Mas, George N., Washington, D. C. Bottle. Des. 72,958; June 28.
Mas, George N., Washington, D. C. Bottle. Des. 72,959; June 28.
Mas, George N., Washington, D. C. Bottle. Des. 72,960; June 28.
Mas, George N., Washington, D. C. Bottle. Des. 72,961; June 28.
Mas, George N., Washington, D. C. Bottle. Des. 72,962; June 28.
Mas, George N., Washington, D. C. Bottle. Des. 72,963; June 28.
Massolle, Joseph, and J. Engl, Berlin-Grunewald, and H. Vogt, Berlin-Wilmersdorf, Germany, assignors to Tri-Ergon Limited, Zurich, Switzerland. Glow-discharge tube. 1,634,201; June 28.
Matthes, Samuel S., assignor to The Ohio Brass Company, Mansfield, Ohio. Conductor support. 1,633,867; June 28.
Mayer, Max, K. Finckh, and F. Koref, assignors to the Firm Chemische Werke vormals Auergesellschaft m. b. H., Kommanditgesellschaft, Berlin, Germany. Eyeglass. 1,633,946; June 28.
Mayo, Dana H., Detroit, Mich. Baffle for water-tube boilers. 1,634,077; June 28.
McCabe, Hugh, assignor to McCabe Manufacturing Company, Lawrence, Mass. Locomotive boiler. 1,633,993; June 28.
McCabe Manufacturing Company. (See McCabe, Hugh, assignor.)
McCarty, Elbert E., C. C. Dicus, and T. F. Langkop, Bunceton, assignors to O. E. Bradley, Elmo, Mo. Hog conditioner. 1,634,155; June 28.
McClatchie, Stanley, Cambridge, Mass., assignor to The Apex Electrical Manufacturing Company, Cleveland, Ohio. Vacuum-cleaner device. 1,633,598; June 28.
McClintock, O. B., Co. (See Adams, T. C., Noyes, and Lawrence, assignors.)
McCommon, Harry C., Altoona, Pa. Measuring instrument. 1,634,156; June 28.
McCullough, Ira J., Huntington Park, Calif. Bearing mounting. 1,633,994; June 28.
McEwen, Berton A. (See Johnston, Benjamin W., assignor.)
McFaull, Malcolm, and A. E. Rideout, assignors to Standard Sealing Equipment Corporation, New York, N. Y. Carton-handling apparatus. 1,634,078; June 28.
McGuiness, Benjamin F., Grafton, assignor to Crompton & Knowles Loom Works, Worcester, Mass. Auxiliary brake for looms. 1,633,644; June 28.
McIntyre, Patrick J., Detroit, Mich., assignor to Wolverine Tube Company. Radiating device. 1,634,110; June 28.
McKee, Neal T., Bronxville, assignor to The Superheater Company, New York, N. Y. Feed-water-heater arrangement. 1,633,947; June 28.
McKesson, Elmer I., assignor to The Vocophone Company, Toledo, Ohio. Breathing and vocal attachment. 1,633,705; June 28.
McLellan, James H., Vancouver, British Columbia, Canada. Drink-dispensing machine. 1,634,036; June 28.
McQuarrie, Thomas, et al. (See Hansen, John, assignor.)
Meyer, Charles L., assignor to Concrete Engineering Company, Omaha, Nebr. Column clamp. 1,634,111; June 28.
Meyer, Otto W. (See Huber, William, assignor.)
Miller, George F., and F. Keith, Menomonie, Wis.; said Keith assignor to said Miller. Camp stove. 1,633,707; June 28.
Miller, Harry H., assignor to Miller-Smythe Electric Company, Youngstown, Ohio. Power hammer. 1,633,905; June 28.
Miller-Smythe Electric Company. (See Miller, Harry H., assignor.)
Minogue, Roland E., assignor of one-third to H. Vanderwerp, Manitowoc, Wis. Agitator. 1,633,708; June 28.
Minorsky, Nicolas, Philadelphia, Pa., assignor to General Electric Company. System of motor control. 1,633,822; June 28.
Mitchell, Robert C. (See Irvin, Russe J., assignor.)
Modern Utilities Company. (See Frantz, Grover C., assignor.)
Moeller, Max E., Brooklyn, N. Y. Thermometer. 1,633,599; June 28.
Mohn, Rudolf, Sulgen, assignor to W. Muller, Thal, St. Gallen, Switzerland. Machine for closing and sealing envelopes. 1,633,750; June 28.
Molberg, Albin E., Duluth, Minn. Sash adjuster and fastener. 1,633,645; June 28.
Montgomery, Knowlton D., Lansdale, Pa. Grease cup. 1,634,112; June 28.
Moore, Allibelle H., assignor of one-half to V. L. Phillips, Kansas City, Mo. Food product and making same. 1,634,113; June 28.
Moore, Arlington, New York, N. Y., assignor to Moore Inventions Corporation, Worcester, Mass. Internal-combustion-engine decarbonizer. 1,633,791; June 28.
Moore, Charles C., San Francisco, Calif. Sulphurizing, dehydrating, and desulphurizing fruit. 1,633,823; June 28.
Moore Inventions Corporation. (See Moore, Arlington, assignor.)
Morel-Révoil, Jules J. H., Paris, France. Safety device for railways. 1,633,906; June 28.
Morris, Raymond L., assignor to Lewers & Cooke, Ltd., Honolulu, Hawaii. Building block. 1,634,157; June 28.
Mortimer, Stockton H., Philadelphia, Pa. Roller clutch. 1,634,202; June 28.

Moushon, Richard S., Peoria Heights, assignor of one-half to W. G. Hiller, Peoria, Ill. Fireworks holder. 1,634,232; June 28.
Muir, Wellington W., Lockport, N. Y. Piston. 1,634,037; June 28.
Muller, Bruno. (See Jacobsohn, Isaak, assignor.)
Muller, Willy. (See Mohn, Rudolf, assignor.)
Munroe, Treadway B. (See Lathrop, E. C., and Munroe.)
Murphy, John J., Norwich, Conn., assignor, by mesne assignments, to Peerless Handcuff Company. Handcuff. 1,634,114; June 28.
Murphy, Robert S., assignor to The Electrograph Company, Detroit, Mich. Printing press. 1,633,600; June 28.
Murray, Thomas E., Brooklyn, N. Y. Radiator. 1,633,601; June 28.
Murray, Thomas E., Brooklyn, N. Y. Boiler. 1,633,674; June 28.
Mutual Electric and Machine Company. (See Frank, Harrison J. L., assignor.)
Myers, Charles E., Vancouver, Wash. Signaling device. 1,633,808; June 28.
Naamlooze Vennootschap Algemeene Norit Maatschappij. (See Lourens, Cornelis, assignor.)
Narrow, Anton H., Memphis, Tenn. Saw gauge. 1,633,996; June 28.
Nathansohn, Alexander, Bad Harzburg, Germany. Producing lead compounds of chromic acids. 1,633,948; June 28.
National Carbon Company. (See Yngve, Victor, assignor.)
National Concrete Metal Forms Corporation. (See Seelye, Elwyn E., assignor.)
National Electric Door Company. (See Petersen, William G., assignor.)
Naugle, John J., Brooklyn, N. Y. Filtering element. 1,633,709; June 28.
Nawiasky, Paul, Ludwigshafen-on-the-Rhine, K. Zahn, Hochst-on-the-Main, and K. Saurwein, Ludwigshafen-on-the-Rhine, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Manufacture of vat dyestuffs. 1,633,997; June 28.
Nelson, Ernst W., Ong, Nebr. Demountable rim. 1,634,203; June 28.
Neresheimer, Heinrich. (See Lüttringhaus, A., Neresheimer, and Wolff.)
Nesbit, Arthur F., Wilkinsburg, Pa. Dust collector. 1,633,602; June 28.
New Beeman Tractor Company. (See Donald, Forrest V., assignor.)
New Beeman Tractor Company. (See Mader, Joseph, assignor.)
Newman, Isidor, New York, N. Y. Key holder. 1,634,115; June 28.
Newton, Henry, Darley, near Derby, England. Trench mortar and the like. 1,633,710; June 28.
New York Air Brake Company, The. (See Campbell, Charles A., assignor.)
Nickerson, William H., Brookline, Mass. Foot bearing for shoes. 1,634,116; June 28.
Niedergesaess, Wilhelm, Seattle, Wash. Reversible propeller. 1,633,824; June 28.
Nims, Fayette, Montour Falls, N. Y. Snow shovel. 1,634,204; June 28.
Nishi, Tsunegoro, Tokyo-Fu, Japan. Manufacturing wall boards composed of rice hulls and plaster. 1,634,079; June 28.
Noma Electric Corporation. (See Dam, Henry M., assignor.)
Noyes, Harold O. (See Adams, T. C., Noyes, and Lawrence.)
Nyholm, Peter, Edgewood, Wash. Extension table. 1,633,899; June 28.
Nyholm, Peter, Edgewood, Wash. Rovelving-leaf extension table. 1,633,900; June 28.
Nyman, Alexander, Swissvale, Pa., assignor to Westinghouse Electric & Manufacturing Company. Telephone device. 1,633,949; June 28.
Nyman, Alexander, Swissvale, Pa., assignor to Westinghouse Electric & Manufacturing Company. Diaphragm. 1,633,950; June 28.
Ohio Brass Company, The. (See Matthes, Samuel S., assignor.)
Ohio Foundry and Manufacturing Co. (See Sharp, William L., assignor.)
Ohlendorf, Emil F., Moline, Ill. Bumper mechanism. 1,633,901; June 28.
Oil Devices Corporation. (See Breese, James L., jr., assignor.)
Olgay, Albert, Glen Ellyn, assignor to Gaw-O'Hara Envelope Co., Chicago, Ill. Envelope machine. 1,634,080; June 28.
Oliver, Frederick R., Los Angeles, Calif. Coin-controlled actuating mechanism for dispensing machines. 1,633,675; June 28.
Olson, Daniel O. (See Olson, G. E., and Williams.)
Olson, Gus E., and A. J. Williams; said Williams assignor, by mesne assignments, to D. O. Olson, Seattle, Wash. Step ladder. 1,633,902; June 28.
Olson, Raymond E., assignor to Taylor Instrument Companies, Rochester, N. Y. Combined recording and controlling mechanism. 1,634,205; June 28.
Osann, Frederick, Company. (See Sibbald, C. T. A., and Ransom, assignors.)
Otaka Fabric Company. (See Lorenz, William A., assignor.)
Otis, Spencer, Barrington, assignor to The Locomotive Terminal Improvement Company, Chicago, Ill. Automobile bumper. 1,633,603; June 28.
O'Toole, John J., Bellevue, Pa. Floor mat. 1,633,951; June 28.
Owens, John J., Blacksburg, Va. Dishwashing machine. 1,634,038; June 28.
Pacquin, Inc. (See Pogue, George D. and W. V., assignors.)
Page, Herbert E., Syracuse, assignor to United States Hoffman Machinery Corporation, New York, N. Y. Seam opener. 1,634,206; June 28.
Pajeau, Charles H., Glencoe, Ill., assignor to The Toy Tinkers, Inc., Evanston, Ill. Jointed figure toy. Des. 72,964; June 28.
Parenti, Armando, and Giovanni Bolognini, Genoa, Italy. Machine for the manufacture of cork taps. 1,634,040; June 28.
Parker, William S., assignor to Burson Knitting Company, Rockford, Ill. Pattern cylinder for knitting machines. 1,633,676; June 28.
Parkler, Fritz E., Chicago Heights, Ill. Combination clock and scale. 1,634,039; June 28.
Parsch, Maxwell J., Detroit, Mich. Hat stretcher. 1,634,051; June 28.
Patart, Georges L. E., Paris, France. Device for the simultaneous obtainment of the compression and the circulation of gaseous mixtures. 1,633,998; June 28.
Paterson, Orian T. (See Schell, J., and Paterson.)
Pauly, Charles, Port Washington, assignor to Pauly and Pauly Cheese Company, Manitowoc, Wis. Cheese mold. 1,634,041; June 28.
Pauly and Pauly Cheese Company. (See Pauly, Charles, assignor.)
Payne, Oscar V., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Yieldable giveway for weft-replenishing looms. 1,633,646; June 28.
Peerless Handcuff Company. (See Murphy, John J., assignor.)
Peeters, Henry, Warcoing, Belgium. Typewriter. 1,634,042; June 28.
Pelouze Manufacturing Co. (See Schultz, Frank A., assignor.)
Perrin, Frank N., Detroit, Mich. Protractor drawing instrument. 1,633,903; June 28.
Pete, Clayton F. (See Pete, George M. and C. F.)
Pete, George M and C. F., Toledo, Ohio. Towrope. 1,633,792; June 28.
Petersen, Hans, assignor to W. H. Schafer, Minneapolis, Minn. Collapsible berry box. 1,633,904; June 28.
Petersen, William G., assignor to National Electric Door Company, Portland, Oreg. Door-opening device. 1,634,233; June 28.
Peterson, Pete, Monroe, Wash. Switch-operating mechanism. 1,633,869; June 28.
Peterson, William J., Minot, N. Dak., assignor of one-half to O. H. Larson, Minneapolis, Minn. Cover for timer wires. 1,634,117; June 28.
Philadelphia Drying Machinery Company, The. (See Sibson, Walter W., assignor.)
Phillips, David, Daytona Beach, Fla. Astronomical device. 1,634,207; June 28.
Phillips, Victor L. (See Moore, Allibelle H., assignor.)
Pierce, George, Montreal, Quebec, Canada. Vehicle headlight. 1,634,043; June 28.
Pierce, George, Montreal, Quebec, Canada. Headlight-dipping mechanism. 1,634,044; June 28.
Pierce, Walter H., assignor to Carr Fastener Company, Cambridge, Mass. Fastener stud. 1,634,234; June 28.
Pierson, Robert M. (See Bauman, H. A., and Pierson.)
Pilon, Hector P., Paris, France. Electric relay for radiography. 1,634,208; June 28.
Pines Manufacturing Company. (See Raleigh, James F., assignor.)
Pinet, Andre L. (See Polnaszek, John P., assignor.)
Pogue, George D. and W. V., Mount Vernon, N. Y., assignors to Pacquin, Inc., New York, N. Y. Telephone index. 1,633,952; June 28.
Pogue, Webster V. (See Pogue, George D. and W. V.)
Polnaszek, John P., Minneapolis, assignor of one-half to A. L. Pinet, Robbinsdale, Minn. Grain-car structure. 1,634,118; June 28.
Pondelicek, William P. (See Zoufal, Frank, assignor.)
Pontious, John D., assignor of one-half to L. Pontious, Hammond, Ind. Amusement apparatus. 1,633,751; June 28.
Pontious, Lizzie. (See Pontious, John D., assignor.)
Poole Engineering & Machine Company. (See Davison, Clarence M., assignor.)
Porst, Frederic, Chicago, Ill., assignor to Hardinge Brothers, Inc. Gear pump. 1,633,783; June 28.
Porter, William A., assignor of one-half to W. V. Scanlan, Brisbane, Queensland, Australia. Apparatus for making hollow bends, angles, or such like bodies of concrete or other material. 1,634,045; June 28.
Potter, Earl F., Glencoe, assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Condenser. 1,633,870; June 28.
Powers Regulator Company, The. (See Klages, Frank E. P., assignor.)

Prescott, Arthur C., East Orange, N. J., assignor to General Electric Company. Reversing controller. 1,633,825; June 28.

Preston, Robert, Mangapapa, Gisborne, New Zealand. Milk appliance for use with milking machines. 1,633,953; June 28.

Prince, Robert K., Westfield, Mass., assignor to Vitamin Food Co., Inc., New York, N. Y. Vitamine food product and method. 1,633,711; June 28.

Procter, Joseph H., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Waffle iron. 1,633,954; June 28.

Prudden, Theodore M., Hingham, assignor to Kalix Cup Company, Boston, Mass. Container and cover therefor. 1,633,605; June 28.

Prutzman, Paul W., Los Angeles, assignor, by mesne assignments, to Contact Filtration Company, San Francisco, Calif. Revivifying spent adsorbents for oil treatments. 1,633,871; June 28.

Pumphrey, William B., Sequoia, Calif. Filtering device. 1,633,604; June 28.

Purcell, Francis A., Brooklyn, N. Y. Automobile signal device. 1,633,677; June 28.

Putnam, George E., Fullerton, Calif. Valve-seat retainer. 1,634,081; June 28.

Qucen, Walter K. (See Long, Henry N., assignor.)

Rackstraw, Albert V., Los Angeles, Calif. Boring-machine head. 1,633,752; June 28.

Raleigh, James F., assignor to Pines Manufacturing Company, Chicago, Ill. Shutter apparatus for radiators. 1,633,794; June 28.

Ralph, Paul J. (See Alsberg, J., and Ralph.)

Ramos, Jose B., Habana, Cuba. Farming implement. 1,633,905; June 28.

Ranney, Leo, Jacksboro, Tex., assignor to Standard Development Company. Method of and apparatus for recovering oil. 1,634,235; June 28.

Ranney, Leo, Jacksboro, Tex., assignor to Standard Development Company. Method of and apparatus for recovering oil. 1,634,236; June 28.

Ransom, John B. (See Sibbald, C. T. A., and Ransom.)

Ray, Arthur J., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Elapsed-time and zone metering. 1,633,678; June 28.

Ray, Matt, Arkadelphia, Ark. Insect-destroying device. 1,633,753; June 28.

Reece Folding Machine Company. (See Dixon, Walter L., assignor.)

Reiber, Oscar C., West Webster, N. Y. Bird house. 1,634,209; June 28.

Reilly, Alfred F., Attleboro, assignor to Evans Case Company, North Attleboro, Mass. Pocket lighter. Des. 72,965; June 28.

Reisz, Eugen, Berlin-Dahlem, Germany. Diaphragmless microphone. 1,634,210; June 28.

Reliance Storage and Warehouse Company. (See Sinclair, Cyril G., assignor.)

Reynolds Spring Company. (See Ile, William, assignor.)

Ribi, Catharina. (See Ribi, Max, assignor.)

Ribi, Max, assignor to C. Ribi, Zurich, Switzerland. Ice-making machine. 1,633,712; June 28.

Rideout, Arthur E. (See McFaull, M., and Rideout.)

Riehl, Robert, St. Louis, Mo. Vehicle wheel. 1,633,606; June 28.

Riesebeck, Curt, Berlin-Friedenau, Germany. Elastic tire. 1,633,999; June 28.

Rigby, Charles, Cincinnati, Ohio. Golf club. 1,634,082; June 28.

Rigg, Gilbert. (See Gepp, H. W., Hey, Rigg, Stevens, and Williams.)

Rippey, Hugh F., assignor to I. F. Laucks, Inc., Seattle, Wash. Producing crackers and the products of said process. 1,633,872; June 28.

Roberts, George D., Hartford, Conn. Condenser for automobile radiators. 1,634,211; June 28.

Robertson, Douglas, Nuriootpa, Australia. Attachment of motor-vehicle road springs. 1,634,158; June 28.

Robinson, Douglas G., Weymouth, assignor of one-half to W. S. Collins, London, England. Electrical fuse. 1,633,955; June 28.

Robinson, Joseph, New York, N. Y. Automatic train-pipe coupling. 1,633,679; June 28.

Rodger Ballast Car Company. (See Hoscelt, W. J., and Hindahl, assignors.)

Rodman, Clarence J., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Preventing acidity in oils. 1,633,956; June 28.

Rogerson, Grace, assignor of one-third to O. Shank, Jasonville, Ind. Machine spring. 1,634,212; June 28.

Rookwood, James W., Mountain View, Okla. Seeder. 1,634,213; June 28.

Rosat, Charles, Boudry, assignor to Fabriques des Montres Zenith, successeur de Fabriques des Montres Zenith Georges Favre-Tacot & Co., Le Locle, Switzerland. Assembling device for bridges, plates, and the like in timepiece movements, counting mechanisms, and like apparatus. 1,634,214; June 28.

Rose, L. W., et al. (See Weisgerber, Henry D., assignor.)

Rosenbaum, Lester F., assignor to Sam Rosenbaum & Sons Company, Kalamazoo, Mich. Knickerbockers. 1,633,607; June 28.

Rosenbaum, Sam, & Sons Company. (See Rosenbaum, Lester F., assignor.)

Rosenfeld, Louis, assignor to Cherry-Bassett Company, Baltimore, Md. Bottle washing and sterilizing apparatus. 1,634,215; June 28.

Rosin, Florence M., Philadelphia, Pa. Tray. Des. 72,966; June 28.

Ross, Homer B. (See Benham, R. E., and Ross.)

Roučka, Erich, Blansko, Czechoslovakia. Compound system for transmitting a plurality of values. 1,633,713; June 28.

Row, William, Melbourne, Victoria, Australia. Electrical dimmer switch. 1,633,647; June 28.

Ruda Manufacturing Company. (See Boucek, Charles F., assignor.)

Ruder, William E., Schenectady, N. Y., assignor to General Electric Company. Alloy. 1,633,826; June 28.

Rusby, Hermann. (See Fletcher, G. H., and Rusby.)

Russell, Robert A., Rustburg, Va. Road scraper. 1,634,216; June 28.

Rutenber, Elwin A., assignor to A. J. Lindemann & Hoverson Company, Milwaukee, Wis. Timer for electrically-operated devices. 1,634,083; June 28.

Ruths, Johannes, Djursholm, assignor to Aktiebolaget Vaporackumulator, Stockholm, Sweden. Support. 1,634,084; June 28.

Ryan, Commodore D. (See Ryan, Theodore J. and C. D.)

Ryan, Joseph F., Chicago, Ill. Oil-well-regulation method and means. 1,634,085; June 28.

Ryan, Theodore J. and C. D., Los Angeles, Calif. Frictional hinge device. 1,634,052; June 28.

Rylander, Parrish H., et al. (See Rylander, William P., assignor.)

Rylander, William P., assignor of one-third to T. F. Caldwell, Austin, and one-third to P. H. Rylander, San Antonio, Tex. Storage and display apparatus for merchandise. 1,633,907; June 28.

Ryon, Eppa H., Waltham, assignor to Crompton & Knowles Loom Works, Worcester, Mass. Shuttle placer for weft-replenishing looms. 1,633,648; June 28.

Sanborn, George H., Malden, Mass. Automatic train-control device. 1,634,119; June 28.

Sartakoff, Jack D., assignor of one-half to Khetah Corporation, New York, N. Y. Signal for fuel-supply systems. 1,633,608; June 28.

Saurwein, Karl. (See Nawiasky, P., Zahn, and Saurwein.)

Scanlan, William V. (See Porter, William A., assignor.)

Schafer, William H. (See Petersen, Hans, assignor.)

Schatz, Herman A. (See Smith, William F., assignor.)

Schell, Jefferson, and O. T. Paterson, Ottawa, Ontario, Canada. Attachment for paper machines. 1,634,159; June 28.

Schimpf, George C., assignor to H. D. Harvey, Baltimore, Md. Dross furnace. 1,634,217; June 28.

Schleicher, Frank J., St. Louis, Mo. Box. Des. 72,967; June 28.

Schleter, George H., Swissvale, Pa., assignor to Westinghouse Electric & Manufacturing Company. Fan. 1,633,957; June 28.

Schlosser Brothers. (See Schlosser, John J., assignor.)

Schlosser, John J., assignor to Schlosser Brothers, Frankfort, Ind. Temperature control. 1,633,680; June 28.

Schmidt, Henry F., Swarthmore, Pa., assignor to Westinghouse Electric and Manufacturing Company. Radial-flow pump. 1,633,609; June 28.

Schmidt, William F., assignor to The All-Metal Products Company, Wyandotte, Mich. Spring gun. 1,633,795; June 28.

Schmitt, Robert. (See Zitscher, A., and Schmitt.)

Schneider, Alexander M., assignor to G. Sperling, New York, N. Y. Nether garment. 1,633,610; June 28.

Schneider, Hermann. (See Straub, F., and Schneider.)

Schnepp, Louis W., Huntington Beach, assignor to First National Bank of Anaheim, trustee for Snap-O-Stat Company, Anaheim, Calif. Thermostatic valve. 1,633,908; June 28.

Schoeller, Walter. (See Feldt, A., Schoeller, and Borgwardt.)

Schrade, George, Bridgeport, Conn. Ink eraser. 1,634,120; June 28.

Schrader, Ernest C., assignor to Economy Glass Company, Morgantown, W. Va. Goblet or similar article. Des. 72,968; June 28.

Schrott, Robert W., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Grinding gears. 1,633,958; June 28.

Schuftan, Richard, Wilmersdorf, near Berlin, Germany. Fastener particularly for bandages. 1,633,681; June 28.

Schultz, Frank A., assignor to Pelouze Manufacturing Co., Chicago, Ill. Scale casing. Des. 72,969; June 28.

Schussler, Walter H., Philadelphia, Pa., assignor to Universal Tobacco Machine Company, Newark, N. J. Cigar-band feeding and moistening machine. 1,634,053; June 28.

Schuster, Karl R., Hopatcong, N. J. Concrete mixer. 1,633,682; June 28.

Schwartz, George L., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Cellulose-ester composition. 1,633,683; June 28.

Schwob, Alexandre, Paris, France. Universal and automatic machine tool. 1,633,714; June 28.

Scott, Allison F. H. (See Kogstrom, Axel W., assignor.)

Scott Paper Company. (See Liebeck, Harry, assignor.)

Scoville, Eugene M., Milwaukee, Wis., assignor of one-half to F. L. Swanberg, Pittsburgh, Pa. Strainer. 1,634,086; June 28.

Sederholm, John E., St. Paul, Minn., assignor to American Hoist & Derrick Co. Interlocking switch mechanism. 1,634,121; June 28.

Seelye, Elwyn E., assignor of one-half to National Concrete Metal Forms Corporation, New York, N. Y. Concrete form for building construction. 1,633,715; June 28.

Seiberling Rubber Company. (See Kilborn, K. B., and Wolfe, assignors.)

Semple, Charles H., Youngstown, assignor to Semple-Lee Processes, Inc., Akron, Ohio. Manufacturing inner tubes. 1,634,160; June 28.

Semple, Charles H., Canton, assignor to Semple-Lee Processes, Inc., Akron, Ohio. Inner tube for automobile tires. 1,634,161; June 28.

Semple-Lee Processes, Inc. (See Semple, Charles H., assignor.)

Sengebusch, Hans, assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Automatic telephone-switching apparatus. 1,633,684; June 28.

Shanck, Roy B., Woodside, N. Y., assignor to American Telephone and Telegraph Company. Preventing electrical interference. 1,633,611; June 28.

Shank, Oliver. (See Rogerson, Grace, assignor.)

Sharp, William L., assignor to The Ohio Foundry and Manufacturing Co., Steubenville, Ohio. Gas heater. Des. 72,970; June 28.

Sharples Specialty Company, The. (See Jones, Leo D., assignor.)

Sharples Specialty Company, The. (See Jones, L. D., and Ayres, assignors.)

Sheldon, Waldo, Greenwich, Conn. Drilling apparatus. 1,634,087; June 28.

Shore, William E., Staten Island, N. Y. Internal-combustion engine. 1,633,909; June 28.

Short, Albert E., and H. O., and A. Gouge, Rochester, England. Air propeller. 1,633,612; June 28.

Short, Hugh O. (See Short, Albert E. and H. O., and Gouge.)

Showalter, Andro E., and J. W. Johnson, Richvalley, Ind. Shaft-adjusting mechanism. 1,633,910; June 28.

Shreve, Emit T. (See Kinkaid, C. R., and Shreve.)

Sibbald, Charles T. A., and J. B. Ransom, Troy, assignors, by mesne assignments, to Frederick Osann Company, New York, N. Y. Button-sewing machine. 1,633,613; June 28.

Sibbald, Charles T. A., and J. B. Ransom, Troy, assignors, by mesne assignments, to Frederick Osann Company, New York, N. Y. Sewing on buttons. 1,633,614; June 28.

Sibson, Walter W., assignor to The Philadelphia Drying Machinery Company, Philadelphia, Pa. Hosiery-drying machine. 1,634,237; June 28.

Sickle, Jacob M. (See Westerberg, A. M., and Sickle.)

Sidebotham, Melvin H. (See La Bombard, L. E., and Sidebotham.)

Sieg, Karl, Brooklawn, assignor to Samuel M. Langston Company, Camden, N. J. Sheet-feeding mechanism. 1,634,088; June 28.

Siegel, Samuel, New York, N. Y., assignor to Aerovox Wireless Corporation. Connecter for radioreceivers. 1,633,827; June 28.

Silent, Harold C., Brooklyn, N. Y., assignor to American Telephone and Telegraph Company. Delay circuits for voice-operated devices. 1,633,615; June 28.

Simplex Player Action Co. (See Brown, Theodore P., assignor.)

Sinclair, Cyril G., Toronto, Ontario, Canada, assignor by mesne assignments, to Reliance Storage and Warehouse Company, Detroit, Mich. Washing machine. 1,633,796; June 28.

Sinclair, Cyril G., Toronto, Ontario, Canada, assignor, by mesne assignments, to Reliance Storage and Warehouse Company, Detroit, Mich. Washing machine. 1,634,238; June 28.

Sinclair, Peter S., Holyoke, Mass. Burner for hot-water heaters. 1,633,716; June 28.

Slate, Thomas B., assignor, by mesne assignments, to International Patents Fiscal Corporation, New York, N. Y. Carbonating apparatus. 1,634,089; June 28.

Sloan, Harry E., assignor to The Cushman Chuck Company, Hartford, Conn. Chuck. 1,633,828; June 28.

Small, Adina, New York, N. Y. Table. 1,634,218; June 28.

Smart, Russel S., Ottawa, Ontario, Canada, assignor to Johnston, Dryden & Co., Incorporated, New York, N. Y. Electric heater. 1,634,046; June 28.

Smily, Walter E., and T. Hannah, Pittsburgh, Pa., and M. E. Winans, Irvington, N. J.; said Hannah and Winans assignors to said Smily. Calendar bank. 1,633,873; June 28.

Smith, George I., Los Angeles, Calif. Mold. 1,634,047; June 28.

Smith, Maurice R. (See Wilford, Edward B., assignor.)

Smith, Oliver P., Portland, Oreg. Grain-reducing machine. 1,634,219; June 28.

Smith, William F., assignor of one-half to H. A. Schatz, Ponghkeepsie, N. Y. Exhaust manifold and muffler. 1,634,000; June 28.

Smolczyk, Eduard, Biesdorf-Sud, near Berlin, Germany. Imparting to drying means a large superficial area. 1,633,959; June 28.

Society of Chemical Industry in Basle. (See Straub, F., and Schneider, assignors.)

Sokol, Frances, Chelsea, Iowa. Barrette. 1,633,616; June 28.

Soliani, Nabor, assignor to "Ansaldo" Societa Anonima, Genoa, Italy. Internal structure for large submarines with twin-screw propellers. 1,634,220; June 28.

Somerville, Albert A., Flushing, assignor of two-thirds to R. T. Vanderbilt Company, Incorporated, New York, N. Y. Petroleum-oil composition. 1,634,054; June 28.

Soule, Roe T. (See Ireland, G. B., and Soule.)

Specialty Automatic Machine Company. (See La Bombard, L. E., and Sidebotham, assignors.)

Sperling, G. (See Schneider, Alexander M., assignor.)

Staege, Stephen A., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Paper-making device. 1,633,960; June 28.

Standard Development Company. (See Ranney, Leo, assignor.)

Standard Manufacturing Company, The. (See Young, James V., assignor.)

Standard Sealing Equipment Corporation. (See McFaull, M., and Rideout, assignors.)

Star Chandelier Co. (See Boehringer, John A., assignor.)

Star, Wyatt C., Lake Wales, Fla. Flexible-tread wheel. 1,634,048; June 28.

Stark, Charles W., Trenton, N. J. Building structure comprising water receptors. 1,633,685; June 28.

Stark, Rawson E., assignor to The Stibium Products Company, Elyria, Ohio. Making precipitated antimony sulphide. 1,633,754; June 28.

Steele, Roscoe, Rockaway, N. J., assignor to Wirebounds Patents Company. Machine for use in making boxes. 1,634,049; June 28.

Steller, Arthur, assignor to Allsopp Bros., Newark, N. J. Ring. Des. 72,971; June 28.

Stern, Maximilian, New York, N. Y. Diathermic electrode. 1,633,649; June 28.

Stevens, Royale H. (See Gepp, H. W., Hey, Rigg, Stevens, and Williams.)

Stevenson, Earl P., Newton, assignor to Arthur D. Little, Inc., Cambridge, Mass. Producing sodium fluoride. 1,634,122; June 28.

Stibium Products Company, The. (See Stark, Rawson E., assignor.)

Still, Elmer G., Livermore, Calif. Aviation device. 1,634,239; June 28.

Stock Motorpflug Aktiengesellschaft. (See Jereczek, Viktor, assignor.)

Stockade Building System, Inc. (See Hewlett, J. M., and Fuller, assignors.)

Stockholders Syndicate. (See Blumenberg, Henry, jr., assignor.)

Stockman, Maxwell, Kansas City, Mo. Radiator cap. Des. 72,972; June 28.

Stone, Andrew J., Paris, France. Golf tee. 1,633,686; June 28.

Straight, Halver R., Adel, Iowa. Tunnel kiln. 1,633,829; June 28.

Straub, Fritz, Basel, and H. Schneider, Riehen, near Basel, assignors to Society of Chemical Industry in Basle, Basel, Switzerland. Chromable azo dyestuffs derived from formaldehyde sulphurous acid and nitrated 1-(azo naphthol)-2-hydroxy-naphthalene-4-sulphonic acid and making same. 1,633,874; June 28.

Sturgis, Herbert M., Kansas City, Mo. Mop. 1,633,830; June 28.

Subert, Josef, Oak Park, Ill. Chimney-draft regulator. 1,633,687; June 28.

Sullivan Machinery Company. (See Blom, Hjalmar T., assignor.)

Sullivan Machinery Company. (See Clapp, Lewis J., assignor.)

Sullivan Machinery Company. (See Halleck, Frank A., assignor.)

Sullivan Machinery Company. (See Halvorsen, Halbert B., assignor.)

Sun-Ray Lighting Products Co. (See Jaret, Joseph T., assignor.)

Superheater Company, The. (See Broido, Benjamin, assignor.)

Superheater Company, The. (See McKee, Neal T., assignor.)

Super-Rubber Lining Corporation. (See Leoni, Hugo, assignor.)

Sutcliffe, Arthur G. (See Frank, J. M., and Sutcliffe.)

Sutton, William S., Rockford, Ill. Rheostat. 1,634,050; June 28.

Swanberg, Floyd L. (See Scoville, Eugene M., assignor.)

Sweeney, Ulysses G., Mount Bullion, Calif. Combined caliper and divider. 1,633,875; June 28.

Sweeting, Earl R., New York, N. Y. Umbrella attachment. 1,633,961; June 28.

Swigert, Ernest G., Portland, Oreg. Cast-steel ladle. 1,633,876; June 28.

Symington Company, The. (See Kadel, Byers W., assignor.)

Taaffe, George R., assignor to United Iron Works, Inc., Joplin, Mo. Adjustable bearing mechanism for drums, sleeves, and the like. 1,633,797; June 28.

Tabulating Machine Company, The. (See Ford, Eugene A., assignor.)

Tagliani, Giovanni, assignor, by mesne assignments, to Chemical Works, formerly Sandoz, Basel, Switzerland. Treating cotton or other threads containing cellulose. 1,633,617; June 28.
Tammen, Henry C. (See Ash, L. R., Tammen, and Hunter.)
Taniguchi, Kumazo, Kingsburg, Calif. Submarine life-saving device. 1,634,055; June 28.
Taub, Alex, assignor to General Motors Corporation, Detroit, Mich. Oiling system for internal-combustion engines. 1,634,123; June 28.
Taylor Instrument Companies. (See Ireland, G. B., and Soule, assignors.)
Taylor Instrument Companies. (See Olson, Raymond E., assignor.)
Taylor, James A., Portland, Me. Connecting tubes. 1,633,798; June 28.
Taylor, James H., Oak Park, Ill. Steam boiler. 1,634,056; June 28.
Taylor, James H., Oak Park, Ill. Machine for shaping pipes. 1,634,057; June 28.
Teague, Merwyn C., Jackson Heights, N. Y., assignor to American Rubber Company, East Cambridge, Mass. Thickening and stabilizing latex and product. 1,634,124; June 28.
Teragawa, Takeo, Los Angeles, Calif. Dental vibratory matrix. 1,634,058; June 28.
Teragawa, Takeo, Los Angeles, Calif. Dental vibratory matrix. 1,634,059; June 28.
Terrisse, Henri, and M. Levy, Geneva, Switzerland. Recovering hydrochloric acid. 1,633,877; June 28.
Tesk, John A., Chicago, Ill. Bracket. 1,634,162; June 28.
Texas Company, The. (See Wolcott, Edson R., assignor.)
Thnete, Maximilian W., Denver, Colo. Waste receiver. 1,633,688; June 28.
Thal, Adolph F., Chicago, Ill. Treating soap. 1,633,689; June 28.
Thomas, George E., Philadelphia, Pa. Fermentation apparatus. 1,633,618; June 28.
Thomas, Thomas H., Edgewood, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Train-control device. Re16,663; June 28.
Thompson, Louis W., Schenectady, N. Y., assignor to General Electric Company. Regulating system. 1,633,831; June 28.
Timbs, Edward, Los Angeles, assignor to Union Tool Company, Torrance, Calif. Underreamer. 1,634,001; June 28.
Todd, Ralph R. (See Lannon, J. D., and Todd.)
Tom, Willem, Katwijk aan Zee, Netherlands. Composition for impregnating fibrous materials. 1,634,002; June 28.
Tourist Supply Company. (See Gilmore, Lou S., assignor.)
Tournier, Julius C., Schenectady, N. Y., assignor to General Electric Company. Fuse plug. 1,633,832; June 28.
Townsend, George R., Schenectady, N. Y., assignor to General Electric Company. Motor controller. 1,633,833; June 28.
Toy Tinkers, Inc. (See Pajeau, Charles H., assignor.)
Toyoda, Kiichiro, Nagoya, Japan. Shuttle-changing apparatus for automatic looms. 1,633,962; June 28.
Tressler, Donald K., Pittsburgh, Pa., assignor to Larrowe Construction Company, Detroit, Mich. Manufacture of betaine hydrochloride, etc. 1,634,221; June 28.
Tressler, Donald K., Pittsburgh, Pa., assignor to Larrowe Construction Company, Detroit, Mich. Preparing betaine hydrochloride. 1,634,222; June 28.
Tri-Ergon Limited. (See Massolle, J., Engl, and Vogt, assignors.)
Trollinger, George M., Shelburn, Oreg. Thermostatic lamp regulator. 1,634,003; June 28.
Trussell, Clarence D., assignor to Trussell Manufacturing Company, Poughkeepsie, N. Y. Loose-leaf binder. 1,634,125; June 28.
Trussell Manufacturing Company. (See Trussell, Clarence D., assignor.)
Turner, Robert, et al. (See Lindsey, George C., assignor.)
Tuthill, J. B. (See Wilsey, Irven H., assignor.)
Tuttle, James L. (See Long, T. J., and Tuttle.)
Twin High Transmission Company. (See Bethune, J., and Van Roo, assignors.)
Tyler, Herbert B., Valparaiso, Ind. Automobile heater. 1,633,717; June 28.
Tyra, F. L. (See Tyra, Rudolph K., assignor.)
Tyra, Rudolph K., assignor to F. L. Tyra, Minneapolis, Minn. Shingle. 1,634,126; June 28.
Uhlik, John L., Los Angeles, Calif. Universal fruit-tree-prop. line support. 1,634,004; June 28.
Union Tool Company. (See Timbs, Edward, assignor.)
United Iron Works, Inc. (See Taaffe, George R., assignor.)
United Shoe Machinery Corporation. (See Frye, Robert P., assignor.)
United States Hoffman Machinery Corporation. (See Page, Herbert E., assignor.)
Universal Tobacco Machine Company. (See Schussler, Walter H., assignor.)
Unwin, Kenneth J., Shrewsbury, assignor to Crompton & Knowles Loom Works, Worcester, Mass. Multiple-needle detector for looms. 1,633,650; June 28.
Unwin, Kenneth J., Shrewsbury, assignor to Crompton & Knowles Loom Works, Worcester, Mass. Weight-controlled detector for looms. 1,633,651; June 28.
Valtulis, Charles, Detroit, Mich. Toothbrush holder. 1,633,834; June 28.
Van Ackeren, Joseph, assignor to The Koppers Company, Pittsburgh, Pa. Coking retort oven. 1,633,911; June 28.
Van Degrift, Thomas C. (See Lee, C. L., and Van Degrift.)
Vanderbilt, R. T., Company. (See Somerville, Albert A., assignor.)
Vanderwerp, Henry. (See Minogue, Roland E., assignor.)
Van Roo, Elizabeth F., executrix. (See Bethune, J., and Van Roo.)
Van Roo, Jacob G. (See Bethune, J., and Van Roo.)
Vawter, Charles E., Philadelphia, Pa., assignor to Weston Electrical Instrument Corporation, Newark, N. J. Indicating ohmmeter. 1,633,912; June 28.
Vitamin Food Co. (See Prince, Robert K., assignor.)
Vocophone Company, The. (See McKesson, Elmer I., assignor.)
Vogt, Hans. (See Massolle, J., Engl, and Vogt.)
Vold, Lars H., and K. R. Hammerstrom, Butler, Pa. Spacing mechanism for punching machines. 1,633,718; June 28.
Vopel, Johannes, Berlin, Neukolln, assignor to C. Lorenz Aktiengesellschaft, Berlin-Tempelhof, Germany. Carrier-frequency telegraph system. 1,634,060; June 28.
Waddingham, Arthur G., Jackson Heights, assignor to Color Cinema Productions, Inc., New York, N. Y. Photographic transparency and coloring same. 1,633,652; June 28.
Wagner, Norman, Hamilton, Ontario, Canada. Structural-steel joist. 1,634,127; June 28.
Wakefield, Walter H., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Filling stop motion for looms. 1,633,653; June 28.
Wakefield, Walter H., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Chain control for Axminster looms. 1,633,654; June 28.
Walker, Maurice S., Brookline, Mass. Bottle. Des. 72,973; June 28.
Wallerich, George W., Chicago, Ill. Electrical therapeutic device. 1,633,878; June 28.
Walter, Harrison B., assignor to Container Corporation of America, Chicago, Ill. Hand-operated creasing device. 1,633,655; June 28.
Ward, John, Watauga Falls, N. C. Fence. 1,633,619; June 28.
Warner, William W., Middletown, Ohio. Skater's article. 1,634,001; June 28.
Wass, August, Mellerud, Sweden. Rail joint. 1,633,790; June 28.
Watson, John W. and R. A., Wayne, Pa. Spring boot. 1,634,163; June 28.
Watson, Richard A. (See Watson, John W. and R. A.)
Weaver, Otto T., Dormont, Pa. Toy. 1,634,223; June 28.
Weedon, Hugh H. (See Colley, George F., assignor.)
Weigel, Daniel M., Trenton, N. J., assignor, by mesne assignments to The American Wire Cord Tire Company, Wilmington, Del. Pneumatic tire. 1,633,963; June 28.
Weisgerber, Henry D., Wheeling, W. Va., assignor of one-fourth to V. P. Wendle and one-fourth to L. W. Rose, Dover, Ohio. Roll polisher. 1,634,005; June 28.
Wellert, Anton, Binghamton, N. Y. Vehicle signal. 1,633,964; June 28.
Wendle, V. P., et al. (See Weisgerber, Henry D., assignor.)
Wensley, Roy J., Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company. Motor-starting system. 1,633,965; June 28.
Wenzel, Henry O., Michigan City, Ind. End gate. 1,634,224; June 28.
Wessman, Edwin G. (See Dawson, C. F., and Wessman.)
Westerberg, Axel M., and J. M. Sickle, New York, N. Y. Knee clamp. 1,634,164; June 28.
Western Electric Company. (See Franks, Clem H., assignor.)
Western Electric Company. (See Hart, Carl D., assignor.)
Western Electric Company. (See Lamplough, Leslie F., assignor.)
Westinghouse Air Brake Company, The. (See Aikman, Burton S., assignor.)
Westinghouse Air Brake Company, The. (See Craig, John F., assignor.)
Westinghouse Air Brake Company, The. (See Farmer, Clyde C., assignor.)
Westinghouse Air Brake Company, The. (See Thomas, Thomas H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Aalborg, Christian, assignor.)
Westinghouse Electric & Manufacturing Company. (See Baxter, Harold G., assignor.)
Westinghouse Electric & Manufacturing Company. (See Breisch, Edgar W., assignor.)
Westinghouse Electric & Manufacturing Company. (See Brown, Arthur L., assignor.)
Westinghouse Electric & Manufacturing Company. (See Crabbs, Herbert J., assignor.)
Westinghouse Electric & Manufacturing Company. (See Falknor, Frank B., assignor.)
Westinghouse Electric & Manufacturing Company. (See Fletcher, G. H., and Rusby, assignors.)
Westinghouse Electric & Manufacturing Company. (See Goodwin, Walter C., assignor.)

Westinghouse Electric & Manufacturing Company. (See Johnson, Clarence A., assignor.)
Westinghouse Electric & Manufacturing Company. (See Nyman, Alexander, assignor.)
Westinghouse Electric & Manufacturing Company. (See Procter, Joseph H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Rodman, Clarence J., assignor.)
Westinghouse Electric & Manufacturing Company. (See Schieter, George H., assignor.)
Westinghouse Electric and Manufacturing Company. (See Schmidt, Henry F., assignor.)
Westinghouse Electric & Manufacturing Company. (See Schrott, Robert W., assignor.)
Westinghouse Electric & Manufacturing Company. (See Staege, Stephen A., assignor.)
Westinghouse Electric & Manufacturing Company. (See Wensley, Roy J., assignor.)
Westinghouse Electric & Manufacturing Company. (See Woodson, James C., assignor.)
Weston Electrical Instrument Corporation. (See Vawter, Charles E., assignor.)
Whitehead & Hoag Company, The. (See Day, James C., assignor.)
Wiese, Henry, Anderson, Ind. Airplane. 1,633,719; June 28.
Wilcox, Fred A., La Porte, Ind. Dishwashing device. 1,633,800; June 28.
Wilford, Edward B., Philadelphia, Pa., assignor of one-fourth to M. R. Smith, Kansas City, Mo. Insurance-policy form. 1,634,240; June 28.
Wille, Eduard, Cronenberg, Germany. Screw cutter. 1,633,913; June 28.
Williams, Alfred J. (See Olson, G. E., and Williams.)
Williams, Maude S., Los Angeles, Calif. Electric heating appliance. 1,633,801; June 28.
Williams, Rowland T. D. (See Gepp, H. W., Hey, Rigg Stevens, and Williams.)
Williams, William E., Roosevelt, N. Y. Electric gasoline gauge. 1,634,165; June 28.
Williamson, Bert R., Fairfield, assignor to Keyes Fibre Company, Waterville, Me. Apparatus for molding articles from pulp. 1,634,128; June 28.
Willis, Orvis C., and O. Cox, Cotton Valley, La. Wrist pin. 1,634,166; June 28.
Wilsey, Irven H., assignor to J. B. Tuthill, Chicago, Ill. Pump. 1,633,720; June 28.
Wilson, George A., Greenwood, Miss. Electrical generating apparatus for airplanes. 1,634,167; June 28.
Wilson, William, Brooklyn, N. Y. Compressor apparatus. 1,634,062; June 28.
Wilson, Wylie G., Elizabeth, N. J., assignor to Loose Seat Valve Company, Dover, Del. Nonrevoluble valve. 1,633,690; June 28.
Winans, Milton E. (See Smily, W. E., Hannah, and Winans.)
Winc, William E., Toledo, Ohio. Door mechanism for railway cars. 1,634,225; June 28.
Wirebounds Patents Company. (See Steele, Roscoe, assignor.)
Wolcott, Edson R., Los Angeles, Calif., assignor, by mesne assignments, to The Texas Company, New York, N. Y. Aluminum-chloride production. 1,633,835; June 28.
Wolf, Franz, New York, N. Y. Fastener. 1,633,966; June 28.
Wolfe, William S. (See Kilborn, K. B., and Wolfe.)
Wolff, Hugo. (See Lüttringhaus, A., Neresheimer, and Wolff.)
Wolkogon-Wolynski, Paul, Bielefeld, Germany. Cutting machine. 1,633,755; June 28.
Wolverine Tube Company. (See McIntyre, Patrick J., assignor.)
Woodruff, Frank. (See Foster, J. R., and Woodruff.)
Woodson, James C., East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electric furnace. 1,633,967; June 28.
Wright, Edward S., Glendale, Calif. Rake attachment for lawn mowers. 1,633,802; June 28.
Wüstenhöfer, Julius, Dortmund, Germany. Safety catch for elevators, lifts, or the like. 1,633,836; June 28.
Wutzler, George M., Waukegan, Ill. Coal-spout-operating device. 1,633,914; June 28.
Yanochowski, George A., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Condenser. 1,633,915; June 28.
Yngve, Victor, South Orange, N. J., assignor, by mesne assignments, to National Carbon Company, Inc., New York, N. Y. Dry cell. 1,634,006; June 28.
Young, Cecil G., U. S. Army, Dover, N. J. Apparatus for filling containers with explosives. 1,633,656; June 28.
Young, Daniel J., Tacoma, Wash. Refrigeration process and apparatus. 1,634,129; June 28.
Young, Jacob R. (See Kerr, J. B., and Young.)
Young, James V., Rushville, assignor to The Standard Manufacturing Company, Cambridge City, Ind. Folding chair. 1,633,721; June 28.
Youtz, Jesse P., Rio De Janeiro, Brazil, assignor to General Electric Company. Projection lantern. 1,633,837; June 28.
Zahn, Karl. (See Nawiasky, P., Zahn, and Saurwein.)
Zeh, Ludwig. (See Duisberg, W., Hentrich, Zeh, and Huismann.)
Zehmann, Arthur, Rossberg-Beuthen, Germany. Sliding window. 1,633,968; June 28.
Zimmer, Albert E. (See Campbell, A., and Zimmer.)
Zimmerman, Henry R., Topeka, Kans. Light-projecting device. 1,633,838; June 28.
Zimmermann, William F., Maplewood, assignor to Gould & Eberhardt, Newark, N. J. Simplified hobber. 1,634,130; June 28.
Zint, George, Wapakoneta, Ohio. Lawn-sprinkler bearing assembly. 1,633,879; June 28.
Zitscher, Arthur, and R. Schmitt, Offenbach-on-the-Main, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Di-acylacetyl-arylenediamine and making same. 1,634,090; June 28.
Zoufal, Frank, Cicero, assignor of one-half to W. P. Pondelicek, Berwyn, Ill. Hinge. 1,633,916; June 28.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 28TH DAY OF JUNE, 1927.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Accounting machines, Carrying mechanism for. J. Boyer. 1,634,068; June 28.
Acid, Recovering hydrochloric. H. Terrisse and M. Lévy. 1,633,877; June 28.
Acids, Producing lead compounds of chromic. A. Nathansohn. 1,633,948; June 28.
Adding machines, Nonprint mechanism for. H. Landsiedel. 1,633,788; June 28.
Advertising device. C. N. Harmon and J. P. Dames. 1,633,635; June 28.
Agitator. R. E. Minogue. 1,633,708; June 28.
Air and separation into oxygen and nitrogen, Liquefaction of. E. G. Luening. 1,634,076; June 28.
Air compressor. V. E. Clark. 1,634,093; June 28.
Airplane. G. Figlietti. 1,633,889; June 28.
Airplane. H. Wiese. 1,633,719; June 28.
Airplanes, Electrical generating apparatus for. G. A. Wilson. 1,634,167; June 28.
Alloy. W. E. Ruder. 1,633,826; June 28.
Alloy, Heat-resisting. G. R. Brophy. 1,633,805; June 28.
Aluminum-chloride production. E. R. Wolcott. 1,633,835; June 28.
Amusement apparatus. J. D. Pontious. 1,633,751; June 28.
Animal and bird trap. D. Gonzalez. 1,633,857; June 28.
Antenna arrangement for short-wave apparatus. A. Esau. 1,633,775; June 28.
Antimony sulphide, Making precipitated. R. E. Stark. 1,633,754; June 28.
Appliqué trimming. W. W. Hobe. Des. 72,947–9; June 28.
Ash-handling equipment. F. B. Allen. 1,634,228; June 28.
Astronomical device. D. Phillips. 1,634,207; June 28.
Auto lock. L. R. Fulton. 1,634,099; June 28.
Automatic gate. R. I. Farrell. 1,634,025; June 28.
Automobile body construction. G. Fauser. 1,633,729; June 28.
Automobile brake. W. B. Fageol. 1,633,776; June 28.
Automobile heater. H. B. Tyler. 1,633,717; June 28.
Automobile radiators, Condenser for. G. D. Roberts. 1,634,211; June 28.
Automobile seats, Cushioning means for tiltable. C. C. Davis and G. I. Clarke. 1,633,697; June 28.
Automobile signal device. F. A. Purcell. 1,633,677; June 28.
Aviation device. E. G. Still. 1,634,239; June 28.
Azo dyestuffs derived from formaldehyde sulphurous acid and nitrated 1-(azo-naphthol)-2-hydroxy-naphthalene-4-sulphonic acid and making same, Chromable. F. Straub and H. Schneider. 1,633,874; June 28.
Baffle, Superheater. B. Broido. 1,633,975; June 28.
Baking pan, Reenforced. A. Katzinger. 1,634,248; June 28.
Bandages, Fastener particularly for. R. Schuftan. 1,633,681; June 28.
Bank, Calendar. W. E. Smily, T. Hannah, and M. E. Winans. 1,633,873; June 28.
Barrette. F. Sokol. 1,633,616; June 28.
Bathtub. C. T. E. Gould. 1,633,582; June 28.
Bathtub and shower casing, Combined. F. Fort. Des. 72,942; June 28.
Bearing. C. Froesch. 1,633,580; June 28.
Bearing for railway axle journals. G. F. Endicott and G. H. Goodell. 1,633,852; June 28.
Bearing mounting. I. J. McCullough. 1,633,904; June 28.
Bell, Electric. W. F. Hendry. 1,633,583; June 28.
Belt connecter. G. G. Grace. 1,633,939; June 28.
Belt fastener. D. E. Lewellen. 1,634,034; June 28.
Belt splicer. D. E. Lewellen. 1,634,033; June 28.
Belts, Making laminated. E. F. Hathaway. 1,634,145; June 28.
Berry box, Collapsible. H. Petersen. 1,633,904; June 28.
Betaine hydrochloride, etc., Manufacture of. D. K. Tressler. 1,634,221; June 28.
Betaine hydrochloride, Preparing. D. K. Tressler. 1,634,222; June 28.
Binder, Loose-leaf. C. D. Trussell. 1,634,125; June 28.
Binders, Platform canvas-adjusting mechanism for grain. H. Hartvikson. 1,634,187; June 28.
Bird house. O. C. Reiber. 1,634,209; June 28.
Block: *See*—
  Building block.
Boiler: *See*—
  Locomotive boiler. Steam boiler.

Boiler. F. B. Howell. 1,633,666–7; June 28.
Boiler. T. E. Murray. 1,633,674; June 28.
Boilers, Baffle for water-tube. D. H. Mayo. 1,634,077; June 28.
Boilers, Water-tube bridge-wall baffle for steam. E. J. Franklin. 1,634,139; June 28.
Book, Match. G. F. Clark. 1,634,136; June 28.
Boot, Spring. J. W. and R. A. Watson. 1,634,163; June 28.
Boots and shoes, Machine for removing surplus material from. R. P. Frye. 1,633,855; June 28.
Boring-machine head. A. V. Rackstraw. 1,633,752; June 28.
Bottle. A. H. Johnson. Des. 72,951; June 28.
Bottle. G. N. Mas. Des. 72,954–63; June 28.
Bottle. M. S. Walker. Des. 72,973; June 28.
Bottle washing and sterilizing apparatus. L. Rosenfeld. 1,634,215; June 28.
Box: *See*—
  Berry box. Paper box.
  Dispenser box.
Box. E. Kramer. Des. 72,952; June 28.
Box. F. J. Schleicher. Des. 72,967; June 28.
Boxes, Machine for use in making. R. Steele. 1,634,049; June 28.
Bracelet. A. Eklund. 1,633,575; June 28.
Bracket. J. A. Tesk. 1,634,162; June 28.
Brake: *See*—
  Automobile brake.
Brake mechanism. K. Berger. 1,633,919; June 28.
Brake of the expanding-shoe type. G. Fornaca. 1,633,984; June 28.
Breathing and vocal attachment. E. I. McKesson. 1,633,705; June 28.
Bridge, Bascule. L. R. Ash, H. C. Tammen, and H. G. Hunter. 1,633,565; June 28.
Bridges, plates, and the like in timepiece movements, counting mechanisms, and like apparatus, Assembling device for. C. Rosat. 1,634,214; June 28.
Brief case. S. H. Lifton. 1,633,991; June 28.
Broom, Hearth. H. Broadwood. Des. 72,933; June 28.
Brush and polisher, Combined. F. A. Lisi. 1,633,898; June 28.
Brush, Dynamo. N. R. Haas. 1,633,740; June 28.
Brush, Hair. F. W. Kellogg. 1,633,894; June 28.
Building block. R. L. Morris. 1,634,157; June 28.
Building construction, Concrete form for. E. E. Seelye. 1,633,715; June 28.
Building structure. J. M. Hewlett and R. B. Fuller. 1,633,702; June 28.
Building structure comprising water receptors. C. W. Stark. 1,633,685; June 28.
Bumper. G. C. Geanopulos. 1,633,782; June 28.
Bumper, Automobile. S. Otis. 1,633,603; June 28.
Bumper mechanism. E. F. Ohlendorf. 1,633,901; June 28.
Burner: *See*—
  Sulphur burner.
Buttons, Sewing on. C. T. A. Sibbald and J. B. Ransom. 1,633,614; June 28.
Caliper. H. Coullery. 1,634,019; June 28.
Caliper and divider, Combined. U. G. Sweeney. 1,633,875; June 28.
Caliper, Internal micrometer. P. J. Darlington. 1,633,807; June 28.
Camping outfit, Adjustable trunk-rack. T. J. Long and J. L. Tuttle. 1,633,820; June 28.
Can: *See*—
  Paper can.
Cans, Machine for boxing or casing. A. H. Kyler. 1,634,031; June 28.
Cap, Bathing. H. A. Bauman and R. M. Pierson. Des. 72,926; June 28.
Car, Cupola-charging. J. K. Clutts. 1,633,693; June 28.
Car-door-locking mechanism. A. Campbell and A. E. Zimmer. 1,633,762; June 28.
Car, Railway. H. T. Anderson. 1,634,008; June 28.
Car, Railway dump. W. J. Hoscelt and D. Hindahl. 1,634,107; June 28.
Car structure, Grain-. J. P. Polnaszek. 1,634,118; June 28.
Car, Tank. F. G. Garlick. 1,633,811; June 28.
Cars, Door mechanism for railway. W. E. Wine. 1,634,225; June 28.
Cars, Grain door for freight. N. E. Bray. 1,634,015; June 28.

Cars, Striking plate for. B. F. Faunce and H. C. Dorris. 1,633,934; June 28.
Carbonating apparatus. T. B. Slate. 1,634,089; June 28.
Card-feeding apparatus. E. A. Ford. 1,633,937; June 28.
Carpenter's gauge. J. H. Edmondson. 1,634,178; June 28.
Carriage, Collapsible baby. S. L. Klingelsmith and F. J. Koepke. 1,633,864; June 28.
Carton-handling apparatus. M. McFaull and A. E. Rideout. 1,634,078; June 28.
Case: *See*—
  Brief case.
Caster. N. L. and F. J. Jarvis. 1,633,638; June 28.
Casting apparatus, Metal-. C. L. Lee and T. C. Van Degrift. 1,634,152; June 28.
Casting machine, Continuous centrifugal. L. T. Knocke. 1,634,150; June 28.
Cellulose-ester composition. G. L. Schwartz. 1,633,683; June 28.
Cement composition. R. S. Lindstrom. 1,633,790; June 28.
Centrifugal contact apparatus. P. M. Kuehn. 1,634,199; June 28.
Centrifugal machine and process involving the use of the same. L. D. Jones and A. U. Ayres. 1,634,245–6; June 28.
Centrifugal separator. L. D. Jones. 1,634,244; June 28.
Centrifugal treatment of substances, Method and mechanism for. L. D. Jones. 1,634,243; June 28.
Centrifuge effluents, Method and mechanism for removing. L. D. Jones. 1,634,242; June 28.
Chain ring, Trap-. L. M. Dart and G. G. Harris. 1,634,177; June 28.
Chain track drives, Chain wheel for. V. Jereczek. 1,633,746; June 28.
Chair: *See*—
  Folding chair.
Chandelier. J. A. Boehringer. Des. 72,927; June 28.
Chandelier body, Arm for a. J. A. Boehringer. Des. 72,929; June 28.
Check protector. S. E. Hoffman. 1,634,105; June 28.
Cheese mold. C. Pauly. 1,634,041; June 28.
Chicken feeder. H. C. Badenhop. 1,633,917; June 28.
Chuck. H. E. Sloan. 1,633,828; June 28.
Cigar-band feeding and moistening machine. W. H. Schussler. 1,634,053; June 28.
Cigar lighter. J. H. Cohen. Des. 72,935; June 28.
Cigarette holder. J. M. Martinez. Des. 72,953; June 28.
Circuit breaker. C. Anlborg. 1,633,969; June 28.
Circuits for voice-operated devices, Delay. H. C. Silent. 1,633,615; June 28.
Clamp: *See*—
  Column clamp. Type clamp.
  Knee clamp.
Clock and scale, Combination. F. E. Parkler. 1,634,039; June 28.
Clothesline fastener. F. Alexander. 1,633,722; June 28.
Clutch, Roller. S. H. Mortimer. 1,634,202; June 28.
Coal-spout-operating device. G. M. Wutzler. 1,633,914; June 28.
Coil, Electrical. C. H. Franks. 1,633,577; June 28.
Column clamp. C. L. Meyer. 1,634,111; June 28.
Comb. R. N. Hymer. 1,633,893; June 28.
Commutators, Manufacture of. J. J. Carter. 1,633,922; June 28.
Composite article and forming the same, Flexible. A. L. Brown. 1,633,976; June 28.
Compressor apparatus. W. Wilson. 1,634,062; June 28.
Compressor, Automotive. N. A. Christensen. 1,633,764; June 28.
Compressor, Automotive engine. N. A. Christensen. 1,633,770; June 28.
Compressor-controlling device. C. C. Farmer. 1,633,778; June 28.
Compressor, Direct-drive. N. A. Christensen. 1,633,767; June 28.
Compressor, Engine-driven. N. A. Christensen. 1,633,766; June 28.
Compressor, Front-end. N. A. Christensen. 1,633,771; June 28.
Compressor mounting. N. A. Christensen. 1,633,765; June 28.
Compressor, Multicylinder automotive. N. A. Christensen 1,633,769; June 28.
Compressor or pumping mechanism. F. A. Halleck. 1,633,699; June 28.
Concertina or accordion. R. C. Leppert. 1,634,108; June 28.
Concrete mixer. K. R. Schuster. 1,633,682; June 28.
Concrete or other material, Apparatus for making hollow bends, angles, or such like bodies of. W. A. Porter. 1,634,045; June 28.
Concrete piles or columns, Construction of. A. Hiley. 1,634,231; June 28.
Condensation products and dyestuffs of the benzanthrone series, Manufacture of. A. Lüttringhaus, H. Neresheimer, and H. Wolff. 1,633,866; June 28.
Condenser. E. F. Potter. 1,633,870; June 28.
Condenser. G. A. Yanochowski. 1,633,915; June 28.
Condenser, Electrical. W. A. Bocklus. 1,633,566; June 28.
Conductor support. S. S. Matthes. 1,633,867; June 28.
Container and cover therefor. T. M. Prudden. 1,633,605; June 28.
Container, Food. J. Korkames. 1,634,029; June 28.
Container for fruit-canning apparatus. A. T. Gahan. 1,633,856; June 28.
Container for table service. P. L. Ebarle. Des. 72,936; June 28.
Container for toothpicks, Envelope. G. Doscher. 1,634,096; June 28.
Controller, Reversing. A. C. Prescott. 1,633,825; June 28.
Core-tip-removing machine. E. Larbalester. 1,633,593; June 28.
Cork taps, Machine for the manufacture of. A. Parenti and V. Bolognini. 1,634,040; June 28.
Cotton chopper and weeder. E. W. Beasley. 1,634,010; June 28.
Cotton or other threads containing cellulose, Treating. G. Tagliani. 1,633,617; June 28.
Couplers open, Device for holding the movable jaws of. J. Hojnowski. 1,633,784; June 28.
Coupling: *See*—
  Train-pipe coupling.
Coupling. G. H. Fletcher and H. Rusby. 1,633,935; June 28.
Coupling. G. C. Long. 1,634,153; June 28.
Crackers and the product of said process, Producing. H. F. Rippey. 1,633,872; June 28.
Creasing device, Hand-operated. H. B. Walter. 1,633,655; June 28.
Crookes glass, Colorless. P. V. W. Gell, C. E. Gould, W. M. Hampton, and H. S. Martin. 1,634,182; June 28.
Cup: *See*—
  Grease cup.
Cup carton, Dispensing-. C. F. Dawson and E. G. Wessman. 1,633,983; June 28.
Cushion wheel, Pneumatic. J. B. Kerr and J. R. Young. 1,633,748; June 28.
Cutlery article. D. J. Giles. 1,633,783; June 28.
Cutter: *See*—
  Screw cutter.
Cutter and grinder, Feed. W. E. Fritz. 1,634,026; June 28.
Cutting machine. P. Wolkogon-Wolynski. 1,633,755; June 28.
Cylinders and the like and draining the same, Steam-heated. J. M. Arnot. 1,633,723; June 28.
Dental vibratory matrix. T. Teragawa. 1,634,058–9; June 28.
Dephlegmator. R. G. Jones. 1,633,990; June 28.
Detecting and measuring the uneveness of a surface, Device for. H. Andrew. 1,633,841; June 28.
Detector: *See*—
  Track detector.
Detectormeter. H. H. Duley. 1,633,930; June 28.
Di-acylacetyl-arylenediamine and making same. A. Zitscher and R. Schmitt. 1,634,090; June 28.
Diaphragm. A. Nyman. 1,633,950; June 28.
Dimmer switch, Electrical. W. Row. 1,633,647; June 28.
Disconnecting switch. H. J. Crabbs. 1,633,979; June 28.
Dish or similar article, Vegetable. J. Harrison. Des. 72,944; June 28.
Dishwashing machine. F. A. Bailin. 1,633,803; June 28.
Dishwashing machine. R. J. Irvin. 1,633,669; June 28.
Dishwashing machine. J. J. Owens. 1,634,038; June 28.
Dishwashing machine. F. A. Wilcox. 1,633,800; June 28.
Dispenser box. W. A. Lorenz. 1,633,865; June 28.
Dispensing machines, Coin-controlled actuating mechanism for. F. R. Oliver. 1,633,675; June 28.
Display package. F. G. Fisher. 1,633,779; June 28.
Doll, Poodle-dog. B. L. Henry. 1,634,189; June 28.
Door-holding device. S. Fronrath. 1,634,070; June 28.
Door knobs and automobile handles, Protector for glass and metal. G. Jones. 1,633,988; June 28.
Door-opening device. W. G. Petersen. 1,634,233; June 28.
Double-throw switch. M. Guett. 1,634,185; June 28.
Draft regulator, Chimney-. J. Subert. 1,633,687; June 28.
Draft yokes, Manufacturing. B. W. Kadel. 1,633,670; June 28.
Drafting device. J. O. Fortin. 1,633,628; June 28.
Drafting machine. J. O. Fortin. 1,633,629; June 28.
Drawing instrument, Protractor. F. N. Perrin. 1,633,903; June 28.
Drill spindles, Brake mechanism for. D. C. Klausmeyer. 1,634,149; June 28.
Drilling apparatus. W. Sheldon. 1,634,087; June 28.
Drink-dispensing machine. J. H. McLellan. 1,634,036; June 28.
Dross furnace. G. C. Schimpf. 1,634,217; June 28.
Drums, sleeves, and the like, Adjustable bearing mechanism for. G. R. Taaffe. 1,635,797; June 28.
Dry cell. V. Yngve. 1,634,000; June 28.
Drying means a large superficial area, Imparting to. E. Smolczyk. 1,633,959; June 28.
Dump-bottom extractor. E. J. Carroll. 1,633,570; June 28.
Duplicators, Adjustable-delivery ink container for rotary. L. L. Lievens. 1,633,596; June 28.
Dust collector. A. F. Nesbit. 1,633,602; June 28.
Dyestuffs, Manufacture of vat. P. Nawiasky, K. Zahn, and K. Saurwein. 1,633,997; June 28.
Electric candle cup. J. A. Boehringer. Des. 72,931; June 28.
Electric furnace. J. C. Woodson. 1,633,967; June 28.
Electric heater. A. W. Daniel. 1,633,573; June 28.
Electric heater. R. S. Smart. 1,634,046; June 28.
Electric machines and apparatus, Machine for tightening the insulation applied on winding bars of. E. Haefely. 1,633,741; June 28.

Electric machines, Regulating system for dynamo-. R. E. Doherty. 1,633,808; June 28.
Electric meter and the mounting thereof. F. W. Erickson. 1,634,098; June 28.
Electric-socket cover. J. A. Boehringer. Des. 72,928; June 28.
Electric switch. H. J. L. Frank. 1,633,578; June 28.
Electric terminal. F. C. Kelley. 1,633,815; June 28.
Electric wall-bracket plate. J. A. Boehringer. Des. 72,930; June 28.
Electric wall-bracket plate. J. A. Boehringer. Des. 72,932; June 28.
Electrical conductors, Connecter for. E. R. Barany. 1,634,065; June 28.
Electrical connecter. E. W. Breisch. 1,633,974; June 28.
Electrical distribution, System of. E. M. Bill. 1,633,804; June 28.
Electrical interference, Preventing. R. B. Shanck. 1,633,611; June 28.
Electrically-operated devices, Timer for. E. A. Rutenber. 1,634,083; June 28.
Electrode, Diathermic. M. Stern. 1,633,649; June 28.
Electromagnetic operating means and motor controller employing the same. R. W. Goff. 1,633,812; June 28.
Elevators, lifts, or the like, Safety catch for. J. Wüstenhöfer. 1,633,836; June 28.
End gate. H. O. Wenzel. 1,634,224; June 28.
Endless drier for macaroni. G. Bagnani. 1,634,009; June 28.
Engine: *See*—
Internal-combustion engine. Oil engine.
Engine compressor, Automotive. N. A. Christensen. 1,633,768; June 28.
Engine decarbonizer, Internal-combustion. A. Moore. 1,633,791; June 28.
Engine starter. S. L. Kelly and L. E. Koos. 1,633,862; June 28.
Engine-starter drive. S. L. Kelly and L. E. Koos. 1,633,863; June 28.
Engine-starting apparatus. W. A. Chryst. 1,633,925; June 28.
Engine with four or more working cylinders, Explosion. S. Lindequist. 1,634,249; June 28.
Engine with inclined cylinders, Internal-combustion. G. C. Cappa. 1,634,017; June 28.
Engines, Fuel regulation device for internal-combustion. R. O. Donnelly. 1,633,928; June 28.
Engines, Oiling system for internal-combustion. A. Taub. 1,634,123; June 28.
Envelope machine. A. Olgay. 1,634,080; June 28.
Eraser, Ink. G. Schrade. 1,634,120; June 28.
Exhaust gas heater. C. Forth. 1,633,853; June 28.
Explosives, Apparatus for filling containers with. C. G. Young. 1,633,656; June 28.
Extension table. P. Nyholm. 1,633,899; June 28.
Extension table, Revolving-leaf. P. Nyholm. 1,633,900; June 28.
Extractor: *See*—
Dump-bottom extractor.
Eye- Artificial. R. Greiner. 1,633,986; June 28.
Eye-testing device. E. J. Brown. 1,633,658; June 28.
Eyeglass. M. Mayer, K. Finckh, and F. Koref. 1,633,946; June 28.
Fabric: *See*—
Ornamental fabric.
Fan. G. H. Schieter. 1,633,957; June 28.
Fans, Apparatus for imparting an oscillating motion to rotating. J. N. Gilbert. 1,634,140; June 28.
Farming implement. J. B. Ramos. 1,633,905; June 28.
Fastener. F. Wolf. 1,633,966; June 28.
Fastening device. V. L. Harvey. 1,633,859; June 28.
Faucet, Safety. C. J. Gordon and D. D. Goldberg. 1,633,581; June 28.
Feed mechanism, Flat-. L. E. La Bombard and M. H. Sidebotham. 1,634,072; June 28.
Fence. J. Ward. 1,633,619; June 28.
Fermentation apparatus. G. E. Thomas. 1,633,618; June 28.
Fiber and producing same, Retted bagasse. E. C. Lathrop and T. B. Munroe. 1,633,594; June 28.
Fibers, Weighing. O. Berg and M. Imhoff. 1,634,012; June 28.
Fibrous material, Process and apparatus for digesting or cooking. F. K. Fish, jr. 1,633,734; June 28.
Fibrous materials, Composition for impregnating. W. Tom. 1,634,002; June 28.
Fibrous matters, Boiling. N. K. F. Hanson. 1,634,143; June 28.
Filter. A. W. Kogstrom. 1,633,818; June 28.
Filtering device. W. B. Pumphrey. 1,633,604; June 28.
Filtering element. J. J. Naugle. 1,633,709; June 28.
Fire door. H. D. Barbee. 1,633,757; June 28.
Fire extinguisher, Oil-well-controlled. T. B. Hawley. 1,633,813; June 28.
Fireworks holder. R. S. Moushon. 1,634,232; June 28.
Fishing line. J. Korkames. 1,634,030; June 28.
Flange setter, Ratchet. H. N. Long. 1,633,819; June 28.
Floor mat. J. J. O'Toole. 1,633,951; June 28.
Fluid-pressure-brake system. B. S. Aikman. 1,633,756; June 28.
Fluids, Apparatus for separating. H. T. Groves and J. W. Cushman. 1,633,858; June 28.
Folding chair. J. V. Young. 1,633,721; June 28.
Folding method and product. W. L. Dixon. 1,633,849; June 28.
Food articles, Apparatus for toasting. R. O. Hammond. 1,634,142; June 28.
Food product and making same. A. H. Moore. 1,634,113; June 28.
Forging machine. H. B. Halvorsen. 1,633,742; June 28.
Fruit, Sulphurizing, dehydrating, and desulphurizing. C. C. Moore. 1,633,823; June 28.
Fruit-tree prop-line support, Universal. J. L. Uhlik. 1,634,004; June 28.
Furnace: *See*—
Dross furnace. Electric furnace.
Furnace and ignition means therefor, Oil-burning. J. L. Breese, jr. 1,633,567; June 28.
Furnace for the treatment of pulverulent granular or pulpy material. L. Honigmann and F. Bartling. 1,634,027; June 28.
Furnace-fuel-feeding apparatus. T. Johnson. 1,633,640; June 28.
Fuse, Electrical. D. G. Robinson. 1,633,955; June 28.
Fuse mechanism. H. G. Baxter. 1,633,971; June 28.

Locomotive boiler. H. McCabe. 1,633,993; June 28.
Loom lock. R. B. Early. 1,633,727; June 28.
Looms, Auxiliary brake for. B. F. McGuiness. 1,633,644; June 28.
Looms, Chain control for Axminster. W. H. Wakefield. 1,633,654; June 28.
Looms, Filling stop motion for. W. H. Wakefield. 1,633,653; June 28.
Looms, Multiple-needle detector for. K. J. Unwin. 1,633,650; June 28.
Looms, Shuttle-changing apparatus for automatic. K. Toyoda. 1,633,062; June 28.
Looms, Shuttle placer for weft-replenishing. E. H. Ryon. 1,633,648; June 28.
Looms, Weft-detecting mechanism for drop-box. A. A. Gordon. 1,633,632; June 28.
Looms, Weft detector for. E. R. Holmes. 1,633,636; June 28.
Looms, Weight-controlled detector for. K. J. Unwin. 1,633,651; June 28.
Looms, Yieldable giveway for weft-replenishing. O. V. Payne. 1,633,646; June 28.
Lubricator. C. A. Campbell. 1,633,763; June 28.
Lubricator. J. F. MacIndoe. 1,634,109; June 28.
Machine for closing and sealing envelopes. R. Mohn. 1,633,750; June 28.
Machine spring. G. Rogerson. 1,634,212; June 28.
Machinery foundations. R. B. Grey. 1,633,940; June 28.
Maintenance record. C. Burris. 1,633,724; June 28.
Manifold and muffler, Exhaust. W. F. Smith. 1,634,000; June 28.
Mat: *See*—
Floor mat.
Material, Mechanism for handling. M. E. First. 1,633,627; June 28.
Measuring device, Grade-. G. C. Frantz. 1,633,854; June 28.
Measuring instrument. H. C. McCommon. 1,634,156; June 28.
Merchandise, Storage and display apparatus for. W. P. Rylander. 1,633,907; June 28.
Metal mercapto sulphonic compounds, Heavy. A. Feldt, W. Schoeller, and E. Borgwardt. 1,633,626; June 28.
Metal plates, Apparatus for flanging and bending. G. Hughes. 1,633,744; June 28.
Meter: *See*—
Water meter.
Metering system, Remote. P. A. Borden. 1,633,973; June 28.
Mica onto a fibrous web, Apparatus for transferring. J. Borer. 1,633,622; June 28.
Microphone, Diaphragmless. E. Reisz. 1,634,210; June 28.
Milking machines, Milk appliance for use with. R. Preston. 1,633,953; June 28.
Mixer: *See*—
Concrete mixer.
Mold: *See*—
Cheese mold. Vulcanizing mold.
Mold. G. I. Smith. 1,634,047; June 28.
Mop. H. M. Sturgis. 1,633,830; June 28.
Mop, Wet. W. Hertzberg. 1,633,584; June 28.
Mortar and the like, Trench. H. Newton. 1,633,710; June 28.
Mortising machine. A. V. Edwards. 1,634,097; June 28.
Motor: *See*—
Nonsynchronous motor. Wind motor.
Motor control, System of. N. Minorsky. 1,633,822; June 28.
Motor controller. G. R. Townsend. 1,633,833; June 28.
Motor starter, Synchronous. W. C. Goodwin. 1,633,938; June 28.
Motor-starting system. C. A. Johnson. 1,633,943; June 28.
Motor-starting system. R. J. Wensley. 1,633,965; June 28.
Mowers, Rake attachment for lawn. E. S. Wright. 1,633,802; June 28.
Musical instruments, Pneumatic player mechanism for. T. P. Brown. 1,634,171; June 28.
Mustache, Apparatus for the cut of the. P. L. M. V. Caimels. 1,633,978; June 28.
Nail-sorting device. O. H. Hoyda. 1,634,102; June 28.
Nailing machines, Nail box for. E. Allbert. 1,634,226; June 28.
Necktie and lining therefor. H. Leoni. 1,634,032; June 28.
Needle. E. Dziuk. 1,633,726; June 28.
Needle detectors, Stop for weights of multiple-. A. A. Gordon. 1,633,631; June 28.
Needle detectors, Stop for weights of multiple-. E. R. Holmes. 1,633,637; June 28.
Nipple, Nursing-bottle. A. M. Brown. 1,634,170; June 28.
Nonsynchronous motor. V. A. Fynn. 1,633,891; June 28.
Novelty box. B. Friedman. Des. 72,943; June 28.
Nut encasement. E. R. Johns. 1,633,639; June 28.
Ohmmeter, Indicating. C. E. Vawter. 1,633,912; June 28.
Oil engine. O. A. Banner. 1,634,132; June 28.
Oil, Method of and apparatus for recovering. L. Ranney. 1,634,235–6; June 28.
Oil treatments, Revivifying spent adsorbents for. P. W. Prutzman. 1,633,871; June 28.
Oil-well regulation method and means. J. F. Ryan. 1,634,085; June 28.
Oils and organic solvents, Removing suspended matters from. H. Hey. 1,633,941–2; June 28.
Oils, Preventing acidity in. C. J. Rodman. 1,633,956; June 28.
Oiler, Upper-cylinder. C. C. Bogardus. 1,634,134; June 28.
Omega-aminoalkyl-aminonaphthalenes. W. Duisberg, W. Hentrich, L. Zeh, and J. Huismann. 1,633,929; June 28.
Ornament for garments, Butterfly. E. Danielson. Des. 72,940; June 28.
Ornamented fabric. F. E. Fuhrer. 1,633,630; June 28.
Oven, Coking retort. J. van Ackeren. 1,633,911; June 28.
Packer, Fruit. R. P. Clark. 1,633,571; June 28.
Pad: *See*—
Sudatory receptor pad.
Pan: *See*—
Baking pan.
Paper and container made therefrom, Oil and grease proof. O. Kress. 1,633,787; June 28.
Paper box, Reenforced and leak-tight. E. W. Labombarde. 1,634,073; June 28.
Paper can. R. A. Bennett and A. M. Boothby. 1,633,884; June 28.
Paper, Device for making rolls of. H. Liebeck. 1,633,595; June 28.
Paper machines, Attachment for. J. Schell and O. T. Paterson. 1,634,159; June 28.

Paper-making device. S. A. Staege. 1,633,900; June 28.
Paper, Method of and apparatus for controlling the moisture content of. F. E. P. Klages. 1,633,817; June 28.
Paper pulp, Apparatus and making. F. K. Fish, jr. 1,633,730; June 28.
Paper pulp, Preparing. F. K. Fish, jr. 1,633,736; June 28.
Paving composition, Asphaltic. C. N. Forrest. 1,634,241; June 28.
Pen, Fountain. T. Kovács. 1,633,896; June 28.
Petroleum-oil composition. A. A. Somerville. 1,634,054; June 28.
Phonograph tone arm and resonator. W. T. Carnes 1,633,624; June 28.
Photographic transparency and coloring same. A. G. Wallingham. 1,633,652; June 28.
Pin: *See*—
Wrist pin.
Pipes, Machine for shaping. J. H. Taylor. 1,634,057; June 28.
Pipette. M. Gervais and W. Biron. 1,634,183; June 28.
Piston. G. S. Evans. 1,634,024; June 28.
Piston. J. D. Lannon and R. R. Todd. 1,634,151; June 28.
Piston. W. W. Muir. 1,634,037; June 28.
Piston packing. C. L. Cook. 1,634,018; June 28.
Planing or scarifying mechanism. F. M. Hargrave 1,634,144; June 28.
Plant material, Treating. F. K. Fish, jr. 1,633,731; June 28.
Plate or similar article. A. Hashagen. Des. 72,945; June 28.
Play-ball covering. B. L. Henry. 1,634,146; June 28.
Pocket lighter. A. F. Reilly. Des. 72,965; June 28.
Polisher, Roll. H. D. Weisgerber. 1,634,005; June 28.
Polyolefin glycol and making the same, Ether of. J. G Davidson. 1,633,927; June 28.
Post. H. Barkschat. Des. 72,924; June 28.
Poultry feeder. H. Ahlrichs. 1,633,880; June 28.
Powder puff. J. J. Cosin. 1,634,175; June 28.
Power take-off. T. A. Jones. 1,633,814; June 28.
Power transmissions, Fluid-pressure control for. R. Q. Davis. 1,633,981; June 28.
Press: *See*—
Printing press.
Printing press. R. Adams. 1,633,564; June 28.

Glow-discharge tube.
Tube-cleaning projectile. G. C. Cook and J. A. Coleman. 1,634,094; June 28.
Tubes, Connecting. J. A. Taylor. 1,633,798; June 28.
Tubes, Process and apparatus for forming. A. M. Bates. 1,634,067; June 28.
Tubing and apparatus therefor, Treating. A. M. Bates. 1,634,066; June 28.
Turntable, Transfer. R. Craig. 1,633,980; June 28.
Type clamp, Galley. E. W. Beedle. 1,633,918; June 28.
Typewriter. J. Hilgert. 1,633,665; June 28.
Typewriter. H. Peeters. 1,634,042; June 28.
Umbrella attachment. E. R. Sweeting. 1,633,961; June 28.
Undergarment, Union. A. T. Berry. 1,633,972; June 28.
Underreamer. E. Timbs. 1,634,001; June 28.
Vacuum-cleaner device. S. McClatchie. 1,633,598; June 28.
Valve. O. Larsen. 1,634,075; June 28.
Valve-actuating mechanism. C. R. Kinkaid and E. T. Shreve. 1,634,198; June 28.
Valve, Automatic weight opening. J. W. Casey. 1,633,923; June 28.
Valve, Compressor. H. T. Blom. 1,634,247; June 28.
Valve device, Feed-. C. C. Farmer. 1,633,728; June 28.
Valve device, Retarded release-. C. C. Farmer. 1,633,777; June 28.
Valve, Engine. A. E. Colchester. 1,633,694; June 28.
Valve mechanism. L. J. Clapp. 1,633,692; June 28.
Valve mechanism. L. J. Clapp. 1,633,772; June 28.
Valve, Nonrevoluble. W. G. Wilson. 1,633,690; June 28.
Valve-operating mechanism. E. M. Ballot. 1,633,882; June 28.
Valve, Pump. W. R. Hamilton. 1,634,141; June 28.
Valve-seat retainer. G. E. Putnam. 1,634,081; June 28.
Valve, Thermostatic. L. W. Schnepp. 1,633,908; June 28.
Vanity case. M. C. de Botelho. Des. 72,941; June 28.
Vehicle. E. Curran and J. J. Hickey. 1,634,021; June 28.
Vehicle brake mechanism. J. F. Craig. 1,633,773; June 28.
Vehicle having four-wheel brakes. D. E. Anderson. 1,634,131; June 28.
Vehicle road springs, Attachment of motor-. D. Robertson. 1,634,158; June 28.
Vehicle signal. A. Wellert. 1,633,964; June 28.
Vehicle signal, Motor-. S. L. Brafman. 1,634,014; June 28.
Vehicle speed limit indicating and control means. L. R. Cordray. 1,634,069; June 28.
Vehicle wheel. R. Riehl. 1,633,606; June 28.
Vehicles, Braking of motor and other. P. Hallot. 1,634,186; June 28.
Vehicles, Power-take-up mechanism for motor. R. F. Crawford. 1,633,847; June 28.
Vehicles, Shock absorber for spring. W. G. Cox. 1,634,095; June 28.
Vehicles, Spring suspension of. F. S. Farnsworth. 1,633,933; June 28.
Vehicles, Variable-speed gear for motor. J. Bethune. 1,634,091; June 28.
Ventilating apparatus. J. M. Frank and A. G. Sutcliffe. 1,633,579; June 28.
Ventilator. J. Goldstein. 1,634,184; June 28.
Vitamin food product and method. R. K. Prince. 1,633,711; June 28.
Vulcanizing material, Method of and apparatus for. C. D. Hart. 1,633,592; June 28.
Vulcanizing material, Method of and apparatus for. L. F. Lamplough. 1,633,591; June 28.
Vulcanizing mold. E. Hopkinson. 1,634,106; June 28.
Waffle iron. J. H. Procter. 1,633,954; June 28.
Wall boards composed of rice hulls and plaster, Manufacturing. T. Nishi. 1,634,079; June 28.
Wallet, File. E. F. Ahlquist. 1,634,064; June 28.
Washing machine. C. G. Sinclair. 1,633,796; June 28.
Washing machine. C. G. Sinclair. 1,634,238; June 28.
Waste receiver. M. W. Thaete. 1,633,688; June 28.
Watchcases, Making. I. Dinstman. 1,633,661; June 28.
Water heater arrangement, Feed-. N. T. McKee. 1,633,947; June 28.
Water meter, Irrigating and mining. G. W. Beattie. 1,634,011; June 28.
Weed eradicator. F. K. Carrick. 1,634,172; June 28.
Weighing apparatus with tare weighing, Automatic. B. Boulogne. 1,633,623; June 28.
Well-drilling apparatus. J. W. MacClatchie. 1,633,945; June 28.
Wheel: *See*—
Cushion wheel. Vehicle wheel.
Tread wheel.
Whipping or prodding device. W. Huber. 1,634,193; June 28.
Wind motor. G. R. Bishop. 1,633,842; June 28.
Window barrier. L. Dandridge. 1,633,848; June 28.
Window, Combined sliding and swinging. C. A. Lewis. 1,633,789; June 28.
Window-sash-fastening device, Adjustable. A. Ingman. 1,633,861; June 28.
Window, Sliding. A. Zebmann. 1,633,968; June 28.
Windshield wiper. H. E. Marsh. 1,633,597; June 28.
Wireless receiving system. F. B. Falknor. 1,633,932; June 28.
Wood pulp, Process and apparatus for manufacturing ground. F. K. Fish, jr. 1,633,733; June 28.
Wrapping machine for wrapping or parceling toffee, chocolate, or the like. H. Bradwell. 1,634,229; June 28.
Wrist pin. O. C. Willis and O. Cox. 1,634,166; June 28.
X-ray screen for taking skiagrams. R. Mannl. 1,633,706; June 28.
Zinc-bearing ores and metallurgical products, Treatment of. H. W. Gepp, H. Hey, G. Rigg, R. H. Stevens, and R. T. D. Williams. 1,634,100; June 28.

CLASSIFICATION OF PATENTS

ISSUED JUNE 28, 1927.

NOTE.—First number=class, second number=subclass, third number=patent number.

1— 5: 1,634,226
8.3: 1,634,049
2— 14: 1,633,946
19: 1,633,926
78: 1,633,972
143: 1,633,849
146: 1,634,032
171: 1,633,586
224: 1,633,610
228: 1,633,607
278: 1,633,630
3— 1: 1,633,705
13: 1,633,986
4— 181: 1,633,582
185: 1,633,951
5— 119: 1,633,820
8— 5: 1,633,617
13: 1,634,012
10— 141: 1,633,913
12— 83.5: 1,633,855
14— 36: 1,633,565
15—104.06: 1,634,094
114: 1,633,898
128: 1,633,643
155: 1,633,598
202: 1,633,894
228: 1,633,594
1,633,930
253: 1,633,597
16— 35: 1,633,638
136: 1,634,181
140: 1,634,052
149: 1,633,916
18— 38: 1,633,587
47: 1,634,106
47.5: 1,634,079
50: 1,634,124
53: 1,633,590
1,633,591
1,633,592
1,634,160
20— 32: 1,634,015
50: 1,633,789
52: 1,633,908
71: 1,633,848
22— 65: 1,634,150
79: 1,633,992
81: 1,633,876
154: 1,634,152
23— 57: 1,633,948
60: 1,633,934
88: 1,634,122
95: 1,633,835
126: 1,634,100
154: 1,633,877
253: 1,633,618
256: 1,633,881
278: 1,634,092
292: 1,634,183
24— 33: 1,633,939
37: 1,634,033
1,634,034
87: 1,633,681
1,633,966
129: 1,633,722
219: 1,634,230
1,634,234
25— 99: 1,634,047
118: 1,634,045
131.5: 1,633,715
142: 1,633,820
29— 33: 1,633,714
69: 1,633,996
83: 1,634,164
88.2: 1,633,593
155.5: 1,633,922
167: 1,633,670
179: 1,633,661
30— 9: 1,633,783
12: 1,633,739
31— 58: 1,633,953
32— 9: 1,633,660
10: 1,634,058
